"(d) If it shall appear at any time that there has been a loss of distilled spirits from any cask or other package deposited in an Internal Revenue bonded warehouses, other than the loss provided for in section 3221 of the Revised Statutes, as amended, which, in the opinion of the Commissioner of Internal Revenue, is excessive, he may instruct the district supervisor of the district in which the loss has occurred to require the withdrawal from warehouse of such distilled spirits and direct the collector of internal revenue to collect the tax accrued upon the original quantity of distilled spirits entered into the warehouse in such cask or package, notwithstanding that the time specified in any bond given for the withdrawal of the spirits entered into warehouse in such cask or package has not expired. If the said tax is not paid on demand, the collector shall report the amount due upon his next monthly list, and it shall be assessed and collected as other taxes are assessed and collected."

The amendment was agreed to.

The next amendment was, on page 32, after line 20, to strike out:

SEC. 310. Section 3302 of the Revised Statutes (26 U. S. C., sec. 365; U. S. C., Supp. VII, title 26, sec. 1229) is amended to read as follows:

"SEC. 3302. (a) The storekeeper-gauger assigned to any distillery warehouse shall, in addition to all other duties required to be performed by him, keep in a book to be provided for that purpose, and in the manner prescribed by the Commissioner of Internal Revenue, a daily account of all the meal and vegetable productions or other substances brought into said distillery, or on said premises, to be used for the purpose of producing spirits, from whom purchased, and when delivered at said distillery; of the materials put into the mash tub or otherwise used for the production of spirits; of the time when any fermenting tub is emptied of ripe mash or beer, recording the same by the number painted on said tub; and of all spirits drawn off from the receiving cistern, and the time when the same were drawn off.

"(b) Whenever, under authority of law, the Secretary of the Treasury shall relieve a distiller from the survey requirements, he

may likewise relieve the storekeeper-gauger assigned to the distillery of such distiller from the requirements of this section as to recording of the time when any fermenting tub is emptied of ripe mash or beer."

And in lieu thereof to insert:

SEC. 310. Section 3302 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1229) is amended to read as follows:

"SEC. 3302. The storekeeper-gauger assigned to any distillery shall, in addition to all other duties required to be performed by him, keep records of the receipt and use of substances brought into said distillery, or on said premises, to be used for the purpose of producing spirits, and of all spirits drawn off from the receiving cistern, and the time when the same were drawn off, in such form as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall, by regulations, prescribe."

The amendment was agreed to.

The next amendment was, on page 34, after line 6, to strike out:

SEC. 311. Section 3303 of the Revised Statutes (26 U. S. C., sec. 314; U. S. C., Supp. VII, title 26, sec. 1192 (a)) is amended to read as follows:

"SEC. 3303. (a) Every person who makes or distills spirits, or owns any still, boiler, or other vessel used for the purpose of distilling spirits, or who has such still, boiler, or other vessel so used under his superintendence, either as agent or owner, or who uses any such still, boiler, or other vessel, shall from day to day make, or cause to be made, in a book or books, to be kept by him in such form as the Commissioner of Internal Revenue may prescribe, a true and exact entry of the kind of materials, and the quantity in pounds, bushels, or gallons purchased by him for the production of spirits, from whom and when purchased, and by what conveyance delivered at said distillery, and the amount paid therefor. And in another book he shall make like entry of the quantity of grain or other material used for the production of spirits, the time of day when any yeast or other composition is put into any mash or beer for the purpose of exciting fermentation, the quantity of mash in each tub, designating same by the number of the tub, the number of dry inches, that is to say, the number of inches between the top of each tub and the surface of the mash or beer therein at the time of yeasting, the gravity and temperature of the beer at the time of yeasting, and on every day thereafter its quantity, gravity, and temperature at the hour of 12 m.; also, of the time when any fermenting tub is emptied of ripe mash or beer, the number of gallons of spirits distilled, the number of gallons placed in the warehouse, and the proof thereof, the number of gallons sold or removed, with the proof thereof, and the name, place of business, and residence of the person to whom sold.

"(b) Whenever, under authority of law, the Secretary of the Treasury shall relieve a distiller from the survey requirements, he may likewise, by regulations, relieve such distiller from such of the requirements of this section relating or incidental to the survey as the Secretary determines may be waived without danger to the revenue."

And in lieu thereof to insert:

SEC. 311. Section 3303 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1192 (a)) is amended to read as follows:

"SEC. 3303. Every person who makes or distills spirits, or owns any still, boiler, or other vessel used for the purpose of distilling spirits, or who has such still, boiler, or other vessel so used under his superintendence, either as agent or owner, or who uses any such still, boiler, or other vessel, shall keep a record, in the form and manner prescribed by the Commissioner of Internal Revenue, of the receipt on the distillery premises, and the use thereon, of materials intended for use in the distillation of spirits, and of the number of gallons of spirits distilled, the number of gallons placed in the warehouse, and the proof thereof, the number of gallons sold or removed, with the proof thereof, and the name, place of business, and residence of the person to whom sold."

The amendment was agreed to.

The next amendment was, on page 36, line 11, after the words "Revised Statutes", to strike out "(26 U. S. C., sec. 325; U. S. C., Supp. VII, title 26, sec. 1203)" and insert "(U. S. C., 1934 ed., title 26, sec. 1203)", so as to read:

SEC. 312. Section 3331 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1203) is hereby amended to read as follows:

"SEC. 3331. Any distillery or distilling apparatus seized for any violation of law may, in the discretion of the court, be released before final judgment to a receiver appointed by the court to operate such distillery or apparatus. Such receiver shall give bond, which shall be approved in open court, with two or more competent personal sureties, or one approved corporate surety, for the full appraised value of all the property seized, to be ascertained by three competent appraisers designated and appointed by the court. Funds obtained from such operation shall be impounded as the court shall direct pending such final judgment."

The amendment was agreed to.

The next amendment was, on page 37, line 1, after "SEC. 313" and the period, to strike out "The following sections of law are amended as set out hereafter:" and insert:

(a) Section 3339 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1330 (a) and (b)), is further amended by adding a new paragraph at the end thereof reading as follows:

"The provisions of this section requiring the accounting of hogsheads, barrels, and fractional parts of barrels at the next higher quantity shall not apply where the contents of such hogsheads, barrels, or fractional parts of barrels are within the limits of tolerance established by the Commissioner of Internal Revenue by regulations which he is hereby authorized to prescribe with the approval of the Secretary of the Treasury; and no assessment shall be made and no tax shall be collected for any excess in any case where the contents of the hogsheads, barrels, or fractional parts of barrels heretofore or hereafter used are within the limits of the tolerance so prescribed."

In line 18, before the word "section", to strike out "(a)" and insert "(b)"; in line 19, after the word "amended" to strike out "(26 U. S. C., 511; U. S. C., Supp. VII, title 26, sec. 1332 (a) and (b) and 1337 (b))" and insert "(U. S. C., 1934 ed., title 26, secs. 1332 (a) and (b) and 1337 (b))"; on page 39, line 5, before the word "section", to strike out "(b)" and insert "(c)"; in the same line, after the words "Revised Statutes", to strike out "(26 U. S. C., sec. 514; U. S. C., Supp. VII, title 26, sec. 1333 (a))" and insert "(U. S. C., 1934 ed., title 26, sec. 1333 (a))"; in line 10, before the word "section", to strike out "(c)" and insert "(d)"; in the same line, after the words "Revised Statutes", to strike out "(26 U. S. C., sec. 519; U. S. C., Supp. VII, title 26, sec. 1334 (e))" and insert "(U. S. C., 1934 ed., title 26, sec. 1334 (e))"; in line 15, before the word "section", to strike out "(d)" and insert "(e)"; in the same line after the words "Revised Statutes", to strike out "(26 U. S. C., sec. 520; U. S. C., Supp. VII, title 26, sec. 1334 (f))" and insert "(U. S. C., 1934 ed., title 26, sec. 1334 (f))"; and after line 19, to insert:

(f) Notwithstanding any other provision of law, the Commissioner of Internal Revenue is authorized, if in his judgment the same can be done without danger to the revenue, to issue regulations, subject to the approval of the Secretary of the Treasury, under which any brewer may remove or transport, or cause to be removed or transported, in bulk, in any closed tank, tank car, hogshead, or other container or containers, any finished fermented malt liquor of his own manufacture, on which the tax has been fully paid, and in quantities of not less than 50 barrels at any one time, from his brewery or other place of manufacture to another brewery or to a depot, warehouse, racking room, or bottling house used exclusively for bottling, racking, storage, or sale, and provided such brewery, depot, warehouse, racking room, or bottling house is occupied and used solely by him, but to no other place, and such fermented liquor so transported may be there stored, carbonated, and bottled, or drawn into hogsheads, barrels, or fractional parts of barrels for sale. Such regulations shall provide the method of tax payment on such fermented malt liquor, and shall provide for any transit or other permits which the Commissioner of Internal Revenue may consider necessary for the proper protection of the revenue.

So as to read:

SEC. 313. (a) Section 3339 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1330 (a) and (b)), is further amended by adding a new paragraph at the end thereof reading as follows:

"The provisions of this section requiring the accounting of hogsheads, barrels, and fractional parts of barrels at the next higher quantity shall not apply where the contents of such hogsheads, barrels, or fractional parts of barrels are within the limits of tolerance established by the Commissioner of Internal Revenue by regulations which he is hereby authorized to prescribe with the approval of the Secretary of the Treasury; and no assessment shall be made and no tax shall be collected for any excess in any case where the contents of the hogsheads, barrels, or fractional parts of barrels heretofore or hereafter used are within the limits of the tolerance so prescribed."

(b) Section 3342 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, secs. 1332 (a) and (b) and 1337 (b)), is amended to read as follows:

"SEC. 3342. (a) Every brewer shall obtain, from the collector of the district in which his brewery or brewery-warehouse is situated, and not otherwise unless such collector shall fail to furnish the same upon application to him, the proper stamps.

"(b) Every brewer shall affix, upon the spigot hole in the head of every hogshead, barrel, or keg in which any fermented liquor is contained, when sold or removed from such brewery or warehouse (except in case of removal under permit, as hereinafter provided), a stamp denoting the amount of the tax required upon such fermented liquor, which stamp shall be destroyed by driving through the same the faucet through which the liquor is to be withdrawn, or an air faucet of equal size, at the time the hogshead, barrel, or keg is tapped, in case it is tapped through the other spigot hole (of which there shall be but two, one in the head and one in the side), and shall also, at the time of affixing such stamp, cancel the same by writing or imprinting thereon

the name of the person, firm, or corporation by whom such liquor was made, or the initial letters thereof, and the date when canceled: *Provided, however,* That the Commissioner of Internal Revenue may, in his discretion, authorize the use of such other tapping devices or faucets as will permit the affixing and destruction of stamps in a manner consistent with the protection of the revenue.

"(c) Every brewer who refuses or neglects to affix and cancel, in the manner provided under this section, the stamps required by law, or who affixes a false or fraudulent stamp, or knowingly permits the same to be done, shall pay a penalty of $100 for each hogshead, barrel, or keg on which such omission or fraud occurs, and be imprisoned not more than 1 year."

(c) Section 3345 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1333 (a)) is amended by striking out the phrase "in one vessel" where it appears after the phrase "or not less than six barrels."

(d) Section 3348 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1334 (e)) is amended by striking out "kegs, or other vessels" where it appears therein and inserting in lieu thereof "or kegs."

(e) Section 3349 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1334 (f)) is amended by striking out "keg, or other vessel" where it appears therein and inserting in lieu thereof "or keg."

(f) Notwithstanding any other provision of law, the Commissioner of Internal Revenue is authorized, if in his judgment the same can be done without danger to the revenue, to issue regulations, subject to the approval of the Secretary of the Treasury, under which any brewer may remove or transport, or cause to be removed or transported, in bulk, in any closed tank, tank car, hogshead, or other container or containers, any finished fermented malt liquor of his own manufacture, on which the tax has been fully paid, and in quantities of not less than 50 barrels at any one time, from his brewery or other place of manufacture to another brewery or to a depot, warehouse, racking room, or bottling house used exclusively for bottling, racking, storage, or sale, and provided such brewery, depot, warehouse, racking room, or bottling house is occupied and used solely by him, but to no other place, and such fermented liquor so transported may be there stored, carbonated, and bottled, or drawn into hogsheads, barrels, or fractional parts of barrels for sale. Such regulations shall provide the method of tax payment on such fermented malt liquor, and shall provide for any transit or other permits which the Commissioner of Internal Revenue may consider necessary for the proper protection of the revenue.

Mr. LA FOLLETTE. Mr. President, I desire to offer an amendment to the committee amendment on page 39. In line 21, I move to strike out the word "if" and insert "to the extent that,".

Mr. KING. I accept the amendment. The committee intended to offer it.

The amendment to the amendment was agreed to.

Mr. LA FOLLETTE. On page 40, in the same committee amendment, I move to strike out all of line 8, and in line 9 down to and including the word "him." The following words are to be stricken out:

And provided such brewery, depot, warehouse, racking room, or bottling house is occupied and used solely by him.

Mr. KING. I accept the amendment.

The amendment to the amendment was agreed to.

The amendment, as amended, was agreed to.

The next amendment was, on page 40, line 19, after the words "Revised Statutes", to strike out "(26 U. S. C., sec. 191; U. S. C., Supp. VII, title 26, sec. 1397 (b) (1))" and insert "(U. S. C., 1934 ed., title 26, sec. 1397 (b))"; and in line 23, after "Revised Statutes", to strike out "(26 U. S. C., secs. 193, 306; U. S. C., Supp. VII, title 26, secs. 1184, 1397 (a) (1))" and insert "(U. S. C., 1934 ed., title 26, secs. 1184 and 1397 (a) (1))", so as to read:

SEC. 314. (a) The last sentence of section 3242 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1397 (b)) is hereby repealed.

(b) The first sentence of section 3281 of the Revised Statutes (U. S. C., 1934 ed., title 26, secs. 1184 and 1397 (a) (1)), as amended, is further amended to read as follows:

"Any person who shall carry on the business of a brewer, rectifier, wholesale liquor dealer, retail liquor dealer, wholesale dealer in malt liquors, retail dealer in malt liquors, or manufacturer of stills, and willfully fails to pay the special tax as required by law, or who shall carry on the business of a distiller without having given bond as required by law, or who shall engage in or carry on the business of a distiller with intent to defraud the United States of the tax on the spirits distilled by him, or any part thereof, shall, for every such offense, be fined not less than $100 nor more than $5,000 and be imprisoned for not less than 30 days nor more than 2 years."

The amendment was agreed to.

The next amendment was, on page 41, line 15, after the words "Revised Statutes", to strike out "(26 U. S. C., sec. 502; U. S. C., Supp. VII, sec. 1334 (a))" and insert "(U. S. C., 1934 ed., title 26, sec. 1334 (a))", so as to read:

SEC. 315. Section 3335 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1334 (a)) is amended to read as follows:

"SEC. 3335. Every brewer shall, before commencing or continuing business, file with the officer designated for that purpose by the Commissioner of Internal Revenue a notice in writing and in the form prescribed by the Commissioner, with the approval of the Secretary of the Treasury. Such notice shall set forth (a) the name and residence of the brewer, and the names and residences of all such persons interested or to be interested in the business, directly or indirectly, as the Commissioner shall prescribe, (b) the precise place where the business is to be carried on, including a description of the premises on which the brewery is situated, the title of the brewer to the premises, and the name of the owner thereof, and (c) such additional particulars as the Commissioner shall prescribe as necessary for the protection of the revenue."

The amendment was agreed to.

The next amendment was, on page 42, line 11, after the word "amended", to strike out "(26 U. S. C., sec. 503; U. S. C., Supp. VII, title 26, sec. 1334 (b))" and insert "(U. S. C., 1934 ed., title 26, sec. 1334 (b))"; in line 19, after the figures "$1,000", to insert a colon and the following: "*Provided*, That if under such regulations bond in a penal sum in excess of $100,000 is required, no surety or collateral security shall be required for any such excess amount, but the brewer shall give an additional bond to cover such excess, which additional bond may be given without surety or collateral security"; and on page 43, line 11, after the word "aforesaid" and the period, to strike out "Once in every 4 years, and whenever" and insert "Whenever", so as to read:

SEC. 316. Section 3336 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1334 (b)), is further amended to read as follows:

"SEC. 3336. Every brewer, on filing notice as provided by law of his intention to commence or continue business, shall execute a bond to the United States in such penal sum, in proportion to the production capacity of the plant, as the Secretary of the Treasury shall by regulations prescribe, but in no event shall such sum be less than $1,000: *Provided*, That if under such regulations bond in a penal sum in excess of $100,000 is required, no surety or collateral security shall be required for any such excess amount, but the brewer shall give an additional bond to cover such excess, which additional bond may be given without surety or collateral security. The bond shall be conditioned that the brewer shall pay, or cause to be paid, as herein provided, the tax required by law on all beer, lager beer, ale, porter, and other fermented liquors made by or for him, before the same is sold or removed for consumption or sale, except as hereinafter provided; and that he shall keep, or cause to be kept, in the manner required by law, a book which shall be open to inspection by the proper officers, as by law required; and that he shall in all respects faithfully comply, without fraud or evasion, with all requirements of law relating to the manufacture and sale of any malt liquors aforesaid. Whenever required so to do by the Secretary of the Treasury, or such officer as may be designated by the Secretary of the Treasury, the brewer shall execute a new bond in the penal sum fixed in this section or prescribed in pursuance of this section, and conditioned as above provided, which bond shall be in lieu of any former bond or bonds of such brewer in respect to all liabilities accruing after its approval."

The amendment was agreed to.

The next amendment was, on page 43, line 20, after the word "amended", to strike out "(U. S. C., title 26, sec. 509; U. S. C., Supp. VII, title 26, sec. 1337 (a) (1), (2))" and insert "(U. S. C., 1934 ed., title 26, sec. 1337 (a))"; on page 44, line 24, after the word "premises", to insert "and bottling house"; and on page 45, after line 2, to strike out:

(d) The brewery premises shall consist of the land and buildings described in the brewer's notice and shall be used solely for the purposes of manufacturing beer, lager beer, ale, porter, and similar fermented malt liquors, cereal beverages containing less than one-half of 1 percent of alcohol by volume, vitamins, and ice; of drying spent grain from the brewery; and recovering carbon dioxide and yeast. The brewery bottling house shall be used solely for the purposes of bottling beer, lager beer, ale, porter, and similar fermented malt liquors, and cereal beverages containing less than one-half of 1 percent of alcohol by volume. Notwithstanding the foregoing provisions, where any such brewery premises or brewery bottling house is, on the date of the enactment of the Liquor Tax Administration Act, being used by any brewer for purposes other than those herein described, or the brewery bottling house is, on such date, being used for the bottling of soft drinks, the use of the brewery and bottling-house premises for such purposes may be continued by such brewer.

The brewery bottling house of any brewery shall not be used for the bottling of the product of any other brewery. Any brewer who uses his brewery or bottling house contrary to the provisions of this subsection shall be fined not more than $50 with respect to each day upon which any such use occurs.

And in lieu thereof to insert:

(d) The brewery premises shall consist of the land and buildings described as such in the brewer's notice and shall be used solely for the purposes of manufacturing beer, lager beer, ale, porter, and similar fermented malt liquors, cereal beverages containing less than one-half of 1 percent of alcohol by volume, vitamins, ice, malt, malt sirup; of drying spent grain and recovering and processing carbon dioxide and yeast; of storing bottles, packages, and supplies necessary or incidental to all such manufacture; and, under regulations issued by the Commissioner of Internal Revenue, for the purpose of manufacturing such other commodities or byproducts as he may find to be incidental to the manufacture of any such fermented malt liquors. The brewery bottling house shall be used solely for the purposes of bottling beer, lager beer, ale, porter, and similar fermented malt liquors; for bottling cereal beverages containing less than one-half of 1 percent of alcohol by volume; and for manufacturing, carbonating, and bottling soft drinks. The brewery bottling house of any brewery shall not be used for the bottling of the product of any other brewery, except under regulations prescribed by the Commissioner of Internal Revenue. Any brewer who uses his brewery or bottling house contrary to the provisions of this subsection shall be fined not more than $50 with respect to each day upon which any such use occurs.

So as to make the section read:

SEC. 317. Section 3340 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1337 (a)), is amended to read as follows:

"SEC. 3340. (a) Every owner, agent, or superintendent of any brewery, vessels, or utensils used in making fermented liquors, who evades or attempts to evade the payment of the tax thereon, or fraudulently neglects or refuses to make true and exact entry and report of the same in the manner required by law, or to do, or cause to be done, any of the things by law required to be done by him, or who intentionally makes false entry in said book or in said statement, or knowingly allows or procures the same to be done, shall—

"(1) forfeit, for every such offense, all the liquors made by him or for him, and all the vessels, utensils, and apparatus used in making the same; and

"(2) be liable to a penalty of not less than $500 nor more than $1,000, to be recovered with costs of suit, and shall be deemed guilty of a misdemeanor and be imprisoned for a term not exceeding 1 year.

"(b) Every brewer who neglects to keep books or refuses to furnish the account and duplicate thereof as provided by law, or refuses to permit the proper officer to examine the books in the manner provided, shall, for every such refusal or neglect, forfeit and pay the sum of $300.

"(c) For flagrant and willful removal of taxable malt liquors for consumption or sale, without payment of tax thereon, all the right, title, and interest of each person, who has knowingly suffered or permitted such removal or has connived at the same, in the lands and buildings constituting the brewery premises and bottling house shall be forfeited by a proceeding in rem in the district court of the United States having jurisdiction thereof.

"(d) The brewery premises shall consist of the land and buildings described as such in the brewer's notice and shall be used solely for the purposes of manufacturing beer, lager beer, ale, porter, and similar fermented malt liquors, cereal beverages containing less than one-half of 1 percent of alcohol by volume, vitamins, ice, malt, malt syrup; of drying spent grain and recovering and processing carbon dioxide and yeast; of storing bottles, packages, and supplies necessary or incidental to all such manufacture; and, under regulations issued by the Commissioner of Internal Revenue, for the purpose of manufacturing such other commodities or byproducts as he may find to be incidental to the manufacture of any such fermented malt liquors. The brewery bottling house shall be used solely for the purposes of bottling beer, lager beer, ale, porter, and similar fermented malt liquors; for bottling cereal beverages containing less than one-half of 1 percent of alcohol by volume; and for manufacturing, carbonating, and bottling soft drinks. The brewery bottling house of any brewery shall not be used for the bottling of the product of any other brewery except under regulations prescribed by the Commissioner of Internal Revenue. Any brewer who uses his brewery or bottling house contrary to the provisions of this subsection shall be fined not more than $50 with respect to each day upon which any such use occurs."

The amendment was agreed to.

The next amendment was, on page 47, line 9, before the word "Section", to insert "(a)"; in line 10, after the figures "1918", to strike out "(26 U. S. C., sec. 254; U. S. C., Supp. VII, title 26, sec. 1151)" and insert "as amended (U. S. C., 1934 ed., title 26, sec. 1151)", so as to read:

SEC. 319. (a) Section 605 of the Revenue Act of 1916, as amended (U. S. C., 1934 ed., title 26, sec. 1151), is amended by inserting, preceding the penalty paragraph the following new paragraph:

"The premises of a rectifier shall be as described in his notice and, whether they consist of an entire building or of rooms in a building, shall have means of ingress from and egress into a public street or yard, or into a public hall or elevator shaft leading into a public street or yard, and shall be used exclusively for the business of rectification and the bottling of liquors rectified by him thereon, and the bottling of wines and spirits without rectification. Notwithstanding the foregoing provisions, where any such premises are, on the date of the enactment of the Liquor Tax Administration Act, being used for purposes other than those herein described, such use may be continued for not more than 60 days after such date. Any rectifier who uses his rectifying premises contrary to the provisions of this paragraph shall be fined not more than $50 with respect to each day upon which any such use occurs, but shall not, on account of such use, be subject to the penalties otherwise prescribed in this section."

The amendment was agreed to.

The next amendment was, on page 48, after line 7, to insert:

(b) Section 605 of the Revenue Act of 1918, as amended, is amended by adding at the end thereof two new paragraphs, reading as follows:

"The filtering, clarifying, or purifying of wines on bonded winery premises shall not be deemed to be rectification within the meaning of paragraph 'Third' of section 3244 of the Revised Statutes. The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe such regulations under this section as he deems necessary.

"The manufacture of vermouth with fortified sweet wine on bonded winery premises shall not be deemed to be rectification within the meaning of paragraph 'Third' of section 3244 of the Revised Statutes, if distilled spirits are not added to the fortified sweet wine used in the manufacture thereof or to such vermouth during or after its manufacture. Such vermouth may be manufactured on bonded winery premises, but only in a separate department thereof having no interior communication with any other department or part of such premises, under such supervision and in accordance with such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe."

(c) So much of section 611 of the Revenue Act of 1918, as amended (relating to the tax on still wines) (U. S. C., 1934 ed., title 26, sec. 1300 (a) (1)), as reads:

"On wines containing not more than 14 percent of absolute alcohol, 10 cents per wine gallon, the percent of alcohol under this section to be reckoned by volume and not by weight;"

is amended to read as follows:

"On wines containing not more than 14 percent of absolute alcohol, 5 cents per wine gallon, the percent of alcohol under this section to be reckoned by volume and not by weight;".

(d) So much of section 613 of the Revenue Act of 1918, as amended (U. S. C., 1934 ed., title 26, sec. 1300 (a) (2)), as reads:

"Any of the foregoing articles containing more than 24 percent of absolute alcohol by volume shall be classed as distilled spirits and shall be taxed accordingly."

is amended to read as follows:

"Any of the foregoing articles containing more than 24 percent of absolute alcohol by volume (except vermouth, liqueurs, cordials, and similar compounds made in rectifying plants and containing tax-paid sweet wine, citrus-fruit wine, peach wine, cherry wine, berry wine, apricot wine, or apple wine fortified, respectively, with grape brandy, citrus-fruit brandy, peach brandy, cherry brandy, berry brandy, apricot brandy, or apple brandy) shall be classed as distilled spirits and shall be taxed accordingly.

"The Commissioner of Internal Revenue, subject to regulations prescribed by the Secretary of the Treasury, is authorized to remit, refund, and pay back all distilled spirits tax on such liqueurs, cordials, and similar compounds paid by rectifiers or assessed prior to the date of the enactment of the Liquor Tax Administration Act."

Mr. JOHNSON. Mr. President, I desire to offer an amendment which probably is formal in character, and to which I think there will be no objection. On page 48, line 12, I move to strike out "on bonded winery premises."

Mr. KING. Mr. President, I do not quite understand the purpose of the amendment offered by the Senator.

Mr. JOHNSON. It relates to the question of filtering, and the like, which may not occur on bonded winery premises. I understood that the amendment had been submitted to the Treasury representatives.

Mr. KING. I may say that as the language appears in the bill it was approved by Representative BUCK, we understood, and by Judge De Vries.

Mr. JOHNSON. Quite the contrary. I have been handed the amendment by those who are interested in it, with the assertion to me that it was unobjectionable. If the Senator wishes to have that particular amendment passed over, I have no objection.

Mr. KING. Let it be passed over, because there may be another amendment to the same section.

Mr. JOHNSON. Let me present the amendment.

On page 48, line 12, I move to strike out "on bonded winery premises."

On page 48, line 14, I move to insert the following after the words "Revised Statutes":

Twenty-sixth U. S. C. A., section 1398 (f).

Mr. KING. Let it be passed over. My understanding is that the Treasury Department representatives would not be willing to accept that amendment, because it would permit the clarification to take place in a rectifying plant rather than a bonded plant.

Mr. JOHNSON. Let me state the third amendment so that the Treasury representatives may have it before them.

On page 70, line 5, after the words "wines are", I move to insert the words "destroyed or."

The PRESIDENT pro tempore. The amendment will be passed over temporarily. The clerk will state the next amendment of the committee.

The next amendment was, on page 51, line 1, after the word "all", to strike out "intoxicating liquors" and insert "distilled spirits, wines, and fermented malt liquors", so as to make the section read:

SEC. 321. Each retail liquor dealer shall provide at his own expense, and keep in his place of business, a record in book form, or shall keep all invoices of, and bills for, all distilled spirits, wines, and fermented malt liquors received, the quantity thereof, and from whom and the date when received. Such records, invoices, and bills shall be open to inspection during the usual business hours of the retailer by Government officers upon identification and request. Such records, invoices, and bills shall be kept for a period of 2 years after the time of the transactions to which they relate. For each willful violation of the provisions hereof the retailer shall be subject to a fine of $25.

Mr. KING. Let that be passed over.

Mr. JOHNSON. Very well. We will pass those over, then, until ultimately we may take them up.

Mr. KING. Yes.

Mr. JOHNSON. On page 49 there is an important amendment which I have to present, and it is one of those which I think the Senator from Utah prefers to pass over for the present, which is not at all objectionable to me; but I am wondering whether, with the acceptance of the amendment on page 49, it is essential for me now to present the amendment to the amendment.

Mr. KING. No technical rules will be applied. The Senator may offer the amendment at any time.

Mr. JOHNSON. Very well. I desire to have that understood, because after line 17, we have a very important amendment which deals with rates upon which we desire to be heard.

Mr. KING. That may be passed over, then.

The PRESIDENT pro tempore. The amendment will be passed over.

Mr. COPELAND. Mr. President, I came into the Chamber just now. I assume the Senator from California has been speaking about his amendment relating to the use of trade names. Is that correct?

Mr. KING. That has not yet been touched.

The PRESIDENT pro tempore. The clerk will state the next amendment of the committee.

The next amendment was, on page 51, line 12, after the word "amended", to strike out "(26 U. S. C., sec. 186; U. S. C., Supp. VII, title 26, sec. 1402 (b) and sec. 1403 (b))" and insert "(U. S. C., 1934 ed., title 26, secs. 1402 (b) and 1403)", so as to make the section read:

SEC. 322. Section 3237 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, secs. 1402 (b) and 1403), is amended to read as follows:

"SEC. 3237. (a) All special taxes shall become due on the 1st day of July in each year, or on commencing any trade or business on which such tax is imposed. In the former case the tax shall be reckoned for 1 year, and in the latter case it shall be reckoned proportionately, from the 1st day of the month in which the liability to a special tax commenced, to and including the 30th day of June following.

"(b) It shall be the duty of the special-tax payers to render their returns with remittances to the collector at such times within the calendar month in which the special-tax liability commenced as shall enable him to receive such returns, duly signed and verified, together with the remittances, not later than the last day of the month, except in cases of sickness or absence, as provided for in section 3176 of the Revised Statutes, as amended."

The amendment was agreed to.

The next amendment was, on page 52, line 8, after the word "amended", to strike out "(26 U. S. C., sec. 205; U. S. C., Supp. VII, title 26, secs. 1394 (b) (1) and (2), 1394 (c) (1), and 1398 (b) and (c))" and insert "(U. S. C., 1934 ed., title 26, sec. 1394 (a) and (b) (1), and sec. 1398 (a) and (b))"; in line 18, after the word "liquors", to insert a colon and the following provisos: "*Provided*, That the Commissioner of Internal Revenue may, by regulations, with the approval of the Secretary of the Treasury, provide for the issuance of a stamp denoting payment of such special tax as a 'retail dealer in wines' or a 'retail dealer in wines and malt liquors' if, as the case may be, wines only, or wines and malt liquors only, are sold by a retail dealer in liquors: *And provided further*, That the tax required to be paid by this paragraph shall, in case of a retail drug store or pharmacy making sales of liquors through a duly licensed pharmacist, be designated as a 'medicinal spirits stamp tax': *And provided further*, That any retail dealer in liquors or retail dealer in malt liquors whose business is such as to require him to travel from place to place in different States of the United States may, under regulations prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, procure a special-tax stamp 'At Large' covering his activities throughout the United States with the payment of but one special tax as a retail dealer in liquors or as a retail dealer in malt liquors, as the case may be"; on page 53, line 20, after the word "liquors", to insert a colon and the following proviso: "*Provided*, That the Commissioner of Internal Revenue may, by regulations, with the approval of the Secretary of the Treasury, provide for the issuance of a stamp denoting payment of such special tax as a 'wholesale dealer in wines' or a 'wholesale dealer in wines and malt liquors' if, as the case may be, wines only, or wines and malt liquors only, are sold by a wholesale dealer in liquors"; in line 14, after the word "in", to strike out "liquor" and insert "liquors"; and on page 55, line 3, after the word "dealers", to insert a comma and "or on account of the sale of such malt liquor when consummated at the purchaser's residence in consequence of an oral or written standing order to call at such residence", so as to make the section read:

SEC. 323. Paragraph "Fourth" of section 3244 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1394 (a) and (b) (1), and sec. 1398 (a) and (b)), is amended to read as follows:

"Fourth. (a) Retail dealers in liquors shall pay a special tax of $25. Every person who sells, or offers for sale, foreign or domestic distilled spirits, wines, or malt liquors, otherwise than as hereinafter provided, in less quantities than 5 wine gallons to the same person at the same time, shall be regarded as a retail dealer in liquors: *Provided*, That the Commissioner of Internal Revenue may, by regulations, with the approval of the Secretary of the Treasury, provide for the issuance of a stamp denoting payment of such special tax as a 'retail dealer in wines' or a 'retail dealer in wines and malt liquors' if, as the case may be, wines only, or wines and malt liquors only, are sold by a retail dealer in liquors: *And provided further*, That the tax required to be paid by this paragraph shall, in case of a retail drug store or pharmacy making sales of liquors through a duly licensed pharmacist, be designated as a 'medicinal spirits stamp tax': *And provided further*, That any retail dealer in liquors or retail dealer in malt liquors whose business is such as to require him to travel from place to place in different States of the United States may, under regulations prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, procure a special-tax stamp 'At Large' covering his activities throughout the United States with the payment of but one special tax as a retail dealer in liquors or as a retail dealer in malt liquors, as the case may be.

"(b) Wholesale dealers in liquors shall pay a special tax of $100. Every person who sells, or offers for sale, foreign or domestic distilled spirits, wines, or malt liquors, otherwise than as hereinafter provided, in quantities of 5 wine gallons or more to the same person at the same time, shall be regarded as a wholesale dealer in liquors: *Provided*, That the Commissioner of Internal Revenue may, by regulations, with the approval of the Secretary of the Treasury, provide for the issuance of a stamp denoting payment of such special tax as a 'wholesale dealer in wines' or a 'wholesale dealer in wines and malt liquors' if, as the case may

be, wines only, or wines and malt liquors only, are sold by a wholesale dealer in liquors. A qualified wholesale dealer in liquors may not sell distilled spirits, wines, or malt liquors in quantities of less than 5 wine gallons without incurring liability to special tax as a retail dealer in liquors. A qualified retail dealer in liquors may not sell such liquors in quantities of 5 wine gallons or more to the same person at the same time without incurring liability to special tax as a wholesale dealer in liquors. But no distiller who has given the required bond and who sells only distilled spirits of his own production at the place of manufacture, or at the place of storage in bond, in the original packages to which the tax-paid stamps are affixed, shall be required to pay the special tax of a wholesale dealer in liquors on account of such sales.

"(c) No retail dealer in liquors shall be held to be a wholesale dealer in liquors solely by reason of sales of 5 wine gallons or more to the same person at the same time if such sales are for immediate consumption on the premises where sold.

"(d) No wholesale or retail dealer in liquors who has paid the special tax as such a dealer shall again be required to pay special tax as such dealer on account of sales of beer, lager beer, ale, porter, or other similar fermented malt liquor to wholesale or retail dealers in liquors or wholesale or retail dealers in malt liquors consummated at the purchaser's place of business covered by the stamp issued to him to denote the payment of the special tax imposed upon such dealers, or on account of the sale of such malt liquor when consummated at the purchaser's residence in consequence of an oral or written standing order to call at such residence."

The amendment was agreed to.

The next amendment was, on page 55, line 8, after the word "amended", to strike out "(26 U. S. C., sec. 205 and sec. 222; U. S. C., Supp. VII, title 26, secs. 1394 (c) (1) and (2), 1394 (f) (1) and (2), 1396 (a), (b), and (c), and 1398 (e) and (f))", and insert "(U. S. C., 1934 ed., title 26, secs. 1394 (d), 1394 (c) (1) and (2), 1396, and 1398 (d) and (e))"; on page 56, line 3, after the word "liability", to insert "to special tax"; in line 6, after the word "tax", to strike out "applicable to the" and insert "as a"; on page 58, line 9, after the word "such", to strike out "dealers" and insert "dealers, or on account of the sale of such malt liquor when consummated at the purchaser's residence in consequence of an oral or written standing order to call at such residence"; and after line 12, to insert:

(g) Notwithstanding the foregoing provisions of this section, each person selling fermented malt liquor to the members, guests, or patrons of bona fide fairs, reunions, picnics, carnivals, or other similar outings, for a period of not more than 30 days once in each fiscal year, and not otherwise engaged in business as a dealer in malt liquors, shall pay, before such sales are made and in lieu of the special tax imposed by subdivision (a) of this paragraph, a special tax of $2 as a retail dealer in malt liquors.

So as to make the section read:

SEC. 324. Paragraph "Fifth" of section 3244 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, secs. 1394 (d), 1394 (c) (1) and (2), 1396, and 1398 (d) and (e)), is amended to read as follows:

"Fifth. (a) Retail dealers in malt liquors shall pay a special tax of $20. Every person who sells, or offers for sale, malt liquors in less quantities than 5 gallons to the same person at the same time, and does not deal in distilled spirits or wines, shall be regarded as a retail dealer in malt liquors.

"(b) Wholesale dealers in malt liquors shall pay a special tax of $50. Every person who sells, or offers for sale, malt liquors in quantities of 5 gallons or more, to the same person at the same time, and who does not deal in distilled spirits or wines at wholesale, shall be regarded as a wholesale dealer in malt liquors. A qualified wholesale dealer in malt liquors may not sell such liquors in quantities of less than 5 gallons without incurring liability to special tax as a retail dealer in malt liquors. A qualified retail dealer in malt liquors may not sell such liquors in quantities of 5 gallons or more to the same person at the same time without incurring liability to special tax as a wholesale dealer in malt liquors: *Provided*, That no brewer shall be obliged to pay special tax as a dealer by reason of selling in the original stamped hogsheads, barrels, or kegs, whether at the place of manufacture or elsewhere, malt liquors manufactured by him or purchased and procured by him in his own hogsheads, barrels, or kegs, under the provisions of section 3349 of the Revised Statutes, as amended, but the quantity of malt liquors so purchased shall be included in calculating the liability to brewers' special tax of both the brewer who manufactures and sells the same and the brewer who purchases the same.

"(c) No collection of special tax as a retail dealer in malt liquors shall be made from brewers for selling malt liquors of their own manufacture in the original stamped eighth-barrel packages.

"(d) No special tax shall be held to accrue on a sale of distilled spirits, wines, or malt liquors made by a person who is not otherwise a dealer in liquors, where such spirits, wines, or liquors have been received by the person so selling as security for or in payment of a debt, or as executor, administrator, or other fiduciary, or have been levied on by any officer, under order or process of any court or magistrate, and where such spirits are sold by such person in one parcel only, or at public auction in parcels not less than 20 wine gallons, nor shall such tax be held to accrue on a sale made by a retiring partner, or the representatives of a deceased partner to the incoming, remaining, or surviving partner or partners of a firm. Nor shall the special tax of a wholesale dealer in liquors or wholesale dealer in malt liquors be held to apply to a retail dealer in liquors or a retail dealer in malt liquors, because of such retail dealer selling out his entire stock of liquors in one parcel, or in parcels embracing not less than his entire stock of distilled spirits, of wines, or of malt liquors. Section 3319 of the Revised Statutes shall not be held to prohibit a rectifier or liquor dealer from purchasing, in quantities greater than 20 wine gallons the distilled spirits sold in one parcel as aforesaid.

"(e) No retail dealer in malt liquors shall be held to be a wholesale dealer in malt liquors solely by reason of sales of 5 gallons or more to the same person at the same time if such sales are for immediate consumption on the premises where sold.

"(f) No wholesale or retail dealer in malt liquors who has paid the special tax as such a dealer shall again be required to pay special tax as such dealer on account of sales of beer, lager beer, ale, porter, or other similar fermented malt liquor to wholesale or retail dealers in liquors or wholesale or retail dealers in malt liquors consummated at the purchaser's place of business covered by the stamp issued to him to denote the payment of the special tax imposed upon such dealers, or on account of the sale of such malt liquor when consummated at the purchaser's residence in consequence of an oral or written standing order to call at such residence.

"(g) Notwithstanding the foregoing provisions of this section, each person selling fermented malt liquor to the members, guests, or patrons of bona fide fairs, reunions, picnics, carnivals, or other similar outings, for a period of not more than 30 days once in each fiscal year, and not otherwise engaged in business as a dealer in malt liquors, shall pay, before such sales are made and in lieu of the special tax imposed by subdivision (a) of this paragraph, a special tax of $2 as a retail dealer in malt liquors."

The amendment was agreed to.

The next amendment was, on page 58, line 23, after the words "Revised Statutes", to strike out "(26 U. S. C., secs. 1181, 1182; U. S. C., Supp. VII, title 26, sec. 1441)" and insert "(U. S. C., 1934 ed., title 26, sec. 1441)", so as to make the section read:

SEC. 325. Section 3450 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1441) is hereby reenacted and amended by striking out "fine or penalty of not more than $500" appearing at the end of the second sentence thereof, and inserting in lieu thereof the words "fine of not more than $5,000 or be imprisoned for not more than 3 years or both."

The amendment was agreed to.

The next amendment was, on page 59, after line 7, to strike out:

The Secretary of the Treasury may, under such regulations as may be prescribed by him, redeem any stamps issued under this act. There is hereby authorized to be appropriated annually, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out this provision.

And, after line 13, to insert:

The Commissioner of Internal Revenue, under regulations approved by the Secretary of the Treasury, may issue new stamps in exchange for any unused stamps issued under this act that have been spoiled by fire or water, or rendered useless by erroneous overprinting or cutting; or may refund the value of any unused stamps for which the lawful owner has no use due to the discontinuance or transfer of his business: *Provided*, That stamps may be exchanged, or the value thereof refunded, only in quantities of the value of $5 or more: *And provided further*, That no claim for the exchange of such stamps or refund therefor shall be allowed unless presented within 1 year after the date on which such stamps were purchased, or, in the case of any such stamps so spoiled or rendered useless or for which the lawful owner had no use due to the discontinuance or transfer of his business prior to the date of the enactment of the Liquor Tax Administration Act, within 1 year after such date. There are hereby authorized to be appropriated annually, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the provisions of this paragraph.

So as to make the section read:

SEC. 326. Section 203 of the Liquor Taxing Act of 1934 is amended by adding a new paragraph at the end thereof, as follows:

"The Commissioner of Internal Revenue, under regulations approved by the Secretary of the Treasury, may issue new stamps in exchange for any unused stamps issued under this act that have been spoiled by fire or water, or rendered useless by erroneous overprinting or cutting; or may refund the value of any unused stamps for which the lawful owner has no use due to the

discontinuance or transfer of his business: *Provided*, That stamps may be exchanged, or the value thereof refunded, only in quantities of the value of $5 or more: *And provided further*, That no claim for the exchange of such stamps or refund therefor shall be allowed unless presented within 1 year after the date on which such stamps were purchased, or, in the case of any such stamps so spoiled or rendered useless or for which the lawful owner had no use due to the discontinuance or transfer of his business prior to the date of the enactment of the Liquor Tax Administration Act, within 1 year after such date. There are hereby authorized to be appropriated annually, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to carry out the provisions of this paragraph."

The amendment was agreed to.

The next amendment was, on page 60, line 15, after the word "which", to strike out "has become unsalable" and insert "became unsalable between March 22, 1933, and the date of the enactment of this act,"; in line 22, after the figures "1933" and the comma, to insert "and prior to the date of the enactment of this act"; in line 24, after the word "house" and the comma, to insert "except in the process of destruction or for return to the brewery,"; on page 61, line 3, after the word "Revenue", to insert a comma and "or was returned from such bottling house to the brewery in which made for use therein as brewing material. No such claim shall be allowed unless filed within 90 days after the date of the enactment of this act"; after line 7, to strike out:

(b) No such claim shall be allowed unless filed within 90 days after such destruction or, in the case of any beer, lager beer, ale, porter, or other similar fermented malt liquor so destroyed before the date of the enactment of this act, within 90 days after such date.

And after line 12, to insert:

(b) The Commissioner of Internal Revenue is authorized and directed to make a survey for the purpose of determining whether, consistently with the protection of the revenue, refunds or credits for taxes may be made or allowed with respect to brewery bottling house, brewery and other losses of beer, lager beer, ale, porter, or other similar fermented malt liquor which has been fully tax-paid. If the Commissioner of Internal Revenue shall find, after such a survey, that such refunds or credits may be made or allowed consistently with the protection of the revenue, he shall issue regulations, subject to the approval of the Secretary of the Treasury, under which such refunds or credits may be made or allowed with respect to such losses of beer, lager beer, ale, porter, or other similar fermented malt liquor as the Commissioner finds are not excessive or unreasonable, upon the filing of a claim therefor by the brewer and proof by him to the satisfaction of the Commissioner of Internal Revenue (1) that such beer, lager beer, ale, porter, or other similar fermented malt liquor was fully tax-paid; (2) that the loss occurred in the brewery bottling house or brewery or elsewhere as the Commissioner may determine by regulations, subject to the approval of the Secretary of the Treasury; (3) that such loss was due to imperfect filling or capping, spoilage, leakage, breakage, or wastage; (4) that such loss was not due to carelessness, negligence, fraud, connivance, or collusion on the part of the brewer; and (5) that such loss was not excessive or unreasonable. No claim under this subsection shall be allowed unless filed within 60 days after the last day of the month in which such loss occurred.

So as to make the section read:

SEC. 327. (a) The Commissioner of Internal Revenue shall make refund, or in lieu thereof, if he so elects, allow credit to a brewer in the amount of tax paid by such brewer on any beer, lager beer, ale, porter, or other similar fermented malt liquor manufactured by such brewer which became unsalable between March 22, 1933, and the date of the enactment of this act, by reason of its condition, upon the filing of a claim therefor by the brewer and proof by him to the satisfaction of the Commissioner that such beer, lager beer, ale, porter, or other similar fermented malt liquor (1) was fully tax-paid, (2) was lawfully removed from his brewery to his bottling house on or after March 22, 1933, and prior to the date of the enactment of this act, (3) never was removed from such bottling house, except in the process of destruction or for return to the brewery, (4) had become unsalable without fraud, connivance, or collusion on his part, and (5) was destroyed by him in such bottling house in the presence of a representative of the Bureau of Internal Revenue, or was returned from such bottling house to the brewery in which made for use therein as brewing material. No such claim shall be allowed unless filed within 90 days after the date of the enactment of this act.

(b) The Commissioner of Internal Revenue is authorized and directed to make a survey for the purpose of determining whether, consistently with the protection of the revenue, refunds or credits for taxes may be made or allowed with respect to brewery bottling house, brewery and other losses of beer, lager beer, ale, porter, or other similar fermented malt liquor which has been fully tax-paid. If the Commissioner of Internal Revenue shall find, after such a survey, that such refunds or credits may be made or allowed consistently with the protection of the revenue, he shall issue regulations, subject to the approval of the Secretary of the Treasury, under which such refunds or credits may be made or allowed with respect to such losses of beer, lager beer, ale, porter, or other similar fermented malt liquor as the Commissioner finds are not excessive or unreasonable, upon the filing of a claim therefor by the brewer and proof by him to the satisfaction of the Commissioner of Internal Revenue (1) that such beer, lager beer, ale, porter, or other similar fermented malt liquor was fully tax-paid; (2) that the loss occurred in the brewery bottling house or brewery or elsewhere as the Commissioner may determine by regulations, subject to the approval of the Secretary of the Treasury; (3) that such loss was due to imperfect filling or capping, spoilage, leakage, breakage, or wastage; (4) that such loss was not due to carelessness, negligence, fraud, connivance, or collusion on the part of the brewer; and (5) that such loss was not excessive or unreasonable. No claim under this subsection shall be allowed unless filed within 60 days after the last day of the month in which such loss occurred.

(c) The Commissioner is authorized to issue to the brewer to whom a credit is allowed pursuant to this section stamps in an amount equal to such credit, for use by him in the payment of the tax upon beer, lager beer, ale, porter, or other similar fermented malt liquor manufactured by him.

(d) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, is authorized to make such rules and regulations as may be necessary to carry out the provisions of this section.

The amendment was agreed to.

The next amendment was, on page 63, line 2, after the word "amended", to strike out "(26 U. S. C. 225; Supp. VII, title 26, sec. 1394 (h), (i), and (j))" and insert "(U. S. C., 1934 ed., title 26, sec. 1394 (g), (h), and (i))"; in line 6, after the word "winemakers", to insert "who have qualified as such under the internal-revenue laws and regulations, and", so as to make the section read:

SEC. 328. Section 3246 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1394 (g), (h), and (i)), is amended to read as follows:

"SEC. 3246. (a) Nothing in this chapter shall be construed to impose a special tax upon winemakers who have qualified as such under the internal-revenue laws and regulations, and who sell wines of their own production where the same are made or at the general business office of such winemaker: *Provided*, That no winemaker shall have more than one place of business for the sale of such wine that shall be exempt from the special tax.

"(b) No special tax shall be imposed upon apothecaries as to wines or spirituous liquors which they use exclusively in the preparation or making up of medicines unfit for use for beverage purposes.

"(c) No special tax shall be imposed upon manufacturing chemists or flavoring-extract manufacturers for recovering tax-paid alcohol or spirituous liquors from dregs or marc of percolation, or extraction, if such recovered alcohol or spirituous liquors be again used in the manufacture of medicines or flavoring extracts of the kind in the production of which originally used."

The amendment was agreed to.

The next amendment was, on page 63, after line 23, to insert:

SEC. 329. (a) Section 3 of title III of the National Prohibition Act, as amended (U. S. C., 1934 ed., title 27, sec. 73; U. S. C., 1934 ed., Supp. I, title 27, sec. 73), is amended by adding at the end thereof the following new sentence: "Permanent tanks and other structures located on the industrial alcohol plant premises and approved by the Commissioner, shall be deemed to be warehouses within the meaning of this section."

On page 64, line 7, before the word "The", to insert "(b)"; in the same line, after the word "section", to strike out "eleven of title" and insert "11 of Title"; and after line 13 to insert:

(c) Title III of the National Prohibition Act, as amended, and all provisions of the internal-revenue laws relating to the enforcement thereof, are hereby extended to and made applicable to Puerto Rico and the Virgin Islands from and after August 27, 1935. The respective insular governments shall advance to the Treasury of the United States such funds as may be required from time to time by the Secretary of the Treasury for the purpose of defraying all expenses incurred by the Treasury Department in connection with the enforcement in Puerto Rico and the Virgin Islands of the said title III and regulations promulgated thereunder. The funds so advanced shall be deposited in a separate trust fund in the Treasury of the United States and shall be available to the Treasury Department for the purposes of this subsection.

So as to make the section read:

SEC. 329. (a) Section 3 of title III of the National Prohibition Act, as amended (U. S. C., 1934 ed., title 27, sec. 73; U. S. C., 1934 ed., supp. I, title 27, sec. 73), is amended by adding at the end thereof the following new sentence: "Permanent tanks and other

structures located on the industrial-alcohol plant premises and approved by the Commissioner shall be deemed to be warehouses within the meaning of this section."

(b) The third paragraph of section 11 of title III of the National Prohibition Act, as amended and supplemented, is amended by inserting after the word "sanatorium" a comma and the following: "or for the use of any clinic operated for charity and not for profit, including use in the compounding of bona fide medicines for treatment outside of such clinics of patients thereof, but not for sale."

(c) Title III of the National Prohibition Act, as amended, and all provisions of the internal-revenue laws relating to the enforcement thereof, are hereby extended to and made applicable to Puerto Rico and the Virgin Islands from and after August 27, 1935. The respective insular governments shall advance to the Treasury of the United States such funds as may be required from time to time by the Secretary of the Treasury for the purpose of defraying all expenses incurred by the Treasury Department in connection with the enforcement in Puerto Rico and the Virgin Islands of the said title III and regulations promulgated thereunder. The funds so advanced shall be deposited in a separate trust fund in the Treasury of the United States and shall be available to the Treasury Department for the purposes of this subsection.

The amendment was agreed to.

The next amendment was, on page 65, after line 3, to strike out:

SEC. 330. Section 610 of the Revenue Act of 1918, as amended (26 U. S. C. 441; Supp. VII, title 26, sec. 1310), is amended to read as follows:

"SEC. 610. (a) Natural wine within the meaning of this act shall be deemed to be the product made from the normal alcoholic fermentation of the juice of sound, ripe grapes, without addition or abstraction, except such as may occur in the usual cellar treatment of clarifying and aging.

"(b) The product made from the juice of sound, ripe grapes by complete fermentation of the must under proper cellar treatment and corrected by the addition (under the supervision of a storekeeper-gauger, unless such supervision is dispensed with by the Commissioner of Internal Revenue, under the provisions of section 318 of the Liquor Tax Administration Act) of a solution of water and pure cane, beet, or dextrose sugar (containing, respectively, not less than 95 percent of actual sugar, calculated on a dry basis) to the must or to the wine, to correct natural deficiencies, when such addition shall not increase the volume of the resultant product more than 35 percent, and the resultant product does not contain less than five parts per thousand of acid before fermentation and not more than 13 percent of alcohol after complete fermentation, shall be deemed to be wine within the meaning of this act, and may be labeled, transported, and sold as 'wine', qualified by the name of the locality where produced, and may be further qualified by the name of its own particular type or variety.

"(c) Wine as defined in this section may be sweetened with cane sugar or beet sugar or pure condensed grape must and fortified under the provisions of this act, and wines so sweetened or fortified shall be considered sweet wine within the meaning of this act.

"(d) The provisions of the internal-revenue laws applicable to natural wine shall apply in the same manner and to the same extent to citrus-fruit wines which are the product of normal alcoholic fermentation of the juice of sound ripe citrus fruit (except lemons and limes) with or without the addition of dry cane, beet, or dextrose sugar (containing, respectively, not less than 95 percent of actual sugar, calculated on a dry basis) for the purpose of perfecting the product according to standards, but without the addition or abstraction of other substances, except as may occur in the usual cellar treatment of clarifying or aging."

And in lieu thereof to insert:

SEC. 330. (a) The last paragraph of section 610 of the Revenue Act of 1918, as amended (U. S. C., 1934 ed., Supp. I, title 28, sec. 1310 (d)), is amended to read as follows:

"The provisions of the internal-revenue laws applicable to natural wine shall apply in the same manner and to the same extent to citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, and apple wines which are the products, respectively, of normal alcoholic fermentation of the juice of sound ripe (1) citrus-fruit (except lemons and limes), (2) peaches, (3) cherries, (4) berries, (5) apricots, or (6) apples, with or without the addition of dry cane, beet, or dextrose sugar (containing, respectively, not less than 95 percent of actual sugar, calculated on a dry basis) for the purpose of perfecting the product according to standards, but without the addition or abstraction of other substances, except as may occur in the usual cellar treatment of clarifying or aging."

(b) So much of section 613 of the Revenue Act of 1918, as amended (U. S. C., 1934 ed., Supp. I, title 26, sec. 1300 (a) (2)), as reads as follows:

"On each bottle or other container of liqueurs, cordials, or similar compounds, by whatever name sold or offered for sale, containing sweet wine fortified with grape brandy, or containing citrus-fruit wine fortified with citrus-fruit brandy, 2½ cents on each one-half pint or fraction thereof;" is amended to read as follows:

"On each bottle or other container of liqueurs, cordials, or similar compounds, by whatever name sold or offered for sale, containing sweet wine, citrus-fruit wine, peach wine, cherry wine, berry wine, apricot wine, or apple wine, fortified, respectively with grape brandy, citrus-fruit brandy, peach brandy, cherry brandy, berry brandy, apricot brandy, or apple brandy, 2½ cents on each one-half pint or fraction thereof."

The amendment was agreed to.

The next amendment was, on page 68, line 10, after the word "amended", to strike out "(26 U. S. C., 443; U. S. C., Supp. VII, title 26, sec. 1301)" and insert "(U. S. C., 1934 ed., Supp. I, title 26, sec. 1301)"; in line 14, after the word "such", to strike out "notices, entries, bonds, and other security" and insert "notices and entries"; in line 18, after the word "or", to strike out "special bonded warehouse" and insert "Internal Revenue Bonded Warehouse"; in line 21, after the word "made", and the comma to strike out "and any producer of citrus-fruit wines may similarly withdraw citrus-fruit brandy for the fortification of citrus-fruit wines on the premises where actually made" and insert "and any producer of citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, or apple wines may similarly withdraw citrus-fruit brandy, peach brandy, cherry brandy, berry brandy, apricot brandy, or apple brandy for the fortification, respectively, of citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, or apple wines, on the premises where actually made"; on page 69, line 9, after the words "citrus-fruit wines" and the comma to insert "peach wines, cherry wines, berry wines, apricot wines, or apple wines", so as to read:

SEC. 331. Section 612 of the Revenue Act of 1918, as amended (U. S. C., 1934 ed., Supp. I, title 26, sec. 1301), is amended to read as follows:

"SEC. 612. (a) Under such regulations and official supervision and upon the giving of such notices and entries as the Commissioner, with the approval of the Secretary, may prescribe, any producer of wines defined under the provisions of this title may withdraw from any fruit distillery or internal-revenue bonded warehouse grape brandy, or wine spirits, for the fortification of such wines on the premises where actually made, and any producer of citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, or apple wines may similarly withdraw citrus-fruit brandy, peach brandy, cherry brandy, berry brandy, apricot brandy, or apple brandy for the fortification, respectively, of citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, or apple wines, on the premises where actually made: *Provided*, That after the date of the enactment of the Liquor Tax Administration Act there shall be levied and assessed against the producer of such wines or citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, or apple wines (in lieu of the internal-revenue tax now imposed thereon by law)", etc.

The amendments were agreed to.

The next amendment was, on page 69, line 11, after the word "of", to strike out "10" and to insert "20."

Mr. JOHNSON. Mr. President, of course I do not assent to this amendment, and I shall endeavor to have it rejected. May it be passed over?

Mr. KING. It may be passed over.

The PRESIDENT pro tempore. The amendment will be passed over.

The next amendment was, on page 69, in line 13, after the words "citrus-fruit brandy" and the comma, to insert "peach brandy, cherry brandy, berry brandy, apricot brandy, apple brandy,"; in line 16, after the words "citrus-fruit wines", to insert "or peach wines, cherry wines, berry wines, apricot wines, or apple wines"; in line 19, after the word "within", to strike out "12" and to insert in lieu thereof "18", so as to read:

Provided, That after the date of the enactment of the Liquor Tax Administration Act there shall be levied and assessed against the producer of such wines or citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, or apple wines (in lieu of the internal-revenue tax now imposed thereon by law) a tax of 20 cents per proof-gallon of grape brandy, citrus-fruit brandy, peach brandy, cherry brandy, berry brandy, apricot brandy, apple brandy, or wine spirits, whenever withdrawn and so used by him after such date in the fortification of such wines or citrus-fruit wines or peach wines, cherry wines, berry wines, apricot wines, or apple wines during the preceding month, which assessment shall be paid by him within 18 months from the date of notice thereof.

The amendments were agreed to.

The next amendment was, on page 69, in line 20, after the word "thereof", to insert a colon and the following proviso:

Provided, That every producer of wine who withdraws such brandy, citrus-fruit brandy, peach brandy, cherry brandy, berry brandy, apricot brandy, apple brandy, or wine spirits shall give

bond to fully cover at all times prior to payment of the assessment the amount of tax due on such brandy, citrus-fruit brandy, peach brandy, cherry brandy, berry brandy, apricot brandy, apple brandy, or wine spirits, which bond shall be in such form as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall, by regulations, prescribe.

Mr. KING. Mr. President, the Senator from California has offered an amendment to this amendment, and the amendment of the committee may be passed over. We will recur to this later.

Mr. JOHNSON. Is the Senator referring to the amendment on page 71?

Mr. KING. On page 70, the one the Senator suggested.

The PRESIDENT pro tempore. The Chair understands that the amendment of the Senator from California is to the House text. Is that correct?

Mr. KING. That is correct. Of course, under the unanimous-consent agreement we were not to act on amendments to the text at the time the provision proposed to be amended was reached, but I am not following any technical rule, and when we get through with the amendments which the committee has tendered, then we will recur to this.

Mr. JOHNSON. The same rule will apply to the amendment which has been printed and filed to come at the end of section 331 on page 71?

Mr. KING. Yes.

The PRESIDENT pro tempore. Without objection, the amendment on page 69, line 20, will be passed over, and the clerk will state the next amendment of the committee.

The next amendment was, on page 70, line 9, after the words "citrus-fruit brandy" and the comma, to insert "peach brandy, cherry brandy, berry brandy, apricot brandy, apple brandy,"; in line 14, after the words "citrus-fruit wines" and the comma, to insert "peach wines, cherry wines, berry wines, apricot wines, apple wines,"; and in line 18, after the words "citrus-fruit wines" and the comma, to insert "or peach wines, cherry wines, berry wines, apricot wines, apple wines,"; so as to read:

When such wines are sold or removed for the manufacture of vinegar, or the production of dealcoholized wines containing less than one-half of 1 percent of alcohol by volume, the tax under this section on such grape brandy, citrus-fruit brandy, peach brandy, cherry brandy, berry brandy, apricot brandy, apple brandy, or wine spirits shall, under such regulations as the Secretary may prescribe, be abated or refunded.

(b) Nothing contained in this section shall be construed as exempting any wines, citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, apple wines, cordials, liqueurs, or similar compounds from the payment of any tax provided for in this title.

(c) Any such wines, or citrus-fruit wines, or peach wines, cherry wines, berry wines, apricot wines, apple wines, may, under such regulations as the Secretary may prescribe, be sold or removed tax free for the manufacture of vinegar, or for the production of dealcoholized wines containing less than one-half of 1 percent of alcohol by volume.

(d) The taxes imposed by this section shall not apply to dealcoholized wines containing less than one-half of 1 percent of alcohol by volume.

The amendment was agreed to.

The next amendment was, on page 71, after line 3, to strike out:

SEC. 332. Section 42 of the act approved October 1, 1890 (26 U. S. C. 445; U. S. C. Supp. VII, title 26, sec. 1302 (a)) as amended, is amended to read as follows:

"SEC. 42. (a) Any producer of pure sweet wines may use in the preparation of such sweet wines, under such regulations and after the filing of such notices and bonds, together with the keeping of such records and the rendition of such reports as to materials and products as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe, wine spirits produced by any duly authorized distiller, and the Commissioner of Internal Revenue in determining the liability of any distiller of wine spirits to assessment under section 3309 of the Revised Statutes, is authorized to allow such distiller credit in his computation for the wine spirits withdrawn to be used in fortifying sweet wines under this act.

"(b) The provisions of this section and section 43 shall apply to the use of citrus-fruit brandy in the preparation of fortified citrus-fruit wines in the same manner and to the same extent as such provisions apply to the use of wine spirits in the fortification of sweet wines, except that no brandy (other than a citrus-fruit brandy) may be used in the fortification of citrus-fruit wine and a citrus-fruit brandy prepared from one kind of citrus fruit may not be used for the fortification of a citrus-fruit wine prepared from another kind of citrus fruit or for the fortification of a wine prepared from any fruit other than citrus fruit."

And in lieu thereof to insert:

SEC. 332. Section 42 of the act entitled "An act to reduce the revenue and equalize duties on imports, and for other purposes", approved October 1, 1890, as amended (U. S. C., 1934 ed., Supp. I, title 26, sec. 1302), is amended by inserting at the end thereof the following new paragraph:

"The provisions of this section and section 43 shall apply to the use of peach brandy, cherry brandy, berry brandy, apricot brandy, and apple brandy, in the preparation, respectively, of fortified peach wines, cherry wines, berry wines, apricot wines, and apple wines, in the same manner and to the same extent as such provisions apply to the use of wine spirits in the fortification of sweet wines; except that (1) no brandy other than peach brandy may be used in the fortification of peach wine and peach brandy may not be used for the fortification of any wine other than peach wine, (2) no brandy other than cherry brandy may be used in the fortification of cherry wine and cherry brandy may not be used for the fortification of any wine other than cherry wine, (3) no brandy other that berry brandy may be used in the fortification of berry wine and a berry brandy prepared from one kind of berry may be used for the fortification of a berry wine prepared from another kind of berry or for the fortification of any wine other than berry wine, (4) no brandy other than apricot brandy may be used in the fortification of apricot wine and apricot brandy may not be used for the fortification of any wine other than apricot wine, and (5) no brandy other than apple brandy may be used in the fortification of apple wine and apple brandy may not be used for the fortification of any wine other than apple wine."

The amendment was agreed to.

The next amendment was, on page 73, after line 11, to strike out:

SEC. 333. Section 3255 of the Revised Statutes, as amended (26 U. S. C., 297; Supp. VII, title 26, sec. 1176), is amended to read as follows:

"SEC. 3255. (a) The Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may exempt distillers of brandy made exclusively from apples, peaches, grapes, pears, pineapples, apricots, berries, plums, pawpaws, persimmons, prunes, figs, cherries, dates, or citrus fruits (except lemons and limes) from any provision of the internal-revenue laws relating to the manufacture of spirits, except as to the tax thereon when in his judgment it may seem expedient to do so.

"(b) Where, in the manufacture of wine, or citrus-fruit wine, artificial sweetening has been used, the wine, or the fruit pomace residuum thereof, or the citrus-fruit wine may be used in the distillation of brandy, or citrus-fruit brandy, as the case may be, and such use shall not prevent the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, from exempting such distiller from any provision of the internal-revenue laws relating to the manufacture of spirits, except as to the tax thereon, when in his judgment it may seem expedient to do so.

"(c) The distillers mentioned in this section may add to not less than 500 gallons (or 10 barrels) of grape cheese not more than 500 gallons of a sugar solution made from cane, beet, starch, or corn sugar, 95 percent pure, such solution to have a saccharine strength of not to exceed 10 percent, and may ferment the resultant mixture on a winery or distillery premises, and such fermented product shall be regarded as distilling material."

And in lieu thereof to insert:

SEC. 333. The first proviso of section 3255 of the Revised Statutes, as amended (U. S. C., 1934 ed., Supp. I, title 26, sec. 1176), is amended by inserting after "citrus-fruit wine", wherever it appears, the words ", peach wine, cherry wine, berry wine, apricot wine, or apple wine"; and by inserting after "citrus-fruit brandy", the words ", peach brandy, cherry brandy, berry brandy, apricot brandy, or apple brandy."

The amendment was agreed to.

The next amendment was, on page 75, line 2, after the numerals "1918", to strike out "(U. S. C., Supp. VII, sec. 1304)" and insert "(U. S. C., 1934 ed., title 26, sec. 1304)"; in line 6, after the word "produce", to strike out "grape wines and citrus-fruit wines" and insert "grape wines, citrus-fruit wines, peach wines, cherry wines, berry wines, apricot wines, and apple wines"; and in line 12, after the word "plant" and the period, to strike out: "The alcohol removed from such liquid, if evaporated and not condensed and saved, shall not be subject to tax; if saved, it shall be subject to the same law as other alcoholic liquors. Credit shall be allowed on the tax due on any alcohol or brandy so saved to the amount of any tax paid upon distilled spirits or brandy used in the fortification of the liquor from which the same is saved", so as to make the section read:

SEC. 334. Section 618 (b) of the Revenue Act of 1918 (U. S. C., 1934 ed., title 26, sec. 1304) is amended to read as follows:

"(b) Under regulations prescribed by the Commissioner with the approval of the Secretary it shall be lawful to produce grape wines, citrus-fruit wines, peach wines, cherry wines, berry wines, apricot

wines, and apple wines on bonded winery premises by the usual method, and to transport and use the same, and like wines heretofore produced and now stored on bonded winery premises, as distilling material in any fruit-brandy distillery or industrial-alcohol plant."

The amendment was agreed to.

The next amendment was, on page 75, line 21, after the numerals "1918", to strike out "(U. S. C., Supp. VII, sec. 1309)" and insert "(U. S. C., 1934 ed., title 26, sec. 1309)", so as to make the section read:

SEC. 335. Section 620 of the Revenue Act of 1918 (U. S. C., 1934 ed., title 26, sec. 1309) is amended by striking out the following: "or whoever rectifies, mixes, or compounds with distilled spirits any domestic wines, other than in the manufacture of liqueurs, cordials, or similar compounds."

The amendment was agreed to.

The next amendment was, on page 76, after line 14, to insert:

SEC. 338. Section 616 of the Revenue Act of 1918 (U. S. C., 1934 ed., title 26, sec. 1306) is amended by striking out "and shall, prior to sale or removal for consumption, affix to each cask or vessel containing such wine such marks, labels, or stamps as the Commissioner, with the approval of the Secretary, may from time to time prescribe" and inserting in lieu thereof "and shall, prior to sale or removal for consumption, affix to each cask, barrel, bottle, or other immediate container, and to each case or other shipping container, of such wine, such marks, labels, or stamps as the Commissioner, with the approval of the Secretary, may from time to time prescribe as to each."

The amendment was agreed to.

The next amendment was, under the heading "title IV", on page 77, line 3, after the word "amended", to strike out "(26 U. S. C., sec. 525; U. S. C., Supp. VII, title 26, sec. 1336)" and insert "(U. S. C., 1934 ed., title 26, sec. 1336)"; and in line 20, after the name "Treasury", to insert a comma and "which regulations shall not entail additional expense to the taxpayer", so as to make the section read:

TITLE IV

SEC. 401. (a) Section 3354 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, sec. 1336), is amended by striking out "keg, or other vessel" and inserting in lieu thereof "or keg."

(b) Such section 3354 of the Revised Statutes, as amended, is further amended by striking out the first sentence of the second proviso thereof and inserting in lieu thereof the following: "*Provided further*, That the tax imposed by law on fermented liquor shall be paid on all fermented liquor removed from a brewery to a bottling house by means of a pipe or conduit, at the time of such removal, by the cancelation and defacement, by the officer designated by the Commissioner of Internal Revenue, in the presence of the brewer, of the number of stamps denoting the tax on the fermented liquor thus removed, or in such other manner as may be prescribed by regulations issued by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury, which regulations shall not entail additional expense to the taxpayer."

(c) The Commissioner of Internal Revenue is hereby authorized, with the approval of the Secretary of the Treasury, to make all rules and regulations necessary to carry out the provisions of this section.

The amendment was agreed to.

The next amendment was, at the top of page 78, to strike out:

SEC. 402. (a) All spirits, spirituous liquors, wines, and fermented liquors forfeited, summarily or by order of court, under any law of the United States, shall be delivered to the Secretary of the Treasury to be disposed of as hereinafter provided.

(b) The Secretary of the Treasury shall dispose of all spirits, spirituous liquors, wines, and fermented liquors which have been delivered to him pursuant to subsection (a)—

(1) By delivery to such Government agencies as, in his opinion, have a need for such spirits, spirituous liquors, wines, or fermented liquors for medicinal, scientific, or mechanical purposes; or

(2) By gift to such eleemosynary institutions as, in his opinion, have a need for such spirits, spirituous liquors, wines, or fermented liquors for medicinal purposes; or

(3) By sale. Notwithstanding any other provision of law all such spirits, spirituous liquors, wines, or fermented liquors so sold shall be sold subject to the payment of internal-revenue taxes and duties due thereon; or

(4) By destruction.

(c) No spirits, spirituous liquors, wines, or fermented liquors which have been seized under any law of the United States, may be disposed of in any manner whatsoever except after forfeiture and as provided in this section.

(d) The Secretary of the Treasury is authorized to make all rules and regulations necessary to carry out the provisions of this section.

The amendment was agreed to.

The next amendment was, on page 79, after line 5, to insert:

SEC. 402. Notwithstanding the provisions of section 3182 of the Revised Statutes, or any other law relating to the assessment of taxes, the Commissioner of Internal Revenue may, in his discretion, omit the making of assessments and the authorizing of suits for recovery of taxes on distilled spirits, wine, or fermented liquors, or special occupational taxes required to be paid by persons manufacturing or dealing in distilled spirits, wine, or fermented liquor, whenever after investigation it appears that such taxes, if assessed, would not be collectible in full or in any substantial amount; but in each case of such omission to assess or to authorize suit, a report setting forth the facts as to the uncollectibility of the tax must be filed in the office of the Commissioner of Internal Revenue.

The amendment was agreed to.

The next amendment was, on page 79, after line 19, to strike out:

SEC. 403. (a) Whenever the Secretary of the Treasury finds that there has been instituted, or that process has been issued for the institution of, any proceeding by the United States, based upon a claim arising under the customs or internal revenue laws in connection with an alleged importation or bringing into the United States of distilled spirits, wines, or fermented malt liquors, against any person, whether or not a resident of the United States, and that such person has, or at the date of the enactment of this act had, a substantial interest, direct or indirect, in any plant, establishment, or business outside of the United States for the production, manufacture, rectification, selling, or marketing of distilled spirits, wines, or fermented malt liquors, the Secretary shall publish such information as will, in his judgment, sufficiently identify such person and such plant, establishment, or business, and after such publication no distilled spirits, wines, or fermented malt liquors produced, manufactured, rectified, sold, or marketed by such person, or in which he has any interest, or produced, manufactured, rectified, sold, or marketed in or by any such plant, establishment, or business, shall be imported or brought into the United States unless and until such person submits to the jurisdiction of the court of the United States in which such proceeding has been instituted, or out of which such process has been issued, and, to secure payment of the claim, furnishes to the Secretary of the Treasury such security as he may require, but not in excess of double the amount of the claim, or complies with such other reasonable terms as he may impose.

(b) If any person fraudulently or knowingly imports or brings into the United States any distilled spirits, wines, or fermented malt liquors contrary to the provisions of this section, or any rule or regulation made hereunder, he shall be liable to a penalty in an amount equal to the value of such distilled spirits, wines, or fermented malt liquors which shall, in addition thereto, be subject to seizure and forfeiture. Any penalty or forfeiture incurred under this section may be sued for, prosecuted, and recovered, and shall be treated for all purposes, as a penalty or forfeiture incurred under the customs laws and the imposition of any such penalty or forfeiture shall not be deemed to exclude the imposition of penalties or forfeitures incurred under any other provision of law.

(c) The Secretary of the Treasury is authorized to make such rules and regulations as may be necessary to carry out the provisions of this section.

The amendment was agreed to.

The next amendment was, on page 81, after line 15, to insert:

SEC. 403. Section 239 of the Criminal Code (U. S. C., 1934 ed., title 18, sec. 389) is amended to read as follows:

"SEC. 239. Any railroad company, express company, or other common carrier, or any other person who, in connection with the transportation of any spirituous liquor, or vinous, malted, or other fermented liquor, or any compound containing any spirituous liquor, or vinous, malted, or other fermented liquor, fit for use for beverage purposes, from one State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, into any other State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, which prohibits the delivery or sale therein of such liquor, or from any foreign country into any such State, Territory, or District of the United States, or place noncontiguous to but subject to the jurisdiction thereof, shall collect the purchase price or any part thereof, before, on, or after delivery, from the consignee, or from any other person, or shall in any manner act as the agent of the buyer or seller of any such liquor, for the purpose of buying or selling or completing the sale thereof, saving only in the actual transportation and delivery of the same, shall be fined not more than $5,000 or imprisoned not more than 1 year, or both."

The amendment was agreed to.

The next amendment was, on page 82, after line 13, to insert:

SEC. 404. Section 313 (d) of the Tariff Act of 1930 (U. S. C., 1934 ed., title 19, sec. 1313 (d)) is amended by adding thereto the following:

"Upon the exportation of bottled distilled spirits manufactured or produced in the United States on which an internal-revenue

tax has been paid, there shall be allowed, under regulations to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, a drawback equal in amount to the tax found to have been paid on such bottled distilled spirits: *Provided*, That such distilled spirits have been bottled especially for export, under regulations prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury."

Mr. JOHNSON. Mr. President, I call to the attention of the Senator from Utah another amendment, which I think is formal in character, after the words "distilled spirits" on page 82, lines 17, 23, and 24, in each instance, to insert the words "and wine."

Mr. KING. So that it will read how?

Mr. JOHNSON. "Distilled spirits and wine."

The PRESIDENT pro tempore. The clerk will state the amendment proposed by the Senator from California to the committee amendment.

The CHIEF CLERK. On page 82, line 17, after the words "distilled spirits", to insert the words "and wine"; on line 23, after the words "distilled spirits", to insert the words "and wine"; and on line 24, after the words "distilled spirits", to insert the words "and wine."

Mr. KING. Let the amendment be passed over.

The PRESIDENT pro tempore. The amendment will be passed over. The clerk will state the next amendment of the committee.

The next amendment was, on page 83, after line 2, to insert:

SEC. 405. Section 313 (1) (3) of the Tariff Act of 1930 (U. S. C., 1934 ed., title 19, sec. 1313 (i)) is amended by striking therefrom the word "alcohol" and inserting in lieu thereof the words "distilled spirits."

Mr. JOHNSON. On page 83, line 6, after the words "distilled spirits", I move to amend by adding the words "and wine." Will that go over also?

Mr. KING. Let that be passed over.

The PRESIDENT pro tempore. The amendment will be passed over, and the clerk will state the next amendment of the committee.

The next amendment was, on page 83, after line 6, to insert:

SEC. 406. Section 311 of the Tariff Act of 1930 (U. S. C., 1934 ed., title 19, sec. 1311) is amended by adding a paragraph at the end thereof, reading as follows:

"Distilled spirits and wines which are rectified in bonded manufacturing warehouses, class 6, and distilled spirits which are reduced in proof and bottled in such warehouses, shall be deemed to have been manufactured within the meaning of this section, and may be withdrawn as hereinbefore provided, and likewise for shipment in bond to Puerto Rico, subject to the provisions of this section, and under such regulations as the Secretary of the Treasury may prescribe, there to be withdrawn for consumption or be rewarehoused and subsequently withdrawn for consumption: *Provided*, That upon withdrawal in Puerto Rico for consumption, the duties imposed by the customs laws of the United States shall be collected on all imported merchandise (in its condition as imported) and imported containers used in the manufacture and putting up of such spirits and wines in such warehouses: *Provided further*, That no internal-revenue tax shall be imposed on distilled spirits and wines rectified in class 6 warehouses if such distilled spirits and wines are exported or shipped in accordance with the provisions of this section, and that no person rectifying distilled spirits or wines in such warehouses shall be subject by reason of such rectification to the payment of special tax as a rectifier."

The amendment was agreed to.

The next amendment was, on page 84, after line 7, to insert:

SEC. 407. Section 51 of the act of August 27, 1894, as amended (U. S. C., 1934 ed., title 26, sec. 1265; U. S. C., 1934 ed., Supp. I, title 26, sec. 1265), is amended to read as follows:

"SEC. 51. The Commissioner of Internal Revenue shall be, and is hereby, authorized, in his discretion, and upon the execution of such bonds as he may prescribe, to establish warehouses, to be known and designated as Internal Revenue bonded warehouses, to be used exclusively for the storage of distilled spirits other than alcohol, each of which warehouses shall be in charge of a storekeeper-gauger to be appointed, assigned, transferred, and paid in the same manner as such officers for distillery warehouses have been appointed, assigned, transferred, and paid prior to the date of enactment of the Liquor Tax Administration Act. Every such warehouse shall be under the control of the district supervisor of the Alcohol Tax Unit district in which such warehouse is located, and shall be in the joint custody of the storekeeper-gauger and proprietor thereof, and kept securely locked, and shall at no time be unlocked or opened or remain open except in the presence of such storekeeper-gauger or other person who may be designated to act for him. No dwelling house shall be used for such a warehouse, and no door, window, or other opening shall be made or permitted in the walls of such warehouse leading into a distillery. Such warehouses shall be under such further regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe."

The amendment was agreed to.

The next amendment was, on page 85, after line 10, to insert:

SEC. 408. (a) Section 3271 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1225) is repealed: *Provided, however*, That the repeal of said section shall not relieve any distiller of liability for any taxes or penalties arising out of the use of, or storage of distilled spirits in, a distillery warehouse authorized, approved, or maintained under such section 3271 of the Revised Statutes.

(b) All distillery, general, and special bonded warehouses heretofore established according to law and on the date of the enactment of this act actually being lawfully used for the storage of distilled spirits (other than alcohol) on which the tax has not been paid shall be designated as Internal Revenue bonded warehouses, and, upon the filing of such new bonds, or the consents of sureties on such existing bonds, covering spirits in such distillery, general, or special bonded warehouses, as the Commissioner shall consider adequate to insure the payment of taxes due to the United States, may be used under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe, for the storage of distilled spirits (other than alcohol) heretofore or hereafter produced.

The amendment was agreed to.

The next amendment was, on page 86, after line 7, to insert:

SEC. 409. The distinction between distillery bonded warehouses, general bonded warehouses, and special bonded warehouses is hereby removed, and any warehouse for the storage of distilled spirits (other than alcohol) prior to tax payments, shall be operated as an Internal Revenue bonded warehouse. The establishment, construction, maintenance, and supervision of Internal Revenue bonded warehouses shall be under such regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall prescribe.

The amendment was agreed to.

The next amendment was, on page 86, after line 17, to insert:

SEC. 410. Internal Revenue bonded warehouses established under authority of law shall be exempt from the provisions of those sections of law which, prior to the date of enactment of this act have made distinctions between distillery bonded warehouses, general bonded warehouses, and special bonded warehouses, as to (1) kind of spirits to be stored therein; (2) ownership or production of distilled spirits to be stored therein; (3) ownership or proprietorship of such warehouses; (4) location and construction of such bonded warehouses; (5) entry of distilled spirits therein; (6) withdrawal of distilled spirits therefrom; (7) transfers of distilled spirits to or from one or more of such classes of bonded warehouses; or (8) any other matter; it being hereby declared to be the purpose of the amendment to section 51 of the act of August 27, 1894, made by section 407 hereof, to establish the Internal Revenue bonded warehouse as the sole type and kind of bonded warehouses under the internal-revenue laws for the storage of distilled spirits (other than alcohol) on which the tax has not been paid.

The amendment was agreed to.

The next amendment was, on page 87, after line 11, to insert:

SEC. 411. Section 3296 of the Revised Statutes (U. S. C., 1934 ed., title 26, sec. 1287) is amended to read as follows:

"SEC. 3296. Whenever any person removes, or aids or abets in the removal of, any distilled spirits on which the tax has not been paid, to a place other than the Internal Revenue bonded warehouse provided by law, or conceals or aids in the concealment of any spirits so removed, or removes, or aids or abets in the removal of, any distilled spirits from any such warehouse authorized by law, in any manner other than is provided by law, or conceals or aids in the concealment of any spirits so removed, he shall be liable to a penalty of double the tax imposed on such distilled spirits so removed or concealed, and shall be fined not less than $200 nor more than $5,000, and imprisoned not less than 3 months nor more than 3 years."

The amendment was agreed to.

The next amendment was, on page 88, after line 2, to insert:

SEC. 412. Under rules and regulations to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, distillers may collect in locked tanks distillates containing one-half of 1 percent or more of aldehydes or 1 percent or more of fusel oil (heads and tails) removed in the

course of distillation. Such distillates containing one-half of 1 percent or more of aldehydes or more than 1 percent of fusel oil so collected may be removed for denaturation, under regulations prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury, or destroyed in the manner prescribed by the Commissioner of Internal Revenue, under the supervision of an internal-revenue officer to be designated by the Commissioner, and when so denatured or destroyed shall not be subject to the tax imposed by law upon distilled spirits.

The amendment was agreed to.

The next amendment was, on page 88, after line 18, to insert:

SEC. 413. Section 3318 of the Revised Statutes, as amended (U. S. C., 1934 ed., title 26, secs. 1208 and 1209), is further amended to read as follows:

"SEC. 3318. Every rectifier and wholesale liquor dealer shall keep daily, at his place of business covered by his special tax stamp, a record of distilled spirits received and disposed of by him, and shall render under oath correct transcripts and summaries of such records: *Provided*, That the Commissioner may in his discretion require such record to be kept at the place where the spirits are actually received and sent out. The records shall be kept and the transcripts shall be rendered in such form, and under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

"The records required to be kept under the provisions of this section and regulations issued pursuant thereto, shall be preserved for such period of time as the Commissioner, with the approval of the Secretary of the Treasury, shall prescribe, and during such period shall be available during business hours for inspection and the taking of abstracts therefrom by the Commissioner or any internal-revenue officer.

"Every rectifier and wholesale liquor dealer who refuses or neglects to keep such records in the form prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, or to make entries therein, or cancels, alters, or obliterates any entry therein (except for the purpose of correcting errors) or destroys any part of such records, or any entry therein, or makes any false entry therein, or hinders or obstructs any internal-revenue officer from inspecting such records or taking any abstracts therefrom, or neglects or refuses to preserve or produce such records as required by this act or by regulations issued pursuant thereto, shall pay a penalty of $100, and, on conviction, shall be fined not less than $100 nor more than $5,000, and be imprisoned not less than 3 months nor more than 3 years.

"Every rectifier and wholesale liquor dealer who refuses or neglects to render transcripts or summaries in the form required by the Commissioner, with the approval of the Secretary, shall, upon conviction, be fined not more than $100 for each such neglect or refusal."

The amendment was agreed to.

The next amendment was, on page 90, after line 10, to insert:

SEC. 414. Section 62 of the act of August 27, 1894 (U. S. C., 1934 ed., title 26, sec. 1210), is amended to read as follows:

"SEC. 62. No distiller who has given the required bond and who sells only distilled spirits of his own production at the place of manufacture, or at the place of storage in bond, in the original packages to which the tax-paid stamps are affixed, shall be required to pay the special tax of a wholesale liquor dealer on account of such sales: *Provided*, That every distiller shall keep daily a record of such distilled spirits disposed of by him, and shall render under oath correct transcripts and summaries of such records. The records shall be kept and the transcripts shall be rendered in such form, and under such rules and regulations as the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, may prescribe.

"The records required to be kept under the provisions of this section and regulations issued pursuant thereto, shall be preserved for such period of time as the Commissioner, with the approval of the Secretary of the Treasury, shall prescribe, and during such period shall at all times be available, during business hours, for inspection and the taking of abstracts therefrom by the Commissioner or any internal-revenue officer.

"Every distiller who refuses or neglects to keep such records in the form prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, or to make entries therein, or cancels, alters, or obliterates any entry therein (except for the purpose of correcting errors) or destroys any part of such records, or any entry therein, or makes any false entry therein, or hinders or obstructs any internal-revenue officer from inspecting such records or taking any abstracts therefrom, or neglects or refuses to preserve or produce such records as required by this act or by regulations issued pursuant thereto, shall pay a penalty of $100 and, on conviction, shall be fined not less than $100 nor more than $5,000, and be imprisoned not less than 3 months nor more than 3 years.

"Every distiller who refuses or neglects to render the transcripts or summaries in the form as required by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury, shall, upon conviction, be fined not more than $100 for each such neglect or refusal."

The amendment was agreed to.

The next amendment was, on page 92, after line 5, to insert:

SEC. 415. All internal-revenue laws of the United States in regard to the manufacture and taxation of, and traffic in, distilled spirits, wines, and malt liquors, and all penalties for violations of such laws, that were in force at the time the National Prohibition Act was enacted, shall be and continue in force, except as they have been repealed or amended by acts other than (1) Title II of the National Prohibition Act, as amended and supplemented, and (2) section 1 of the Liquor Law Repeal and Enforcement Act, and except as they may be modified by, or may be inconsistent with, this act.

SEC. 416. Except as provided in section 329 of this act, nothing contained in this act shall be construed as restricting or limiting the provisions of title III of the National Prohibition Act, as amended.

The amendment was agreed to.

The next amendment was, on page 92, after line 19, to insert:

TITLE V

SECTION 501. (a) The Federal Alcohol Administration created as a division in the Treasury Department by section 2 (a) of the Federal Alcohol Administration Act, approved August 29, 1935 (Public, No. 401, 74th Cong.), is hereby made an independent establishment of the Government. The office of Administrator of the Federal Alcohol Administration is abolished, and hereafter the Federal Alcohol Administration shall be composed of three members, appointed as provided in section 502 of this title.

(b) All rights, privileges, powers, and duties conferred or imposed upon the Administrator of the Federal Alcohol Administration are conferred and imposed upon the Federal Alcohol Administration. All papers, records, and property of the Administrator and the Federal Alcohol Administration, as a division of the Treasury Department, are transferred to the Federal Alcohol Administration as an independent establishment of the Government.

(c) The Federal Alcohol Administration is authorized, without regard to the civil-service laws, to appoint such attorneys and experts, and, subject to the civil-service laws, to appoint such other officers and employees as it deems necessary to carry out its powers and duties; and the compensation of all such attorneys, experts, and other officers and employees shall be fixed in accordance with the Classification Act of 1923, as amended. All officers and employees appointed by the administrator and engaged in carrying out his powers and duties shall be officers and employees of the Federal Alcohol Administration: *Provided*, That no such officer or employee who does not already possess a competitive classified civil-service status shall thereby acquire such status, except upon recommendation by the Federal Alcohol Administration to the Civil Service Commission, subject to such noncompetitive tests of fitness as the Commission may prescribe; and no such officer or employee, except attorneys and experts, may be retained in the Federal Alcohol Administration without appropriate civil-service status for a period longer than 60 days from the effective date of this section.

(d) All provisions of law applicable to the Administrator shall be applicable in the same manner and to the same extent to the Federal Alcohol Administration.

The amendment was agreed to.

The next amendment was, on page 94, after line 11, to insert:

SEC. 502. (a) The members of the Federal Alcohol Administration shall be appointed by the President, by and with the advice and consent of the Senate. Not more than two members of the Administration shall be members of the same political party. The terms of office of the members first taking office shall expire, as designated by the President at the time of nomination, one at the end of the first year, one at the end of the second year, and one at the end of the third year after the date of the enactment of this act. A successor shall have a term of office expiring 3 years from the date of expiration of the term for which his predecessor was appointed, except that a person appointed to fill a vacancy occurring prior to the expiration of such term shall be appointed for the remainder of such term. No person shall be eligible for appointment or continue in office as a member if he is engaged or financially interested in, or is an officer or director of or employed by a company engaged in, the production or sale or other distribution of alcoholic beverages or the financing thereof. Each member shall, for his services, receive compensation at the rate of $8,000 per annum, together with actual and necessary traveling and subsistence expenses while engaged in the performance of his duties as member outside the District of Columbia.

(b) One of the members shall be designated by the President annually as chairman and shall be the chief executive officer of the Administration; one of the members shall be designated by the President annually as vice chairman of the Administration and

shall perform the functions and duties of the chairman in his absence or in the event of his incapacity caused by illness; and one of the members, who shall be a lawyer, shall be designated by the President as general counsel of the Administration. The Administration may function notwithstanding vacancies, and a majority of the members in office shall constitute a quorum. The Administration shall meet at the call of the chairman or a majority of its members. The Administration is authorized to adopt an official seal, which shall be judicially noticed. The Administration shall be entitled to free use of the United States mails in the same manner as the executive departments.

(c) The Administration is authorized and directed to prescribe such rules and regulations as may be necessary to carry out its powers and duties.

Mr. MALONEY. Mr. President, I offer an amendment to the committee amendment, on page 95, line 6, to strike out "$8,000" and insert in lieu thereof "$10,000", so as to read:

Each member shall, for his services, receive compensation at the rate of $10,000 per annum, together with actual and necessary traveling and subsistence expenses while engaged in the performance of his duties as member outside the District of Columbia.

Mr. GEORGE. I may say that I hope the Senator from Utah will let that amendment to the committee amendment go to conference, because unless the provision for $10,000 is inserted the conferees might have no leeway. I hope the Senator will accept the amendment to the committee amendment.

Mr. KING. Mr. President, I may say that the committee, after considering the subject involved in the proposed amendment to the committee amendment, rejected it and insisted upon the amount which is placed in the bill, namely, $8,000 per annum. However, when a member of the committee urges that an amendment changing the compensation go to conference I am tempted to permit it to do so, though I dislike to take such action.

Mr. GEORGE. Mr. President, the reason for my request is that since this particular provision is not contained in the House bill at all, if the bill should be passed providing for $8,000 there is some question whether the conferees could increase the amount. I suggested that the amendment now proposed go to conference so that the conferees may have the privilege of increasing the compensation fixed by the committee amendment.

Mr. KING. I shall allow the amendment to go to conference, Mr. President, but I give notice to the Senator and those who are proponents of this increase that if I happen to be one of the conferees I shall call attention to the fact that the committee, after full consideration, agreed upon $8,000.

Mr. CLARK. It was unanimously agreed to.

Mr. KING. Yes, Mr. President; it was unanimously agreed to.

The PRESIDENT pro tempore. Without objection, the amendment to the committee amendment proposed by the Senator from Connecticut, on page 95, line 6, is agreed to.

Mr. GEORGE. I desire to offer as an amendment to the committee amendment on page 95, line 11, after the word "annually", to insert "at the beginning of the calendar year."

Mr. KING. I have no objection to that, Mr. President.

Mr. GEORGE. Mr. President, that same amendment should be made after the word "annually" on the same page, line 13.

Mr. KING. I have no objection.

Mr. GEORGE. And the same amendment should be made to the committee amendment wherever the word "annually" appears in connection with the appointment of the members of the board in this particular section. I propose to insert after the word "annually" the words "at the beginning of the calendar year."

Mr. KING. I suggest that the Senator, before the bill leaves the Senate, confer with the clerk to see that the proposed amendments to the committee amendment are placed in the appropriate places.

The PRESIDENT pro tempore. Without objection, the amendments offered by the Senator from Georgia to the committee amendment on page 95 are agreed to.

The committee amendment as amended was agreed to, as follows:

SEC. 502. (a) The members of the Federal Alcohol Administration shall be appointed by the President, by and with the advice and consent of the Senate. Not more than two members of the Administration shall be members of the same political party. The terms of office of the members first taking office shall expire, as designated by the President at the time of nomination, one at the end of the first year, one at the end of the second year, and one at the end of the third year after the date of the enactment of this act. A successor shall have a term of office expiring 3 years from the date of expiration of the term for which his predecessor was appointed, except that a person appointed to fill a vacancy occurring prior to the expiration of such term shall be appointed for the remainder of such term. No person shall be eligible for appointment or continue in office as a member if he is engaged or financially interested in, or is an officer or director of or employed by a company engaged in, the production or sale or other distribution of alcoholic beverages or the financing thereof. Each member shall, for his services, receive compensation at the rate of $8,000 per annum, together with actual and necessary traveling and subsistence expenses while engaged in the performance of his duties as member outside the District of Columbia.

(b) One of the members shall be designated by the President annually at the beginning of the calendar year as chairman and shall be the chief executive officer of the Administration; one of the members shall be designated by the President annually at the beginning of the calendar year as vice chairman of the Administration and shall perform the functions and duties of the chairman in his absence or in the event of his incapacity caused by illness; and one of the members, who shall be a lawyer, shall be designated by the President as general counsel of the Administration. The Administration may function notwithstanding vacancies, and a majority of the members in office shall constitute a quorum. The Administration shall meet at the call of the chairman or a majority of its members. The Administration is authorized to adopt an official seal, which shall be judicially noticed. The Administration shall be entitled to free use of the United States mails in the same manner as the executive departments.

(c) The Administration is authorized and directed to prescribe such rules and regulations as may be necessary to carry out its powers and duties.

The PRESIDING OFFICER. The clerk will state the next committee amendment.

The next amendment was, on page 96, after line 3, to insert:

SEC. 503. (a) Sections 2 (b), 2 (c), and 2 (d) of the Federal Alcohol Administration Act are hereby repealed. All rules, regulations, orders, permits, and certificates, prescribed or issued by the Administrator and in full force and effect on the effective date of this section, shall continue in full force and effect until duly modified, superseded, or revoked.

(b) All proceedings, hearings, investigations, or other matters pending before, or being carried on by, the Administrator shall be continued and brought to determination by the Administration.

(c) No suit, action, or other proceeding lawfully commenced by or against any agency or officer of the United States shall abate by reason of the transfer of rights, privileges, powers, and duties, or the abolition of the office of Administrator, under the provisions of this title.

The amendment was agreed to.

The next amendment was, on page 96, after line 19, to insert:

SEC. 504. The unexpended balances of appropriations available for salaries and expenses of the Federal Alcohol Administration, as a division of the Treasury Department, shall be available for salaries and expenses of the Federal Alcohol Administration, as an independent establishment of the Government, including the salaries and expenses of the members of the Federal Alcohol Administration.

The amendment was agreed to.

The next amendment was, on page 97, after line 2, to insert:

SEC. 505. The third paragraph of section 5 (e) of the Federal Alcohol Administration Act is hereby amended to read as follows:

"In order to prevent the sale or shipment or other introduction of distilled spirits, wine, or malt beverages in interstate or foreign commerce, if bottled, packaged, or labeled in violation of the requirements of this subsection, (1) no bottler of distilled spirits, no producer, blender, or wholesaler of wine, or proprietor of a bonded wine storeroom, and no brewer or wholesaler of malt beverages shall bottle, and (2) no person shall remove from customs custody, in bottles, for sale or any other commercial purpose, distilled spirits, wine, or malt beverages, respectively, after such date as the Administrator fixes as the earliest practicable date for the application of the provisions of this subsection to any class of

such persons (but not later than Aug. 15, 1936, in the case of distilled spirits, and Dec. 15, 1936, in the case of wine and malt beverages, and only after 30 days' public notice), unless, upon application to the Administrator, he has obtained and has in his possession a certificate of label approval covering the distilled spirits, wine, or malt beverages, issued by the Administrator in such manner and form as he shall by regulations prescribe: *Provided*, That any such bottler of distilled spirits, or producer, blender, or wholesaler of wine, or proprietor of a bonded wine storeroom, or brewer or wholesaler of malt beverages shall be exempt from the requirements of this subsection if, upon application to the Administrator, he shows to the satisfaction of the Administrator that the distilled spirits, wine, or malt beverages to be bottled by the applicant are not to be sold, or offered for sale, or shipped or delivered for shipment, or otherwise introduced, in interstate or foreign commerce. Officers of internal revenue are authorized and directed to withhold the release of distilled spirits from the bottling plant unless such certificates have been obtained, or unless the application of the bottler for exemption has been granted by the Administrator; and customs officers are authorized and directed to withhold the release from customs custody of distilled spirits, wine, and malt beverages, unless such certificates have been obtained. The district courts of the United States, the Supreme Court of the District of Columbia, and the United States court for any Territory shall have jurisdiction of suits to enjoin, annul, or suspend in whole or in part any final action by the Administrator upon any application under this subsection; or."

The amendment was agreed to.

The next amendment was, at the top of page 99, to insert:

SEC. 506. This title, except sections 502 and 505, shall take effect when a majority of the members of the Federal Alcohol Administration first appointed under the provisions of section 502 qualify and take office.

The amendment was agreed to.

The PRESIDING OFFICER (Mr. CLARK in the chair). That completes the committee amendments.

Mr. JOHNSON. Mr. President, on behalf of my colleague [Mr. McADOO] and myself I offer an amendment, which has been printed, and which proposes, on page 49, between lines 17 and 18, to insert the following——

Mr. KING. I understood the Senator to say that the amendment has been printed.

Mr. JOHNSON. Yes; it has been printed, but I have a slight addition to it. The amendments we propose to offer, however, have been printed since the bill was reported on Tuesday last.

Mr. KING. I have had no opportunity to examine the amendment in question, and if I can get a copy I shall be very glad to examine it.

Mr. JOHNSON. This is one of the amendments we submitted to the Senator from Utah.

Mr. KING. I now have the copy of the amendment that was furnished me by the junior Senator from California.

Mr. JOHNSON. We furnished them to the Printing Office at the time the bill was reported.

On page 49, between lines 17 and 18, we ask to insert the following in lieu of the internal-revenue tax rates now by law provided, to wit:

On wines containing more than 14 percent and not exceeding 21 percent of absolute alcohol, 10 cents per wine gallon;

On wines containing more than 21 percent and not exceeding 24 percent of absolute alcohol, 20 cents per wine gallon.

Section 613 of the Revenue Act of 1918, as amended (U. S. C., Supp. VII, title 26, sec. 1300 (a) (2)), is amended in part to read as follows:

I call the attention of the Senator to the fact that that is the formal language contained in the tax bills—

SEC. 613. (a) Upon the following articles which are produced in or imported into the United States, after the date of the enactment of this amendatory section, or which on the day after such date are on any winery premises or other bonded premises or in transit thereto or at any customhouse, there shall be levied, collected, and paid, in lieu of the internal-revenue taxes now imposed thereon by law, taxes at rates as follows, when sold or removed for consumption or sale:

On each bottle or other container of champagne or sparkling wine, 2½ cents on each one-half pint or fraction thereof.

On each bottle or other container of artificially carbonated wine, 1¼ cents on each one-half pint or fraction thereof.

On each bottle or other container of liqueurs, cordials, or similar compounds, by whatever name sold or offered for sale, containing sweet wine fortified with grape brandy or containing citrus-fruit wine fortified with citrus-fruit brandy, 1¼ cents on each one-half pint or fraction thereof.

Mr. KING. I should like to make an inquiry of the Senator. I notice in the tendered amendment the following language:

Upon the following articles which are produced in or imported into the United States.

Does not that deal with revenue, and would it not be properly presentable, if presentable at all, before the Finance Committee in a revenue bill rather than in a bill of this character?

Mr. JOHNSON. What does the Senator call the pending bill?

Mr. KING. It is a codification of existing laws.

Mr. JOHNSON. Yes; but it is a bill dealing with the taxing power and levying rates of taxation, so I think the point would not lie that an amendment of this sort must be presented in the House.

Mr. KING. The bill deals with administrative measures, not with the taxing power at all. It is an administrative rather than a revenue measure.

Mr. JOHNSON. The bill, however, fixes rates and deals with taxation, and, inasmuch as it comes to us here in that form, it may be amended. It comes from the House with rates of taxation fixed. The Senate has not hesitated for an instant to change those rates when it thought it ought to do so. It has done so in one of the important parts that we shall reach in a few moments, and the point that we are dealing with a revenue measure, which ought to originate in the House—which I imagine is the point of the Senator from Utah—is wholly inapplicable under those circumstances.

Mr. KING. If I may make another inquiry, has the Senator examined the treaty or the trade agreement recently entered into between France and the United States to determine whether or not his amendment in any manner contravenes it?

Mr. JOHNSON. It does not. That is one of the things which ought to interest all of us. The reciprocal-trade agreement reduces the import tax or duty—the tariff, if you desire to call it so—one-half upon sparkling wines and upon champagnes. We touch only the internal-revenue duty which deals with our wines, by reducing the tax or the internal revenue one-half, as well. It would not seem inappropriate if by a reciprocal-trade agreement we have reduced the tariff rate by one-half, that we be permitted to reduce the internal-revenue tax by one-half, as well.

The proposed amendment contains two separate matters. The first is in the provision referring to wines of 14 percent and not exceeding 21 percent of alcohol, and the second in the provision referring to wines containing 21 percent and not exceeding 24 percent of absolute alcohol. The amendment provides the rates which have been fixed by the House in a bill which has passed the House, and which rests at present in the files of the Senate. In House bill No. 191, rates were fixed upon light wines and upon sweet wines. In the Senate bill, as I understand, the rates were fixed as the Senate committee saw fit upon light wines, and the sweet wines were not touched, but were left as in the existing law which was passed long ago.

We seek by the amendment, sir, to take care of the sweet wines with the alcoholic content that has been indicated, and to take care of those sweet wines with the rates the House in a separate measure, House bill 191, has fixed, the Senate bill not touching the subject matter at all, but relying upon the old law, which fixed entirely different rates.

That is all this amendment is, Mr. President, and I cannot for the life of me understand why the Treasury Department or those who are endeavoring to secure the passage of this bill will not accept the amendments that are presented here as affecting the rates.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from California.

Mr. KING. Mr. President, I do not feel, in the light of the action taken by the committee, which, as I recall, with respect to these rates, was unanimous, that I should accept the amendment. There is one amendment which, if it were disassociated from the others, I would accept. I refer to the

amendment representing a modification of the action of the Senate committee with respect to sweet wines, reducing the rate from 20 cents to 15 cents.

Mr. JOHNSON. May I say to the Senator that question arises in another amendment which we will reach later.

Mr. KING. I understand that.

Mr. President, I do not accept these amendments. They would materially reduce the revenue, and we are trying now to obtain revenues in order to meet the expenses of the Government. So I shall ask that the amendment now pending be rejected and the action of the committee confirmed.

Mr. McADOO. Mr. President, does my distinguished colleague from Utah [Mr. KING] mean that he will accept the amendment to reduce the 20-cent rate to 15 cents on sweet wines as embodied in this amendment?

Mr. KING. Of course, I do not want to bargain with the Senator at all.

Mr. McADOO. No; I am just asking if that was the Senator's proposal?

Mr. KING. If the other amendments were not pressed, I think I would be willing to accept the amendment reducing the rate from 20 cents to 15 cents, and let it go to conference.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from California to the committee amendment.

The amendment to the amendment was agreed to.

Mr. MURPHY. I desire at this time to call up an amendment which is lying on the table and ask that the clerk read it.

The PRESIDING OFFICER. The Chair will state that the Senators from California have pending another amendment to the committee amendment which was passed over temporarily. It would seem that the orderly procedure would be to consider that amendment next.

Mr. KING. I have no objection to taking up that amendment for consideration.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The LEGISLATIVE CLERK. In the committee amendment, on page 48, at the beginning of line 12, it is proposed to strike out the words "on bonded winery premises."

Mr. KING. That amendment may go to conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from California to the amendment reported by the committee.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The clerk will state the next amendment, offered by the Senators from California to the committee amendment.

The LEGISLATIVE CLERK. In the committee amendment, on page 48, line 14, after the words "Revised Statutes", it is proposed to insert "26 U. S. C. A., section 1398 (f)."

Mr. KING. That, as I understand it, is merely a citation.

Mr. JOHNSON. It is purely a citation.

Mr. KING. There is no objection to that.

Mr. JOHNSON. These are formal amendments, to which I think there can be no objection.

The PRESIDING OFFICER. Without objection, the amendment to the amendment is agreed to.

The amendment, as amended, was agreed to.

Mr. JOHNSON. The next amendment relates to the increase of the tax as recommended by the committee from 10 to 20 cents and has to do, as my recollection is, with brandies and fortifying wines. On page 69, lines 11 and 12, we find stricken out before the word "cents" the figures "10" and the figures "20" inserted by the Senate committee. We ask that that amendment of the Senate committee increasing the tax from 10 to 20 cents be rejected. Has the Senator from Utah any objection to that?

Mr. KING. Yes, indeed, I have.

Mr. JOHNSON. I thought the Senator was going to consent to it.

Mr. KING. I wish to call the attention of the Senator to the fact that it would diminish the revenues perhaps by from six hundred thousand to a million dollars or more.

Mr. JOHNSON. No; if the Senator will pardon me——

Mr. KING. Of course I will; but my information comes from the Treasury Department.

Mr. JOHNSON. If one figures the revenues upon the ability of somebody to pay a certain sum which was agreed upon at some time in the past, and then computes the future earnings that might be made under the Treasury's estimate that was intended to fulfill some other requirements that are not stated at the present time, he might reach the conclusion that the Treasury's figures were accurate in that regard; but unless we deal with all those preliminary suppositions—unless, indeed, we accept the figures that are thus given upon the undisclosed matters that are here presented and that the Treasury has not discussed—then, of course, we reach a different conclusion and the figures are quite inaccurate. That, I am sure, will be apparent to the Senator from Utah and other Senators who listen to me. So let us not deal with the statistics that are thus presented by the Treasury Department. Here is a tax that is proposed to be increased upon a specific part of the liquor that is dealt with by this bill, when there has always been a proportionate relation between this fortifying liquor and the wines generally. So that there cannot be, so far as I am able to discern, a single reason why there should be this increase that has been reported by the Senate committee.

The Senator suggested a little while ago that the tax be fixed at 15 cents and that the amendment go to conference. I would have no objection to that course if the Senator suggests it, and then, as between the two rates, the conferees can determine what is appropriate.

Mr. KING. I will accept that.

Mr. JOHNSON. Mr. President, the Senator has accepted that amendment that, instead of a tax of 20 cents fixed on page 69 in line 12, 15 cents be inserted, and that the amendment may go to conference.

The PRESIDING OFFICER. The clerk will state the amendment to the amendment.

The LEGISLATIVE CLERK. In the committee amendment on page 69, line 12, before the word "cents", it is proposed to strike out "20" and insert "15."

The PRESIDING OFFICER. Without objection, the amendment to the amendment is agreed to; and, without objection, the committee amendment, as amended, is agreed to.

Mr. JOHNSON. Mr. President, the next proposition that we come to is found at the end of section 331, page 71. The amendment has been submitted and has been printed, and I assume that it is in the hands of the distinguished gentleman who represents the United States Treasury.

Mr. KING. What is the amendment? I do not have it before me, I will say.

Mr. JOHNSON. The amendment reads as follows, if it is not immediately accessible to our friends. At the end of section 331, page 71, add the following:

(e) That under rules and regulations to be prescribed by the Secretary, there shall be abated or refunded to the extent such exceeded the fortifying tax herein provided all such taxes paid upon grape brandy or wine spirits used in the fortifiction of wine held by the producer thereof upon the day this act takes effect and intended for sale or for use in the manufacture or production of any article intended for sale.

This amendment assumes the tax on fortifying spirits used in the manufacture of sweet wines reduced from 20 to 10 cents as by the House provided in House bill 191. This tax should be extended to the taxes paid upon wines in bond or which are stipulated to be paid by bond or lien upon the wines.

Unless this provision supplements the reduction of taxes, the wines in bond having paid the tax are at a disadvantage with those thereafter produced, which have not paid the tax in market sales. I think that ought to be obvious.

In this respect attention is called to the provisions of House bill 9185, as reported to the Senate, page 50, lines 10 to 15, inclusive, reading as follows—this is part of the Senate bill—

The Commissioner of Internal Revenue, subject to regulations prescribed by the Secretary of the Treasury, is authorized to remit, refund, and pay back all distilled spirits tax on such liqueurs,

cordials, and similar compounds paid by rectifiers or assessed prior to the date of the enactment of the Liquor Tax Administration Act.

That is the provision of the law which has now been written into the bill. If there is any justification for this provision under the law, broadly refunding all internal-revenue taxes paid upon distilled spirits used in liqueurs, cordials, and similar compounds, there certainly is much more justification for the proposed provision, less broad, supporting the particular refund referred to in the amendment. It is not "playing the game", it seems to me, with impartiality where in the one instance a refund is granted and in the other instance is denied. Accordingly I hope the amendment will be accepted.

Mr. KING. Mr. President, the committee is unwilling to accept the tendered amendment which calls for a refund of a difference of 10 cents a gallon on brandy used in the fortification of wines now held by the producer.

The manufacturer of brandy must pay a tax of $2 per gallon. The committee has been generous in permitting to go to conference an amendment reducing the tax on brandy used to fortify wines to 15 cents per gallon, so that brandy for which other consumers have to pay $2 a gallon can be obtained at 15 cents a gallon for fortification purposes. Some have insisted that brandy for fortification ought to pay the same price as if acquired for beverage purposes instead of for fortification purposes. The wines, fortified by brandy, are used for beverage purposes. The Treasury has been generous, it seems to me, in approving a tax of 20 percent upon brandy so used to fortify wines, and the committee now consents, in order to take the matter to conference, to a reduction of the tax to 15 cents when used for fortification of wines.

Of course, if the rate is not reduced this part of the amendment becomes immaterial, but it has been reduced. Even so, there remain objections to the proposed refund. The Treasury believes that the provision is wholly impractical from an administrative standpoint. Their efforts to enforce analagous measures have proven them absolutely impractical and ineffective since it has been impossible from the records in the Treasury to determine the proper amount of such refund.

The wines now held by the producers may have contained anywhere from 1 to 13 percent of natural alcohol and may have had from 3 to 20 percent of brandy added. Many of the fortified wines subsequently have been blended with other wines. It is now impossible to tell how much brandy they contain because of these admixtures. For instance, as used in cordials, it would be impossible to tell how much was used for cordials and how much for sweet wines, how much was left only as wines and how much was left rather as cordials. It is now impossible to tell how much brandy the cordials or sweet wines now contain or did contain when consumed. Moreover, some of the brandy was assessed at the present rate of 20 cents per gallon and some at the rate of 10 cents per gallon, which rate was in effect prior to January 1934. No estimate was given to the committee of the amount which would be involved in such refund, because, for the reasons just given, it was impossible to determine the computation.

Mr. President, the amendment is unsound and improper, and is resisted by the committee.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from California. [Putting the question.] The "noes" seem to have it.

Mr. JOHNSON. Mr. President, I do not want to call a quorum to interfere with the progress of the bill. Will not the Senator take the amendment to conference?

Mr. KING. So many concessions have been made here and in the committee that I am unwilling to do so.

Mr. JOHNSON. Very well. Before announcement is made of the result of the vote I suggest the absence of a quorum.

The PRESIDENT pro tempore. The absence of a quorum is suggested. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Copeland	La Follette	Reynolds
Ashurst	Couzens	Lewis	Robinson
Austin	Davis	Logan	Russell
Bachman	Dickinson	Lonergan	Schwellenbach
Bailey	Dieterich	Long	Sheppard
Barkley	Donahey	McAdoo	Shipstead
Benson	Fletcher	McGill	Smith
Bilbo	Frazier	McKellar	Steiwer
Black	George	McNary	Thomas, Okla.
Bone	Gerry	Maloney	Townsend
Borah	Gibson	Metcalf	Truman
Brown	Glass	Moore	Tydings
Bulkley	Guffey	Murphy	Vandenberg
Bulow	Hale	Murray	Van Nuys
Burke	Harrison	Neely	Wagner
Byrd	Hastings	Norris	Walsh
Capper	Hatch	O'Mahoney	Wheeler
Caraway	Hayden	Overton	White
Chavez	Johnson	Pittman	
Clark	Keyes	Pope	
Connally	King	Radcliffe	

The PRESIDING OFFICER. Eighty-one Senators have answered to their names. A quorum is present. The question is on agreeing to the amendment offered by the Senator from California [Mr. JOHNSON].

Mr. JOHNSON. Mr. President, I wish to make plain, please, what the amendment provides. It calls for a refund upon which the House has acted by its bill, which I presume is buried in the committee by virtue of the fact that the bill now before us takes its place; but the bill was passed unanimously in the House. The bill provides for certain kinds of refunds; and we insist, since it provides for refunds in the fashion that it does, that those refunds should be extended to the wines as well as to other liqueurs that are provided for in the bill.

I again call the attention of the Senate to the fact that in this bill there is a provision respecting refunds:

The Commissioner of Internal Revenue, subject to regulations prescribed by the Secretary of the Treasury, is authorized to remit, refund, and pay back all distilled-spirits tax on such liqueurs, cordials, and similar compounds paid by rectifiers or assessed prior to the date of the enactment of the Liquor Tax Administration Act.

I am not complaining of that particular refund provision, but I say that if we play the game fairly to all we will not only make these refunds applicable to the liqueurs of which the Senate has been tender in its refunds, but we will make these refunds applicable to wines, too. I cannot see any reason on the face of the earth why that should not be done. It has been done in the past. It has been done in the bill which passed the House. It simply was eliminated and omitted in respect to wines in the bill coming before the Senate.

So I ask that the amendment be adopted.

Mr. KING. Mr. President, I desire to state that, so far as I am advised, this provision was not considered by the Ways and Means Committee of the House. It was brought to the floor of the House just before the bill was passed. I am assured by the Treasury Department that they have never had an opportunity to consider it, and can only anticipate its effect by reason of some experiences of a cognate or analogous character. Those experiences have demonstrated that the provision is absolutely unworkable.

The Senate and the House have been generous with the wine makers in preparing the bill before us. The Senate has been generous in dealing with the wine makers, and has granted concessions which the committee declined to grant. This particular provision was considered by the committee, and was unanimously rejected by the subcommittee and by the Finance Committee.

I may say—and I am repeating what I said a few minutes ago, before a quorum was called for—that under the law the manufacturers and producers of brandy must pay a tax of $2 per gallon. Under the law which we are passing, and which I may say is, in effect, those who use brandy for the fortification of their wines, their sweet wines, their highly alcoholized wines, pay a tax of only 20 cents per gallon on brandy on which, if it were used for beverage purposes, they would be compelled to pay a tax of $2 per gallon. We have therefore

permitted them to use the brandy for fortification and pay a tax of only 20 cents per gallon, and we have given them 18 months within which to make the payment. We have extended the period from 1 year to 18 months. We have been more than generous. Now we are asked to grant a refund for sweet wines which they have sold which contain various kinds and degrees of brandy, and, of course, the impracticability, if not impossibility, of determining the quantity, the character, the quality, and the amount that might be refunded is obvious to anyone.

This amendment requires that there shall be refunded the difference of 10 cents a gallon on all brandy used in the fortification of wine now held by the producer, and the amendment is retroactive as well as prospective. The Treasury Department believes that the provision is wholly impracticable from an administrative standpoint, since it is impossible from the records in the Treasury to determine the proper amount of such refunds.

The wines now held by the producers may have contained anywhere from 1 to 13 percent of natural alcohol, and may have had from 3 to 20 percent of brandy added. Many of these fortified wines have subsequently been blended with other wines. Moreover, some of the brandy was assessed at the rate of 20 cents per gallon, and some at the rate of 10 cents per gallon, which was in effect prior to January 12, 1934. Obviously, no estimate whatever was given to the committee of the amount which would be involved in such refunds; and, because of the reasons stated, the amount is impossible of computation.

I insist that the amendment is highly improper, and I hope the Senate will support the committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senators from California [Mr. JOHNSON and Mr. MCADOO]. [Putting the question.] By the sound, the ayes seem to have it.

Mr. KING. I call for a division.

On a division, the amendment was agreed to.

Mr. JOHNSON. Mr. President, I am not entirely clear that all the amendments which I thought were formal in character were accepted. One of the amendments is, on page 48, line 12, to strike out "on bonded winery premises."

The PRESIDING OFFICER. That amendment has been agreed to.

Mr. JOHNSON. I thought it had been.

Mr. KING. Yes; I accepted that one.

Mr. JOHNSON. Probably the one which had not been acted upon is as follows: On page 70, line 5, after the words "wines are", insert the words "destroyed or."

Mr. KING. That may go to conference.

The PRESIDING OFFICER. The Senator from California offers an amendment, which will be stated.

The LEGISLATIVE CLERK. On page 70, line 5, after the words "wines are", it is proposed to insert the words "destroyed or."

The amendment was agreed to.

Mr. JOHNSON. On page 82, lines 17, 23, and 24, after the words "distilled spirits", where they occur in each instance, I move to insert the words "and wines."

Mr. KING. That may go to conference.

The PRESIDING OFFICER. The Senator from California offers an amendment, which will be stated.

The CHIEF CLERK. On page 82, in the committee amendment heretofore agreed to, lines 17, 23, and 24, after the words "distilled spirits", it is proposed to insert the words "and wines."

The PRESIDING OFFICER. Without objection, the vote whereby the committee amendment was agreed to will be reconsidered. The question is on agreeing to the amendment offered by the Senator from California to the committee amendment.

The amendment to the amendment was agreed to.

The amendment, as amended, was agreed to.

Mr. JOHNSON. And on page 83, line 6, after the words "distilled spirits", I move to insert the words "and wines."

Mr. KING. That is the same thing. That may go to conference

The PRESIDING OFFICER. The Senator from California offers an amendment, which will be stated.

The CHIEF CLERK. On page 83, line 6, in the committee amendment heretofore agreed to, after the words "distilled spirits", it is proposed to insert the words "and wines."

The PRESIDING OFFICER. Without objection, the vote whereby the committee amendment was agreed to will be reconsidered. The question is on agreeing to the amendment offered by the Senator from California to the amendment of the committee.

The amendment to the amendment was agreed to.

The amendment, as amended, was agreed to.

Mr. JOHNSON. Mr. President, I think I now come to the last of the amendments I have to present. On behalf of my colleague [Mr. MCADOO] and myself, I offer the following amendment: At the proper place in the bill, insert the following as section 506:

SEC. 506. The second proviso of subdivision (e) of section 5 of the Federal Alcohol Administration Act is amended to read as follows: "*Provided further*, That nothing herein nor any decision, ruling, regulation, or other action of any department of the Government or official thereof shall deny the right of any person to use wholly or in part the wine names or brands Port, Sherry, Burgundy, Sauterne, Haut Sauterne, Rhine (Hock), Moselle, Chianti, Chablis, Champagne, Tokay, Malaga, Madeira, Marsala, Claret, Vermouth, Barbera, Cabernet, St. Julien, Riesling, Zinfandel, Medoc, or Cognac, or any other geographic name of foreign origin, upon any of the foregoing produced in the United States if of the same type and the use of such name or brand is qualified by the name of the State or other locality in the United States in which the product is produced, and, in the case of the use of such name or brand on any label or in any advertisement, if such qualification is as conspicuous as such name or brand: *Provided further*, That nothing in this section shall be held in any wise to affect or abridge any of the powers granted the Federal Alcohol Administration by an act of Congress entitled the 'Federal Alcohol Administration Act', approved August 29, 1935, to provide standards of identity, quality, labeling, or other regulations save as herein expressly provided as to said names or brands."

The PRESIDING OFFICER (Mr. POPE in the chair). The question is on agreeing to the amendment offered by the Senator from California [Mr. JOHNSON].

Mr. CLARK. Mr. President, I am opposed to the amendment, which was rejected unanimously both in the subcommittee and in the full Committee on Finance.

The amendment should be designated as an amendment to authorize the pirating of brands and processes. While the amendment is not so bad as it was when it was originally presented in the subcommittee, under the terms of the amendment there would be absolutely nothing on the face of the earth to prohibit—and it forbids the Federal Alcohol Control Administration from prohibiting—any manufacturer of wine in California or any other State of the Union from pirating such a brand as Moet and Chandon, or Cliquot, or any other well-known brand of champagne or other wine which has a definite place among wine users throughout the world.

In addition to that, the particular purpose of the amendment is to keep the Federal Alcohol Control Administration from putting into effect a ruling which is to go into effect within the next month or two in order to protect the traditional process for the manufacture of champagne.

It seems that a process has been developed recently in California for making so-called champagne in bulk, in large tanks, which is not at all the champagne recognized by wine lovers and the wine trade throughout the world, which is a particular, well-defined, well-recognized process.

The Federal Alcohol Control Administration is about to put into effect a ruling which will permit the sale of this pseudo-champagne, but will permit the sale only on condition that it be labeled "Sparkling wine, champagne type", which it is. The purpose of the pending amendment is to prohibit the Federal Alcohol Control Administration from putting into effect a ruling which, after an exhaustive investigation, they have found to be necessary and desirable for the protection of the purchasers of wine throughout the country.

I myself do not profess to be an authority on the subject. I do not know whether or not champagne produced by the bulk method is as good as champagne made by the

old traditional method. It is a question of fact, which neither the Senate committee nor the Senate itself is in a position to try on its merits, and I submit that the matter should be left to the Federal Alcohol Control Administration, which is particularly constituted for the very purpose of deciding such questions of fact as are here involved.

Mr. JOHNSON. Mr. President, I think, historically, my friend the Senator from Missouri is a little inaccurate, but I do not wonder at that, because all of us become more or less inaccurate toward the end of a session, and particularly inaccurate historically.

The process of making champagne to which he refers was not patented and was not conceived in the State of California at all. It is a French process, and I do not know of any reason on earth, even if there were another mode of making champagne, why we should be so tender of champagne that comes from abroad that we would not permit any particular mode to be adopted in our own country for our own people.

It is not a question of pirating upon some other brand which some particular firm may have conceived in the past. It is provided in the amendment specifically—and this has been the fact during all the years that champagne has been made in other places than abroad—that all of the champagne that is bottled shall be so designated as to indicate exactly what it is. For instance, if made in Missouri, it is "Missouri champagne"; and if made in California, it is "California champagne", stated so upon the label itself and stated so that any individual may understand and may know exactly what it is.

On what conceivable theory is it to be said that a process which exists in France today shall be the only process by which champagne may be made, or that anybody in this country shall be forbidden making champagne as he sees fit, so long as he does not deceive, and so long as he designates it in such fashion that those who buy may understand just exactly what it is? I cannot fathom it.

Perhaps it may be because I am not particularly fond of champagne, and perhaps it may be because I do not drink it with great frequency because of its cost, but whatever may be the reason why we should be forbidden either to drink champagne that is manufactured in Missouri or in California because France may manufacture its champagne in a different fashion, passes my comprehension entirely.

As for the particular wines which are designated here, such as port, sherry, burgundy, and the like, it is an absurdity to say that we shall not be permitted to designate as manufactured at a particular place geographically a wine with a generic name.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. JOHNSON. I gladly yield.

Mr. CLARK. I am sure the Senator does not know of any suggestion by the Federal Alcohol Control Administration, or anyone else in a position of authority, that it should not be permissible to put out port labeled "California port", or sherry labeled "California sherry", or any other wine of that sort so labeled. The whole controversy revolves around the question whether the producers shall be able to put out the new process champagne and label it "champagne" or be compelled to label it "Sparkling wine, champagne type."

Mr. JOHNSON. Mr. President, I think the Senator is in error again, because the first differences arose over the wines with which we are most familiar, not champagne. Subsequently, perhaps, differences arose regarding champagnes. But, so far as we are concerned, when we are legislating for our country, what difference does it make whether a producer in some State shall manufacture a champagne by a specific process of his own or a process which he may have purchased in France, or which he may have obtained in some other fashion? The law books are full of cases where pirating upon trade names is prevented, and the books are loaded down with cases deciding against misrepresentation. That, of course, may be prevented under any circumstances, but where there is neither pirating nor deceit nor any misrepresentation we cannot prevent, and we should not prevent, the manufacture of champagne by anyone as he sees fit to manufacture it. I might not like his kind of champagne, and someone else might not like it; but what of it? We have a right to deal in it, provided there is no deceit, misrepresentation, or fraud.

Mr. FLETCHER. Mr. President, may I ask the Senator a question?

Mr. JOHNSON. I yield.

Mr. FLETCHER. Is there any reason why some producers in California could not bring over from France those who have engaged in making champagne for years and years and have them make champagne in California by their process, or in any other way?

Mr. JOHNSON. No; there is no reason in the world why we should not bring such persons to this country if we want to bring them here, but there is equally no reason in the world why we should not progress with a particular industry of that sort in any fashion we wish.

Mr. FLETCHER. The point is, we can call it champagne, because it is made by French people here in the United States according to the champagne process.

Mr. JOHNSON. Yes.

Mr. FLETCHER. We have a right to call it champagne.

Mr. JOHNSON. Yes; but I insist, I may say to the Senator from Florida, that we may not only call it champagne by virtue of the fact that it is made by a resident of France, or by one who intends to become a resident of the United States who was born in France, we may label it champagne if we wish to in our territory, where it is manufactured by our people.

Mr. COPELAND. Mr. President, may I ask the Senator from California whether he does not fear retaliation on the part of some other countries if we shall follow his advice today?

Mr. JOHNSON. Does the Senator address the query to me?

Mr. COPELAND. Yes.

Mr. JOHNSON. No, I will say to the Senator; with the policy of the "good neighbor" in effect, there never can be retaliation. [Laughter.]

Mr. COPELAND. I think the Senator places quotation marks about that and an exclamation point after it. [Laughter.]

I call the attention of the Senator from California to "Sun Maid raisins and "Sun Kist oranges." Would the Senator be willing to have Italy and southern France and Spain send oranges or raisins to this country marked "Sun Kist oranges" or "Sun Maid raisins"?

Mr. JOHNSON. Does not the Senator see that there is no analogy between what he states and the subject we are now discussing? An orange is an orange. If the analogy were followed at all, the Senator would say that we would try to prevent somebody selling oranges as oranges because our people sell oranges as oranges. That is just as clear as mud, I submit to the Senator. [Laughter.]

Mr. COPELAND. I think it is just as clear as mud, and no clearer. [Laughter.] As a matter of fact, there has come into existence popular knowledge regarding certain wines with the names "port", "burgundy", "sherry", and other names, which refer specifically to certain types made in certain countries and coming from certain geographical locations.

If we are to overturn all our international relations, which the Senator from California intimates are so important, and particularly our good-neighbor policy, we are going to be disturbed here; and I fear that on the other side they will not be good neighbors, because they will be sending us products which are called "Sun Maid" raisins and "Sun Kist" oranges, and they may even go to the typewriter field and send over "Remington" typewriters made abroad, and "Old Grand Dad", and "Idaho" potatoes, and "Ivory Soap", and "Uneeda Biscuits", and "Chesterfield" cigarettes, and "Ford" automobiles.

We have vested rights in those names. Through long years of experimentation, and through the sale of our products under those trade names, we have come to have a vested right in them. I am frank to say, without having

any more love for the international relationship than has my friend from California, that I can see that there would be retaliation for what the amendment seeks to do.

The Senator from California represents a wine-producing State. I also represent a wine-producing State. There are great vineyards in western New York. Wine has been produced in New York for decades. There is no desire on the part of the wine makers of New York to have the pending amendment adopted. I have been authorized by them to say that they do not want it. So I hope the Senate will not write into the bill something which will lead to retaliation and to a disturbance of the friendly relations referred to by the Senator from California.

Mr. McADOO. Mr. President, I cannot see where there may be any retaliation because we dare to assert our right to manufacture what we please in the United States, and to say frankly that it is manufactured in one State or another: "Champagne" is a generic term. Champagne is made not only in France; it is made in various other countries. It is made in Germany and in Spain and in Italy, as I understand; and we make a champagne in California. When we sell it, we sell it as California champagne, clearly and explicitly so stated on the label.

My distinguished friend the Senator from New York asks whether we should like to have Sun Kist oranges sent in here from Italy. Yes; I say, let them come in if they pay the duty and if they label them conspicuously "Italian Sun Kist oranges." If we want to admit Italian Sun Maid raisins, I say that is all right, provided they pay the duty and the raisins are labeled explicitly "Italian Sun Maid raisins."

The fact that France has developed a certain method of making champagnes which she thinks is best is no reason why we should not develop a method of making champagne which we think is best. I think the French method is no better than our method. We have a method which we in California consider far superior to the French method. Not all our manufacturers use the same process. Some of them use the French process; but the products are labeled in every instance "California champagne", so that the person who buys the bottle knows exactly what he is getting. No deception is practiced on the purchaser, and there is nothing piratical about it. We have made this wine in California for many years, and we have labeled it in that way; and it has gone into commerce; and everyone knows what it is. When the public buys California champagne, it buys it without a reference to whether it was made by a French process or a California process. It buys it because the popular taste demands it and because it is cheaper than the imported article.

I desire to ask Senators why should we be so tender with regard to champagne importation from foreign countries into this country? France, for instance, repudiated her debt to us. Why should we now turn the other cheek to France and say that we are not going to manufacture anything in this country in the way of champagne without her permission? That is what it comes down to in the final analysis if our producers are denied the right to label their product truthfully unless it conforms to some foreign process.

In that event we could not manufacture any of the various kinds of wines and label them with the name of the State in which they are produced without practically gaining the consent of some foreign country.

I think we ought to stand on our own legs, as we have always done, and that our people deserve first consideration so long as they are not engaged in piratical practices and so long as they are not deceiving the public.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. McADOO. I yield.

Mr. COPELAND. Is the California champagne made in exactly the same way that the French champagne is made?

Mr. McADOO. Some of it may be; but suppose it is not—we do not concede that the French method of making champagne is better than the California method of making it. Whenever a bottle of California champagne is bought, the man who buys it does not say, "I should like to know whether you make this champagne according to the French method or the German method or the Italian method." He buys it because it is California champagne and because he thinks it is better than any other champagne and because he gets it for less money.

Mr. COPELAND. Let me ask the Senator another question. I should not ask him this question if he were a candidate for reelection this fall.

Mr. McADOO. The Senator may ask the question upon the assumption that I am a candidate for reelection this fall, and I will answer it.

Mr. COPELAND. No; I think it might be embarrassing to the Senator.

Mr. McADOO. Nothing my distinguished friend could say would be embarrassing to me.

Mr. COPELAND. Is the Senator willing to have "Sun Maid" raisins sent into this country from France and from Italy? Is he willing to have "Sun Kist" oranges sent here from Spain? Is he willing to have the word go back to California that the distinguished Senator representing that State, and representing it ably, is so regardless of the brand of "Sun Kist" oranges from the Golden States that he is perfectly willing to have that label used, no matter how many crates of oranges may be sent from Spain and Italy and other parts of the Old World? Be careful, because there will be an election some day.

Mr. McADOO. I shall be absolutely regardless of caution or anything else in answering the question of my distinguished friend from New York.

In the first place, I should have no objections, so far as I am concerned, to any effort on the part of any foreign country which can produce Sun Kist oranges or Sun Maid raisins to ship its product into this country if it is explicitly labeled by the name of the country which produced it, and provided, of course, it pays the lawful duties. We are protected by an adequate duty against any importation of that kind anyway. Moreover, there is no country in the world which can produce Sun Kist oranges and Sun Maid raisins except California [laughter]; so we have nothing to fear from that source.

All that the amendment means is that we will not permit the legitimate producers of port and sherry and champagne and other varieties of wines in this country to be deprived of the vested rights they have acquired over long years of struggle and fight to establish and sell their domestic brands in this country. We are not going to permit them to be deprived of their business by saying that they can conduct it only provided they conduct it according to the processes which are being used in some foreign country. So long as we are permitted to brand our articles with the name of the State or the locality where they are produced, there can be, to my mind, no conceivable objection to it.

We ask the Senate only to protect this great industry in California, which is honestly conducted, which has suffered through the past 15 years of a grave depression which has affected the prosperity of our entire citizenry. We ask only that Congress be fair enough to protect us in our right to conduct the legitimate business which we have established and maintained for the past 20 to 50 years, without unjust discrimination or restriction.

Mr. GLASS. Mr. President, I rise to say simply that I am going to vote for the pending amendment, because I think the Senators from California are absolutely right. However, I do not think the French indebtedness to this country has a thing on earth to do with the matter, and I deny that France has repudiated her indebtedness to this country. I do not think suggestions of that sort should be brought into the present discussion.

At a suitable time, when the question shall be pending, I desire to have something to say on the indebtedness of foreign governments to this country.

Mr. LA FOLLETTE. Mr. President, I wish to say just a few words about the amendment which the Senators from California have offered to the pending bill.

As I understand the proposition, there is nothing involved in the controversy insofar as it relates to the question of

champagne that has anything to do with competition between the French producers of champagne and the producers of champagne in the United States. Therefore, I think the Senate would be making a mistake if it should decide this question on any basis of rivalry between domestic and foreign producers of this product.

The issue concerning champagne is between domestic producers of champagne in the United States, one group producing it by the bottle-fermentation method and another group now producing it by the so-called bulk-fermentation method, which is a faster method of fermentation.

This controversy between the domestic producers, one using the old technique of fermentation and the other using the new method, has been before the Federal Alcohol Control Administration. It is a technical question. The Senate has not sufficient information upon which to render a decision. We cannot determine whether or not the champagne produced by the new bulk-fermentation method produces a product equal in quality and other characteristics of a chemical nature to that produced by the bottle-fermentation method. Therefore it seems perfectly reasonable that we should permit this intricate chemical question to be decided by an agency of the Government which has been created for that purpose, and which, as I understand, is now making a scientific investigation following hearings which have been held upon this subject. It would be just as absurd for the Congress to attempt to pass upon an intricate rate case involving railroad charges as it would be for us to predetermine this question upon the facts which are now before us. So much for the question involved in the issue of champagne; but, to sum up, I repeat that it is not an issue between the foreign producers of champagne and domestic producers of champagne. It is an issue between domestic producers of champagne in the United States who use two different methods.

So far as the importation of champagne is concerned, that is taken care of, presumably, by the tariff rates which have been imposed for the protection of domestic producers.

Then we come to the second part of the issue involved in the amendment presented by the Senators from California, namely, as to the use of what might be termed "trade names" that relate to the production of wines of a certain general character but which have been produced for many generations under a family name, as, for instance, Chateau y Quem.

This name, Mr. President, does not describe a type of wine, but describes a type of wine produced by a particular producer in France. He has just as much right to have that trade name protected in the United States as has the manufacturer of an American automobile the right to have the name of his car, created by himself and manufactured in the United States, protected when he sells it abroad.

Under the terms of the amendment as it is now pending, if it is adopted and becomes law, in case any producers of wine who have established a trade name for their product have not registered it with the Patent Office in the United States, the trade name may be taken and used by any producer in this country. This will lead to retaliation which will extend to other products than wine, and we will be in danger of incurring retaliatory tactics with regard to the established trade names and trade marks of products generally manufactured in the United States and exported in the foreign trade. So much for the trade names that are involved in this situation.

It is my understanding—and if I am in error I wish to be corrected—that the general types of wine mentioned in the amendment on page 2, beginning in line 12 and extending down to line 16, with one or two exceptions, have never been denied to any American producer. All that is required is that in a prominent fashion they shall designate where the wine is produced.

For example, if a producer of wine in California is producing a port he must indicate on the label that it is a California port, or if it is produced in some other wine-growing section of the United States, as New York, for instance—I am not informed whether port is produced in New York, but assume that it is—the domestic producer would have a perfect right to designate his product as port, but he would have to inform the purchaser by an imprint on the label in a prominent manner that it was New York port. Therefore, so far as the present defined policy of the Alcohol Control Unit is concerned—and there is no evidence that they have any idea of changing it—most of these names are open to the use of domestic producers, provided they indicate the territory or section in which the wine has been produced.

Therefore, Mr. President, while I always dislike to find myself in disagreement with the Senators from California, as one member of the committee that heard the evidence with regard to this amendment, I feel that I must indicate my opposition to it and my apprehension that, if it becomes law, it will result in retaliation against American-manufactured products when they are exported, which will cause us to rue the day we adopt this amendment.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from California.

Mr. COUZENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Copeland	La Follette	Reynolds
Ashurst	Couzens	Lewis	Robinson
Austin	Davis	Logan	Russell
Bachman	Dickinson	Lonergan	Schwellenbach
Bailey	Dieterich	Long	Sheppard
Barkley	Donahey	McAdoo	Shipstead
Benson	Fletcher	McGill	Smith
Bilbo	Frazier	McKellar	Steiwer
Black	George	McNary	Thomas, Okla.
Bone	Gerry	Maloney	Townsend
Borah	Gibson	Metcalf	Truman
Brown	Glass	Moore	Tydings
Bulkley	Guffey	Murphy	Vandenberg
Bulow	Hale	Murray	Van Nuys
Burke	Harrison	Neely	Wagner
Byrd	Hastings	Norris	Walsh
Capper	Hatch	O'Mahoney	Wheeler
Caraway	Hayden	Overton	White
Chavez	Johnson	Pittman	
Clark	Keyes	Pope	
Connally	King	Radcliffe	

The PRESIDING OFFICER. Eighty-one Senators having answered to their names, a quorum is present.

The question is on the amendment offered by the Senator from California. [Putting the question.] The Chair is in doubt.

Mr. McNARY. I ask for a division.

On a division, the amendment was agreed to.

The PRESIDING OFFICER. The bill is before the Senate and open to further amendment.

Mr. MURPHY. Mr. President, does the Senator from California [Mr. JOHNSON] desire to offer any further amendment?

Mr. JOHNSON. No; I have nothing further.

Mr. MURPHY. Then, I desire to offer the amendment heretofore submitted by me and now lying on the table.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. At the proper place in the bill it is proposed to insert the following new section:

SEC. . (a) For the purposes of the Federal Alcohol Administration Act, the Food and Drugs Act, as amended, and of any act of Congress amendatory of or in substitution for either of said acts, no product shall be labeled or advertised or designated as neutral spirits, whisky, or gin, or any type thereof, for nonindustrial use, if distilled from materials other than grain, or if the neutral spirits contained therein are produced from materials other than grain. The term "neutral spirits" includes ethyl alcohol.

(b) The fifth paragraph of section 605 of the Revenue Act of 1918 is hereby repealed.

Mr. MURPHY. Mr. President, this amendment seeks to accomplish a twofold purpose. The first is to preserve for the American grain farmer a market which he has enjoyed for 100 years. The second is, in the interest of the consumer, to assure honest labeling of blended whisky.

Mr. BORAH. Mr. President, of what material other than grain may whisky be manufactured? The amendment says that "no product shall be labeled or advertised or designated as neutral spirits, whisky, or gin, or any type thereof, for nonindustrial use, if distilled from materials other than grain." What are the "other materials"?

Mr. MURPHY. Petroleum products, sugar, or sugarcane.

Mr. GUFFEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Pennsylvania?

Mr. MURPHY. I yield.

Mr. GUFFEY. Alcohol is also made from apples and potatoes. Alcohol is distilled from other materials, such as fruit juices, for instance.

Mr. MURPHY. That is not applicable to the question asked by the Senator from Idaho, which concerned whisky, not alcohol. His question was directed to the amendment. Of course, it is a fact that alcohol may be distilled from anything containing sugar. The amendment does not concern anything but blended whisky. It does not affect brandy. It does not affect rum. It is confined, as I have said, to those grain products which have been used for 100 years in the manufacture of whisky.

Mr. GUFFEY. From what is rum made?

Mr. MURPHY. Rum is made from molasses.

Mr. GEORGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Georgia?

Mr. MURPHY. I yield.

Mr. GEORGE. As I understood the amendment when read, it applies also to gin.

Mr. MURPHY. Yes; it does. That is true.

Mr. GEORGE. Is not gin made from molasses?

Mr. MURPHY. Gin is not historically a grain product.

Mr. GEORGE. But the amendment does apply to gin, does it not?

Mr. MURPHY. Yes; it does.

Mr. GEORGE. The amendment would provide that gin may not be made unless it is made from grain.

Mr. MURPHY. It does so provide. It carries that provision.

Mr. MOORE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from New Jersey?

Mr. MURPHY. I yield.

Mr. MOORE. The making of applejack is quite an industry in New Jersey. Would the Senator's amendment affect that industry?

Mr. MURPHY. No; it would not affect it.

Mr. MOORE. Why not?

Mr. MURPHY. Applejack is not contemplated. Applejack is made from fruit. Applejack is a brandy, and brandy is not to be affected by the provisions of the amendment.

Mr. MOORE. But it has been called "whisky", and the Senator's amendment provides that—

> No product shall be labeled or advertised or designated as • • • whisky—

And so forth.

Mr. MURPHY. This is the first instance of that nature that has come to my knowledge.

Mr. MOORE. Applejack has been called whisky, it has been called rum, and it has even been called worse than that on occasions. [Laughter.]

Mr. MURPHY. There are many products variously made which have been called whisky in the years through which we have recently passed.

Addressing myself seriously to the amendment, if I may be permitted, the repeal of prohibition brought about an increase, during the fiscal year ending June 30, 1934, of nearly 13,000,000 bushels in the quantity of grain used for making distilled spirits. Of the approximately 43,000,000 bushels of grain now being used in the distillation of whisky, gin, and alcohol for beverage purposes, it is estimated the market for 15,000,000 bushels would be lost to the farmer unless the grain-alcohol amendment shall be adopted and the Treasury ruling annulled.

The advocates of the amendment do not seek to take the market from any commodity which has previously enjoyed it. It seeks only to protect that market which grain has previously enjoyed.

Mr. CLARK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Missouri?

Mr. MURPHY. I yield.

Mr. CLARK. It is a fact, is it not, that so far as is known there has never been a single measure of domestic blackstrap molasses produced in the United States that was used for the manufacture of beverages?

Mr. MURPHY. I should say the Senator has made a correct statement.

Mr. CLARK. In other words, the great bulk of blackstrap molasses from which alcohol is manufactured in this country comes from Cuba?

Mr. MURPHY. Yes; from Cuba and the West Indies; brought here and distilled in American distilleries along the Atlantic seaboard and in the State of Louisiana. Those interests are reaching out today to take for themselves a market which the American farmers have enjoyed. Those interests have no concern in the matter from the standpoint of the sugar producer. The sugar producer will not be benefited by the defeat of this amendment. The sugar producer of America finds his market in sugar, in a product of sugar, molasses, which goes upon the table, and molasses which is mixed with dry feed and fed to our cattle.

The opposition to the amendment is wholly and solely the opposition of the big distilling interests on the eastern seaboard and in the State of Louisiana. I would not consciously seek to hurt, to the profit of my State, an agricultural interest in the State of Louisiana; but I am satisfied from all I have learned about the subject that there never has been any Louisiana product that went into the manufacture of whisky. We well know that the "immense sugar production" in the State of Pennsylvania has not gone into whisky. It is the blackstrap-molasses distillers who seek to capture the market which grain has enjoyed.

At this time, when we are concerned with the welfare of farmers, when we have enacted legislation originally seeking to curb production and, finding that unconstitutional, have adopted other means, the means expressed in the soil-erosion and domestic allotment act, at a time when we are trying to restore the purchasing power of the farmer, it is sought to take from him a market which he has continuously enjoyed, and it is proposed that this shall be done in violation of all the historical precedents relating to the manufacture of whisky.

This amendment would keep whisky what whisky always has been. The defeat of this amendment would convert whisky into another substance.

True, ethyl alcohol distilled from blackstrap molasses and ethyl alcohol distilled from grain admit no chemical differentiation today on the basis of the research so far conducted. There is a difference, as the Senator from Missouri [Mr. CLARK] reminds me, in flavor; and the trade which is engaged in these things knows well that there develops a difference in taste when the bottle containing whisky made of ethyl spirits distilled from blackstrap molasses is permitted to stand in the sun. We know that there is that chemical effect in the case of beer. Beer bottled in an uncolored bottle, and permitted to stand in the sun, will develop what is known among consumers as a "skunky" taste. We know, further, that live yeast germs present in beer will further germinate, and affect not merely the taste, but the alcoholic content of the beer.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. MURPHY. I yield to the Senator from Missouri.

Mr. CLARK. The Senator will recall from the testimony before the subcommittee which had in charge the pending measure that it is even proposed now, and predicted as a possibility or a probability if this amendment is defeated, that alcohol will be made out of petroleum and sold on the market as whisky.

Mr. MURPHY. Alcohol may be made out of petroleum today. Very large corporations control the process, and have it patented. Blackstrap molasses is not alone involved. Petroleum may be turned into alcohol. You may drink a form of coal oil with your whisky if you like it.

Mr. FLETCHER. Mr. President, will the Senator yield?

Mr. MURPHY. I yield to the Senator from Florida.

Mr. FLETCHER. May I inquire whether the Senator presented this amendment to the Finance Committee? Was it presented to the subcommittee?

Mr. MURPHY. It was presented to the Finance Committee.

Mr. FLETCHER. And the committee rejected the amendment?

Mr. MURPHY. The committee rejected the amendment, as I understand; but members of the committee have brought in what may be described as a minority report, signed by several Senators who attentively heard the case as presented by the proponents of the amendment.

Mr. President, of the approximately 43,000,000 bushels of grain which are now being used annually in the distilling of whisky, gin, and alcohol for beverage purposes, it is estimated that the market for 15,000,000 bushels will be lost to the farmer unless the grain-alcohol amendment is adopted and the Treasury ruling annulled.

Mr. OVERTON. Mr. President, will the Senator yield?

Mr. MURPHY. I yield.

Mr. OVERTON. Is that 15,000,000 bushels per annum or 15,000,000 bushels per decade?

Mr. MURPHY. Fifteen million bushels per annum.

Mr. OVERTON. I think the minority report states differently.

Mr. MURPHY. I am reading from the minority report on page 3.

Mr. OVERTON. If the Senator will read further, I think the minority report shows that during a period of 10 years 15,000,000 bushels of corn would be used.

Mr. MURPHY. The Senator, I think, is slightly confused. Reading further, I read what the Senator has reference to:

> During the 10 years prior to wartime prohibition—

It is more than halfway down on page 3—

> an average of, roughly, 75,000,000 proof gallons of grain alcohol were used for beverage purposes, mostly for blended whisky and gin, or the equivalent, conservatively, of 15,000,000 bushels of grain. At least the same amount of grain is now being used for grain alcohol and for young whisky in whisky blends and for gin.

Mr. OVERTON. Does not the report specifically state that during 10 years 15,000,000 bushels of grain were used for blended whisky and gin? That would be an average of 1,500,000 bushels of corn per annum. What is the production of corn in the United States, may I ask?

Mr. MURPHY. The production of corn in the United States last year was 2,200,000,000 bushels.

Mr. OVERTON. Then, out of 2,200,000,000 bushels per annum there would be used in the manufacture of alcohol about 1,500,000 bushels of grain.

Mr. MURPHY. No; reading again the report, Mr. President—

> Of the approximately 43,000,000 bushels of grain which are now being used annually in the distilling of whisky, gin, and alcohol—

Not 1,500,000 bushels; it is 43,000,000 bushels that are being used annually. The number of bushels that would be affected by the amendment is 15,000,000 bushels.

Mr. OVERTON. During 10 years.

Mr. MURPHY. It is true that that has the appearance of being an insignificant amount in relation to the total production. Most of the corn that is produced is fed. Only 6 to 7 percent of the entire corn production goes to market. The amount that goes to market is the amount that fixes the price of the corn that is fed on the farm; and the more grain that goes to market, the more the price of grain is depressed; so that the farmer's price for his corn is affected by the withdrawal of a market he now enjoys for that corn, to wit, the alcohol market.

It will be suggested here that we ought to permit the use of blackstrap molasses in the production of this alcohol.

> Molasses prices at the seaboard are about the equivalent of 35-cent corn in the Middle West. Corn and other grains cannot compete with molasses in the production of distilled spirits. At the present time molasses alcohol sells at 13 cents per proof gallon less than grain alcohol used in blended whisky.

There cannot be any room for doubt that grain has always enjoyed the market. There cannot be any room for doubt that if the blackstrap interests are given access to the market grain has enjoyed, since they are able to produce that alcohol much cheaper than grain producers can afford to sell their product for, the farmer will suffer in consequence of the defeat of this amendment.

Mr. BORAH. Mr. President, will the Senator yield?

Mr. MURPHY. I yield to the Senator from Idaho.

Mr. BORAH. I think I am in sympathy with what the Senator has as his objective; but the Senator's amendment reads:

> No product shall be labeled or advertised or designated as neutral spirits, whisky, or gin, or any type thereof, for nonindustrial use, if distilled from materials other than grain—

And so forth. Suppose alcohol is made out of blackstrap molasses. Suppose it is a product which otherwise would be sold properly under the law; may we say that such product shall not have a market?

Mr. BAILEY. Mr. President, may I interrupt the Senator?

Mr. BORAH. I am seeking information now. Suppose, instead of adopting this amendment, we should simply insert an amendment to the effect that the manufacture of alcohol from blackstrap molasses should not be permitted; could we constitutionally enact such a law as that?

Mr. BAILEY. I think so, and I think that is in accord with the construction of the Pure Food and Drugs Act.

Mr. BORAH. But whisky is whisky. It does not make any difference how it is made, it is whisky.

Mr. BAILEY. But President Taft held that whisky is a spirit distilled from grain. Spirits distilled from molasses, according to his decision, are not whisky. Whisky has its peculiar character; and, fortunately for this discussion, that was established in the decision rendered by President Taft. That does not cut off the market for distilled spirits made from molasses, but it simply says that that type of spirits may not be sold as whisky. Ordinarily that type of spirits is called rum.

Mr. BORAH. In other words, this amendment is based upon the theory that such a product would not be whisky and therefore it should not be labeled whisky? I am pleased to have this view of the Senator, as it was not clear to me just how we could accomplish what we are seeking to accomplish.

Mr. BAILEY. It is not whisky according to the decision of President Taft, and it is not whisky according to the construction of the Pure Food and Drugs Act by the Department of Agriculture.

Mr. GUFFEY. Mr. President——

Mr. MURPHY. I yield to the Senator from Pennsylvania.

Mr. GUFFEY. The Senator from North Carolina a moment ago referred to alcohol and whisky. I am not so sure he knows that the finest grade of alcohol today, C. P., is made from natural gas. There have been a great many advances in the science of distilling in the past few years.

Mr. BAILEY. At the same time, according to the policy of the Government, I think alcoholic spirits made from petroleum could not be classified as whisky. Further, according to the historic conception, or, if Senators desire, the dictionary definition of whisky, I think, spirits made from molasses or petroleum could not be classified as whisky.

Mr. CONNALLY. Mr. President, will the Senator yield to me?

Mr. MURPHY. I yield.

Mr. CONNALLY. The Senator from North Carolina suggested that if it were made from anything but grain it could not be whisky. What about neutral spirits? The product called "neutral spirits", as I understand, is pure alcohol. That is not whisky. Why could not neutral spirits be made from petroleum or any other product containing the chemical elements which will make neutral spirits?

Mr. BAILEY. I think that may be possible, but it does not entitle it to be named "whisky."

Mr. CONNALLY. But the amendment covers something more than whisky.

Mr. GEORGE. Mr. President, the amendment outlaws alcohol, even gin, and I had very much hoped that the Senator from Iowa would exempt gin, so that we may go on having a supply of gin made by the present processes. Let me ask the Senator from Iowa whether he will not exempt gin from his definition.

Mr. MURPHY. Not at this time, I will say to the Senator from Georgia.

Mr. GEORGE. The Senator ought to be that considerate.

Mr. MURPHY. Mr. President, further referring to the question raised by the Senator from Idaho, it is stated that whisky is historically a grain product; therefore a similar product, no matter from what other material it is made, cannot be designated as whisky.

In support of that the Senator from North Carolina has stated that President Taft so declared. A controversy raged for some years between the distillers of straight whisky put up in charred barrels for aging and for presumed purification after distillation, and that which was the product of continuous distillation. That discussion, after raging for a long time, and after it had been before two Attorneys General, finally reached the White House, and President Taft in his decision made this statement:

> After an examination of all the evidence it seems to me overwhelmingly established that for a hundred years the term "whisky" in the trade and among the customers has included all potable liquors distilled from grain.

President Taft said further in that decision:

> Neutral spirits made from molasses and reduced to a potable strength has sometimes been called "whisky", but not for a sufficient length of time or under circumstances justifying the conclusion that it is a proper trade name. The distillate from molasses used for drinking has commonly been known as "rum." The use of "whisky" for it—

That is the use of "whisky" for the distillate from molasses—

> The use of "whisky" for it is a misbranding.

This decision of President Taft was not a hasty decision. It was not arrived at as harassed Senators are all too frequently compelled to arrive at decisions—hastily, and without complete information. There was before him a record of 1,200 printed pages. Because of the importance of the case, he said:

> I have thought it necessary to read with care the entire evidence adduced.

And he began the statement of his conclusions with this sentence:

> Whisky for more than a hundred years has been the most general and comprehensive term applied to liquor distilled from grain.

There is a market which grain has historically enjoyed. Go out and ask the first 10 men you meet on the street what whisky is made from, and what will the answer be? The answer will be that it is made from grain. It is rye whisky; it is Scotch whisky; it is Bourbon.

Mr. GUFFEY. Mr. President, will the Senator yield?

Mr. MURPHY. I yield.

Mr. GUFFEY. What is Irish whisky made from?

Mr. MURPHY. We do not make Irish whisky in this country.

Mr. GUFFEY. Does the Senator know what it is made from?

Mr. MURPHY. Yes; I have the data here.

Mr. GUFFEY. I will tell the Senator.

Mr. MURPHY. It is made from mash over there.

Mr. GUFFEY. It is made from potatoes.

Mr. MURPHY. Oh, no. It is poteen the Senator has in mind. Irish whisky is not made from potatoes; it is made from grain.

Mr. President, this market which grain has enjoyed continuously for a hundred years, this understanding which every consumer of whisky and all the trade has had, that whisky is the product of grain, is to be cast aside, in the face of the testimony of President Taft, a conclusion reached after an examination, as he said, of a record of 1,200 pages. We are asked to cast it aside in order to enrich further the blackstrap-distilling interests of this country. We are asked to give them that market now for beverage alcohol, with which grain cannot compete in any measurable quantity. They have the market for industrial alcohol now. But they are not content with that. They want to reach out further and produce more chaos on the farms of the United States.

If our concern is for the few industrial-alcohol refiners, the alcohol refiners in Louisiana and along the Atlantic seaboard, let us defeat the amendment which I have presented. If our concern is for the producers of the United States generally, let us adopt it.

Mr. WHEELER. Mr. President, will the Senator yield?

Mr. MURPHY. I yield.

Mr. WHEELER. One of the arguments that was very persuasive with a great many people in this country when they were asked to repeal the prohibition amendment was that it would result in a great deal of benefit to the wheat farmers and rye farmers and other farmers, because their grain would then be used for making alcohol.

Mr. MURPHY. The Senator is quite right.

Mr. BARKLEY. What brand of whisky is made out of wheat?

Mr. WHEELER. I am not so familiar with the making of whisky, apparently, as is my friend the Senator from Kentucky.

Mr. BARKLEY. My question did not indicate that I knew anything about it. I am seeking information from an expert. [Laughter.]

Mr. WHEELER. I had always supposed that wheat was used. Perhaps I am wrong about that.

Mr. MURPHY. I will say to the Senator that he is perfectly correct; we did make to the farmers the representation to which he has referred. I am the first Democrat to receive an election certificate from Iowa as United States Senator since 1848, and I am here because Iowa is concerned with a market for its products, a market shut off by the consideration shown the very industrial interests which today are opposing the pending amendment.

When I went out among the people of Iowa in my campaign I did not argue the question of prohibition on the basis of personal liberty; I did not argue it on any of its abstract lines. I said to the people of Iowa that with the prohibition amendment repealed we would have a market for our grain which we then lacked. I pointed out wherein repeal was to their economic interest, at a time when corn was selling for 7 cents and 10 cents a bushel, when it was cheaper to burn it in boilers as fuel than to feed it to stock or to send it to market. I pointed out that this enlarged market would create more demand for their corn, and that they would be economically the beneficiaries from it.

I am here today seeking to make good the pledge I made to the people of my State, seeking to enlarge their market, and I am opposed in my effort by those who seek to enlarge the market for Cuban blackstrap molasses, by those who want to enrich further the producers of Cuban blackstrap molasses and the distillers in this country.

Mr. OVERTON. Mr. President, will the Senator yield?

Mr. MURPHY. I yield.

Mr. OVERTON. If the purpose of the amendment is not to further the interest of grain distilleries, but is in the interest of domestic agriculture and domestic products, why would not the Senator from Iowa propose that no product should be labeled or advertised or designated as neutral spirits, whisky, or gin if distilled from materials other than those domestically produced?

Mr. MURPHY. The answer is that, so far as I have been able to learn, there has been no product of Louisiana distilleries that is competing with grain.

We buy the product of Louisiana in the form of molasses and mix it with dried food and feed it to our cattle. It commands a higher price than it would command if used in liquor. The objection to the suggestion offered by the Senator is that it would be impossible for grain alcohol to compete with domestic alcohol from blackstrap.

My objection is that even if Louisiana did go into blackstrap-alcohol production it would put corn in as a competitor

on the basis of 35 cents a bushel, and that would mean starvation for us.

I am not surprised to find the senior Senator from Louisiana seeking to serve the interest of his State as he sees it. I think there is a confusion in his mind. I do not believe the sugar producers of Louisiana are concerned with this amendment. I believe the only ones interested are the distillers down there, who can supplement present operations with operations on Cuban blackstrap.

It is characteristic of the Senator, who throughout his term in the Senate has on every occasion sought to serve the people of his State, now to seek to serve them according to the light given him. It has been a pleasure to sit here beside him through these years since we both came to the Senate, and in that time I have acquired a great deal of affection for the Senator from Louisiana. Not merely that, but I have acquired great respect for his mental qualities. I sincerely believe that I am not adversely affecting the interest of the people of his State by the amendment which I propose.

Mr. President, the amendment has the support of the Agricultural Administration. It has that support because of its relation to the welfare of the farmer. It has the support of the Food and Drug Administration as preserving the integrity of the Pure Food and Drugs Act. It has the endorsement of the National Grange. It has the endorsement of the American Farm Bureau. It has the endorsement of all those who believe in the integrity of our food standards. It has the opposition alone of those whose attitude will serve the distilling interests which desire to bring to this country in greater quantities blackstrap from the West Indies to drive out the product of the American farmer.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its reading clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 4317. An act to authorize the Secretary of War to grant to the city of Buffalo, N. Y., the right and privilege to occupy and use for sewage-disposal facilities part of the lands forming the pier and dikes of the Black Rock Harbor improvement at Buffalo, N. Y.; and

S. 4594. An act to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. and others.

The message also announced that the House insisted upon its amendments to the bill (S. 267) for the relief of certain officers and employees of the Foreign Service of the United States who, while in the course of their respective duties, suffered losses of personal property by reason of catastrophes of nature, disagreed to by the Senate, agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. McREYNOLDS, Mr. BLOOM, and Mr. FISH were appointed managers on the part of the House at the conference.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 3483. An act to provide for rural electrification, and for other purposes;

H. R. 2982. An act for the relief of Sarah Shelton;

H. R. 7110. An act to authorize the President to bestow the Navy Cross upon Brig. Gen. Robert H. Dunlap, United States Marine Corps, deceased;

H. R. 8262. An act for the relief of Tom Rogers and the heirs of W. A. Bell, Israel Walker, Henry Shaw, Thomas Bailey, and Joseph Watson;

H. R. 8287. An act to establish an assessed valuation real-property tax in the Virgin Islands of the United States;

H. R. 8372. An act to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station and to authorize the construction and installation of a naval air station thereon;

H. R. 8431. An act to provide for the establishment of the Fort Frederica National Monument at St. Simon Island, Ga., and for other purposes;

H. R. 8784. An act to authorize withholding compensation due Government personnel;

H. R. 9995. An act to grant a renewal of patent no. 59560, relating to the emblem of the Disabled American Veterans of the World War;

H. R. 10194. An act granting a renewal of patent no. 40029, relating to the badge of the Holy Name Society;

H. R. 10267. An act to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service to correspond to the rates established by the Classification Act of 1923, as amended; and

H. R. 10934. An act to authorize the transfer of the customhouse at Salem, Mass., from the jurisdiction of the Treasury Department to the Department of the Interior.

PROPOSED ADDITIONAL TAXATION

Mr. DICKINSON. Mr. President, the present discussion reminds me of the discussions of the blackstrap question which took place in the other House many years ago.

The pending amendment is an effort to secure a greater use for the corn products of the corn States of this country. I remember very well that when we were discussing what we called the blackstrap amendment to the tariff bill, we won it by a few votes in the Committee of the Whole. Then, when the bill was considered by the House we lost the blackstrap amendment by a few votes. The pending amendment is another effort to provide a wider use for the products of the fertile lands of the Middle West. Therefore I believe we ought to give the amendment very serious consideration, and we should give the corn of Iowa a preference in the market over the blackstrap of the West Indies.

Mr. BORAH. Mr. President——

The PRESIDING OFFICER (Mr. HATCH in the chair). Does the Senator from Iowa yield to the Senator from Idaho?

Mr. DICKINSON. I yield.

Mr. BORAH. Will the pending provision affect the potato growers of the West?

Mr. DICKINSON. I do not believe much alcohol or whisky is made from potatoes. Starch is made from potatoes. So I think the amendment would not affect the potato growers of the West. I may be mistaken.

It is not my purpose to take much time, however, in discussing the pending amendment. I desire to make a few observations with reference to the general tax bill which is now pending before the Finance Committee.

Mr. President, the House has already passed and there is now pending in the Finance Committee the so-called revenue bill of 1936. I presume that before long, in a somewhat revised form, it will be favorably reported to us. Nevertheless, I have no hesitation in placing myself on record now, prior to our formal consideration of the measure. I shall vote against the bill. I am proud to speak in opposition to it. I am speaking of the tax bill which is now before the Finance Committee, and not the amendment which we are now considering here for the protection of corn. What I shall say will only scratch the surface of the reasons why the tax bill should not be passed.

Three objections to the measure stand out:

First, its provisions, as drafted, are crude and discriminatory.

Second, the philosophy behind it is vicious.

Third, and most important, it is high time to stop the oppression of those for whom this Government exists—the public.

I

I have said that the provisions of the bill, as now drawn, make it a crude and discriminatory measure. Even if we

were to admit that additional revenue must be raised, and that the philosophy of the proposal is sound, we must also admit that we have before us a mass of language hastily thrown together, most of which is incomprehensible not only to the ordinary man but even to those who have spent their working lives in the study of the technicalities of tax law.

I do not profess to understand the deep technicalities of tax law. If I did, I could probably cite thousands of examples of discrimination, unfairness, and inequity. For those examples I beg leave to refer the Senate to the testimony of the more than 150 witnesses who have appeared before the Finance Committee and before the Committee on Ways and Means. The record of that testimony covers nearly 2,000 printed pages, and is replete with instance after instance of unfair, inequitable, and discriminatory results.

Let me confine myself to just one category of those instances as a sample.

I have never yet seen a Member of this body who did not look with horror upon favoritism to the strong and well-established at the expense of the weak and struggling. This bill is a perfect illustration of just such favoritism.

Mr. DAVIS. Mr. President, will the Senator yield?

Mr. DICKINSON. I yield.

Mr. DAVIS. The bill that came from the House to the Senate has been labeled "the Blue Bill of Woe", and it was said that there was a woe in every line.

Mr. DICKINSON. I think that is a good designation.

Take, for example, the case of an old-established corporation, with ample capital, and with ample reserves laid away for future contingencies: That corporation can distribute all of its earnings and not suffer in the slightest. By the provisions of the bill it will suffer no penalty. Competing with the older and larger corporation is a newer and smaller company. It went into the business with the expectation of building up a reserve for contingencies out of its earnings—the wisest kind of business policy. It cannot compete successfully, it cannot continue in business, it cannot exist unless it follows that policy. If it does follow it, the proposed tax bill imposes heavy penalties upon it, and thus destroys its power to compete. If that is fair, if that is equity, if that is anything but the rankest discrimination, then for a long time we have all had strange ideas of fair play.

Mr. CONNALLY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Texas?

Mr. DICKINSON. I yield.

Mr. CONNALLY. Is the Senator discussing the House bill as it came to the Senate?

Mr. DICKINSON. Yes.

Mr. CONNALLY. Has the Senator read the hearings before the Senate Finance Committee?

Mr. DICKINSON. Part of them. I have not read them all. I have not read them clear down to date.

Mr. CONNALLY. Does the Senator know in what form the Senate committee expects finally to report the bill?

Mr. DICKINSON. I do not. I hope I shall make suggestions here now which will be helpful in the formulation of the bill.

Mr. CONNALLY. The Finance Committee had hearings on the bill, and we should have been glad to have had the Senator from Iowa appear before the committee if he had helpful suggestions to offer. I do not remember seeing him there. I was wondering how the Senator can really discuss the bill when he does not know what it is going to be.

Mr. DICKINSON. I am discussing the general philosophy of the bill as it appeared in the hearings, and so forth, as reported in the press. That is all I know about it. I hope the Senator from Texas will have the bill in good shape before it is brought to the floor of the Senate.

Mr. CONNALLY. I am a member of the Finance Committee, and I should have been very glad indeed to have had the Senator appear before the committee, because we had before us a great many persons who knew all about the measure.

Mr. DICKINSON. I do not believe there is anyone except Mr. Oliphant, of the Treasury Department, who knows all about the measure, and I do not happen to agree with Mr. Oliphant.

Mr. President, the effect of the bill, if it shall be enacted, will be to permit strong corporations to gobble up the weak business units. Assume, for example, that a corporation today happens to have a large cash reserve, that in the next few years it maintains this strong cash position, although not adding to it because of the proposed tax law, and that it is the only organization in its industry, which does hold such a reserve at the beginning of a depression in business: Under such conditions, this one corporation would be in a position to buy its competitors at bankruptcy prices. In short order, therefore, it could attain a monopolistic position, and thereafter charge such prices as it liked, and limit its production as it saw fit.

The development of such monopolies would be possible in almost every industry, for in almost every industry there is at least one company that would be in a position to take advantage of those of its competitors forced on the auction block by the working of this proposed tax bill.

It does not seem to me, however, that the American public, when the time comes, will permit the development of such monopolies. They will demand some other means for meeting what would be termed, as it has been termed recently, "the break-down of the American business system." This first possibility of meeting problems which will be created by this tax bill, therefore, it seems to me, is nothing more than a possibility. It could never be realized in fact. We must turn then to the second possibility if we are to anticipate what actually would happen.

The second method would be to have the Government guarantee economic activity. By this I mean that the Government would have to take control of our economic system to the extent necessary to assure the continuation of production and the continuation of employment. It might do this by nationalizing business, as in Russia, or it might do it by directing business in all its details, as in Italy or Germany. But bear in mind that it is only by one or the other of these systems, private or State monopolies, that a Government can guarantee employment and can guarantee production.

That is the general basis upon which I make the charge that this bill will destroy the present business structure. At the moment I am not interested in whether this or that person in the Treasury would welcome such destruction. Neither am I interested in whether they realize that their proposal will have such effect. The point that interests me, and for the moment the only point that interests me, is to make it clear that the enactment of this tax measure must be considered as evidence that we are willing to destroy the American business system.

II

Suppose we close our eyes to the multitude of technical defects of the measure, still assuming that additional revenue must be raised, and consider for a moment the vicious philosophy behind it.

What is the philosophy behind this bill? There is no mystery about that. It is not a bill for revenue only. It is not a measure designed to clarify and simplify our revenue statutes. I maintain that its purpose is clear, and that it is nothing more than a device to further regiment, further control, further harass American business—driving us constantly nearer a completely dictatorial regime of state socialism.

The American business structure as a unit not only is worthy of defense but it is something of which we have reason to be proud. It has made possible the payment of the highest real wages in the history of mankind. It has given us a wider range of products that add to our comfort than has ever before been known. It has led the world in the development and perfection of processes that enable us to convert luxuries into necessities.

Of course, there have been crooks and thieves in our business structure, some of whom have attained positions of great importance; but the presence of such crooks and thieves has not been a distinguishing characteristic of American business any more than it has been a distinguishing characteristic of any other broad division of the American economic and social system. And in defending the American business structure I am not defending the existence of such crooks and thieves. I am defending the right of American business to continue to produce goods for the American public; to continue to give employment to American labor; to continue to develop those processes which will make the luxuries of today the necessities of the American laboring man a few years hence.

This tax measure, if it becomes a law and remains on our statute books in its present form, will do more than merely prevent further growth of American business. It—and I say this with the utmost seriousness—will destroy the American system of enterprise. For this bill is not designed to reform our tax structure, to raise revenue, or to protect the American workingman. It is designed to bring about a collapse of private ownership of business in the United States.

This bill will not stand up under analysis of any of the reasons advanced as arguments by its sponsors. May I ask for what hidden, sinister purpose was this bill designed? Why are we asked to pass a bill carrying with it the dynamite of destruction of our corporate structures?

We have been repeatedly told by the professors that spending is good, while saving is bad; that the only thing to do with money is to get rid of it fast; that reserves for a rainy day are an evil; that we do not know what to do with our savings when we have succeeded in accumulating a few. We have listened to the professors—far too indulgently—but we have not believed them, and we never will believe them when they tell us that.

Mr. CONNALLY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Texas?

Mr. DICKINSON. I yield.

Mr. CONNALLY. Is the Senator referring to the "brain trust" the Republican National Committee has recently employed?

Mr. DICKINSON. No; I am referring to the "brain trust" the Senator from Texas defended when Dr. Wiley made revelations concerning it. The Senator tried to laugh him out of court, although, as a matter of fact, Dr. Wiley was telling the truth, as is now being proved. I should like to have the Senator from Texas read the article written by Mr. George N. Peek, which I have put in the RECORD today and which was published in last week's Saturday Evening Post. It shows the socialistic tendency about which I have been talking here for a year or so.

We have not believed the professors, and they know it. Perhaps they are now going to give up lecturing us. If that were to be the end of them, we should be well off. But it is not the end. We will not adopt the rules they have preached to us; so they are going to write them into the law and force us to live by them. We have refused to believe that thrift is wrong, so they are proceeding to legislate against thrift. We have refused to believe that heedless, profligate spending is praiseworthy, so they are writing into the law of the land a rule which will ruin those American businesses which refuse to adopt such a course.

The American people will not accept these professorial rules. They know those rules are wrong, and will not submit to their yoke. American business can conduct itself honestly, intelligently, and successfully without them. It resents, and rightly so, the intrusion of government into every detail of its affairs.

Whether or not the tax bill, if enacted, will bring in its wake monopolies for the strong, and bankruptcies and receiverships for the less strong—as I predict it will—it is most certainly another step toward dictatorship. Such a regime this Nation will never accept.

III

Mr. President, I turn now to my third and most practical, if not most important point. It is simply that this is no time for Congress to enact another gouging tax measure. I should like to discuss that question at somewhat greater length.

The American taxpayer must and does look upon government as one of the necessities of life. He knows full well that government is a necessity, just as food, clothing, shelter, and other goods and services are necessities. Likewise, he knows that the functions of government cost money, just as does his daily bread, his suit of clothes, the roof over his head, his furniture, his car, his radio, his doctor, and his church. He knows that he must pay the cost of all of these. But, I need not point out to you, Mr. President, that it is characteristic of the American citizen to insist upon full value for all the money he spends for his necessities.

If the corner-grocery man asks a dollar for a loaf of bread, none of us need inquire whether the loaf is worth a dollar. We know it cannot be. And we would all refuse to pay such an astounding and incredible price. Shall we not take the same attitude toward the outlay of a similarly astounding and incredible price for Government? Once we comprehend what that price is, and appreciate that it is astounding and incredible, shall we not insist that no government is worth it? If by any chance we are willing to say that some government might be, shall we not still searchingly inquire whether the particular government we are asked to pay for can conceivably be worth it? Or shall we meekly, silently, spinelessly hand over the price when it is glibly asked of us?

I, for one, propose to insist, vigorously and even impatiently that neither the particular government we are now being asked to pay for, nor any other, is worth the price that is asked.

Unfortunately for us all, statistics in the realm of Government finance have become as incomprehensible and unreal as those in the realm of astronomy. None of us actually knows what a "million" is, much less a "billion." It is hard for us to understand what a monstrous thing a debt of $35,000,000,000 is. We cannot readily grasp the significance of a deficit of $6,000,000,000 for the present year. However, I contend that it is the duty of every thinking citizen to study those figures, to appreciate their import, to understand what really is the price of the government we are getting.

When I speak here of the price of government I am including only the money cost. The cost in freedom, morale, and happiness is incalculable. But let me be purely practical and hard-headed and take a look at the money cost of the service for which we are asked to pay.

For the "advantage" of a Federal Government during the fiscal year 1936 we are asked to pay $10,000,000,000, that is, about $400 for every single family in the country. How many families in this country can spend $400 per year for food? How many can spend that much for their housing? How many can spend that much for clothes? How many can spend that much for furniture, an automobile, their schooling, or their church? These questions answer themselves, and I say that the question whether any of them can spend that much for their National Government answers itself just as readily. No national government which any party can provide is worth $400 to any family in this country, much less all of them.

No one can deny that the cost of the best national government will be substantial. But think of it—$10,000,000,000, or $400 per family for this year. Can government possibly be worth it?

Let us look into the figures a little deeper. During the fiscal year 1934, the first full year of the present administration, it cost $7,105,000,000 to run the National Government. The preceding fiscal year (1933), that cost was $5,307,000,000. In 1 year, the total increased 33⅓ percent. Contrast this with the promise we heard so much of back

in 1932, that the cost of government would be reduced by 25 percent.

The fiscal year 1935 saw no reversal of the trend. In that year the National Government cost us $7,375,000,000.

The Secretary of the Treasury now tells us that during the fiscal year 1936 the administration will spend nearly $10,000,000,000.

Finally, we already have the President's word that in the fiscal year 1937 the cost of the National Government will be not less than $8,250,000,000.

To venture again into the astronomical, the 4 Roosevelt years are to cost us the staggering total of $32,574,000,000—$1,200 for every family in the United States.

Suppose we disregard relief expenditures for the moment. We have gotten ourselves into the vicious habit of dividing our Budget into two parts—one of which might be balanced some day and the other of which we are letting grow so top-heavy it will soon crush us. But suppose we take a look at the President's "ordinary expenditure" budget.

In the fiscal year 1934 the administration's so-called "ordinary expenditures" were $3,444,000,000. They had not even shifted into second gear then. The following year they stepped on the gas a bit and spent $4,306,000,000, on the "ordinary side." That was a lot of fun; so this year they are managing to run it up to $4,776,000,000. Now, with 1937 just ahead, they have begun to forget their campaign promises and loosen up a little—not much; just 20 percent or so—and will spend $5,649,000,000 on "ordinary" activities.

What is the total? For "ordinary" activities for 4 Roosevelt fiscal years, $18,175,000,000—a good $700 per family. I ask again, Is it worth it?

Far more significant than the total is the trend. "Ordinary" expenditures rose 25 percent in 1935 over 1934. In 1936 they are 11 percent higher than in 1935 and 40 percent higher than in 1934. In 1937, we are told, they will be 20 percent higher than in 1936, 30 percent higher than in 1935, and 65 percent higher than in 1934. May I ask another question that answers itself? Can we stand that trend any longer?

Finally, we have the so-called "relief and recovery" expenditures, on the "nonbalancing" side of the Budget. They will aggregate over $12,000,000,000 for the 4 Roosevelt fiscal years, 1934 to 1937, inclusive—$500 per family in the United States. The $3,000,000,000-a-year average for expenditures in this category is not showing a real declining trend—and this despite the absorption of millions into private employment because of the natural improvement in business and the improved circumstances of millions of others because of that same improvement.

So much for expenditures. They would be very fine if the bills never came in. But the bills do come in, and someone must pay them. In most cases we do that ourselves, or frankly cast the expense upon those who will come along later. Usually we either tax or borrow. But what does this administration do? It taxes, heedlessly and to the limit, and then proceeds to borrow, also heedlessly and to the limit.

In 1934 the American people were rendered the first bill for this orgy of governmental extravagance. In that year the President smilingly asked the Congress to impose new and unprecedented taxes upon the American people, and Congress obediently applied the lash. Revenues rose, but the spenders increased their pace, too; and in 1935, as if amused at the race, and perhaps only to give more encouragement to the spenders, the President submitted another bill to the people, and at his bidding Congress imposed still more burdensome and unconscionable taxes upon American enterprise and property. And now, for the third time in 3 years, we have before us a Presidential demand for more money.

In the fiscal year 1934, a total of $3,116,000,000 was extracted from the pockets of American citizens by the tax collector. In 1935 under the rising rates imposed by the Revenue Act of 1934, that worthy was 20 percent more efficient, and managed to abstract $3,800,000,000. The drastic provisions of the Revenue Act of 1935 helped him still more, and in the fiscal year 1936 it is said that he will collect $4,411,000,000, or a 15-percent better job than in the previous year. Now it is proposed that he be given a new instrument of torture and oppression, the Revenue Act of 1936, to aid him in raising in 1937 $5,800,000,000, a 30-percent increase over 1936, a 50-percent increase over 1935, and practically a 90-percent increase over 1934.

I repeat that neither the Government we are being asked to pay for, nor any other, is worth the price that is asked. We must flatly refuse to commit ourselves to pay that price. We do not want what we will get for our money, so we must not order it. It is that refusal which I shall express when I vote against the tax bill.

I have been speaking so far of the cost to the present generation. Were that all, we might grin and bear it. But when we see the bill to be rendered to future generations piling up to an enormous total at an amazing rate, it is time to call a halt. As I have said, the 4 Roosevelt fiscal years are to cost us thirty-two and one-half billions of dollars. If all predicted revenue is collected, the total will hardly exceed sixteen and one-half billions. We are therefore adding to our public debt during these 4 fatal years at least $16,000,000,000—for someone to collect some day from our children and grandchildren. Are we to let this process go on? Here again, we must end our encouragement to the spenders. Killing this bill may not stop the borrowing, but if we begin to say "no", vigorously and unequivocally, perhaps it will dawn on some of those in power that the American people mean it.

Actually, I believe, no further taxation at this time is necessary. If we would stop the waste and extravagance which today is such a dominant characteristic of the present administration, we would take care of our unemployed and meet the legitimate expenses of our Government out of the receipts of the present taxes. To impose taxes without making these needed obvious economies means that we admit the necessity of perpetuating the present system of waste and extravagance and graft and financial irresponsibility.

Insofar as I am concerned, I do not think it is desirable to perpetuate such a system, and I refuse to vote for any measure which will have that effect, although I will actively sponsor any measure which either will make needed reforms in our tax system or will result in a more equitable distribution of the legitimate costs of our Government among American taxpayers.

But my own views as to whether we need additional revenue are of no particular importance. We are told that we must raise more money. If we assume that the money must be raised, what are the possibilities? One could list many. We might impose a tax of $50 on every automobile sold. We might impose a processing tax of 1 percent or 5 percent or 15 percent, depending upon the amount of money which it is decided must be raised. Or, we might stop this much-too-prevalent nonsense of preaching against the money changers and the speculators and the gamblers, while at the same time protecting them, and impose a tax upon their parasitic profits. But were we to do that we would be attacking the class dear to the heart of the one who says that the current tax proposal is a "must" legislation. But that, Mr. President, is another chapter.

There is just one further remark that I should like to make. Should this tax bill be enacted, and remain on the books until the next business recession starts, it will be of no aid at that time to repeal the act, for the damage then will have been done. It will have been done by having made it impossible for our business organizations to have accumulated the needed reserves during the period when they had a net income.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its reading clerks, returned to the Senate, in compliance with its request, the bill (H. R. 8940) to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto.

REORGANIZATION OF CORPORATIONS UNDER BANKRUPTCY LAW—RECONSIDERATION

Mr. ASHURST. Mr. President, yesterday I gave notice that when the House returned the bill to the Senate I would move to reconsider the vote by which the Senate passed House bill 8940, to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto. I am advised that the bill has been returned to the Senate. Is that true?

The PRESIDING OFFICER. The Senator's information is correct.

Mr. ASHURST. I now move that the vote by which the bill H. R. 8940 was ordered to a third reading, read the third time, and passed be reconsidered.

The PRESIDING OFFICER. The question is on the motion of the Senator from Arizona.

The motion was agreed to.

Mr. ASHURST. I now ask that the bill be recommitted to the Committee on the Judiciary.

The PRESIDING OFFICER. Without objection, the bill will be recommitted to the Committee on the Judiciary.

Mr. ASHURST. Mr. President, there has been some disagreement among Senators and on the part of the public as to the exact meaning of some of the amendments added by the Senate to the House bill. The able Senator from Indiana [Mr. VAN NUYS] was chairman of the subcommittee which considered the bill; I am authorized to say that he joins with me in making the motion which I have made and he approves my action; and that, as chairman of the subcommittee of the Senate Committee on the Judiciary, he desires me to give notice that the subcommittee will hold a hearing on this bill at the rooms of the Senate Committee on the Judiciary on Thursday morning next at 10:30 o'clock, at which hearing all persons who have any interest in the bill will have an opportunity to be heard.

COLLECTION OF REVENUE FROM INTOXICATING LIQUORS

The Senate resumed consideration of the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes.

Mr. OVERTON obtained the floor.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. BARKLEY. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. RUSSELL in the chair). The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Copeland	La Follette	Reynolds
Ashurst	Couzens	Lewis	Robinson
Austin	Davis	Logan	Russell
Bachman	Dickinson	Lonergan	Schwellenbach
Bailey	Dieterich	Long	Sheppard
Barkley	Donahey	McAdoo	Shipstead
Benson	Fletcher	McGill	Smith
Bilbo	Frazier	McKellar	Steiwer
Black	George	McNary	Thomas, Okla.
Bone	Gerry	Maloney	Townsend
Borah	Gibson	Metcalf	Truman
Brown	Glass	Moore	Tydings
Bulkley	Guffey	Murphy	Vandenberg
Bulow	Hale	Murray	Van Nuys
Burke	Harrison	Neely	Wagner
Byrd	Hastings	Norris	Walsh
Capper	Hatch	O'Mahoney	Wheeler
Caraway	Hayden	Overton	White
Chavez	Johnson	Pittman	
Clark	Keyes	Pope	
Connally	King	Radcliffe	

The PRESIDING OFFICER. Eighty-one Senators having answered to their names, a quorum is present.

Mr. OVERTON. Mr. President, the amendment offered by the Senator from Iowa [Mr. MURPHY] to the pending bill was presented before the Finance Committee of the Senate and, after thorough consideration, was rejected.

In the very able presentation which the Senator from Iowa made of his amendment, he declared that it was being proposed in the interest of agriculture, with particular reference to those engaged in the production of corn. The record shows that two and a half billion bushels of corn are produced annually in the United States. The record does not show how much of this corn enters into the production of alcohol; but there has been submitted a minority report which was placed on our desks this morning, and that report declares that—

> During the 10 years prior to wartime prohibition an average of, roughly, 75,000,000 proof gallons of grain alcohol were used for beverage purposes, mostly for blended whisky and gin, or the equivalent, conservatively, of 15,000,000 bushels of grain.

Therefore, during the 10 years prior to wartime prohibition, when presumably more liquor was being consumed and used in this country than during any other period, 15,000,000 bushels of grain were used in the production of alcohol and whisky. This is equivalent to an average of 1,500,000 bushels of grain per annum out of a total production of corn alone of two and a half billion bushels per annum.

Therefore, Mr. President, when I consider the monopolistic effect of the amendment, while it may not at all be the purpose of the Senator from Iowa to offer the amendment not in the interest of agriculture but in the interest of the grain distilleries of the country, I think I am justified in making the observation that that is its effect, because if it were being offered in the interest of domestic products, agricultural and others, why should it undertake to select grain alone as constituting a proper commodity out of which to manufacture alcohol, and exclude cane products, exclude fruit juices, exclude apples, exclude petroleum products, and exclude every other commodity produced in this country out of which alcohol may be successfully made?

The Senator from Iowa states that historically alcohol is produced from grain. Well, historically, intoxicating beverages were produced from wine. If my Biblical recollection serves me right, I think it was upon the juice of the grape that Noah got drunk.

Historically, mankind used to live in caves and in trees; but no one would suggest today that either the Senator from Iowa or myself should legislatively be driven out of our apartments in the Wardman Park Hotel to inhabit either caves or trees. [Laughter.]

Historically, in the temperate and colder climates, man clothed himself in skins, and in the tropical climates, did not clothe himself at all. If we pursue the argument of the Senator from Iowa to its logical conclusion, we should be legislatively driven to use skins as our garments, or else be driven into nudist colonies. [Laughter.]

The Senator from Iowa states that his amendment is perfectly defensible because there is a difference in flavor between whisky made from alcohol that has been manufactured from molasses, for instance, or some other products, and that made from corn. Well, there is a difference in flavor between all kinds of intoxicating liquors. There is a difference in the flavor of bourbon and rye and of Scotch and of different kinds of wines. There is a difference in taste; and permit me to remind the Senator from Iowa of that splendid old Latin adage:

> De gustibus non est disputandum.

The amendment cannot be defended upon the ground that there is a difference in flavor. Some people may prefer the flavor of corn alcohol or corn whisky, and some may prefer the flavor of some other kind of whisky. Some may prefer to get drunk from corn liquor, and some may prefer to get drunk from some other kind of liquor. The amendment can be defended solely upon the ground that alcohol and neutral spirits and gin manufactured from other commodities are more deleterious to health than are similar products manufactured from grain.

That, I thought, was the original contention that was going to be used in the presentation of the Murphy amendment. I appeared before the Senate Finance Committee in opposition to the amendment. I presented letters which I had written to the different departments of the Government in order to ascertain the facts.

I have a letter from Mr. Robert L. O'Brien, Chairman of the United States Tariff Commission, which appears on page 209 of the hearings. I also have a letter from Mr. W.

V. Linder, Chief of the Laboratory Division of the Treasury Department; a letter from Mr. W. G. Campbell, Chief, United States Department of Agriculture, Food and Drug Administration of the Department of Agriculture; a letter from Mr. Martin H. Ittner, chairman of the Committee on Industrial Alcohol of the American Chemical Society, and other letters appearing in the record, all of them to the effect that modern distillation and rectification practice has attained such a high degree of refinement that the resulting alcohol is recovered with only extremely minute traces of the original congenerics, and that molasses alcohol which has been highly rectified or purified cannot be distinguished by any known chemical tests from grain alcohol which has been similarly rectified and purified.

Quoting from Mr. Howe, chairman of the Industrial Alcohol Committee, we find the statement:

> To those of us in the chemical industry it seems absurd to endeavor to define a perfectly well-known, easily identifiable, and definite chemical compound by the source or kind of raw materials from which it is made. We recognize, of course, that it is an effort to obtain an extensive market for one particular agricultural product, but this discrimination seems to us unwarranted and unsound.

The Senator from Iowa quotes the ruling made by President Taft while he was in the White House. If the Senator from Iowa had quoted a decision rendered by Justice Taft on some constitutional question, I would have had a very high regard for it, but I do not think that this august body will consider very seriously either President Taft's or Judge Taft's view as to the commodities from which liquor should be manufactured.

There is a history back of this proposed legislation. Congress enacted a law which provided that no discrimination should be practiced in reference to the branding and marketing of liquors. It was the Revenue Act of 1919, and it contained this provision:

> All distilled spirits or wines taxable under this section shall be subject to uniform regulations concerning the use thereof in the manufacture, blending, mixing, marking, branding, and the sale of whisky and rectified spirits, and no discrimination whatever shall be made by reason of the difference in the character of the material from which the same may have been produced.

Mr. President, that is the law today. It is a proper and a just law. There is no reason why there should be any discrimination on account of the commodity from which alcohol is produced, provided the alcohol so produced is as good and as pure as alcohol produced from other sources.

This same amendment was offered last year by the Senator from Iowa, and it was rejected by the Congress. Following that an effort was made to have the Federal Alcohol Control Administration adopt a regulation which would create a monopoly of grain alcohol and exclude all other forms of alcohol. But, instead of that, the Secretary of the Treasury authorized the promulgation of a ruling which requires that the percentage and the name of the commodity shall be given with reference to alcohol and its products. Therefore the public is put upon notice, under the present law, and under the present rulings. The contents of a bottle, the commodity out of which the contents are made, and the percentage of the commodity, are, under the recently adopted regulation of the Treasury Department, to be indicated on the label on each bottle, and therefore the public can determine whether or not it is getting liquor that is manufactured out of grain, or gin that is manufactured out of sugar or molasses, and just what kind of alcohol is being used.

Mr. WHEELER. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. WHEELER. I am asking merely for information. Is most of the whisky made out of grain at the present time, or is much of it made out of alcohol produced otherwise and blended with something else?

Mr. OVERTON. Frankly, I cannot give the Senator the information he seeks.

Mr. WHEELER. If whisky and the various other spirits which are drunk so freely in the United States were made out of grain, it would undoubtedly help the farming industry in the United States to some extent would it not?

Mr. OVERTON. To a very limited extent, so far as grain is concerned. I do not know whether or not the Senator was present in the Chamber when I made the statement, but it is shown by the minority report and by the record that two and a half billion bushels of corn are produced annually in this country, and that only 1,500,000 bushels of all kinds of grain enter into the manufacture of beverage alcohol.

Mr. MURPHY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. MURPHY. I submit there is an inconsistency in the statement which appears in the report, and I think there is no justification for saying that only a million and a half bushels of corn enter into the manufacture of liquor. I stated that for the fiscal year ended June 30, 1934, alone there was an increase in the use of grain, not the absolute amount of production but an increase in the use, of 13,000,000 bushels of grain in that year alone.

Mr. OVERTON. I do not think that makes very much difference. I do not think one can make the argument that in order to help agriculture we should take one class of agricultural commodities and make a monopoly out of it in the manufacture of a product and exclude any other agricultural commodity in the United States.

Mr. WHEELER. We would not be excluding any other product, as a matter of fact.

Mr. OVERTON. We would be excluding molasses, which is a product of sugarcane and also a product of beet sugar.

Mr. WHEELER. Where is the great proportion of the beet sugar which goes into the making of alcohol produced at the present time? Does it come from Cuba and other places?

Mr. OVERTON. A great deal of it is imported. It comes from our insular possessions.

Mr. CLARK. The Senator does not refer to Cuba as an insular possession of the United States, does he?

Mr. OVERTON. No; I mean that it also comes from our insular possessions—from Puerto Rico and from Hawaii. Some of it also comes from the Philippine Islands and from Cuba, from Louisiana, and from the beet-sugar area.

Mr. WHEELER. Is it not true that there is a depression among the grain farmers of the United States, and that this measure would provide one way by which we could be of help to the producers of grain?

Mr. OVERTON. It would be one way by which we could hurt the sugar interests.

Mr. WHEELER. As a matter of fact, we would not be hurting the sugarcane grower in the United States to any appreciable extent. The only people against whom we would be discriminating would be the Cuban sugar growers, who ship in the blackstrap, or whatever it is, that is used in the production of competing alcohol.

Mr. OVERTON. I will say to the Senator that whenever we create a monopoly we benefit that concerning which we create the monopoly. There is no question about that. But the Senator is in error when he says that the only people who would be hurt would be the Cubans, those who reside in our insular possessions, and those interested in the sugarcane industry in Louisiana, and the beet industry. We would also be injuring and putting out of business factories which have been established along our seaboard, along the Atlantic coast, and in Louisiana, which use blackstrap molasses, which take the sucrose content out of it and convert that content into alcohol. If we create a monopoly in favor of the grain distillers, then we destroy the business of all of the molasses distillers along the Atlantic coast.

We are not asking for that. We are not proposing an amendment providing that alcohol and gin may be manufactured solely from molasses. We are perfectly willing that it shall be manufactured from grain and shall be manufactured from molasses. It ought to be manufactured from any commodity produced in the United States or elsewhere from which it can successfully be made.

Mr. MURPHY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. MURPHY. I think the Senator from Louisiana did not mean to say that the adoption of the pending amendment would put the industrial alcohol plants on the Atlantic

seaboard and elsewhere out of business. If the adoption of my amendment would accomplish their destruction, we are left to wonder what market accounts for their existence. The truth of the matter is that the distilling interests referred to now import a tremendous quantity of blackstrap molasses, as the Senator has stated. The domestic production of blackstrap molasses is 59,629,000 gallons. We import 165,266,000 gallons. In addition, there are imported from Hawaii and Puerto Rico 39,964,000 gallons. It is all distilled in the seaboard and other distilleries. It is sold as industrial alcohol. Of course, they are existing today and earning profits as they are thus employed, and my amendment would not disturb them in the market which they now enjoy.

Mr. KING. Mr. President, will the Senator yield for a question?

Mr. OVERTON. I yield.

Mr. KING. I do not quite understand the attitude of the Senator from Iowa. Does he mean that no part of the importations of molasses is now used for the manufacture of whisky?

Mr. MURPHY. That is my understanding, Mr. President. There is not any evidence anywhere that even a gallon of domestic blackstrap molasses has gone into the manufacture of alcohol for beverage purposes.

Mr. OVERTON. I think the Senator is in error about that. He has made the statement that none of the molasses of Louisiana is used for that purpose. My information is to the contrary. My information is that domestic molasses is used for the production of alcohol for both industrial and nonindustrial purposes.

Mr. MURPHY. Mr. President, will the Senator yield further?

Mr. OVERTON. I yield.

Mr. MURPHY. I should not wish to make the statement that no Louisiana molasses goes into alcohol. The extent of the statement I make is that I have not been able to find anywhere—and I have made diligent inquiries—that any of it has gone into such production. Repeated statements have been made to me that none of it has gone into alcohol for beverage purposes.

Mr. KING. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. KING. Would it not be as just and wise and sound, as a national policy, to forbid the use of rayon for the manufacture of clothes, and compel us all to use silk, as it would be to deny the use of molasses for the manufacture of a commodity which is just as good as that which is manufactured from grain?

Mr. OVERTON. I think so.

Mr. MURPHY. Mr. President, will the Senator yield for another moment?

Mr. OVERTON. I yield.

Mr. MURPHY. I suggest to the Senator from Utah that rayon is sold as rayon. It is not sold as silk.

Mr. OVERTON. Mr. President, I get back to the original proposition which I advanced, that the pending amendment cannot be defended upon the ground that it is desired to favor a certain agricultural commodity exclusively and that all other sources of alcohol manufacture in the United States of America should be wiped out. The only way such a proposition can be defended would be to show that other alcohol is not as good as the alcohol manufactured from grain. The records show conclusively and abundantly, and it was so stated by the Senator from Iowa himself before the Senate Finance Committee, that alcohol manufactured from molasses is just as good as is alcohol manufactured from grain.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. BARKLEY. I recall that Dr. Doran, who for a number of years was in charge of the Prohibition Division during prohibition days, testified that ethyl alcohol made from cane or from molasses could not be distinguished from alcohol made from grain; that they are practically identical; that whisky made with alcohol derived from molasses could not be distinguished from whisky manufactured from alcohol made from grain.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. BARKLEY. I should like to finish my statement.

Mr. CLARK. I desire to refresh the Senator's memory as to Dr. Doran's statement. He said that on chemical analysis there was no difference to be distinguished, but that there was a very material difference in flavor.

Mr. BARKLEY. I do not recall his statement about the flavor, but I know that he said that from the standpoint of science there is no difference whatever between alcohol produced from grain and alcohol produced from cane.

It seems to me, of course, that the question which confronts us is whether Congress shall say, by adopting the pending amendment and limiting the production of whisky to alcohol produced from grain, that we shall forever prohibit any scientific research that may develop any process of manufacturing ethyl alcohol from any kind of vegetation from which it may be manufactured. That is what the amendment means. If the amendments shall be adopted, it will tie the hands of scientific investigation. It will make absolutely useless any research into the possibilities of producing alcohol from any vegetation unless it happens to be grain.

If alcohol produced from grain and alcohol produced from other vegetation are identical, it seems to me that no harmful results could be produced by making whisky from alcohol produced from vegetation other than grain. All my interests would naturally be in favor of the amendment of the Senator from Iowa. We produce in the State of Kentucky no liquor made from blackstrap or from any other vegetation except grain, but I have not had a letter from a single farmer in my State asking me to vote for the pending amendment by reason of the fact that it will increase the market for grain. I do not know whether or not the farmers in my State know anything about it, but I am not concerned about that.

It seems to me that we are going far afield in legislation when we say by an act of Congress that ethyl alcohol shall not be made from any kind of vegetation from which it may be produced in the manufacture of whisky or any other commodity. It seems to me that we are not justified in limiting the source from which this product may be made simply because we desire to give a monopoly to one particular type of manufacture.

Mr. WHEELER. Mr. President, will the Senator from Louisiana yield?

Mr. OVERTON. I yield.

Mr. WHEELER. It seems to me that a distinction to which the Senator has not called attention should be made between alcohol and whisky. After all, there is nothing in the amendment which, if it should be adopted, would prevent a continuation of scientific investigation in connection with the manufacture of alcohol.

Mr. BARKLEY. Not for industrial purposes. The amendment prohibits the labeling of any whisky as such, although it actually is whisky, unless it is produced from alcohol which came from grain. A commodity may not be labeled as gin, although it actually is gin, unless it comes from grain. A product may not be labeled ethyl alcohol, although it actually is ethyl alcohol, unless it came from grain.

Mr. OVERTON. It is, in other words, a legislative absurdity to undertake to say that that which is is not.

Mr. WHEELER. Mr. President, I do not agree with the Senator in his statement about this being a legislative absurdity. It seems to me that whisky has a well-known and a well-defined place in the minds of the general public. There is corn whisky, and there is rye whisky. When I buy what is sold to me as rye whisky, I wish to know that I am getting whisky made from rye.

Mr. OVERTON. The Senator has that knowledge now under the present regulations. The whisky must be labeled. If any of it is made of sugarcane products it is so labeled, and the percentage that goes into it is noted on the bottle. Therefore, full notice is given under the present regulations.

Mr. WHEELER. As the Senator from Iowa has said, it seems to me that the amendment will have nothing to do with preventing the making of alcohol for industrial purposes. The manufacturers may make all the alcohol they desire. They may carry on all the scientific investigations they desire. By the amendment we are simply saying that when a purchaser buys a product labeled "whisky", he shall receive whisky made from grain. That is all the amendment provides.

Mr. OVERTON. That is it, Mr. President. The amendment seeks to make a monopoly of grain-made whisky. Let us get down to the real meat in the coconut. The trouble about this whole thing is not that good alcohol cannot be made from other products, but it is that alcohol can be made cheaper from certain other products. It can be made cheaper from molasses than from grain, and therefore grain distillers do not wish to enter into competition with those who manufacture alcohol from molasses and from other products.

The amendment if adopted will increase the price not only of beverage alcohol but the price of medicinal alcohol. The pharmaceutical societies are opposed to this amendment and have written letters addressed to the Finance Committee in opposition to it. I read from the record of the hearings at page 48 from the testimony of Mr. Hilton, president of the United States Pharmaceutical Union, as follows:

> If alcohol can only be produced from grains, a condition will be imposed upon the sick and suffering in obtaining their necessary medicine, and prices will be exorbitant.

The adoption of the amendment will mean high prices for liquor and whisky and also high prices for medicine. If we create a monopoly for this source of manufacture of alcohol, whisky prices are going to mount to the sky; prices of medicinal alcohol are going to mount also; and it is going to impose not only upon those bibulously inclined, I will say to the Senator from Montana and the Senator from Iowa, but also, as Mr. Hilton says, upon the sick and suffering, the needy, the poor, and the distressed who require medical attention. We cannot defend a monopoly, and whether we say it is in the interest of agriculture, in the interest of corn or other grain, the amendment is monopolistic in character. That is the whole purpose of it. Its purpose is to drive out all other forms of production and have this one source of production.

Mr. BARKLEY. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Kentucky?

Mr. OVERTON. I yield.

Mr. BARKLEY. I wish to call attention to the fact that the pending amendment not only applies to the bill now under consideration, the Federal Alcohol Administration Act, but it applies also to the Foods and Drugs Act not only as it now exists but as it may be amended or substituted for hereafter. Hereafter, no matter what act Congress may pass in substitution of the measure that is now under consideration or the Food and Drugs Act that has been on the statute books for a quarter of a century, this amendment would apply to any future enactment the Congress may see fit to substitute for or add to the law as it now exists.

Mr. WHEELER. Of course, we could not do that, as a matter of fact.

Mr. BARKLEY. Of course, one Congress cannot bind another, but every effort is being made here to hog-tie the future. Under the amendment that has been offered, if in the future a source should be found from which to develop a quality of alcohol better than has so far been known to man, advantage could not be taken of it to produce the alcohol or use it in connection with drugs.

Mr. OVERTON. At least it would require another act of Congress.

Mr. MURPHY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. MURPHY. I call the Senator's attention to the exception in the amendment embraced in the words "for nonindustrial use." Of course, this amendment does not apply to alcohol that is going into pharmaceutical uses.

Mr. OVERTON. Are not pharmaceutical uses nonindustrial uses?

Mr. MURPHY. Yes; and the amendment excepts them. So we cannot affect the price of medicines by the adoption of this amendment.

Mr. OVERTON. The amendment says that "no product shall be labeled or advertised or designated as neutral spirits", and so forth, "for nonindustrial use, if distilled from materials other than grain." Is not alcohol used in medicine a "nonindustrial use"?

Mr. MURPHY. It refers to beverage purposes.

Mr. OVERTON. It does not say "for beverage purposes." I disagree with my learned friend from Iowa.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. O'MAHONEY in the chair). The question is on the amendment offered by the Senator from Iowa [Mr. MURPHY].

Mr. BAILEY. Mr. President, I gave notice in the committee that I would file minority views in favor of the pending amendment. I have heard the arguments here, one to the effect that we propose to "hog-tie the future", which is clearly an impossibility; and the other to the effect that we are oppressing the sick and the poor and the lame and the halt, which cannot be sustained. I must say that when I heard the discussion and the testimony in the subcommittee no one thought of putting forward suggestions of that sort.

The question revolves wholly around the point whether or not any distillate from a product other than grain may be designated as whisky, and the collateral question is whether or not we should permit the distillation of blackstrap molasses, admittedly shipped in from outlying islands, some our own and others independent, in competition with American grain, and therefore adversely to the American farmer. They were the considerations which moved me to dissent from the recommendation of the subcommittee of the Finance Committee in charge of this bill. I wish to address myself to those considerations.

In the first place, do we have a right to permit or would it be proper to declare by law that alcohol distillates derived from materials other than grain may justly and prudently be permitted to be advertised and sold in our country as whisky? I make no pretense of technical capacity to define whisky, but we have certain historical standards to which we all may repair for our definition. No Senator here denies that every dictionary that undertakes to define whisky defines it as a distillate of grain. If there be a question about that, go to Webster's Dictionary or the Standard Dictionary or the Century Dictionary and my statement will be found to be absolutely supported. I did not know that when I sat on the subcommittee; but when the question arose I went to the dictionary and I was rather surprised to find that the historical definition of the word "whisky" is "a distillate of grain."

Now the next evidence is this: Mr. Taft, formerly President of the United States, rendered a decision, not with the force and effect of an adjudication but with the force and effect of a great lawyer and a great judge sitting in the Presidency of the United States with the question presented directly to him, What is whisky? We may give as much weight to a decision of that sort as we choose; we are not bound by it; but I submit it must have a very moving force with every reasonable man, and it has more force coming from a President who afterward became Chief Justice, and who, prior to being President, was a district judge and a circuit judge in our great judicial system, than it could have coming from any other man who has sat in the White House. It was a combination of a finding of fact and a determination not by a court of justice but by a great judicial mind with great judicial experience.

But that is not all. The Attorney General of the United States has held that whisky is a distillate of grain, and nothing else is whisky. The Department of Agriculture, administering the Pure Food and Drugs Act, has consistently held that whisky is a distillate of grain, and nothing else is whisky.

At any rate, when we come to determine the essential meaning of the word in the trade, and that is the thing at which we are driving, in the minds of men, we have a right justly to assume that when a man speaks of whisky or undertakes to buy whisky he understands that he is buying a distillate of grain. So the amendment is precisely in line with the whole policy of the Government, and especially the Pure Food and Drugs Act which has been on the statute books now for 30 years.

I see no injustice in the amendment; I see no straining. On the other hand, I see a perfect consistency with the general understanding of what we are to do here. We cannot make an arbitrary decision. We do not propose to call rayon "silk" or to call silk "rayon", as was intimated. We propose to call rayon, rayon, and to call silk, silk, to call a distillate of grain, whisky, and whisky, a distillate of grain. Every one of them is perfectly consistent with the ordinary human understanding.

I cannot bring forward that argument for gin, and I cannot bring forward that argument for neutral spirits. I do not know of what gin is made. I do not know just what is its base. But the argument for whisky is absolute.

The other consideration is the interest of the American farmer. I think the Congress in the years since I have been here has been struggling desperately by many devices to do something to place the American farmer in a better position than that which he has occupied. I question whether we have done that in the particular interest of the farmer alone. We have done it with a profound sense of the national interest, and we are right about that. We said at the outset the one way to meet the problems of the depression, perhaps the surest way to solve them all, would be to correct the disparity between the price paid by the farmer and the price received by the farmer. We have done many things. We have enacted some 17 or 18 different acts in the interest of the American farmer. Nevertheless, that disparity has not been corrected. We still have that great task, that essential objective ahead of us.

I have brought that point forward for one purpose, and that is to say that we are not going to secure justice for the farmer by one act or two acts or three acts or four acts. We have to look to his interest in every law we enact. He will be saved, if saved at all, by 100 little things rather than any one big thing. He will be saved at the point of taxation, for example. He may be saved at the point of money lending, for example. He may be saved to some degree at the point of soil conservation, for example. He is going to be saved in part by giving him his share of the protection that this country gives to everybody else. He pays the tax, but he has no benefit from the tax.

We set up recently the doctrine of a domestic tax which we call the A. A. A. benefits, the farmer's tax. He ought not to be made to pay his tariff rates. The benefits he receives ought to be charged against his crop and his income. So long as we charge them against his production, we have him in the position of trying to lift himself by his own boot straps.

Here is an incident of precisely that kind. Regret it though we may, the United States Senate is in the position at this moment of providing a law for the administration of a national liquor traffic. Whether we like the traffic or not, if there is one small opportunity in the enactment of laws concerning that traffic to aid the farmer by way of selling his grain, we cannot afford to neglect it. It may be a small contribution, but I was just saying that it is by the small contributions—here a little and there a little—that we will finally derive for him that parity which is the object of the national policy. We will correct that disparity which has placed him where he is by a long process of small neglects and discriminations.

That is what caused me to be interested in this matter. I do not care of what intoxicating liquors may be made. Personally that is a matter of indifference. I take it that is the attitude of most of us. But if we have an opportunity to sell, for the purpose of manufacture into whisky, 15,000,000 bushels of grain or 30,000,000 bushels of grain or 1,000,000 bushels of grain, why should we neglect the opportunity?

The evidence is that there are about 15,000,000 bushels of grain available each year. Since the corn crop and to some degree, the wheat crop are not sold in the open market—my associate from Iowa [Mr. MURPHY] said 67 percent of the corn is consumed on the farm—if we can provide a market for 15,000,000 or 10,000,000 or 5,000,000 bushels of grain to be consumed in the liquor traffic, in the manufacture of whisky, we should not overlook the opportunity to do so.

Mr. OVERTON. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Carolina yield to the Senator from Louisiana?

Mr. BAILEY. I yield.

Mr. OVERTON. If the Senator will refer to the record, he will find it was testified that there are 2,500,000 bushels of grain used anually in the manufacture of alcohol.

Mr. BAILEY. I thank my good friend. I do not profess to know just what the statistics are. There has been dispute here all day about the figures, and I am sorry to say no one has been able to make an authoritative statement. I have before me the minority report in which it is said:

> Of the approximately 43,000,000 bushels of grain which are now being used annually in the distilling of whisky, gin, and alcohol for beverage purposes, it is estimated the market for 15,000,000 bushels will be lost to the farmer unless the grain-alcohol amendment is adopted and the Treasury ruling annulled.

Very well; at least that statement has been on the desks of Senators all day and no one has introduced one atom of evidence to deny it.

Mr. OVERTON. If the Senator will read the complete statement he will see that the 15,000,000 covered a period of 10 years.

Mr. BAILEY. I differ with my friend on the direct interpretation of the statement, but to be perfectly fair I shall read the statement:

> During the 10 years prior to war-time prohibition an average of, roughly, 75,000,000 proof gallons of grain alcohol were used for beverage purposes—

That is the average per year—

> mostly for blended whisky or gin, or the equivalent, conservatively, of 15,000,000 bushels of grain.

That is the average per year. That is the perfectly apparent meaning of the statement. It could have been made more definite, but to read it intelligently we are going to read that 15,000,000 bushels was the average per year for 10 years. I think we have very little trouble on the point of interpreting that language.

Mr. President, before I take my seat, to go back and say just a word again, all the evidence we have is that the molasses which is shipped into this country and manufactured into spirits and sold as whisky comes from the outlying islands or from other countries. There may be some from Louisiana. The Senator from Louisiana says there is. I do not think he will say there is a great deal; but the Senator from Louisiana will agree, I think, to two things. One is that the historic interpretation of the word "whisky" is a grain distillate. The other is that American farmers are always suffering from an overproduction of grain. If we can create this market out of a traffic that has no good in it that I can see save such an economic good as we may bring about by creating a market for the farmer, we at least to that extent shall have made some contribution to the solution of the great problem of correcting the disparity between the prices the farmer receives and the prices he pays. We shall have taken one little step in the long series which we must be taking as long as we live to bring about for the farmer the parity to which he is entitled; and if it is desired to put the matter on the basis of protection, so long as this country gives protection to any other class of Americans, as a matter of common justice it ought to give it to the American farmer. If we put him on a free-trade basis and put everybody else on a free-trade basis, very well. If we put him on a tariff-for-revenue basis and put everybody else on a tariff-for-revenue basis, well and good; but there

is not a hope for the farmer so long as the rest of the country is on a protective basis and he is in competition with all the other farmers of the world.

Mr. KING. Mr. President, will the Senator yield?

Mr. BAILEY. I yield to the Senator from Utah.

Mr. KING. The Senator, I am sure, knows that the strongest supporters of a high protective-tariff policy for many, many years have been the farmers. They have pointed to the fact that their surplus products not exported were largely consumed in the manufacturing and commercial centers; and they have urged that it was necessary for the employees in the manufacturing centers to find foreign markets for a part of their products, and that the farmers must find the markets for their products largely with those who were engaged in the manufacturing business. Therefore they have been the most urgent devotees of the cult of high protection that I have discovered since I have been in public life.

Mr. BAILEY. Yes; and they have received less of it than any other class. They have been the victims of it for 70 years. If there is one market under the sun to which the American farmer is entitled, it is his home market. If we close the doors, protect the manufacturer, and open the doors to all the other farmers of the world to compete with the American farmer, it will be a thousand years before we shall solve our simple problem of parity. This is not a big aspect of it, but it is just as important as any of the others, because the whole big aspect consists of many small ones.

Mr. BARKLEY. Mr. President, if the object of this amendment primarily is to protect the American farmer, why not prohibit the importation of Scotch whisky made from grains, or Canadian whisky made from grains, or vodka made from potatoes, or any other alcohol that is manufactured from any other vegetation grown anywhere else except in the United States?

Mr. BAILEY. Mr. President, I am surprised by my friend's question. We do not prohibit, but we certainly do put a tariff on all those articles.

Mr. BARKLEY. But if the object is to protect the grain growers of the United States—and out of a total production of two and a half billion bushels of corn the amount involved would be not much more than a million bushels, even if this amendment were adopted and protected the farmer to that extent—why not prohibit the importation of anything made from foreign grain, or put so high a tariff on it that it could not get in?

Mr. BAILEY. I have not implied, and the amendment does not imply, that we are going into the business of prohibiting anything by way of importations. I cannot see the analogy. The Senator suggests, by way of analogy with this amendment, that we prohibit the importation into the United States of Scotch whisky. If the Senator will give me the analogy, I shall be very much obliged to him.

Mr. BARKLEY. I was basing my inquiry upon the Senator's desire to protect the American farmer from the competition which is brought about by allowing the manufacture of whisky or gin or these other products from alcohol produced from other vegetation than grain.

Mr. BAILEY. I think the American farmer does have a certain amount of protection in those respects, in that we do levy a tariff upon every one of those articles of whisky from abroad.

Mr. BARKLEY. And, of course, a tariff would be levied upon the same product produced from any source, whether it was from grain or otherwise; so there is no discrimination there.

Mr. BAILEY. There is no discrimination; but, at the same time, that does not deprive the farmer of his share of that protection.

Mr. MURPHY. Mr. President, will the Senator yield?

Mr. BAILEY. I yield to the Senator from Iowa.

Mr. MURPHY. It may be observed at this point, as settling, I hope, the question of how much grain is used in the manufacture of alcohol, that in the year 1935—and the amount will be greater for 1936—a total of 33,006,619 bushels of corn, rye, malt, and other grains entered into the manufacture of whisky. We have already protected molasses. There is now a 3-cent tariff on imported molasses, except molasses imported from Cuba and made of sugarcane, on which there is a 20-percent reduction. Of the 1,140,000,000 gallons imported from Cuba in 1934, the tariff was 0.024 cents, which was equivalent to an ad valorem duty of 5 percent.

I put those facts into the RECORD merely for their bearing on the remarks of the Senator from Kentucky [Mr. BARKLEY].

Mr. BAILEY. I thank the Senator.

Mr. President, in conclusion—I am now reading from the report of the minority—

> The adoption of the grain-alcohol amendment will eliminate this conflict—

The conflict between the Treasury Department and the Department of Agriculture—

> and restore the requirements as to the labeling of blended whisky to those that prevailed continuously until January 18 of this year, when the Treasury Department regulation was promulgated.

We are not doing a new thing. We are simply restoring what was.

Further:

> The adoption of the proposed grain-alcohol amendment is urged by the American Farm Bureau Federation—

And that is a federation which has really national representation—

> and the Farmers' National Grain Corporation. Such State units of the Farmers' Union as have been heard from up to the present are all favorable. These include the Farmers' Union in the States of Montana, North Dakota, Minnesota, Wisconsin, Washington, Oregon, and Missouri. The Distilled Spirits Institute approves the proposed amendment. The National Institute of Wine and Spirit Distributors is on record before the Treasury Department in opposition to its regulation.
>
> Chester C. Davis, Administrator of the Agricultural Adjustment Administration, has endorsed the amendment on behalf of that Administration, as being in conformity with the legislative mandate already binding the Agricultural Adjustment Administration, namely, to undertake all practicable measures to increase domestic utilization of agricultural products, and as being necessary to prevent interference with the present agricultural program through depriving the farmer of one of his large grain outlets. Walter G. Campbell, Chief of the Food and Drug Administration, has, on behalf of that Administration, approved the amendment so far as it relates to the honest labeling of whisky. The Treasury Department does not object to the amendment. It stated to the committee that the amendment would not affect the revenues and that in other respects the amendment involved a question of legislative policy.

There is the combination of the official representation of the farmers of the Middle West and of America. There is the Department of Agriculture, through Chester Davis. There is the Pure Food and Drug Administration, through Mr. Campbell, and here is the Treasury Deparment saying that it does not object.

Mr. BARKLEY. Mr. President, the attitude of the Treasury Department is that it is not a matter of revenue, and that it has no interest one way or the other. It being a matter of policy, they express no view about it.

Mr. BAILEY. That is true; they do not touch the merits. They simply stand aside and say they will let us do what is wise.

Mr. President, I fortify my argument with the support of the men who are charged with the duty directly of speaking to the Congress concerning the needs of the farmers of the United States, two of them representatives of national organizations, and the third the head of the Agricultural Administration, Mr. Chester Davis. When we come to the question of labeling, the responsibility is Mr. Campbell's, who has been the administrator of the pure food and drug law for a great many years.

In the presence of the facts and the testimony, and the considerations which I have mentioned here, I can see no course other than to vote for the amendment.

Mr. BARKLEY. Mr. President, I have no interest in this matter except my interest in good legislation. I have no interest, direct or indirect, in the manufacture of any kind of distilled spirits out of any sort of vegetation from which they may be produced. But in order that we may understand what we are about to vote upon, I wish to make a very brief statement.

Mr. ASHURST. Mr. President, will the Senator from Kentucky yield to me?

Mr. BARKLEY. I yield.

Mr. ASHURST. I regard the Senator from Kentucky as an authority on this subject, not that he is in any sense an ultimate consumer of liquor, but he comes from a State which produces a great quantity of liquor.

I have here a copy of a letter dated February 10, 1936, addressed to Hon. WILLIAM H. KING, chairman of the subcommittee of the Committee on Finance, signed by Dr. H. E. Howe, chairman, industrial alcohol committee, American Institute of Chemical Engineers, and I regard Dr. Howe as a very able chemist. The letter is as follows:

FEBRUARY 10, 1936.

Hon. WILLIAM H. KING,
Chairman, Senate Finance Committee,
Washington, D. C.

DEAR SENATOR KING: As chairman of the industrial alcohol committee of the American Institute of Chemical Engineers, an organization of approximately 1,400 technical men, I wish to have placed in the record the opposition of that body to the amendment proposed by Senator MURPHY, of Iowa, to H. R. 9185.

The proposed amendment is to a bill drawn to insure the collection of revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes. The amendment undertakes to define according to its source a perfectly definite identifiable chemical compound, namely, ethyl alcohol. The American Institute of Chemical Engineers as such is not directly concerned with the nonindustrial use of ethyl alcohol, where it is affected by the Federal Alcohol Administration Act, but it is convinced that it is both unsound and unwise to set up for this or any other purpose a definition of a chemical compound as something derived from a particular source in contradistinction to the established properties of the product, regardless of how it is made.

The basic purposes of the Food and Drug Act are to prevent the manufacture, sale, or transportation of adulterated or misbranded food and drugs, but there is no reference in the Food and Drug Act nor in the bill S. 5, now pending, to the industrial or nonindustrial use of distilled spirits or the beverage or nonbeverage use of alcohol. The Food and Drug Act has to do with the purity and quality of the articles which it covers and not their use, and in the pending legislation the term "drugs" refers to preparations recognized in the United States Pharmacopoeia, in which ethyl alcohol as such has long been recognized, quite irrespective of the source of its manufacture, being concerned only with its quality and purity.

Under the wording of the proposed amendment all other sources than grains themselves would be barred as a source of ethyl alcohol. This would include sugars, whether derived from the cane, the beet, or corn; starches that might be converted into fermentable carbohydrates; various farm crops, such as the Irish and the sweetpotato; artichokes, which are being widely discussed as a source of alcohol to give variety to farm crops; and many agricultural wastes. Ethylene as a source would likewise be barred. Since alcohol is alcohol, regardless of the raw material from which it is made, it is not difficult to foresee numerous difficulties and unjustifiable expense in the enforcement of such a plan of manufacture, and the amendment can scarcely be viewed as anything else than an effort to discriminate in favor of one small group at the expense of the others.

We urge that action on the amendment be unfavorable.

Very truly yours,

H. E. HOWE,
Chairman, Industrial Alcohol Committee,
American Institute of Chemical Engineers.

In brief, the purport of the letter is that alcohol is alcohol, whether it comes originally from potatoes, grain, or sugarcane. I wish the Senator would at least enlighten me upon that subject, because I regard Dr. Howe as an able chemist.

Mr. BARKLEY. Mr. President, the Senator is right about that. There are different sorts of alcohol. Plain alcohol is the parent of all the alcohol family, and going on down from the parent we get ethyl alcohol, which is the potable or consumable part of the alcohol family. Then we get butyl alcohol, depending upon the content. Then we get the methyl alcohol, and finally we get wood alcohol, and they are all traceable back to the parent of the whole alcohol family. Ethyl alcohol is the only sort of alcohol out of which whisky or gin or any of these other drinkable beverages is manufactured. Others are used for industrial purposes and for scientific purposes.

When we get ethyl alcohol, whether we get it from grain or from sugarcane or molasses cane or the molasses itself, or from any other vegetation, and subject it to scientific analysis, we cannot tell the difference.

Reference has been made to a decision of President Taft while he was President of the United States, when he traced the definition of whisky historically, which indicated that two or three centuries ago they did not know how to make whisky out of anything but grain. They did not know how to extract ethyl alcohol from anything except grain; and because they did not know how to get alcohol from anything but grain two or three centuries ago, we are asked to say now by legislation that we cannot get it from anything else at this time. That is what the amendment really means, and although the beverage made from the alcohol covered by the amendment, which is indistinguishable from grain alcohol, is not harmful to the human system as compared with the beverage made from alcohol produced from grain, although it is indistinguishable, and although whatever difference in flavor there may be is due to the process of distillation and of aging, we are asked to say by this amendment that whisky is not whisky unless it happens to be whisky that comes from grain.

What about gin? I know nothing about gin except what I have learned about it from study, because I do not consume it. I am not interested in its consumption. I do not even like the odor of it. But gin is ethyl alcohol further distilled over what are called aromatics, which in most cases take the form of juniper berries, so that every bottle of gin that is for sale is a beverage which represents ethyl alcohol redistilled over aromatics, usually juniper berries.

Under the proposed amendment we could not call it gin, although it is ethyl alcohol, indistinguishable from any other kind of ethyl alcohol. We could not take that alcohol and redistill it over an aromatic and call it gin. If we cannot call it gin, what can we call it, and what is it? What will it be, if it is not gin? It is the same sort of beverage, it is made by the same process, but we cannot call it gin. If we cannot call it gin, what will we call it. I do not know what we could call it.

Now, let us consider whisky. What is the beverage which we get from distillation of vegetation outside of grain? In Russia they make a certain type of vodka out of Irish potatoes. About as much alcohol can be produced from an Irish potato, according to its size, as out of the cubic space content of any vegetation. Potatoes are very high in alcoholic content.

Take rum, for instance. Rum is made from a vegetation which in itself contains the required sugar, whereas whisky is made from a grain which contains a certain amount of starch that has to be made into alcohol by distillation. That is one of the chief differences between rum and whisky. If we cannot call whisky that which is made from alcohol which is not produced from grain, what are we going to call it?

Mr. MURPHY. Mr. President, will the Senator yield?

Mr. BARKLEY. I yield.

Mr. MURPHY. Call it alcohol from whatever product it is made. Under this ruling——

Mr. GEORGE. Mr. President, it is so branded today. It may not be sold unless it is so branded.

Mr. MURPHY. If the Senator from Georgia will let me finish, I will suggest that it be sold frankly for what it is. Whisky has always been a grain product. Now it is proposed to take 20 percent of whisky and mix with it 80 percent of alcohol made from products other than grain, and sell the whole as whisky, thereby violating what is strictly a grain market, and has been a grain market for 100 years. Why permit the substitution in whisky of an alcohol made from any other product for alcohol made from grain, when alcohol from grain has been used, as I have said, for a century?

The Senator from Kentucky says that our proposal will interfere with scientific progress. I have no desire to interfere with scientific progress, but I wish to have things called by their right names. The product is not whisky, as President Taft found, unless it is made from certain materials. Let us call the liquor by its right name. Go and find some name for it, but do not take the livery of whisky to sell blackstrap-molasses alcohol.

Mr. BARKLEY. I am not concerned with the historical cobweb surrounding the origin of whisky. I am not responsible, and I do not think Congress ought to make itself responsible, for perpetuating the designation of a thing for which centuries ago only one process of manufacture was known. There was no other vegetation which the scientists of an earlier day knew from which to produce alcohol except grain, and it was the most convenient source of alcohol from which they could make a drinkable beverage. Dr. Doran, who holds himself to be, and I think properly so, somewhat of a scientist on the subject, testified that as a matter of fact no whisky is being made out of blackstrap molasses. We are legislating against an inchoate fear. We are afraid the time may come when from Cuba they may bring in blackstrap molasses and make whisky from it. Even now, Louisiana blackstrap molasses is not being made into whisky. It is more valuable to be used as food for livestock. Is that, however, any reason why we should deny distillers the privilege of making whisky from alcohol made from blackstrap molasses, which scientists cannot distinguish from alcohol made from grain?

The question is whether we shall say by legislation that although scientists may discover some process by which whisky may be made in the future, it shall not be availed of, for whisky must be made only from alcohol distilled from grain.

I am as much interested in the market for all grain as anyone. We produce grain in my State, and we produce exclusively whisky made from grain. However, there are raised every year in the United States two and one-half billion bushels of corn. Think of it—two and one-half billion bushels. Yet all the corn that goes into the manufacture of whisky, out of two and one-half billion bushels, is about 30,000,000 bushels. How much more of a market for corn is going to be produced by prohibiting the manufacture of a little whisky from blackstrap molasses or from sugarcane down in Louisiana or in Georgia or somewhere else?

In my State we grow what we call a sorghum cane, and every autumn one may see the little sorghum mill out on the hillside, with the steam rising from it, and a man with a shovel or a scoop stirring the liquid that is ground out of the grain over a hot fire, and producing what we call a sirup, made of sorghum. This sirup has alcohol in it, and the juice which is ground out of that cane may produce alcohol. It may produce ethyl alcohol just as good as may be produced from the grain or corn raised on the very same farm beside this crop of molasses cane. Are we going to deny the farmer who raises cane, who can produce molasses, and who can raise potatoes, and who grows any other form of vegetation besides corn, the right to have his product used for the distillation of alcohol from which a drinkable liquor may be manufactured?

It seems to me, Mr. President, that for Congress to do that is to fly in the face of all modern scientific investigation. It is closing the door to the man who desires to take advantage of all the activities of agriculture and to produce what may be consumed from it.

I have no interest at all in the question except as a matter of sound legislation. If I were looking at it purely from the standpoint of selfishness, I should be in favor of the amendment, because my State is the largest producer of grain spirits or whisky made from grain in the United States, and we are a large producer of corn and of wheat and of rye, and grains of that sort. However, from a legislative standpoint, I cannot stultify myself by voting to deny every farmer who produces any sort of vegetation from which alcohol may be distilled the right to put his product on the market on terms of equality with those who produce grain.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Iowa [Mr. MURPHY].

The amendment was rejected.

Mr. KING. Mr. President, I offer an amendment, which I send to the desk and ask to have stated.

The PRESIDING OFFICER. The Chair calls the attention of the Senator from Utah to the fact that there is an amendment on page 51, line 1, which was passed over. The amendment will be stated.

The CHIEF CLERK. On page 51, line 1, after the word "all", it is proposed to strike out "intoxicating liquors" and to insert in lieu thereof "distilled spirits, wines, and fermented malt liquors", so as to make the section read:

SEC. 321. Each retail liquor dealer shall provide at his own expense, and keep in his place of business, a record in book form, or shall keep all invoices of, and bills for, all distilled spirits, wines, and fermented malt liquors received, the quantity thereof, and from whom and the date when received. Such records, invoices, and bills shall be open to inspection during the usual business hours of the retailer by Government officers upon identification and request. Such records, invoices, and bills shall be kept for a period of 2 years after the time of the transactions to which they relate. For each willful violation of the provisions hereof the retailer shall be subject to a fine of $25.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. KING. I now ask that the amendment I have just offered be stated.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. At the end of the bill it is proposed to insert the following new section:

SEC. 507. Section 9 of the Federal Alcohol Administration Act (U. S. C., 1934 ed., Supp. I, title 27, sec. 209) is amended by adding at the end thereof the following new subsection:

"(e) Nothing in this section shall affect the authority of the Secretary of the Treasury, under the customs or internal-revenue laws, to remit or mitigate the forfeiture, or alleged forfeiture, of such distilled spirits, wines, or malt beverages."

Mr. KING. That amendment is recommended by the Treasury Department, and I think it is a very proper one.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Utah.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is still before the Senate and open to amendment.

Mr. KING. Mr. President, I am advised that the Senator from Maryland [Mr. TYDINGS] has an amendment which he left with the Senator from Massachusetts [Mr. WALSH]. I see neither of the Senators in the Senate Chamber at the moment. I am familiar with the amendment, and the committee could not accept it. All the other amendments have been disposed of, and I ask for a vote on the passage of the bill.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act to insure the collection of the revenue on distilled spirits, wines, and malt liquors, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of distilled spirits, wines, and malt liquors, to amend the Federal Alcohol Administration Act, and for other purposes."

NATIONAL FLOOD CONTROL

Mr. COPELAND. I move that the Senate proceed to the consideration of House bill 8455, being Calendar No. 2050, the flood-control bill.

The PRESIDING OFFICER. The question is on the motion of the Senator from New York.

The motion was agreed to; and the Senate proceeded to consider the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes, which had been reported from the Committee on Commerce, with an amendment in the nature of a substitute.

Mr. COPELAND. I suggest that two typographical errors be corrected, and then, perhaps, we may let the bill go over until the morning.

On page 79, at the top of the page, I move that the word "Lambrook" be stricken out and the words "Laconia Circle" inserted in lieu thereof.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New York to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. COPELAND. On page 93, line 20, the numerals should be $19,616,800, and in the next line the numerals should be $10,519,600.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 23, line 20, it is proposed to strike out the numerals "$19,965,900" and insert in lieu thereof the numerals "$19,616,800"; and in line 21, to strike out the numerals "$10,170,500" and insert in lieu thereof the numerals "$10,519,600", so as to make the paragraph read:

Reservoir system for the reduction of Ohio River floods below Pittsburgh: Construction of reservoirs including the completion of the Bluestone Reservoir now under way, which together with the reservoirs for Pittsburgh flood control, constitutes a comprehensive plan for flood control on the main stream of the Ohio River and on the tributary stream below the reservoirs, as set forth in House Document No. 306, Seventy-fourth Congress, first session; estimated construction cost, $19,616,800; estimated cost of lands and damages, $10,519,600.

The amendment to the amendment was agreed to.

Mr. ROBINSON. Mr. President, I understand it is not desired to proceed further with the consideration of the bill this evening.

Mr. COPELAND. That is correct.

ACCOMPLISHMENTS OF DIVISION OF RURAL REHABILITATION

Mr. LA FOLLETTE. Mr. President, I have received a letter from Mr. Tugwell, Administrator of the Resettlement Administration, in relation to the work of the Division of Rural Rehabilitation. I ask that the letter may be inserted in the RECORD as a part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

RESETTLEMENT ADMINISTRATION,
OFFICE OF THE ADMINISTRATOR,
Washington, May 18, 1936.

Hon. ROBERT M. LA FOLLETTE, Jr.,
United States Senate.

MY DEAR SENATOR LA FOLLETTE: It has been impressed upon me during the development of the program of the Resettlement Administration that so much emphasis has been placed upon the rural and suburban resettlement activities and the land-use program, which are more spectacular in their nature, that there has not been full realization of the scope of the work being accomplished by the Division of Rural Rehabilitation, although it is expending almost half of the funds allocated to the Resettlement Administration for the present fiscal year.

There has been delegated to that division the responsibility for performing a number of services for destitute and low-income farm families by loans, grants, and debt adjustments. By June 30, including $17,000,000 authorized from funds of the rural-rehabilitation corporations previously granted to the States by the Federal Government under the Emergency Relief Appropriation Act of 1933, there will have been expended in excess of $125,000,000, of which approximately $108,000,000 will be for loans and the balance for grants. Almost $90,000,000 of these amounts have already been paid to destitute and low-income farmers. It is further estimated that at an administrative cost of less than 2 percent of the total indebtedness involved, debts of 30,000 farmers will have been adjusted with scale-downs in excess of $25,000,000, or 27½ percent of the original indebtedness. Through March 31, the date of the last available report, 17,400 cases had been adjusted and scale-downs effected, totaling $16,200,000, or 27½ percent of the original indebtedness.

Making allowance for duplications, more than 700,000 farm families will be aided through the rural-rehabilitation program this year as follows:

Standard rehabilitation loans	300,000
Emergency rehabilitation loans	30,000
Emergency grants	300,000
Corporation clients under care	180,000
Farm-debt adjustment cases	30,000
Community and cooperative services	25,000
Total	865,000

In addition, nearly 100,000 applications, involving loans of $35,000,000, have had to be rejected because of lack of funds.

In your State $2,554,000 have been allotted for loans to 4,000 farm families, and on May 12, $2,116,205 had been advanced on 2,672 loans. Loans are being made rapidly, and the balance will probably be fully paid out to needy farm families by June 10, with the exception of a small part committed for monthly payments for subsistence purposes to carry some farm families through the harvest season. In addition, $165,000 have been allotted for emergency crop production loans to farmers ineligible for such loans from the Farm Credit Administration because they had received subsistence grants from the Resettlement Administration.

As of May 12, $453,187 had been expended in your State for 20,918 grants to 7,126 different families, and this amount will be increased before the end of the fiscal year. Added to this, debts of 317 farmers, involving the original indebtedness of $1,309,911, have been reduced to $791,205, a scale-down of $518,706, or 39.6 percent, with additional adjustments by reduction in interest rates and extensions in dates of maturity, and it is anticipated that the total adjustments will be doubled by June 30. The extent of these services in your State is apparent when you consider that the total number of farms in Wisconsin is 199,877.

In addition to the rural-rehabilitation program, which affects the most persons directly, the Resettlement Administration is carrying on in your State two other programs. One of them, the land-use program, returns to public ownership and develops for public uses agricultural lands which cannot support the farmers now living on them. The other, the resettlement program, affords opportunities for farmers from submarginal lands, for successful rehabilitation clients, for those who have been tenants, sharecroppers, or dispossessed owners, and for newly married young people of agricultural background who are without other resources to settle upon good agricultural land and thus to become again self-supporting and independent members of their communities.

In the State of Wisconsin the Resettlement Administration is purchasing 222,021 acres of submarginal land on the following projects. The cost of this land is estimated to be $1,496,909, and options on the entire amount of acreage will have been accepted by the end of the fiscal year.

Project no.	Project	County	Total cost of project	Acreage to be purchased
LA-WI-2	Drummond	Sawyer and Bayfield	$118,485	8,809
LA-WI-3	Lakewood	Oconto, Langlade, and Forest.	118,810	8,790
LA-WI-4	Crandon	Vilas, Florence, and Forest.	105,099	9,850
LA-WI-5	Necedah	Juneau, Wood, Monroe, and Jackson.	441,324	94,256
LA-WI-6	Black River	Clark and Jackson	420,354	39,043
LI-WI-8	Bad River	Ashland and Iron	47,564	19,747
LI-WI-9	LacCourt Oreilles	Sawyer	32,884	16,508
LI-WI-11	Stockbridge	Shawano	77,431	13,950
LA-WI-12	Mill Bluff Park	Monroe	1,672	68
LO-WI-16	Camp McCoy	do	133,286	11,000

Of these land-acquisition projects, the following are being developed by the Resettlement Administration at this time for public uses. The amount of funds available for this work in your State is $535,252, and 1,921 relief and rehabilitation clients are at present employed on these projects.

Project no.	Project	Amount of money available	Number of men working May 1
LD-WI-5	Central Wisconsin Game Necedah	$185,952	706
LD-WI-6	Black River Game	216,000	680
LD-WI-12	Mill Bluff Park	6,300	15
LD-WI-16	Camp McCoy	127,000	520

The Resettlement Administration is planning eight rural-resettlement projects in the State of Wisconsin. It is now actively engaged in either purchasing land or in construction on three active projects to cost a total of $1,002,242. These active projects are being planned for 245 families and are:

Project no.	Project	County	Total estimated cost	Total number of units
FS-WI-13	Drummond	Taylor, Price, Sawyer, Mayfield, and Ashland.	$192,242	40
RR-WI-15	Lakewood-Crandon	Vilas, Oneida, Lincoln, Price, Forest, Oconto, Florence, Langlade, and Shawano.	470,000	125
RR-WI-23	Summit Farms	Langlade	340,000	80

The preceding figures do not include the suburban resettlement demonstration project being established at Milwaukee. Present plans call for the construction of homes for 750 low-income industrial and farm families who will have the benefit of modern utilities, community facilities, gardens, and recreational areas. Approximately 4,000 acres will be needed for the project, including

a "green belt" area, which may be used for farming and in addition insures the permanence of the community's natural advantages. The project area is so planned that it will be possible to increase the number of dwelling units. Over 3,000 acres have already been acquired, and as of May 1, 1936, 339 laborers were employed in connection with the topographical survey work being performed. At the peak of construction approximately 3,000 workers will receive employment on the project.

I trust that you will find this information of interest.

Sincerely yours,

R. G. TUGWELL, *Administrator.*

EXECUTIVE SESSION

Mr. ROBINSON. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGE REFERRED

The PRESIDING OFFICER (Mr. O'MAHONEY in the chair) laid before the Senate messages from the President of the United States submitting a nomination in the United States Public Health Service (and withdrawing a nomination), which was referred to the Committee on Finance.

(For nominations this day received and nomination withdrawn, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF A COMMITTEE

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

The PRESIDING OFFICER. The reports will be placed on the Executive Calendar.

If there be no further reports of committees, the clerk will state the nominations in order on the calendar.

POSTMASTERS

The legislative clerk proceeded to read sundry nominations of postmasters.

Mr. ROBINSON. I ask unanimous consent that nominations of postmasters on the calendar may be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the post-office nominations are confirmed en bloc.

That completes the calendar.

RECESS

The Senate resumed legislative session.

Mr. ROBINSON. I move that the Senate take a recess until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 4 o'clock and 52 minutes p. m.) the Senate took a recess until tomorrow, Wednesday, May 20, 1936, at 12 o'clock meridian.

NOMINATION

Executive nomination received by the Senate May 19 (legislative day of May 12), 1936

PUBLIC HEALTH SERVICE

Dr. Carroll E. Palmer to be passed assistant surgeon in the United States Public Health Service, to take effect from date of oath.

CONFIRMATIONS

Executive nominations confirmed by the Senate May 19 (legislative day of May 12), 1936

POSTMASTERS

CALIFORNIA

V. Betty Doheney, Hynes.

FLORIDA

Wendell V. Gilbert, Dade City.
Bess W. Rowell, Trenton.

MARYLAND

Cora E. Hopkins, Mardela Springs.
Maude Ringgold Toulson, Salisbury.

MASSACHUSETTS

James Leo Mack, Ashburnham.
Michael J. Moriarty, Bondsville.
Edwin C. Howe, Enfield.
John Robert Crowley, Monson.
Alfred J. Peloquin, Southbridge.
John J. Nolan, Spencer.
Thomas Leo McCarron, Taunton.
Lester J. Murphy, Wrentham.

NEW JERSEY

Edwin Douglas Hill, Andover.
Isaac E. Bowers, Groveville.
Charles W. Nolan, Union City.

OREGON

Percy Pope Caufield, Oregon City.

RHODE ISLAND

James J. Martin, Newport.
Antonio Prince, Woonsocket.

WITHDRAWAL

Executive nomination withdrawn from the Senate May 19 (legislative day of May 12), 1936

POSTMASTER

NEW MEXICO

Helen B. Hickman to be postmaster at Hurley, in the State of New Mexico.

HOUSE OF REPRESENTATIVES

TUESDAY, MAY 19, 1936

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O give thanks unto the Lord, all ye nations; praise Him all ye peoples; for His merciful kindness is great toward us and the truth of the Lord endureth forever.

Gracious Lord God, we believe that the most certain and permanent fact in all the universe is that Thou art our Father. Bless us today with a large sense of Thy presence, forgiveness, and care. We pray Thee that we may be granted that loftiness of nature, that stability of character, and repose of mind and heart that the spirit of the Eternal One may have expression in us. Through Jesus Christ Our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3486. An act to repeal the act entitled "An act relating to Philippine currency reserves on deposit in the United States."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9496) entitled "An act to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration."

The message also announced that the Senate insists upon its amendments to the bill (H. R. 11687) entitled "An act to amend the Federal Aid Highway Act, approved July 11, 1916, as amended and supplemented, and for other purposes", disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. McKellar, Mr. Hayden, and Mr. Frazier to be the conferees on the part of the Senate.

The message also announced that the Senate had adopted the following resolution:

Senate Resolution 300

Resolved, That the Senate has heard with profound sorrow the announcement of the death of Hon. WILLIAM D. THOMAS, late a Representative from the State of New York.

Resolved, That a committee of two Senators be appointed by the Vice President to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Resolved, That as a further mark of respect to the memory of the deceased Representative the Senate do now take a recess until 12 o'clock meridian tomorrow.

ORDER OF BUSINESS

Mr. BANKHEAD. Mr. Speaker, I ask unanimous consent that the three special orders of business for yesterday which we were not able to carry out may be made in order for today.

Mr. RICH. Mr. Speaker, reserving the right to object, can the gentleman from Alabama inform us when we are to take up the conference report on the Interior Department appropriation bill?

Mr. BANKHEAD. Mr. Speaker, I may state to the gentleman that I have already announced that we expect to take it up tomorrow.

Mr. RICH. How much time will the Members have to discuss the various items making up the $63,000,000 the Senate is asking be put on this bill and which ultimately will cost the country over $1,000,000,000?

Mr. BLANTON. The rules allow 1 hour.

Mr. RICH. That is not enough time to give to the consideration of expenditures which will ultimately reach $1,000,000,000.

Mr. BANKHEAD. Mr. Speaker, does the gentleman want to ask a question?

Mr. RICH. If we are to have only 1 hour's discussion of the conference report, it will not be enough.

Mr. BANKHEAD. Mr. Speaker, I may say to the gentleman from Pennsylvania that I recognize there is a good deal of controversy with reference to this bill, but I feel confident the gentleman from Colorado [Mr. TAYLOR], chairman of the subcommittee having the bill in charge, will be willing to allow a reasonable amount of debate before moving the previous question on the conference report.

Mr. RICH. Does the gentleman from Alabama think 1 hour is enough time in which to consider the spending of $1,000,000,000 of the taxpayers' money?

Mr. BANKHEAD. I may say to the gentleman from Pennsylvania probably that is not sufficient time, but it is not a matter within my discretion, because I am not acquainted with all the details included in the bill. I may say to the gentleman further that I am sure there will be no disposition to prevent adequate debate on the merits of the conference report.

Mr. RICH. We shall look forward with interest to seeing what the gentleman thinks is adequate time for debate.

The SPEAKER. The gentleman from Alabama asks unanimous consent that the three special orders for yesterday be made in order today. Is there objection?

There was no objection.

CALENDAR WEDNESDAY

Mr. BANKHEAD. Mr. Speaker, in order that we may take up the conference report to which the gentleman from Pennsylvania referred, I ask unanimous consent that business in order on Calendar Wednesday may be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

CONFERENCE REPORT—VETERANS' ADMINISTRATION

Mr. MEAD submitted a conference report on the bill (H. R. 9496) to protect the United States against loss in the delivery through the mails of checks in payment of benefits provided for by laws administered by the Veterans' Administration.

HUMAN RIGHTS COME FIRST UNDER NEW DEAL

Mr. WHITE. Mr. Speaker, I ask unanimous consent to revise and extend my remarks in the RECORD and to include therein a speech by the First Assistant Secretary of the Interior for which I have an estimate.

The SPEAKER. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. WHITE. Mr. Speaker, I ask unanimous consent to have printed in the RECORD a speech delivered by Hon. T. A. Walters, Assistant Secretary of the Interior, at the Democratic convention in Lewiston, Idaho, May 6, 1936, entitled "Human Rights Come First Under the New Deal."

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

[From the Lewiston (Idaho) Morning Tribune, May 7, 1936]

HUMAN RIGHTS COME FIRST UNDER NEW DEAL, ASSERTS T. A. WALTERS—ROOSEVELT TO SWEEP NATION AGAIN, AVERS DEMOCRATIC KEYNOTER—RECOVERY BELIES CARPERS—ASSISTANT SECRETARY OF INTERIOR FLAYS OLD GUARD CRITICS IN CONVENTION ADDRESS

(The text of the speech delivered before the Democratic State convention at the Temple Theater yesterday by T. A. Walters, First Assistant Secretary of the Interior, follows:)

Madam Chairman, delegates, ladies, and gentlemen, it is no formal expression forced by the arts of polite society when I say that it is a very real pleasure for me to be with you today. The honor and preferment is one that impels my deepest gratitude, and I take this, my earliest opportunity, to greet you with praise on my lips and grace in my heart. You are delegates at a time when the Democratic Party, both in the State and in the Nation, is making history that will be looked upon with pride and admiration by those who come after us. Our chosen leaders have not only felt and interpreted the demands of the masses, the average citizen, for a new, a better, a more humane, social, and economic structure, but have had the courage, in face of determined opposition, to propose and enact into law measures designed to make those demands a living fact.

About 4 years ago at Weiser—to be more exact, on the 10th day of June 1932—as chairman of the Democratic convention convened for the purpose of electing delegates to the Chicago convention, by resolution unanimously passed, I had the pleasure of sending a message to the Honorable James A. Farley advising him that the Democratic Party of Idaho, the second State in the Union so to do, had instructed its delegates to vote for Franklin Delano Roosevelt. Today I am privileged and more than honored in being requested to deliver to you and to the Democratic Party of Idaho expressions of gratitude, faith, and good will of our beloved President, Franklin Delano Roosevelt, and I may add with the utmost sincerity, the next President of the United States.

MANY CHANGES WROUGHT

A great many things political, social, and economic have happened since the Weiser convention. During the autumn of 1932 the Democratic Party united as never before behind its national and State leaders. We sent to the Senate of the United States the Hon. JAMES P. POPE, of Boise, who has, by ability and earnest application, become one of the most outstanding and respected of the younger Members of that distinguished body. He has the interest of Idaho at heart and is one of the Senate's most loyal and dependable supporters of the administration. For the first time in the history of our State we elected Democrats to the lower House of Congress—the Hon. COMPTON I. WHITE and the Hon. THOMAS C. COFFIN. The latter, to the sorrow and loss of Idaho and the Nation, has gone to that "undiscovered country from whose bourne no traveler ever returns." The second district elected to succeed him another young man of exceptional ability and integrity, the Hon. D. WORTH CLARK, who has already made his influence felt in the State and Nation. Our delegation in Congress—Senator POPE, Congressmen WHITE and CLARK—work as one man in the interest of Idaho and those measures advocated by the administration. Who of you but know of the untiring efforts of Congressman WHITE in the interest of the forgotten man? The mineral resources of the State, its agricultural wealth, and reclamation are his special concern. In gracious recognition of their work and loyalty the electorate of Idaho will, with an increased majority, at the November election return both of these men to Congress.

In the State of Idaho we have been fortunate in having in our chief executive leadership of the highest order. For business ability, for devotion to the pressing duties of public office, for a sense of humane values in Government, and for courage in putting progressive ideals into practice the State owes a debt of lasting gratitude to its devoted and respected Governor, C. Ben Ross.

ADMINISTRATION UNDER ATTACK

We are rapidly approaching another national campaign. Already the opposition is attacking the administration's program, its ideals and conception of the duties and functions of Government. The issues will be more clearly defined than in any Presidential election for the past quarter of a century. The opposition will be composed largely of those who belong to that school of thought who believe that the rules of government should be fixed, static, and not subject to change; that the social and economic structure should be made to conform to the rules laid down by dead hands. This group refuses to recognize the Democratic doctrine that the Government's concern with and for the welfare of its citizens has grown with our complicated, mechanized civilization of the twentieth century; that the greatest good to the greatest number should be the object of Government. We believe that the problems of

Government are not only to protect the lives and property of its people—important and essential as that is—but to bring them increased happiness, contentment, and security. A static government becomes stale, inefficient, and unresponsive to the needs of an intelligent and progressive people. The application of Government must ever be in gestation.

Our forefathers formed and fashioned a Government whose very end and purpose was the happiness and prosperity of those who brought it into existence. With a new philosophy of liberty they laid its foundation with stones quarried from the mountains of eternal truth. In the birth certificate they announced: "We hold these truths to be self-evident: That all men are created equal; that they are endowed by their Creator with certain unalienable rights; that among these are life, liberty, and the pursuit of happiness." And the man who made equality, liberty, and the pursuit of happiness mean something to 4,000,000 human beings was set upon as a radical, and defamed for contravening the Constitution.

AMERICA'S DEVELOPMENT

We spent a century, from the War of 1812 to the beginning of the World War of 1914, in exploiting the great natural resources of a continent so rich that we vainly imagined that they were inexhaustible. We felled the forest, broke with our plowshares the virgin sod of the Great Plains, tunneled the mountains for precious metals. We spanned the continent with ribs of steel and ran upon them fast-moving trains to carry the products of mine, forest, and farm to the consumer, or down to the sea where ships waited to carry them to the four corners of the earth. Free land on the frontier of the ever-present West helped to relax and relieve the stress of recurring depressions.

We developed our institutional life under a Constitution and a political system born of agricultural civilization where the interests of its citizens were similar and scattered along the Atlantic coast. Under these social, economic, and industrial conditions we defined liberty and established it as a controlling principle of our social and political organization and action.

With the close of the nineteenth century, the agricultural era of American civilization had largely passed away. Large-scale business, which had not entered into the picture at the time of the adoption of our political and social institutions, now dominated the commercial world. A large percentage of our population was no longer attached to the soil nor interested in it from the standpoint of making a home upon it or cultivating it as a livelihood. Tenements and apartment houses became numerous in the great centers of population. The habits and customs of our people were largely changed. Distance, as it had been known, was annihilated. Methods of communication had been transformed. Mass production dominated the industrial world.

Our entrance into the World War for a time stilled the surging demand for the application of new social, political, and industrial principles. A great patriotic wave swept the country, and all thought and effort was focused on the one purpose of winning the war. At the conclusion of the war, artificial means were used to stimulate industry in order that those who had offered themselves on behalf of the Government might be reabsorbed into the body politic. Individualism, in its largest meaning, had full sway. An old political order, entrenched at Washington, attempted in a fumbling fashion to administer a new social order. It could see only the past. Its leaders were unable to see that the economic situation was loaded with dynamite which might at any time explode. In the closing months of 1929 it exploded.

WHEN THE DEPRESSION HIT

Business of all kinds was prostrate. The great fundamental industry of agriculture was unable to sell its produce for a sum that would equal the cost of production. Transportation was operated at enormous loss. Banks failed on every hand. Many communities were left without a single bank. The savings of millions of our people were lost overnight. Unemployment increased, schools closed, wages were decreased. Poverty reigned where affluence existed but a few months before. We were challenged by the paradoxical situation of having so much wheat, so much flour, so much corn, so much meat that millions of our citizens were compelled to go hungry. We had so much wool, so much cotton, so much fabrics, that millions of children were under the necessity of having insufficient wearing apparel to protect them against the inclemency of the weather. We had so much lumber, so much cement, so much steel, so much building material, so many railroads and transportation facilities that human beings were compelled to live in places unfit for human habitation. A shuddering fear clinched the citizen of the street, and he stood and wondered. Many even went so far as to question the integrity of the Government itself.

With no pleasure do I recall conditions as they existed on March 4, 1933. Were it not for the fact that men's memories are short, I would not undertake to do so. You will recall that there had come into our national life an ever-expanding spirit of fear and distress. Whatever the cause, the blighting effect was appalling. Industries vied with each other in reducing personnel, in reducing wages and salaries, and in postponing every possible repair and maintenance. The army of unemployed increased with each rising sun. People were helpless and rapidly becoming hopeless. The Nation was on the verge of hysteria. Men distrusted each other and, worse yet, they distrusted their Government. There was little difference in the mental attitude of the merchant, banker, farmer, or the so-called captains of industry. The man who had money in the bank wanted to get it out before the crash came. The owner of property wanted to sell it for cash without regard to its intrinsic value before the expected cataclysm.

A Republican administration in Washington did nothing to relieve the situation other than to advise that "prosperity was just around the corner."

REVOLUTION OF 1932

In the fall of 1932 we had a revolution—a truly democratic revolution—one decided by ballots and not by bullets—which resulted in giving us a President, Franklin Delano Roosevelt. With a courage seldom equaled he boldly undertook the task of restoring the Nation to a healthy and normal condition. Hope had a new birth in the hearts of men and women. They realized that courage, strength, vigor, and determination reigned in high places. From threatening, disorganized, and discouraged crowds of men and women emerged a self-reliant, courageous and optimistic nation. Under his guidance, the National Recovery Act became a law. He said, "Our citizens shall not starve." Money was made available to provide food, shelter, and raiment for the needy, most of whom, through no fault of their own, could look nowhere for needed relief but to the Federal Government. For the first time in the history of our country, human life and welfare was placed above property rights. First things were put first. Humanity was placed above things. The hungry must be fed. Profits were made subservient to service. Public works of sound social and economic value were undertaken, a portion of the cost of which will be repaid. Under the Public Works Administration hardly a city or community but which has been bettered, made more beautiful, more sanitary, a better place in which to live. The welfare of the citizen has become the concern of a great government. Was this wrong in principle? Does the Government owe no debt to its citizens? As so aptly put by my aggressive and capable superior, Secretary Ickes, "Are we merely to endure a purgatorial existence in anticipation of a beatific eternity after the grave closes on us?"

Under the conditions which existed on March 4, 1933, was there no occasion for the New Deal? Was there no occasion for the Government to meet the new social and industrial conditions which were the natural outgrowth of a century of progress? A government sensitive to the demands and needs of the governed must, if it is to be efficient, be modified in its application to meet the demands of the present and measure up to the possibilities of the future. Many of the critics of the administration now contend that recovery would have come about without the New Deal. Some, who by virtue of their integrity and capacity to see and know, admit that conditions have greatly improved but allege that it is all in spite of rather than on account of the New Deal. I admire their honesty and their ability to see but I am utterly unable to follow their reasoning. The statement that recovery would have come about without the efforts of the present administration is a statement easily made but more difficult of proof. The fact is that the New Deal came and recovery is following it. We might answer them by saying, as did one of old when his faith was challenged, and he replied: "Once I was blind, but now I can see."

REPUBLICANS TARGET OF COURT

The opposition, big and little, is making a great noise over the fact that the Supreme Court held the National Recovery Act unconstitutional. By the volume and heat of their criticism one might be led to the erroneous conclusion that this is the only time the Supreme Court has held an act passed by Congress and signed by a President to be in excess of constitutional authority. It should be remembered that President Coolidge had seven acts bearing his signature declared invalid. President Harding also had seven, and President Hoover had three administration acts declared by the Supreme Court to be unconstitutional.

The National Recovery Act was in effect for 2 years and in that time gave such an impetus to business as to carry us well on the road to recovery, which was the aim and purpose of the Democratic Party when it came into power. In the 2 years the National Recovery Act functioned it put hundreds of thousands of men to work, abolished child labor, cleared industry of disgraceful sweatshops, and established a code of ethics in business and rules of fair competition that not only lifted us out of the depths of depression, but created such a favorable public opinion that much of its good will be continued. It brought labor and industry into a more friendly relationship and created a better understanding of the problems of each by the other. Whatever may have been the weakness of the National Recovery Act and whatever your attitude may have been or is now relative to its being constitutional or otherwise, do not let us forget for a moment that it was the expression of a new hope, a new confidence, a new enthusiasm. Our people were beginning to come out of their lethargy. They were divesting themselves of discouragement and once more were facing the future with a feeling of security and hope. It is easy to criticize after the event has happened and to point out what might have been or could have been avoided. Regardless of any other considerations, there is no doubt but what the National Recovery Act served a great purpose. At a time when courage and hope were necessary to supplant the darkness of despair the National Recovery Act made the star of hope again shine over the unrisen morrow.

We can be proud that the Democratic Party has, and is, seeking to place the welfare of the masses above the classes—the welfare of the average citizen above individuals or groups. It has concerned itself with human life above property rights. It has announced to the world that human rights must be safeguarded and

has enacted a program of social legislation which has never been surpassed in importance or beneficial effects. The Federal Social Security Act is the most comprehensive and effective piece of social legislation ever enacted by our Government. It is the beginning of a program which will in the end secure the honest unemployed against poverty or alms and will provide the dependent aged with the comforts of life.

CONDITIONS THEN AND NOW

In answer to those who seriously or otherwise contend that the New Deal has failed, or, to use their own stock phrase, "that it has not primed the pump", permit me to call your attention to a few facts and figures. Let us see what the financial and industrial conditions are now as compared to what they were in March 1933. Between January 1, 1933, and January 1, 1936, industrial production advanced 51 percent; steel production advanced 257 percent; auto registration advanced 326 percent. Do not overlook the stock market, which is generally regarded as a barometer of financial and industrial conditions. It is very sensitive to any changes which affect finance or industry in any of its various phases. Stocks listed on the exchange advanced 34 percent from March 1933 to January 1936. The value of listed stocks during the same period increased more than $20,000,000,000. Listed bonds, during the same period, advanced 22 percent. I might add for the benefit of our utility friends, who have been so worried over the effect of legislation affecting that industry, that during the same period of time power production increased about 20 percent.

Under the "old deal", during the 3 years preceding March 1933, the picture was very different. During that time cotton declined 61 percent; wheat, 59 percent; corn, 73 percent; industrial production, 44 percent; and power production (notice particularly power production) declined 9 percent. The fact is that during that period the only thing that increased was unemployment, poverty, want, and despair.

A very different picture appears before the eyes in the 3 years following March 4, 1933. Banks, insurance companies, and other financial institutions are stronger than ever. Their deposits have increased. They have gained in assets and earnings. And, above all, and more important than all, they again have the full confidence of the people. The average citizen with his earnings in the bank can now go to sleep at night without the shuddering fear that tomorrow his life's savings may be lost. Bank failures since that time have practically disappeared. Depositors in the few institutions, small and inconsequential as they were, that have failed, had their money within 24 hours after the closing notices were posted. What would the insurance of bank deposits have meant to the people of the State of Idaho or to the Nation when the banks closed their doors prior to March 4, 1933? The question answers itself.

Permit me to use a few more figures which tell more forcefully than words the story of recovery under the present national administration. In January 1933 the production of steel was 861,000 gross tons. Last month it was 3,300,000 gross tons. Of 32 important industrial corporations 22 reported deficits in 1932. Only two in 1935. The total profits of the 10 that showed returns in 1932 were $38,000,000 for that year; in 1935 for the same corporations the total profits were $887,000,000. One of our greatest automobile companies made a profit in 1932 of $165,000; in 1935 it increased that profit just one thousandfold, to $167,000,000. Another automobile company had a profit of $34,000,000 in 1935 as against a deficit of $11,000,000 in 1932. The combined profits of 2,010 companies showed earnings for the year 1935 of $2,541,000,000, or an increase of 42 percent over those of 1934. Business for the first 6 months of the present year gives every indication that substantial gains in profits and volume will be shown over a similar period of last year. Do these sound like business is not getting better? Who, in the face of these facts, but those who, having eyes see not, and having ears hear not, will seriously contend that the New Deal is not succeeding?

IDAHO VASTLY BENEFITED

How have the policies of the administration affected Idaho? You men who tunnel mountains and wash the sands of ancient streams to rescue gold and silver from their hiding places—do you get any more for your find than you did preceding 1933? Are the products of the forest of less value? What about the income of our greatest industry, agriculture? All you men who till the soil or tend the flocks need do to answer that question is to compare the price of hogs, wheat, sheep, and cattle in 1933 with 1936.

Let us see what our State has received from some of the Federal agencies created by the present administration. The figures show that Idaho has received in rentals and benefit payments for acreage reduction and rentals under the Agricultural Adjustment Act, which aims to free glutted markets and better prices, from May 12, 1933, to January 1, 1936, the total sum of $12,138,628.81. This sum is divided as follows:

Wheat	$8,646,676.48
Corn-hogs	1,578,092.27
Sugar	1,913,860.06
Total	12,138,628.81

Up to January 1, 1936, there were 52 civilian conservation camps in the State, with a total enrollment of 10,400 men, and $22,182,259 has been invested in the conservation and development of our forests and range resources. Great advancement has been made in fire protection, forest-stand improvement, development of grazing lands, erosion control, game and fish conservation, control of plant disease and the eradication of noxious weeds and pests. Through the conservation policies of the administration, made more effective by the persistent and intelligent attitude of Secretary Ickes, our country has been made soil conscious. We have been made to realize as never before that the future prosperity of our country depends largely upon the conservation of our natural resources of soil, forest, and plain by proper use and the restoration thereof.

The Farm Credit Administration, through its various agencies, made loans in the State amounting to $48,558,829 up to February 29 of this year. These loans have lifted from the backs of many of our farmers loads which they could not bear. It has given them a chance that they otherwise would not have had. It has given them a farm and a home that would otherwise have been lost.

The Federal Emergency Relief Administration expended funds, up to January 1, 1936, in the amount of $15,432,164. No small amount of these funds was used for the purchase of surplus crops bought to feed the destitute. This not only removed the crop and made it useful but also helped to remove an oversupply from the market which would otherwise have depressed farm prices.

The Home Owners' Loan Corporation, up to April 2 of this year, made 4,556 loans to distressed home owners amounting to the sum of $7,946,254. These loans, together with the interest, are secured by the properties involved. Consequently, the funds so used will be repaid. These, like the farm loans, have saved the homes and firesides of a great number or our most respected citizens.

In the stimulation of employment the Public Works Administration made loans on Federal projects amounting to $13,813,987.

R. F. C. BRINGS RELIEF

The Reconstruction Finance Corporation was in full swing and well equipped to aid the New Deal in an efficient fashion. Perhaps its most vital function has been the loans made to banks, both closed and solvent, first to free frozen deposits which recovered the savings of millions of people and, second, to increase the capital of open banks widening the channels of credit which will hasten recovery. The amount lent to railroads in our State cannot be accurately determined. Prior to the creation of the Federal Emergency Relief Administration the Reconstruction Finance Corporation lent money to the State to care for the needy. This and other loans will eventually be paid back. The entire amount of loans in Idaho up to September 30, 1935, exclusive of that loaned to railroads, amounts to $11,198,562.01.

An outstanding index toward recovery in the State of Idaho has been provided by the recent release by the Bureau of Internal Revenue showing the revenue collected for the fiscal year of 1933 compared with the same period in 1935. The total revenue collected for the year 1933 was $692,781.10, while in 1935 it was $1,870,265.61, or an increase of 171 percent.

The banks in the city of Lewiston, one of the largest cities in the State, are largely representative of the banks in other communities. The increase in deposits marks the progress of recovery in any community. The total deposits of the banks in Lewiston for the year 1935 is $6,601,844, an increase of $1,185,568 over the preceding year.

The work-relief legislation has, and is, dealing the most serious blow to the depression. Administered by the President with the assistance of able advisers, it is giving impetus to business and industry. The benefits of this program are reaching every city, town, and hamlet in the broad expanse of our country. It is reflected in increased retail sales. The American people trust the wisdom of our President. The program is being administered through him impartially and sympathetically. He is earnestly alive to what its proper administration will accomplish in the way of the return of normal economic and social life.

BILLIONS BE REPAID

The opponents of the administration complain of the amount of money that the Government is spending. The serious question is not the amount of money the Government is spending but what is being accomplished by it. Since March 4, 1933, through 1936, there has been an increase of the national debt of approximately $9,000,000,000. About 50 percent or $4,500,000,000, is merely loaned by the Government and will be returned with interest. Making the justified assumption that this $4,500,000,000 will be returned, the Government will have actually expended during the first 4 years of the Roosevelt administration $4,500,000,000 more than it has received. After all, $4,500,000,000 is a small sum for the wealthiest Nation on the face of the earth. During the World War we spent more than twice that amount to send men to possible death. I am among the number who feel that we should be more eager to spend money to assist men to live than to furnish them an opportunity to die.

Confidence in the President has not been shaken, either by carping critics or a loathsome whispering campaign. The President is bringing order out of chaos and contentment out of misery. Members of the Old Guard would have you believe that he is seeking to destroy the Constitution and establish a dictatorship. When the Congress approves his recommendations and enacts them into law that body is denominated a "rubber-stamp Congress." When it amends or refuses to follow the President's recommendations then the Old Guard shouts, "The administration is turned down. The President is losing his control over Congress." My dear friends, the Constitution still exists. The administration is making the Republic a better place in which to live, a place where those who toil may be more secure in age, a place where failure of employment will not mean charity. The Government is secure.

ELECTORATE NOT DECEIVED

The electorate of the Nation is not deceived. The strength of the administration is increasing every day. Registrations in western Pennsylvania show that it is Democratic for the first time since the Civil War. The eastern portion of the State is showing similar gains. There was an increase of 50 percent in Democratic registrations in the State of California. The recent primary in the State of Illinois showed beyond doubt that that State is overwhelmingly in favor of the President. The average man, he who constitutes the strength, power, and dignity of our Nation, has faith that the Government in Washington is being administered with him in mind. He knows that the White House is occupied by the most loyal friend the people have ever had. I believe that Idaho will not be found wanting at the November election and will, by an increased majority, assist in the reelection of Franklin Delano Roosevelt to the Presidency of the United States.

There is a Danish myth to the effect that at one time there lived in Denmark a king who, by reason of his skill and prowess and the quality of the soldiery which he had assembled, was able to overcome any nation which might throw down the gage of battle. The place of his burial was unknown. Centuries hence the then reigning king gathered around him the strong men of his kingdom and trained them in the arts of war. One day as they were digging a trench through a rock cliff, as they plunged their huge instruments of steel into the rock, to their great surprise, a voice came forth, saying, "Who are you that disturbs the ancient king of the Danes?" They replied, "We are Danes." The voice said, "Nay; you are not Danes. They would not disturb the rest of the ancient king of the Danes." Upon the soldiers reassuring the voice that they were Danes, the ancient king came forth from his resting place and inspected the soldiers. He looked with pride upon their huge physiques, strong arms and limbs, and bent their heavy bows. Whereupon he said, "Yea; you are Danes, and with the defense of Denmark in the keeping of such as you, Denmark is safe and the ancient king may lie down in peace forever."

So today, if the Father of his Country could come from his resting place at Mount Vernon and view the President of the United States, together with those who serve him in his Cabinet, he would say, "Yea; you are Americans, and with America in the keeping of such as you, America is safe and I may lie down in peace forever."

CITY OF BUFFALO, N. Y.

Mr. BEITER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 4317) to authorize the Secretary of War to grant to the city of Buffalo, N. Y., the right and privilege to occupy and use for sewage-disposal facilities part of the lands forming the pier and dikes of the Black Rock Harbor improvement at Buffalo, N. Y.

The SPEAKER. The Members will understand that this is being done with the indulgence of the three gentlemen who are entitled to recognition at this time under the special orders.

The gentleman from New York asks unanimous consent for the immediate consideration of a Senate bill which the Clerk will report.

The Clerk read the title of the bill.

Mr. SNELL. Mr. Speaker, reserving the right to object, as I understand from the gentleman from New York, this is a unanimous report and that there is no objection to it from any source.

Mr. BEITER. In addition, we have a favorable report from the War Department which I would like to include in the RECORD to complete the record.

Mr. DONDERO. Mr. Speaker, reserving the right to object, and I shall not object, is this the same as the bill which came before the Committee on Rivers and Harbors regarding the question of the disposal plant, and so forth?

Mr. BEITER. Yes; the bill as amended.

Mr. MEAD. Mr. Speaker, if the gentleman will yield, I may say that I have received a telegram endorsing this proposition which I would like to have inserted in the RECORD. I therefore ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York [Mr. MEAD]?

There was no objection.

Mr. MEAD. Mr. Speaker, I have received the following telegram from the commissioner of parks of the city of Buffalo, endorsing H. R. 11504:

Without any qualification I am in favor of Bird Island pier bill permitting city of Buffalo or Buffalo Sewer Authority to use the pier for treatment works site. Plans of authority provide amply for beautifying property. Only 40 percent will be occupied by buildings.

FRANK A. COON,
Commissioner of Parks, City of Buffalo.

In explanation of the bill before us, let me say that the city of Buffalo, in 1913, was granted by the United States and by the State of New York the right to use Bird Island for park purposes; this bill simply provides that this grant be extended to include its use for a sewage-disposal plant.

From the standpoint of intercepting sewers, Bird Island is the most logical spot in the city for the collection of sewage. It is directly opposite the new Michigan-Masten and Bird Avenue storm-water relief drain and is also the ideal location for the collection of sewage from the main interceptors which run along the entire river front.

If the city of Buffalo is permitted to use it, it will save several hundred thousand dollars, perhaps as much as three-quarters of a million, which should be required to purchase and put into shape any other suitable property. In addition, it will save the expense of carrying the large intercepting sewers coming from the south farther north, which would be the case if any other property was used.

So far as the collection of sewage, sedimentation, and chlorination is concerned, it has been definitely established by the engineers that, leaving out of consideration the land cost, Bird Island is the natural and economical location. The city would, therefore, save not only the cost of the land but also the cost of carrying the large intercepting sewer from the south to any other site, which must necessarily be north of Bird Island; there is nothing available south of it.

At two hearings on the subject much was said about the money which has already been spent by the city in preparing Bird Island for a park. As a matter of fact, not a dollar of that money will be wasted. No buildings have been built on it and no landscaping done. To date there has been built a retaining wall along the riverside and some grading, all of which would be necessary for our purposes, in any event.

It is also contended that this action might deprive the children of Buffalo of a playground. As a practical proposition it would take more money than Buffalo will probably have available for many years to come to develop the island into a park. The commissioner of parks at the first hearing estimated this amount to be over half a million. Two weeks later he gave a revised estimate of $75,000. Whether or not his opinion had changed is not known, but that amount certainly would not build a retaining wall across the north and easterly sides, which now open into the river and canal.

As a matter of fact, if the public enjoyed the island after the plant is finished, about 40 percent of the land area will not be used above the surface. Structures that are placed on it above the surface will not interfere with anyone who wishes to come out there. No criticism is directed toward those who for many years have endeavored to have the island developed into a park. It has become a matter of sentiment to them, but as a practical proposition it will not be developed by the city for many years, and if it is, it will not be practical. This site is exactly what is needed for the sewage disposal plant, and its acquisition will save Buffalo a great deal of money.

In view of the above, I hope there will be no objection to the bill.

The SPEAKER. Is there objection to the request of the gentleman from New York [Mr. BEITER]?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in addition to the grant made by the Secretary of War to the city of Buffalo pursuant to the act of Congress entitled "An act making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes", approved February 27, 1911, for the purpose of establishing a public park and landing facilities on that part of the structure known as Bird Island Pier on Niagara River lying north of Albany Street extended, in the city of Buffalo, N. Y., and forming a part of Black Rock Harbor improvement and the lands of the United States under water on both sides of said pier to the established harbor lines, subject to the terms, conditions, and stipulations in said grant specified, the Secretary of War is authorized to grant to the city of Buffalo, N. Y., also the right and privilege of occupying said lands and lands under water, and also the lands owned by the United States on the west side of Black Rock Canal, described as follows: Beginning at a point where the northerly line of property formerly owned by William H. Slade, or that line extended, intersects the United States Government property line (formerly New York State blue line); thence easterly

parallel to the line forming the northeasterly boundary of lands heretofore granted to the city of Buffalo by the United States and known as Bird Island Pier until a point is reached in direct prolongation of the easterly boundary line of said last-mentioned lands; thence southwesterly in direct line with said easterly boundary of said lands to the northeasterly corner of said lands heretofore conveyed to the city of Buffalo by the United States; thence westerly along the northeasterly boundary of said Bird Island Pier lands to said United States Government property line; thence northeasterly along said last-mentioned line to the place of beginning, or so much thereof as may be necessary, for use either by the city of Buffalo or by the Buffalo Sewer Authority (created by chapter 349 of the Laws of the State of New York of 1935) for sewage-disposal facilities, on such terms, conditions, and stipulations as he may deem expedient and equitable and necessary for the protection of all the interests of the United States in and to said premises: *Provided, however,* That the city of Buffalo shall have secured the sanction and consent of the State of New York through its constituted agencies.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill was laid on the table.

TITLE OF UNITED STATES TO THE BIRD ISLAND PIER AND THE LANDS ADJACENT THERETO, FORMING PART OF THE SHIP CANAL AT BUFFALO, N. Y.—SENATE BILL 4317

Mr. BEITER. Mr. Speaker, I ask unanimous consent to extend my own remarks at this point in the RECORD and to include therein a letter from the Secretary of War approving the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BEITER. Mr. Speaker, the so-called Black Rock Harbor was improved by private individuals as early as 1807. The first public work was by the State of New York under chapter 51 of the Laws of 1822 and chapter 99 of the Laws of 1923. The Bird Island Pier is a stone pier about 20 feet in width and was constructed by the State of New York under the above and subsequent legislative acts of the State. The improvement included the Bird Island Pier and a dam and lock downstream and was intended for the purpose of forming a harbor with water of a depth sufficient to accommodate boats drawing 8 feet of water. The pier was subsequently extended further up toward Lake Erie. This improvement was completed in about 1825. At various times prior to 1860 the Erie Canal was constructed and widened and improved and passes through Black Rock Harbor. A division wall was constructed separating the canal from Black Rock Harbor, and bridges were constructed across both the canal and Black Rock Harbor at Ferry Street to connect with the then existing and probable future ferries between the State of New York and the Dominion of Canada crossing Niagara River (see Annual Report of Thomas W. Symons, major, Corps of Engineers, U. S. Army, Appendix RR, Annual Report of the Chief of Engineers for 1901). The State of New York maintained the Black Rock Harbor and Erie Canal and continued to improve the same until the construction by the United States of a ship canal along the easterly shore of Niagara River and between Lake Erie and the lower Niagara River. The State of New York was the owner of the lands occupied by the Erie Canal, the Black Rock Harbor, the Bird Island Pier, and adjacent lands under the water of Niagara River.

Pursuant to chapter 373 of the Laws of 1904 of the State of New York, the State of New York, through its land board, conveyed to the United States the lands sought by the United States for the purpose of the construction of said ship canal. The act provided:

> The land board is authorized to convey to the United States such lands now owned by the State under the waters of Niagara River or in the vicinity of said river in the city of Buffalo, including such lands as are now used for canal purposes in the city of Buffalo and as may be deemed by the canal board as may be required by the United States in the construction of a ship canal from Lake Erie to the foot of Squaw Island in the city of Buffalo.

The land board of the State of New York authorized the conveyance and there was conveyed to the United States by letters patent dated July 25, 1905, and recorded in the office of the clerk of the county of Erie, State of New York, in liber 1018 of deeds, at page 315, January 11, 1906. The description in the deed is under paragraphs A, B, C, D, E, F.

> A. The structure known as Bird Island Pier with the strip of land owned by the State in continuation of the pier along the east shore of Squaw Island to the north end of said land near the present ship lock. (The then State ship lock was in the same location as the present United States ship lock.)
>
> B. The partition wall between the canal and Black Rock Harbor.
>
> C. All of the lands under Black Rock Harbor from the foot of Maryland Street extended to and including the then present ship lock, including also all of the lands owned by the State near the ship lock and within the limits of the proposed improvement (the United States ship canal).
>
> D. The lands under the water under the Erie Canal and the towpath from the foot of Vermont Street extended northerly to Amherst Street.
>
> E. The right-of-way across the city trunk sewer at the foot of Albany Street and over the city water intake at the city waterworks.
>
> F. The right-of-way across and through the site of the then present bridges over the Erie Canal and the Black Rock Harbor at the foot of Ferry Street.

The deed recites:

> Which lands are required by the United States in the construction of a ship canal from Lake Erie to the foot of Squaw Island.
>
> To have and to hold the said lands and structures unto the said United States of America so long as the United States constructs and maintains said ship canal.

Subsequently the United States took possession and did construct the ship canal and the same is now in operation.

The ship canal does not occupy any part of the lands occupied by the Bird Island Pier and only a part of the lands occupied by the Black Rock Harbor. The canal extends parallel to the shore line of the river and occupies the location of the old Erie Canal, leaving a considerable space between the ship canal and the Bird Island Pier. The Bird Island Pier is parallel with the shore line and with the ship canal and lies a considerable distance landward from the harbor line of Niagara River as fixed and established by the Secretary of War. The lands under water between the Bird Island Pier and the harbor line as so established were not conveyed to the United States.

The Bird Island Pier at the time of the conveyance in 1905 to the United States was in a most dilapidated condition, the cribbing had rotted away and the action of the water had broken down the pier. Citizens of the city of Buffalo were desirous of the formation of a park outside the ship canal and instituted the activity which finally resulted in the grant or permit to the city of Buffalo by the United States.

The State of New York by chapter 350 of the laws of 1911 consented to the use of the lands in question by the city of Buffalo, as follows:

> The consent of the State of New York is hereby given to the city of Buffalo to use, improve, and occupy, for the purposes of a public park and landing facilities, that part of the structure in said city known as Bird Island Pier, on Niagara River, lying north of Albany Street extended, and forming a part of the Black Rock Harbor improvement, and the lands and lands under water adjacent to said Bird Island Pier on both sides thereof to the established harbor lines.

Such grant to the city was by said act made subject to "such conditions, restrictions, and regulations as shall be prescribed for said city by the United States."

The Congress by act of February 27, 1911, being the rivers and harbors bill (vol. 36 of Statutes, p. 925, ch. 166, sec. 3, 61st Cong.) authorized the Secretary of War—

> To grant to the city of Buffalo, N. Y., the right and privilege of occupying and improving and using for the purpose of establishing a public park and landing facilities the part of the structure known as Bird Island Pier on Niagara River, lying north of Albany Street extended, in said city and forming part of the Black Rock Harbor improvement, and the lands of the United States under water along both sides of said pier to the established harbor lines, on such terms, conditions, and stipulations as he may deem expedient and equitable and necessary for the protection of all the interests of the United States in and to said premises.

Pursuant to said last act of Congress and pursuant to said act of the Legislature of the State of New York (chap. 350 of the laws of 1911), the Secretary of War granted to the city of Buffalo for the purposes mentioned in said acts the Bird Island Pier from Albany Street northerly to the

end thereof at Squaw Island and the lands under waters adjacent thereto to the harbor line established for the ship canal and the harbor line established for the Niagara River. Subsequently the city of Buffalo constructed a sea wall along the river side and a like wall along the ship canal side and has filled in the lands between the two walls. The lands occupied by the city are largely on the river side of the Bird Island Pier.

The bill now before Congress provides for the consent of the United States to an additional use of the lands covered by the prior grant to the city of Buffalo for sewage disposal purposes. There is also included an additional strip of land lying along the westerly line of the ship canal, and largely adjacent to lands owned by the city of Buffalo north of the Bird Island Pier, which is now unused for any purpose and which we anticipate that in the opinion of the Secretary of War that land also may be included. The bill is in practically the same language as the act of Congress above referred to of 1911, and the grant or permit, if made, will be made subject to such conditions as the Secretary of War may wish to insert for the protection of the properties of the United States.

WAR DEPARTMENT,
Washington, May 7, 1936.

Hon. J. J. MANSFIELD,
Chairman, Committee on Rivers and Harbors,
House of Representatives, Washington, D. C.

DEAR MR. MANSFIELD: Reference is made to this Department's report of April 13, 1936, on H. R. 11504, Seventy-fourth Congress, second session, entitled "A bill to authorize the Secretary of War to grant to the city of Buffalo, N. Y., the right and privilege to occupy and use for sewage-disposal facilities parts of the land forming the pier and dikes of the Black Rock Harbor improvement at Buffalo, N. Y."

That report recommended an amendment of the description and expressed the opinion that the bill merits the favorable consideration of Congress, if amended as indicated.

Congressman BEITER and representatives of the city of Buffalo recently called at this office and indicated that they desire to further amend the description of land as set forth in the bill so as to reduce the additional area of land to be occupied. A copy of the bill amended to conform to their expressed desire is herewith.

The Department is of the opinion that the bill merits the favorable consideration of Congress, if amended as indicated in red on the copy hereto attached.

The Director of the Bureau of the Budget has been consulted and states that the above report is not in conflict with the financial program of the President.

Sincerely yours,

HARRY H. WOODRING,
Acting Secretary of War.

PERMISSION TO ADDRESS THE HOUSE

Mr. DIMOND. Mr. Speaker, I ask unanimous consent that on Thursday of this week after the reading of the Journal and disposition of matters on the Speaker's table, I may be permitted to address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Alaska?

Mr. PATMAN. Mr. Speaker, reserving the right to object, did I understand the gentleman to ask unanimous consent to address the House for 30 minutes?

The SPEAKER. No; his request was for 15 minutes.

Mr. PATMAN. Mr. Speaker, I shall not object to this request, but I am inclined to object to any future requests to address the House at that time. I think there is some legislation coming up for the consideration of the House at that time, and I should not like to have anything interfere with its consideration.

Mr. SNELL. Mr. Speaker, reserving the right to object, what is the legislation that is coming up on Thursday that is so important? The House has not been informed as yet.

Mr. PATMAN. I am not sure about it, but it concerns a bill I am very much interested in, and I do not want anything to get in ahead of it if I can avoid it.

Mr. SNELL. The gentleman from New York [Mr. REED] desires to submit a unanimous-consent request to address the House for a few minutes at that time.

The SPEAKER. Is there objection to the request of the gentleman from Alaska?

There was no objection.

Mr. REED of New York. Mr. Speaker, I ask unanimous consent that on Thursday next, after the reading of the Journal, the disposition of matters on the Speaker's table, and the pending special order, I may be permitted to address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

Mr. O'CONNOR. Mr. Speaker, reserving the right to object, may I say that it is getting rather late in the session for these speeches. We are going to have a tremendous amount of work to do. Two rules have been reported, one of which if taken up on Thursday will take all day. It is an important matter. It is rarely requested at this stage of the session to address the House. We have reached a point where somebody will have to object very soon if we want to complete the business we have to do before we adjourn on the 18th of July.

Mr. SNELL. Mr. Speaker, that matter was just as important 2 minutes ago when the gentleman from Alaska asked for time as now. I especially request that the gentleman from New York may be allowed to address the House.

Mr. O'CONNOR. Mr. Speaker, I do not intend to object to the request of the gentleman from New York [Mr. REED].

The SPEAKER. Is there objection to the request of the gentleman from New York [Mr. REED]?

There was no objection.

FRAZIER-LEMKE MORATORIUM CONSTITUTIONAL

Mr. LEMKE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include therein a decision of the Fifth Circuit Court of Appeals sustaining the constitutionality of the farm moratorium.

The SPEAKER. Is there objection to the request of the gentleman from North Dakota?

Mr. RICH. Mr. Speaker, reserving the right to object, may I inquire how much of the RECORD this will take?

Mr. LEMKE. Less than a column.

The SPEAKER. Is there objection to the request of the gentleman from North Dakota [Mr. LEMKE]?

There was no objection.

Mr. LEMKE. Mr. Speaker, since some 14,000 farm families have been forced to take advantage of the Frazier-Lemke farm moratorium law, which was passed in the closing days of last session of Congress, and since the question of constitutionality has been raised, it gives me great pleasure to insert here a decision by Presiding Judge Hutcheson, of the Circuit Court of Appeals, Fifth Circuit. This decision appears on page 5 of the May 12 United States Law Week. You will note that the Dallas Joint Stock Land Bank is the plaintiff. This and other joint-stock land banks that are now in the process of liquidation have ruthlessly foreclosed and evicted from their homes hundreds and thousands of men, women, and children.

FRAZIER-LEMKE ACT OF 1935—CONSTITUTIONALITY

Frazier-Lemke Act of 1935 constitutes bankruptcy legislation within meaning of bankruptcy clause. Depriving mortgagee of right to collect debt by State court foreclosure, it does not take his property without due process of law in violation of fifth amendement.

C. C. A., FIFTH CIRCUIT (HUTCHESON, C. J.), DALLAS JOINT-STOCK LAND BANK OF DALLAS *v.* DAVIS, NO. 7966, MAY 5, 1936

(Digest-summary of the opinion)

The Frazier-Lemke Act of 1935 (sub. (s) of sec. 75 of the Bankruptcy Act) is not unconstitutional on the ground that it is not bankruptcy legislation within the meaning of the bankruptcy clause of the Federal Constitution.

"The authority of Congress to make uniform laws on the subject of bankruptcy is a broad one. It extends to and authorizes not merely ordinary bankruptcy laws, as they were understood and in existence at the time of the adoption of the Constitution, but insolvency laws in general. It extends to and authorizes all just laws having for their object the liquidation of indebtedness. It lawfully embraces in its scope and purpose not only the just protection of the creditor but the relief of the debtor. (*Louisville Bank* v. *Radford*, 295 U. S. 555; *In re Landquist*, 70 F. (2d) 729; *In re Chicago R. I. & Pac.*, 72 F. (2d) 443; *Local Loan Co.* v. *Hunt*, 292 U. S. 234; *Continental Bank* v. *C. R. I. & P.*, 294 U. S. 648; *Van Huffel* v. *Harkelrode*, 284 U. S. 225; *Hanover National Bank* v. *Motses*, 186 U. S. 181)."

In the exercise of its bankruptcy powers, Congress has lawfully provided for the complete abrogation of the personal obligation of debts, discharging the debtor therefrom; for the making of compositions; and for the marshalling of property of debtors and for the equitable distribution thereof among the secured creditors, to the extent even of authorizing a complete rearrangement and rewriting of the obligations. In the exercise of such powers, Congress may, also, make just provision for the exercise of judicial discretion in granting reasonable stays of liquidations in bankruptcy.

The act, insofar as it prevents a mortgagee from collecting its debt by State court foreclosure proceedings and provides for its collection through the bankruptcy court, does not deprive the mortgagee of substantial property rights in violation of the due process clause of the fifth amendment.

The defects in the original Frazier-Lemke Act pointed out by the Supreme Court of the United States in the *Radford case* (295 U. S. 555) were cured by the 1935 act. The new act was written so as to conform to the decision in the Radford case.

"On its face the act merely transfers the liquidation of the indebtedness from State courts to the court of bankruptcy. It remits to the judicial discretion of that court the administration of the property of a bankrupt, with the end in view to bring about, if a due regard for the property rights and interests of his creditors permits it, a gradual and therefore more just and equitable liquidation, in lieu of an unduly hasty and forced one."

The act authorizes a stay of collection for the maximum period of 3 years, during which time the debtor may remain in possession, "but the stay so granted is not an absolute one. It is one granted and continued in the judicial discretion of the court if, and only if, this may be done without deprivation of or injury to, and upon conditions looking to the preservation of, the creditor's security.

"Under its provisions the court must fix, and require the debtor to pay, a reasonable rental on the property, to be applied upon the debt"; and "may, and if in the exercise of a sound discretion the protection and preservation of the security demand it, must require additional payments on the principal sum due and owing"; and "may, upon a finding that the preservation of the security requires it, revoke the stay order and direct the sale of this property."

"These provisions of the act make it clear, we think, that the act grants no absolute stay, permits no arbitrary or unjust interference with creditors. It merely remits all questions regarding the collection of the debt to an informed judicial discretion, a discretion which, keeping the preservation of the security paramount, may yet, if circumstances permit, afford a means of relief to the debtor. They make it clear that the controlling, the dominant purpose and effect of the act as amended is not to deprive creditors of their security to give it to debtors, but to remit to judicial discretion in each case, whether the facts justify giving the debtor an equitable opportunity in an orderly way, to liquidate his indebtedness, provided always that the essential security of the creditor is not impaired but preserved. A law on the subject of bankruptcy having this purpose and effect is not, in our judgment, violative of the fifth amendment."

Affirmance of the order of the district court retaining jurisdiction of the proceeding under the act "is without prejudice to right of the appellant (mortgagee) to apply at any further stage of the proceedings for relief from actions or orders which it is advised have the effect of depriving it of any substantial rights."

In addition to the above, the following United States district courts have also held the Frazier-Lemke Moratorium Act constitutional:

In re Slaughter, northern district of Texas, October 12, 1935, Atwell, district judge.

In re Williams, middle district of Tennessee, November 1, 1935, Gore, district judge.

In re Reichert, western district of Kentucky, January 9, 1936, Hamilton, district judge.

In re Cole, southern district of Ohio, January 22, 1936, Nevin, district judge.

In re Bennett, western district of Missouri, January 24, 1936, Otis, district judge.

In re Allison, eastern district of Illinois, February 25, 1936, Wham, district judge.

In re McCune, western district of Pennsylvania, February 24, 1936, Schoonmaker, district judge.

There also have been some United States district courts and one United States circuit court that have held the act unconstitutional. The reasoning of some of these courts is so shallow and superficial that I feel they are not worthy of serious consideration. The circuit court of appeals just referred to held that section 77B of the Bankruptcy Act was constitutional and that the right to redeem was a property right. It took the property out of the hands of the receiver and placed it in the hands of the trustee in bankruptcy. A few months later that same court held that the Frazier-Lemke Act was unconstitutional for the reason that the right to redeem was not a property right. Therefore, it held the act took property without the due process of law. No wonder that some of the district courts in that circuit refuse to follow such an erroneous decision and have held the Frazier-Lemke Act constitutional.

I feel confident that the Supreme Court of the United States will hold the Frazier-Lemke moratorium constitutional and that these erroneous opinions of these creditor and corporation-minded courts will be corrected. I find no fault with our courts, but I maintain that a lawyer who is afraid to criticize an erroneous decision is a moral coward.

Our judges are human. They possess no divine wisdom and are not infallible and the way to improve the standard of our courts is to honestly and fearlessly criticize erroneous decisions. This Government does not belong to the courts, nor to Congress, nor to the President, but to the people. Public opinion alone will correct abuses, whether they exist in the judicial, legislative, or executive branches of the Government.

TOLL BRIDGE ACROSS MISSOURI RIVER AT OMAHA, NEBR.

Mr. McLAUGHLIN. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 12056) authorizing the State of Iowa, acting through its State highway commission, and the State of Nebraska, acting through its department of roads and irrigation, to construct, maintain, and operate a free or toll bridge across the Missouri River at or near Dodge Street in the city of Omaha, Nebr.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the immediate consideration of the bill?

Mr. SNELL. Mr. Speaker, reserving the right to object, the gentleman just informed me this is an emergency proposition and has been unanimously reported. We are further informed that there is no objection to this bridge being constructed, therefore we have no objection.

The SPEAKER. Is there objection to the immediate consideration of the bill?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in order to promote interstate commerce, improve the postal service, and provide for military and other purposes, the State of Iowa, acting through its State highway commission, and the State of Nebraska, acting through its department of roads and irrigation, are hereby authorized to construct, maintain, and operate a bridge and approaches thereto across the Missouri River, at a point suitable to the interest of navigation, at or near the east end of Dodge Street, in the city of Omaha, Nebr., in accordance with the provisions of the act entitled "An act to regulate the construction of bridges over navigable waters", approved March 23, 1906, and subject to the conditions and limitations contained in this act.

SEC. 2. There is hereby conferred upon the said States all such rights and powers to enter upon lands and to acquire, condemn, occupy, possess, and use real estate and other property needed for the location, construction, maintenance, and operation of such bridge and its approaches, as are possessed by railroad corporations for railroad purposes or by bridge corporations for bridge purposes in the State in which such real estate or other property is situated, upon making just compensation therefor, to be ascertained and paid according to the laws of such State, and the proceedings therefor shall be the same as in the condemnation or expropriation of property for public purposes in such State.

SEC. 3. The said States are hereby authorized to operate such bridge free of tolls, or, at their discretion, to fix and charge tolls for transit over such bridge, and in case rates of toll are so fixed, such rates shall be the legal rates until changed by the Secretary of War under the authority contained in the act of March 23, 1906.

SEC. 4. If tolls are charged for the use of such bridge, the rates of toll shall be so adjusted as to provide a fund sufficient to liquidate, within a period of not to exceed 10 years from the date of completion of such bridge, all or any part of the bonds held by the United States and outstanding against the bridge constructed in accordance with section 4 of the act entitled "An act to authorize the construction of certain bridges and to extend the times for commencing and completing the construction of other bridges over the navigable waters of the United States", approved June 10, 1930. The said States may enter into an agreement or agreements with the United States or other interested parties for the liquidation of all or any part of such bonds held by the United States and the tolls authorized to be charged by this act shall be used only for the purpose of carrying out the provisions of any such agreement or agreements. When a fund sufficient to meet the requirements of any such agreement or agreements shall have been

provided, the bridge authorized to be constructed by this act shall thereafter be maintained and operated free of tolls. Said States may construct such bridge with the aid of any Federal funds appropriated and apportioned to said States for expenditure under the Federal Highway Act, as amended and supplemented, and the limitations of such act, as amended and supplemented, relating to the construction of toll bridges with Federal funds and the use of tolls collected for transit over bridges so constructed and operated shall not be applicable to the tolls authorized to be charged under the provisions of this act. If tolls are charged, an accurate record of the cost of the bridge and its approaches, the expenditures for maintaining, repairing, and operating the same, and of the daily tolls collected shall be kept and shall be available for the information of all persons interested.

SEC. 5. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

INSTITUTION OF SUIT AGAINST NORTHERN PACIFIC RAILWAY CO. ET AL.

Mr. DUFFY of New York. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 4594) to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. et al.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the immediate consideration of the bill?

Mr. MICHENER. Mr. Speaker, reserving the right to object, as I understand it, this bill has been unanimously reported by the Judiciary Committee, and I understand further that a Senate bill has been passed by the Senate and is now on the Speaker's table.

Mr. DUFFY of New York. That is correct.

Mr. MICHENER. The gentleman simply desires passage of the Senate bill?

Mr. DUFFY of New York. The gentleman is correct.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That in the suit entitled United States of America, plaintiff, against Northern Pacific Railway Co. et al., defendants, no. E-4389, instituted and pending in the District Court of the United States for the Eastern District of Washington, under the authority and direction of the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), now on reference to a special master for hearing under an order of said court entered in said suit on April 21, 1936, a direct review by the Supreme Court of the United States by appeal may be had by any party to said suit of any order or decree of said district court entered upon a review of the report of the master to be made pursuant to said order of April 21, 1936, and also of the order or decree of said district court entered in said suit on October 3, 1935, as amended by an order of January 29, 1936. Such direct review by the Supreme Court of either or both of the said orders or decrees may be had by appeal taken within 60 days from the date of the order or decree of the district court entered upon a review of the report of the master to be made pursuant to the said order of April 21, 1936. The right of review of any final judgment authorized by said act of June 25, 1929, shall continue in force and effect.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill was laid on the table.

SEVENTY-FIFTH ANNIVERSARY OF THE BATTLE OF ANTIETAM

Mr. LEWIS of Maryland. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 12168) to authorize the coinage of 50-cent pieces in commemoration of the seventy-fifth anniversary of the Battle of Antietam.

The Clerk read the title of the bill.

Mr. SNELL. Mr. Speaker, reserving the right to object, a great many times, on the floor, I have expressed my opposition to bills of this character. I think it is a mistake that we have put through a great many of them during the present session, and I am not going to object to the request of my friend from Maryland, although I object to the entire policy we have adopted in this respect during the present session.

Mr. RICH. Mr. Speaker, reserving the right to object, I may say that there have been 15 or 20 bills similar to this passed at this session of the Congress. I do not know whether this is the Democrats' way of starting inflation or not, but we are certainly doing this to the queen's taste, and I think it ought to be stopped very shortly.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in commemoration of the seventy-fifth anniversary of the Battle of Antietam there shall be coined at a mint of the United States to be designated by the Director of the Mint not to exceed 5,000 silver 50-cent pieces of standard size, weight, and composition and of a special appropriate single design to be fixed by the Director of the Mint, with the approval of the Secretary of the Treasury, but the United States shall not be subject to the expense of making the necessary dies and other preparations for this coinage.

SEC. 2. The coins herein authorized shall bear the date 1937, irrespective of the year in which they are minted or issued, shall be legal tender in any payment to the amount of their face value, and shall be issued only upon the request of the Washington County Historical Society of Hagerstown, Md., upon payment by it of the par value of such coins, but not less than five thousand such coins shall be issued to it at any one time, and no such coins shall be issued after the expiration of 1 year after the date of enactment of this act. Such coins may be disposed of at par or at a premium by such Washington County Historical Society of Hagerstown, Md., and the net proceeds shall be used by it in defraying the expenses incidental and appropriate to the commemoration of such event.

SEC. 3. All laws now in force relating to the subsidiary silver coins of the United States and the coining or striking of the same, regulating and guarding the process of coinage, providing for the purchase of material, and for the transportation, distribution, and redemption of coins, for the prevention of debasement or counterfeiting, for the security of the coins, or for any other purposes, whether such laws are penal or otherwise, shall, so far as applicable, apply to the coinage herein authorized.

With the following committee amendments:

Page 1, line 6, strike out "to exceed five" and insert "less than twenty-five."

Page 2, line 9, strike out the word "five" and insert "twenty-five."

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

KEEPING FAITH WITH UNITED STATES

Mr. IGLESIAS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on Puerto Rico.

The SPEAKER. Is there objection to the request of the gentleman from Puerto Rico?

There was no objection.

Mr. IGLESIAS. Mr. Speaker, when the United States Army landed in Puerto Rico, July 28, 1898, to further the "cause of liberty, justice, and humanity", and "bearing the banner of freedom", in accordance with Maj Gen. Nelson A. Miles' proclamation, the island was converted into a part of the United States, and the monarchic and military autocratic government of Spain was ended.

The people of Puerto Rico received the American Army with open arms and cordial public receptions.

After the signing and ratification of the Treaty of Paris, President McKinley declared:

The people of Puerto Rico should be led and educated to become a State of the Union.

On April 12, 1900, Congress approved the Foraker Act, establishing a civil government for Puerto Rico. In the year 1906 President Theodore Roosevelt sent special messages to Congress specifically recommending American citizenship to the people of Puerto Rico, as a matter of right and justice. "They are loyal", he said, "and they are glad to be under our flag."

President Theodore Roosevelt went to Puerto Rico, and delegations representing agriculture, commerce, and industry met him. It was at this time that the Federation of Labor requested citizenship for the people of Puerto Rico, and handed him the following memorial:

Free Federation of Workingmen of Puerto Rico—Affiliated with the American Federation of Labor

Hon. THEODORE ROOSEVELT,
President of the United States,
San Juan, P. R.

ILLUSTRIOUS CITIZEN: The laboring class of Puerto Rico, represented by the "Federacion Libre", the branch of the American Federation of Labor in this island, desires to extend to you through this petition its heartiest and most cordial welcome to our shores, and the assurance of our love for the American people, of whom you are the honored and worthy representative.

The aims and purpose of our organization are the same as those of the trades unions of the United States. We are loyal and faithful adjunct of the American Federation of Labor, and our education, our efforts, and our ambitions are directed toward obtaining a higher moral, intellectual, and civic standard for the working class and the people of Puerto Rico in general.

With this object in view and as a means of its attainment, all the aspirations of our people, the strongest desire and longing of our hearts is that we may be made citizens of the United States in the highest and truest sense and interpretation of the term.

And though recognizing that our needs are more of an industrial than political nature, the laboring class and the people of Puerto Rico in general feel convinced that with the establishment of self-government in its truest significance that all would enjoy to its fullest extent the liberty and blessings of freedom symbolized by the Stars and Stripes.

Our dearest and fondest aspirations are these: Citizenship and self-government.

And while this legitimate request of the Puerto Rican people is being considered by the Government wisely directed by you, we beg that you will use your influence and good offices to impress upon the officials in Puerto Rico the opinion which has invariably been your guide when speaking of trade unions. In other words, that such unions are necessary to proper industrial development, to the progress of a country, and that the aid and approval given to labor institutions by all citizens is a demonstration of the love and affection felt for the advancement and growth of a people.

Anything you may do for us, honored sir, will forever be engraved on the heart and be cherished in the memory of this country, and on all occasions the laboring class of Puerto Rico will have an additional reason for congratulating itself on the outlook for the future, because its interests are safeguarded by the rulers of the American Nation.

And we ask you to tell the American people that their institutions are loved and wished for in Puerto Rico.

You, Mr. President, can always count on our sincere affection, and may God grant you a safe and happy return to your native shores and an eternal memory of this true and loyal island.

Respectfully,

EUGENIO SANCHEZ LOPEZ, *President.*
MANUEL ALDEA NAZARIO, *Secretary.*
RAFAEL ALONSO, *Organizer.*
MIGUEL SANCHEZ GOYTIA, *Organizer.*
JOSÉ VENTURA, *Organizer.*
JUAN GUERRA, *Treasurer.*

SAN JUAN, P. R., *November 21, 1906.*

In his annual message President Theodore Roosevelt made the following recommendations:

I earnestly advocate the adoption of legislation which will explicitly confer American citizenship on all citizens of Puerto Rico. There is, in my judgment, no excuse for failure to do this.

And under date of March 26, 1906, in the following letter, President Roosevelt manifested his deep interest in the subject and at the same time called attention in a forceful way to the injustice and embarrassment involved in the continuance of that status:

THE WHITE HOUSE,
Washington, March 26, 1906.

MY DEAR SENATOR FORAKER: As you know, Mr. Airrinaga had been appointed as one of the American delegates to the Pan American Congress at Brazil. It would be a real misfortune not to have the citizenship bill for Puerto Rico pass at this session prior to his going there. I cannot believe there will be an opposition to the bill, and I most earnestly hope that it will be put through as speedily as possible. I know how heartily you sympathize with it.

THEODORE ROOSEVELT.

In 1912 I wrote the following letter to President Taft:

WASHINGTON, D. C., *April 5, 1912.*

MR. PRESIDENT: As a representative of organized labor of Puerto Rico I have come to the United States to assist, insofar as I am able, in obtaining the passage of the bill now pending in the United States Senate providing American citizenship for Puerto Ricans.

While this is desired by all Puerto Ricans, it is especially desired by the laboring people, who feel that American citizenship will mean a great step forward for them, because, unless the American citizenship and the spirit that guides the American in such matters are extended to the islands, the laborers must continue with but little hope of uplift.

I have collected, with a view of having it printed, the various recommendations in Presidential messages and in reports of the Secretary of War and of the Governor of Puerto Rico, favoring the granting of American citizenship to Puerto Ricans. I have been unable to find in your message or elsewhere a statement specifically favoring the granting of American citizenship, though I understand fully that you have approved such recommendations of the Secretaries of War. May I ask, Mr. President, that you say a word specifically approving such legislation, that I may place it as a foreword in the little pamphlet.

Thanking you, with much respect, I am,

SANTIAGO IGLESIAS,
President of the Free Federation of Workingmen of Puerto Rico.

To this letter came the reply as follows:

THE WHITE HOUSE,
Washington, April 15, 1912.

SANTIAGO IGLESIAS, Esq.,
President of the Free Federation of the Workingmen of Puerto Rico,
Washington, D. C.

MY DEAR MR. IGLESIAS: I am in favor of granting citizenship to the people of Puerto Rico. The connection between Puerto Rico and the United States has been, from the beginning, regarded as permanent. Puerto Rico came to us with the hearty good will of both the American and Puerto Rican people, and I believe that both, as a matter of sentiment and practical justice, the Puerto Ricans should be made citizens. At the same time I believe that our duty to the island will be best discharged, and Puerto Rico's interests will be best subserved, by affording the largest opportunity for the development of local traditions and habits, which are very different from our own.

This means that as fast as the instinct and habit of self-government is acquired by the people at large, and no faster, the fullest possible measure of local and fiscal self-government should be granted. It is a happy sign of the realization of what should be the most fitting political aspiration of the island, as well as a recognition of the public opinion of the United States, that in the minds of neither people is the grant of citizenship associated with any thought of statehood.

Very truly yours, WM. H. TAFT.

The Committee on Insular Affairs, in House Report 341, Sixty-second Congress, stated that the bill was to definitely fix the civil and political status of the people of Puerto Rico, and at the same time to make those at present defined to be citizens of Puerto Rico and certain other natives citizens of the United States. The report adds:

It has long been a conceded fact that Puerto Rico has become a permanent territory of the United States. Its people have accepted this fact in good faith and have never sought, nor do they desire, a separate and independent political existence. Their loyalty to the United States under all circumstances has never been questioned.

What they most desire, and what they have long and earnestly endeavored to secure, is American citizenship, accompanied with the right to legislate for themselves in respect to all purely local affairs.

The Secretary of War, in his 1911 report, urged Congress to grant American citizenship to the people of Puerto Rico and, in part, said:

The demand for American citizenship on the part of the Puerto Rican people is genuine and well-nigh universal. * * * The connection between Puerto Rico and the United States is permanent and has been from the beginning regarded as permanent. * * *

A joint resolution was passed by the Legislative Assembly of Puerto Rico to commend the recommendations made to Congress by President Theodore Roosevelt. Besides, many labor and other associations and the majority of political parties of the island adopted resolutions time and again requesting the Presidents and Congress to grant American citizenship to the Puerto Rican people.

Secretaries of War from Stimson, Baker, Governors Winthorpe, Colton to Yeager, recommended the American citizenship for the people of Puerto Rico. Samuel Gompers, former president of the American Federation of Labor, urged self-government and citizenship for our people.

March 5, 1912, one of my predecessors, Resident Commissioner Luis Muñoz Rivera, founder of the Liberal and Unionist Parties of Puerto Rico, delivered a speech in the House of Representatives, in which he stated:

I must declare that the majority, the large majority, of Puerto Ricans are sincerely attached to the American Nation. And I must also declare that, should American citizenship be bestowed upon them, my countrymen will always feel grateful to the American Representatives who, through their action, would give them a proof of confidence in their loyalty, and that they would enthusiastically, bravely, and proudly uphold their citizenship, identifying themselves with the new country to which their historic destiny has united them, loving and respecting the flag that protects their homes, doing honor by their civic conduct to the national family that receives them, and finally endeavoring to be the worthy sons of the America of Washington and Lincoln, not only because so impelled by the natural feelings of their souls, jaded and mortified up to the present time by indifference and injustice.

Samuel Gompers, while president of the American Federation of Labor, made these remarkable recommendations to various conventions:

It is certainly evident that Puerto Rico is to be a permanent possession of the United States; and, inasmuch as her wage earners

manifest a strong disposition not only to organize but to make common cause with us for the principles and progress of our cause, we should encourage and make easy their complete fraternization with the organized labor movement of our continent.

The people of Puerto Rico are intensely sympathetic with the institutions of our Republic and universally desire the recognition of the principles of equality with the sovereign citizenship of the United States. These rights they are eminently qualified to exercise; these rights they are entitled to, and it should be our aim to aid in achieving them.

I strongly urge that every effort be made, not only by this convention but also by every union, union member, and sympathizer, to help to the very best of his ability the worthy working people of Puerto Rico to a realization of a better and brighter day.

Senators, Congressmen, and governmental authorities have agreed that Puerto Rico be and is a permanent territory of the United States, and all the Governors appointed to the island have striven to lead the people in that right direction.

So after 19 years of constant appeals to the Presidents and to Congress, with the aid of the press, the American Federation of Labor, and the sympathetic and friendly attitude of Woodrow Wilson, Congress granted the Puerto Ricans not only citizenship but a greater measure of democratic form of government, by which all classes and the masses of workers were given the opportunity to work out their own destiny by the means of organizing themselves and of having representation in the affairs of the island's administration in accordance with the new organic law, and to build up their political, economic, and social entities; to obtain more liberal and humanitarian laws, as is done in many States of the Union.

President Harding, in one of his addresses, termed Puerto Rico "our Caribbean State", and both President Coolidge and President Hoover mentioned Puerto Rico as an island where the people in good faith were making wonderful progress under the guidance of American institutions.

In answer to a specific question put by me as to whether the term "Territories" as used in Federal acts included Puerto Rico, the Department of Justice's reply was in the affirmative, and the reason was based upon several decisions of the Supreme Court, in which it was stated that Puerto Rico was a fully organized Territory of the United States, although not an incorporated one.

President Franklin D. Roosevelt, since the beginning of his administration, has recommended and decided to help the people of Puerto Rico in their economic problems. He extended to the island the benefits of his program of relief and rehabilitation. Many important Federal laws of financial assistance for education, public works, sanitation and agriculture to the States were extended to Puerto Rico.

In May 28, 1935, by Executive order, President Roosevelt appointed Ernest H. Gruening, of the Department of the Interior, administrator of the Puerto Rico Reconstruction Administration to initiate, formulate, administer, and supervise a program of approved projects for providing relief and work relief and for increasing employment in Puerto Rico. The President also gave the administrator authority to acquire, by purchase or by the power of eminent domain, any real property or any interest therein and improve, develop, grant, sell, lease, or otherwise disprove of any such property or interest therein.

Administrator Gruening appointed about 30 representatives of himself in the island for carrying out these enterprises, and unfortunately it happened that with the exception of three men the other 27 belonged to the opposition, Liberal Party, as against the majority coalition of the legislature and the insular government, ignoring, as it seems to me, the President's recommendation that all parties and interests be represented.

The Governor himself became a mere figurehead, and his actions were handicapped by a real supergovernment created in this way.

The formulation of plans in accordance with the intentions of President Roosevelt included changing the general economic conditions of the island. A plan of reconstruction providing for permanent improvement of the people of Puerto Rico was devised, having in mind to use practically the amount of income derived from the sugar processing tax and the allocations of money granted by the President, which would afford benefits for all people.

Puerto Rican workers claim the term "for the benefit of the general agriculture" weakened and completely submerged the phrase "that labor will be given protection in Puerto Rico."

The President's intention as expressed by him to me as Resident Commissioner of Puerto Rico regarding the machinery of the reconstruction program under the Emergency Relief Appropriation Act was to avoid overlapping discriminations and politics. At that time the President advocated the formation of a true coordinating committee of Federal and insular authorities, headed by the Governor as chairman, and members selected by him from the executive and legislative branches of the insular government. With his own hand the President also designated the president of the insular senate and speaker of the house as advisory members. In the formation of the machinery for the executive committee Dr. Gruening has appointed people who represent liberal professions and others, but there is not a single representative of labor.

While this work of reconstruction was going on in the island two political bills were unexpectedly introduced in the United States Senate, apparently recommended by the administrator, Dr. Ernest H. Gruening. One of the bills is an unwarranted intervention in the electoral rights of the people and the other bill, authorizing a plebiscite in the island for the year 1937 on the matter of independence was a tremendous mistake, being unwise and morally destructive.

Both bills have been vigorously protested by the people of Puerto Rico, except a very small minority.

Last week Governor Winship approved an electoral bill and is considering all proposed amendments which will go to make clean, honest elections.

Congress should not be influenced to legislate on local political matters of this character, based on the following objection which the vice president of the Puerto Rican Senate sent to me, as follows:

First. The bill of Senator TYDINGS on elections is substantially the same as bill—S. B. 20—passed by the Legislature of Puerto Rico last April.

Second. The provision of the bill that the list of registered voters shall be those of the persons appearing in the 1935–36 census is contrary to law, unconstitutional, and unfair, because—

(a) It annuls all registrations of voters made in Puerto Rico in accordance with the laws in force.

(b) It deprives thousands of legal voters of the rights acquired by them when they registered in accordance with the insular laws in force.

(c) It runs contrary to all precedents governing election matters, inasmuch as when the census was taken the political parties had no representation whatever in the taking of that census. These parties represent organized public opinion in Puerto Rico.

(d) It is claimed that thousands of voters who had acquired the right to vote under the provisions of our laws were left out of the census.

(e) It also is claimed that such census of 1935–36 was taken by men politically partial, as they were chosen from only one political party to the detriment of other organized parties.

(f) It was publicly asserted, and denounced, that the P. R. R. A., the reconstruction machinery, selected those men, and this agency is biased in favor of one political party.

(g) It is further contended that the approval of said measure would annul all the registrations already made, and would require starting the work all over again, doubling thereby the cost of election expenses to the Treasury of Puerto Rico.

In regard to the bill intended to hold a plebiscite for independence and the reasons and arguments proudly given by Dr. Gruening and others, I desire to assure you that the great majority of the people of Puerto Rico have always been for the permanent union with the United States, and I hope that it will be so in the future.

This bill represents a tremendous blow to the majority of all citizens of the United States in the island who for 38 years have been fighting a thousand battles to obtain American liberties, cultivating and maintaining with absolute convictions the principles and ideals of the democratic institutions of the United States of America.

The argument that there exists a group in Puerto Rico favoring independence is not a reason why it should jeopardize the rights of the great majority of the people who have maintained the sane and sincere doctrine of "permanent union of Puerto Rico with the United States."

It is, indeed, very deplorable and regrettable that without proper consultation with the majority of citizens of the United States in Puerto Rico, the Governor, the legislature, and other constituted authorities of the island, such a far-reaching measure should have been introduced.

We are very grateful to the President for what he has done in behalf of the poor, and also to the American Federation of Labor under President William Green that has for years helped to obtain freedom for the workers of Puerto Rico, the guaranty of public assembly, and the right to organize and better their economic and social conditions within the fold of our American institutions. The workers of the island are very grateful to them for all these.

I desire to repeat again that the people of Puerto Rico as a whole are no more responsible for the assassination of Colonel Riggs than the people of the United States for the assassination of the great Presidents Lincoln, Garfield, and McKinley.

The beautiful island of Puerto Rico, which has made wonderful progress in all directions during the American regime, is one of the first customers of the mainland, and has had over three thousand millions of dollars of commerce with the United States in the last 36 years, two-thirds of which has benefited business of the continent. The money sent for relief and reconstruction is practically a help and compensation to the people of the island, and of which money two-thirds reverted right back to the mainland again.

If the Tydings referendum bill or any other similar bill were to be approved, all civil and individual rights which have been gained for the workers in 40 years of struggle would be sacrificed.

I certainly am sorry that I have lived to see the day the great American Government would ask our people to commit suicide. That is what independence, as it has been offered, means.

All leaders of parties see by themselves that a new era of reconstruction has come to the island to perfect our democratic institutions dedicated to social, political, and economic rehabilitation. Free and guaranteed vote of the people makes the island more progressive and gives opportunity to acquire greater capacity and progress.

Our coalition parties in the legislature have won the most honest and clean elections of 1932 with this issue:

> That the influence of the people of the United States in the destiny of Puerto Rico has been, is, and will be civilizing, and the extension of the Constitution to Puerto Rico represents a positive guarantee of the public and political liberties convenient and favorable to the enjoyment of the individual rights.

We reject all forms of a colonial government; therefore, we proclaim the permanent union of the people of Puerto Rico with the people of the United States to maintain and consecrate socially, politically, and industrially a democratic community with the same rights and duties as any community of the United States. We want and are willing to be recognized as an integral part of the States of the Union and lead our future in that line.

Puerto Rico has a population over 1,700,000, or 500 inhabitants to the square mile, as compared with 55 per square mile on the mainland.

As all of you know, Puerto Rico stands literally at the crossroads of the world, at the entrance to the Caribbean region, and on a direct line between east and west, north and south. San Juan, the capital and chief port, is but 1,000 miles away from the Panama Canal, 1,300 miles from New York or Philadelphia, less than 1,000 miles away from Havana, and under 4,000 miles from the great European markets.

Puerto Rico is an integral part of the United States, under the supreme authority of Congress. The Treaty of Paris between the United States and Spain, 1899, in article II, provided that—

> The civil rights and political status of the native inhabitants of the Territories hereby ceded to the United States shall be determined by Congress.

The treaty contained no promise or declaration regarding the political status of the inhabitants of Puerto Rico affected by the cession, but left the matter entirely to be decided by Congress.

As an explanation of this provision, the American representatives at the peace negotiations, leading to the Treaty of Paris, in replying to the representatives of the Spanish Kingdom, said:

> The congress of a nation which never enacted a law oppressive or detrimental to the rights of residents within its dominion and whose laws guarantee the greatest liberty compatible with the conservation of property surely can be trusted not to depart from its well-established practice in dealing with the inhabitants of these islands.

LOSSES OF CERTAIN OFFICERS AND EMPLOYEES OF THE FOREIGN SERVICE OF THE UNITED STATES

Mr. McREYNOLDS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 267) for the relief of certain officers and employees of the Foreign Service of the United States who, while in the course of their respective duties, suffered losses of personal property by reason of catastrophes of nature, with House amendments, insist on the House amendments and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. McREYNOLDS, BLOOM, and FISH.

CLELLIA S. IRVIN

Mr. TAYLOR of Tennessee. Mr. Speaker, the bill (H. R. 10298) granting a pension to Clellia S. Irvin was erroneously referred to the Committee on Pensions. I, therefore, ask unanimous consent that the Committee on Pensions be discharged from the further consideration of the bill and that the same be referred to the Committee on Invalid Pensions.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

REVENUE AND EXPENDITURES

The SPEAKER. Under special order of the House, the Chair recognizes the gentleman from Georgia [Mr. CASTELLOW] for 15 minutes.

Mr. CASTELLOW. Mr. Speaker, with governments, as with individuals, few have found it difficult to spend money, but its replacement presents a different story. My observation is that one of the easiest habits to form is that of extravagance. Even extravagance may not be definitely menacing so long as the spender remains conscious of his extravagance, just as the driver of an automobile may operate his car at a high rate of speed in safety so long as he realizes he is driving fast, for the realization will constrain him to observe caution. The hazard arises when to him a high rate of speed becomes a habit of which he is unconscious. Therein lies the danger. Even so, as long as we realize that our national expenditures are without peacetime parallel, and that billions of dollars represent much in human toil, we will at least exercise care and caution in the manner and purposes of its distribution. But let us take thought lest familiarity with stupendous figures destroy our sense of proportion and lull us as a Nation into an unwarranted sense of security while we indulge in reckless expenditures resulting finally in practical repudiation or in confiscation of the savings of the frugal and thrifty through the instrumentality of taxation. Little comfort could be derived from acceptance of either horn of such a dilemma. Is it not apparent to the thoughtful

that by legislative act the accomplishment of the former has been rendered simple in the event the latter becomes too unpopular?

The tax plan proposed by the bill which recently passed the House admittedly will discourage the accumulation by corporations of a reserve, absolutely essential to the successful operation of any business venture. [Applause.] If corporations are detrimental to our economic life, they should not be tolerated; if they perform any useful service, they should not be handicapped by unreasonable restrictions. It is difficult to conceive that any businessman would contend for a moment that a reasonable reserve for future contingencies is not helpful, if not, indeed, essential, to success. This being true, it occurs to me that while unreasonable hoarding should not be encouraged, it would be advisable to permit the accumulation of a surplus equaling a reasonable percentage of its capital structure without undue restriction. Operating capital, usually supplied from accumulated profits, is the very heart of all business; and before operating on this delicate organ, maturest deliberation should be exercised.

The necessity of "storing up" or providing a reserve in times of plenty to carry through in times of scarcity has been recognized not only by thoughtful men of all ages but taught by nature to the insects of the field and the denizens of the forest. Who would say to the bee, "Cease to provide stores against the approach of winter", or to the squirrel, "Gather not to provide for a time when there is nothing to gather"? Nature itself provided for the great State of Minnesota abundant lakes to render more uniform its moisture. Without vision to correctly judge the logical results of their acts, men have drained these great natural reservoirs and are now seeking relief from the consequences of their folly. Why has our Government built, and is still building, at the cost of uncounted millions, dams to restrict the natural flow of water in time of abundance except to render it more effective in power and afford more uniformity of supply for the arid lands of the West? The unparalleled prosperity and progress of our great country is largely due to recognition of the fact that money, representing energy, like water, to attain its greatest efficiency must be accumulated at times in abnormal quantity, and with due caution and judgment released when needed. Great dams have been constructed in the past. The more expert the builder, the higher the walls, the more secure the masonry; the more water it will detain, and the longer. The builder for a season claims ownership, and exercising dominion directs its use and proudly claims it as his own. At his bidding it may turn the wheels of commerce or cause to produce in abundance thousands of acres of otherwise barren land. Yet, with all this added productivity, the owner's individual capacity to consume is not increased, and so the multiplied production must necessarily enure ultimately to the benefit of others. Not only that, there never was a dam built so high, so thick, or so permanent, as to prevent indefinitely a single drop of water from returning to its true parent, the ocean. So a financier may construct in the stream of commerce an obstacle to the flow of dollars, restrain them for a season, direct their activities, and call them his own. The more efficient he may be, the more he may acquire and the longer retain, but there never was nor ever will be one with the ability to withhold indefinitely a single dollar from mankind, its true owner. In the first instance, would wisdom be manifested by hastily, with pick and shovel or devastating explosives, destroying the agency by which the accumulation and retention of the necessary supply of water is made possible? Or would you discourage from labor those persons, artificial or natural, who by their efforts are building financial reservoirs from which mankind may draw in time of need? The folly of him who killed the goose to more speedily secure an extra egg has often been repeated in the past, and I presume will be in the future, for observation discloses that human nature changes, if at all, very slowly.

It has been the custom of men through the ages to class, as among the enemies of mankind, those whose labors have seemingly been unduly rewarded, but to the overcritical I suggest that the real dead weight imposed upon society is the drone in this human hive who consumes more, whether rich or poor, than he contributes to its good by his own efforts. [Applause.] All that we possess, all that civilization now enjoys, represents the net profits from human effort plowed back in full into the reserve of the greatest of all corporations—that in which every human being on earth today is to some extent a stockholder, and the assets and liabilities of which future generations will inherit.

One justification for increasing old taxes or levying new is to bring the Government revenues nearer in line with expenditures. All must know that this is imperative, but could not the same result be accomplished by a reduction of expenditures, and would that not be the saner course to pursue? [Applause.] Let us not delude ourselves with the belief that by some magic power any Government can give more than it takes. If the giving is done with caution, the taking may be done with moderation and justice more nearly accorded to all.

Unquestionably taxes should be imposed in accordance with ability to pay. The tax bill now before the Senate, as originally reported to the House, would have rendered it most difficult, if not, indeed, impossible, for corporations now in financial difficulties to ever regain a sound footing. By those who sponsor Government ownership of industry this failure to prosper might have been advanced as a reason why the Government should assume direct control, and thus a failure due to Government planning could have been advanced as a reason for governmental ownership. This feature, however, was modified in the House by amendment.

As the levying of taxes so vitally and directly affects the individual citizen, our Constitution provides that all bills for the raising of revenue must originate in the lower branch of Congress, every Member of which must necessarily have been elected by the people within the preceding 2 years. To facilitate legislation, committees have been formed for special consideration of such legislative matters as come within the jurisdiction of each, respectively. The members of the Ways and Means Committee, to which is referred all tax legislation, on account of the importance of the committee, are elected by the membership of the House and are selected usually by reason of their long service, proven ability, and peculiar fitness. The revenue bill recently passed was reported to the House by this committee. It is reasonable to assume, and the facts disclose, that they gave mature consideration to the subject and if, under those conditions, their wisdom and patriotism cannot be relied upon, representative government is seriously threatened.

While entertaining some misgivings as to the wisdom of the proposed legislation, as indicated by the foregoing expressions of my observations and conclusions, I sincerely trust that the results of this legislation will not prove disappointing. [Applause.]

Mr. COX. Mr. Speaker, I ask unanimous consent to proceed for 1 minute.

The SPEAKER. Is there objection?

There was no objection.

Mr. COX. Mr. Speaker, my colleague has just completed what will probably be the last speech he will make on the floor of this House, as he voluntarily retires as a Member of this body at the expiration of his present term. When he goes I would like for him to go conscious of the fact that he leaves a membership that holds for him the very profoundest respect and whose fondest affection will follow him the remainder of his days. [Applause.]

The SPEAKER. The gentleman from Massachusetts [Mr. TREADWAY] is recognized under the special order for 20 minutes.

RUINOUS RECIPROCITY

Mr. TREADWAY. Mr. Speaker, some days ago the gentleman from Ohio [Mr. HARLAN] remarked that I seemed to be "mysteriously silent" recently on the subject of the administration's trade-treaty program, and indicated my silence showed that I was finally admitting that these unconstitutional treaties were a solution of our ills.

I beg to assure the gentleman that he is completely in error, for I personally feel more strongly every day against

these iniquitous reciprocal-tariff agreements, and as far as my effort to do away with them is concerned I have just begun to fight! [Applause.]

FURTHER SURRENDER OF DOMESTIC MARKET UNDER FRENCH TREATY

My purpose in speaking this morning is primarily to answer some of the recent statements made by the proponents of the trade-treaty program, both in and out of Congress, but first I wish to discuss for a few moments the trade treaty with France which has just been concluded, and which was made public last Wednesday. It is another outstanding example of surrendering our rich domestic market for illusory benefits in foreign markets.

According to the summary of the treaty issued by the State Department—and of course we had no knowledge of it whatsoever in advance, as all these treaties are star chamber procedures—this country granted to France reductions up to 50 percent on 71 separate items, and we received only 19 reductions, some of which even the State Department admitted were only nominal percentages. The major French concessions were not duty reductions at all, but simply a liberalization of quota restrictions. However, both in the case of the duty reductions and the quota liberalizations, the French Government reserves the right to increase the rates or modify the quotas. Even in according us most-favored-nation treatment, it makes a number of exceptions to the general rule.

You have heard comments made about horse trading, and now Professor Sayre informs us we ought not to indulge in horse trading. Well, we ought not to indulge in horse trading of that kind, I agree. In the country I came from, when we used to trade horses, when there were horses to be traded, there was an effort to get an even swap, which we never had in any of these things, and particularly we have not done so in this recent one with France.

REDUCTIONS LARGELY ON LUXURY ARTICLES

Here are just a few of the articles on which we have granted reductions which, in accordance with the usual practice, will be generalized in favor of all other countries:

Article and percentage by which existing duty is reduced

Bottled perfume	49
Cosmetics	40–50
Tinsel products	27–40
Roquefort cheese	28
Canned mushrooms	34
Brandy	50
Cordials and liquors	50
Champagne	50
Still wines (not over 14-percent alcohol)	40
Vermouth	50
Silk broadcloths	18–31
Silk-pile fabrics	17–29
Rayon-pile fabrics	21
Papeteries	25
Straw hats	43
Feathers and downs	33
Jewelry	25–41
Articles of adornment	25–41
Cotton lace	33–44
Silk lace	28
Cotton or silk wearing apparel with lace or embroidery	17
Clocked and embroidered cotton hose	20–33
Corsets	17–27
Elastic fabrics	33
Hand-seamed women's and children's gloves	31
Brierwood pipes	40
Cigarette paper	25

As you look over that list, it will be noted that many of them are luxuries. If there is one class of articles that ought to pay the duty, even though you believe in "tariff for revenue only", it is luxuries. Who can better afford to aid in support of our Government than a person who can purchase champagne to use on his table for himself or his friends? The same is true with regard to those who wish to use exclusive French perfumes. If some people must have the imported article, let them pay for it. We make good champagne and perfumes right here in this country, and there is no reason why we should encourage the use of the foreign articles. I could say the same thing for corsets and other articles on which the duty is reduced under the treaty.

What do our grape growers in New York State, in the area represented to a large extent by the gentleman from New York [Mr. TABER], think of a 40- to 50-percent reduction on wine and champagne? Our friends from California know something about how the tariff has benefited them in the past. Take brandy alone. If the tariff permitted, we would increase the consumption of the domestic product; so why reduce the tariff in order to allow the foreigner to ship his brandy into the United States in competition with that which can be produced in California? I think the answer to some of those questions will be very plainly made when the votes are counted in November.

FURTHER REDUCTION ON CHEESE

Take the question of cheese. The State Department, in its analysis of the treaty, says that this reduction "is in line with the reductions already made to Switzerland and the Netherlands on the cheese specialties of those countries." It might be said that Roquefort cheese could well be reduced in the tariff. Of course, the agriculturists here and our rural friends throughout the country realize that the more imported cheese is sold in this country and the lower price charged for it the less consumption there will be of home-manufactured domestic cheese. A further reduction in the tariff on Swiss cheese was made in the treaty with Finland, which was just announced today. This reduction of 2 cents per pound provided in the treaty seriously affects Wisconsin and other States, where our domestic Swiss cheese is a large dairy product. Oh, these Democratic reciprocal theorists are some "friends" of the farmer! There could not be anything more ridiculous in the way of argument than to try to tell our sensible agriculturists and rural population that these agreements, unconstitutionally entered into, are of benefit to them.

I see one of the distinguished Representatives from Maine interested in what I am saying. Only a few days ago Canada raised the tariff against Maine potatoes, although there had been an agreement entered into with our Secretary of State and his able assistants and theorists that the duty should be lowered on potatoes. Yet as soon as the agreement is made it is increased again, and at the same time they say it is of benefit to us here in this country.

AN ANSWER TO CHAIRMAN O'BRIEN, OF TARIFF COMMISSION

Mr. BANKHEAD. Mr. Speaker, will the gentleman yield?

Mr. TREADWAY. Yes.

Mr. BANKHEAD. The gentleman seems to charge this entire reciprocal-tariff agreement is supported alone by the Democratic Party. What has the gentleman to say about the attitude of men like David Lawrence and the Chairman of the Tariff Commission, Mr. O'Brien, and a number of others?

Mr. TREADWAY. Would the gentleman like my opinion of the gentleman from Massachusetts, Mr. O'Brien, who alleges that he is a Republican, the Chairman of the Tariff Commission?

Mr. BANKHEAD. That is what I am asking the gentleman.

Mr. TREADWAY. Very well, allow me to give it to the gentleman. I have known Mr. O'Brien, to whom our distinguished floor leader refers, for a long period of years. There is no more delightful gentleman for an after-dinner speech or an after-dinner companion than Robert Lincoln O'Brien, but politically he is an enigma. He alleges that he is a Republican, but I do not want to belong to the party which advocates such principles as he seems to believe in, which are directly contrary to the well-defined and long-established principles of the Republican Party. Further than that, let me say that he has offered his unsolicited advice to the Republican convention, which will meet in about 3 weeks to select the next Republican candidate and next successful candidate for the Presidency, to the effect that it should endorse the administration's trade-treaty program. Mr. O'Brien's advice will not be heeded.

Let me give you two particularly outstanding illustrations of Mr. O'Brien's position. It is a matter of record before the Ways and Means Commitee that Mr. O'Brien testified that the reciprocal treaties would be so beneficial to the country

that the bill then before the committee ought to be passed unanimously. That is Democratic doctrine, pure and simple. I have never seen any Republican who advocated the passage of the reciprocal treaties or the bill under which they are unconstitutionally enacted.

Another angle to Mr. O'Brien's attitude appears in the hearings before a committee of another body when he was asked this question:

Senator HASTINGS. Well, is it or not true that the Tariff Commission exercises an independent judgment; or is it, as I think I saw where you stated before the House committee, wholly subject to and under the control of the President?

Listen to Mr. O'Brien's answer:

Mr. O'BRIEN. The President appoints the Tariff Commissioners. Most men in positions wish to retain them and be reappointed.

So his views, of course, were warped by his desire to continue in office. [Applause.] We may assume that this frank statement holds the key to his views respecting the trade treaties. It is interesting to note that he was rewarded by the President by being redesignated as chairman of the Tariff Commission, effective December 1, 1935. That kind of advice we do not want at any Republican convention. Aside from that, I have great admiration for the gentleman to whom the majority leader referred.

Mr. BANKHEAD. The gentleman has not quite finished, I hope. The gentleman made no reference, for instance, to the opinion of a great publicist, like Mr. David Lawrence, who is unequivocally in favor of this tariff, and the Young Republican organization of New York, and Mr. Ogden Mills. What has the gentleman to say about them?

Mr. TREADWAY. If the gentleman will withhold his interest until the Republican National Convention is held, when the Republican Party will state its principles, I do not think he will see that there are very many Republicans who believe in this monstrosity of so-called reciprocal tariffs which are not "reciprocal" in any sense. So reserve your interest until we get together the forces of the Republican Party of this country and tell you what we think about the tariff position of the Democratic Party today. Why did you not come in here with a straight, out-and-out tariff revision bill instead of going around the corner in this unconstitutional manner? I am sorry I do not have more time, because when I get on that subject my regular remarks are all thrown in the discard.

PRESERVATION OF WORLD PEACE NEW EXCUSE FOR TRADE-TREATY PROGRAM

I was very much amused the other day to read the speech made by the Secretary of State, Mr. Hull, before the United States Chamber of Commerce, in which he gave a new "excuse" for the administration's trade-treaty program.

Heretofore we have been given to understand that it was for the purpose of expanding our foreign markets. The act itself so states. But now the Secretary of State tells us it was for a higher and nobler purpose, namely, "the preservation of world peace." He reiterated this new purpose in a press release accompanying the announcement of the French treaty. The only reason I can see why he brings world peace into the tariff measure is that probably he was ashamed of the results of the agreements. Therefore he says they are a great help to world peace. I never heard of anything more ridiculous.

I am not surprised that the Secretary has been forced to look for some new argument to support his treaty program, because it has been a dismal failure insofar as expansion of our foreign markets is concerned; but why pick on world peace? He cannot be serious in thinking that a trade-treaty program will supplant the League of Nations, the Hague Tribunal, the World Peace Foundation, and such other agencies and organizations for keeping peace throughout the world. At least he has no grounds for hoping that his plan will be any more successful.

A certain Mediterranean country, which I need not mention, is known to have entered into some 35 bilateral trade treaties, but they apparently had little effect in restraining its military ambitions, which were culminated within the last few days. A certain oriental country is known to have at least seven bilateral trade treaties, but these do not seem to have had any effect in curbing its martial spirit.

I wonder if the Secretary of State thinks that free-trade tariff reductions or trade treaties would have kept Napoleon's armies at home? I wonder if he thinks that international tariff barriers were responsible for the military conquests of Caesar and Alexander the Great? I wonder if he blames the Norman Conquest on protective tariffs? The whole thing is worse than a ridiculous pipe dream. Why try to delude the American people with any such statements that this sort of giving away our home markets is going to aid world peace? It would be an expensive price at the best, but what does history say about it?

The Democratic Party was in control of Congress from 1913 on. Did it keep us out of the World War because the Underwood Free-Trade Tariff Act was passed? Why does not Mr. Hull recall the days he spent on this floor as a colleague of some of us and whom we greatly admired before he puts up any such bluff that world peace is involved in a reduction of tariff rates? If that had been true we certainly would never have lost the thousands of the flower of our manhood overseas fighting to make the world "safe for democracy." Now the Secretary of State wants our workingmen to give up their jobs and our farmers and manufacturers to surrender their home market to make the world safe from future wars. A beautiful dream; nothing more.

TREATY PROGRAM HAS FAILED TO EXPAND FOREIGN MARKETS

Now, let us forget a little of this theory that the gentleman has been telling us about and get down to actual brass tacks. What has been accomplished under this reciprocal treaty proposition which was instituted in 1934? Our favorable balance of merchandise trade declined from $478,000,000 in 1934 to $233,000,000 in 1935, a net loss of $243,000,000. This resulted from the fact that our imports increased $392,000,000 in 1935 as against an increase in exports of only $149,000,000.

While not all of the tremendous increase in imports was due to concessions made under the trade treaties, neither was the small increase in exports due entirely to concessions obtained from the few countries with whom treaties were negotiated. The gentleman from Ohio [Mr. HARLAN] is himself authority for the statement that only $23,000,000 of our increased export trade was with treaty countries, but even this amount cannot be attributed entirely to trade concessions, because our exports to the United Kingdom increased $50,000,000 in 1935 over 1934 without benefit of any trade treaty and without giving the United Kingdom any concessions in our market to get the increased business. Similarly, our trade with Canada increased $21,000,000 in 1935 over 1934 before the trade treaty with that country became effective. Many other similar instances could be cited.

FARM EXPORTS DECLINING

When the trade-treaty legislation was under consideration the farmers of the country were promised an increased foreign market for their products. Let us see to what extent the farmers' export market has been increased, whether by trade treaties or otherwise. Looking at the figures published by the Department of Agriculture we find that the exports of many major farm commodities are decreasing rather than increasing. Here are the figures:

Decline in exports of certain major agricultural commodities

Commodity		Exports	
		1934	1935
Wheat (including flour)	bushels	36,500,000	15,700,000
Leaf tobacco	pounds	419,000,000	281,200,000
Bacon, hams, and shoulders	do	83,700,000	61,700,000
Lard	do	341,200,000	96,400,000

And still our Democratic colleagues are always telling us what great friends they are of the farmers. That is the way they have "taken care" of the farmers.

[Here the gavel fell.]

Mr. TREADWAY. Mr. Speaker, I ask unanimous consent to proceed for 5 additional minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

FARM IMPORTS INCREASING

Mr. TREADWAY. But that is not all the administration has done to the farmer. It has refused to protect the farmer in the domestic market. With imports pouring in from abroad, the administration has not only failed to increase agricultural tariffs where necessary, but has actually reduced many of the existing rates, including the duties on such important products as cattle, cream, cheese, and various vegetables and fruits. This was done in spite of the President's promise to the farmers not to reduce the duties on agricultural products.

As compared with the decline in agricultural exports, here is how some of our agricultural imports have increased since 1934:

Increase in imports of certain major agricultural commodities

Commodity		Imports	
		1934	1935
Live cattle	head	66,000	378,000
Canned beef	pounds	46,700,000	76,300,000
Wheat	bushels	7,700,000	27,400,000
Corn	do	3,000,000	43,200,000
Oats	do	5,600,000	10,100,000
Barley malt	pounds	193,700,000	320,600,000
Egg products	do	3,200,000	7,600,000

The decline in foreign markets and the increase of foreign competition in the domestic markets is not confined to agriculture. We find that exports of cotton cloth, for example, declined 18 percent in 1935, while imports increased 53 percent. It is bad enough for agriculture and industry to see their foreign markets disappear, but when this is coupled with increased competition in the domestic market it means disaster.

MANY REASONS FOR FAILURE OF TREATY PROGRAM

Many reasons could be advanced why the trade-treaty program has proved a failure. In the first place, it is based upon the false notion that by allowing foreign countries to sell us more of their goods we will necessarily benefit by being enabled to sell them more of our goods. Such has not been our experience. It is disproven by the fact that, although we increased our merchandise imports by 24 percent in 1935, our exports only increased 7 percent. When we include our gold and silver purchases, and take into consideration the so-called invisible trade balances, we find that foreign countries in 1934 had an excess purchasing power over the amount necessary to pay all balances in our favor amounting to $970,000,000. In 1935 this excess purchasing power was approximately $2,000,000,000. These tremendous balances in favor of foreign countries were not settled by the sale of additional American goods but by the transfer of stocks, bonds, and other securities.

When we reduce our tariff rates under the trade treaties, foreign countries are quick to take advantage of the opportunity to secure increased business in our rich domestic market, to the detriment of our own producers. It must be kept in mind that our reductions in rates are not confined to the country with whom a particular treaty is negotiated but are extended generally to all countries, Germany alone excepted. On the other hand, we receive concessions only from the country with whom we negotiate a particular treaty. Whether we sell that country any additional goods depends upon our ability to undersell the rest of the world. This throwing open of our market to the whole world, while we get in return concessions of doubtful value from particular countries, is another reason why the trade-treaty program is a failure, and is dangerous and ruinous to our trade.

TREATY NEGOTIATORS NOT SEEKING TRADE ADVANTAGES FOR OUR PRODUCERS

Another reason why the trade-treaty program is such a failure from the standpoint of increasing our foreign trade is that those in charge of the negotiations are more interested in trying to set an example for the world than they are in trying to gain any benefits for our own people. We have definite proof of this fact in the public utterances of these officials. The Assistant Secretary of State, Dr. Sayre, who is Secretary Hull's right-hand man in the trade-treaty negotiations, has this to say in his recent pamphlet, America Must Act, published by the World Peace Foundation—I quote:

> If the purpose for which the act was passed is to be attained our methods must be broader than mere "horse trading." We must make of the act an instrumentality for throwing the weight of American power and influence against the disastrous world movement toward economic nationalism.
>
> * * * * * * *
>
> What matters is not selfish trade advantages gained by individual nations over their competitors, but the gradual liberalization of world trade through the adoption of similar programs by other nations.

Now there is a frank statement of what these free-traders down in the State Department are trying to do. They are not seeking to gain advantages for our own farmers, manufacturers, or workingmen, but are tearing down our tariff in the pious hope that the world will follow our example. No country is going to be foolish enough to adopt this sort of program unless it is more interested in other countries than it is in its own. The rest of the nations of the world are out to get trade advantages, and are naturally glad to accept the generous concessions offered them by Secretary Hull and his "free-trade missionaries."

FOREIGN COUNTRIES OVERANXIOUS TO ENTER INTO TRADE TREATIES

In this connection, let me cite a statement made by Dr. Grady, Chief of the Trade Agreements Section of the Department of State, before the Committee on Appropriations on December 10, 1934. He was being interrogated by one of the members of the committee who asked him this question:

> With respect to the countries that you have made contacts with up to this time, * * * have you found a sympathetic interest manifested by them to go on?

Here is Dr. Grady's answer:

> Extremely so. As a matter of fact, we have had pressure from countries to proceed before we were ready for them.

Think of that—"pressure" from countries to enter into these agreements. I am not surprised. They have everything to gain and nothing to lose. They know we have the richest market in the world, and they know further that there is nothing binding about the treaties to make them buy anything from this country if they do not choose to do so.

TARIFF REDUCTIONS HAVE INJURED DOMESTIC PRODUCERS

In his recent Chamber of Commerce speech, to which I have already adverted, Secretary Hull made many statements which will be difficult for him to substantiate, but none any more so than the following:

> The general aim of our negotiators is * * * to grant the other country concessions with respect to commodities the possible increased importation of which would be beneficial to our country.

Never was a more absurd statement ever made. If that has been the aim of the negotiators, who do their work in secret star-chamber sessions, it must be that their aim is bad. Perhaps this is due to the lack of "light" upon the proceedings. I could go through the whole list of concessions made under the various trade treaties, which cover some 35 printed pages, and point out scores of items, the increased importation of which could not possibly be of any benefit to this country. Just consider a few of the agricultural items on which substantial reductions in duty have been made. How is it going to help our farmers by reducing the duties on cattle, cream, cheese, poultry, apples, cherries, blueberries, grapefruit, lima beans, peas, potatoes, tomatoes, sugar, tobacco, and other such items? The only beneficiary will be the foreign producer. Likewise the reductions in the duties on certain textiles, on watches, cement, structural iron and steel, plate glass, paper, and other manufactured products can only benefit the foreign producer and the foreign workingman.

CONSUMERS ARE ALSO PRODUCERS

"Yes", the free-trader says, "but what about the consumer? Is he not benefited?" My answer is simply this: If it is so good for the consumer to buy a few things abroad, why is it not good for him to buy everything abroad, since he can get it cheaper? There is a reason and a very good reason. The word "consumer" is a very indefinite term. A farmer is a consumer, but he is also a producer. The same is true of the workingman. We find that the terms "producer" and "consumer" generally identify the same person. If all consumers are benefited by the importation of cheap goods, then all producers must be adversely affected. In the end we would find that our so-called consumers would have nothing with which to buy the cheap foreign goods, because as producers they would have been put out of business by foreign competition.

The exponents of the trade-treaty program are very fond of saying that when some export industry is benefited under a trade treaty, this benefit is reflected in many directions and accrues to many more persons than those directly affected. However, the same is true with respect to the injury done to individual groups under the trade treaties through the granting of concessions to foreign countries. That injury is reflected throughout the whole country. We consume in this country 90 percent of what we produce and export 10 percent. If we increase the 10 percent at the expense of the 90 percent, nothing is gained. Moreover, it may be pointed out that it would take a 90-percent increase in the 10 percent exported to be the equivalent of a 10-percent increase in the 90 percent consumed at home.

DEMOCRATIC CRITICISM OF REPUBLICAN TARIFF NOT BORNE OUT BY FACTS

If I may refer again to Secretary Hull's recent chamber of commerce speech, I should like to call attention to his conception of what would happen if we repealed the trade-treaty legislation and abrogated the treaties made thereunder. Here is what he has to say on this point:

> We would automatically go back to the Smoot-Hawley tariff and face once more the vicious discrimination against our trade which it caused and the virtually suicidal effort at economic self-containment which it represented.

Now, let us analyze that statement for a moment. In the first place, let me say that the Hawley-Smoot tariff is still the law of the land after 3 years of Democratic control, except insofar as it has been modified by particular trade treaties. The Democratic platform of 1932 severely criticized the Hawley-Smoot tariff and promised the country a tariff "for revenue." If the 1930 act was such a bad law, I cannot for the life of me see why the Democrats have not repealed it. The late Speaker Rainey gave the probable reason back in 1932 when he declared on this floor:

> Lower the tariff drastically? You (Republicans) will not do it and we (Democrats) dare not do it with conditions as they are. We do not want this market flooded with the products of cheap labor in other countries.

Every revision of the rates made through the trade treaties is a downward revision, except where existing rates are "frozen" for a definite period. There are no tariff increases under the treaties—no element of protection for American agriculture, industry, and labor. The Republican tariff yardstick of equalizing foreign and domestic production costs has been thrown out entirely. The administration, in the words of Speaker Rainey, is now engaged in flooding the market "with the products of cheap labor in other countries."

To return to Secretary Hull's statement, to which I have made reference. He stated that the 1930 Tariff Act caused vicious discriminations against our foreign trade. Let me say that our trade was no more discriminated against than was that of any other country. When the world-wide depression began, each nation tried to protect its own market by raising tariff barriers, and we were not alone in that. When the bottom of the depression in this country was reached in 1932 and domestic conditions began to improve, our foreign trade likewise began to climb. Exports and imports in 1933 were both greater than in 1932.

FOREIGN TRADE ON INCREASE PRIOR TO TRADE TREATIES

From 1933 to 1934 our exports alone increased $458,000,000, which seems to have disproved the charges made by our Democratic friends that the Hawley-Smoot tariff would stifle our international trade.

The interesting thing is that the increase in export trade since the trade-treaty legislation became effective has been smaller than it was under the "iniquitous" Hawley-Smoot Act before it was modified by the trade treaties. As against the $458,000,000 increase in exports from 1933 to 1934, the increase from 1934 to 1935 was only $149,000,000. The import situation, however, was just the reverse. From 1933 to 1934 our imports increased only $205,000,000 as against an increase of $392,000,000 between 1934 and 1935.

I should like to point out that when the Fordney-McCumber Tariff Act of 1922 was passed, the Democrats charged that it, too, would stifle our foreign trade, but our exports and imports increased every year up to and including 1929, when we exported merchandise of the value of $5,240,000,000 as against imports of $4,400,000,000.

INCREASED IMPORTS THE RESULT RATHER THAN CAUSE OF DOMESTIC PROSPERITY

While large imports and prosperity go hand in hand, it is not true, as Secretary Hull and other free-traders attempt to make people believe, that imports are the cause of our prosperity. Rather, increased imports result from our prosperity. In good times we need more raw materials, and our people are able to afford more luxuries. If imports were the cause of prosperity, then it would necessarily follow that if we bought everything we needed abroad, we would reach the zenith of prosperity. Of course, any such notion is ridiculous, yet the whole trade-treaty program is founded on just such fallacious notions and theories as that.

Despite all the charges made by our Democratic brethren the Hawley-Smoot Tariff Act does not present an insurmountable barrier to foreign imports. Two-thirds of our imports on the basis of value now come in duty-free, which is more than can be said about the imports of most foreign countries, whose tariffs are purely arbitrary and do not represent an attempt merely to equalize foreign and domestic production costs.

I do not understand how Secretary Hull can characterize the 1930 tariff as a "suicidal effort at economic self-containment" in view of the fact that such a vast proportion of our imports are duty-free, and in view of the further fact that we have a tremendous importation of dutiable products, both agricultural and manufactured, in spite of the tariff duties which it imposes.

This reference to "self-containment" is just another argument used to attack the protective-tariff system and bolster support for the free-trade theories the administration is seeking to put into effect. I use the words "free trade" in a rather broad sense; but when rates are not protective, we might just as well have free trade. So far as I know, no one has ever proposed that we shut out all imports. It is recognized that there are many things which we do not produce which we must and will continue to buy abroad. Hence any effort to make people believe that the abandonment of the trade-treaty program means the erection of a Chinese wall around this country is just plain misrepresentation. The proponents of the program are so hard up for arguments that they have to set up "straw men" just to be able to knock them down again.

TARIFF WILL BE A LEADING ISSUE IN ELECTION

In the coming election campaign, there is no question but that the tariff will be one of the leading issues before the country. The people will have the opportunity to determine the clear-cut question of whether they wish the present policy of "ruinous reciprocity" continued, or go back to the long-established Republican policy of giving American agriculture, industry, and labor the first chance to supply the needs of the domestic market.

It is going to be difficult for the administration to explain the inconsistency of its position in telling our farmers on

the one hand to restrict their production while on the other hand taking no steps to stop the flooding of our market with foreign agricultural products. The farmer has seen his foreign market disappear, and now the administration is taking his domestic market away from him.

Likewise it is going to be difficult for the administration to explain the inconsistency of its position in telling our employers on the one hand to put men back to work, while on the other hand, tearing down our tariff and permitting foreign competition to drive these employers out of business.

The administration talks about raising the wage level, but even the present wage level cannot be maintained if our workers must compete on equal terms with the cheap labor of Europe and the Orient.

Free trade is not the key to prosperity. As the German economist, List, has said:

> Free trade is an idealism not to be engaged in until the people with whom you trade have the same living standards as your own, otherwise they will tear you down to their level.

Likewise, reduced tariffs are not the answer to the problem, since they also mean a lowering of the wage level and living standards. We must face the fact that our prosperity is based primarily on the home market. Our foreign trade is important, but incidental. It is to our interest to conserve the home market so far as possible for our own people. The Republican policy of protection is dedicated to that principle. The policy of the present Democratic administration, on the other hand, is to share that market with the world, notwithstanding the fact that two-thirds of our imports already come in duty-free. The people will determine next November which course they wish to follow in the future; and I have every confidence that they will reaffirm their belief in the Republican principle of protection as they have always done in the past after a short trial of Democratic free trade. [Applause.]

[Here the gavel fell.]

NATIONAL SAFETY AND ACCIDENT PREVENTION

Mr. O'NEAL. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H. R. 11108) to advance a program of national safety and accident prevention.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That there is hereby authorized to be appropriated, out of any moneys in the Treasury not otherwise appropriated, the sum of $50,000 to be expended under the direction of the Secretary of Commerce for the furtherance of the work of the accident-prevention conference. Money appropriated pursuant to this act shall be available upon vouchers approved by the Secretary of Commerce for fostering accident-prevention work on the part of organizations engaged in the promotion of safety and accident prevention; preparation and printing of material designed to enlighten the general public in matters of safety and accident prevention, such material to be disseminated through schools, newspapers, magazines, the radio, or any other means of intercourse or communication; the preparation and attempts to obtain enactment of uniform vehicle regulations in the several States; clerical assistance for the members of the general committee of the Accident Prevention Conference; travel expenses incurred by members of the general committee of the Accident Prevention Conference in the furtherance of the work of the said conference.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COMPACT BETWEEN CERTAIN STATES

Mr. CITRON. Mr. Speaker, I ask unanimous consent for the immediate consideration of House Joint Resolution 377, to enable the States of Maine, New Hampshire, New York, Vermont, Massachusetts, Rhode Island, and Connecticut to conserve and regulate the flow of and purify the waters of rivers and streams whose drainage basins lie within two or more of the said States.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the immediate consideration of the joint resolution?

There was no objection.

The Clerk read the joint resolution, as follows:

Resolved, etc., That the consent of the Congress of the United States is hereby given to the States of Maine, New York, New Hampshire, Vermont, Massachusetts, Rhode Island, and Connecticut, or any two or more of them, to negotiate and enter into agreements or compacts for conserving and regulating the flow, lessening flood damage, removing sources of pollution of the waters thereof, or making other public improvements on any rivers or streams whose drainage basins lie within any two or more of the said States.

SEC. 2. No such compact or agreement shall be binding or obligatory upon any State a party thereto unless and until it has been approved by the legislatures of each of the States whose assent is contemplated by the terms of the compact or agreement and by the Congress.

With the following committee amendments:

Page 1, line 5, strike out the word "and"; and on page 1, line 6, after the word "Connecticut", insert "Pennsylvania, West Virginia, Kentucky, Indiana, Illinois, Tennessee, and Ohio."

The committee amendments were agreed to.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The title of the joint resolution was amended to read: "Joint resolution to enable the States of Maine, New Hampshire, New York, Vermont, Massachusetts, Rhode Island, Connecticut, Pennsylvania, West Virginia, Kentucky, Indiana, Illinois, Tennessee, and Ohio to conserve and regulate the flow of and purify the waters of rivers and streams whose drainage basins lie within two or more of the said States."

PERMISSION TO ADDRESS THE HOUSE

Mr. ROBSION of Kentucky. Mr. Speaker, I ask unanimous consent that on next Monday, immediately after the reading of the Journal and the disposition of business on the Speaker's table, I may be permitted to address the House for 30 minutes.

Mr. BANKHEAD. Mr. Speaker, reserving the right to object—I do not think I shall object—next Monday is District day.

I do not see a member of the District Committee here who might want to make an objection, but I hope Members hereafter will be very reasonable in their requests along this line.

Mr. ROBSION of Kentucky. I may say that I was granted this time some time back, but I was ill and could not take advantage of it. I have been here for years and have not made many of these requests.

Mr. BANKHEAD. I am not going to object.

The SPEAKER. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

PRIVATE CALENDAR

The SPEAKER. The Clerk will report the first omnibus bill on the Private Calendar.

The Clerk called the first bill, H. R. 9054, for the relief of sundry claimants, and for other purposes.

The Clerk read as follows:

Title I—(H. R. 971. For the relief of the Tevis Motor Co.)

That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the United States Treasury not otherwise appropriated, the sum of $415 to the Tevis Motor Co., a corporation with its principal place of business at St. Louis, Mo., said sum representing money collected from the sale of one Ford Tudor sedan, owned by said Tevis Motor Co., seized by the United States customs officials in the State of Florida and subsequently sold under the forfeiture and sales provisions of the National Prohibition Act, the proceeds from said sale being paid into the United States Treasury.

With the following committee amendment:

Page 2, line 1, strike out "said sum representing" and insert "in full settlement of all claims against the United States for", and after line 8, insert a colon and the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or

agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

Mr. COSTELLO. Mr. Speaker, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Page 1, line 3, strike out all of title I.

Mr. COSTELLO. Mr. Speaker, this bill provides that the Tevis Motor Co. shall be paid the sum of $415 for an automobile which was taken over by the prohibition agents and sold. This car had been sold by the Tevis Motor Co. on a conditional sales contract and was used in bootlegging. As a result it was confiscated by the Government. The court ordered that the car be sold, and in accordance with the court order it was sold and the sum of $415 was received from the sale.

The Tevis Motor Co. failed to protect its rights, and it was not until after the sale had taken place that the company applied to the court for an order to restrain the sale and protect their title to the car. As a result of the failure of the company to protect its own rights, I feel they are not entitled to relief at this late date, and for this reason I oppose the passage of the bill and recommend that the amendment which I have just offered be adopted.

The SPEAKER. The question is on the amendment offered by the gentleman from California [Mr. COSTELLO].

The amendment was agreed to.

The Clerk read as follows:

Title II—(H. R. 3559. For the relief of John L. Alcock.)

Whereas the Court of Claims of the United States, in the case of John L. Alcock, trading as John L. Alcock & Co., against United States (no. J 567), has ascertained and determined that John L. Alcock, having first obtained in January 1918 the authority and consent of the Spruce Production Division of the War Department and the necessary permits and releases from the War Department and the British Government, accepted in February 1918 foreign contracts or orders for the shipment and delivery from February 1918 to December 1918 of 6,000,000 feet of spruce and fir lumber to be exported for the use of the British Army for the prosecution of the war, and entered into contracts with the American mills for the production and shipment of said 6,000,000 feet of lumber; and

Whereas the said Court of Claims in said case has found that on April 6, 1918, the said Spruce Production Division of the War Department refused to permit any further shipments under the said contracts and foreign orders and on April 9, 1918, ordered the said contracts between the said Alcock and the American mills to be canceled; and

Whereas the said court has found that at the time of the promulgation of said order canceling the said contracts there was undelivered thereunder 5,290,363 feet of said lumber covered by said Alcock's foreign orders, and that had he been allowed to deliver the said lumber, Alcock would have received a profit of $195,230.62, being the difference between what he would have received from the foreign purchasers upon delivery of the lumber, less commissions and ocean and inland freight, and the amount which he had agreed to pay to the American mills free on board cars at mills; and

Whereas the said court has determined that the said Alcock, under the act of Congress approved May 28, 1928 (Private, No. 226, 70th Cong, S. 3308), entitled "An act to confer jurisdiction on the Court of Claims to hear and determine the claim of John L. Alcock", has no right of recovery for the loss or damage sustained by him growing out of the withdrawal of the right of shipment under his foreign orders and the cancelation of his domestic contracts and for the unfulfilled portion of his said foreign orders; and

Whereas it was the purpose of Congress to confer jurisdiction upon the Court of Claims to hear, determine, and award compensation for the claim of the said Alcock for losses and/or damages sustained by him by reason of the prevention by governmental agencies of the performance of all the said contracts, executed or executory, for the shipment and delivery of said lumber: Therefore

That (1) the Court of Claims of the United States be, and hereby is, given jurisdiction to hear and determine the claim of the said John L. Alcock, and to award him compensation for losses and/or damages, if any, sustained by him by reason of the action of the officers of the Signal Corps and/or the spruce-production division of the War Department in promulgating the order refusing to permit any further shipments under his said contracts and foreign orders and directing the canceling of the said contracts of the said Alcock with the said American mills; and to enter a decree or judgment against the United States for such losses and/or damages, with interest thereon at 6 percent from April 6, 1918, until paid, notwithstanding the executory character of such contracts and that there had been no delivery of title to him under his contracts with the American mills, such losses and/or damages to be measured by the difference between what he would have received from the foreign purchasers upon delivery of the lumber, free on board cars at mills, and the amount he had agreed to pay the American mills free on board cars at mills.

(2) The Court of Claims in the adjudication of the said claim is authorized in its discretion to use, in addition to any evidence that may be offered in any suit which may be brought under this act, the pleadings and evidence in the case of John L. Alcock & Co. against the United States (61 Ct. Cls. 312), and in the case of John L. Alcock & Co. against the United States (no. J–567), decided April 4, 1932.

(3) Suit hereunder may be instituted at any time within 4 months after the approval of this act, notwithstanding lapse of time or any statute of limitations, and proceedings therein shall be had as in the case of claims over which such court has jurisdiction under section 145 of the Judicial Code as amended.

With the following committee amendment:

Beginning on line 22, page 2, strike out all the preamble, and in line 12, on page 4, strike out "with interest thereon at 6 percent from April 6, 1918, until paid."

The committee amendment was agreed to.

The Clerk read as follows:

Title III—(H. R. 3575. For the relief of Mrs Lawrence Chlebeck)

That the Secretary of the Treasury be and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Lawrence Chlebeck the sum of $2,000 as compensation in full for injuries sustained in the United States customhouse building, St. Paul, Minn.

With the following committee amendment:

Page 6, line 2, strike out "$2,000 as compensation in full", and insert "$750, in full settlement of all claims against the United States" and in line 5, after the word "Minnesota" insert a colon and the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to, or received by, any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

Mr. HANCOCK of New York. Mr. Speaker, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. HANCOCK of New York: On page 5, beginning with line 22, strike out all of title III.

Mr. HANCOCK of New York. Mr. Speaker, let me state the facts very briefly with reference to this claim. The claimant, Mrs. Chlebeck, says she fell in a post-office building because the steps were slippery. It seems the day on which this accident occurred was a wet day. There had been a light snowfall. People walked in and out of the building and the steps were necessarily made wet and somewhat slippery. Unfortunately this lady slipped and fell, either because the steps were wet or for some other reason.

In my humble judgment, there is no liability whatever. There would not be any liability on the part of a private owner of the building, in my opinion, and there is no liability on the part of the Government. It is just one of those unfortunate accidents. I find nothing in the record to indicate that the agents of the Government were guilty of any neglect or wrongdoing. I cannot see the theory on which the claim is based at all. We all know that snow is slippery, which, of course, cannot be helped. We know that people who walk in slippery places must be careful. The Government cannot insure people against falling down, and the Government is not responsible for the fact that it snows in the wintertime or that snow is slippery.

Mr. MAAS. Will the gentleman yield?

Mr. HANCOCK of New York. I yield to the gentleman from Minnesota.

Mr. MAAS. In St. Paul there is liability within buildings as well as without. This is clearly a case of negligence on the part of the Government. This snow had been tramped

into the building, and the accident occurred on a rather narrow, steep stairway that had been swept out once or twice, but then the janitor became negligent and left considerable snow there which had been tramped in. The steps became wet and slippery. This woman slipped and fell purely through the negligence of the Government. Had the accident occurred in a private building, I may say to the gentleman, the owners of the building would have been liable, and they would have had to pay a great deal more than the modest sum asked for in this bill.

Mr. Speaker, this woman has raised 14 children. Her earning capacity has been very materially reduced, if not practically destroyed. She has carried on the best way she possibly can. I may say we have constantly paid claims where a Government truck has backed into somebody, and I do not see any difference so far as this case is concerned.

Mr. HANCOCK of New York. Mr. Speaker, it is a question of opinion purely. There are many good lawyers here. I have no pride of opinion, but it seems to me in a case of this sort and under the circumstances there is no liability on the part of the Government. I think the Members fully understand the facts. People going in and out of a public building on wet, snowy days track snow in there and the steps become slippery. This woman fell under those circumstances, and that is all there is to the matter.

I simply say very modestly that in my opinion there would not be any liability on the part of a private owner. Other gentlemen may disagree with me, but I have stated the facts, and the House may reach its own conclusion.

Mr. MAAS. Is not that a pretty hard and cold-blooded attitude to take?

Mr. HANCOCK of New York. Well, it is very easy to be generous with Government funds. I do not think we have any right to make gratuity settlements with respect to claims against the Government based on facts which would not warrant a recovery in a private action.

Mr. MAAS. That is a question of fact. In Minnesota you could recover on the facts involved in this case if it were a private owner.

Mr. HANCOCK of New York. That is a question of opinion, too. I submit the matter to the judgment of the House.

Mr. EKWALL. Mr. Speaker, I rise in opposition to the amendment.

I investigated this claim. In years gone by I have sat in the trial of many personal-injury cases. I am positive from the facts adduced in the hearing on this bill that it is a case which in court would have gone to a jury and in which a recovery would have been had. The Government was clearly liable in that it failed to take the ordinary precaution of using sand or some similar substance to keep the stairway from being slippery. This lady, who is the mother of 14 children—of course, this has nothing to do with the question of liability—slipped and fell and broke her wrist and partially paralyzed her arm. The claim was reduced from $2,000 to $750. The committee went into the claim very carefully.

There are a number of lawyers on this committee who have had experience in this line and the report is a unanimous one to the effect that there is liability in the case, and I therefore believe the amendment should be voted down.

The SPEAKER pro tempore (Mr. DRIVER). The question is on the amendment offered by the gentleman from New York [Mr. HANCOCK].

The amendment was rejected.

The Clerk read as follows:

Title IV—(H. R. 3729. To confer jurisdiction upon the United States Court of Claims to hear and determine the claims of Henry W. Bibus, Annie Ulrick, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, Laura B. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania)

That (1) the Court of Claims of the United States be, and it hereby is, given jurisdiction to hear and determine the claims of Henry W. Bibus, Annie Ulrick, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, Laura B. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania, and severally to award judgments covering compensation for losses and/or damages arising through the seizure, condemnation, and sale of those certain lands, theretofore belonging to them, more specifically described in the decree of the District Court of the United States for the Eastern District of Pennsylvania, on June 9, 1921, in a proceeding entitled "United States of America against Certain Tract of Land in Falls Township and borough of Tullytown, Bucks County, Pennsylvania", December term, 1918, no. 5860, notwithstanding the fact that said claimants executed and delivered deeds pursuant to the said decree of the court in the above-entitled matter, and, notwithstanding that said claimants were paid the respective amounts set forth in said decree, the said losses and/or damages to be awarded to be the difference between the entire amount paid by the Government for the whole tract and the amount for which the Government subsequently sold the tract, as the respective interests of the claimants may appear, together with interest thereon at the rate of 6 percent per annum from the date of the Government's entry upon the land, to wit, October 1, 1918, until paid.

(2) Suit hereunder may be instituted at any time within 4 months after the approval of this act, notwithstanding lapse of time or any statute of limitations, and proceedings herein shall be had as in the case of claims over which such court has jurisdiction under section 145 of the Judicial Code as amended.

Amend the title so as to read: "A bill to confer jurisdiction upon the United States Court of Claims to hear and determine the claims of Henry W. Bibus, Annie Ulrick, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, estate of Harry B. C. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania."

With the following committee amendments:

Page 7, line 4, strike out "Laura B. Margerum" and insert "estate of Harry B. C. Margerum."

Page 7, line 25, strike out "together with interest thereon at the rate of 6 percent per annum from the date of the Government's entry upon the land, to wit, October 1, 1918, until paid."

Amend the title.

The committee amendments were agreed to.

Mr. COSTELLO. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Page 6, line 18, strike out all of title IV.

Mr. COSTELLO. Mr. Speaker, this bill involves a tract of land taken over by the Government during the war to be used in connection with a munitions plant in Pennsylvania. The land was taken over on October 1, 1918, as a result of a condemnation suit. The owners were paid for this land in excess of the sum of $472,000. The Government kept the property until 1927, when the land was sold as being of no further use to the Government.

Prior to the sale of the ground the Government was offered a rather large sum for the property, due to the fact that underlying the soil there were valuable deposits of gravel and sand. Prior to the Government taking over the property it was used solely as agricultural land and at the time of the condemnation the owners of the property did not set up its value as gravel-bearing or sand-bearing soil, with an extremely high value; but it was taken over as agricultural land.

Now, as a result of the sale of this property by the Government and an increased value because of the nature of the soil, the former owners are attempting to come in here and get the right to go to the Court of Claims and recover the difference between the amount the court allowed them and the amount which the Government received; namely, $1,620,000.

Apparently the idea seems to be that the Government is not entitled to any profit upon any property of this sort, even though a period of years may have elapsed, and these people want to come in and reap the benefit of a subsequently discovered value in the property.

I do not believe the claimants are entitled to this relief. I think the Federal Government should be entitled to keep the $1,000,000 increase in the value of the property which they received as a result of its sale, and I recommend that the amendment which I have offered be adopted.

Mr. FREY. Mr. Speaker, I rise in opposition to the amendment. If the background of this bill were as stated by the gentleman from California [Mr. COSTELLO], I would probably agree with him. It is not the fact, however, that

the claimants did not know of the gravel and sand content of their land which was taken by the Government. They certainly did know that the land contained the finest gravel to be found near the Atlantic coast. What is more, the purchasers of the land from the Government had previously negotiated with the claimants, the owners of the land, for the purchase of their property because of the gravel and sand content.

Another reason I cannot agree with the gentleman from California is the fact that this land was not taken by the Government in October 1918. On the contrary, in the early part of 1918 the Government, by its agents, called upon the claimants and took leases for their farms upon the representation that they were necessary for governmental purposes, to wit, to build an arsenal. These leases ran for a period of 6 months and contained an option to buy. Of course, the Government had the right at the expiration of the leases to remove all its personal property. Before the expiration of the leases, agents of the Government called upon the claimants and told them they would not be paid any more rent as the Government proposed to condemn the property and build a permanent arsenal, and that there had been a contract entered into between the Government and the Foundation Co. of America for the construction of a bag-loading plant. Work started in May, and on the date of the armistice and the end of the war, November 11, 1918, it was in a partial state of completion.

This partially completed contract was suspended on November 12, 1918. Up until that time there had been no factory erected upon the acreage, the buildings consisting principally of houses for the personnel. Notwithstanding the war was over, and notwithstanding the contract for the erection of the arsenal and bag-loading plant had been suspended, the United States, on January 7, 1919, filed a petition for condemnation in the United States District Court for the Eastern District of Pennsylvania to condemn the lands of these claimants.

On January 14, 1919, 7 days after this petition was filed, the contract was canceled and no more work was done or money expended by the Government. The fact that all work was suspended and the contract definitely canceled was withheld from the court in which the condemnation proceedings had been begun. The matter then proceeded in a leisurely fashion, and the jury of view filed its report on May 6, 1921, over 2 years after the beginning of the action. The Government again failed to disclose to the court these facts, when, on June 9, 1929, a final decree of condemnation was obtained.

In deciding upon your vote, I ask you to remember that the condemnation proceedings were begun in January 1919; that the claimants—the owners—did know of the gravel and sand content of their land; that they had refused to enter into negotiations for the purchase and sale of their land before the war, as well as the further facts that the contract for the construction of the loading plant was definitely canceled on January 14, 1919, and that no work had been done by the Government or money expended upon the land after the signing of the armistice on November 11, 1918.

In December 1927, after the sale and removal by the Government of the personal property, the land was sold for almost five times the amount of money the Government had paid the claimants. This increase in the sale price is admitted to have been due to the gravel and sand content of the land, known to the claimants at the time the Government condemned the property, known to the Government officials themselves, and certainly known to the purchasers of the property.

All the claimants ask is that the Government return to them the money received from the purchasers for the claimants' land which had been taken from them upon the representation that the land was to be used for the manufacture of munitions for war.

Mr. KENNEDY of Maryland. Will the gentleman yield?

Mr. FREY. I yield.

Mr. KENNEDY of Maryland. All they ask is to go into the Court of Claims and have the same rights that they had at the time of the negotiations.

Mr. FREY. Yes. We are not asking for any appropriation; we are asking to be heard in the Court of Claims.

Mr. LAMNECK. Will the gentleman yield?

Mr. FREY. Yes.

Mr. LAMNECK. What was the date the Government paid for this property?

Mr. FREY. On or about June 25, 1921, the Government deposited the money in the registry of the court at Philadelphia.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from California.

The question was taken and the amendment was rejected.

The Clerk read as follows:

Title V—(H. R. 3907. For the relief of James L. Park)

That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to James L. Park, of Philadelphia, Pa., the sum of $2,000. Such sum represents the amount of two Liberty bonds of the face value of $2,000 deposited by the said James L. Park with the United States District Court for the Southern District of Florida to secure the appearance in such court of Charles Park and Ned Shaw.

With the following committee amendments:

Page 8, line 15, after the figures, insert "in full settlement of all claims against the United States."

Page 9, line 1, strike out the period, insert a colon and the following: "*Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendments were agreed to.

The Clerk read, as follows:

Title VI—(H. R. 4841. For the relief of certain disbursing officers of the Army of the United States and for the settlement of individual claims approved by the War Department)

Mr. KENNEDY of Maryland. Mr. Speaker, a similar Senate bill has already been passed. Therefore, I move to strike out title 6 of the bill.

The motion was agreed to.

The Clerk read as follows:

Title VII—(S. 537. For the relief of C. O. Meyer)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to C. O. Meyer the sum of $297.86. Such sum represents the amount paid to C. O. Meyer as substitute carrier while he was postmaster at Meyers Mill, S. C., and which amount was charged by the Department to the account of C. O. Meyer: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 22, line 12, after the figures, insert "in full settlement of all claims against the Government of the United States."

The amendment was agreed to.

The Clerk read as follows:

Title VIII—(S. 560. For the relief of the Western Electric Co., Inc.)

That the Secretary of the Treasury be, and he is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Western Electric Co., Inc., the sum of $7,192.35, in full satisfaction for services and materials furnished the War Department in connection with a contract dated June 5, 1920, and for completing certain work in connection with subaqueous sound-ranging equipment for seacoast defenses: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact,

collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Title IX—(S. 760. For the relief of Harry P. Hollidge)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Harry P. Hollidge, the sum of $903.70, in full settlement of all claims against the Government for damages to his automobile as the result of a collision with a Packard truck belonging to the War Department, said collision occurring on the evening of March 27, 1919, on the Baltimore-Washington Pike: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Title X—(S. 920. For the relief of Ruth J. Barnes)

That the Chief of Finance of the Army shall cause to be paid to Ruth J. Barnes, wife of Joseph A. Barnes, late of the Air Corps Reserve, Air Service, United States Army, who was killed while engaged in flying at the Brooks Field, Tex., on October 12, 1932, an amount equal to 6 months' pay at the rate the said Joseph B. Barnes was receiving at the date of his death. Such amount shall be paid from funds appropriated for pay of the Army.

Title XI—(S. 1360. For the relief of Teresa de Prevost)

That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Teresa de Prevost the sum of $25,000, in full satisfaction of her claim against the United States for losses sustained by reason of alleged irregularities in the distribution through the State Department to claimants under the so-called Alsop award of July 4, 1911, made by the King of Great Britain as arbitrator: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Mr. COSTELLO. Mr. Speaker, I offer the following amendments which I send to the desk and ask to have read.

The Clerk read as follows:

Amendments offered by Mr. COSTELLO: Page 25, line 10, after the word "of", insert "estate of."

The SPEAKER pro tempore. The question is on agreeing to the amendment offered by the gentleman from California.

The amendment was agreed to.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Page 25, line 14, after the word "to", insert "the estate of."

The SPEAKER pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question now is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Horne, its enrolling clerk, announced that the Senate agrees to the amendment of the House to the amendment of the Senate no. 26, disagrees to the amendment of the House to the amendment of the Senate no. 49, further insists upon its amendments nos. 48 and 52 to the bill (H. R. 10919) entitled "An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1937, and for other purposes", asks a further conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. GLASS, Mr. MCKELLAR, Mr. HAYDEN, Mr. STEIWER, and Mr. NORBECK to be the conferees on the part of the Senate.

CALL OF THE HOUSE

Mr. RICH. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER pro tempore. Evidently there is no quorum present.

Mr. COOPER of Tennessee. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 99]

Adair	Eaton	Lee, Okla.	Romjue
Andrew, Mass.	Ellenbogen	Lehlbach	Russell
Andrews, N. Y.	Fenerty	Lemke	Sabath
Barden	Ferguson	Lesinski	Sadowski
Berlin	Fitzpatrick	Lundeen	Sanders, La.
Bolton	Gambrill	McGroarty	Sandlin
Brennan	Gassaway	McKeough	Schaefer
Brewster	Gifford	McLean	Schuetz
Brooks	Gingery	McSwain	Sears
Buckler, Minn.	Gray, Pa.	Maloney	Seger
Buckley, N. Y.	Green	Marcantonio	Sisson
Bulwinkle	Greenway	Meeks	Smith, W. Va.
Caldwell	Greenwood	Miller	Snyder, Pa.
Cartwright	Gwinne	Mitchell, Tenn.	Starnes
Cary	Hamlin	Montague	Steagall
Casey	Hancock, N. C.	Montet	Stewart
Cavicchia	Harter	Moran	Taber
Chapman	Hartley	Nelson	Taylor, Colo.
Claiborne	Hess	Nichols	Utterback
Clark, Idaho	Hill, Samuel B.	Norton	Wearin
Connery	Hoeppel	O'Day	Weaver
Cummings	Hollister	Palmisano	Wigglesworth
Dear	Hook	Parks	Wilcox
Dempsey	Hope	Perkins	Williams

Dietrich	Keller	Pierce	Withrow
Dingell	Kerr	Rabaut	Wolfenden
Dirksen	Kleberg	Ransley	Wolverton
Eagle	Lea, Calif.	Risk	Zioncheck

The SPEAKER pro tempore. Three hundred and nine Members have answered to their names. A quorum is present.

Without objection, further proceedings under the call were dispensed with.

UNIFORM SYSTEM OF BANKRUPTCY

Mr. SUMNERS of Texas. Mr. Speaker, I ask unanimous consent that the communication received from the Senate with regard to the bill H. R. 8940 be laid before the House.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

The SPEAKER pro tempore. The Chair lays before the House the request of the Senate referred to by the gentleman from Texas, which the Clerk will report.

The Clerk read as follows:

THE SENATE OF THE UNITED STATES,
May 12 (calendar day, May 18), 1936.

Ordered, That the Secretary be directed to request the House to return to the Senate the bill H. R. 8940, an act to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto, with the Senate amendments and all papers pertaining thereto.

The SPEAKER pro tempore. Without objection, the request of the Senate will be acceded to.

There was no objection.

PRIVATE CALENDAR

The Clerk will call the next omnibus bill on the Private Calendar.

The Clerk called the next bill, H. R. 9112, for the relief of sundry claimants, and for other purposes.

The Clerk read as follows:

Title I—(H. R. 237. For the relief of the Rowesville Oil Co.)

That the statutes of limitation so far as they bar the linters claim of the Rowesville Oil Co., now owned by the estate of W. C. Fairey, against the United States of America, arising out of contract had with the Government, expiring July 31, 1919, be, and the same are hereby, waived and revoked.

SEC. 2. That said claimant is hereby authorized to file and have said claim adjudicated by the Court of Claims of the United States.

Title II—(H. R. 254. For the relief of the Farmers' Storage & Fertilizer Co., of Aiken, S. C.)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay the Farmers' Storage & Fertilizer Co., of Aiken, S. C., out of any money in the Treasury not otherwise appropriated, the sum of $4,967.97, which represents the balance due and unpaid on 123 bales of linters purchased under contract by the United States Government through its agents on December 31, 1918.

With the following committee amendment:

Strike out all of lines 7 to 14, both inclusive, on page 2, and insert: "That the statutes of limitation, so far as they bar the linters' claim of the Farmers' Storage & Fertilizer Co., of Aiken, S. C., now owned by Wesley Johnson, against the United States of America, arising out of contract had with the Government, expiring January 1, 19 , be, and the same are hereby, waived and revoked."

Mr. BEITER. Mr. Speaker, I offer an amendment to the committee amendment.

The Clerk read as follows:

Amendment offered by Mr. BEITER: Page 2, line 19, after "January 1", strike out "19 " and insert in lieu thereof "1918."

The amendment to the committee amendment was agreed to.

The committee amendment, as amended, was agreed to.

The Clerk read as follows:

Title III—(H. R. 3790. For the relief of Walter W. Johnston)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Walter W. Johnston, out of any money in the Treasury not otherwise appropriated, the sum of $5,495 as full compensation to him, the said Walter W. Johnston, for personal services rendered to the United States Shipping Board Emergency Fleet Corporation and the use of appliances personally owned and operated by him in connection with the launching of ships for the United States Shipping Board Emergency Fleet Corporation for carrying on the war. The ships were launched at the shipyards of the fourth and other districts during the year 1918 and subsequent thereto, said work being done by order of and under the direction of the district supervisor of the United States Shipping Board Emergency Fleet Corporation, and for which services and use of his devices the claimant has not been fully compensated by the United States Shipping Board Emergency Fleet Corporation or the United States.

Mr. COSTELLO. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Page 2, line 21, strike out all of title III.

Mr. COSTELLO. Mr. Speaker, this bill provides for the payment of $5,495 to Walter W. Johnston, who had developed during the war a method for the launching of ships. In order to obtain recovery Johnston took his case to the Court of Claims and was given judgment. As a part of the judgment, the sum of $5,495, which was paid by private shipbuilding companies to him as salary and expenses, was alleged by the Government as not to be due him from the Government, and that that amount should therefore be deducted from the $20,000 which Johnston recovered in this judgment in the Court of Claims. Johnston alleges that this sum of $5,495 was not salary but was only his expense money. He, therefore, contends that it should not be deducted from the judgment of $20,000, whereas the Government takes the opposite attitude. The Government also feels that the decision of the court should be final and that it should not be reopened by Congress going behind the decision and making payment of this sum of money. In my opinion, the motion to strike out the title should be adopted and the sum of $5,495 should not be paid to Walter W. Johnston.

Mr. RICH. Mr. Speaker, will the gentleman yield?

Mr. COSTELLO. I yield.

Mr. RICH. As I understand, the gentleman has asked that the sum of $5,495 be reduced in this claim? Is that it?

Mr. COSTELLO. My motion is to strike out the entire title.

Mr. RICH. I think if the membership will read the statement put in the RECORD yesterday by the gentleman from Missouri [Mr. COCHRAN], giving the reasons why the claim should be rejected, they will agree with the gentleman.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from California [Mr. COSTELLO].

The amendment was agreed to.

The Clerk read as follows:

Title IV—(H. R. 1618. For the relief of Anna McDonald)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any funds in the Treasury not otherwise appropriated, the sum of $422.50, with interest, to Anna McDonald, being in full settlement of all claims against the Government in the name of her deceased husband, James McDonald, who served in the Civil War, said claim having been approved by the Court of Claims, February 6, 1905.

With the following committee amendment:

On page 3, line 20, strike out the figures "$422.50" and insert in lieu thereof "$422.45."

The committee amendment was agreed to.

The Clerk read as follows:

Title V—(H. R. 4059. For the relief of Ella B. Kimball, daughter and only heir of Jeremiah Simonson)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Ella B. Kimball, daughter and only heir of Jeremiah Simonson, the sum of $16,441.81, being the amount found due by the Court of Claims, as reported to Congress in Senate Document No. 320, Fifty-ninth Congress, second session, and also contained in Court of Claims Congressional Cases, volume 16, page 703.

Title VI—(H. R. 6356. To carry out the findings of the Court of Claims in the case of Joseph G. Grissom)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Joseph G. Grissom, widow of Joseph G. Grissom, late a second lieutenant, Company H, One Hundred and Thirtieth Regiment Indiana Volunteer Infantry, $1,208.19, being for 12½ months' extra pay proper of his grade in the Volunteer service, due him at the time of his honorable discharge.

With the following committee amendment:

Page 4, line 21, strike out "$1,208.19" and insert in lieu thereof "$1,153.43."

The committee amendment was agreed to.

Title VII—(H. R. 7727. To confer jurisdiction on the Court of Claims to hear and determine the claim of George B. Marx, Inc.)

That the Court of Claims of the United States be, and it is hereby, given jurisdiction to hear and determine the claims, legal or equitable, of George B. Marx, Inc., a New York corporation, and assignee or successor of George B. Marx, growing out of or arising under or from the suspension and cancelation of a certain contract no. 4241, dated August 6, 1918 (order no. 110016), which claims are for reimbursement and payment for services performed and goods furnished under said contract and order, for goods manufactured or in process of manufacture, and for materials and equipment bought, contracted, or committed for by George B. Marx under the said contract, which contract was made by the United States with the said George B. Marx for the construction of a quantity of carts for carrying wire for the use of the Signal Corps, United States Army; and to enter decree or judgment upon said claims, notwithstanding the bars or defenses of any settlement, release, or adjustment heretofore made or of any assignment of said claims, by George B. Marx to George B. Marx, Inc., or of laches, lapse of time, or of any statute of limitations: *Provided, however,* That the United States shall be given credit for any sum heretofore paid the said George B. Marx on said claims.

SEC. 2. The record, or any part of the record, of the proceedings and hearings had before the Committee on War Claims of the House of Representatives on H. R. 1611 in the second session of the Seventy-first Congress and the third session of the Seventy-first Congress, together with any and all exhibits, affidavits, or inventories presented to or filed with the said War Claims Committee of the House of Representatives in connection with said act, and together with any and all Government reports, statements, inventories, and other documents, on file in the War Department or any other department of the Government or elsewhere, having a bearing upon the claim embodied in said act, may be introduced before the Court of Claims with the full force of depositions, subject to objections as to materiality and relevancy.

SEC. 3. Such claims may be instituted at any time within 4 months from the approval of this act. Proceedings in any suit brought in the Court of Claims under this act, appeals therefrom, and payment of any judgment therein shall be had as in the case of claims over which such court has jurisdiction under section 145 of the Judicial Code, as amended.

Title VIII—(S. 2520. For the relief of T. D. Randall & Co.)

That the claim of T. D. Randall & Co. growing out of losses and/or damages suffered under purchase orders nos. 1904, and 1914 to 1919, both inclusive, for furnishing hay to the Army during the late war, is hereby referred to the United States Court of Claims,

with jurisdiction to hear the same to judgment and to adjudicate the same upon the basis of the losses and/or damages suffered due to car shortage and/or other war conditions: *Provided*, That suit on such claim may be instituted at any time within 4 months after the date of enactment of this act, notwithstanding the lapse of time or any statute of limitations.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The Clerk called the next bill, H. R. 9195, for the relief of sundry claimants, and for other purposes.

The Clerk read as follows:

Title I—(S. 1186. For the relief of Frank P. Ross)

That jurisdiction is hereby conferred upon the Court of Claims to hear, determine, and render judgment upon the claim of Frank P. Ross, of Tacoma, Wash., against the United States, for damages arising out of the patenting to another person of lands in Pacific County, Wash., which had been selected or entered by said Frank P. Ross under the homestead laws, and for damages arising out of the subsequent cutting of timber from such lands.

SEC. 2. Suit upon such claim may be instituted at any time within 1 year after the date of enactment of this act, notwithstanding the lapse of time or any statute of limitations. Proceedings for the determination of such claim, and appeals from and payment of any judgment thereon, shall be in the same manner as in the case of claims over which said court has jurisdiction under section 145 of the Judicial Code, as amended.

Title II—(S. 1490. For the relief of Earl A. Ross)

That jurisdiction is hereby conferred upon the Court of Claims to hear, determine, and render judgment upon the claim of Earl A. Ross, of Chicago, Ill., for damages arising out of the patenting to another person of lands in Pacific County, Wash., which had been selected or entered by said Earl A. Ross, under the homestead laws, and for damages arising out of the subsequent cutting of timber from such lands.

SEC. 2. Suit upon such claim may be instituted at any time within 1 year after date of enactment of this act, notwithstanding the lapse of time or any statute of limitations. Proceedings for the determination of such claim, and appeals from and payment of any judgment thereon, shall be in the same manner as in the case of claims over which said court has jurisdiction under section 145 of the Judicial Code, as amended.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CALL OF THE HOUSE

Mr. RICH. Mr. Speaker, we are passing important legislation today, and I make the point of order there is not a quorum present. The Members should be here to know what is going on.

The SPEAKER pro tempore. The Chair will count. [After counting.] Evidently there is not a quorum present.

Mr. COSTELLO. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 100]

Adair	Dempsey	Hartley	Mansfield
Andresen	DeRouen	Healey	Marcantonio
Andrew, Mass.	Dietrich	Hennings	Marshall
Andrews, N. Y.	Dingell	Hess	Mead

Shannon	Sumners, Tex.	Wigglesworth	
Sisson	Taber	Wilcox	

The SPEAKER pro tempore. Two hundred and seventy-two Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PRIVATE CALENDAR

The SPEAKER pro tempore. The Clerk will call the next omnibus claims bill.

The Clerk called the next bill, H. R. 11214, for the relief of sundry claimants, and for other purposes.

The Clerk read as follows:

Title I—(H. R. 1105. For the relief of Lucy Jane Ayer.) By Mr. HOLLISTER

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to Lucy Jane Ayer, out of any money in the Treasury not otherwise appropriated, the sum of $10,000 as compensation for personal injuries caused as a result of an accident involving an Army vehicle near Dodsonville, Ohio, on September 24, 1933.

With the following committee amendments:

Page 1, line 8, strike out "$10,000 as compensation" and insert in lieu thereof "$4,000 in full settlement of all claims against the United States for personal injuries."

At the end of the bill add a new proviso, as follows: "*Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendments were agreed to.

Mr. COSTELLO. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Page 1, line 3, strike out "title I."

Mr. COSTELLO. Mr. Speaker, in explanation of this amendment I may say that the bill provides for the payment of $4,000 to a woman who was injured as the result of an accident on a highway in Ohio. The claimant's husband had parked their car upon the highway in order to change a tire. As a result of the car being so parked on the highway, two Army trucks had difficulty in passing, and the second truck in passing caused a soldier to be thrown from the truck, who struck the claimant. She sustained various injuries.

Mr. Speaker, I am opposed to the passage of the bill because of the fact the claimant parked the car upon the highway in the line of travel of vehicles, that the car being so parked was an act of negligence.

Mr. Speaker, I hope the amendment will be favorably considered.

Mr. EKWALL. Mr. Speaker, I rise in opposition to the amendment.

Mr. Speaker, I think this is a most meritorious claim. The claimant and her husband were in a place where they had a perfect right to be. The Government truck was operated in a very negligent manner, and the claimant was seriously injured. This claim was gone into very thoroughly and, as I remember, there was a unanimous report from the Claims Committee.

I do not think there can be any question as to the legal liability of the Government, and I am of the opinion the amendment should be voted down.

The SPEAKER. The question is on the amendment of the gentleman from California.

The question was taken; and on a division (demanded by Mr. BLANTON) there were—ayes 23, noes 56.

Mr. BLANTON. Mr. Speaker, I object to the vote on the ground there is not a quorum present.

The SPEAKER. The Chair will count. [After counting.] One hundred and thirty-five Members are present, not a quorum. The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 50, nays 227, answered "present" 1, not voting 148, as follows:

[Roll No. 101]

Mr. Dunn of Mississippi with Mrs. Greenway.
Mr. Eagle with Mr. McGroarty.

Mr. DARROW, Mr. GILCHRIST, Mr. LAMNECK, Mr. CURLEY, Mr. CULLEN, and Mr. SNYDER of Pennsylvania changed their vote from "yea" to "nay."

The doors were opened.

The result of the vote was announced as above recorded.

Mr. BANKHEAD. Mr. Speaker, I ask unanimous consent to address the House for 3 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. BANKHEAD. Mr. Speaker, I am in no sense a mentor for the action of any Member for staying here when we have up for consideration the omnibus private claims bill. The truth is there are a great many Members here who are very vitally interested in items included in these various omnibus bills. For a great many years we have had difficulty in securing for the Members an opportunity for the real consideration of the merits of many of these private bills. We are operating at this session of the Congress under a new rule.

Mr. Speaker, we are approaching what we hope is the end of the session. There is great pressure being brought on the leadership of the House to try to get the program disposed of. I occupy a rather unique position in that I have been here for 20 years, yet I have never had a bill on the Private Claims Calendar. However, I realize there are a great many Members—probably every Member of the House—who may be interested in this Private Calendar. Of course, if a quorum does not remain present, roll calls will be necessary if a point of order is made. If it is at all possible for the Members to remain here for an hour or two longer, I am assured by the chairman of the committee that substantial progress can be made in disposing of a good many of the bills that are now pending. As a matter of fair dealing, I request the Members to stay. It may be a little inconvenient for some of you to stay away from your office, but I want you to remember that you, yourself, have had bills on this calendar that you were anxious to have disposed of. I think it is a fair request to ask the Members to remain here for the remainder of the session today in order to transact this public business.

Mr. SNELL. Will the gentleman yield?

Mr. BANKHEAD. I yield to the gentleman from New York.

Mr. SNELL. I am wondering if the gentleman can tell us how near the end of the session we are.

Mr. BANKHEAD. As I stated some days ago when that question was put, I am neither a crystal gazer nor a clairvoyant; but we indulge the reasonable hope, I may say to the gentleman from New York, if the Senate is as expeditious in disposing of the matters now remaining as the House can be, we may be able to adjourn this session of Congress not later than the 5th of June, for the reason we want to give the gentleman from New York ample opportunity to prepare that great speech that he will make as the permanent chairman of the Republican convention [applause], if they decide to hold the convention. [Laughter.]

Mr. SNELL. We think now we will hold the convention.

Mr. BANKHEAD. And I want to congratulate the gentleman from New York upon the honor that has been conferred upon him.

Mr. SNELL. I thank the gentleman.

Mr. BANKHEAD. May I say the temporary chairman of that convention is going to have a great deal of trouble with reference to whether or not he shall view with alarm or point with pride to the actions of the present administration, having voted for about as many New Deal proposals as he voted against; but not so with the gentleman from New York [Mr. SNELL]. He is a persistent, consistent, and perpetual standpatter and will have no trouble. [Laughter and applause.]

Mr. COSTELLO. Mr. Speaker, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Page 1, line 8, after the words "sum of", to strike out "$4,000" and insert "$2,000."

Mr. COSTELLO. Mr. Speaker, this amendment simply reduces the amount of the claim from $4,000 to $2,000. The original bill as introduced in the House called for the sum of $10,000, which the committee has seen fit to reduce to $4,000. It is noted that the hospital bills in this case amount to a total of only $750, and it appears to me that a balance of $1,250 would be adequate compensation to the claimant involved in this bill, especially in view of the fact I am personally of the opinion that she herself was in part responsible for the injuries which she sustained.

Mr. EKWALL. Mr. Speaker, I rise in opposition to the amendment.

The gentleman from California [Mr. COSTELLO] makes the statement that in his opinion $2,000 is ample compensation for the claimant involved in this bill. This claimant has hospital bills and medical bills totaling more than $750. She has also sustained loss in wages to an amount of $1,300 or over. These two items total over $2,000. In addition, she has sustained permanent injury, including a badly fractured ankle, and will be crippled to some extent for the balance of her life. I am sure if the gentleman from California [Mr. COSTELLO] sustained a similar injury he would be requesting damages of fifteen or twenty thousand dollars.

Mr. Speaker, this amendment should be voted down. The committee reduced the claim to $4,000 after a thorough investigation and made this reduction from $10,000, as called for in the original bill.

The SPEAKER. The question is on the amendment offered by the gentleman from California [Mr. COSTELLO].

The amendment was rejected.

The Clerk read as follows:

Title II—(H. R. 2479. For the relief of Charles G. Johnson, State treasurer of the State of California.) By Mr. ENGLEBRIGHT

That the Secretary of the Treasury is authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Charles G. Johnson, State treasurer of the State of California, the sum of $17,500. Such sum represents the value of 10 coupons from 3½-percent Treasury notes, series C–1930–32, nos. 3512B, 3513C, 3514D, 4361A, 4362B, 4363C, 4364D, 4365E, 4366F, and 4367H, of the $100,000 denomination, which coupons were payable on December 15, 1929, and were lost or destroyed in the office of the State treasurer of California: *Provided*, That none of said coupons shall have been presented to the Treasury for payment and that Charles G. Johnson shall first file in the Treasury Department a bond in the penal sum of double the amount of the sum payable pursuant to the provisions of this act, in such form and with such corporate surety as may be acceptable to the Secretary of the Treasury, to indemnify and save harmless the United States from any loss on account of such lost or destroyed coupons.

Title III—(H. R. 3943. For the relief of D. E. Wooldridge.) By Mr. SPENCE

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to D. E. Wooldridge the sum of $5,900 for injuries received by the said D. E. Wooldridge through the negligence and carelessness of Charles Campbell, employed by, and acting at that time as an investigator for the Bureau of Industrial Alcohol and in the discharge of his duties, the said injuries being caused by the said Campbell throwing a keg filled with moonshine whisky from the upstairs window of a building and striking the said Wooldridge on the head and face.

With the following committee amendment:

Page 3, line 17, after the word "of" strike out the remainder of the line and down to and including line 24, and insert in lieu thereof: "$1,000 in full settlement of all claims against the United States for injuries received by him when struck on the head and face by a keg filled with moonshine whisky and dropped by Charles Campbell, an investigator of the Alcohol Beverage Unit, during a raid at La Grange, Oldham County, Ky., on January 28, 1934: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendment was agreed to.

Mr. COSTELLO. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Beginning on page 3, line 12, strike out all of title III.

Mr. COSTELLO. Mr. Speaker, this amendment would strike out this particular title of the bill. The title provides for the payment of $1,000 to D. E. Wooldridge, for injuries which he received when a keg of moonshine liquor was thrown from an upstairs window and struck the claimant.

The claimant was not in the employ of the Government, but was a civilian who, with two others, went out to assist Federal agents in destroying this liquor. The Federal agents had warned these civilians to keep away from the building because of the manner in which they were handling these kegs of liquor, namely, throwing them out of the second-floor window to the ground below. They would then roll the kegs down the hill. The claimant states he did not hear these warnings, although the Federal agents very definitely state the warnings were given frequently. The work was being carried on in the night so it was dark, yet it is my contention that the injury was due entirely to the carelessness and negligence of the claimant under this title that he sustained these injuries, and therefore the Government should not be held liable even in the sum of $1,000.

I recommend the adoption of the amendment.

Mr. HOUSTON. Mr. Speaker, I rise in opposition to the amendment.

I reported on this bill some weeks ago, and, as I recall, this accident happened at about 2:30 o'clock in the morning. The agents of the Department of Justice allowed, if they did not encourage, the county attorney to go with them to raid the house containing the liquor. They went out there at this hour of the morning and turned their automobile lights on the house, and the Federal agents went upstairs and began to throw the liquor, which was in kegs, out of the window. They claim that they cautioned this man to keep out the way, but he states he did not hear them, and I do not think he would deliberately have run up there and let one of these kegs hit him and permanently injure one of his eyes.

The bill originally was for $5,900 and the committee has reduced the amount to $1,000. He had $658 of doctors' bills and his anticipated doctors' bills amount to $350. Therefore we made the amount $1,000 to cover all expenses, and we think the claimant is entitled to this amount of money, and I hope the amendment is voted down.

The amendment was rejected.

The Clerk read as follows:

Title IV—(H. R. 4256. For the relief of Anna Caporaso.) By Mr. BOYLAN

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $5,000 to Anna Caporaso for injuries sustained as a result of being struck by a Government-owned truck of the Post Office Department, New York City, N. Y., on October 29, 1928.

With the following committee amendment:

Page 4, line 22, strike out "$5,000" and insert "$1,000", and after the word "Caporaso" insert "in full settlement of all claims against the United States."

Page 5, line 2, after "1928", insert "*Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The committee amendments were agreed to.

The Clerk read as follows:

Title V—(H. R. 4364. For the relief of Andrew Johnson.) By Mr. BUCK

The the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $2,500 to Andrew Johnson, of Sacramento, Calif., in full settlement of all claims against the Government of the United States for damage and injuries sustained when his car was struck by a Civilian Conservation Corps truck on October 31, 1933: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 5, line 19, strike out "$2,500" and insert "$1,500."

The committee amendment was agreed to.

The Clerk read as follows:

Title VI—(H. R. 4373. For the relief of Albert Gonzales.) By Mr. DEMPSEY

That the United States Employees' Compensation Commission be, and it is hereby, directed to apply and extend the provisions, benefits, and privileges of the act entitled "An act to provide compensation for employees of the United States suffering injuries in the performance of their duties, and for other purposes", approved September 7, 1916, as amended, to the case of Albert Gonzales on account of injuries suffered by him on July 28, 1929, while a student at the citizens' military training camp at Fort Bliss, Tex., effective from said July 28, 1929: *Provided*, That, for the purposes of this act, the pay and allowances of said Albert Gonzales at the time of his said injuries shall be considered as having been $150 per month.

With the following committee amendment:

Strike out all of title 6 and insert the following: "That the United States Employees' Compensation Commission is authorized and directed to receive the claim of Albert Gonzales for disability suffered by him on July 28, 1929, while a student at the citizens' military training camp, Fort Bliss, Tex., and to extend to him the provisions, benefits, and privileges of the act entitled 'An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties and for other purposes', approved September 7, 1916, as amended: *Provided*, That for the purposes of this act, the pay and allowances of said Albert Gonzales at the time of his said disability shall be considered as having been $150 per month: *Provided further*, That no benefits shall accrue prior to the approval of this act."

The committee amendment was agreed to.

Mr. HANCOCK of New York. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Page 6, line 12, strike out all of title 6.

Mr. HANCOCK of New York. Mr. Speaker, when the law creating citizens' military training camps was passed, provision was made to give hospitalization to all young men at camps for any injuries received there or while going to and returning from camp. There was nothing put in the law which authorized compensation for any injury in camp.

Cases of this kind frequently arise where young men are injured. So far as I know no bill granting the benefits of Federal Employees' Compensation Act to a C. M. T. C. boy has been passed, although it may have escaped my attention.

The circumstances of this case were as follows: The boy was in swimming and when diving from a high stand struck on his face and severely injured his eyes. It is a pitiful case, but the question involved here is whether we shall invite a flood of legislation of this kind if the bill is passed. There probably have been hundreds of injuries at camps and why should we pick out one for compensation and not take them all? I think the Committee on Military Affairs should consider the question of passing a general law on the subject. I see the gentleman from Georgia [Mr. TARVER] on his feet; he has had several bills for parties injuried at citizens' military training camps and he can bear me out.

Mr. TARVER. Mr. Speaker, I will say that one of my bills has been passed, and there are other bills to which the gentleman objected under the old rule requiring unanimous consent. They have not been passed. But let me say that I can conceive of no more reasonable thing than extending the benefits of the compensation law under certain circumstances. I think we should extend the benefits of the compensation law to young men injured in these citizens' military training camps in cases deserving such consideration.

Mr. HANCOCK of New York. I think the matter should be taken up by the proper committee and general legislation enacted. This particular bill provides that this young man shall be considered as having earned $150 a month in computing compensation. Some gentlemen may think that it should be $300 and others that it should be $100 when drafting similar bills. It seems to me that it is quite liberal to pay $150 a month to a young man 17 years old.

Mr. TARVER. Let me say that I have no interest in the matter. I do not know who introduced the bill, but it seems to me that the gentleman's objection is not well founded and the bill should be given the consideration that it deserves. There is no general law on the subject, but this should not keep Congress from doing justice in individual cases called to its attention.

Mr. HANCOCK of New York. What I object to is the method of doing business. I do not see why we should single out one unfortunate young man and not take care of them all. I do not think this is the proper way of doing business.

Mr. KENNEDY of Maryland. Mr. Speaker, will the gentleman yield?

Mr. HANCOCK of New York. Yes.

Mr. KENNEDY of Maryland. The gentleman understands, of course, that the War Department favors this bill?

Mr. HANCOCK of New York. Yes; but it is our responsibility.

Mr. KENNEDY of Maryland. They state in their report they favor it because of the unusual circumstances surrounding this particular accident, and, further, because of the absence of any general legislation which they say should be passed, and that this particular claimant should not be harmed because of the delay in passing general legislation. As to the $150, we must arrive at some amount, and it seems to me that $150 is a small amount to pay for one who is totally blind. As to precedent, there are plenty of precedents set forth in the report of the War Department. This bill is a bill introduced by the gentleman from New Mexico [Mr. DEMPSEY], and I am not thoroughly familiar with all of the details.

Mr. COLDEN. Mr. Speaker, I rise in opposition to the amendment. Although Mr. DEMPSEY, of New Mexico, introduced the bill, I am informed that this young man lives in Los Angeles, in my district in southern California. Here is a young man who has lost both eyes. He is permanently blind. This bill proposes to pay him $150 per month. I cannot agree with the gentleman from New York in the suggestion that $150 a month is too much to pay for this injury. I think it is a small amount. Who would surrender his eyesight for such a pittance?

Mr. RAMSPECK. Mr. Speaker, will the gentleman yield?

Mr. COLDEN. Yes.

Mr. RAMSPECK. The beneficiary will get only $100 a month. He gets two-thirds of the amount of his salary.

Mr. COLDEN. I thank the gentleman for the correction. The War Department has recommended this bill for the reason the gentleman from New York suggested, namely, that there is no law or provision to cover a case of this kind. This young man was in the citizens' military training camp at Fort Bliss, Tex. While in the service he lost both of his eyes. He was not only treated at the hospital at Fort Bliss but was brought to Walter Reed Hospital in Washington. Under the circumstances, since there is no general law—and I wholly agree with the suggestion of the gentleman from New York that there should be such a law—there is only one way to relieve this young man. Because there are exceptions, Congress considers private claims. Must he wait around stumbling in his blindness for years, perhaps, before Congress really passes a bill to cover such an emergency as this? I ask the Members of the House, in view of the recommendation of the committee and the recommendation of the War Department, to vote down the amendment offered by the gentleman from New York.

The SPEAKER. The question is on the amendment offered by the gentleman from New York.

The amendment was rejected.

The Clerk read as follows:

Title VII—(H. R. 4829. For the relief of Weymouth Kirkland and Robert N. Golding.) By Mr. KENNEDY of Maryland

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Weymouth Kirkland and Robert N. Golding the sum of $5,155.70, for legal services rendered to the Railroad Labor Board under the direction and approval of the Department of Justice: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 7, line 23, after the word "Kirkland", strike out the comma and "Robert N. Golding, the sum of $5,155.70" and insert "the sum of $2,000, and to Robert N. Golding, the sum of $3,155.70; in all, $5,155.70, in full settlement of all claims against the United States."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Title VIII—(H. R. 5078. For the relief of Mrs. Charles F. Eikenberg.) By Mr. DOCKWEILER

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Mrs. Charles F. Eikenberg, the sum of $4,186. Such sum shall be in full settlement of all claims against the United States on account of injuries sustained by the said Mrs. Charles F. Eikenberg on or about the 1st day of October 1933 as result of collision with a Government truck no. C. C. C. 65.

With the following committee amendment:

Page 9, at the end of the bill, strike out the period, insert a colon, and the following: *"Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. COSTELLO. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Page 8, line 22, after the words "sum of ", strike out "$4,186" and insert in lieu thereof "$3,186".

The SPEAKER. The question is on agreeing to the amendment.

The amendment was rejected.

The Clerk read as follows:

Title IX—(H. R. 5150. For the relief of Alexander E. Kovner.) By Mr. ZIONCHECK

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Alexander E. Kovner, of Seattle, Wash., the sum of $10,000, being full compensation for cost of hospital and medical care, pain and suffering, and permanent disability, resulting from the said Alexander E. Kovner being struck by a truck belonging to the Third Brigade of the United States Marines, in the city of Tientsin, China, of May 14, 1928, such accident being primarily due to the negligence of the driver of the said truck.

With the following committee amendments:

Page 9, line 19, strike out "$10,000, being full compensation" and insert in lieu thereof "$5,000, in full settlement of all claims against the United States."

Page 10, at the end of the bill, strike out the period, insert a colon and the following: *"Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000."

The SPEAKER. The question is on agreeing to the amendments.

The amendments were agreed to.

Mr. HANCOCK of New York. Mr. Speaker, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. HANCOCK of New York: Page 9, line 14, strike out all of title IX.

The SPEAKER. The question is on agreeing to the amendment.

Mr. HANCOCK of New York. Mr. Speaker, the House seems to be in quite a generous mood today, and I have no doubt that it will vote down my amendment. Briefly, these are the facts: A young Russian was riding a bicycle in Tientsin, China. He collided with a truck operated by one of our marines. The young Russian was badly injured. He comes here now and asks for $5,000. I quote briefly from the report made by the Secretary of the Navy in connection with this bill:

It will be noted therefrom that the board found that the claimant "was not keeping a sharp lookout, but was riding with his head down" and that he "rode his bicycle into the left side of the said gas tanker, his bicycle striking the heavier vehicle at about a point above the left rear wheel." As the result of its investigation the board expressed the opinion "that the responsibility for the accident rests solely with the said Alexander Kovner, in that he did not exercise due care and caution while riding his bicycle in heavy traffic."

I maintain that to make an award of $5,000 under such circumstances is unjustified.

Mr. KENNEDY of Maryland. Mr. Speaker, I rise in opposition to the amendment. There is not any question about liability in this case. As a matter of fact, the driver admitted it. Because of some unusual traffic regulations in China, it seems that you drive on a different side of the road than in this country. This man has already expended some $6,000 in medical treatment for his son, and the committee feels that $5,000 is the minimum amount that should be allowed in this particular case. For that reason we reduced it from $10,000 to $5,000.

I hope the amendment will be voted down.

The SPEAKER. The question is on the amendment offered by the gentleman from New York [Mr. HANCOCK].

The question was taken; and there were on a division (demanded by Mr. RICH)—ayes 24, noes 53.

Mr. RICH. Mr. Speaker, I object to the vote on the ground there is no quorum present, and I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is no quorum present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 68, nays 198, answered "present" 1, not voting 159, as follows:

[Roll No. 102]

Mr. Claiborne with Mr. Burdick.
Mr. Ford of California with Mr. [illegible]uckler.

Mr. Richardson with Mr. Tolan
Mr. Keller with Mr. Kopplemann.
Mr. Moritz with Mr. O'Neal.
Mr. Binderup with Mr. Mason.
Mr. Scrugham with Mr. Smith of Washington.
Mr. Dempsey with Mr. O'Malley.
Mr. Casey with Mr. Quinn.
Mr. Russell with Mr. Colmer.
Mr. Greever with Mr. Gassaway.
Mr. Crosby with Mr. Carpenter.
Mr. Gingery with Mr. Duffey of Ohio.
Mr. Oliver with Mr. Brooks.

Mr. CRAWFORD changed his vote from "no" to "aye."

The result of the vote was announced as above recorded.

The doors were opened.

The Clerk read as follows:

Title X—(H. R. 5635. For the relief of the mayor and aldermen of Jersey City, Hudson County, N. J., a municipal corporation.)
By Mr. HART

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, and there is hereby appropriated for such payment, to the mayor and aldermen of Jersey City, the sum of $62,340.65 for water actually used by the Erie Railroad Co., of Jersey City, during the period when said railroad was under the jurisdiction and control of the United States Railroad Administration: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 10, strike out, beginning with line 18, all of the balance of page 10 and all of page 11 down to and including line 14 and insert the following:

"That jurisdiction is hereby conferred upon the Court of Claims to hear, determine, and render judgment on the claim of the mayor and aldermen of Jersey City, Hudson County, N. J., a municipal corporation, for water actually used by the Erie Railroad Co., of Jersey City, during the period when said railroad was under the jurisdiction and control of the United States Railroad Administration. Suit hereunder may be instituted at any time within 1 year after the approval of this act, and proceedings in such suit and payment of any judgment therein shall be had as in the case of claims over which such court has jurisdiction by virtue of section 145 of the Judicial Code, as amended."

Amend the title so as to read: "A bill conferring jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claim of the mayor and aldermen of Jersey City, Hudson County, N. J., a municipal corporation."

The committee amendments were agreed to.

The Clerk read as follows:

Title XI—(S. 925. To carry into effect the findings of the Court of Claims in the case of William W. Danenhower)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay to William W. Danenhower, out of any money in the Treasury not otherwise appropriated, the sum of $34,260 for damages caused by the depreciation in value of his property situate in square 737 in the city of Washington, D. C., which said damages were caused by the elimination of the grade crossings of railroads in pursuance to the act of Congress approved February 12, 1901 (31 Stat. L. 774), and acts supplemental thereto, as found by the Court of Claims and reported in Senate Document No. 2, Sixty-seventh Congress, first session: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 12, after the word "to" in line 8, insert "Sallie M. Danenhower, executrix of the estate of"; page 12, line 11, after the figures, insert "in full settlement of all claims against the United States"; page 12, line 12, strike out the word "his" and insert "said William W. Danenhower's."

The committee amendments were agreed to.

The Clerk read as follows:

Title XII—(S. 952. For the relief of Zelma Halverson)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated and in full settlement against the Government, the sum of $50 per month in an amount not to exceed $5,000 to Zelma Halverson to compensate her for the death of her husband, Harry Halverson, who lost his life August 21, 1933, while fighting a forest fire in Montana: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Mr. COSTELLO. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COSTELLO: Page 13, line 12, strike out title XII.

Mr. COSTELLO. Mr. Speaker, this bill provides that monthly payments shall be made to the widow of Harry Halverson, who was killed fighting a forest fire. The fire took place in the State of Montana. Halverson was employed by a private company to fight this forest fire. At no time during the fighting of this fire was he actually engaged by the Federal Government. After he had been fighting the fire and directing a crew of some C. C. C. men for 2 days, the foreman of this private company and the man in charge of the C. C. C. camp entered into a discussion and suggested that Halverson should be put upon the Government pay roll. A memorandum to that effect was forwarded to the officer in charge of the C. C. C. camp, Mr. McKnight. This memorandum to that effect did not reach Mr. McKnight, in charge of the camp, until August 25. Halverson died on August 21. So that even though it was the intention, possibly, to put Halverson upon the Federal pay roll in the fighting of this fire, the fact is that he was never a Federal employee. Therefore there is absolutely no justification for the Federal Government being called upon to make this monthly payment to his widow.

Mr. WOODRUFF. Mr. Speaker, will the gentleman yield?

Mr. COSTELLO. I yield.

Mr. WOODRUFF. The gentleman referred to was in the Federal service when he lost his life, was he not?

Mr. COSTELLO. He was at no time in the Federal service.

Mr. WOODRUFF. Was he working for the Federal Government?

Mr. COSTELLO. No. The fire was not actually upon any Government property. He was in the employ of a private company, and he was simply directing, as a private employee of this company, the work of these C. C. C. enrollees.

Mr. WOODRUFF. In other words, he was directing employees of the Federal Government, was he not?

Mr. COSTELLO. In fighting the fire; yes.

Mr. WOODRUFF. Then he was in the service of the United States Government, and I see no reason in the world why this man should not be paid.

Mr. COSTELLO. On the contrary, he was not in the service of the Federal Government. He was actually in the employ of a private concern. He was being paid by them. In order to carry on effectively the fighting of the fire, some of the C. C. C. enrollees were put under his supervision to carry on this work of fighting the fire, but he was in no sense a Government employee on the pay roll of the Government. The recommendation, which is the only basis on which this claim is given any semblance of validity, had not been forwarded to the officer in charge of the C. C. C. camp, and hence could not be acted upon, prior to the death of Halverson.

I recommend that the amendment to strike out this title be acted on favorably.

Mr. AYERS. Mr. Speaker, I rise in opposition to the amendment which would kill this bill in its entirety.

Mr. Speaker, this is a meritorious case. The real facts are that Halverson was employed by the Sieben Livestock Co. and early in August of 1933, had been assigned to fighting forest fire which threatened the Sieben and other private property. Later on, about August 16, proper Government authority was given to a C. C. C. camp, under Superintendent McKnight, to assist in fighting this fire. Then the fire went on to endanger national forest property, and the forest supervisor, Mr. Templer, got on the ground and he and C. C. C. Superintendent McKnight realized the necessity of having experienced men at the head of the fire-fighting crews, and consulted with Mr. Sheriff of the Sieben Livestock Co., who suggested to them that they put Halverson on as a straw boss to direct the C. C. C. boys and civilian fire fighters. At this time the Forestry Department and the C. C. C. Service had taken over control of operations against the fire which was continually becoming more serious. On August 19, Forest Supervisor Templer sent to C. C. C. Superintendent McKnight a written memorandum as follows:

Would suggest that you put Halverson on your pay roll beginning this morning (meaning Aug. 19), if his services are needed as straw boss or foreman classification.

This message was sent by Sheriff, but in fact was not delivered until August 25; however, it is a fact that on the morning of August 19, Sheriff met Templer in Helena, some 25 miles distant from the fire, and told him that he had arranged to take Halverson over to the fire camp, and wanted to know if that was satisfactory and that if he did so would Halverson's time commence with Forestry Department on that day regardless of the delivery of the letter. Templer assured him that it would be satisfactory, and that they needed Halverson, and that he was (indicating right now) employed as a straw boss. The instructions from Templer were in a Government, official sealed envelope of the Forestry Department, and had been left in the office on the 19th, but on account of the fact that it was not delivered in the post office until 2 or 3 days later, it was really not delivered until August 25.

Remember, Mr. Speaker, that this fire was raging in the mountains and these arrangements were made both out at the camp and in Helena, and each other's words were taken for what they were. According to the arrangements and the exigencies of the situation, Halverson was dispatched to the fire on the forenoon of August 20. He led the men and fought the fire all that day and all that night, and at about 6 o'clock in the morning of August 21, he suffered injuries in action which resulted in his death.

Now, the Forest Service comes along and puts up the claim that since Halverson did not answer formal questionnaires of the Forest Service and since he was not actually sworn in as a Government officer he was in fact not such, and his widow and children are not entitled to compensation for his death in service. They go on to tell us that it was their intention to hire him if they thought his services were needed, but that no hiring arrangements had been effected prior to the date of his death.

This is the height of a technicality. Halverson's services were sought by the Government. He actually entered upon the service and was actually directing Government men for a day and a night before his death occurred, and let it be remembered that his death occurred at his post of duty and that his duty was in discharging Government instructions.

Mr. Speaker, if this is not to be construed as an employment by the Government then a far different method of construction of actual facts is used than I have ever been acquainted with heretofore.

Mr. KNUTSON. Mr. Speaker, will the gentleman yield?

Mr. AYERS. I yield to my friend from Minnesota.

Mr. KNUTSON. Was Halverson doing Government work?

Mr. AYERS. He was actually doing Government work on Government land, and was protecting Government property when he was killed.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. AYERS. I yield to the gentleman from Massachusetts.

Mr. McCORMACK. Then, the objection is being raised on merely a technicality.

Mr. AYERS. The height of technicality.

Mr. McCORMACK. He was actually in the Government employ.

Mr. AYERS. He was actually employed by the Government, and was actually discharging his duties as such employee.

Mr. BANKHEAD. Mr. Speaker, will the gentleman yield?

Mr. AYERS. I gladly yield to the majority leader.

Mr. BANKHEAD. If this man, of course, was in the Government service, he was entitled to consideration; but, as a matter of fact, was he commissioned by the Government to fight this fire?

Mr. AYERS. He was commissioned verbally by the superintendent of the C. C. C. camp, Mr. McKnight, and by Mr. Templer of the Forest Service, both of whom had charge of the fire fighting and both of whom had charge of the operations and the assembling of men therefor; but, as stated before, he had not gone through the formality of taking an oath or having a formal commission.

Mr. BANKHEAD. Under the law, did this superintendent of the C. C. C. camp have authority to deputize men for purposes of this sort?

Mr. AYERS. He did, and he assumed command of the fighting operations. Halverson was directed to fight that fire as a boss and he died in line of duty. Now, I hope that his widow and children may be recompensed by this bill. They have no formal commission to frame and hang in the parlor, but they do have the satisfaction of knowing that the husband and father died in the discharge of his duty for his Government.

The SPEAKER. The question is on the amendment.

The amendment was rejected.

The Clerk read as follows:

Title XIII—(S. 1073. For the relief of Louis Finger)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to Louis Finger, of Cleveland, Ohio, the sum of $1,347.48 in full settlement of all claims against the Government for expenses incurred in the treatment of his minor daughter, Elsie Finger, who was injured in an accident involving a United States mail truck August 13, 1930: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendment:

Page 14, line 17, strike out "$1,347.48" and insert "$347.48."

The amendment was agreed to.

The Clerk read as follows:

Title XIV—(S. 1328. For the relief of the Snare & Triest Co., now Frederick Snare Corporation)

That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Snare & Triest Co., now Frederick Snare Corporation, the sum of $83,978.05, in full settlement of all claims against the Government of the United States for damages for delay in carrying out its contract with the Navy Department, no. 3762, and agreements supplemental thereto for waterfront improvements, piers, and breakwater at the submarine base, Key West, Fla., as reported January 13, 1925, by a board of which Rear Admiral H. H. Rousseau, Civil Engineer Corps, United States Navy, was senior member: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

With the following committee amendments:

Page 16, line 10, strike out the figure "10" and insert the figure "20."

Page 16, line 16, strike out the figure "10" and insert the figure "20."

Mr. RICH. Mr. Speaker, I rise in opposition to the amendment.

Mr. Speaker, the long-established practice of the House has been to limit attorneys' fees to 10 percent, yet in this instance the committee would authorize an attorney's fee of 20 percent on a claim that has been twice tried before the Court of Claims and which is not recommended by the Secretary of the Navy.

The report shows that the claimant in this case was awarded $2,274.80 after an investigation was made. The claimant now comes in and asks for $83,928.05 in addition, and it is proposed to increase the attorney's fees from 10 percent to 20 percent, directly contrary to the long-established precedent of the House to limit attorneys' fees to 10 percent.

Mr. KENNEDY of Maryland. Mr. Speaker, will the gentleman yield?

Mr. RICH. I yield.

Mr. KENNEDY of Maryland. I may say that the motivating cause behind the amendment is the practice and custom in the Court of Claims to allow attorneys a fee of 20 percent.

Mr. RICH. Why, when the Court of Claims has denied this case twice should they ask the Congress to do something not recommended by the Secretary of the Navy, Mr. Swanson? I read an excerpt from a letter from the Secretary of the Navy addressed to the chairman of the Committee on Claims dated December 8, 1933:

> The cost of the proposed legislation is indeterminate depending on the amount allowed, if any, by the Court of Claims should the legislation be enacted.
>
> In view of the foregoing, the Navy Department will interpose no objections to the enactment of the bill S. 1760, should the Congress see fit to authorize the readjudication of the case as proposed, but invites attention to the fact that the claimant has already two trials before the Court of Claims, the tribunal named in the bill to consider the claim.

Why is this bill brought in here in an effort to get $83,978.05? I cannot understand it.

Mr. COCHRAN. Will the gentleman yield?

Mr. RICH. I yield to the gentleman from Missouri.

Mr. COCHRAN. This is not to send the case to the Court of Claims. It calls for the payment of the money out of the Treasury of the United States.

Mr. RICH. I understand that, and the Court of Claims has refused to pay it.

Mr. COCHRAN. Is the gentleman's amendment to strike the item entirely?

Mr. RICH. No; but I will offer an amendment to strike out the title. I thought I would have to get recognition now. Why the committee is now asking for 20 percent attorney's fees I cannot understand.

[Here the gavel fell.]

The SPEAKER. The question is on the committee amendment.

The committee amendment was rejected.

Mr. RICH. Mr. Speaker, I offer an amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. RICH: Page 15, line 14, strike out title XIV.

Mr. RICH. Mr. Speaker, the statement I made a moment ago stands now. Why the membership of the House of Representatives is going over the Court of Claims, when that court has twice tried this case and rejected the claim, I cannot understand. I do not know why a proposition of this kind should be offered, and I hope my amendment will be agreed to.

The SPEAKER. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. RICH].

The question was taken; and on a division (demanded by Mr. RICH) there were—ayes 40, noes 50.

Mr. BLANTON. Mr. Speaker, I object to the vote on the ground there is not a quorum present. We are not going to take $80,000 out of the Treasury.

The SPEAKER. Evidently there is not a quorum present.

The Doorkeeper will close the doors, the Sergeant at Arms will notify the absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 117, nays 128, not voting 181, as follows:

[Roll No. 103]

So the amendment was rejected.

The Clerk announced the following pairs:

Additional general pairs:

Mr. Woodrum with Mr. Bolton.
Mr. Mitchell of Tennessee with Mr. Merritt of Connecticut.
Mr. Buchanan with Mr. Taber.
Mr. Thomason with Mr. Marshall.
Mr. Mead with Mr. Robsion of Kentucky.
Mr. Burch with Mr. Millard.
Mr. Sullivan with Mr. Lemke.
Mr. Goldsborough with Mr. Luckey.
Mr. Dingell with Mr. Russell.
Mr. Wearin with Mr. Beiter.
Mr. Fuller with Mr. Pierce.
Mr. Kramer with Mr. Gillette.
Mr. Greenwood with Mrs. O'Day.
Mr. Lucas with Mr. Tolan.
Mr. Fiesinger with Mr. Buck.
Mr. May with Mr. Randolph.
Mr. Gray of Pennsylvania with Mr. Wood.
Mr. Sadowski with Mr. Harlan.
Mr. Coffee with Mr. Nelson.
Mr. Schuetz with Mr. Kennedy of New York.
Mr. Connery with Mr. Smith of Washington.
Mr. Thom with Mr. Hennings.
Mr. Brown of Michigan with Mr. Cole of Maryland.
Mr. Robinson of Utah with Mr. Kenney.
Mr. Gasque with Mr. Gingery.
Mr. Wilson of Louisiana with Mr. Cross of Texas.
Mr. Flannagan with Mr. Brennan.
Mr. Dobbins with Mr. Sanders of Louisiana.

Mr. KNUTSON, Mr. FARLEY, Mr. MCCORMACK, Mr. FADDIS, Mr. DOCKWEILER and Mrs. KAHN changed their vote from "yea" to "nay."

Mr. COOPER of Ohio and Mr. BUCKLER of Minnesota changed the vote from "nay" to "yea."

The doors were opened.

The result of the vote was announced as above recorded.

The Clerk read as follows:

Title XV—(S. 1431. For the relief of the Collier Manufacturing Co., of Barnesville, Ga.)

That the Secretary of the Treasury is hereby authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, to the Collier Manufacturing Co., of Barnesville, Ga., the sum of $48,719.70 in full settlement of all claims against the Government for losses sustained by said Collier Manufacturing Co. on account of the manufacture of undershirts for the United States Army in the year 1918: *Provided*, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HENRY W. BIBUS ET AL.

Mr. KENNEDY of Maryland. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (S. 2734) to confer jurisdiction upon the United States Court of Claims to hear and determine the claims of Henry W. Bibus, Annie Ulrick, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, estate of Harry B. C. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania, a similar House bill having been passed by the House today.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the Court of Claims of the United States be, and it is hereby, given jurisdiction to hear and determine the claims of Henry W. Bibus, Annie Ulrick, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, estate of Harry B. C. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania, and severally to award judgments covering compensation for losses and/or damages arising through the seizure, condemnation, and sale of those certain lands, theretofore belonging to them, more specifically described in the decree of the District Court of the United States for the Eastern District of Pennsylvania, on June 9, 1921, in a proceeding entitled "United States of America against Certain Tract of Land in Falls Township and borough of Tullytown, Bucks County, Pa.", December term, 1918, no. 5860, notwithstanding the fact that said claimants executed and delivered deeds pursuant to the said decree of the court in the above-entitled matter, and, notwithstanding that said claimants were paid the respective amounts set forth in said decree, the said losses and/or damages to be awarded to be the difference between the entire amount paid for the purchase by the Government of the whole tract and the amount for which the Government subsequently sold the tract, said total difference to be distributed to the respective claimants herein, prorated in accordance with the number of acres taken by the Government.

SEC. 2. Suit hereunder may be instituted at any time within 4 months after the approval of this act, notwithstanding lapse of time or any statute of limitations, and proceedings herein shall be had as in the case of claims over which such court has jurisdiction under section 145 of the Judicial Code as amended.

The bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. Without objection, the proceedings by which a similar House bill was passed will be vacated.

There was no objection.

R. O. T. C. AT THE CITADEL, THE MILITARY COLLEGE OF SOUTH CAROLINA

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the R. O. T. C. as an educational factor and to include therein brief extracts from a prize-winning essay, written by Cadet Thorpe, of the Military Academy of South Carolina.

Mr. RICH. Mr. Speaker, reserving the right to object, I dislike very much to object to anything that a Member wants to put in the RECORD, but the RECORD is supposed to portray the proceedings of Congress, and whenever we go into the field of including articles by students in educational institutions, who have probably written good articles, I think we subject ourselves to criticism. I do not think the CONGRESSIONAL RECORD is the place to print such articles, and, therefore, I shall have to object.

Mr. McSWAIN. If the gentleman will permit an explanation, these are my own remarks with some brief extracts from the prize-winning essay referred to.

Mr. RICH. I beg the gentleman's pardon. I thought the gentleman was asking to include the essay.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. McSWAIN. Mr. Speaker, we South Carolina people are naturally and properly proud of The Citadel, situated at Charleston, S. C., officially known as the "Military College of South Carolina", over which Gen. Charles P. Summerall presides. We know him to be a gentleman whom young men would do well to imitate and to emulate his example of upright, honorable living. His career as a soldier, and especially as a field commander of a division and next of an Army corps, in the thick of the worst fighting during the World War, is a source of pride to all Americans.

Last year, in order to stimulate thinking along the lines of sound and sane national defense, I offered, through General Summerall and The Citadel authorities, to present a set

of books dealing with national-defense questions to that student of The Citadel who would prepare and submit the best essay on the subject, "The Place of the R. O. T. C. in a Proper Program of National Defense." I am advised that a number of students submitted essays in this contest, and that, in addition to the winner, several young men received honorable mention. I am advised that the winner in this contest was Cadet James E. Thorpe, Jr., and that the following cadets are worthy of honorable mention by reason of the high quality of their essays: R. N. Walden, E. D. McCrackin, R. N. Hobbs, L. W. Smith, and G. C. Jones.

Mr. Speaker, it gives me very great pleasure to submit for printing as a part of my remarks on this subject the essay prepared by Cadet Thorpe. I congratulate him and I congratulate his family and friends upon his success. I also congratulate the cadets who received honorable mention. In like manner, I congratulate all who entered the contest, because effort always brings its own reward of development and improvement, whether or not the immediate prize be won.

I am at a loss to understand why there is opposition to R. O. T. C. in some quarters. In my humble judgment, it is the most economical, the most sane and the most practical way of keeping a sufficient number of our citizens adequately trained to be leaders in a national emergency. These young men are not jingoists; they are not professional militarists; they are not agitating to bring on war. But they are prepared if any sort of emergency should arise needing armed forces, to lead the raw, untrained civilians in order to protect and defend our Nation against invasion and to defend our constitutional Government against the forcible and violent assaults of any lawless groups that may arise within our own population. These are contingencies that history warns us to be prepared to meet. The mere fact that we are prepared may avert their coming.

Mr. Speaker, here are extracts from the essay above referred to:

THE PLACE OF THE R. O. T. C. IN A PROPER PROGRAM OF NATIONAL DEFENSE

War is declared! The dire news is emblazoned in every newspaper in the country, published by every mouth, pondered by every mind. Anxiety, patriotism, fear, courage, love, and hatred are so commingled that the country is beset by near hysteria. What shall we do? Frantically begins the preparation for a struggle which the people have been assured will never occur and which is now rudely thrust on a nation long lulled into a feeling of false security. Thus has it always been in our short history of military endeavors; thus have we always spent $5 in immediate war preparation where $1 should have sufficed; thus have we ever placed ourselves at the mercy of an armed enemy.

* * * * * * *

In spite of the magnificent gestures of many treaties and the noble attempts of peace pacts to outlaw war, stark reality insists that the civilizations of the world have not yet attained a culture sufficiently high to obviate the recurrence of international strife. Open conflict is possible and imminent throughout the world today. We owe it to ourselves to maintain a program of national defense which will at all times assure us security. Any defense less will be an invitation to conquest by hostile arms; any defense more will amount to burdensome militarism. A proper program of national defense must include instantly available armed forces strong enough to repel an invader in case of a national emergency. But can we be assured that such a program will not infringe on our liberty?

* * * * * * *

In an army, as in all institutions, leadership is probably the most important element. Ordinary soldiers can be trained well in a short period of time to fulfill their duties, but officers should undergo a more extensive preparation in order that they may have a broader comprehension and more sympathetic understanding of the general scope of their work. It is foolish to expect that men can be taken from civilian life and metamorphosed into officers within 90 days. At the outbreak of the World War, we had 9,000 active officers, but 200,000 officers were actually in our Army during the war. Where did the other 95 percent come from? The majority were products of training camps designed to turn out officers as rapidly as possible. They had little more than a superficial knowledge of the duties which they might be called upon to fulfill. Now the situation is different—in case of war, 90 percent of the officers of the Army would come from the Reserves, and the flowing spring which feeds this most valuable and active component of our wartime Army is the R. O. T. C.

Although military training in colleges had its inception in the Morrill Act of July 2, 1862, the R. O. T. C. was first authorized by the National Defense Act of 1916. Its present form is the one designed by the National Defense Act of 1920. The officers which it produces will command the platoons, companies, battalions, and often regiments and larger units which actively engage in war. The few Regular Army officers will be detailed largely for staff duty and the training of raw recruits. Thus the men who today constitute the R. O. T. C. may one day be called upon to bear the brunt of leading our Army—on them will rest to a large extent the actual success or failure of a nation at war. These are intelligent men who must graduate from one of the 115 selected colleges giving an intensive course in military subjects (which includes attendance at a 6 weeks' summer camp) under the direction of the War Department in order to be considered for commissions. Its little brother, the Junior R. O. T. C., operates in the same manner in 139 secondary schools of similar qualifications. These embryonic reserve officers realize that every citizen is obligated to defend his Nation when it is attacked and that it is the duty of the educated to be prepared as leaders in time of national emergency. And this realization is so strong that it impels them to create an attitude of suitable patriotism throughout the country for a proper national defense against foreign aggression. And by the same token it arms us against subversive internal elements which may struggle for supremacy. Just as no knight armed with a broomstick would attack another his equal who had a sword that he could unsheathe on provocation, no nation will attack another of comparable size and resources when the latter has a potential army such as one made possible by the graduates of the R. O. T. C.

Many people object to the R. O. T. C. on the ground that it will bring about a militaristic attitude in our youth. On the contrary, cadets are made aware that war is futile. They constitute a large percentage of the rising generation; their constant efforts to prevent useless strife will go far in bringing about a saner attitude toward the entire political and economic organization. It is they who have pledged their services (and made these services valuable) in the effort to maintain peace and national integrity, yet it is they who have the most to lose in war. In preparing themselves for the worst, they prepare themselves at the same time for the best. Military training changes youths into men by giving responsibilities which will mold characters for civil life—characters long imbued with the ideals of truth, justice, and love of native land.

Others claim that the R. O. T. C. is economically burdensome. Since its inception less than $55,000,000—the price of two good-sized battleships—has been expended on it. In that time, 528,140 students have been enrolled in the senior R. O. T. C. and 76,201 have graduated. And 53,202 are at present enrolled in the junior R. O. T. C. This expenditure on the youth of the Nation is a sounder investment and bears greater interest returns than any other which could be made with the money.

Thus we see that the R. O. T. C. is a stabilizing influence in the ever-changing panorama of American life. The devising of this agency has opened a broad new boulevard whereby our country can reach the necessary and worthy goal of a proper national defense without traveling the bumpy roads of militarism. This is the potential place of our R. O. T. C. in a proper program of national defense. Unfortunately, the student training corps has not yet been allowed to assume its true proportions, but we can work to gain it recognition fortified by the knowledge that this R. O. T. C.—our national safeguard—will ever uphold the finest of democracies.

ORDER OF BUSINESS

Mr. KVALE. Mr. Speaker, I rise at this time to propound a parliamentary inquiry. May I ask whether the Speaker or the majority floor leader or the chairman of the Claims Committee is able at this time to tell the House whether or not there will be another day upon which omnibus private bills, as yet uncalled, may be considered?

The SPEAKER. Speaking for himself, the Chair is unable to inform the gentleman from Minnesota.

A LEGISLATIVE REPORT TO MY CONSTITUENTS

Mr. SCOTT. Mr. Speaker, I have been asked by my colleague the gentleman from California [Mr. HOEPPEL] to ask unanimous consent that he may extend his remarks in the RECORD and include therein three short quotations—one from the late Senator La Follette, one from the Democratic platform, and one from the Secretary of Labor, Mme. Perkins. I understand the whole thing will be about 15 lines in length.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HOEPPEL. Mr. Speaker, as it will be physically impossible for me to meet all of my constituents during the ensuing campaign, and as I consider that they should have a complete record of my service as their representative, I submit the following résumé of my activities as Representative of the Twelfth Congressional District of California since 1932.

On August 25 my constituents will have the opportunity of registering, by their vote in the primaries on that date, their

approval or disapproval of my record as their Representative in the Congress of the United States, and on November 3 they will be called upon to choose their Representative in the Congress for the next 2 years. It is only on a basis of actual facts, which I am pleased to present, that they can decide whether or not I have "kept the faith" and am entitled to a continuance of their support.

It is impossible, of course, to condense a report of my 4 years' activities into a few pages, but this I have endeavored to do as well as possible, in the accompanying résumé of my record, which I have indexed both alphabetically, according to subjects considered, and by subheads, so that anyone may readily ascertain how I stood on any certain question. The facts which I present may be confirmed by the CONGRESSIONAL RECORD, bound copies of which I have placed in the leading libraries of my district.

It is necessary that I fortify my remarks by the official RECORD, since I found in my last campaign that so many individuals, seeking office, are prone to contort the public record of an individual and to use tactics commonly termed "mud slinging" in an effort to further their own interests. I have always endeavored to conduct a clean campaign, and I reaffirm my pledge that I shall not resort to unfair tactics of any kind against any opponent. I am more than willing to rest my case with the people on a basis of my actual record in the Congress in their interests.

MY SERVICE REWARDED WITH CHAIRMANSHIP

During my 4 years as Representative of the Twelfth Congressional District I have taken an active, aggressive part in support of legislation to bring about the reemployment of our unfortunate unemployed at living wages, and to restore to them the opportunities which they have a right to expect in a democracy. I have been guided at all times by my earnest desire to advance the interests of the people whom I have the honor to represent, and of the Nation generally, and I have steadfastly refused to be intimidated or coerced into voting against my honest convictions.

In recognition of my service, when I was reelected in 1934 my colleagues honored me with the chairmanship of an important committee of the Congress, the only major chairmanship held by a California Member of Congress, in fact, by any Congressman west of the Rockies. This position, naturally, has increased my sphere of influence and opportunity for service to my constituents.

A REPRESENTATIVE SHOULD BE FREE TO REPRESENT HIS CONSTITUENTS

My conception of a Representative is an individual who will conduct a clean campaign, free from alliances with selfish interests or special groups, and who will hold himself subservient only to the people whom he represents, not to polished and astute politicians who work behind closed doors to attain their objectives. Unless I can win reelection on the basis of my past endeavors, with my entire record open for public inspection, for criticism and praise where merited, I do not wish reelection.

ELECTED AND REELECTED WITHOUT HELP OF POLITICAL MACHINE

I was elected in 1932 and reelected in 1934 as Representative of the Twelfth Congressional District of California without the assistance of any political machine or political faction, and have thus been in a position to act independently at all times in the interest of the people who sent me here.

Under no circumstances will I aline myself with so-called political machines which, not only in California but elsewhere, have been the very agencies which have brought about corruption in politics to such an extent that the Congress of the United States itself is commonly termed a "rubber stamp" Congress.

"FOLLOW THE PRESIDENT" IS NO PROPER DEMAND IN A DEMOCRATIC GOVERNMENT

I have been criticized by some few individuals because I failed to follow the President on every proposal which he submitted to the Congress, even though such proposals were not incorporated in or even remotely a part of the Democratic platform of 1932, and, in some instances, were diametrically opposed to it. My public record will show that I have followed the Democratic platform throughout, and as a candidate for reelection this year on the Democratic ticket I will again support the platform, but I will not promise or pledge myself in advance to support any proposals from a new Democratic administration unless such proposals are incorporated in the Democratic platform or are in accordance with the wishes of the majority of the voters of my district. I will not pledge myself in advance to follow any individual or group of individuals, since it is self-evident that we may as well dissolve our legislative body if representatives of the people are to be without an independent voice. I, for one, refuse to be herded and coerced into voting for measures submitted as so-called "must" legislation. If the free and independent voice of the people's representatives is thus silenced, our liberties as a people are correspondingly threatened. After my own conscientious study of measures proposed, I will always vote for what I consider to be the best interest of the entire people and in accordance with the wishes of my constituents. I, for one, have more confidence in the judgment, based on due deliberation, of the 435 Representatives in Congress than I have in the suggestions of any one individual, regardless of whom he may be.

That great liberal and progressive, Senator Robert La Follette, Sr., voiced my convictions in this connection in his speech in the Senate on April 4, 1917, in which he opposed the entrance of the United States into the World War and answered his critics who berated him because he refused to follow the President on that important issue. At that time he stated:

> Mr. President, I had supposed until recently that it was the duty of Senators and Representatives in Congress to vote and act according to their convictions on all public matters that came before them for consideration and decision.
>
> Quite another doctrine has recently been promulgated by certain newspapers, which unfortunately seems to have found considerable support elsewhere, and that is the doctrine of standing back of the President, without inquiring whether the President is right or wrong. For myself, I have never subscribed to that doctrine and never shall. I shall support the President in the measures he proposes when I believe them to be right. I shall oppose measures proposed by the President when I believe them to be wrong.

For his steadfast refusal to be intimidated or swerved from his convictions he was insulted by his colleagues and branded by his enemies as disloyal to his country, but he is today acclaimed as one of our great Americans, and liberal and conservative alike pay him homage for his sincerity of purpose and the dauntless courage with which he defended principle above party.

THE INTEREST OF THE PEOPLE CONTROLS MY VOTE

In order to protect the savings of depositors, I did "follow the President" when he submitted his first recommendation to the Congress authorizing the printing of $2,000,000,000 of fiat money to turn over to the banks, even though the financial interests we were thus salvaging were responsible, in large measure, for our depression.

OPPOSED LEGISLATION AGAINST VETERANS AND FEDERAL EMPLOYEES

I did not "follow the President" when he proposed the Economy Act, which struck so unfairly at our disabled veterans and all Federal employees. This act, which brought such an aftermath of suffering among our disabled veterans and their dependents, was passed by the House of Representatives after only 20 minutes of discussion, without the right of amendment or even an opportunity for individuals, like myself, who were interested in a square deal, to discuss the measure, and was enacted into law within 15 days after the President assumed office. I would not be stampeded into becoming a "rubber stamp" to vote discriminations against the veterans of our wars and all Federal employees under the administration whip, and I am proud to state that I voted against the President on this question on every occasion. That I was justified in my stand was clearly shown by the subsequent action of Congress and the President himself whereby the unfair and discriminatory provisions of the Economy Act were repealed. Even before the first session of the New Deal Congress was concluded the Congress and the President back-tracked and corrected some of the injustices of the Economy Act, but not all of them.

In the second session many further corrections were made by the Congress and the President, and the Veterans' Administrator advises me that since the economy bill became a law there have been 11 different enactments of the Congress itself to correct discriminations resulting from this measure. In addition, the President has issued 12 Executive orders, with 29 amendments to these Executive orders, making a total of 41 Executive orders issued by the President as a result of the Economy Act. In addition, the Veterans' Administration has rendered 261 Administrator's decisions in reference to the act, and there have been revised wholly or in part 815 paragraphs of regulatory material used by the Veterans' Administration in carrying on its activities.

For my opposition to the Economy Act and my loyalty to principle above party I was severely censured at the time, but I have been clearly vindicated in my stand, as I have explained above.

PENALIZING DISABLED VETERANS WHILE WE WASTE PUBLIC FUNDS BOONDOGGLING

Notwithstanding that the administration was so insistent on economy at the expense of our disabled veterans and Federal employees under the Economy Act, millions were wasted under the C. W. A. on boondoggling projects, all of which must be repaid twofold under our present system of paying for such expenditures through the issuance of tax-exempt bonds.

Later the President requested that he be given a check for $4,800,000,000 for work-relief purposes, without any restrictions whatever by the Congress as to its expenditure. Think of it—appropriating $4,800,000,000 of your money, without your Representatives knowing what was to be done with the money! This bill, after its disposition in 20 minutes in the House, was held up in the Senate for almost 3 months. Finally, after the merest semblance of earmarking the huge appropriation, it was enacted into law. I voted for this bill, not because I approved of the method proposed but there was no other alternative, inasmuch as the administration leadership would not permit amendment, and I could not be a party to any procedure which would deny our millions of unemployed and heads of families any opportunity to earn a subsistence—even as obnoxious to me as was the manner of handling this appropriation.

THE PAUPER WAGE SCALE IS UN-AMERICAN

I mention "pauper wage scale" because of the fact that the relief bill, as enacted, provided for a "security wage" of from $19 to $95 per month, which I consider to be an unfair wage standard for the American worker. I opposed this "security" or so-called "pauper wage", and urged that prevailing wages be paid to the unemployed. Those of my critics who denounce me for not following the President throughout by their very criticism make themselves sponsors of this "starvation wage", which millions of our unfortunate unemployed have been forced to accept or have nothing.

Although theoretically the friends of labor lost in their efforts to embody the "prevailing wage" provision in the law, in actual administration of the relief funds the prevailing wage was paid in many places where the pressure of labor groups was strong enough to secure this consideration. Moreover, the $1,500,000,000 relief appropriation measure enacted in this session specifically provided for the payment of prevailing wages to relief workers, and W. P. A. Administrator Hopkins himself appeared before the Senate committee in support of such a provision. Thus have the administration, and particularly Administrator Hopkins, by their reversal of attitude on this question, vindicated and upheld me in my opposition to the "pauper wage scale."

FOLLOW THE PRESIDENT OR FIGHT FOR A LIVING WAGE FOR OUR UNEMPLOYED—WHICH?

Those who are "with the President 100 percent" must approve of the President's "security wage scale", which approximated $55 per month for the worthy unemployed in California. As I mentioned before, I opposed the President on this point, and if reelected will oppose him again, as I believe in a living wage and not a pauper's wage for our American workers.

In this same connection I opposed the $30 per month which is paid to the men and boys in the C. C. C. camps and cooperated with the Honorable WILLIAM P. CONNERY, chairman of the Committee on Labor, who proposed a wage scale of $80 per month. The record will show that I offered an amendment to provide $50 per month for the men and boys in the C. C. C. camps.

WHY LET ALIENS TAKE OUR JOBS?

I introduced and advocated legislation providing for the deportation of aliens who decline to become citizens, thus making available more jobs to American citizens. At the same time I favor closing the doors for the present to all foreign immigration, or at least restricting immigration to relatives of American citizens where family welfare would be more humanely considered by permitting their entry, and I would favor even this restricted immigration in limited numbers only.

WHY GRANT ADDITIONAL BENEFITS TO A PRIVILEGED CLASS WHILE MILLIONS STARVE?

I opposed the officers' promotion bill, sponsored by the administration, which increased the rank and pay of 9,000 well-paid and well-fed Army officers, while millions of our citizens were unemployed and in want. Over 9,000 officers are receiving from $379 to $500 per month, plus free housing, subsistence, medical, and other substantial allowances, while at the same time, as I have indicated, the administration provides as low as $19 per month for our unemployed citizens on W. P. A. projects. Fighting alone on the floor throughout the entire day, although I was unable to defeat this measure, I did succeed in securing an amendment to the bill deferring its effective date for a period of 30 days, thus saving the taxpayers approximately $100,000. This bill also provided retirement at $149 per month for able-bodied 37-year-old Army officers, many of whom immediately after retirement take Government jobs, thus entering into competition with civilians and drawing two pay checks from the Government.

The President was apparently so much in favor of granting this increase to these already overpaid officers that the bill, when passed by the Congress, was rushed to the White House within half an hour and signed immediately, which is contrary to all precedent. The reason for this haste was that if the bill had gone to the President in regular course of procedure the benefits provided would have been delayed for another month, thus saving the taxpayers an additional $100,000.

THE OLD PEOPLE HAVE EARNED THE RIGHT TO REAL SECURITY

I also voted against the President's so-called security bill, which authorized a pauper's pension of $30 per month to our aged citizens. I am not in favor of requiring a pauper's oath from any aged citizen who is so unfortunate as to be without adequate means of support in his old age. I was the first Member of Congress ever to speak on the floor of the Congress in behalf of the Townsend old-age pension, and I am surprised indeed to find my Democratic opponents opposing me on an "all the way with Roosevelt" platform and at the same time promising to work for the Townsend pension plan, knowing, as they must, that the President is unalterably opposed to the Townsend old-age pension. This is inconsistency personified! How can anyone be for Roosevelt "all the way" and at the same time work for the enactment of the Townsend pension, to which he is absolutely opposed? I believe my constitutents are too sensible to swallow the political bait of those who thus attempt to carry water on both shoulders.

THE TOWNSEND PENSION IS A PRINCIPLE WITH ME, NOT MERELY A POLITICAL PROMISE

I fought for the Townsend plan when to advocate such pension meant ridicule on the floor of Congress. Notwithstanding this, I fought incessantly for this measure, and now many are rallying around the standard of Dr. Townsend, hoping to garner votes for themselves. It is easy for a candidate to promise support when the ground has been broken and the foundation laid. I feel confident that those who are in favor of the Townsend plan will realize that one who has made good and who has demonstrated his sincerity by ac-

tually fighting for the plan is more to be considered for support than an individual who is offering a mere promise in order to obtain votes. We know the record of a man who has fought a valiant fight in office, whereas we can never be sure of the mere promises of politicians, so easily made and so much more easily forgotten, once election has been attained. My record in behalf of the Townsend plan speaks for itself. Why trade horses when the steed you are riding has proven faithful and able to carry the load?

THE GOVERNMENT SHOULD CONTROL THE LIQUOR INDUSTRY IN THE PEOPLE'S INTERESTS

The present system of the manufacture and sale of intoxicating liquors has proven a travesty on regulation or control in the people's interests. In my speech advocating substantial pensions for our aged citizens I urged that the Government take over the manufacture and distribution of intoxicating liquors and that the profit from this industry be applied wholly to guarantee economic security to all citizens beyond the age of 60 years and the disabled under this age. As long as we permit the profits to remain in the hands of the private manufacturer and distributor the seeds of political corruption will remain in the liquor industry, it will be more difficult to combat crime and lawlessness, and the honest endeavor of the Government to inculcate sobriety and temperance in the citizenry will be increasingly difficult. Other nations of the world have been taking over monopolies, even in such commodities as salt, tobacco, and so forth, but the huge profits accruing to these governments through such monopolies are as nothing compared to the moral values to be derived for the people from Government control of the liquor industry.

I HAVE ALWAYS SUPPORTED AND WORKED FOR EDUCATIONAL PROGRESS

I deplored the procedure under the C. W. A., and later under the W. P. A., whereby our educated men and women, out of a job, were compelled to engage in manual labor, in some instances ditch digging, in order to obtain a subsistence wage.

I introduced legislation to provide substantial but not exorbitant research fellowships to individuals holding degrees in the sciences, medicine, dentistry, and so forth. It is my contention that if we had given a reasonable rate of pay to the unemployed scientist, physicist, chemist, and others in the fields of higher learning, the benefits which would have accrued to our Nation as a result of their researches would have more than compensated for the small additional outlay which the Government would have had to make to place these highly trained and outstanding citizens at work on useful projects in their own fields rather than at manual labor.

I also advocated a distinct increase in appropriations for the Bureau of Standards so that this valuable department of Government could expand its activities and research in the interest of adding to our industrial and economic welfare.

I supported legislation in the interest of rural education and have consistently worked and voted in the interests of our public schools and institutions of higher learning.

I also favor an adequate compensation to those in the teaching fraternity and strenuously insist upon their right to retirement at a substantial annuity, upon their own application, on attaining the age of 60 years or, if disabled, prior to attaining that age. The teaching profession is sadly underpaid. Salaries should be greatly increased in order that we may maintain the highest possible standard for the personnel in this profession.

The Nation progresses in more or less direct proportion to its advancement in education and its attainments in the various sciences, and I am convinced, therefore, that funds intelligently expended in these fields will bring to our people a substantial return on such investments.

MY STAND IN OPPOSITION TO THE PRESIDENT WAS FOR PRACTICAL MORTGAGE RELIEF

I voted against the first bill providing mortgage relief for home owners and our distressed farmers, recognizing at the time that these measures were unfair to the mortgagees because the principal of the bonds was not guaranteed, and as a result thereof little relief, if any, could be expected through this means for our distressed home owners. The records will prove that practically no mortgage relief was given to any of our distressed home owners or farmers until, in the next session, these acts were amended to guarantee the principal of the bonds. I then suported these measures and they have been helpful to a great degree, although not wholly satisfactory.

I FOUGHT FOR LOWER INTEREST RATES TO THE FARMER AND HOME OWNER

In a subsequent session I endeavored to secure a reduction in the interest rate which the distressed home owner is compelled to pay, but was unsuccessful. Later, however, my ideas were incorporated in a provision for lower interest rates for the farmers, but as yet the interest rate which the city home owner is compelled to pay has not been reduced. I am hopeful that in the next session of Congress the interest rate under the H. O. L. C. will be radically reduced, since the $50,000,000 which the H. O. L. C. is contemplating as profit is nothing other than tribute which the distressed mortgagee is being called upon to pay through the exaction of 5-percent interest on moneys which the Government itself borrows from the bankers at 2¾ percent or less.

I am not in favor of this type of chiseling at the expense of the distressed American home owner or farmer. Those of my opponents who criticize me for not following the President blindly are thus approving of these high interest rates which I sought to have reduced in the interest of a square deal to the distressed citizen. Would my constituents have me go along with the President all the way and vote to continue the high interest rates provided in the administration measures, or would they have me continue my fight for lower interest rates in the interest of the people?

I WORKED PARTICULARLY TO RELIEVE THE DISTRESS OF CALIFORNIA HOME OWNERS

I cooperated with the late Montaville Flowers, who visited Washington in the interest of protecting the California home owner from property and other losses due to assessments under the Mattoon Act. I regret to state that thus far, however, our objectives have not been attained, although legislation is now pending designed to relieve home owners from exorbitant interest rates and at the same time give them a breathing spell from the assessment burden.

WHO CAN DEFEND THE A. A. A. CROP-DESTRUCTION POLICIES WHILE MILLIONS OF OUR PEOPLE STARVE?

I voted against the A. A. A. and every amendment thereto, as I considered this bill to be not only unconstitutional but an indirect sales tax on foodstuffs which bore most heavily upon the unemployed, thus adding to their distress by an increase in living costs. We all recall the high prices we were forced to pay for pork and other meats following the enactment of the A. A. A. I am not an apostle of increased prices to the consumer through a program of scarcity. I am opposed to the destruction of God's products through the plowing under of cotton, the burning of wheat and other foodstuffs in the field, and the slaughter of pigs and other livestock under the fallacious theory that the less you have the more prosperous you will become. In Gillette, Wyo., in 1934, I met Government agents who had instructions to wantonly slaughter 200,000 head of sheep in that State alone! The A. A. A. Act was declared unconstitutional by the Supreme Court and its principles discredited, thus vindicating my opposition to its enactment.

PROTECTION AND ENCOURAGEMENT BUT NOT SUBSIDIES TO THE FARMERS

I favor legislation which will protect the American agriculturalist against the exploitation of the stock market and the middleman, and I also favor such tariff legislation as will adequately protect American agriculture from the competition of cheap foreign labor. I believe in every measure of governmental support and encouragement to the various agricultural groups, through marketing agreements and other assistance, which will assure to them the cost of production plus a reasonable profit.

THE FRAZIER-LEMKE BILL WOULD BRING REAL MORTGAGE RELIEF TO DISTRESSED FARMERS

I was one of the earliest signers of the petition to bring the Frazier-Lemke farm refinancing bill before the Congress for consideration. I was pleased to lend my support throughout to this measure, which represented the people's interest versus the bankers, and I was one of the 142 Congressmen who voted for its passage. Unfortunately, due to administration pressure, this bill was defeated, and as a result our distressed farmers will continue to pay high interest rates on credit extended to them by the bankers, which credit is virtually the credit of the people themselves, and all the bankers do is to extend this credit through the medium of a fountain pen.

If the Frazier-Lemke farm refinancing bill had been enacted, it would have brought real mortgage relief to the distressed farmers without one cent of cost to the taxpayer, and, at the same time, it would have returned a net profit to the Government of several billion dollars through the interest payments which would accrue to the Government.

THE RECIPROCAL TARIFF ACT MUST BE AMENDED TO PROVIDE PROTECTION TO OUR HOME PRODUCERS

I voted for the reciprocal tariff, which was included in our Democratic platform and which was advocated by the President. Our experience has already demonstrated, however, the necessity of amending the law to more adequately protect American agriculturalists and at the same time retain the benefits which it has brought to some of our American manufacturers. This necessity arises from the fact that it has been found that in important instances the favored-nation clause in existing tariff treaties permits the importation of foreign products from certain nations which buy very little, if any, of our products in return. In these instances it is a one-sided agreement to the advantage of the foreign producer and detrimental to American agriculturalists and manufacturers.

I believe we should follow the slogan "America first", since it is self-evident that it is unfair to the American taxpayer to pay the American farmer to reduce his crops and remain idle while, at the same time, we permit increased importations of competitive foreign agricultural products.

I PROTECTED THE INTERESTS OF CALIFORNIA CITRUS GROWERS

The official record of committees and the Congress will show that I protected the interests of the avocado and orange growers of my district. The Florida delegation in Congress appeared before the Committee on Interstate Commerce protesting against the present law, which requires that oranges, colored artificially, have an imprint on each orange, "Color added", and urging that such requirement be abolished. I was the only Member of Congress from California to appear before the committee to insist upon the continuance of this requirement in the interest of our California growers, whose product is of such a high quality that they do not resort to artificial coloring to increase its attractiveness. Working in collaboration with officials of the Department of Agriculture, I showed conclusively to the committee that the natural color of California oranges makes artificial coloring unnecessary, and that unless the imprint "Color added" is required where such coloring is used the California growers will suffer unfair competition from Florida growers.

I am pleased to report that my efforts have been successful thus far in the interest of the California growers, although the Congressmen from Florida, candidates for reelection, are pledging that they will have this restriction on Florida growers removed, which would be detrimental, of course, to the interests of our California growers.

I also worked with the Secretary of State and a delegation from California and Florida to protect the interest of the avocado growers in the reciprocal tariff arrangement which our Government concluded with Cuba.

I mention these facts as an evidence of my activities in behalf of our California fruit industry, and as a Member of Congress with 4 years' experience, and also as chairman of a committee in Congress—of which there are only 31 in the entire Congress—I feel that I have more influence in the Congress than would any newcomer without my background of experience and prestige as chairman of a committee.

THE POULTRY INDUSTRY SHOULD BE PROTECTED

I urged and fought for the enactment of the Knutson and Lea bills, which would protect the poultry and egg business of California from the competition of the cheap products of oriental poultrymen. I believe in protecting not only the poultry industry but any other American industry able to produce our entire domestic requirements as long as the prices of American products are kept within a reasonable price limit. I have always supported, and will continue to support, any legislation which will protect American industry, agricultural or industrial, from cutthroat competition from foreign nations whose labor standards are so palpably inferior to our own.

THE HEALTH AS WELL AS THE POCKETBOOK OF THE CITIZEN MUST BE PROTECTED

I favor the enactment of a pure food and drug bill which would protect the health as well as the pocketbook of the American citizen. In the Department of Agriculture Building in Washington is a room appropriately termed the "Chamber of Horrors", which exhibits hundreds of fake medicines and devices sold to the unsuspecting public by scheming quacks and fakers, only to take a staggering toll of human lives, not to mention the needless suffering occasioned thereby. Many of these poisons and instruments of torture are still on the market, and the Government is powerless to control them. I want to see our foods pure and unadulterated and up to definite standards of quantity and quality. I want to see our drugs and cosmetics effective and not injurious to health. I want to see truthful advertising, truthful labeling of foods and drugs, and speedy justice and firm penalties to offenders of our food and drug laws.

THE FARCE OF THE TOBACCO AND POTATO CONTROL ACTS

I voted against the administration-sponsored tobacco and potato control bills, which latter was so ridiculous that the Secretary of Agriculture himself failed to follow the law on this subject. Both of these bills were later recognized as unconstitutional and the President recommended their repeal, vindicating my stand in opposition to their enactment.

I VOTED FOR EMPLOYMENT RELIEF, BUT OPPOSED THE PRINCIPLE OF N. R. A.

I voted for the N. R. A., not because I believed the bill to be a sound recovery measure—in fact, an examination of the CONGRESSIONAL RECORD will show where I stated in voting for this bill that I did so with my fingers crossed—but I voted for it because it contained a section authorizing $3,300,000,000 to provide work for the unemployed. I had no other alternative than to vote for the measure if I wanted to assist the unemployed, even though I recognized that the N. R. A. itself was a form of regimentation alien to our principles of liberty and democracy, and I doubted its constitutionality. I further feared that such regimentation would squeeze out and eliminate the small businessman, and the results of the administration of this act justified my apprehensions. This act was declared unconstitutional, thus confirming my judgment and justifying my expressions of disapproval of the measure when I voted for it in order to give employment to our unfortunate unemployed.

THE INDEPENDENT MERCHANT MUST BE PROTECTED AGAINST CHAIN-STORE MONOPOLIES

I favor the enactment of the Robinson-Patman bill, which is aimed at monopolies and price discriminations, all of which operate against the small merchant, and I am hopeful that this bill will be enacted into law.

COERCION IN LEGISLATION IS A THREAT TO DEMOCRACY

I have observed that many Representatives receive instructions from machine politicians at home as to how to vote on pending legislation. An attempt was made in the last session to exert such influence on me through my vote on the utility bill, but I am not that type of Representative and never will

be. I was even indirectly approached by a high ranking official of the Relief Administration and told that California relief funds might be reduced unless I voted for the death clause in the utility bill.

I AM OPPOSED TO THE UTILITY HOLDING COMPANIES

I am opposed to the utility holding companies, as any other honest citizen must be, where it is shown that corruption or illegal practices exist. Our platform, however, calls for regulation of utility holding companies, but not for their extermination without due process of law. I voted in accordance with our Democratic platform, which, to be specific, enunciates our Democratic policy on this question as follows:

Regulation to the full extent of Federal power of—
(a) Holding companies which sell securities in interstate commerce.

I am not an opponent of wealth in any category, but I oppose wealth where it is used to the disadvantage of the worker and the citizen. Regulation of utility companies through the sensible system of taxation of the interlocking and pyramided companies would have protected the investments of the stockholders and controlled the utility companies through orderly constitutional means, while arbitrary dissolution would have caused chaos to the investors and thus further unbalanced our economic order. The issue was not the guilt or innocence of the offender but of the method of correction of the acknowledged evil, and the fact that I supported the constitutional means cannot, under any circumstances, be interpreted as approval of or even acquiescence in the policies and practices of the big utility companies. Such an assumption would be as unreasonable as to accuse a judge of condoning crime because he does not mete out the exact punishment requested by the prosecuting attorney.

Those of us who sincerely wish to curb and control the utility holding companies render a greater service to the public by advocating and supporting legislation which will pass constitutional tests than do those who propose radical legislation which cannot be administered because of constitutional limitations. Our experience with the N. R. A. and the A. A. A. has demonstrated that we can attain our objectives and bring relief more expeditiously by enacting sensible legislation within constitutional limitations than by radical experimentation which not only upsets business but which reacts against itself when submitted to the Supreme Court.

It is problematical whether or not the modified utility act will survive the Supreme Court. It has already been declared unconstitutional by a court of appeals and is now pending before the Supreme Court for a decision.

I am convinced that the regulation of the utility holding companies, as provided in our Democratic platform, through the medium of taxation, would pass the test of constitutionality and would bring about the desired result—that is, lower utility rates to the consumer through a constitutional and orderly process.

ELECTRICITY AND WATER RATES SHOULD BE LOWERED

I voted for the T. V. A. and am in favor of Government ownership or control of every natural resource in the interest of the citizen and ultimate consumer. The Tennessee Valley Authority has already brought about, through comparison, a reduction in electric rates, and if the Government would continue such projects as Boulder Dam, the Grand Coulee Dam, the Columbia River project, and so forth, along the lines of conservation and flood control, we would not only conserve our resources but at the same time, through the building of required dams and check dams in the smaller tributaries, we would save the enormous losses recurring from time to time due to floodwaters.

As I have so often indicated, wherever the Government, through the development of any natural resource, enters into competition with private business, such as private power plants, and so forth, I consider that it is the duty of the Government to properly recompense the investors of such companies where they suffer loss due to Government competition.

PATRONAGE IS UNECONOMICAL, INEFFICIENT, AND TENDS TO CORRUPTION

In the establishment of the various alphabetical agencies of the New Deal I opposed the employment of such personnel through the patronage system. I voted every time to provide that such employees be taken from civil-service lists, because I knew such employees would be generally more competent, less subject to political corruption and intimidation from the bosses, and, in the aggregate, more economical, as the civil service pay classification standards do not provide the abnormally high salaries which so many incompetent political appointees are receiving in many of these alphabetical agencies.

I am opposed to the patronage system and introduced a constitutional amendment to provide that all Government employment be under civil service. Early in 1935 I also appeared before the Committee on Military Affairs urging that West Point and Annapolis appointments be strictly civil service. I have always advocated that postmasterships be taken entirely out of politics and that post-office employees be promoted to such positions, and have introduced legislation to that effect.

Patronage is rarely efficient in its disposition of employment; it is highly uneconomical and permits political bosses to dominate elections, directly or indirectly, thus frustrating good government based on the election of worthy Representatives.

A REPRESENTATIVE SHOULD HOLD PRINCIPLE ABOVE PARTY AND POSSIBLE PATRONAGE

As a Representative in Congress I feel that I owe every obligation to the people of my district, and even though I was told that I would receive patronage jobs if I voted for certain measures, I held the welfare of my constituents of more importance than the possible opportunity to recommend a few individuals for patronage jobs, and I refused to sacrifice my principles for such consideration.

I am only sorry that my limited time prevents going into detail on this subject. God help our country unless we elect to the next Congress men who will vote for the interest of their constituents, and who are not concerned with the will-o'-the-wisp of patronage, rather than Representatives who will vote for their own selfish interests, and who feel that they are successful as legislators if they are enabled to load their political friends, in lucrative Government positions, on the backs of the taxpayers.

THE UPTURN WE ARE WITNESSING IN BUSINESS IS NOT MATERIALLY AFFECTING OUR UNEMPLOYMENT PROBLEM

On my return to California in 1935 I predicted an upturn in business, which prediction is now an actuality. I feel satisfied that the payment of the bonus not later than July, plus continued Government expenditures, will result in further business improvements but if past experience is any criterion of what the future holds in store, I doubt whether any substantial reduction in unemployment will result.

WHO WILL PAY THE PIPER?

I was elected in 1932 on the platform of "lower taxes and jobs", and I regret to say that thus far the New Deal legislation has not brought about any substantial decrease in unemployment, except through the medium of approximately $12,000,000,000 of Government expenditures, obtained through the issuance of tax-exempt securities. It should be borne in mind that no effort has been made to pay the principal of this increase in our national debt. We have increased Federal taxes to almost the breaking point, and I fear the result when an honest effort is eventually made to pay both principal and interest on our present inordinate debt burden. We enjoyed the music of public expenditures through the W. P. A., the P. W. A., the C. W. A., and other alphabetical agencies, but have made no effort whatever to pay the piper.

WORK RELIEF SHOULD BE IN THE HANDS OF THE PEOPLE THEMSELVES

I visualized the graft, the inefficiency, and the political chicanery which inevitably follow the expenditure of billions of dollars through a centralized control at Washington. I am in favor of the fullest measure of assistance to the unemployed, and proposed a measure which would have taken

relief out of the hands of the incompetent political bureaucrats and placed such relief more directly in the hands of the citizens themselves.

To date we have spent almost $12,000,000,000 on relief, direct or indirect, which will be repaid by our children and our children's children to the tune of approximately $24,000,000,000 or more through the issuance of high-interest-bearing, tax-exempt bonds.

A PROPOSAL WHICH I MADE FOR RELIEF

I proposed a measure to lend $10,000,000,000 to the municipalities, counties, States, churches, schools, established businesses, home owners, and other definite entities at an interest rate of not to exceed 1 percent. Had this been done the responsibility for the expenditure of such loans would have been entirely in the hands of the borrowers, and the problem of unemployment would have been directly a State, county, municipal, or private affair, thus guaranteeing a more efficient expenditure of the funds and the absolute elimination of control on the part of politicians. Even though many of the States, political subdivisions, and other borrowers defaulted in such borrowings, nevertheless the expenditures would have been made at less overhead, there would have been a broader distribution of purchasing power for the unemployed, and the loss to the Nation, even though such defalcations were numerous, would not have been as great as that incurred under our P. W. A. "gift" system. Under the P. W. A., 45 percent of the cost of projects was an out-and-out gift from the Government. On this basis 45 percent of loans such as I proposed could have gone in default, and even at that the Government would not have suffered any greater loss than the taxpayers are now suffering through the grant of 45 percent of the cost of projects.

Under the method I proposed the more impoverished school districts, municipalities, and other subdivisions would have had equality in borrowing advantages, whereas under the P. W. A. loans were extended primarily to the more prosperous communities which, through bond issues or otherwise, could produce the necessary 55 percent of the cost of their projects. It may be well to note here that under the P. W. A. policy, where 45 percent was a governmental grant, the total interest paid by the borrower averages 2.2 percent. By comparison consider the 5 percent which the distressed home owner, who should be the first to be favored, must pay to the H. O. L. C. on his mortgage indebtedness.

I CANNOT CONDONE PROFITEERING ON DISTRESS

I am also opposed to the provisions of title 1 of the F. H. A., through which the citizen is forced to pay 9.72-percent interest on loans, which the Government guarantees, for the purpose of repair or modernization of his home. This high interest rate has proved prohibitive in many cases where advantage would otherwise have been taken of the opportunity afforded to make needed repairs, and thus it has operated to withhold employment from carpenters, plumbers, painters, and others in the building trades. The Government is lending funds at 2-percent interest for the development of electrical power on the farm, through which the utilities are profiting in the sale of power and light. I feel that the distressed home owner and farmer should be accorded equal consideration at least with large corporations and political subdivisions when it comes to the question of borrowing from the Government.

LET US FACE THE FACTS

I believe the people are entitled to facts, and that criticism in generalities is not only unfair to the person "under fire" but an affront to the intelligence of thinking people. Such criticism has been the ammunition of my political enemies, who have broadcast their accusation that I did not "follow the President throughout." Far from being fair criticism of my services as a representative of the people, however, I believe that this criticism, in the light of the actual facts, will be recognized as an unwitting acknowledgment of my conscientious representation and loyalty to those who sent me here. In reply to accusations in generalities I am proud to submit the following analysis or résumé of the major issues on which I did not "follow the President", and I ask all who are sincerely interested to examine it and honestly answer the question:

HOW WOULD YOU HAVE STOOD ON THESE MAJOR ISSUES?

THE ECONOMY ACT

One of the first acts of the present administration was to present to the Congress for enactment the so-called economy measure. It was an administration "must" bill and the utmost pressure was used to break down any opposition to its enactment. I fought this measure throughout. In the name of economy it took pensions from our disabled veterans, threw them out of hospitals, and denied to them and to their dependents the protection which they had a right to expect from a just and appreciative Government. I foresaw that it would result in indescribable suffering and that, at the same time, it would greatly add to the burden of the taxpayers, who would be required to provide for our disabled veterans and their dependents ruthlessly thrown on "relief." I was severely censured for not "following the President" in support of this infamous measure. It was enacted by the "yes men" of the Congress by an overwhelming vote after only 20 minutes of debate, and was a law within 15 days after the President assumed office.

WHERE ARE MY ACCUSERS?

The tragic suffering which followed the enactment of the Economy Act, the discriminations and injustices with which it was honeycombed, brought forth a storm of protest from all over the Nation. Disabled veterans and their dependents were thrown on relief in such numbers that local agencies were unable to provide for them. Suicides followed in alarming numbers among our disabled veterans, and the ingratitude of a nation to its defenders, exemplified in the so-called Economy Act, became a national disgrace. Almost immediately after its enactment, administration efforts at correction began. Since the economy bill became a law the President has issued 12 Executive orders, with 29 amendments to these Executive orders, making a total of 41 Executive orders issued by the President as a result of the Economy Act. The Veterans' Administration has rendered 261 Administrator's decisions in reference to the act, and there have been revised, wholly or in part, 815 paragraphs of regulatory material used by the Veterans' Administration in carrying on its activities. In addition, a contrite Congress enacted 11 public acts in an effort to correct discriminations resulting from the Economy Act.

Thus, those who had most severely criticized me for my opposition to the President in this instance in effect acknowledged the justice of my position and absolutely vindicated me.

THE PAUPER WAGE SCALE

I opposed the President's pauper wage scale for our unemployed, ranging from $19 to $95 per month, and approximating $55 monthly for our worthy unemployed in California. Such a wage scale, as low as $19 monthly, in my opinion, was absolutely un-American and an injustice to our unfortunate unemployed. I supported a move in the Congress to provide for the payment of prevailing wages to the unemployed, but under administration pressure the pauper wage scale was enacted into law.

DO THE FACTS SUPPORT MY CRITICS?

Although the move to provide prevailing wages for our unfortunate unemployed was defeated, Mr. Hopkins, Works Relief Administrator, did give discretionary power in the matter to certain of his administrators, with the result that prevailing wages were actually paid to W. P. A. workers in certain sections. The bill providing $1,500,000,000 additional work-relief funds, enacted in the present session, carried a provision for paying prevailing wages to all workers under W. P. A., and Mr. Hopkins himself appeared before the Senate committee, advocating the prevailing-wage scale in W. P. A. employment, thus reversing himself and expressing my point of view on this important issue.

MORTGAGE RELIEF

I voted against the first bill sponsored by the administration to provide mortgage relief to home owners, because I

recognized that until the principal of the bonds was guaranteed the measure provided for little more than a relief mirage.

WAS I RIGHT IN MY JUDGMENT?

In the next session of the Congress this act was amended to guarantee the principal of the bonds, as it had been demonstrated that it was practically valueless in its original form. I then supported it.

THE A. A. A.

I opposed the A. A. A. and its destruction of foodstuffs while our suffering millions faced starvation. I considered this measure unconstitutional and an indirect sales tax on foodstuffs which would bear most heavily on the unemployed.

THE FACTS SPEAK FOR THEMSELVES

Prices of certain foodstuffs skyrocketed under the artificial stimulus of the A. A. A. scarcity program. Belated reports from the A. A. A. revealed the fact that huge payments, amounting to $1,000,000 or more, were paid to individuals or corporations for their mere failure to plant certain crops—an extravagant procedure paid for out of the taxpayers' funds. The Supreme Court declared the A. A. A. unconstitutional.

THE TOBACCO AND POTATO CONTROL ACTS

I opposed the Tobacco and Potato Control Acts in the face of administration pressure for their enactment. I recognized that they were unconstitutional and an indefensible attempt at regimentation of our individual farmers.

WERE THE "YES MEN" WHO ENACTED THESE BILLS RIGHT?

The potato-control bill was so ridiculous that even the Secretary of Agriculture declined to carry out its provisions, and both these bills were so flagrantly unconstitutional that the President himself recommended their repeal.

THE DEATH CLAUSE OF THE UTILITY BILL

I opposed the death clause of the utility bill, urged by the administration, because it was not only contrary to our Democratic platform declaration but I believed it to be unconstitutional, and in its enactment I foresaw the defeat of practical, constitutional, orderly methods of accomplishing the desired result—that is, the elimination of the nefarious practices of the big holding companies and the reduction of utility rates to the consumer.

THE PUBLIC IS THE GOAT

The Utility Act has already been declared unconstitutional by a court of appeals and action is pending in the Supreme Court. In the meantime orderly, constitutional, practical, regulatory legislation having been defeated by the enactment of legislation of dubious constitutionality, the big utility companies are still free to gouge the consumers and continue their monopolistic control.

THE GUFFEY COAL BILL

I opposed the Guffey coal bill, although the President himself urged its passage, regardless of doubts as to its constitutionality. I voted against it, even though it had some provisions in respect to labor of which I approved, because I believed it to be unconstitutional and a betrayal of labor's hope for sound legislation.

WHO IS BENEFITED BY THE ENACTMENT OF UNCONSTITUTIONAL LEGISLATION?

The Supreme Court of the United States declared the Guffey Coal Act unconstitutional and thus relegated this measure to the scrap heap.

MY PROPOSALS FOR RECOVERY INCLUDE MONETARY REFORM, NATIONALIZATION OR SOCIALIZATION OF BANKING, CONTROL OF MASS-PRODUCTION MACHINERY, AND SO FORTH

No one can deny that we have made some progress in the New Deal, but thus far we have acted somewhat like a cat toying with a mouse. We have kept the depression more or less under control by the issuance of billions of tax-exempt bonds—through which the money changers, who are still established in the temple, are the principal profiteers—but as yet we have failed to apply the knock-out which has been wholly within the power of the Democratic administration for the past 4 years. Like the cat playing with the mouse, we have struck at the depression with one paw, then another, but it still persists, and, in my opinion, it will continue to persist as long as we permit the international bankers, through the medium of the Federal Reserve System, to coin money and extend credit with a fountain pen.

The first act of our administration was to rehabilitate the banking structure through the issuance of $2,000,000,000 of fiat money, whereas if the President had applied the knock-out by taking over the ownership or the control of banks at that time, we would have long ago been on the road to permanent prosperity.

CONGRESS SHOULD ASSERT ITS RIGHTS UNDER THE CONSTITUTION

The Constitution provides that the Congress has the right to coin money and regulate the value thereof, but after 4 years we Democrats have failed to follow the precepts of the Constitution in this respect. We continue to pay high interest rates to the banker for Federal Reserve notes which the Bureau of Printing and Engraving grinds out voluminously and distributes to the banker at a cost of 30 cents per $1,000.

THE GOLD REVALUATION ACT HAS PROVED TO BE A GIFT TO THE BRITISH

I supported the President in the matter of gold revaluation, not so much for the benefits that may accrue from this act but on a basis of the principle that gold and silver are not necessary in the conduct of business. I have repeatedly stated that the world could get along without either gold or silver and that a commodity dollar would insure a more stable purchasing power than the fluctuating value in gold and silver.

What have we accomplished under the Gold Revaluation Act? We made it possible for England, which produces at least 70 percent of the gold of the world, to buy from American manufacturers and agriculturalists at 60 cents on the dollar. In other words, we are giving the British 100 percent of American labor for every 60 cents worth of gold at the price of gold prior to its revaluation.

Aside from the standpoint of economics, from the standpoint of common sense, it seems, indeed, quite stupid that we as a nation should place a 40-percent premium on British gold which is produced by virtually coolie labor from virgin ore in the Transvaal, then import this gold to our country, giving in value $1 worth of labor for each 60 cents worth of gold, and as soon as it is received here immediately transport it to Kentucky or Colorado, where we bury it in huge pits dug into the ground!

Assuming that we eventually get the entire gold of the world, of what utility will it be if it is buried deep in the ground from whence it came and if the nations with whom we wish to carry on business repudiate gold as a medium of exchange? This is hypothetical, but nevertheless is cited as a situation which could eventuate in our stupid quest for gold, gold, gold!

WHY NOT REVALUE SILVER ALSO IN OUR OWN INTEREST?

If we are to have revaluation of metals which we use as money, why revalue gold only, the most of which is in the hands of the international bankers and produced by the British? Why not revalue silver, of which the United States and the Americas produce 75 percent or more of the world's production, thus adding to our own basic virgin wealth, rather than to the value of the gold possessed by the international bankers and the British producers? Inasmuch as 80 percent of the people of the world have always used silver as their monetary standard, if we revalued silver as we did gold, the value of the silver produced by our own people would be increased, and at the same time the purchasing power of 80 percent of the world's population would be increased in like proportion. They would then be in a position to buy our products and our foreign trade would be reestablished.

The bankers, however, and the Congress of the United States seem to worship at the altar of gold, and until this fetish of gold worship is abolished there can be no assured economic recovery with any degree of permanency. Of what utility is gold that, as soon as it is received from the miner, passes quickly through international exchange to the deep pits of Kentucky or Colorado, unless we print circulating gold

certificates for each dollar in value so buried? This we have failed to do. We did, however, print gold certificates in value as high as $100,000 each, which safely recline in the vaults of the private Federal Reserve System and circulate only among the money changers. In other words, we have taken the so-called wealth of the nations and, like the man whose story we read in the Bible, we have buried these talents. Here again I must point out that the bankers apparently control Congress, which will not approve of printing a gold certificate for every dollar of gold that is buried. The bankers and their representatives in Congress will not permit a sufficient amount of money to circulate to do the business of the United States.

The crux of the entire problem is this—the bankers control the volume of money in circulation. This should be directly under the control of Congress and not in the hands of the privately owned Federal Reserve System.

THE AMERICAN PEOPLE ARE BEING BLED BY A FALSE MONETARY SYSTEM

In my speech of January 30, 1935, in favor of the Townsend old-age pension I cited figures to prove that the American people pay to the monied crowd each year on public and private debts at least $12,000,000,000. Think of it—this huge amount in interest paid annually by American citizens to entrenched private wealth.

THE NATIONALIZATION AND EVENTUAL SOCIALIZATION OF BANKING IS THE FOUNDATION FOR REAL RECOVERY

In the nationalization, or Government control, of banking and the subsequent socialization, or Government ownership, of banking, interest profits would accrue to our Government, and if the interest rate were maintained at the present figure, the national revenue would be so great that taxes could be abolished.

Interest, regardless to whom paid, is a handicap to future progress. The rich man's son who inherits $1,000,000 in tax-exempt bonds pays absolutely no tax and is assured of an income for the balance of his life without the exertion of an ounce of energy. On the other hand, other American young people who do not inherit unearned wealth are taxed for the balance of their lives to maintain the idle bondholder, who, in many instances, migrates to a foreign country and lives the "life of Riley", clipping coupons paid by the fruit of the labor of honest, hard-working American citizens.

MONEY SHOULD BE AVAILABLE TO THE CITIZEN AT COST

In the socialization of banking I would propose the gradual elimination of all interest so that the citizen, on a basis of proper collateral, could obtain money from the Government at cost. This can be more readily understood by a comparison with our present interest-payment plan. If the American citizens could be freed from paying the $12,000,000,000 to $13,000,000,000 which is exacted from them annually in interest, this huge amount of money would remain in their pockets, thus adding to their purchasing power.

It is self-evident to any economist that interest and taxes, brought to the oppressive stage as they are today, are bound to choke out the lifeblood of commerce until we arrive at ultimate stagnation. While under the Constitution all citizens are recognized as equal and as having certain inalienable rights, nevertheless the exaction of interest from one citizen by another is a form of bondage or slavery which should be removed entirely or, as I have just suggested, reduced to the mere cost entailed in making loans.

TAX-EXEMPT BONDS ARE AN UNWARRANTED BURDEN ON THE PEOPLE

The Democratic administration is wholly responsible for the continued issuance of tax-exempt bonds. No citizen of honesty and intelligence would have the temerity to assert that, if the question of tax-exempt bonds were submitted to the people, they would not be forever abolished. Therefore it will be necessary, in my opinion, for those who believe in truly representative government and the freedom of the American people from bondage, especially the youth of our land, to elect to Congress only individuals who are pledged to support a constitutional amendment forever outlawing tax-exempt securities and breaking, once and for all, the chains with which the money lenders have bound us.

At present 17 cents out of every dollar which the taxpayer pays for direct Federal tax goes to the banker and the other bondholders who own the Government debt. In addition we are called upon to pay an equal, if not a larger, amount to the bankers and bondholders for municipal, county, and State indebtedness. Just think of this huge loss to the American people, which is nothing other than a direct subsidy to entrenched wealth. I do not include in these figures the actual cost of the maintenance of government. The figures I submit show the degree of bondage to which we have descended. If we continue in this way it will not be long before the banker and bondholder will be taking the entire Federal taxes as interest. There is absolutely no reason, in my opinion, why the Government or any political subdivision should be forced to pay interest on its legitimate expenditures, guaranteed as these expenditures are by the wealth of the entire Nation.

THE PROFITS OF BANKING RIGHTFULLY BELONG TO THE PEOPLE

I am sorry my limited time prevents going into detail on monetary and banking reform. I may say here that it is my contention that no Representative can truly represent the people's interest if he acquiesces in our present banking system, and I believe that it is the duty of the electorate to remove from the halls of Congress those who believe in the divine right of the private banker to issue money and extend credit with a fountain pen.

THE COMMODITY DOLLAR IS OPPOSED BY THE SELFISH INTERESTS

The most of the farm groups of America are in favor of the commodity dollar which would give a stabilized purchasing power to the American citizen and prevent the losses which we have suffered and will continue to suffer as long as our monetary system is anchored to the golden ark of the international banker. Gold and silver have a fluctuating value and will continue to have a fluctuating value as long as the determination of such value remains in the hands of private bankers. This responsibility should rest entirely in the hands of the Congress, the body directly charged with the obligation of representing the interests of the people.

AN APPEAL TO AMERICAN YOUTH

Mr. Taussig, advisory chairman of the National Youth Administration, recently warned that 5,000,000 idle youth spells trouble. He is a "new dealer" with the intelligence to recognize that we owe a duty to the young men and women of our Nation. I am especially interested in our young men and women and have consistently fought in Congress for legislation in their behalf. Because in some instances I opposed the administration in the interest of our young people, the downtrodden, and the unemployed, my patronage was taken from me and I was given no consideration by the administration, but was told to "march in line." I will "march in line" for the youth of our country, for the unemployed, and the downtrodden, but I will not "march in line", sheeplike, behind any so-called leader. I consider that it is my responsibility as a representative of the people to know where I am going and to know that such destination will be in the people's interest.

I refer further to a statement credited to Harry L. Hopkins, Relief Administrator, to the effect that, even after we attain recovery, we will have 5,000,000 or more unemployed. I refer also to a statement made by Mme. Perkins, Secretary of Labor, who was recently quoted in the weekly labor paper, Labor, to the effect that if the country recovers to the 1926 level, the heyday of our prosperity, we will still have more than 6,500,000 able-bodied American unemployed. This is indeed a dismal picture to be painted for the American people by those to whom they have looked hopefully for national recovery.

I do not believe anyone, especially anyone in public life, elected or appointed, should criticize unless they have something to offer to correct what they criticize. Mr. Taussig, Mr. Hopkins, and Mme. Perkins apparently have no suggestion to offer to correct this distressing condition of unemployment which, they aver, will continue, even though we attain recovery. In my opinion, the thought of 6,500,000

able-bodied unemployed Americans is absolutely irreconcilable with any sane idea of national recovery.

Any of us may be included in the large numbers doomed to permanent unemployment under the Hopkins-Perkins theory. I am asking you, candidly, Are you satisfied with such an attitude of resignation and acceptance of widespread unemployment, with its accompanying suffering and unrest, as inevitable? I, for one, am not satisfied with such an attitude, and I will not accept the assertions of administration leaders that our unemployment distress is permanent and inevitable.

Mme. Perkins is quoted as saying:

> The fly in the ointment, however, is the desire and the ability of industry to produce more with fewer workers and smaller pay rolls.

She offers no remedy but points the finger to what she believes to be the cause of the millions that will be unemployed, even after so-called recovery.

THE 30-HOUR-WEEK BILL AFFORDS A PRACTICAL MEANS OF CARRYING OUT THE PRESIDENT'S PROPOSAL

We have had before the Congress a bill known as the 30-hour-week bill, which could have been passed in the House of Representatives in 5 minutes if the President had approved it. I was on the floor on several occasions when the chairman of the Committee on Labor endeavored to obtain action on the 30-hour-week bill, but he was frustrated in his endeavors each time by parliamentary maneuvers of administration leaders in the House. The President is quoted recently as stating that the hours of labor should be reduced. The Black 30-hour-week bill offers a practical means to that end.

THE MACHINE WAS MADE FOR MAN—NOT MAN FOR THE MACHINE

I proposed to the Congress on numerous occasions a plan which would absolutely abolish unemployment if adopted in connection with Government control of money and credit. I refer to the control of mass-production machinery. Under the present system of government and economics the average citizen is a slave to the money power and a potential victim of the rapid inroads of the labor-saving machine.

No sensible individual would abolish modern labor-saving machinery; but, on the other hand, no sensible citizen should approve of the monopoly of mass-production machinery in the hands of the financiers or big business to the utter enslavement of the worker. The machine should serve man and not enslave him by throwing him out of employment and causing him and his family to become impoverished objects of charity, and, what is even more dangerous, making it necessary for the Government to vote billions of dollars (which they secure through the pernicious practice of issuing tax-exempt bonds) to provide for him a pauper wage of from $19 to $95 per month!

I repeat: The machine should be the servant of man and not his master. My limited time prevents going into detail on this subject, but as an example of the menace of the uncontrolled machine, consider the fact that statistics show that 13,000 individuals are employed today in the manufacture of business machines which, in the offices of our country, have displaced 1,000,000 white-collar workers whom the taxpayers are today subsisting. The cotton-picking machine, with which 2 men can do the work of 100 cotton pickers, is another striking example of human-labor displacement by the mass-production machine. Tugwell is quoted as proposing that the Government acquire control of this recently patented machine. It would be the height of folly for the Government to obtain the control of mass-production machinery and at the same time to permit the control of money to rest in the hands of the private banker.

THE ADMINISTRATION RECOGNIZES MY PROPOSAL FOR THE CONTROL OF MASS-PRODUCTION MACHINERY

According to the records, I was the first Member of Congress to speak on the displacement of human labor by the machine, and I advocated and introduced legislation to provide for a small appropriation to study this question with a view to determining the best means of procedure to restore employment to those thus unemployed.

I also submitted this question to the W. P. A. and am pleased to report to my constituents that $12,000,000 was set aside by Mr. Hopkins, the W. P. A. Administrator, for a national survey of the displacement of human labor by mass-production machinery. This survey is now being conducted, and I feel confident that the results will be such as to confirm my views that much of our unemployment is due to the labor displacement of the machine and that a means of correction can be found whereby the machine can be made the servant, instead of the master, of our workers.

THE MACHINE HAS BECOME A FRANKENSTEIN THREATENING THE WELFARE OF OUR WORKERS

Not only has the mass-production machine created havoc among the American workers directly, but the greedy manufacturers of these machines have exported them to other nations, and as a result these foreign nations no longer buy the materials from us which they were compelled to purchase heretofore. We have given the foreigner our mass-production machinery, and, with low-paid labor and low standards of living, he is able to use it to manufacture materials for his own consumption and, in addition, a surplus, which he imports to our country and sells in cutthroat competition with our own domestic materials, thus reducing the market for American-made goods and adding to our unemployment in a dual manner.

I propose that the mass-production machine be made the servant of the entire people of our country through a system of taxation of the products of the machine or a limitation of the hours which such machine may be manipulated by one man, thus shortening the workday of the worker and providing more jobs. Moreover, I believe that wherever the foreigner is in a position to use our mass-production machinery to undersell the American producer in our own markets, our American producer should be protected by an adequate tariff to guarantee at least a job at a living wage to the American worker, plus a reasonable profit to the manufacturer and thus prevent the flooding of our markets with foreign goods produced by low-paid labor—in many instances child labor—whose standard of living does not approach our own.

I AM OPPOSED TO CHILD LABOR

I favor legislation which will prevent child labor in our country, but I am not in favor of turning the control of the child over to any Federal bureaucrats, except under strict and definite limitations as to employment.

MY VOTE HAS BEEN CONSISTENTLY IN LABOR'S INTERESTS

I supported the Labor Relations Act and have consistently voted in the interest of labor. I believe in the fullest measure of cooperation between labor and capital, as both are necessary in our present capitalistic set-up.

RAILROAD RETIREMENT ACT

It was a pleasure to me to support the Railroad Retirement Act, which I believe to be constitutional, inasmuch as it pertains to individuals employed in interstate business. An amended bill on this subject is now pending in the courts to determine its constitutionality.

A SQUARE DEAL TO CAPITAL AND LABOR

I am not in favor of destroying wealth but advocate the creation of wealth within limitations. Inasmuch as capital would not exist and could not be maintained except through labor, I feel that labor is entitled to a saving wage and the fullest measure of protection against arbitrary action on the part of the employer. At the same time I feel that the employer is entitled to protection, within the law, from acts of lawlessness and intimidation on the part of any groups.

WE SHOULD HAVE A SENSIBLE REDISTRIBUTION OF WEALTH

I am in favor of reducing or entirely eliminating the consumption taxes which fall most heavily upon the poor man, and I would substitute therefor a graduated and progressive increase within the income-tax brackets, beginning with incomes of $5,000 or more. It seems stupid, indeed, to permit incomes of $1,000,000 or more per annum to one individual while millions of our citizens are unemployed through no

fault of their own—in fact, the most of them are unemployed because of the monopoly in banking, credit, and in mass-production machinery which individuals in the larger income brackets control.

CONGRESS IS RESPONSIBLE FOR NATIONAL PEACE AND SHOULD ACCEPT ITS RESPONSIBILITY

It was a pleasure indeed to me to support neutrality legislation, but I believe that the legislation enacted could and should have been strengthened. I believe in neutrality laws which will be fair to all nations and which will be predicated upon direct, specific instructions of the Congress, and I do not approve of vesting the authority for administering neutrality legislation in the hands of any individual. Congress, which under the Constitution is authorized to declare war and make peace, should likewise retain to itself the right to legislate specifically on the issue of neutrality.

WAR PROFITS ARE DISTRESS PROFITS AND SHOULD BE OUTLAWED

I supported legislation in the interest of eliminating the profits of war, and I am in accord with the recommendations of the Munitions Committee that those engaged in the munition or other industries which derive their principal profits from war should be taxed to the utmost. If the soldier can be forced to give his life in time of war at $30 per month compensation, I feel that the warmongers should at least make material sacrifices during such emergencies.

THE PEOPLE HAVE A RIGHT TO DECIDE WHETHER THEY WILL ENGAGE IN COMBAT ON FOREIGN SOIL

I supported the constitutional amendment proposing a referendum before our Nation would engage in war on foreign soil, and I am heartily in accord with any proposal which will give the American people the right to determine for themselves whether they desire to engage in conflict outside of the confines of our own country. Certainly no one can legitimately object to the American people arising en masse to protect themselves from threatened invasion.

WE MUST HAVE OUR DOMESTIC HOUSE IN ORDER

I favor a policy of peace. I am, however, more concerned at the present time in economic and social peace in America, the fullest measure of security to the aged, and every encouragement and assistance to youth than I am in the threatening aspects of foreign horizons, for I believe that economic and social harmony at home is a prerequisite to amicable international relations and a safeguard against entangling alliances, which are costly, indeed, if one may judge from the tax burdens we now carry due to the World War.

As I have said, I am in favor of world peace, and in the furtherance of this objective I advocate the fullest measure of disarmament and Government ownership or control of munition plants through the taxing process.

THE SECURITY-CONTROL BILL SHOULD BE AMENDED TO PROTECT THE PUBLIC ALSO FROM THOSE WHO GAMBLE IN THE NECESSITIES OF LIFE

I voted for the President's security-control bill, which is an honest endeavor to protect the American investor from wildcat promotors and stock manipulators. This act, however, should be amended to provide a tax adequate to protect the American public from those who gamble in the necessities of life and thus increase the cost of living to the consumer. As it is today, the stock-market manipulator and the middleman make a much greater profit on agricultural supplies than does the original producer.

POSTAL SAVINGS BANKS

In each session I have introduced and advocated legislation to expand the facilities of the United States postal savings in the interest of the people, to free them from the dictation of the international bankers. H. R. 3030, which I introduced in the last session, and on which I was granted a hearing by the committee, failed of enactment because there are too many servants of the bankers in the halls of Congress.

PRODUCTION FOR USE

My opponents who criticize me for not following the President and who are advocating production for use must know that, thus far, the President has opposed this proposal. Even the W. P. A. would not grant funds which were requested by California for this experimental purpose. I cannot understand the logic of my opponents who publicly announce they will "follow the President" 100 percent and who, at the same time, advocate production for use, which the President opposes. Would they, if elected, "follow the President" and continue the wasteful spending under the C. W. A. or the W. P. A., or would they actually insist upon production for use which they advocate now so vociferously?

I have proposed that the Congress assert its constitutional prerogative to coin money and regulate the value thereof, and to extend credit to the citizen, on the basis of proper collateral, at the lowest possible rate of interest—or at cost. If the Congress would permit a sufficient amount of money to remain in circulation, the problems of production and distribution could be more adequately controlled by the expansion or contraction of the volume of purchasing power in circulation, and the necessary revenues for government could be obtained by a progressive income tax which would have for its objective the reduction of the incomes of those in the higher brackets (beyond a certain predetermined maximum) in order to keep the Budget in balance. At the same time, progressive income-tax rates would provide funds for the employment of employable citizens at a good living wage, which should equal the prevailing wage rate in similar occupations in private industry. Until we go to the root of the problem and establish our monetary system on a sound basis of justice to the people themselves, we are merely compromising with injustice in our attempts at reform, perpetuating, through "relief" measures, a system which is in itself a denial of the inherent rights of the people whom we seek to save.

CIVIL LIBERTIES

The CONGRESSIONAL RECORD will show that I opposed legislation of a repressive character, including the so-called peacetime sedition and military disaffection bills, which are directed at free speech, a free press, and free assembly. I am opposed to the monopoly of the radio, and will oppose any monopolies which are in violation of the constitutional guaranties of free speech, a free press, and free assembly, vouchsafed to us in the Constitution. Unless the people are free to express themselves on any issue, such issues cannot be properly met, and the result will be the type of dictatorship which we see in European countries where parliaments have been abolished, where the press is subservient to the ruler, and where elections are a mockery. If I am to err, I would rather err on the side of a bit too unbridled freedom of speech than on the side of repression and restriction.

We should all feel proud of the progress our country has made from its birth, and we can maintain this advantage and make further progress as we honestly and sincerely discuss our problems and work for their solution through the exercise of the ballot rather than through any form of lawlessness or violence.

EQUAL RIGHTS TO ALL

I favor the enactment of the Ludlow amendment to the Constitution providing equal rights to all citizens, regardless of sex. To this amendment I would like to add specific provision for equality to all citizens, regardless of color or creed.

THE PEOPLE ALONE HAVE THE RIGHT TO AMEND THE CONSTITUTION

In taking the oath of office I swore to uphold the Constitution of the United States, and I am inclined to believe that if the Congress lived up to that provision of the Constitution regarding the issuance of money and the determination of the value thereof, there would be no reason for constitutional meddling. I am, however, not averse to amendment of the Constitution, as the Constitution is not greater than the people; but I do say without equivocation that the Constitution is greater than the President or the Congress. If the President or the Congress objects to the limitations of the Constitution and the decisions of the Supreme Court based thereon, it seems only honorable that they should propose liberalizing amendments to the Constitution and let the people decide the issue. I am not in favor of chiseling or whittling at our Constitution through the means of legislation of dubious constitutionality—or admitted unconstitutionality. We should have every faith and

confidence in the people, and if, in the opinion of Congress, there are constitutional limitations which prevent national recovery, the question of constitutional amendment to remove the alleged obstruction to progress should be submitted to the people in order that we may have what Lincoln stressed in his Gettysburg address—"government of the people, by the people, and for the people"—instead of a government by a subservient Congress which sells its birthright for a mess of patronage.

EVERY AMERICAN CITIZEN HAS A RIGHT TO A JOB AND TO SECURITY IN HIS OLD AGE

The principles which I have enunciated here, in my opinion, would bring our country from the present slough of depression in which it has become engulfed and would end our unemployment problem. In a country as vast as ours and as rich in natural resources there is no reason why any worthy citizen who desires employment should not have the opportunity to earn an honest living. He should be protected in this right during his working days, and when he is no longer able to work the wealth which he has created in the years of his productivity should be the basis of guaranteeing to him ample security in his old age, free from the specter of want, and the old-age pension granted to him should carry with it no implication that the annuitant is a pauper.

These proposals of mine are not impractical dreams. They are easy of attainment, provided the citizens of our country will elect independent individuals to Congress who pledge themselves to vote in the interest of the people rather than in the furtherance of any selfish interest. The issue is up to the people themselves; and I have every confidence in their ability to discern their own interest and to act accordingly. We must move forward to a better day when taxes will be reduced to a minimum and there will be jobs and security for all!

MY DECLARATION OF ALLEGIANCE

Critical as my remarks may seem of many aspects of our Democratic administration, they are prompted by my loyalty to our Jeffersonian party principles and my earnest hope that our party will prove itself, in actual demonstration, the real friend of the countless millions who look hopefully to it for relief from their distress. Democracy, as I understand it—and as I try to live it—means the people's voice in their own government through their duly elected representatives, and I believe that the chosen representatives of the people have a distinct obligation to them to reflect their views and to work for their welfare through legislation. These principles I have faithfully followed in the past and shall continue to follow as long as I am in public office.

I appeal to the voters of my district to judge me on my record of performance as their Congressman and compare my record with the vague promises of my rubber-stamp opponents.

STATEMENT OF PRINCIPLES

I pledge myself to support the President 100 percent on the provisions of our Democratic platform. Proposals which he submits which are not incorporated in our platform will receive my honest, sincere analysis, and if I consider them constitutional, for the best interests of the people, and predicated upon a square deal to labor and capital, I will gladly support them.

I fought with the liberals and progressives in Congress for substantial recovery legislation and have been persecuted because of my activities in behalf of the common people. If reelected I will continue my efforts to bring about, as expeditiously as possible, the fullest measure of relief to our people, and I will support such legislation as will insure jobs at good wages to our citizens and a square deal to all.

NATIONAL SAFETY AND ACCIDENT PREVENTION

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the bill H. R. 11108 and to include therein a short letter from Mr. Sullivan, of Boston, regarding national safety. The letter is very short.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I am delighted that the bill bearing my name, H. R. 11108, calling for an appropriation of $50,000 to advance a program of national safety and accident prevention passed the House of Representatives today.

For many, many months I have been deeply interested in the accident situation in this country, particularly from the standpoint of highway safety. In this Congress I introduced another measure authorizing the Secretary of Agriculture to investigate and report on traffic conditions, with recommendations for corrective legislation. I hope that this bill will pass also.

The general public in the United States is becoming more and more accident conscious. Accidents, their causes, and possible remedies, have become a topic of general and serious conversation on every hand. The newspapers, radio systems, motion-picture groups, local and national organizations, all have come to show great interest in the movement.

The bill which passed today provides an appropriation of $50,000 to meet current expenses, mostly of a clerical nature, of the Accident Prevention Conference, a group of patriotic citizens who are volunteering their time in behalf of accident prevention. This group was formed as a result of the conference called together by the President to consider ways and means of making life safer on land and sea and in the air. The conference was headed by the Honorable Daniel C. Roper, the Secretary of Commerce.

It was not the sense of the conference to attempt to set up another large Government department to combat the accident problem. Committees of patriotic men and women were formed as a clearing house for accident-prevention ideas. Their time was given without remuneration, and committees were formed to study each phase of accident. These committees and subcommittees are even now carrying on the work, but they have been handicapped because of lack of funds for clerical help, printing, and so forth.

The conference agreed that it should not seek to displace any of the activities of existing safety bodies but rather augment and encourage their activities. Among the national groups which have pledged their help are included the Automobile Manufacturers' Association, the American Automobile Association, the United States Junior Chamber of Commerce, the American Red Cross, the National Association of Credit Men, the American Legion, the National Highway Users' Conference, the National Safety Council, the National Education Association, the Boy Scouts of America, the Girl Scouts, Inc., the National Association of Mutual Insurance Companies, and other organizations of national prominence.

The committees are seeking to meet immediate problems with educational material. Accident-prevention methods which have been used successfully are being emphasized, rather than to resort to prolonged research and thus delay much-needed results.

Safety studies are being introduced in the schools of the country on a broad scale, and the importance of safety as a part of the curriculum of all schools is being emphasized. In some parts of the country wonderful progress has been made in schools teaching safety. The young mind has proved to be more receptive to safety teaching than the the adult, and I hope that the efforts of the conference to have safety education, dealing with all types of accidents on land and sea and in the air, included in all schools will meet with success.

The high point in the conference program which appeals to me is that of attempting to obtain uniform vehicle regulations throughout the United States. During the past year or more I have spoken many times both on the floor of the House and over the radio, of the serious importance of such uniformity. While the official figures of traffic fatalities for the year 1935 are not yet available, it is estimated that

36,400 persons lost their lives last year as a direct result of traffic accidents. That terrible loss of life must be reduced. The work of the conference special committee on uniform traffic regulations will help to do so. It is headed by my able colleague, the Honorable EMMET O'NEAL, of Kentucky. He is intensely interested in the subject, and his choice as chairman of the committee is most fortunate.

To show the widespread interest in the movement, I am inserting just one of the many letters which I have received from all over the country. It is written by the supervisor of health education in the Boston public schools:

BOSTON PUBLIC SCHOOLS,
CHAIRMAN OF SCHOOL COMMITTEE,
Boston, May 18, 1936.

The Honorable EDITH NOURSE ROGERS,
The House of Representatives, Washington, D. C.

MY DEAR MRS. ROGERS: I am greatly interested in your sponsorship of the $50,000 antiaccident project to be conducted by the Secretary of Commerce.

You are to be complimented in assuming the leadership in promoting the modern safety movement. As a firm advocate of such a meritorious national movement I am writing you to volunteer my services, which are based on 10 years of safety supervisory experience in the Boston public schools, the first large school system to incorporate safety into its regular school program.

We have seen the Boston program grow in importance and effectiveness through the years. Attention is drawn to the fact that fatal motor-vehicle accidents among Boston children decreased from 59 in 1924 to 22 in 1935. For the past 4 years Boston has continued to have the best record among cities of its size in number of motor-vehicle fatalities for school children.

As a leader of safety education in Massachusetts, I would feel it a real honor to serve on a committee designed to coordinate the safety movement on a national scale. For your information I am enclosing my recent leaflet on safety education.

Very truly yours,

JOHN P. SULLIVAN,
Supervisor of Health Education.

THE MACE

Mr. BOYLAN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include therein an article written about the mace. I may say I had this inserted in the RECORD about 8 years ago and had copies printed and given to the Sergeant at Arms to send out in answer to the many requests he received. The supply has been exhausted and I am asking to have the article reprinted.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BOYLAN. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following article which was written about the mace of the House a number of years ago by Mr. Will P. Kennedy:

The mace has been the symbol of authority in the House for nearly a century and a half (since 1789). The mace now in use, a beautiful silver-and-ebony weapon, which has an official position at the right of the Speaker's desk whenever the House is in session, has been in office 95 years—having first been installed in 1841. It is the duty of the Sergeant at Arms to preserve order on the floor, and the mace is his official symbol of authority and weapon of enforcement.

When the House is called to order each day an Assistant Sergeant at Arms places the mace on a cylindrical pedestal of polished green marble at the right of the Speaker's desk. When the House adjourns he removes it to the office of the Sergeant at Arms for safekeeping until the House meets again.

Never once in the history of the Republic has the mace failed. Usually when a Member becomes unruly contentious, he can be calmed simply by the Sergeant at Arms touching him on the shoulder or standing beside his chair—without the mace. In the memory of veterans at the Capitol, dating back 50 to 60 years, the mace has been called out not more than a dozen times.

REPRESENTS AUTHORITY

The mace is of very ancient and honorable origin. In the old Roman Republic the magistrates, proceeding on foot from one place to another, set up their little court where they administered justice, tried public offenders, and imposed penalties and punishments. Each of these magistrates was attended by a small body of men, known as lictors, whose duty it was to make way for the officers of the law, preserve order, make arrests, and inflict punishment on condemned citizens. Each of these lictors carried with him a bunch of rods fastened together with thongs and having an ax bound to the outside. These rods were used for scourging, and the ax for beheading.

The mace in the House of Representatives is made in facsimile of the bundle of rods carried by the lictors. These bundles of rods were known as fasces and came to be recognized as symbols of authority which every citizen had to respect. As the magistrates proceeded along the thoroughfares, the lictors, bearing the fasces, preceded them while the citizens made way. When there was any disorder the fasces were brought forward, and quiet and peace were restored. So it is today in the House where the mace as a symbol of authority demands and is accorded instant recognition by the most belligerent Members.

The Romans when they conquered Britain brought with them the fasces as an emblem of authority, which, like many other Roman customs, remained with the British people and subsequently introduced into American institutions. While no longer used for inflicting punishment, the fasces continued as a symbol of the early English magistrates.

The great councils of the early Saxons developed into one general body, which in the fourteenth century became known as the House of Commons, and the fasces, which preserved order in the earlier councils, then became known as the mace, which has since remained as the emblem of legislative authority.

Some 300 years ago Oliver Cromwell perpetrated the most flagrant and audacious affront to legislative authority when in the House of Commons he pointed to the golden mace, shouting: "Take away that bauble." Cromwell has gone, but that beautiful solid silver-gilt mace still preserves authority in the House of Commons, although there was another brazen challenge on July 18, 1930, when one John Beckett, a frenzied Labor member, during bitter debate over India, seized the mace from the Speaker's table, hoisted it over his shoulder and started to march out of the chamber, yelling, "It's a damned disgrace."

This mace of the House of Commons is 4 feet 10½ inches long. The shaft is carved with roses, thistles, fleurs-de-lis, laurel, and harps. A royal crown, the globe, a cross, the royal arms, and, of course, the lion and unicorn are all included in the design of the head. The shaft was made by Thomas Maundy in 1649. The original head was replaced 11 years later with the regal symbols of the Restoration.

PRESENT MACE MADE IN 1842

As the House of Representatives of the United States was modeled closely after the House of Commons by the framers of our Constitution, the use of the mace was borrowed from this English custom, which harked back to the ancient Roman Republic.

The first mace adopted by the House was destroyed by fire when the British burned the Capitol in 1814. From that date until 1842 a mace of painted wood did service, but in 1842 the present mace was made in reproduction of the original mace. It is a little over 3 feet in height and consists of a bundle of ebony rods, representing the States of the Union, bound together with a band of silver in imitation of the thongs which bound the fasces. From the center of this bundle of rods protrudes a silver stem on which is a silver globe nearly 5 inches in diameter. This globe is surmounted by an eagle of solid silver with outspread wings.

Whenever, as seldom happens, the House or an individual Member becomes turbulent and seems beyond the Speaker's control, the Sergeant at Arms lifts the mace from its pedestal and walks up and down the aisles of the hall. Order is promptly restored and absolute silence prevails, so great is the respect for the mace as a symbol of legislative authority. Thus the Members of the House, who are themselves lawmakers, very properly set an example for the whole country of respect for law and authority.

In 1880 the Speaker undertook to quell an incipient fight between two Representatives, William A. J. Sparks, of Illinois, and J. B. Weaver, of Iowa, when they used such menacing words and threatening actions toward each other that many Members arose to separate them. Whereupon the Sergeant at Arms moved about the House with his mace of office and order was restored. Never in its existence has the House of Representatives allowed abusive and nipping words or belligerent actions to go unrebuked.

Another blustery scene was on February 17, 1885, when John D. White, of Kentucky, while speaking from the floor of the House, was called to order by the Speaker and told to sit down. Mr. White disregarded the order and kept on talking. The Speaker then directed the Sergeant to see that the order was obeyed. The officer first approached Mr. White without the mace. He took hold of the indignant Member's arm, but he still refused to take his seat. The Sergeant then brought out the mace. Mr. White immediately took his seat. Mr. White claimed that he had been arrested without due cause, but the Speaker said he had disregarded the Chair and brought this extreme penalty upon himself.

Section 2 of rule IV provides that the mace is the symbol of the office of Sergeant at Arms, and is borne by that officer while enforcing order on the floor. This rule dates from 1789. It was originally proposed, following the parliamentary usage, that the mace should be placed on the Clerk's table during the sitting of the House and under it when the House should be in committee, but the House recommitted the proposition, and it was not carried. The mace, during the sessions of the House, is kept in an upright position on a marble pedestal at the right of the Speaker's chair. It is not taken down during a recess, but it is taken down, however, when the House resolves into Committee of the Whole, and is replaced in position when the Speaker resumes the chair.

Among historic solid-silver maces of the eighteenth century are some fragments of the mace of 1753 of the Virginia House of Burgesses, which are now preserved at Norfolk as relics, and the mace of the House of Representatives of South Carolina which was

made in London in 1756 for 90 guineas. This solid-silver gold-burnished antique is said to be the only mace now in use in the United States which antedates the Revolution. On it are engraved the royal arms of Great Britain, the arms of the House of Hanover, and other ancient insignia, along with the arms of the Province of South Carolina.

The South Carolina mace was stolen during the Revolution by British sympathizers and offered for sale to the House of Assembly of the Bahama Islands. The proposed transaction is shrouded in mystery, and legends have grown up about both the Nassau and the South Carolina maces. Some people still believe that the Nassau mace is really the old South Carolina mace, but this is not true, for it has been ascertained that the former was made in 1799—43 years after the Carolina mace was made—and the latter was found and brought back to the South Carolina Legislature. Historians now claim that this mace has not been outside the United States since it was brought to this country from London.

The South Carolina mace has also inherited some of the "Cromwell bauble" legends, and for a long time some people have claimed that it was the original "Cromwell bauble", but the present golden mace of the House of Commons, so recently desecrated by Mr. Beckett, is really the mace to which Cromwell referred.

ORIGINALLY WEAPON OF OFFENSE

The mace was originally a weapon of offense made of iron or steel capable of breaking through very strong armor. The mace was carried in battle by medieval bishops (Odo of Bayeaux is represented on the Bayeaux tapestry as wielding one) instead of the sword, so as to conform to the canonical rule which forbade priests to shed blood.

As a weapon of war the mace was used in Europe, chiefly among the cavalry, as late as the sixteenth century, and is still used among savage tribes. It consists merely as a staff about 5 feet long, with a knob at the end made of iron or some other heavy substance. The knob was sometimes covered with spikes.

The earliest ceremonial maces, as they afterward became, though at first intended to protect the king's person, were those borne by the sergeants at arms, a royal bodyguard established in France by Philip II and in England probably by Richard I. By the fourteenth century a tendency toward a more decorative sergeant's mace, encased with precious metals, is noticeable. The history of the civic mace (carried by the sergeants at mace) begins about the middle of the thirteenth century, though no examples of that period are in existence today.

There are two maces in the House of Lords, the earliest dating from the reign of William III. There are eight large and massive silver-gilt maces of the sergeant at arms kept in the jewel house at the tower of London.

The remarkable mace or scepter of the lord mayor of London is of crystal and gold set with pearls. The head dates from the fifteenth century, while the mounts of the shaft are early medieval. A mace of an unusual form is that of the Tower ward of London which has a head resembling the White Tower in the Tower of London and which was made in the reign of Charles II. The beautiful mace of the Cork Gilds, made by Robert Goble, of Cork, in 1696 for the associated gilds, of which he had been master, is in the Victoria and Albert Museum, where there is also a large silver mace of the middle of the eighteenth century, with the arms of Pope Benedict XIV, which is said to have been used at the coronation of Napoleon as King of Italy at Milan in 1805.

GREAT HOUSING CAMPAIGN WOULD PUT CRIMP IN DEPRESSION—WAGNER-ELLENBOGEN BILL IS O. K.

Mr. MAVERICK. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

DEPRESSION PARTLY TRACED TO LAG IN BUILDING

Mr. MAVERICK. Mr. Speaker, one of the most important bills in Congress is the Wagner-Ellenbogen housing bill, and in its general form I favor it. We should do everything that might assist in reviving the building trades and industry, which is 85 percent off. This applies to slum clearance, small houses in cities, farm homes—in fact, building of all kinds. Much of the lag of business and employment today can be traced directly to the lack of building, as it concerns every other trade or occupation.

Hence, I have been interested in housing ever since I have been in Congress and have favored the H. O. L. C. and the F. H. A. and similar measures, but they are by no means enough. There is no use in talking about how many millions are living in houses below a decent standard—the probabilities are that one-third of the dwellings in America are of such class.

CONGRESS SHOULD ADOPT HOUSING BILL

On January 15, 1936, I introduced House Resolution 395, which provides for a thorough investigation of the question of housing and conservation in the United States. This resolution would authorize this investigation to be done by Congressmen themselves, and would include the power of Congressmen going to Europe to make a studious investigation of the problem. Many of us fear criticism for taking "junketing trips."

As far as I am concerned, I make no bones about the fact I would like to be on the Housing Committee and go to England and see their really successful campaign, and also to the Scandinavian countries. This might be a "trip to Europe", but if valuable information is obtained it would be of incalculable worth to the American people.

I consider it perfectly disgraceful that of the civilized countries the United States appears to lag behind all the rest of them in building. England has done much to break her depression with a building campaign and we should do the same. I believe that a revival of the building trades would increase employment by two or three million men.

REVIVE BUSINESS—PUT PEOPLE TO WORK

Mr. Speaker, we should pass the Wagner-Ellenbogen housing bill this session of Congress, as well as other housing bills. This will provide the necessary decent standard of housing, revive business, and put people to work.

LYNCHING, THE BLACKEST CRIME IN AMERICA TODAY

Mr. MITCHELL of Illinois. Mr. Speaker, I ask unanimous consent to place in the RECORD a speech I made in Ohio a few days ago on the subject of lynching and to include therein a telegram I sent to the Governor of Georgia.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. MITCHELL of Illinois. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following speech made by me in Ohio a few days ago on the subject of lynching and also a telegram sent by me to the Governor of Georgia:

[Telegram]

MAY 5, 1936.

GOV. EUGENE TALMADGE,
Executive Mansion, Atlanta, Ga.

DEAR GOVERNOR: Because of the prevalence of the mob spirit in the State of Georgia at least three Negroes in your State have been the victims of these mobs and have had their lives snuffed out during the past 60 days. So far as I have been able to learn you have uttered no word of condemnation of these mobs. Do you not think that these colored people are entitled to the protection of the law and that as Governor of the State you should at least condemn the atrocities of the bloody mobs that are spreading so much fear and havoc in the minds and souls of law-abiding colored people? Law-abiding citizens throughout our country are wondering what part the Georgia Woman's World has played in fanning the flames of race hatred into such a conflagration. Do you condone that?

ARTHUR W. MITCHELL,
Congressman, First Illinois District.

My friends, I was delighted when I received the invitation from the Grover Cleveland Democratic Club, through Mr. Benjamin Fisher, to deliver an address in Toledo on the subject of lynching. Although this is without doubt the blackest crime in American history today, it is the one crime for which the perpetrators have gone practically unpunished. Authentic records show that during the past 45 years more than 5,000 human lives have been snuffed out by bloodthirsty mobs in this country. I have no statistics before me which will show the number of lynchers who have been taken before the bar of justice and punished, but I venture to say that not one out of a thousand has been called upon to answer to the law of the country for this atrocious crime.

While more than 5,000 victims of the mob have cried out for justice, it is reasonable to surmise that at least 200,000 (murderers) lynchers have been permitted to go unpunished because there has not been sufficient sentiment in the States to bring lynchers into court. Thousands of them are free members of society today.

Negroes have been the greatest sufferers from the commission of this crime; I think fully nine-tenths of the victims of the mobs have been colored men and women. Because of the failure of the States to punish lynchers, well-meaning colored men and women, together with a large group of white citizens, began an agitation a quarter of a century ago for the passage of a Federal anti-lynching law.

Fourteen years ago Congressman Dyer, the Representative of the Eleventh District of the State of Missouri, introduced an anti-lynching bill, which was sponsored by many of the leading citizens of the country, and was passed by the House of Representatives, but defeated in the United States Senate. Since 1930 about

two score antilynching bills have been introduced either in the House or in the Senate. There is today before the Judiciary Committee of the House, 30 antilynching bills. One of these bills is known as the Mitchell antilynching bill (H. R. 4457) introduced by me within 3 weeks after I took oath of office. While there is considerable sentiment among the Members of the House in favor of passing an antilynching bill, there is very stiff opposition from certain sources, men who say they are not in favor of lynching and would like very much to see the crime blotted out. They object to the passage of the law on two grounds: One, its alleged unconstitutionality, and two, its infringement upon the rights of States. For my part I am unqualifiedly in favor of the passage of a Federal antilynching bill. I have discussed the matter with the President of the United States, and while I am not authorized to speak for him, he expressed strong approval of the passage of an antilynching bill. You will recall that in 1933, immediately after the horrible lynching in California, when Governor Rolph of that State gave his endorsement to lynching, the President of the United States spoke out against this crime, and characterized it as collective murder.

I should like to say here what I have said on many occasions: I am not one of those who believes that the crime can wholly be solved by the passage of an antilynching bill, and I do not wish to be misunderstood in this matter. I have introduced a Federal antilynching bill, and I shall work for its passage, and shall do all in my power to secure sufficient votes to pass the bill in the House, and shall use whatever influence I have with Members of the United States Senate to pass the bill in the Senate; but I am not unconscious of the fact that there is work to be done aside from the passage of the bill. I believe, as I have expressed many times before, that the real solution of this crime will be found in education, Christian training, and the promotion of civic righteousness throughout the various States and communities.

I should like to remind you that the supporters of temperance in this country thought that the enactment of the eighteenth amendment into our basic law would solve the aggravating question of intemperance; you know how miserably this failed. The mistake, as I see it in that connection, was this, the temperance workers of the country worked night and day to pass the eighteenth amendment, believing that once it passed temperance would be a reality. The result is that immediately after the passage of the eighteenth amendment temperance societies ceased to operate and intemperance in the face of, and in violation of, the eighteenth amendment swept the country and invaded homes by the thousands that before the passage of the eighteenth amendment were regarded as being citadels of temperance.

It is my hope that after we pass the antilynching bill, as I believe we shall surely do, that the inter-racial commission, the churches, the schools, and the societies and organizations, which have played such a large part in making sentiment against lynching, should not cease in their activities. There must be sentiment back of the law in order to get the results for which we are hoping and praying.

I have received many inquiries from people recently who ask me this question: "Why do certain officials of the National Association for the Advancement of Colored People try to impress the country that you are not strong for the passage of this legislation?" I think there is no better place to answer this inquiry that has come to me from many sources than here in Toledo. To begin with, I wish to say that my record in Congress and out of Congress, covering a period of 30 years, much of which time was spent in the South, shows that I have always spoken out in strong terms against the mob and against lynching. To be honest, I think the difference between these men, who have sought to impress the country otherwise, and myself, is due to the fact that when I came to Congress I introduced my own antilynching bill, which I regarded, and still regard, as being the best bill before the Judiciary Committee in the House. Other than this, I know no reason why these wild and false rumors should be spread by anyone.

Since I have been in Congress, I have made many speeches in the South, and I have made speeches on the floor of the House, and on every occasion I have spoken in strong terms in denunciation of lynching and the mob. No one has been more outspoken on the floor of the House or elsewhere against this crime, but there has been a difference between myself and others as to the best method to proceed in order to pass an antilynching bill. There is nothing strange or unnatural about this. In this connection I should like to read you a letter which Mr. Walter White wrote me March 14, and my answer to this letter:

"MY DEAR CONGRESSMAN MITCHELL: I am glad to have had that long talk with you in your office yesterday, even though we obviously do not agree on certain matters.

"After leaving you I talked with a good many people in position to know the attitude of Senator JAMES F. BYRNES, of South Carolina. I sought this information in the light of your statement to me that the N. A. A. C. P., and other supporters of Federal antilynching legislation, should not proceed with securing of the signatures to the petition to the leaders of the Democratic caucus asking for a special rule to bring the 15 identical Democratic bills in the House of Representatives directly to the floor of the House of Representatives for a vote, but instead, should try to bring pressure from white women in South Carolina upon Senator BYRNES to persuade him to change his attitude on the Van Nuys resolution.

"The persons with whom I have talked who are close to Senator BYRNES are unanimous in feeling that while pressure upon Senator BYRNES, who not only is opposed to the Van Nuys resolution, but refuses even to call a meeting of the Audit and Control Committee to consider it, may be helpful, it is not likely to be sufficiently helpful to get him to change his attitude at any time soon. These individuals also feel that the time it would take to bring such pressure on Mr. BYRNES would be precious time lost, in view of the announced intention of the leaders of Congress to adjourn by May 1. This would mean, they fear, that if any action is taken on the Van Nuys resolution at all, it would be so late in the session that Senators would be dispersing to their homes and would, therefore, not give very serious consideration to the Van Nuys resolution.

"In the meantime, with the approach of warm weather, and with the general belief in certain sections of the country and among certain types of people that Federal antilynching legislation is dead, we shall have a resumption of lynching which may exceed even last year's terrible record of 25 authenticated lynchings and 102 cases of narrowly averted lynchings, which, according to The Mob Still Rides, just published by the Commission on Interracial Cooperation in Atlanta, are fundamentally as serious as consummated lynchings, since they show the presence of the potential lynching spirit.

"Will you permit me to add, in all frankness, that I am most disappointed that the one Negro Member of Congress was the sole Representative who declined or deferred signing the petition to the leader of the Democratic caucus? Several others with whom I talked told me that they would have been very much disappointed had I not asked them to sign the petition because of their deep interest in stopping lynchings.

"I would appreciate your advising me if after thinking over our conversation yesterday you are still of the opinion that you do not care to sign the petition. So desperate is the situation and so implacable is the hostility to any action against lynching among certain Senators and Congressmen, there is strong feeling that no step should be left not taken to secure definite action by the present Congress on the subject of lynching. Certain southern Congressmen and Senators and their undercover and vicious efforts against both the Costigan-Wagner bill and the Van Nuys resolution in the Senate and against the antilynching bills in the House are trying to give the run-around to Negro and white Americans that the Negro vote helped to put the President and the administration in power and will be a potent factor in the 1936 election. Nor do they seem to appreciate that they as Members of Congress will have their present power and prestige only so long as the Democratic administration is in power.

"Forthright and uncompromising action is absolutely essential, and therefore I hope you will see fit not only to join with other Members of the House of Representatives in signing the petition but in working vigorously and uncompromisingly in the caucus and on the floor of the House for passage by this Congress of an unemasculated antilynching bill.

"Very sincerely,

"WALTER WHITE, *Secretary.*"

MARCH 16, 1936.

MY DEAR MR. WHITE: I have received your letter of March 14, and have read the same with a great deal of interest. To begin with, I wish to repeat what I said to you in our conversation, namely, that I take second place to no person in the United States in expressing my uncompromising opposition to lynching and shall forever do so in the most effective manner possible. I think, in our opposition to this terrible crime, we are one and the same. It might be that we differ as to the best approach in bringing about the passage of a Federal antilynching bill, but if I understand you correctly, there can be no difference in our desire to accomplish this. I was a little surprised, however, when reading the petition you presented the other day, to find that you failed to include my own antilynching bill, introduced a year ago, and which I think is by far the best bill now pending before the House. I think, if you mean to be fair, you must agree that from our conversation you gathered the fact that I have done considerable in the House in an effort to make sentiment favorable to the passage of an antilynching bill. I remember how greatly surprised you were when I explained to you that I had talked with many of the southern Members and named some of them, including Mr. MAVERICK, of TEXAS, who have already pledged me their support of an antilynching bill whenever it can be brought before the House.

If I am to believe your statement that the only thing that keeps the Van Nuys resolution from being passed in the Senate is the opposition of Senator BYRNES, I can't help but conclude that the quickest way to get effective Federal action against lynching is to push that resolution, putting the proper pressure upon Senator BYRNES, not only through white women voters from the State of South Carolina, but through the President of the United States and others who have influence with him. You will recall that this was my suggestion in our conversation. I have thought over this most seriously since I talked with you and I can see no occasion to change my viewpoint on this. Nothing that you say in this letter does more than confirm this as being, in my estimation, the best approach at this time.

I am at a loss to understand why, in the fifth paragraph of your letter, you make the statement that I am the only Representative who did not sign your petition to call a caucus of the House at the time when the petition was presented to us last week. I am sure you do not mean to make a false statement, and yet it is difficult for me to reach any other conclusion in view of the fact that immediately after leaving you and going upon the floor of the House last Friday, a distinguished Congress-

man from the State of Indiana, whose name is familiar to you, called me before I took my seat and told me that on the previous day you had brought the petition to him and that he refused to sign, and that he had a long conversation with you in which he expressed the same view that I express—that it was not the proper procedure in the House at this time. This gentleman has introduced an antilynching bill in the House which is now before the Judiciary Committee of the House. Not only was I approached by him, but by others who told me that you had talked with them and had presented your petition to them and that they doubted the wisdom of such procedure, and because of that doubt they refused to sign at that time. What can be the purpose of such a statement as you make in this letter?

I wish to suggest that at your earliest convenience you make another trip to Washington. I shall be glad to call a conference of the leaders of the House for the purpose of having you present the petition to them and to me. In this conference I should like to have the Speaker; Hon. JOHN O'CONNOR; Hon. EDWARD T. TAYLOR of Colorado; Hon. PATRICK BOLAND, Democratic Whip of the House; yourself; and any other Congressmen you wish to suggest. I feel that the passage of a Federal anti-lynching bill is of such extreme importance that it should not be toyed with or handled in such way as to make its ultimate passage impossible. This is what seems to have happened in the Senate a year ago.

I am in position to say that with the work that I have done in the House in the way of making sentiment favorable to such a bill, it is entirely too valuable and means too much to my race for me to permit myself to be used in any way that to my mind would jeopardize the ultimate passage of this legislation. I came to Congress pledged not only to introduce an antilynching bill but to work unceasingly and uncompromisingly for its passage until such a time as this bill passes the House. This I propose to do, but I do not promise to adopt the tactics of some other person who has made a miserable failure covering a period of practically 15 years. This within itself should put us on guard that to pass the legislation we are so deeply interested in and which is so necessary to the safety and welfare of the Negro in the South that we must approach the subject with great care, thought, and deliberation. This is why I propose the conference mentioned. Please let me know what your reaction is toward this conference, and name the date that you plan to be in Washington, so that you and I might discuss it more fully before making the call for such conference.

Hoping that you are well and looking to hear from you by return mail and assuring you not only of my deep interest but of my heartiest cooperation in pushing this legislation through the House at the earliest possible moment, I am,

Very cordially and sincerely yours,

(Signed) ARTHUR W. MITCHELL.

Please note that in my answer to Mr. White I sought to cooperate with him in what I regard as being the best method in passing this legislation. I should like to call attention to the fact that not a single one of the suggestions I made in this connection was looked upon favorably by Mr. White nor were any of these suggestions acted upon. Notwithstanding this I wish to make it plain that I am in favor of passing an antilynching bill, I care not who is the author of the bill. I think the passage of important legislation like this is not to be quibbled over, and I wish to assure you and to assure this country that whatever antilynching bill is brought on the floor of the House I shall vote for its passage. Not only shall I vote for the passage but I shall work for its passage.

There is a method by which bills of this kind can be taken from the consideration of recalcitrant committees by complying with section 4 of rule 27 of the House Manual. This rule provides that a petition to lift legislation from the consideration of a committee and to bring it immediately before the House may be filed on the Speaker's desk, and when such petition shall have been signed by 218 Members of the House the bill will then be brought before the House. This is the procedure that has been resorted to in the Frazier-Lemke bill.

You will be interested to know that the Honorable JOSEPH A. GAVAGAN, of the Twenty-first District of New York, introduced an antilynching bill January 3, 1935, which bill is known as H. R. 5, and is about to be brought before the House. On the 8th day of April of 1936 Mr. GAVAGAN placed a petition on the Speaker's desk asking that this particular bill be taken from the consideration of the House Judiciary Committee and be brought before the House for immediate action. I was in Chicago engaged in the primary campaign when this petition was placed on the Speaker's desk. I returned to Washington April 17, 9 days later, and the first thing I did was to go to the Speaker's desk and to sign this petition.

I am number 36 among the signers of the petition. This petition now has almost 100 signers. I have personally used my influence to have practically every Democrat from my State to sign this petition. I expect to continue to use whatever influence I have until the required number is secured, and may I say to you that regardless of the wild rumors that come to you as to the method of bringing legislation before the House, which committee is requested to report, this is the only method by which it can be done. No caucus or group of individuals can take legislation from the consideration of committee in any manner except as I have already explained. I think what I have said is sufficient to acquaint you with the actual work that is going on in the House today.

Now, my job has been that of making favorable sentiment to the passage of this legislation. You will understand that in the House, the full membership is 435; to pass any bill, a majority of those present is required. To pass a bill so highly controversial as is this bill, much serious work must be done in order to make favorable sentiment. I regard this work as being of far more importance than the mere introduction of a bill, and I am frank to say to you, my friends, and I say it without the slightest purpose of being egotistic, I think I have, through my conduct and manipulation among the Members of the House, made at least 100 converts for the passage of this legislation.

I should like to say here that when I was seeking to be elected to Congress, I made certain very definite promises to the people in Chicago, as to what I would do if elected to Congress. I have taken the pains to bring along the very statement that I made, which is as follows:

"The most dangerous element in our country today is that of enforced idleness, brought about largely by the cessation of work. I shall be in favor of any program which tends to furnish work for the people, even though such program incurs governmental expense, thus increasing taxation. I believe that idleness is a breeder of crime, which threatens the destruction not only of our institutions, but of the Government itself. And no monetary price to wipe out idleness and bring back prosperity, is too great.

"2. I am in favor of wiping out racial discriminations, which serve only one purpose—to breed hatred, prejudice, and injustice, thus making it impossible to prosper in the largest sense.

"3. I believe that the colored American citizens should continue to enjoy the same wholesome benefits to be derived from the higher standards of living, increased wages, and better housing conditions in the national program that are enjoyed by other racial groups.

"4. I believe that discriminations in governmental departments and in civil-service departments in Washington, should be eliminated. I shall work to eliminate the practice of our Civil Service Commission requiring applicants to submit their photographs with their applications and shall advocate the fingerprint system instead.

"5. I believe that the colored people should have their just proportion of the jobs and positions created under the emergency acts through which our New Deal is being put forth.

"6. I shall work incessantly to have the Congress pass an antilynching bill such as was introduced in last Congress.

"7. I shall work to reenfranchise the colored people of the South and to wipe out all racial discriminations in voting privileges of the citizens of the South.

"8. I believe in making America first. This seems to be a national slogan, but it means nothing in our national life if we refuse or fail to make American citizens first. I contend that in the matter of employment whether in public or private enterprises and businesses, those born under our flag and those who have sworn allegiance to our flag should have preference. No American citizen who wishes to work should be forced to remain idle while a citizen of some foreign country is given work which an American could do and wishes to do. Any other course on the part of our citizens in business shows the basest kind of hypocrisy."

From this statement you will see that I pledged my constituents when I sought their vote that I would work for certain specific things in addition to working for the general program of the Democratic Party. I stand here to tell you, my friends, that I have kept that promise; my record bears me out in this statement. I should like also to call your attention to the fact that immediately after my election I gave a statement to the press as to what I expected to do in Congress, and with your permission I wish to read this statement, which should go some distance in clearing up other false rumors that have been spread by designing persons and agencies:

"I interpret my election to Congress as being a desire on the part of my constituents to have intelligent, courageous, honest, and capable representation in the Halls of Congress, which I contend the first district has not had during the past 6 years. I think the people are tired of bombast, ballyhoo, and noise, where we should have constructive thought, honest action, and real statesmanship.

"I accept the mandate of the people and look upon the same as a desire fully expressed, by white as well as by colored people, for new leadership under the New Deal. I am 100 percent in agreement with the President's program. I realize that in many instances the execution of the program is not handled as it should be, and because of this mishandling of the program different groups are made to suffer, but these are errors which can, and will be, corrected.

"I shall address myself first to looking after the interests of the people of the First Congressional District of Illinois who elected me to office. I shall always endeavor to be on the alert and use all the power that resides in me to protect the interests of my group. I shall welcome constructive criticisms from the people of the country, both colored and white, and shall endeavor to do my full duty without fear or favor of man, but trusting in God as my leader to whom I shall be responsible for my acts."

In closing this speech I wish to bring to your attention the progress that has been made through the spread of education, Christianity, civic training, and the agencies for racial good will during the past 40 years in wiping out the crime of lynching. I know you must be disturbed and alarmed as most of us are because of the frequent lynchings in the South during the last 4 months. I am exhibiting here a copy of a newspaper known as the Georgia Woman's World. This paper is published by a group of women in Atlanta, Ga. I have read many of the issues and

regard it as being the most dangerous and inflammatory journal it has ever been my privilege to read. The purpose of it seems to be to create and stir up race hatred. I firmly believe that the large number of lynchings that we have recently had in the South has been in a measure due to the circulation of this paper, and the influence it is having upon the ignorant white people who read it and believe it is their duty to engage in violence against any Negro who can be conveniently seized.

The high peak in lynching was reached in 1892, when the population of the country was 65,665,810. There were 226 lynchings, or 1 person was lynched out of every 290,000 citizens of the country, or 3.4 persons were lynched out of every million of our population. Over against this I wish to call attention to the number of persons lynched in 1932, 40 years later, at which time the population had increased to 124,822,000. There were 8 lynchings, as compared with 226 in 1892. Instead of there being 1 person lynched out of every 290,000 citizens, there was 1 person lynched out of every 15,603,000. The ratio per million had been reduced from 3.4 to 0.07 of a person.

Although mob violence in certain sections of the South seems to be on the increase, I am not discouraged; I believe that we are making progress. If in 40 years the number of lynchings could be reduced from 226 to 8, I believe that we can eventually reduce this crime to a minimum, if we are not able to wipe it out wholly, and I believe the passage of an antilynching law will do much good in making sentiment and in helping stamp out the crime.

I account it a pleasure to make these observations for your benefit and to thank you and the people of this section of the country for the support you have given and are giving, which will result in the passage of this legislation eventually and, we trust, in wiping out the crime completely. My final word: May God bless these brave justice-loving people in every part of this land who are coming forward and demanding equal protection of life, liberty, and the pursuit of happiness of all our citizens, be they rich or poor, white or black, and whether they live in the North or South.

LIBRARY OF CONGRESS TRUST FUND BOARD

Mr. SECREST. Mr. Speaker, I ask unanimous consent to file a supplemental report on the bill (H. R. 12353) to amend an act entitled "An act to create a Library of Congress Trust Fund Board, and for other purposes", approved March 3, 1925.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

UNITED STATES HARVARD UNIVERSITY TERCENTENARY COMMISSION

The SPEAKER. Pursuant to the provisions of Public Resolution No. 88, Seventy-fourth Congress, the Chair appoints as members of the United States Harvard University Tercentenary Commission to serve with himself the following Members of the House of Representatives:

Mr. O'CONNOR, of New York; Mr. RUSSELL, of Massachusetts; Mr. BACON, of New York; Mr. WIGGLESWORTH, of Massachusetts.

LEAVE OF ABSENCE

By unanimous consent, the following leave of absence was granted as follows:

To Mr. CHANDLER, for 3 days, on account of official business.

To Mr. SHANNON, for 2 days, on account of death in family.

To Mr. ZIMMERMAN, for 1 week, on account of illness in family.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 3486. An act to repeal the act entitled "An act relating to Philippine currency reserves on deposit in the United States"; to the Committee on Insular Affairs.

S. 3841. An act to amend an act entitled "An act to establish a uniform system of bankruptcy throughout the United States", approved July 1, 1898, and acts amendatory thereof and supplementary thereto; to the Committee on the Judiciary.

S. 4457. An act authorizing the appointment of an additional circuit judge for the third circuit; to the Committee on the Judiciary.

S. 4609. An act to correct the description of certain land granted to the University of Utah; to the Committee on Military Affairs.

ENROLLED BILLS SIGNED

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 2982. An act for the relief of Sarah Shelton;

H. R. 7110. An act to authorize the President to bestow the Navy Cross upon Brig. Gen. Robert H. Dunlap, United States Marine Corps, deceased;

H. R. 8262. An act for the relief of Tom Rogers and the heirs of W. A. Bell, Israel Walker, Henry Shaw, Thomas Bailey, and Joseph Watson;

H. R. 8287. An act to establish an assessed valuation real property tax in the Virgin Islands of the United States;

H. R. 8372. An act to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station and to authorize the construction and installation of a naval air station thereon;

H. R. 8431. An act to provide for the establishment of the Fort Frederica National Monument, at St. Simon Island, Ga., and for other purposes;

H. R. 8784. An act to authorize withholding compensation due Government personnel;

H. R. 9995. An act to grant a renewal of patent no. 59560, relating to the emblem of the Disabled American Veterans of the World War;

H. R. 10194. An act granting a renewal of patent no. 40029, relating to the badge of the Holy Name Society;

H. R. 10267. An act to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car contruction, chief clerks, assistant chief clerks, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service to correspond to the rates established by the Classification Act of 1923, as amended; and

H. R. 10934. An act to authorize the transfer of the customhouse at Salem, Mass., from the jurisdiction of the Treasury Department to the Department of the Interior.

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 3483. An act to provide for rural electrification, and for other purposes.

ADJOURNMENT

Mr. BANKHEAD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 12 minutes p. m.) the House adjourned until tomorrow, Wednesday, May 20, 1936, at 12 o'clock meridian.

EXECUTIVE COMMUNICATIONS, ETC.

838. Under clause 2 of rule XXIV, a letter from the Comptroller of the Near East Relief, transmitting the annual report of the Near East Relief, was taken from the Speaker's table and referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. WHITE: Committee on Irrigation and Reclamation. H. R. 12663. A bill to provide for studies and plans for the development of a hydroelectric power project at Cabinet Gorge, on the Clark Fork of the Columbia River, and a reclamation project for the Rathdrum Prairie area, and for other purposes; without amendment (Rept. No. 2675). Referred to the Committee of the Whole House on the state of the Union.

Mr. KRAMER: Committee on Immigration and Naturalization. H. R. 12325. A bill to protect for American actors, vocal musicians, operatic singers, and orchestral conductors the artistic and earning opportunities in the United States, and for other purposes; with amendment (Rept. No. 2677). Referred to the Committee of the Whole House on the state of the Union.

County, Calif., to the State of California for State highway purposes; with amendment (Rept. No. 2678). Referred to the Committee of the Whole House on the state of the Union.

Mr. PATMAN: Special Committee Investigating American Retail Federation. House Report 2679. Report of the Special Congressional Committee Investigating the American Retail Federation on that part of the resolution in regard to big-scale buying and selling, pursuant to House Resolution 239 (74th Cong.). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. House Report 2680. Report on the War Department investigation, pursuant to House Resolution 59 (74th Cong.). Referred to the Committee of the Whole House on the state of the Union.

Mr. FIESINGER: Committee on Rivers and Harbors. H. R. 11916. A bill to authorize the transfer of a certain piece of land in Muhlenberg County, Ky., to the State of Kentucky; without amendment (Rept. No. 2681). Referred to the Committee of the Whole House on the state of the Union.

Mr. CONNERY: Committee on Labor. House Resolution 49. Resolution requesting the Secretary of Labor to compile a list of the labor-saving devices, and for other purposes; with amendment (Rept. No. 2685). Referred to the Committee of the Whole House on the state of the Union.

Mr. FREY: Committee on Foreign Affairs. S. 1896. An act to provide for interest payments on American Embassy drafts; without amendment (Rept. No. 2686). Referred to the Committee of the Whole House on the state of the Union.

Mr. McREYNOLDS: Committee on Foreign Affairs. Senate Joint Resolution 226. Joint resolution authorizing the President to invite foreign countries to participate in the San Francisco Bay Exposition of 1939 at San Francisco, Calif.; with amendment (Rept. No. 2687). Referred to the House Calendar.

Mr. MILLER: Committee on the Judiciary. S. 3907. An act for the relief of the State of Nevada; without amendment (Rept. No. 2688). Referred to the Committee of the Whole House on the state of the Union.

Mr. McSWAIN: Committee on Military Affairs. S. 4432. An act authorizing and directing the Secretary of War to lease land on the Fort Moultrie (S. C.) Military Reservation to the owners of certain cottages thereon; without amendment (Rept. No. 2691). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. SMITH of Connecticut: Committee on Military Affairs. House Joint Resolution 570. Joint resolution authorizing the President of the United States to award posthumously a Distinguished Service Medal to Maj. Gen. Clarence Ransom Edwards; without amendment (Rept. No. 2682). Referred to the Committee of the Whole House.

Mr. MAAS: Committee on Naval Affairs. S. 3369. An act providing for the posthumous appointment of Ernest E. Dailey as a warrant radio electrician, United States Navy; without amendment (Rept. No. 2683). Referred to the Committee of the Whole House.

Mr. DREWRY: Committee on Naval Affairs. Senate Joint Resolution 209. Joint resolution authorizing the presentation of silver medals to the personnel of the Second Byrd Antarctic Expedition; without amendment (Rept. No. 2684). Referred to the Committee of the Whole House.

Mr. DARDEN: Committee on Naval Affairs. H. R. 11984. A bill for the relief of Oda Herbert Plowman; without amendment (Rept. No. 2689). Referred to the Committee of the Whole House.

Mr. BEITER: Committee on War Claims. H. R. 12772. A bill for the relief of sundry claimants, and for other purposes; without amendment (Rept. No. 2690). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 12358) granting an increase of pension to Melissa F. Proctor; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 12382) granting a pension to Jesse L. Fisher; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 12571) granting a pension to Caleb J. Ledford; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BUCKLER of Minnesota: A bill (H. R. 12743) to establish a Red Lake Chippewa fund from the present fund of Chippewa Indians of Minnesota; to the Committee on Indian Affairs;

Also, a bill (H. R. 12744) to amend section 101 (12) of the Revenue Act of 1934; to the Committee on Ways and Means.

By Mr. CARMICHAEL: A bill (H. R. 12745) to aid the several States in making certain toll bridges on the system of Federal-aid highways free bridges, and for other purposes; to the Committee on Roads.

By Mr. CELLER: A bill (H. R. 12746) granting the consent of Congress to agreements of compacts between any two or more States, with respect to the duplication and evasion of State and local tax laws; to the Committee on the Judiciary.

By Mr. COLDEN: A bill (H. R. 12747) to provide for the production for use for the unemployed of the United States under the direction of the Department of Agriculture by the establishment of a Civilian Cooperative Production Agency in order that all citizens of the United States may enjoy economic independence, life, liberty, and the pursuit of happiness; to the Committee on Agriculture.

By Mr. LORD: A bill (H. R. 12748) authorizing the Interstate Bridge Commission of the State of New York and the Commonwealth of Pennsylvania to reconstruct, maintain, and operate a free highway bridge across the West Branch of the Delaware River between a point in the vicinity of the village of Hancock, Delaware County, N. Y., and a point in the town of Buckingham, Wayne County, Pa., and a highway bridge across the Delaware River between points in the village of Barryville, Sullivan County, N. Y., and the village of Shohola, Pike County, Pa.; to the Committee on Interstate and Foreign Commerce.

By Mr. McMILLAN: A bill (H. R. 12749) to authorize the Secretary of the Navy to proceed with the construction of certain public works, and for other purposes; to the Committee on Naval Affairs.

By Mr. McSWAIN: A bill (H. R. 12750) to provide for the administration of the United States Soldiers' Home; to the Committee on Military Affairs.

By Mr. BOEHNE: A bill (H. R. 12751) to make movement in interstate or foreign commerce with intent to avoid obligations to support certain persons an offense against the United States; to the Committee on the Judiciary.

Also, a bill (H. R. 12752) making it a Federal offense for any person to move in interstate or foreign commerce with intent to avoid his obligation to support his children; to the Committee on the Judiciary.

By Mr. DARDEN: A bill (H. R. 12753) to authorize the coinage of 50-cent pieces in commemoration of the three hundredth anniversary of the original Norfolk (Va.) land grant and the two hundredth anniversary of the establishment of the city of Norfolk, Va., as a borough; to the Committee on Coinage, Weights, and Measures.

By Mr. McFARLANE: A bill (H. R. 12754) to authorize the acquisition of lands in the vicinity of Galveston, Tex., as a site for a naval air station and to authorize the construction of a naval air station thereon; to the Committee on Naval Affairs.

By Mr. CRAWFORD: A bill (H. R. 12755) to further the development and maintenance of an adequate and well-balanced American merchant marine, to promote the commerce of the United States, to aid in the national defense, to repeal certain former legislation, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. CROWTHER: A bill (H. R. 12756) to authorize the coinage of 50-cent pieces in commemoration of the memory of the late Dr. Charles P. Steinmetz; to the Committee on Coinage, Weights, and Measures.

By Mr. KNUTSON (by request): A bill (H. R. 12757) to amend the Social Security Act with respect to old-age benefits, and in other respects; to the Committee on Ways and Means.

By Mr. GASQUE: A bill (H. R. 12758) to increase the pension to certain veterans of the Regular Establishment on the rolls March 19, 1933; to the Committee on Pensions.

By Mr. McCORMACK: A bill (H. R. 12759) to expedite the despatch of vessels from certain ports of call; to the Committee on Merchant Marine and Fisheries.

By Mr. TERRY: A bill (H. R. 12760) authorizing a preliminary examination and survey of the Fourche La Fave River, in Perry, Yell, and Scott Counties, Ark., with a view to the construction of a flood-control reservoir dam in the vicinity of what is commonly known as The Narrows on said stream in Scott County; to the Committee on Flood Control.

By Mrs. O'DAY: A bill (H. R. 12761) to extend the definition of an alien veteran for naturalization purposes only, so as to include certain alien enemies and nationals of Turkey and Bulgaria who rendered active service in United States armed forces with personal record of loyalty to the United States, and for other purposes; to the Committee on Immigration and Naturalization.

Also, a bill (H. R. 12762) to extend the definition of an alien veteran for naturalization purposes only, so as to include certain alien enemies and nationals of Turkey and Bulgaria who rendered active service in the United States armed forces with personal record of loyalty to the United States, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. SAUTHOFF: A bill (H. R. 12763) to provide for the general welfare by enabling the several States to make more adequate provision for the operation of open-air health camps for children of indigent families; to the Committee on Interstate and Foreign Commerce.

By Mr. VINSON of Kentucky: A bill (H. R. 12764) to create a Division of Stream Pollution Control in the Bureau of Public Health Service, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MEAD: A bill (H. R. 12765) to provide for the transportation and distribution of mails on motor-vehicle routes; to the Committee on the Post Office and Post Roads.

By Mr. PATTERSON: A bill (H. R. 12766) to amend section 207 of the act approved February 28, 1925, as amended, to promote Parcel Post Service; to the Committee on the Post Office and Post Roads.

By Mr. PIERCE: A bill (H. R. 12767) to authorize completion, maintenance, and operation of certain facilities for navigation on the Columbia River, and for other purposes; to the Committee on Rivers and Harbors.

By Mr. GASQUE: A bill (H. R. 12768) granting double pensions for disability from aviation, submarine, or diving duty; to the Committee on Pensions.

Also, a bill (H. R. 12769) to liberalize the provisions of Public Law No. 484, Seventy-third Congress, providing pensions to widows and other dependents of deceased service-connected disabled World War veterans; to the Committee on World War Veterans' Legislation.

By Mr. MITCHELL of Illinois: A bill (H. R. 12770) to provide for the organization and maintenance of two battalions of combat infantry of colored troops as a part of the National Guard of the State of Pennsylvania and appropriating $100,000 for its equipment by the War Department; to the Committee on Military Affairs.

By Mr. O'LEARY: A bill (H. R. 12771) to afford protection against unauthorized use of the ensign, emblems, badges, designating marks, and certificates of the United States Power Squadrons, Inc.; to the Committee on the Judiciary.

By Mr. BEITER: A bill (H. R. 12772) for the relief of sundry claimants, and for other purposes; to the Committee on Claims.

By Mr. COCHRAN: Resolution (H. Res. 518) to provide for clerk to stenographers to committees; to the Committee on Accounts.

By Mr. BEITER: Joint resolution (H. J. Res. 591) to enable the Reconstruction Finance Corporation to finance additional projects of the Federal Emergency Administration of Public Works; to the Committee on Banking and Currency.

By Mr. SIROVICH: Concurrent resolution (H. Con. Res. 49) creating a joint committee of the Senate and House to determine the practicability of a union between the United States and Canada, and for other purposes; to the Committee on Rules.

By Mr. VINSON of Georgia: Concurrent resolution (H. Con. Res. 50) expressing the appreciation of Congress for a bequest of a collection of naval and other medals from the late Dr. Malcolm Storer, of Boston, Mass.; to the Committee on Naval Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BROWN of Michigan: A bill (H. R. 12773) for the relief of Mary Way; to the Committee on Claims.

By Mr. DOUGHTON: A bill (H. R. 12774) granting an increase of pension to Alfred L. Gross; to the Committee on Pensions.

By Mr. FLETCHER: A bill (H. R. 12775) granting an increase of pension to Keturah O. Donnels; to the Committee on Invalid Pensions.

By Mr. KRAMER: A bill (H. R. 12776) granting a pension to Clara E. Huffman; to the Committee on Invalid Pensions.

By Mr. McCORMACK: A bill (H. R. 12777) for the relief of Ralph W. Sears; to the Committee on Military Affairs.

By Mr. MONAGHAN: A bill (H. R. 12778) granting compensation to Joseph C. Eastland; to the Committee on Claims.

Also, a bill (H. R. 12779) to settle certain claims against the United States in connection with fire-fighting work of the Forest Service in Montana; to the Committee on Claims.

Also, a bill (H. R. 12780) for the relief of Benjamin Stewart; to the Committee on Claims.

Also, a bill (H. R. 12781) for the relief of Wade R. Parks; to the Committee on Claims.

By Mr. RANDOLPH: A bill (H. R. 12782) to provide compensation for Walter L. Helbig for injuries received at the Navy Yard in Washington, D. C.; to the Committee on Claims.

By Mr. REECE: A bill (H. R. 12783) for the relief of Harry W. Dubiske; to the Committee on Claims.

By Mr. SANDERS of Texas: A bill (H. R. 12784) for the relief of C. A. Jones; to the Committee on Claims.

Also, a bill (H. R. 12785) for the relief of Elbert Gentry; to the Committee on Claims.

By Mr. WHITE: A bill (H. R. 12786) granting a pension to Marion M. Luther; to the Committee on Invalid Pensions.

Also, a bill (H. R. 12787) granting a pension to Leona J. Strickland; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10902. By Mr. ANDREW of Massachusetts: Petition of the General Court of Massachusetts, memorializing the President and Congress of the United States in favor of the permanency of the Civilian Conservation Corps; to the Committee on Appropriations.

10903. Also, petition memorializing Congress relative to affording the privilege of entry into this country to those persons who are being discriminated against and persecuted in Germany; to the Committee on Immigration and Naturalization.

10904. By Mr. CONNERY: Petition of the Cambridge Housing Authority, of Cambridge, Mass., protesting against poor housing and slum conditions, and urging passage of Wagner-Ellenbogen housing bill; to the Committee on Banking and Currency.

10905. Also, petition of the Workers' Education Council of Greater Boston, Mass., endorsing and urging the enactment of the Ellenbogen national textile bill (H. R. 12285); to the Committee on Banking and Currency.

10906. Also, petition of the Artists Union of Massachusetts, urging the enactment of the Frazier-Lundeen workers' social insurance bill, introduced in the Senate as Senate bill 3475 and in the House of Representatives as House bill 9608; to the Committee on Labor.

10907. By Mr. CULLEN: Petition of the New York Clothing Cutters Union, A. C. W. of A., New York City, urging the enactment of legislation for the creation of a court of appeals for civil-service employees; to the Committee on the Civil Service.

10908. By Mr. HIGGINS of Massachusetts: Resolutions of the Massachusetts Legislature; to the Committee on Appropriations.

10909. Also, resolution of the Massachusetts Legislature, memorializing Congress relative to affording the privilege of entry into this country to those persons who are being persecuted and discriminated against in Germany; to the Committee on Immigration and Naturalization.

10910. By Mr. McCORMACK: Memorial of the General Court of Massachusetts, memorializing Congress relative to affording the privilege of entry into this country of those persons who are being persecuted and discriminated against in Germany; to the Committee on Immigration and Naturalization.

10911. By Mr. MARTIN of Massachusetts: Memorial of the General Court of Massachusetts, favoring making the Civilian Conservation Corps a permanent institution; to the Committee on Appropriations.

10912. Also, memorial of the General Court of Massachusetts, advocating the privilege of entry into the United States of persons persecuted or discriminated against in Germany; to the Committee on Immigration and Naturalization.

10913. By Mr. PFEIFER: Petition of the New York Clothing Cutters' Union, New York City, endorsing the Pearson bill (H. R. 9258) establishing a Civil Service Court of Appeals; to the Committee on the Civil Service.

10914. By Mr. RICH: Petition of citizens of Wellsboro, Pa.; to the Committee on Agriculture.

10915. Also, petition of the Enterprise Council, No. 136, Sons and Daughters of Liberty, of Muncy, Pa., favoring the passage of Senate bill 4011 and House bill 11172; to the Committee on Immigration and Naturalization.

10916. By Mrs. ROGERS of Massachusetts: Petition of the General Court of the Commonwealth of Massachusetts, relative to affording the privilege of entry into this country to those persons who are being persecuted and discriminated against in Germany; to the Committee on Foreign Affairs.

10917. Also, petition of the General Court of the Commonwealth of Massachusetts, favoring the permanency of the Civilian Conservation Corps; to the Committee on Appropriations.

10918. By Mr. KRAMER: Resolution of the Los Angeles District Council of Carpenters, relative to endorsing the Townsend old-age-pension plan and the McGroarty bill, no. 7154; to the Committee on Ways and Means.

SENATE

WEDNESDAY, MAY 20, 1936

(Legislative day of Tuesday, May 12, 1936)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

THE JOURNAL

On request of Mr. ROBINSON, and by unanimous consent, the reading of the Journal of the proceedings of the calendar day Tuesday, May 19, 1936, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries.

CALL OF THE ROLL

Mr. ROBINSON. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Connally	Keyes	Pittman
Ashurst	Copeland	King	Pope
Bachman	Couzens	La Follette	Robinson
Bailey	Davis	Lewis	Russell
Barbour	Dieterich	Logan	Schwellenbach
Barkley	Donahey	Lonergan	Sheppard
Benson	Fletcher	Long	Shipstead
Bilbo	Frazier	McAdoo	Smith
Black	George	McGill	Steiwer
Bone	Gerry	McNary	Thomas, Okla.
Borah	Gibson	Maloney	Townsend
Brown	Glass	Metcalf	Truman
Bulkley	Guffey	Moore	Vandenberg
Bulow	Hale	Murphy	Van Nuys
Burke	Harrison	Murray	Wagner
Byrd	Hastings	Neely	Walsh
Capper	Hatch	Norris	Wheeler
Caraway	Hayden	Nye	White
Chavez	Holt	O'Mahoney	
Clark	Johnson	Overton	

Mr. ROBINSON. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. MCCARRAN] are absent because of illness; that the Senator from South Carolina [Mr. BYRNES], the Senator from Oklahoma [Mr. GORE], the Senator from Tennessee [Mr. MCKELLAR], the junior Senator from Maryland [Mr. RADCLIFFE], and the senior Senator from Maryland [Mr. TYDINGS] are unavoidably detained; and that the Senator from Massachusetts [Mr. COOLIDGE], the Senator from Wisconsin [Mr. DUFFY], the Senator from Indiana [Mr. MINTON], and the Senator from Utah [Mr. THOMAS] are absent in connection with their duties as members of the Board of Visitors to the Military Academy at West Point.

I further announce that the Senator from North Carolina [Mr. REYNOLDS] is absent because of a death in his family.

Mr. MCNARY. I announce that the Senator from Vermont [Mr. AUSTIN] and the Senator from Iowa [Mr. DICKINSON] are necessarily absent, and that the Senator from Wyoming [Mr. CAREY] is absent in the performance of his duty as a member of the Board of Visitors to the United States Military Academy.

The VICE PRESIDENT. Seventy-eight Senators have answered to their names. A quorum is present.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its reading clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 560. An act for the relief of the Western Electric Co., Inc.;

S. 760. An act for the relief of Harry P. Hollidge;

S. 920. An act for the relief of Ruth J. Barnes;

S. 952. An act for the relief of Zelma Halverson;

S. 1186. An act for the relief of Frank P. Ross;

S. 1328. An act for the relief of the Snare & Triest Co., now Frederick Snare Corporation;

S. 1431. An act for the relief of the Collier Manufacturing Co. of Barnesville, Ga.;

S. 1490. An act for the relief of Earl A. Ross;

S. 2520. An act for the relief of T. D. Randall & Co.; and

S. 2734. An act to confer jurisdiction upon the United States Court of Claims to hear and determine the claims of Henry W. Bibus, Annie Ulrick, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, estate of Harry B. C. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania.

The message also announced that the House had passed the following bills of the Senate, each with an amendment, in which it requested the concurrence of the Senate:

S. 537. An act for the relief of C. O. Meyer; and

S. 1073. An act for the relief of Louis Finger.

The message further announced that the House had passed the following bills of the Senate, each with amendments, in which it requested the concurrence of the Senate:

S. 925. An act to carry into effect the findings of the Court of Claims in the case of William W. Danenhower; and

S. 1360. An act for the relief of Teresa de Prevost.

The message also announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H. R. 237. An act for the relief of the Rowesville Oil Co.;

H. R. 254. An act for the relief of the Farmers' Storage & Fertilizer Co., of Aiken, S. C.;

H. R. 1105. An act for the relief of Lucy Jane Ayer;

H. R. 1618. An act for the relief of Anna McDonald;

H. R. 2479. An act for the relief of Charles G. Johnson, State treasurer of the State of California;

H. R. 3559. An act for the relief of John L. Alcock;

H. R. 3575. An act for the relief of Mrs. Lawrence Chlebeck;

H. R. 3907. An act for the relief of James L. Park;

H. R. 3943. An act for the relief of D. E. Wooldridge;

H. R. 4059. An act for the relief of Ella B. Kimball, daughter and only heir of Jeremiah Simonson;

H. R. 4256. An act for the relief of Anna Caporaso;

H. R. 4364. An act for the relief of Andrew Johnson;

H. R. 4373. An act for the relief of Albert Gonzales;

H. R. 4829. An act for the relief of Weymouth Kirkland and Robert N. Golding;

H. R. 5078. An act for the relief of Mrs. Charles F. Eikenberg;

H. R. 5150. An act for the relief of Alexander E. Kovner;

H. R. 5635. An act conferring jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claim of the mayor and aldermen of Jersey City, Hudson County, N. J., a municipal corporation;

H. R. 6356. An act to carry out the findings of the Court of Claims in the case of Joseph G. Grissom;

H. R. 7727. An act to confer jurisdiction on the Court of Claims to hear and determine the claim of George B. Marx, Inc.;

H. R. 11108. An act to advance a program of national safety and accident prevention;

H. R. 12056. An act authorizing the State of Iowa, acting through its State highway commission, and the State of Nebraska, acting through its department of roads and irrigation, to construct, maintain, and operate a free or toll bridge across the Missouri River at or near Dodge Street in the city of Omaha, Nebr.;

H. R. 12168. An act to authorize the coinage of 50-cent pieces in commemoration of the seventy-fifth anniversary of the Battle of Antietam; and

H. J. Res. 377. Joint resolution to enable the States of Maine, New Hampshire, New York, Vermont, Massachusetts, Rhode Island, Connecticut, Pennsylvania, West Virginia, Kentucky, Indiana, Illinois, Tennessee, and Ohio to conserve and regulate the flow of and purify the waters of rivers and streams whose drainage basins lie within two or more of the said States.

SUPPLEMENTAL ESTIMATES, DEPARTMENT OF STATE (S. DOC. NO. 239)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, supplemental estimates of appropriations for the Department of State, fiscal years 1936 and 1937, amounting to $22,100, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

CLAIMS FOR DAMAGES TO PRIVATELY OWNED PROPERTY (S. DOC. NO. 240)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, estimates of appropriations submitted by certain executive departments to pay claims for damages to privately owned property, amounting to $1,461.50, which, with the accompanying papers, was referred to the Committee on Appropriations and ordered to be printed.

SUPPLEMENTAL ESTIMATE, SMITHSONIAN INSTITUTION (S. DOC. NO. 238)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a supplemental estimate of appropriation for the Smithsonian Institution (Astrophysical Observatory) for the fiscal year 1937, amounting to $200,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

DISPOSITION OF EXECUTIVE PAPERS

The VICE PRESIDENT laid before the Senate 11 letters from the Archivist of the United States, reporting, pursuant to law, that there are accumulations of documents and papers on the files of certain departments and independent offices of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and transmitting lists of such papers, which, with the accompanying papers, were referred to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The VICE PRESIDENT appointed Mr. BARKLEY and Mr. NORBECK members of the committee on the part of the Senate.

PETITION

Mr. WALSH presented resolutions adopted by the General Court of Massachusetts, favoring the enactment of legislation to make the Civilian Conservation Corps a permanent corps, which were referred to the Committee on Agriculture and Forestry.

(See resolutions printed in full when laid before the Senate by the Vice President on the 19th instant, p. 7453, CONGRESSIONAL RECORD.)

FRAZIER-LEMKE FARM REFINANCING BILL

Mr. FRAZIER. I ask unanimous consent to have printed in the RECORD and to lie on the table a resolution which I have received from Stamford, Conn., regarding the so-called Frazier-Lemke bill.

There being no objection, the resolution was ordered to lie on the table and to be printed in the RECORD, as follows:

We, citizens of Stamford, Conn., in mass meeting assembled at the Town Hall Plaza, resent the un-American and undemocratic methods which have recently been revealed in efforts to block and defeat proposed national legislation designated as the Frazier-Lemke bill. We are not here endorsing or opposing the economic features of the Frazier-Lemke bill, but we are publicly protesting against the political treacheries and conspiracies practiced in the Congress by congressional representatives who are the political puppets of racketeers of high finance.

We condemn William S. Green, president of the American Federation of Labor, for injecting the name of organized labor into the fight against the Frazier-Lemke bill, as we contend that there is no justification for Mr. Green's claiming that the great mass of organized labor was behind him and those actions of his which resulted in his placing before the Congress a letter signed by himself condemning the Frazier-Lemke bil and expressing the alleged feelings of organized labor.

We realize that Senator LYNN J. FRAZIER and Representative WILLIAM LEMKE have for many years in public office been the consistent champions of the working people of America, and we here commend them for the splendid records that they have made.

We condemn the Representatives to Congress from the State of Connecticut who voted against the Frazier-Lemke bill and who supported the un-American tactics applied by political and financial gangdom for the defeat of the Frazier-Lemke bill. We believe that all of the Connecticut Representatives to Congress should be defeated for reelection this year.

We approve of the proposal to convene a convention for the purpose of affording open expression of all independent voters in the Fourth Congressional District of the State of Connecticut. It is the wish of us citizens here assembled that the proposed independent voters' convention select candidates for Congress whose principles and practices will warrant the support of loyal Americans. We propose that two candidates for Congress from the Fourth Congressional District be selected, one to be entered in the Republican primaries and one to be entered in the Democratic primaries in order to insure the election to Congress of a Representative who is truly the choice of the citizens and who will represent them properly in the Congress.

We request the chairman of this meeting to offer a copy of this resolution to the press and to send a copy to the Honorable LYNN J. FRAZIER, United States Senator, with the request that he present it for publication in the CONGRESSIONAL RECORD.

REPORTS OF COMMITTEES

Mr. HATCH, from the Committee on the Judiciary, to which was referred the bill (S. 3822) to amend the act entitled "An act to protect trade and commerce against unlawful restraints and monopolies", approved July 2, 1890, reported it without amendment and submitted a report (No. 2053) thereon.

Mr. PITTMAN, from the Committee on Foreign Relations, to which were referred the following bill and joint resolution, reported them each without amendment and submitted reports thereon:

S. 4667. A bill to prohibit the commercial use of the coat of arms of the Swiss Confederation pursuant to the obligation of the Government of the United States under article 28 of the Red Cross Convention signed at Geneva July 27, 1929 (Rept. No. 2054); and

H. J. Res. 499. Joint resolution authorizing and requesting the President to extend to the Government of Sweden and individuals an invitation to join the Government and people of the United States in the observance of the three hundredth anniversary of the first permanent settlement in the Delaware River Valley, and for other purposes (Rept. No. 2055).

Mr. WHITE, from the Committee on Commerce, to which was referred the bill (S. 4619) to amend the Communications Act of 1934, approved June 19, 1934, for the purpose of promoting safety of life and property through the use of wire and radio communications, and for other purposes, reported it without amendment and submitted a report (No. 2060) thereon.

Mr. COPELAND, from the Committee on Commerce, to which were referred the following bills, reported them severally without amendment and submitted reports thereon:

S. 4648. A bill to promote safety at sea in the neighborhood of ice and derelicts, and for other purposes (Rept. No. 2058);

S. 4654. A bill to amend an act entitled "An act to distribute the commissioned line and engineer officers of the Coast Guard in grades, and for other purposes", approved January 12, 1923 (Rept. No. 2056); and

S. 4655. A bill relative to limitation of shipowners' liability (Rept. No. 2061).

Mr. COPELAND also, from the Committee on Commerce, to which was referred the bill (H. R. 8597) to amend section 13 of the act of March 4, 1915, entitled "An act to promote the welfare of American seamen in the merchant marine of the United States, to abolish arrest and imprisonment as a penalty for desertion and to secure the abrogation of treaty provisions in relation thereto, and to promote safety at sea", to maintain discipline on shipboard, and for other purposes, reported it with an amendment and submitted a report (No. 2059) thereon.

He also, from the same committee, to which was referred the bill (H. R. 11915) to amend the Coastwise Load Line Act, 1935, reported it with amendments and submitted a report (No. 2057) thereon.

ADDITIONAL REPORT ON "MORRO CASTLE" AND "MOHAWK" DISASTERS (PT. 3, S. REPT. NO. 776)

Mr. COPELAND. Mr. President, I ask consent to submit from the Committee on Commerce an additional preliminary report of the Safety at Sea Subcommittee of the Commerce Committee, pursuant to Senate Resolution 7 (74th Cong., 1st sess.), relating to the investigations of the steamships *Morro Castle* and *Mohawk* disasters and the adequacy of methods and practices for the safety of life at sea, with particular reference to that portion of the resolution requiring "recommendations for necessary legislation." I ask that the report be printed.

The VICE PRESIDENT. Without objection, the report will be received and printed.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

(Mr. GUFFEY introduced Senate bill 4668, which was referred to the Committee on Interstate Commerce and appears under a separate heading.)

By Mr. LOGAN:

A bill (S. 4669) authorizing the Veterans' Administration of the United States to accept 500 acres of land in Campbell County, Ky., for the purpose of establishing a home for dependent widows and orphans of World War veterans; to the Committee on Military Affairs.

By Mr. GLASS:

A bill (S. 4670) to authorize the coinage of 50-cent pieces in commemoration of the three hundredth anniversary of the original Norfolk (Va.) land grant and the two hundredth anniversary of the establishment of the city of Norfolk, Va., as a borough; to the Committee on Banking and Currency.

By Mr. WALSH:

A joint resolution (S. J. Res. 269) to authorize the Secretary of War to lend to Charles Scoville Wishard for use of the national assembly of the Oxford Group, to be held at and near Stockbridge, Mass., May 29, 1936, to June 8, 1936, both inclusive, certain camp equipment of the United States Army hereinafter designated; to the Committee on Military Affairs.

REGULATION OF INTERSTATE COMMERCE IN BITUMINOUS COAL

Mr. GUFFEY. Mr. President, I ask consent to introduce a bill to regulate interstate commerce in bituminous coal, and for other purposes. This bill is a substitute for the Bituminous Coal Conservation Act of 1935, certain provisions of which were recently declared unconstitutional by the Supreme Court of the United States, and makes such changes in the Bituminous Coal Conservation Act of 1935 as are necessary to meet the views of the majority of the Court.

It will be recalled that four members of the Court held that the price-fixing provisions of the act of 1935 were valid. The majority of the Court held that the price-fixing provisions of the act could not be considered apart from the labor regulations, and that since the labor provisions of the act of 1935 were beyond the power of Congress the act would have to fall.

In the bill I am now introducing, the labor provisions of the act of 1935 have been wholly eliminated, and the power of Congress to be exercised under this bill is its undisputed power under the Constitution to regulate interstate commerce.

I further ask that the bill be referred to the Committee on Interstate Commerce.

The VICE PRESIDENT. Without objection, the bill will be received and referred as requested by the Senator from Pennsylvania.

The bill (S. 4668) to regulate interstate commerce in bituminous coal, and for other purposes, was read twice by its title and referred to the Committee on Interstate Commerce.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred, or ordered to be placed on the calendar, as indicated below:

H. R. 237. An act for the relief of the Rowesville Oil Co.;

H. R. 254. An act for the relief of the Farmers' Storage & Fertilizer Co., of Aiken, S. C.;

H. R. 1105. An act for the relief of Lucy Jane Ayer;

H. R. 1618. An act for the relief of Anna McDonald;

H. R. 3559. An act for the relief of John L. Alcock;

H. R. 3575. An act for the relief of Mrs. Lawrence Chlebeck;

H. R. 3907. An act for the relief of James L. Park;

H. R. 3943. An act for the relief of D. E. Wooldridge;

H. R. 4059. An act for the relief of Ella B. Kimball, daughter and only heir of Jeremiah Simonson;

H. R. 4256. An act for the relief of Anna Caporaso;

H. R. 4364. An act for the relief of Andrew Johnson;

H. R. 4373. An act for the relief of Albert Gonzales;

H. R. 4829. An act for the relief of Weymouth Kirkland and Robert N. Golding;

H. R. 5078. An act for the relief of Mrs. Charles F. Eikenberg;

H. R. 5150. An act for the relief of Alexander E. Kovner;

H. R. 5635. An act conferring jurisdiction upon the Court of Claims, to hear, determine, and render judgment upon the claim of the mayor and aldermen of Jersey City, Hudson County, N. J., a municipal corporation;

H. R. 6356. An act to carry out the findings of the Court of Claims in the case of Joseph G. Grissom; and

H. R. 7727. An act to confer jurisdiction on the Court of Claims to hear and determine the claim of George B. Marx, Inc.; to the Committee on Claims.

H. R. 2479. An act for the relief of Charles G. Johnson, State treasurer of the State of California; to the calendar.

H. R. 11108. An act to advance a program of national safety and accident prevention; to the Committee on Interstate Commerce.

H. R. 12056. An act authorizing the State of Iowa, acting through its State highway commission, and the State of Nebraska, acting through its department of roads and irrigation, to construct, maintain, and operate a free or toll bridge across the Missouri River at or near Dodge Street in the city of Omaha, Nebr.; to the Committee on Commerce.

H. R. 12168. An act to authorize the coinage of 50-cent pieces in commemoration of the seventy-fifth anniversary of the Battle of Antietam; to the Committee on Banking and Currency.

H. J. Res. 377. Joint resolution to enable the States of Maine, New Hampshire, New York, Vermont, Massachusetts, Rhode Island, Connecticut, Pennsylvania, West Virginia, Kentucky, Indiana, Illinois, Tennessee, and Ohio to conserve and regulate the flow of and purify the waters of rivers and streams whose drainage basins lie within two or more of the said States; to the Committee on the Judiciary.

NATIONAL FLOOD CONTROL—AMENDMENTS

Mr. GUFFEY, Mr. LOGAN, and Mr. SHEPPARD each submitted an amendment intended to be proposed by them, respectively, to the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes, which were severally referred to the Committee on Commerce and ordered to be printed.

OFFICES UNDER THE W. P. A.—AMENDMENT TO FIRST DEFICIENCY BILL

Mr. BILBO. Mr. President, I submit an amendment intended to be proposed by me to House bill 12624, the first deficiency bill. I ask that the amendment be printed and referred to the Committee on Appropriations.

I also present for publication in the RECORD General Letter No. 2, sent to the State administrators of the W. P. A. by Harry L. Hopkins. I am asking to have this letter printed in the RECORD at this juncture in connection with the amendment, which I also ask to have printed in the RECORD, because it is in confirmation of the general order issued by Mr. Hopkins. I am offering the amendment in response to the many observations made by our friends on the other side of the Chamber and to save them any anticipated trouble in the future.

The VICE PRESIDENT. Without objection, the amendment will be received, referred to the Committee on Appropriations, and printed, and the amendment and letter will be printed in the RECORD as requested.

The proposed amendment and letter are as follows:

Amendment intended to be proposed by Mr. BILBO to House bill 12624, the first deficiency appropriation bill, 1936: On page 26, after line 7, to insert the following paragraph:

"No person who is a candidate for any State, district, county, or municipal office in any primary, general, or special election, or is serving as a campaign manager or assistant thereto for any such candidate, or is a member of any campaign committee organized to promote the political interest of any candidate for such office, or holds, either by appointment or election, any such office, shall be employed or continued in employment on administration staffs of the Works Progress Administration: *Provided further*, That this prohibition or ineligibility shall apply to any person employed or seeking employment on nonrelief supervisory personnel on works projects as well as on State, district, and field representative staffs."

WORKS PROGRESS ADMINISTRATION,
Washington, D. C., February 21, 1936.

General Letter No. 2.
To: All State Works Progress administrators.
Subject: Supervisory personnel holding elective offices.

The question has arisen as to the policy of this Administration with respect to individuals holding elective offices and having W. P. A. employment simultaneously.

For your information, persons who are candidates for or hold elective offices shall not be employed on administrative staffs of the Works Progress Administration. This ruling applies to nonrelief supervisory personnel on work projects as well as to State, district, and field administrative staffs.

HARRY L. HOPKINS, *Administrator.*

TEXTBOOKS ON HISTORY OF THE FEDERAL GOVERNMENT

Mr. LOGAN submitted the following resolution (S. Res. 301), which was referred to the Committee on Education and Labor:

Resolved, That a special committee composed of five Senators be appointed by the President of the Senate to consider the feasibility, necessity, and practicability of the printing and distribution, at the expense of the Federal Government, of a textbook, or textbooks, for use in all public, parochial, and private schools in the United States and its Territories and possessions, on the history of our Government, the administration thereof, its essential principles, and the rights and duties of the citizens under the Constitution of the United States; such publication, if undertaken, to be for use in grammar and high schools, and the distribution to be made to the States, Territories, District of Columbia, and possessions of the United States; the distribution among the schools to be made by the States, Territories, District of Columbia, or possessions of the United States, and only upon the request of such State, Territory, district, or possession.

PRINTING OF COURT OPINION ON CONSTITUTIONALITY OF EMERGENCY RELIEF APPROPRIATION ACT, 1935

Mr. STEIWER submitted the following resolution (S. Res. 302), which was referred to the Committee on Printing:

Resolved, That the Opinion of the United States Court of Appeals for the District of Columbia, No. 6619, in the case of the township of Franklin, etc., et al., appellants, against Rexford G. Tugwell, Administrator, Resettlement Administration, et al., appellees, involving the constitutionality of the Emergency Relief Appropriation Act of 1935, approved April 8, 1935, as abridging the reserved rights of the States, be printed as a document, and that 1,000 additional copies be printed for the use of the Senate document room.

COLLECTION OF REVENUE FROM INTOXICATING LIQUORS

Mr. HARRISON. Yesterday the Senate passed, with amendments, the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes.

I now move that the Senate insist on its amendments to the bill, request a conference with the House of Representatives thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Vice President appointed Mr. KING, Mr. BARKLEY, and Mr. CAPPER conferees on the part of the Senate.

OPINION OF SUPREME COURT IN THE CUTTEN CASE

Mr. POPE. Mr. President, some weeks ago I addressed the Senate on the commodities-exchange bill and referred to the case of Arthur W. Cutten, which had been heard before the circuit court of appeals and was then on appeal to the Supreme Court of the United States. A few days ago the Supreme Court affirmed the decision of the circuit court of appeals, in effect holding that past offenses under the Grain Futures Act were not a basis for an order by the Secretary of Agriculture, depriving a member of his rights on the board of trade. I ask that the opinion of the Supreme Court be printed in the RECORD as a part of my remarks.

There being no objection, the opinion was ordered to be printed in the RECORD, as follows:

[From the United States Law Week of May 19, 1936]

Henry A. Wallace, Secretary, etc., et al. v. *Arthur W. Cutten.* Supreme Court of the United States. No. 747. On writ of certiorari to the Circuit Court of Appeals for the Seventh Circuit

Wendellberge (Stanley Reed, Solicitor General, John Dickinson, Assistant Attorney General, Hugh B. Cox, Leo F. Tierney, and Kenneth L. Kimble with him on the brief) for petitioners; Francis X. Busch, Orville J. Taylor, and James J. Magner submitted brief for respondent.

SYLLABUS BY EDITORIAL STAFF

Grain Futures Act—Trading privileges on contract markets—Power of Commission to suspend trader for past violations of reporting requirements: Findings of the Commission created under the Grain Futures Act that a member of the Chicago Board of Trade had in 1930 and 1931 violated a reporting regulation made pursuant to the act cannot support an order of the Commission directing that all contract markets refuse trading privileges thereon to such trader for a period of 2 years from March 1, 1935, where the complaint against the trader for the violations in 1930 and 1931 was filed in 1934, in view of section 6 (b) of the Grain Futures Act, which authorizes the Commission to make such order only if a trader "is violating" any of its provisions or "is attempting" to manipulate the market price of grain.

OPINION OF THE COURT

Mr. Justice Brandeis delivered the opinion of the Court:

Section 6 (b) of the Grain Futures Act, September 21, 1922 (ch. 369, 42 Stat. 998, 1001), provides that if the Secretary of Agriculture has reason to believe that any person "is violating" any provision of the act, or any rules and regulations made pursuant thereto, or "is attempting" to manipulate the market price of grain in violation of the provisions of the act, the Secretary may serve upon the person a complaint stating his charge in that respect and requiring him "to show cause why an order should not be made directing that all contract markets until further notice of the said Commission refuse all trading privileges thereon to such person." The Commission referred to is a board "composed of the Secretary of Agriculture, the Secretary of Commerce, and the Attorney General", before whom the hearing on the complaint is had.

The case is here to review a decree of the United States Circuit Court of Appeals for the Seventh Circuit which set aside an order entered by the Commission under that section. Certiorari was granted (297 U. S. —) on account of the novelty and importance of the question presented.

April 11, 1934, the Secretary of Agriculture caused such a complaint to be served upon Arthur W. Cutten. It recited that during the years 1930 and 1931 he was, and since had been, continuously a member of the Chicago Board of Trade, and that by its regulations made pursuant to the Grain Futures Act he was required "to report to the Grain Futures Administration his net position in futures owned or controlled by him, long or short, by grain and by future, when he had net open commitments in any one future equal to or in excess of 500,000 bushels * * *." And also "daily trades made by him on the board of trade in futures in which he owned or controlled open commitments equal to or in excess of 500,000 bushels."

The complaint alleged further that "during the years 1930 and 1931 (he) conspired and colluded with various persons and grain firms of the board of trade to conceal his trading and position in the market from the Grain Futures Administration. In furtherance of said conspiracy respondent made inaccurate, incorrect, and false reports of his position in the market to the Grain Futures Administration and refused to report accurately and correctly his position in the market and trades made by him", etc.

Then followed, in 44 numbered paragraphs, specifications of Cutten's alleged violations of the regulations and the act on dates between March 6, 1930, and December 31, 1931.

A referee was appointed to take the evidence. The hearings before him began on May 14, 1934. Upon the opening of those proceedings Cutten moved to quash the complaint on the ground that section 6 (b) empowered the Commission to act only against persons who are presently committing offenses; and that, consequently, it had no authority to deny to him trading privileges for violations committed more than 2 years prior to the institution of the proceedings against him.

The referee, without passing upon the motion to quash, proceeded to take the evidence; the hearings before him were concluded May 24, 1934; then the Commission heard the complaint on briefs and oral argument; and before it the motion to quash was renewed.

On February 12, 1935, the Commission overruled the motion, made findings of fact on the evidence, concluded that Cutten's conduct constitutes a violation of the Grain Futures Act and the rules and regulations made pursuant thereto, and ordered that "all contract markets refuse all trading privileges thereon to Arthur W. Cutten for a period of 2 years from March 1, 1935."

This suit was brought to set aside that order. The circuit court of appeals held that the power conferred by section 6 (b) is remedial, not punitive; that it is limited to suspending a trader who "is violating any of the provisions of this act or is attempting to manipulate the market price of any grain"; in other words, one who is presently committing an offense; that at the time of the filing of the complaint there was no wrong existing to be remedied, the latest wrongdoing complained of having occurred more than 2 years before the filing of the complaint by the Secretary of Agriculture; that, therefore, the Commission was without authority to entertain the complaint and should have granted the motion to quash (F. (2d.)).

The Government argues that since violations of the reporting requirements by their very nature cannot be detected during the course of commission, the literal construction thus given to section 6 (b) renders it impractical and ineffective as a means of dealing with those persons who violate any of the provisions of the act or attempt to manipulate the market price of grain. Incidents in the history of the legislation are cited to support the Government's contention.

In reply it is argued that ample remedy is afforded by other provisions of the act; that these confer broad power over boards of trade; and that the boards of trade may control their own members. It is urged that for the construction given to section 6 (b) by the lower court support may be found in the different language employed in section 6 (a).

For it authorizes the Commission to suspend "or to revoke the designation of a board of trade as a 'contract market' upon a showing that such board of trade has failed or is failing to comply" with the requirements prescribed. Attention is also called to the penalty provisions of section 9.

It would be inappropriate for us to discuss these and other arguments presented. The language of section 6 (b) is clear; and, on the face of the statute, there can be no doubt concerning the intention of Congress. As was said in *Iselin* v. *United States* (270 U. S. 245, 250–251), "the statute was evidently drawn with care. Its language is plain and unambiguous. What the Government asks is not a construction of a statute but, in effect, an enlargement of it by the court, so that what was omitted, presumably (possibly) by inadvertence, may be included within its scope. To supply omissions transcends the judicial function." A fortiori, it may not be done for the purpose of making punishable action which, on the face of the statute, is merely to be prevented. Compare *United States* v. *Weitzel* (246 U. S. 533, 542–543.)

Affirmed.

THE FARM CREDIT PROGRAM—ADDRESS BY SENATOR BURKE

Mr. BROWN. Mr. President, I ask unanimous consent to have printed in the RECORD an illuminating address delivered by the junior Senator from Nebraska [Mr BURKE] over a Nation-wide hook-up on the 19th instant.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

We have a farm problem. Without a satisfactory solution of that problem there can be no real nor permanent foundation upon which prosperity can rest. For it is recognized by all parties and by those holding all manner of opinions that agriculture is a basic industry. Unless the farmer be reasonably prosperous, there cannot long be prosperity anywhere in the land.

There are many phases of the farm problem. The alarming increase of farm tenantry is one. The plight of the share-cropper demands attention. Protection of the land itself from erosion, depletion, and waste looms large. All of these matters are interrelated. In broad outline they may be grouped under two heads. First, an adequate return to the farmer for his toil. Here we have the perplexing question of surplus crops, the direct bearing of the tariff, the preservation and development of the home market, and kindred subjects. The second major phase of the farm problem has to do with farm credits. It touches mortgage indebtedness, interest rates, short-term production credits, and long-term financing. It is to this branch of the subject, so vital to the farmers' welfare, and in turn to the entire country, that I invite your attention tonight.

The Democratic Party has long been committed to the doctrine that the farmer should be placed upon a footing of equality with those engaged in manufacture, commerce, and trade in securing the necessary capital to carry on his vitally important enterprise. It has consistently favored a program that would accomplish this purpose in the largest possible measure through cooperative borrowing managed and controlled by the farmers themselves.

The progress that has been made along this line reads like a romance. It should be familiar to every citizen. The accomplished fact of a soundly conceived and smoothly functioning system of farmer-controlled credits is an achievement second to none.

Since the Farm Credit Administration was organized in 1933 more than 800,000 farm-mortgage loans have been made. In addition, approximately 300,000 short-term loans have been financed through production-credit associations. Beyond that, more than 1,000,000 farmers with the help of this Federal agency have organized themselves into some 1,200 farmer buying and selling cooperatives and secured loans from the banks for cooperatives set up 3 years ago. More than $3,000,000,000 is now outstanding and in use as a result of this farmers' cooperative-credit system.

May we take a moment to recall the pledges of the Democratic Party in the matter of farm credits, the fulfillment of which has brought about these immeasurable benefits. In its national platform adopted in 1912, the Democratic Party said:

"Of equal importance with the question of currency reform is the question of rural credits or agricultural finance. Therefore, we recommend that an investigation of agricultural credit societies in foreign countries be made, so that it may be ascertained whether a system of rural credits may be devised suitable to conditions in the United States; and we also favor legislation permitting national banks to loan a reasonable proportion of their funds on real-estate security."

Four years later, in 1916, the Democratic Party was able to point with pride to certain definite accomplishments in the matter of farm credits, and to renew its pledge to further efforts. I quote:

"We favor the vigorous prosecution of investigations and plans to render agriculture more profitable and country life more healthful, comfortable, and attractive, and we believe that this should be a dominant aim of the Nation as well as of the States. With all its recent improvement, farming still lags behind other occupations in development as a business, and the advantages of an advancing civilization have not accrued to rural communities in a fair proportion. Much has been accomplished in this field under the present administration. * * * In the Federal Reserve Act of the last Congress and the Rural Credits Act of the present Congress the machinery has been created which will make credit available to the farmer constantly and readily, placing him at last upon a footing of equality with the merchant and the manufacturer in securing the capital necessary to carry on his enterprises. * * * We approve the Democratic administration for having emphatically directed attention for the first time to the essential interests of agriculture involved in farm marketing and finance, for creating the Office of Markets and Rural Organization in connection with the Department of Agriculture, and for extending the cooperative machinery necessary for conveying information to farmers by means of demonstrations. We favor continued liberal provision not only for the benefit of productions but also for the study and solution of problems of farm marketing and finance and for the extension of existing agencies for improving country life."

It will be worth our while to note what the Democratic Party had to say when it met in 1920, at the close of 8 years of Democratic rule:

"To the great agricultural interests of the country the Democratic Party does not find it necessary to make promises. It already is rich in its record of things actually accomplished. * * * In the first term of this Democratic administration the National Bank Act was so altered as to authorize loans of 5 years' maturity on improved farm lands. Later was established a system of farm-loan banks, from which the borrowings already exceed $300,000,000 and under which the interest rate to farmers has been so materially reduced as to drive out of business the farm-loan sharks who formerly subsisted by extortion upon the great agricultural interests of the country. Thus it was a Democratic Congress in the administration of a Democratic President which enabled the farmers of America for the first time to obtain credit upon reasonable terms and insured their opportunity for the future development of the Nation's agricultural resources. * * * We pledge prompt and consistent support of sound and effective measures to sustain, amplify, and perfect the rural credits statutes and thus to check and reduce the growth and course of farm tenancy."

In 1924 and again in 1928 the Democratic Party pledged itself "to stimulate by every proper governmental activity the progress of the cooperative marketing movement" and to build upon the foundation already laid by a Democratic administration an adequate rural credits structure.

In its last platform in 1932 the Democratic Party pledged itself to an "extension and development of the farm cooperative movement" and "to better financing of farm mortgages through recognized farm-bank agencies at low rates of interest on an amortization plan, giving preference to credits for the redemption of farms and homes sold under foreclosure."

When the Democratic Party returned to power in 1933, the plight of the American farmer was distressing beyond the power of description. It is estimated that a million farmers were in danger of losing their homes through foreclosure. Prices of farm commodities were at the lowest level of all time. Farm income was less than half of what it had been in 1929. In relation to income, interest charges were twice as high as before the World War. Mortgage loans made for short periods fell due and there was practically no opportunity for renewal. Approximately 40 percent of all the banks in the country had failed. In every group of 1,000 farms over the land 38.8 were under foreclosure. Farmers were approaching open revolt over the threatened loss of their homes through conditions over which they had no control. It was in this crisis that the Farm Credit Administration was established. It deliberately set itself to the task of staying every farm foreclosure where the farmer had any equity and was willing to do his part to try to work out the problem.

The officers and employees of the Farm Credit Administration worked night and day to handle the situation. From a mere 200 appraisers there was built up a well-trained corps of more than 5,000. In 1932 the Federal land banks were loaning $2,000,000 a month. By 1934 under the Farm Credit Administration this had been increased so that for every month in that year more than a hundred million dollars went forth to save the farms of the country; yes, to save the Nation itself. As an example of the tremendous task imposed upon the Farm Credit Administration, let me say that in my home district at Omaha, Nebr., which is one of the 12 districts established in the country, in a period of 32 months there were received twice as many applications for loans as in the entire 17 years that preceded.

A word as to what has been accomplished. Whereas in 1932 there had been 38.8 foreclosures for every 1,000 farms in the country, by 1935 this had been reduced to 19. Two billion dollars in land bank and land-bank commissioner loans have been made since May 1, 1933. In making these loans there was a scale-down of the mortgage debts of approximately $200,000,000, a saving to the farmers of that amount. As a result of debt reduction and lowered interest charges for the year ending June 30, 1936, the farmers of the country will have saved in interest charges during this 1 year almost $75,000,000. In 1932 it required nearly 10 percent of the gross farm income to pay interest on the farm-mortgage debt. In 1935 the corresponding figure was 4.5 percent. Whereas on December 31, 1933, approximately 47 percent of all Federal land-bank borrowers were delinquent, 2 years later the percentage was reduced to 27.

One great benefit that has followed the establishment of the Farm Credit Administration is that it has concentrated the whole problem of rural credits in one integrated organization. Prior to 1933 the Federal Farm Board was engaged in a limited way in loaning funds to cooperatives for various purposes. Another agency, the Federal farm loan board, had general supervision over the Federal land banks and the joint-stock land banks. Emergency crop, seed, and fertilizer loans were being handled by the Department of Agriculture. Regional agricultural credit corporations were under the Reconstruction Finance Corporation. When a farmer found it necessary to seek credit, he was subjected to great delay, inconvenience, and expense in the effort to find the particular agency to which he should make application.

The first step in remedying this situation was to centralize in the Farm Credit Administration the supervision of all the Federal agencies concerned with farm credit. In order to obtain centralized administration and coordination of activities in each of the 12 Federal land-bank districts, the law was broadened so that the board of directors of each Federal land bank should serve also as directors for the Federal intermediate credit bank, the production credit corporation, and the bank for cooperatives, all located in the same city. It has been the constant aim of the Farm Credit Administration so to readjust the local county units where farmers apply for loans that at one place the entire transaction could be handled, whether it was an application for long-term farm-mortgage credit, short-term production credit, or credit for a cooperative organization.

It is now recognized that the emergency job of refinancing farm mortgages has been completed. With what a full measure of satisfaction that particular emergency problem has been met, I have already sketchily indicated. There remains the normal problem that will continue as long as the present organization of society lasts; that is to say, the furnishing of credit to farmers on satisfactory terms, both as to repayment and interest rate. The Farm Credit Administration is prepared to render that service in a complete and satisfactory manner. Its four coordinate branches cover the entire field of normal rural credits. The Federal land banks are adequately financed and properly officered to meet all the ordinary long-term credit requirements of the farmers of the country on terms at least as favorable as the credit offered to other enterprises.

The production credit corporation makes possible the establishment of a permanent cooperative short-term credit system to function in its field in like manner as the land banks in their long-term loaning field. More than 500 local associations have been set up with officers elected by the borrowers and the initial stock bought by the Government. Nearly 300,000 farmers have now purchased stock in these associations and borrowed from them. The Government does not furnish the money that is loaned. The associations discount farmers' notes with the intermediate-credit banks, which is the third of these four coordinate agencies. In a sense these banks constitute the farmer's Federal reserve system. They accept from the local associations the endorsed farmers' notes and other security given for short-term loans and on the strength of these securities sell short-term bonds to the investing public.

The farmer is now getting production credit at 5 percent per annum, which is by far the lowest rate at which farmers as a class have ever been able to secure credit of this kind. The farmer is not charged for a day's interest beyond the time that he actually has the money. The association agrees to loan a farmer a certain total sum to be advanced as needed. The farmer then withdraws from the association such portion of the total from time to time as he needs, and pays interest only for the time he holds the money.

The fourth agency, the bank of cooperatives, as the name implies, makes loans on proper security to the various farmer cooperatives which are rendering such a great service to producers in marketing their products to the best advantage.

In addition to these various forms of cooperative credit, the Farm Credit Administration has charge of the emergency short-term crop and feed loans to farmers who are unable to obtain credit elsewhere. More than 600,000 of these loans were made in 1933, and more than 400,000 during 1934, and a like number in 1935. After some unfortunate delay, loans of this nature are again being made for the current season.

The pledges which the Democratic Party has made to the farmers of the country to provide an adequate system of rural credits have been kept. The farmer now stands in a position at least of equality with other producers in the matter of his access to credit. A new day has dawned for the farmer. Other phases of the farm problem remain to be settled. In the matter of credit the farmer needs only to hold to what he has, to support those who believe in maintaining the Farm Credit Administration in its present effective form, to meet new credit problems as they arise in the same spirit that the Farm Credit Administration arose to the great emergency that confronted the country in the years that have just passed.

ADDRESS BY SENATOR STEIWER BEFORE THE QUEENS COUNTY (N. Y.) REPUBLICAN CLUB

Mr. HALE. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered by the junior Senator from Oregon [Mr. STEIWER] before the Queens County Republican Club at Jamaica, Long Island, N. Y., on May 2, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

If you can imagine intricacies made wholly inscrutable and contradiction confounded with confusion, that is the New Deal. In its many ramifications it has been ingrafted upon the Democratic Party, but it is a thing separate and apart from that party. The New Deal truly is made up from the discards of all the old deals. In the space of one political rally I shall not attempt further to define it. We know that its administration presents problems of greatest complexity and involved issues almost beyond human comprehension. Monetary questions, war debts, foreign trade, tariff, and numerous other important subjects confront us. I will not attempt tonight to discuss these great questions but will speak of matters which are currently before the Congress for attention; questions which you will find are close to you and generally vital to the citizens of the American Republic.

Depression causes unemployment. In January 1935 the number of unemployed was 13,000,000. Today the number is in excess of 12,000,000. In January 1935 the President stated that there were 5,000,000 families and unattached persons on relief. Recently his estimate was 5,300,000. The Federal program for employment for these unfortunate fellow citizens and for relief for those who are destitute costs in excess of $3,000,000,000 per year. It unbalances the Federal Budget. It insures a continuous deficit. It adds in serious amounts to the public debt. Last year the President asked for and received $4,880,000,000 for relief and work relief. This year he has asked for $1,500,000,00 in addition, and everyone who knows the situation assumes the Congress must appropriate this amount and probably an equal amount more next January. It is supposed that in normal times approximately 50,000,000 people are gainfully employed in this country. At this time about 40,000,000 who are gainfully employed, through the payment of direct taxes and the payment of indirect taxes concealed in the cost of living, are supporting the 10,000,000 unemployed. I ask a serious question: "What are we going to do to solve this problem and to relieve ourselves of this burden?"

The New Deal attempted to meet it with the N. R. A. Against N. R. A. maladministration the people were almost in open rebellion. Finally it was stricken down by the Supreme Court, and since that time there has been some improvement in employment and increases in wages. Since the N. R. A. has been inoperative the New Deal has been without a program save its program of relief and work relief. Moreover, the New Deal seems incapable of formulating a program. It has degenerated from bad administration of the N. R. A. to bad thinking with respect to present economic objectives. This is illustrated by the President's recent speech in New York in which he said:

"Wages ought to and must go up with prices."

He also said:

"Higher wages for workers, more income for farmers means more goods produced, more and better food eaten, fewer unemployed and lower taxes."

And then he added:

"That is my economic and social philosophy, and, incidentally, my political philosophy as well."

Let us examine these statements of the President's economic, social, and political philosophy. Have wages gone up with prices? It is reliably estimated that while wages were increasing 8 percent the cost of living has increased approximately 20 percent. The President asserted that we are "on our way" to attainment of his objective; but if his objective is to increase real wages, the further we go "on our way", the greater will be the disparity between wages and living costs.

In the second statement quoted the President coupled higher wages for workers with more income for farmers. Both are desirable; but the increased income for farmers, if accomplished by a program of scarcity or by a processing tax, means higher living costs for the consumer and a decrease in real wages for those who work in the cities. He stands for eating more and better food, but more and better food will not be eaten unless more and better food is produced, and the wishful hope that the unemployed will be fewer in number is entirely quixotic if production in agriculture and industry is curtailed by governmental action.

The crowning glory of the President's philosophy as quoted is his declaration for lower taxes. How can there be a hope for lower taxes when we confront a steadily mounting cost of government? How can taxes be lowered when the number of Federal employees is increasing and when the administration actually boasts that it plans a deficit. Lower taxes result from thrift and economy and not from recklessness and spending. You need not expect lower taxes when the White House calls upon Congress at each session to enact a new tax bill rapidly broadening the tax base and inserting the arm of the Federal Treasury deeper and deeper into the pocket of the citizen. Let no one be deceived. These additional taxes will not come from the rich. The volume of Federal spending has already passed beyond the power of the rich to pay. If the Government should confiscate the entire income of the rich, the amount obtained would be insufficient. This burden will be placed upon the people. It fastens itself upon producer and consumer alike. The burden of supporting Federal extravagance is added to the cost of living and becomes a charge upon every man, every woman, and every child, including the "under privileged", the "average man", and even the "forgotten man."

If one would seek the underlying reason for the inefficiency and improvidence of the Federal Government, he need not look beyond the abstruse confusion reflected in this quoted philosophy of the leader of the New Deal.

I have pointed out that our cost of living is up 20 percent. This is not accident. He "planned it that way." Living costs are governed in part by natural economic laws like supply and demand. They are governed in other respects by governmental interference. One factor is the monetary standard. The President reduced the gold content of the dollar. It buys less. Necessities of life cost more. Another factor is governmental interference with production. Curtailment is a full partner with the hurricane and the drought. The consumers of America cannot blame the Republican Party for the new taxes which lie concealed in the cost of living. The responsibility rests on one doorstep and that is the doorstep of the White House.

We go back to the President's philosophy. I quote again his statement regarding wages:

"Wages ought to and must go up with prices."

But wages will not go up with prices when prices are elevated by governmental interference and when profits of industry are insufficient to pay higher wages. The President's asserted philosophy, in the light of the facts, is no philosophy at all. It is an unsupported campaign utterance employed for political purposes.

I now invite your attention to the subject of relief. Work relief, of course, provides temporary employment on made jobs. It is subject to the objection that it is costly, and to the further objection that the administration, in most instances, refuses to pay the prevailing rate of wages in the communities where public-works projects are carried on. This tends to undermine the entire wage structure and is difficult to defend.

The system which is employed lends itself to political abuses which I will not undertake to discuss. A most serious objection to the present program is that whenever the Works Relief Administration does attempt a useful undertaking in contradistinction to its useless, boondoggling projects it finds itself squarely in competition with private industry. To that extent it deprives private industry of an opportunity which it would otherwise enjoy, and in such cases it operates to increase and not to decrease permanent unemployment.

One significant fact stands out, and that is the expenditure of billions of the taxpayers' money under the direction of the President and his aides has failed to reduce in a substantial way the number of unemployed, and the relief load has actually been increased.

Republicans in Congress would like to correct this situation. Some of us fought strenuously against the writing of the $5,000,000,000 blank check to the President in the last session of Congress. We sought to retain control over the public purse by prescribing the purposes for which the money should be spent and defining definitely the methods of making the expenditure. On most points we were defeated by administration influence. We now renew this fight in connection with the billion-and-a-half appropriation bill now pending before the House of Representatives. The Republican Party does not propose to repudiate the obligation to feed the hungry; but we do propose, as far as it lies in our power, to take politics out of relief. We propose, moreover, to liquidate the Works Progress Administration and to turn over the responsibility for distribution of relief to the States and local agencies. We stand for this principle on the theory that the administration of relief can best be superintended by those who know the local situations. Local interest will police the distribution of the money.

We are standing for State supervision through nonpolitical boards, and I hope we will unite on a proposition that each State must contribute a certain amount to match the contribution of the Federal Government, thus giving the local agencies a real

share in relief and insuring that they accept their responsibility and see to it that the money provided for relief is equitably distributed.

We hope to put an end to the unjust disparity now existing. We especially denounce a system which permits relief in one State to be administered on a basis of less than $200 per family per year and in other States in amounts which vary from a minimum of $200 to a maximum of more than $1,300 per family per year.

Last year I believed—and it is still my belief—that a blank check of $5,000,000,000 or any other like sum in favor of the Executive is bad legislation. Discretionary authority to expend this money, almost without restraint, is subject to most serious abuses and should never have been delegated to any President, New Deal or Old Deal. We hear of political corruption in the administration of relief in Pennsylvania, of scandals throughout almost the entire area of West Virginia, of indictments in Maine, of unlawful collection of campaign funds in Washington, and of the use of relief money for political purposes almost everywhere throughout the United States. I have seen the comments of your own Victor Ridder in the city of New York. I have read some of the stories published in the New York Sun. These all indicate to me that the situation in your own State is not what it ought to be.

The Republican Party has a right to ask the American people whether they approve the evils of the existing program. We have a right to denounce the wickedness of playing politics with human misery. Let us make our purpose perfectly clear. We will not repudiate the destitute nor starve those who are in need, but we must courageously take our position that public money voted for relief of the destitute shall be employed to feed hungry mouths and not to feed hungry political manipulators working under the direction of Mr. Farley.

This administration was pledged by the 1932 platform to reduce the expenditures of the Federal Government by 25 percent. If you want to calculate the extent to which this pledge remains unfulfilled, look up the recent statement of the Secretary of the Treasury that the deficit for the fiscal year ending June 30, 1936, will be approximately $6,000,000,000.

Instead of keeping the pledge to reduce expenditures, the expenses of government have been steadily increased and are still being increased by the Federal administration. A feature of this situation which affects you is that the administration has demanded new and additional taxes during each year of its existence. There is pending before the Senate at this time a tax bill containing more than 250 pages made up of technical and complicated provisions. I will not describe this bill except to say its chief effect, if not its purpose, is to place a severe penalty on the retention by corporations of any substantial part of their future earnings. The administration has picked up a stray idea that business institutions no longer should create new reserves.

Somebody evidently thinks thrift is not a virtue and the public interest will be served by compelling corporations to pay out their net earnings year by year. The apparent object is to require that profits should be turned into circulation through the payment of dividends to stockholders and that finally all such profits when so paid should be subject to increased taxation, either through the penalty tax on earnings not paid out or through the income taxes of individual stockholders from whom the exemption of the normal tax has been lifted.

Time does not permit discussion in detail of this strange program. It is very clear that a big corporation which already has established a great surplus will not be definitely injured by the requirement to convert its net profits into dividends. An infant industry or a new corporation which has not had time to build reserves will find it can build reserves only by meeting the severe penalties of the law. In this administration the New Deal advocates have talked much of its friendliness to the little fellow. And yet they sponsor legislation which favors the established corporations at the expense of those not yet established. It is useless to argue that it is prudent to build up a reasonable reserve to provide for the necessities which may arise in times of depression.

The average man would regard a reasonable reserve as a necessary part of sound business administration. President Roosevelt's administration is unrestrained by any consideration of this kind. Moreover, the administration seems to have forgotten some pertinent figures. It has been estimated that during the present depression the corporations of this country paid out in the form of wages, salaries, interest, and dividends from their accumulated surpluses a sum in the neighborhood of $28,000,000,000 in excess of their receipts. This is approximately equal to the staggering cost of the New Deal up to this date. It is industry's contribution to the welfare of its stockholders and its employees. The possession of these great accumulations contributed to the strength of our system. It aided our people in meeting the strain of hard times. A like surplus would serve us again in another emergency, but the New Deal theorists, under a false guise of social justice and a mistaken belief that they are advancing a humanitarian program, will place obstacles in the road of further accumulations.

As I contemplate these facts, there is only one conclusion, and that is that the untrained and immature manipulators of the New Deal administration are not competent to administer the governmental affairs of the American people.

In the President's speech made in New York a week ago he defends what he calls "the current costs of rebuilding America." There is a serious question whether the New Deal is rebuilding America or ruthlessly tearing it to pieces, but I pass this question. In his attempt to explain away the staggering burden of cost, the President states that the deficit of the Government this year is—I quote—"about $3,000,000,000." The Secretary of the Treasury says it is $6,000,000,000. I have not noticed that anyone has regarded a difference of $3,000,000,000 between the President and his Secretary of the Treasury as being a matter worthy of any comment. If the President's estimate is correct, the Secretary of the Treasury is 50 percent wrong; and if the estimate of the Secretary of the Treasury is correct, the President is 100 percent wrong. These differences need not be resolved. The Federal deficits each year are not caused by deficiencies in Federal revenues. The revenues are substantially greater than they were prior to the New Deal. The deficits come from a spirit of free and happy spending. The President in his New York speech said:

"I can come here to the city of New York and talk about the cotton problem of Georgia, the corn and hog problem of Iowa, and the wheat problem of the Dakotas, etc."

Permit me also to talk to you about the farms of America. The New Deal appropriations are nearly equivalent to the value of all the farms of the United States. The 4-year cost, direct and indirect, of the Roosevelt administration is reliably estimated as being in excess of $30,000,000,000. The 1935 value of all the farm land and farm buildings in the United States was between $32,000,000,000 and $33,000,000,000. If the American farmers had sold all their farms in 1935 and handed over to the Federal Treasury the proceeds of the sale, less a reasonable commission, the amount paid the Treasury would have been approximately equal to the Federal appropriations under the New Deal. It has been calculated that after the farmers, by this means, had paid the 4-year cost of Government, every farmer would have left on the average about $27 for his own use; $27 but no farm.

Now, let us consider that the farmers, to which the President has made reference, had kept their farms and had turned over their gross income in payment of Federal expenses. In that case the entire gross income of all the farms during a 4-year period would not have furnished enough funds to finance the expenditures of the Federal Treasury. The gross income of all farms for 1933, 1934, 1935, and 1936 is estimated between $29,000,000,000 and $30,000,000,000. It seems they would have lacked about $1,000,000,000, which is only one-third of the amount in disagreement between the President and his Secretary of Treasury.

The facts which I have recited merely illustrate the general situation. The complete story of extravagance and inefficiency will never be related in full. America, standing aghast at the revelations already made, must determine upon its course of action. Most numerous remedies will be suggested. A Budget balance is imperatively needed, but equally important is restoration of sanity in Government. The American people have a right to expect a sense of responsibility in all Government officials. We must insist upon efficiency in governmental administration. We must go back to the civil service. We will go forward to a new understanding of our practical problems; and if I estimate correctly the temper of the American people, we will reestablish in this Nation government by law in lieu of the present system of personal government, based on executive discretion. We will unfetter the American economic system. We will employ again the matchless capabilities of the American people, and we will set our hands and minds to the task of reconstruction in a way which will bring a real social security to the men, women, and children who make up our great Republic.

ADDRESS BY HON. JAMES A. FARLEY AT THE HARTFORD (CONN.) CLUB

Mr. MALONEY. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered by Hon. James A. Farley, chairman of the Democratic National Committee, at a meeting held under the auspices of the Democratic State Central Committee of Connecticut at the Hartford Club, in the city of Hartford, Conn., on May 6, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

As my purpose tonight is to make a common-sense talk, it is particularly gratifying that I address a Connecticut audience. There are fewer isms, I believe, in this State than in any of our sisterhood of Commonwealths. You are fundamentalists in your political views. By that I mean that however the political tide runs you remain true to your conceptions of the basic principles of democratic government—that is, government founded on the thought that the welfare of the whole people must be the ruling impulse of our system. It was so in the infancy of your great State and it remains so.

I know it is customary on such occasions as this for a speaker to congratulate the people on their good fortune in having fine men to direct the affairs of the State. Let me depart a little from that procedure and congratulate Governor Cross, Senators LONERGAN and MALONEY, Congressmen CITRON, KOPPLEMANN, SMITH, and SHANLEY, and the rest of the officials you have chosen as your high officers and representatives on having such a level-headed constituency to work for and to work with.

Under our form of government you have a dual allegiance—to your country and to your State—and my hat is off to you for your

loyalty to both. The fine part of it is that there is no conflict in your twin allegiance. You have too much wisdom, experience, and wit to believe either that the National Government has any thought to give Connecticut the worst of it, or that Connecticut is entitled to any advantage that would be to the detriment of national well-being and prosperity. You are jealous of your rights and your natural advantages and those that have come through the skill and industry of your citizens—and properly so. You are equally concerned that the National Government, which has to look out for the well-being of all the States, should do its job.

Oh, I know that in this period of political excitement and activity you are being bombarded with hectic oratory from the spokesmen of the minority party, telling you that the administration in Washington is bent on encroaching on State rights; that it is the fiendish purpose of the President to reduce the United States to a dictatorship; to junk the Constitution and to have all business, and, in fact, all individuals goose-step to the music of a regimental band.

Well, you know the President of the United States. He was your next-door neighbor and was always stepping across the border to your hospitable territory. Do you remember anything during his two terms as Governor of New York that suggested a bent toward dictatorship, or toward socialism or communism; for he has been accused by those who seek to regain control of the Government of all of these things? A large number of the people who live here are New Yorkers in business. Every morning and every evening the suburban trains are crowded with folks from my State going to and coming from their shops and offices. The roads are jammed with automobiles carrying people bent on the same mission. In fact, many of the friends I have in New York City have their homes over here, and the way they boast of the beauties of your hills and valleys and beaches tells why they live in Connecticut.

Have you heard any one of these complain that Franklin D. Roosevelt as Governor hurt business in any way? Indeed, I doubt if the whole history of my State shows more successful administrations than the two when Roosevelt was in Albany.

Do you think that your neighbor is a different person, with a different personality and a revolutionized character, because he was moved from Albany to Washington? Isn't it a fact that it was because he had shown himself a great Governor the people of the United States translated him from the house on the Hudson to the house on the Potomac with the idea that he was peculiarly fitted for the bigger post? And hasn't he lived up to specifications and done a job in Washington that the whole world admires—at least, the whole world except those people who want to get another Herbert Hoover into the White House and to undo what he has done? By that I mean that our political adversaries would have us return to the same system that brought us into the gravest economic trouble we ever had, not that they wish to give up the profits they are making now for the losses they were experiencing 3 years ago.

The figures of our trade, commerce, and industry are cold, definite indexes of the existing condition of business. Nobody can dispute them. They present the picture of a headlong dive to the depths of distress, despair, and disaster contrasted with an upward swing. Our progress toward complete recovery is not so abrupt as was the descent, but it has been steady, substantial, and sound. The only thing that could interrupt it would be the rejection of the methods that have brought it about. This is as good a place as any to assure you that there is going to be no such interruption. The President is going to be endorsed in the election next November more decisively than he was voted into office in 1932, and the verdict of the people is going to be confirmed as thoroughly as it was in the congressional elections of 1934. And it is with a full heart that I name Connecticut as one of the States that will contribute to the reelection of Franklin D. Roosevelt.

The criticisms of the tories of 1936 are mere abstractions. They charge him with seeking dictatorial powers. What Presidential functions has he strained? They charge him with making Congress a rubber stamp to register his orders. There is not an enactment which he has recommended that Congress has accepted unless it conformed with the views of a majority. And the most important of the laws passed under the present administration were put on the statute books with the help of Congressmen of opposite political faith from the President. Even those two measures which failed to come within the limitations declared by the Supreme Court were voted for by many Republican Members of the House and Senate—some of them from this State. It is my recollection that practically half the Republican membership voted for one or the other of those bills.

They say this is an administration of dreamers. Well, the men and women who founded this great city 300 years ago were dreamers, too. They dreamed of release from the burdensome laws of another colony and made their own government. Their dream came true, which is why Hartford is today the beautiful, rich community we see around us.

They say he wants to wreck the Constitution. He has been in office for 3 years and the Constitution seems to be standing up fairly well. Incidentally the Hartford founding fathers adopted a constitution suitable doubtless to things as they were then, and conditions as they foresaw them. What sort of a State would Connecticut be today if that constitution was still in force? They say he wants to destroy the Supreme Court! I have yet to hear it suggested that President Roosevelt should appoint enough new members of the Court to give a majority that would validate what the present Court has declared invalid. Yet that has been done in the past. It was a Republican President who did it. Moreover, there has been hardly a President under whose administration laws have not been passed that the Supreme Court declared unconstitutional. When those things happen there is nothing for the President to do but to propose new measures that will meet the high tribunal's objections. It might be of service to observe that whatever laws President Roosevelt recommended were laws intended to help the people; none of them were for his own advantage or enhancement. Incidentally, it must be recorded that even those enactments which turned out to be unconstitutional helped get things started, and did their part in pulling us out of a dreary hole.

Our adversaries are prone to forget what they said and what they felt a few years ago in regard to the very policies they so emphatically denounce now. Perhaps I might remind you, "lest we forget."

You are fortunate in having in your community a great newspaper. I am sorry that journal does not like this administration, but its news columns, at least, are to be relied on for accurate information. I might, in passing, remark that the Hartford Courant printed a 58-page paper on Sunday, March 5, 1933—when Franklin Roosevelt had just come into the White House. This year its Sunday issue newspaper of March 8 had jumped to 82 pages to accommodate a lot more advertising than it had in the depression time. I congratulate that newspaper, for a prosperous newspaper means a prosperous community. Its progress should give us a fair yardstick with which to estimate the difference the New Deal has made between then and now.

I only cite this particular newspaper because you are naturally familiar with it. The same sort of comparison could be made in almost any city.

For the same reason I wish to call your attention to certain headlines that illustrate the progress business of every kind has made. For example:

In the early months of 1932 your newspaper told you "New construction in State declines sharply in year. Off 65 percent", etc.

"Business at lowest ebb as depression year ends."

"Southern New England Telephone Co. reports decrease of 30,000 telephones over previous year."

"One hundred thirty-one million five hundred thousand dollars loss felt in steel trade."

I could read similar bulletins on the prostrated state of business for an hour, but you undoubtedly remember without further headlines how things were in Connecticut as well as throughout the country when the present administration came into power.

Your newspaper phrased it this way, editorially:

"The hope when 1931 ended that the new year would see recovery well advanced has not been realized, and still another new year opens with the clouds of anxiety undispersed."

But within 3 months after the openings of the next year your newspaper saw signs and hope and hailed the New Deal in this fashion:

"No proposed reform, whether temporary or permanent, but is likely to bring protests from some individuals and from some classes whose personal interests may be affected. Their complaints should not be permitted to impede, much less to halt, the measures designed for the benefit of the great majority. The present is not a time for quibbling over petty details or for disputing over fine points. The President has assumed command of a nation ready to follow him. Willful objectors in the ranks, whether in Congress or out, should be firmly ordered to the rear for the duration of the coming siege."

Now, let us jump to this year. I find during last month such headlines as "A million dollars' worth of tobacco sold here"; "Mutual Life assets gain $78,529,913"; "U. S. Rubber net best since 1927"; "General Motors February is 7 years' peak."

Still your newspaper refuses to be happy over the administration that has brought about the changes that it so dramatically records in its business headlines and that is reflected in its own prosperity. It is sarcastic in its references to the President's efforts and jeers at the idea that he has sought economy and that the delay in approaching a balanced Budget is due in any part to huge increases in Government obligations involved in enactments due to unforeseen commitments made in spite of him. It is enthusiastic over President Hoover's generalities voiced in speeches in which he is bidding for another nomination, and it concluded a recent editorial in this language:

"The New Deal does not take kindly to any suggestions emanating from Mr. Hoover, but it could immensely profit itself by the things he said in his Colorado speech. A Republican platform built on the solid foundations of that speech ought to appeal to the country."

That is quite all right—if your newspaper believes that Mr. Hoover was a competent and successful President, and that his policies were better and are better—for he has not changed—than the policies which have changed red entries to black on the ledgers of industry.

Let me repeat that I cite one of your home newspapers only because you are familiar with it. I could quote practically every antiadministration newspaper in every large city in the same way. Those headlines, or headlines of the same import, were published in Boston, New York, Chicago, San Francisco, and other big communities, and the conflict between them and the editorial pages was perhaps even greater in these other centers of population.

It is not my job, of course, to edit the newspapers of the country, but I may, I hope, point out that the cold facts of business are of vastly greater significance than the views of some publishers.

Now, the Manufacturers Association of Connecticut can hardly be accused of undue partiality toward the Roosevelt administration, but in its survey of Connecticut industry last month it had to record that factory employment declined by less than the usual seasonal amount; that "freight carloadings showed a further increase on top of the substantial gain made in December"; that "bank debits due individual accounts were 19 percent over the corresponding month last year"; that "the number of new corporations formed and the total capital stock involved showed increases of 29 and 33 percent"; and that "real-estate sales numbered 50 percent more than last year." Over the entire New Haven Railroad this business report shows an advance of more than 50 percent in the loading of building material.

Let us glance for a moment at the business situation right here in Connecticut as reflected in the comparative values of your life- and fire-insurance securities as of today and 1932. The Hartford Courant of January 2, 1933, listed the value of life-insurance stocks at $124,750,000 and fire-insurance stocks at $119,300,000, with a total valuation for both stocks at $244,000,000. On January 6, 1936, the value of these same insurance securities was published again in the Hartford Courant. These figures show the value of the life-insurance stocks at $247,000,000 and the fire-insurance stocks at $266,160,000, giving a total valuation of the securities as of that date of $513,160,000, as against the $244,000,000 listed on January 2, 1933. In other words, during the past 3 years and under the Roosevelt administration the value of your life- and fire-insurance securities has shown an increase in excess of 100 percent.

I guess that these figures will suffice to emphasize the point I am making. I am no fonder of statistics than I suppose you are, but I do notice in the publication called Business Week that the machine-tool business of New England has been breaking records and that the shoe industry closed one of the best years in its history.

I observe that a great many of the attacks on the administration made in this section of the country refer to the farm legislation, with the implication that the West has been favored over the East. You will perhaps be interested to learn that the shipments of manufactured products from the industrial East to the agricultural States have increased enormously under the present administration. The waybills of all the great railroads record huge figures for this business. Two years after the Roosevelt administration had come in they showed that Connecticut was shipping out manufactured products to the West and South half as big again as they had shipped in 1933. I am not going to bore you with more figures; but you, with your wise Yankee perception, will realize that this increase in your manufacturing business would have been impossible except that the purchasing power of the farmer had been restored to a considerable extent.

It may seem scandalous to those who have not analyzed the situation that a farmer in Nebraska should have been paid something for abstaining from planting his whole acreage to wheat or corn, but when you figure that what he got came to you for the things your factories supply it may not seem so monstrous after all. When the restored purchasing power of the farmer increased the output of your factories 50 percent or more, you must realize that there is really nothing regional in the emergency measures that have taken the whole country out of the red.

Incidentally, your own State of Connecticut received last year nearly a million and a half of the rental and benefit payments under the agricultural bill and nine and a half million dollars was spent on emergency conservation work in the 18 Civilian Conservation camps here, which went largely toward fire protection, forest improvement, soil-erosion control, game and fish conservation, and things of that sort. Your farmers, through the Farm Credit Administration, were enabled to borrow $9,000,000, and your home owners, through their loan corporation, something over $44,000,000, and your banks were aided to the extent of nearly $24,000,000.

These were loans, not gifts. They are secured by the properties involved, just like any other loans and are being paid back in the most satisfactory fashion. As a matter of fact, the Reconstruction Finance Corporation is taking in repayments a whole lot more than it is sending out. I don't know what the exact figures are just now, but the last report I saw on the subject showed that this chief lending agency of the Government had an operating profit of $126,000,000, which would be a pretty good showing for any corporation.

You have recently been subjected to a flood disaster. It is to prevent or at least minimize the horrors of floods such as this that much of the public-works program is planned to accomplish. Incidentally, many of the small dikes in the headwaters of the rivers are among the projects that our adversaries have classed as among the useless, money-and-time-consuming enterprises that the Works Progress people have undertaken. When the projects against soil erosion and for river control are complete, you will find that these little dams are a vital element in making you safe from a repetition of your recent affliction.

The part played by the C. C. C. boys and other Government agencies in rescues and repairs you know better than I.

We cannot expect anybody to be very enthusiastic over paying more taxes, but in the case of Connecticut the $6,000,000 increase in the income taxes paid means, to calculate roughly, that some people in Connecticut had an aggregate of perhaps $125,000,000 more income in 1935 than they had in 1933.

Proportionately, the figures run about the same in all sections of the country, and very naturally the people of the whole Nation are as happy over these conditions as you are here in Hartford. Obviously this cheerful change from what we were going through when Franklin D. Roosevelt came to the White House is not the result of luck or chance or magic. It was the result of deliberate planning by the administration, which inherited a terrific state of national distress and which felt it to be its job to cure that condition.

President Roosevelt began his term with what was perhaps the most courageous act of any administration since the beginning of our history. If you remember, he shut up all the banks. Perhaps the country gasped a bit, but it had faith in him and took the temporary inconvenience with a smile and a cheer. Such was its great relief that somebody had come along with a plan and sufficient backbone to put that plan into effect. In the few years previous to the advent of Roosevelt to the White House there had been 5,000 bank failures. Since he straightened out the banking situation, as I read in a recent speech delivered in Congress, there have been just five Federal bank failures; and, thanks to the Bank Insurance Act, which was part of the program, practically all of these failures were unaccompanied by loss to the depositors.

Our history is full of examples of Yankee courage. The way you New Englanders met the hardships of the recent flood and the cheerfulness with which you remedied the damage is an incident of that proverbial courage. Brave people love brave men. I think that the trait in our President that most appeals to my audience of today is the calm fortitude with which he has met every situation that has arisen since he tackled as tough a problem as ever confronted a President of the United States. He was not flustered when the whole Nation acclaimed him. Nobody has ever seen him rattled because a certain element of our population, greedy for special favors, denounced him as an anarchist and Socialist, and a dictator, and prophesied that not welfare but disaster must result from what he has been doing. He has taken the hurdles as he came to them. Perhaps he has not been successful in every detail of his program. Nobody, not even a great President, can score a hundred percent in performance, but if he scores a hundred percent in intention and turns out to be right 90 percent of the time, he has made his mark in history and in the gratitude of the people.

Sift the criticisms that are being made by the so-called Liberty League and its collateral branches that are seeking to break down the Roosevelt policies and what do they amount to? Absurd generalities, such as that he is seeking to Bolshevize the Government, to destroy business, and other tommyrot of that sort. Undoubtedly, it is very probable that in the distribution of emergency relief to the extent of billions of dollars some small soul got $4 worth of groceries for nothing when he could have paid for them. Undoubtedly an occasional idler has not performed a full day's work for his relief pay. What of it? Work had to be provided for men and women incapable of digging ditches or driving trucks, but just as subject to hunger and other suffering as the sturdiest among us. Work within their capacity had to be provided, and hence the stories of boondoggling that make up so large a part of the literature and oratory of the administration's enemies. What, I ask you, could be done with a manicure girl out of work, a music teacher without pay and without pupils, an artist with no market for his pictures, an actor or actress unemployed, and thousands of other individuals quite capable of supporting themselves in normal times but destitute of a market for their services in such times as we have been going through? They were given such work as they were accustomed to, and other unfortunates were served by them.

But, as I say, what do these fly specks on the fair canvas on which a statesman has inscribed a wonderful recovery for a shaken people amount to anyway?

The Nation itself knows what has been done. The Nation appreciates that the unceasing effort of its President has brought about these results, and next November you will find that the States of our Union will vote the reelection of Franklin D. Roosevelt, and that among these States will be your own Connecticut.

WORK OF HOME OWNERS' LOAN CORPORATION

Mr. WAGNER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter written by Mr. John H. Fahey, Chairman of the Federal Home Loan Bank Board, addressed to Mr. Henry P. Fletcher, chairman of the Republican National Committee. The letter written by Mr. Fahey is a very complete, persuasive, and convincing reply to a statement made yesterday by Mr. Fletcher.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

It is evident that the statements in your press release relative to the work of the Home Owners' Loan Corporation are based upon information conveyed to you which is both incomplete and inaccurate. The result is a series of unfortunate implications which, in the interest of millions of our citizens, as well as thousands of financial institutions, call for correction.

In criticizing the Federal Government for coming to the relief of urban home owners and saving more than a million families from the loss of their homes and eviction, your informant is apparently unaware that the first attempt to do this important work was

undertaken by the Seventy-second Congress with the approval of former President Hoover. The Federal home-loan bank bill, signed July 22, 1932, provided, with the President's approval, for making direct loans to home owners to save their homes. The Federal home-loan banks authorized by this act were not organized, however, until October 15, 1932, and proved wholly inadequate to meet the chaotic conditions which had developed in the urban mortgage field.

The regulations made by the Bank Board to provide for these direct loans to home owners were so onerous they could not be taken advantage of. They allowed advances of but 30 percent of the then depression value of the property in most cases and but 40 percent of that value if the loan could be paid in full in 8 years. Forty-one thousand five hundred and eighty applications were filed for loans under the act. In the entire country but three loans, amounting to a total of but $9,000, were made, while the cost of handling the applications was $136,591, or over 15 times the amount of the loans actually made. Two of the three loans made were subsequently taken over by the Home Owners' Loan Corporation and but one is still outstanding.

In the face of this failure foreclosures of mortgages against urban homes meanwhile reached record-breaking heights. They were mounting at the rate of 1,000 a day when President Roosevelt recommended the organization of the Home Owners' Loan Corporation to meet the emergency. The Corporation, under the terms of the Home Owners' Loan Act, signed by the President on June 13, 1933, is administered by the Federal Home Loan Bank Board, a bipartisan board consisting of three Democrats and two Republicans; and in the granting of, as well as the servicing of, loans there has been no discrimination between applicants on the basis of politics, race, or creed. The act was passed by the overwhelming votes of both the Senate and the House, including Republicans and Democrats. In the Senate the act was approved without record of a single dissenting vote. In the House the vote was 383 yeas and but 4 nays. But one dissenting Republican vote was recorded.

Your statement says that "not even Comptroller General McCarl, who supervises the expenditures of all regularly constituted agencies of the Federal Government, has access to these books. He cannot audit a single account." This is not the fact. The work of the Corporation has been carried on within the letter and the spirit of the law. The Comptroller General has full access to all records and accounts of the Corporation. On its own initiative the Corporation enlisted the cooperation and advice of the Comptroller General's office in setting up its forms and machinery for accounting, thus obtaining invaluable aid in providing for easier auditing of the books of account. The Office of the Comptroller General receives our regular statistical reports, is empowered to audit regularly the accounts of the Corporation, and is entirely familiar with our accounting records and procedure. The Corporation submits monthly financial reports and frequent special reports to the Treasury Department and the Bureau of the Budget. It makes regular financial and statistical reports to the Emergency Council for the information of the President. An Executive order of August 5, 1935, provided for a review of all the Corporation's operations and control by the Bureau of the Budget.

Your statement raises the question as to whether our loans have been made to deserving persons—to those clearly in danger of losing their homes. May I say, as to this, that the regular procedure of the Corporation provided that the application of a mortgagor should be supported by a statement of the mortgagee that he was unwilling to renew the loan and felt obliged to foreclose. Under the requirements of the Corporation, the loan file also had to contain evidence that the loan could not be refinanced elsewhere. The truth is that the thousands of savings banks, life-insurance companies, building and loan associations, commercial banks, and other institutions whose mortgages this Corporation took over felt that as trustee institutions they could not under the conditions which existed continue to carry these loans. The fact that more than 800,000 of the applications filed have been rejected by the Corporation, while hundreds of thousands of additional applications obviously ineligible were not even accepted, is conclusive evidence that the Corporation exercised every reasonable precaution to eliminate loans which were not eligible under the law. Not only were competent loan committees set up in every State to pass upon these applications, but in every important center special representatives of the Board from Washington participated in checking of the work of these committees.

As your own statement indicates, it is obvious that private lending institutions would not surrender to this Corporation mortgages which they consider prime loans and which they desired to carry. More than 1,000,000 home owners who have been benefited by the operations of this Corporation are today meeting their obligations on a basis fairly comparable to that of borrowers from private institutions because of the extraordinary improvement in the economic condition of the country and increased employment. Their ability to meet these payments is also influenced by the fact that under the terms of the Home Owners' Loan Act their payments are spread out over a period of 15 years and at an interest rate of 5 percent. This is the most liberal loan on urban homes ever made by any institution in the history of the country.

Your press release further says that you view "the mortgage on the national wealth of the Nation as a 'ball and chain' on every family of the land" and that "these tax-exempt bonds attach to each American household a contingent debt that is variously estimated at figures from $180 to $400." The fact is, first, that in refinancing these loans the Corporation obtained reductions on the claims as filed amounting to over $200,000,000 and that while when the act was passed it was anticipated that the Government might suffer some loss through the enactment of this relief measure, the prospect is that no losses will ensue.

Might I also point out that if these loans had not been made real-estate values would have continued to decline and the remaining mortgages in the portfolios of our lending institutions, representing the savings of millions of our people, would have declined further in value with most serious consequences. May I also remind you that the Corporation took hundreds of millions of defaulted mortgages out of the closed banks of the country and aided in the distribution of cash to some millions of depositors who were in grave financial difficulties?

You suggest that the Corporation misrepresents the facts in reporting collections on its mortgages. You state that it reports payments of principal and interest "for the month of January 1936 as 90.1 percent of the total amount due" and later admits that as "of February 29 that the total payments of principal and interest received by the Corporation from its borrowers amounted to $246,735,297, or approximately 73.4 percent of the $335,669,010 total due.'" The report to which you refer for the month of January 1936 was issued on February 26, 1936; it stated: "Total receipts of the Corporation from its borrowers amount to $18,082,000, which is 90.1 percent of the total sum maturing in January on principal and interest accounts and exceeds by nearly $900,000 the largest amount collected by the Corporation on its loans in any previous month."

You will observe that this statement refers only to the amount of cash received within that particular month compared with the amount which matured for the month. The same statement made it quite clear that the above quotation did not refer to all collections, for it was further explained that "total principal and interest payments due the H. O. L. C. from the time it was created in June 1933 to January 31, 1936, aggregate $315,244,011, on which approximately 73 percent has been paid, indicating marked improvement over total cumulative receipts from borrowers as of December 31, 1935, when 68 percent of all principal and interest due, since the Corporation's establishment, had been paid." Certainly these are clear statements, referring first to a single month and then to the entire period of operations, which should not have been misunderstood by your informant. We report regularly each month the receipts for the preceding month as turned over to the United States Treasury in cash and also the cumulative receipts from the beginning of collections to the date reported. These figures are made public immediately.

The Home Owners' Loan Corporation was created at a time of great financial distress under the leadership of a Democratic President, but with the overwhelming approval of both Republicans and Democrats. It has dealt with a problem absolutely new to any Federal institution, but it is gratifying to report that with the hearty cooperation and support of the majority of our citizens the Federal Government has turned into order and security what threatened to be disastrous confusion and insecurity not only for individual home owners in distress but for a host of other citizens the safety of whose savings was bound up in mortgage investments through many thousands of our financial institutions.

NATIONAL FLOOD CONTROL

The Senate resumed consideration of the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes.

Mr. COPELAND. Mr. President, in preparing the omnibus flood-control bill for presentation to the Senate, the committee undertook to define a policy and formulate a declaration of policy with regard to the control of destructive floods upon the rivers of the United States. I shall refer to this again in a moment, but before doing so I invite attention to the fact that in the projects which are recommended for consideration by the Senate not one is included which has not received the full endorsement of the Board of Army Engineers. Every project enumerated in the bill has been surveyed and given full approval.

Mr. LOGAN. Mr. President——

The VICE PRESIDENT. Does the Senator from New York yield to the Senator from Kentucky?

Mr. COPELAND. I yield.

Mr. LOGAN. Does it include all the projects which have been approved by the Board of Engineers of the War Department?

Mr. COPELAND. It does not include all projects which have been surveyed by the Board of Engineers and excludes a good many projects where power and other benefits are involved, but which for flood control alone have not been considered meritorious.

Mr. LOGAN. The city of Catlettsburg, in my State, has been very seriously affected by the banks of the river falling in. The district board of Army Engineers have just completed their report which has been sent to headquarters and is probably now in the office of the Board of Engineers. It

recommends, I am informed, $78,000 to do the necessary work on the banks of the river there to prevent further falling in.

May I ask the Senator if it is possible to have included in the bill a project in the situation in which this one now is, so that it may go to conference? Of course, if it were not approved by the Budget Director and the Board of Engineers it would have to go out. This project has been recommended and the necessity for it is very pressing.

Mr. COPELAND. I said the other day in the Senate that when I got through with this bill I would not have a friend left on the floor, and if I have to lose some friends I do not want to lose the friendship of the Senator from Kentucky [Mr. LOGAN]. However, the fact is we have stood against inclusion in the bill of any project which has not received the full approval of the Board of Army Engineers.

There are many projects which have received the approval of district boards, which are on the way to complete approval, but which have not as yet been passed upon by the board. I am sorry to say to the Senator from Kentucky, and I know he will realize I am sincere in saying I am sorry, that as chairman of the committee I could not consent to the inclusion of the project to which he refers, even though it may be meritorious, unless it has received the favorable consideration and approval of the Board of Army Engineers.

I may say to the Senator that if at some time before the session ends the project is passed upon favorably by the Board of Army Engineers I shall be glad to join the Senator in an effort to have legislation enacted to cover it. If perchance it does not receive such approval before the end of the session, then as soon as it is ready I shall be glad to help him, but I must say for the committee that we cannot accept it at this time.

Mr. LOGAN. Catlettsburg is a city of 5,000 or 6,000 people. In the recent flood about 75 acres of land, and perhaps some houses, fell into the river. One more flood would perhaps take a good part of the city. I know the humanitarian philosophy of the Senator from New York. I had been hopeful that we could get some provision in this particular bill. Then if the Board of Engineers do not approve the project it can go out in conference. That is the only thing I have in mind. I am sure it will be approved by the Board of Army Engineers, as it has been recommended for immediate consideration.

Mr. BARKLEY. Mr. President, will the Senator from New York yield?

Mr. COPELAND. I yield.

Mr. BARKLEY. I wish to say to the Senator from New York in confirmation of what my colleague has said that the situation at Catlettsburg is peculiar. Due to a very sharp bend in the river, the flood waters coming down and beating against one bank have washed away the land, and the situation is such that about one more flood will cut through and destroy an enormous amount of property. That might happen between now and the next session of Congress.

As my colleague has said, the project has been approved by all except the Board of Army Engineers in Washington, and it may now be before them. If the Board of Army Engineers should give its approval to the project before the bill shall have been completed, would the Senator from New York then oppose including the project in the bill?

Mr. COPELAND. I may say to my friends the Senators from Kentucky that it has been my disagreeable duty to object to the inclusion of a project urged upon us by our leader, the senior Senator from Arkansas [Mr. ROBINSON], for Faulkner County, Ark. I have no doubt at all that it would be desirable to give protection to that particular territory, but the project does not receive the support of the Board of Engineers, and they give good reasons for their conclusion.

In the same way the project covering the Big Sandy River in Kentucky has not as yet been passed upon, and I beg Senators not to urge us to ruin the bill by the inclusion in it of projects which are not fully approved. Let us for once have just one bill where we can stand on the platform next fall, if we stand on a platform, and say, "There is no pork in this bill. There is nothing in this bill which has not gone through the regular procedure. There is nothing in this measure which has not been passed upon by the experts who have been working since the foundation of our Government to protect our country—the Board of Army Engineers."

Mr. BARKLEY. I appreciate the Senator's attitude and am certainly not one who would ruin the bill in the manner suggested. I favor the bill and desire to see it enacted into law. The question I propounded was, If the Board of Army Engineers' report can be obtained before consideration of the bill shall have been concluded, so the report would be official, would there then be any reason for objecting to the inclusion of the project?

Mr. COPELAND. What does the Senator mean by "concluded"? Does he mean if the report comes in tomorrow or next day?

Mr. BARKLEY. I do not know how long consideration of the bill may take, but if the report should come in before the bill is finally voted on, would the Senator then object to the inclusion of the project?

Mr. COPELAND. Before this bill is finally voted on?

Mr. BARKLEY. Yes.

Mr. COPELAND. Certainly if the report should come in with full approval of the project before the bill is finally voted on, I should be glad to have the project included.

Mr. BARKLEY. I thank the Senator. I do not know whether that is probable, but I think it is entirely possible.

Mr. NEELY. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from West Virginia?

Mr. COPELAND. I yield.

Mr. NEELY. One might infer from a statement made by the Senator from New York a moment ago that he thinks the proposal to protect West Virginia and Kentucky against the flood tides of the Big Sandy River deserves to be dishonorably designated as "pork." Let me assure the able Senator that the project to which the amendment of the Senator from Kentucky refers is worthy in every respect, and that the people of West Virginia and Kentucky who live near the mouth of the Big Sandy are unquestionably entitled to the protection which the amendment, if adopted, will require the Government to provide them.

Mr. COPELAND. I was giving the category of the charges which might be made, but I certainly did not apply the term "pork" to this particular item.

Mr. President, each Senator will find on his desk a number of committee amendments. In beginning the study of the bill I ask Senators to take committee amendment numbered 1, which they will find on their desks, instead of the bill itself.

The declaration of policy is found on page 54 of the bill. Since the bill was prepared and reported to the Senate there have been conferences between the White House and Senators. The fact has been brought home to those of us who were working on the bill that it is very desirable that not alone should surveys be made of the rivers but also of the watersheds, with a view to the ultimate control and prevention of soil erosion and for the preservation of the forests.

I should like to perfect the declaration of policy as set forth on page 54 of the bill by including, in line 12, after the word "waterways", by inserting the words "including watersheds thereof", and in line 15, after the word "tributaries", by inserting the words "including watersheds thereof."

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 54, in the committee amendment, in line 12, after the word "waterways", it is proposed to insert the words "including watersheds thereof", and in line 15, after the word "tributaries", to insert the words "including watersheds thereof", so as to make the section read:

SECTION 1. It is hereby recognized that destructive floods upon the rivers of the United States, upsetting orderly processes and causing loss of life and property, including the erosion of lands, and impairing and obstructing navigation, highways, railroads, and other channels of commerce between the States, constitute a menace to national welfare; that it is the sense of Congress

that flood control on navigable waters or their tributaries is a proper activity of the Federal Government in cooperation with States, their political subdivisions, and localities thereof; that investigations and improvements of rivers and other waterways, including watersheds thereof, for flood-control purposes are in the interest of the general welfare; that the Federal Government should improve or participate in the improvement of navigable waters or their tributaries, including watersheds thereof, for flood-control purposes if the benefits to whomsoever they may accrue are in excess of the estimated costs, and if the lives and social security of people are otherwise adversely affected.

The amendment to the amendment was agreed to.

Mr. COPELAND. On page 54, section 2, line 24, after the word "Engineers", I move to insert "and Federal investigations of watersheds and measures for run-off and water-flow retardation and soil erosion prevention on watersheds shall be under the jurisdiction of and shall be prosecuted by the Department of Agriculture under the direction of the Secretary of Agriculture and supervision of the Chief of the Soil Conservation Service; in line 25, after the word "in", I move to strike out "his" and insert "their"; and on page 55, line 1, after the words "Chief of Engineers", I move to insert "and the Secretary of Agriculture", so as to make the section read:

SEC. 2. That hereafter Federal investigations and improvements of rivers and other waterways for flood control and other purposes shall be under the jurisdiction of and shall be prosecuted by the War Department under the direction of the Secretary of War and supervision of the Chief of Engineers, and Federal investigations of watersheds and measures for run-off and water flow retardation and soil-erosion prevention on watersheds shall be under the jurisdiction of and shall be prosecuted by the Department of Agriculture under the direction of the Secretary of Agriculture and supervision of the Chief of the Soil Conservation Service, except as otherwise specifically provided by act of Congress; and that in their reports upon examinations and surveys the Chief of Engineers and the Secretary of Agriculture shall be guided as to flood-control measures by the principles set forth in section 1 in the determination of the Federal interests involved.

The amendment was agreed to.

Mr. COPELAND. Mr. President, section 3 is a controversial section, and I ask that we pass that over for the moment, until those who are interested in the changes may have time to appear.

The PRESIDENT pro tempore. Without objection, section 3 will be passed over temporarily.

Mr. COPELAND. Mr. President, if the Senate will now consider committee amendment no. 2, it relates to page 57 of the bill, the Flood Control Act of 1936. The new language is underlined in the committee amendment as Senators will find it on their desks. Committee amendment no. 2 will read, when perfected, if it is perfected:

On page 57, beginning with line 17, strike out all down to and including line 3 on page 58 and insert in lieu thereof the following:

"SEC. 5. That pursuant to the policy outlined in sections 1 and 3, the following works of improvement, for the benefit of navigation and the control of destructive flood waters and other purposes, are hereby adopted and authorized to be prosecuted, in order of their emergency"—

And this is the new material—

as may be designated by the President—

In short, that the priority of the works to be undertaken in the next fiscal year shall be as may be designated by the President. The remainder of the section is—

under the direction of the Secretary of War and supervision of the Chief of Engineers in accordance with the plans in the respective reports and records hereinafter designated: *Provided*, That penstocks or other similar facilities adapted to possible future use in the development of adequate electric power may be installed in any dam herein authorized when approved by the Secretary of War upon the recommendation of the Chief of Engineers.

Mr. VANDENBERG. Mr. President——

Mr. COPELAND. I yield to the Senator from Michigan.

Mr. VANDENBERG. Why is the authority to establish priorities taken away from the Board of Rivers and Harbors Engineers, where it has always been, traditionally and historically, and placed in the hands of the President? What can be said by way of justification for the substitution in respect to this purely technical, engineering expert problem?

Mr. COPELAND. Mr. President, the Senator from Kentucky referred to the fact that I am soft-hearted. Somebody has to be soft-hearted enough to determine which ones of these projects are most meritorious, which are most pressing, which have the greatest human interest. Somebody has to make the decision. I do not think this provision is different from that of the present law, because, according to the practice in the past, the Army Engineers have proceeded, under the direction of the Secretary of War, to establish priorities. The Secretary of War is a member of the President's Cabinet, and I assume that if the President had in his mind any priority he would feel free to say so to the Secretary of War; so I do not think there will be any practical difference whether this language is or is not adopted.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. CLARK. The policy of the Government in its whole development of rivers and harbors, which is very closely analogous to the subject of flood control, has been to put the determination of the technical details and the technical priorities in the hands of the Corps of Engineers of the United States Army, subject, of course, to the action of Congress in enacting legislation, and to the action of the President in signing it.

This amendment, as I see it, is designed to change that salutary process. There are today in existence a number of different agencies, some of them technical and some of them nontechnical, some of them responsible to Congress and some of them not responsible to Congress, which are making recommendations on various schemes and various plans for handling the natural resources of the United States, and protecting the citizens of the United States against such plagues as floods.

The theory on which the Committee on Commerce started to draft this bill, as I think the chairman of the committee will agree, was to put the technical questions of priority in the hands of the body constituted by law with adequate technical knowledge and experience to advise Congress about these matters. It seems to me this provision is a complete change of that policy.

So far as the Corps of Engineers of the Army are concerned, I do not think anyone has ever questioned their technical competence, their honesty, or their general efficiency. I myself have very violently disagreed at times with the recommendations of the Army Engineers, notably their recommendations as to the St. Lawrence waterway; but so far as supplying technical knowledge is concerned and so far as opinions on emergency matters are concerned I think there is no one in the United States comparable to the Army Engineers.

As I see the amendment, it simply amounts to divorcing the Army Engineers from their present legal responsibility to make to Congress recommendations on priorities and emergency matters and on the feasibility of various projects, and putting it in the hands of some commission or several commissions which may be now in existence under general provisions of law, or under general authority granted to the President in emergency acts making appropriations, or otherwise. Some of these organizations are voluntary ones. The amendment divorces the Army Engineers from a function which they now perform for Congress and the President, and which I believe to be a very important function.

From my own standpoint, I have no hesitation in saying that if this amendment should be adopted, instead of the bill accomplishing the purposes which we hope it will accomplish, I have no doubt that the $50,000,000 which is the subject of a limitation in a later section of the so-called Hayden amendment will be almost exclusively devoted to the States of New York and Pennsylvania, and that the other portions of the country, some of which are visited with two or three floods a year, will, in the order of urgency and emergency, be subordinated to the sections which recently suffered an unprecedented flood, and in which, as one witness testified before the Commerce Committee, it was possible to dramatize the flood situation.

Therefore, so far as I am concerned, I am opposed to the amendment.

Mr. OVERTON. Mr. President, I entertain for the Army Engineers the same admiration expressed by the Senator from Missouri. I think they have a magnificent, an unexcelled, and perhaps an unparalleled record of service to the Federal Government. When, however, we come to consider this bill, it is to be borne in mind that the Chief of Army Engineers has been consulted with reference to every project. As stated by the chairman of the committee, not a single project is incorporated in the bill that has not received the approval of the Army engineers. Therefore the bill undertakes to authorize the projects which have been expressly recommended by the Army Engineers; but the bill is something more than that.

After we have had the benefit of the advice and recommendations of the Army Engineers, the bill also undertakes to provide for emergency projects. Someone should have authority to determine the order of priority in the selection of projects which have already been recommended by the Army Engineers and to determine which ones of those projects shall first go forward.

It seems to me that it would be proper to leave to the President of the United States the question of the determination of emergencies; and when we do so we do not divorce the Army Engineers from their historic relation toward navigable waters. On the contrary, the bill follows the recommendations of the Army Engineers; but it is more than a flood-control-project bill. It is an emergency bill, considered in a period of emergency; and the determination of emergency is a power that is properly lodged with the President, perhaps more so than with the Army Engineers.

Mr. CLARK. Mr. President, will the Senator from New York yield to me for the purpose of offering an amendment to the committee amendment?

Mr. COPELAND. I yield.

Mr. CLARK. I move that the committee amendment be amended by striking out in lines 8 and 9 of the committee print the words "as may be designated by the President", which will leave the amendment to read:

> That pursuant to the policy outlined in sections 1 and 3, the following works of improvement, for the benefit of navigation and the control of destructive flood waters and other purposes, are hereby adopted and authorized to be prosecuted, in order of their emergency, under the direction of the Secretary of War and supervision of the Chief of Engineers in accordance with the plans in the respective reports and records hereinafter designated—

And so forth. Mr. President, the effect of the amendment would simply be to leave the primary authority in the body, which, as I said a moment ago, is now constituted by law for the purpose of advising Congress about these matters, namely, the Corps of Engineers of the United States Army.

I do not delude myself, and never have deluded myself, on the proposition that the President of the United States, if he so desires, may always be able to obtain from the War Department or from any other Department of the Government any report which he may wish. That was the reason that I was never willing to accept fully the figures of the engineers on the St. Lawrence proposition. The only effect of my amendment would be to leave the primary responsibility where it now rests, in the Corps of Engineers of the United States Army, to create a presumption, so to speak, in favor of their recommendation. This is the technical arm of the United States Government so far as these matters are concerned.

It should be remembered that the bill before us is in the form of an organic act, for the first time in our history defining the policy as to flood control on anything else except the Mississippi River, the Sacramento River, and a lake down in Florida. It is proposed to put into this organic measure machinery exactly comparable to that which for many years has been very happily and very successfully reposed in the Corps of Army Engineers under the River and Harbor Act.

I cannot for the life of me understand any argument which has been advanced in behalf of the principle of transferring this authority as a primary proposition from the Corps of Army Engineers. No one can question that the placing of this authority in the Corps of Army Engineers has worked most successfully and most economically for the Government in the case of rivers and harbors. Nobody has yet stood on this floor or anywhere else publicly and questioned the efficiency of the Corps of Army Engineers. Yet this proposal is brought in for the purpose of sidetracking the recommendations of the Corps of Army Engineers and putting the authority into the hands of some sort of a commission or board, nobody knows how constituted or of whom composed. I cannot see any argument for any such measure.

Mr. VANDENBERG. Mr. President, I completely concur in the statement made by the Senator from Missouri [Mr. CLARK]. When we got away from the old "pork barrel" method of making river and harbor appropriations, the very essence of the lump-sum appropriation was the commitment to the Board of Rivers and Harbors Engineers of the determination of priorities and allocations, because under the new procedure the necessity for an independent, nonpolitical, unprejudiced decision as to priorities is the primary essential of the entire system. That system has demonstrated its vitality and its virtue year after year after year, and no one ever heard a suspicion or a remote challenge against the type of decision made by the Board of Army Engineers in respect to priorities.

It is now proposed to transfer the power to determine priorities from an expert arm of the Government to a political arm of the Government, which would be a direct step back in the direction of "pork barrel" legislation in connection with appropriations of this character.

I most emphatically support the amendment submitted by the Senator from Missouri.

Mr. GUFFEY. Mr. President, I am for the amendment as originally reported by the committee, and I am sorry I cannot agree with the position taken by the senior Senator from Missouri [Mr. CLARK]. I am for the committee amendment on account of the historic record of the Corps of Army Engineers, and at the outset I want to bear witness to the honesty and integrity of the Engineer Corps. Two hundred and eighteen years ago the construction of levees to take care of flood waters after the waters reached the streams was inaugurated. Never from that time until last year did the Corps of Army Engineers ever try to provide a means of taking care of the flood waters before they got into the streams, and during that time 50,000,000 acres of our best soil have been washed into the Gulf of Mexico, and 50,000,000 acres of soil are well on the way out. Therefore I think it is time that we have someone else to sit in and help the Engineer Corps in this work.

Mr. CLARK. Mr. President, the Senator undoubtedly knows that for years the Army Engineers have been advocating a system of reservoirs on the headwaters of the various streams tributary to the main stream of the Mississippi for the purpose of preventing floods. The Senator undoubtedly is familiar with the fact that in the recent disastrous and unprecedented flood, particularly with regard to the Connecticut River, the reservoirs which had been constructed in the last few years up toward the heads of the tributary streams flowing into the Connecticut River, according to all accounts, tremendously minimized and cut down to a small percentage the damages which would have occurred without the works recommended by the Army Engineers.

Mr. GUFFEY. I am sorry I cannot agree with the Senator from Missouri in his statement of the historic facts.

Mr. CLARK. The works are in existence, are they not?

Mr. GUFFEY. Where are they? What public works, what dams relating to flood control, built by the Army Engineers, are in existence?

Mr. CLARK. There are a good many works toward the headwaters of the rivers.

Mr. GUFFEY. Will the Senator name some?

Mr. CLARK. I am not familiar with the names or the locations. Universally the testimony before the Committee

on Commerce, as far as I can recall—and if I am in error I should be glad to have the Senator point out my mistake—has been to the effect that the reservoirs built under the supervision of the Army Engineers, particularly in the Connecticut Valley, tremendously minimized the damages due to the last disastrous flood.

Mr. GUFFEY. I agree that they minimize the floods, but all the surveys which have been made, all the surveys in western Pennsylvania and of the waters of the Ohio River, have been made on the request of Congress, and not at the instance of anybody else. We spent over $100,000 in having the surveys made. My point is that the Army Engineers never yet have advocated a policy or done anything to formulate a policy of flood control or of taking care of the flood waters before they reach the rivers, and I think it is time that soil erosion and reforestation should be taken into consideration in connection with formulating a policy of flood control.

Mr. CLARK. Mr. President, no sane man, I assume, minimizes the importance of the subject of soil erosion and deforestation, and the other intimately connected problems, and their effect on the flood-control problem. It is only fair to say that, so far as the last disastrous flood, an unprecedented flood, which is relied on to dramatize the pending bill as an emergency measure, is concerned, the testimony before the Committee on Commerce was to the effect that no amount of soil-erosion protection or of protection against deforestation would have served to prevent that particular flood, because the condition of the ground was such—the ground had been frozen to such an unprecedented depth—that there was no chance for the water to permeate the ground, and therefore it necessarily had to run off.

In response to what the Senator from Pennsylvania has said, I desire to emphasize the fact that the Corps of Army Engineers has for many years urged a comprehensive scheme of a combination of reservoirs and levees as a protection against floods. To be sure, when it comes to the question of the lower Mississippi River, the main stem of that river and the main stems of certain other rivers in the United States, when a flood starts it is too late to do anything by reservoir control, and it is absolutely necessary to establish either levees or floodways, such as were provided for in the last Flood Control Act. But in defense of the Corps of Army Engineers, let me say that their responsible heads for years have advocated reservoirs adjacent to the headwaters of the tributary streams and of the main streams for the purpose of diminishing as far as possible the volume of water which at any particular time comes into the channel of the main stream. They have also recognized, and properly recognized, that when the water had actually come into the channel of the main stream, it would be necessary to have levees or floodways or other protection.

I believe it is not fair to say simply because the question of soil erosion, the question of deforestation, and other questions may properly enter into the general consideration of the subject of flood control, that in an emergency matter of this sort—and the only justification for the passage of the bill at this time is that it deals with an emergency matter—the determination of priorities and the determination of degrees of emergency should be removed from the technical arm of the Government constituted particularly for the purpose of passing on those matters and be put into the hands of some unknown agency, of whose composition no one in this body at this moment has any knowledge.

Mr. McNARY. Mr. President, I share the view of the distinguished Senator from Michigan [Mr. VANDENBERG] and the senior Senator from Missouri [Mr. CLARK] in opposition to the committee amendment. I desire to ask the Senator from Pennsylvania [Mr. GUFFEY] where he would at present go to obtain information if he did not go to the Board of Army Engineers? What is the avenue of access upon which he can predicate an opinion, unless it be the data from the Board of Army Engineers, obtained after a careful survey? If that be the case, why transfer the power to the President?

The truth of the matter is that one of the great mistakes, which, in my judgment, history will record in matters of government, is the transfer of too many powers to the President. It is not humanly possible for him or anyone who may follow him to exercise the responsibilities which have been imposed upon him. It is not fair to the President, and I doubt, if he were consulted, that he would agree with this committee amendment.

There is only one agency of government which has the ability, the experience, and the facilities to determine emergency in matters of this kind, and that is the Board of Army Engineers. I ask the Senator from Pennsylvania, who is responsible for the amendment, if he will answer the simple question, What is the purpose of transferring this responsibility to the President, when he does not know a thing in the world about a flood-control situation, or of the rivers which probably ought to be harnessed so that they will not destroy life and property? I pose that question to the Senator from Pennsylvania.

Mr. GUFFEY. As a result of the work done by the Soil Conservation Service and the Reforestation Service, they have available records and data which apparently the Board of Army Engineers does not use. I shall consult those two Services. I find their report on the Mississippi Valley reforestation and conservation is the best report I have ever seen published by any branch of the Federal Government.

Mr. McNARY. Mr. President, that is a new agency recently created by an Executive order, based probably upon a statute of Congress, and that agency does not have anything of a substantial nature in its possession. In any event, whatever views it may have, it must obtain the information on which to base them from the Army Engineers.

I wish to say to the distinguished Senator from Pennsylvania that, in my judgment, he is doing his party and the leader of his party an injustice by imposing upon him a responsibility which he cannot carry, which he should not share, and which, in my opinion, he does not want. I think it would be a great error in a matter of this kind, after the careful consideration that has been given to flood control by the Army Engineers, to attempt through the President or any board to say what are the streams which should be first controlled and harnessed. That is a matter which must be determined after the most careful consideration of facts, inspection, and study; and there is only one agency prepared to do that.

Consider the great work, Mr. President, which the Board of Army Engineers has done with respect to the improvement of our rivers and harbors. Has the President ever desired that responsibility? Has the Congress ever decided that it should thrust on the Executive the responsibility to determine how the money should be expended, and what harbors and what rivers should first be improved? It is not even a delightful thought or pleasant dream. I say to the Senator proposing this amendment that if it shall be agreed to it will, in my judgment, result in a maladministration of the purpose of the act; it will be unjust to the President, and therefore it should not be considered favorably by this body.

Mr. HAYDEN. Mr. President, I am perhaps in a measure responsible for the suggestion contained in the amendment, and it was made in consideration of the fact that flood-control projects from now on are to be examined by two departments of the Government. The watersheds above the dams to be built are to be examined and reported upon by the Department of Agriculture. Everyone knows that the Department of Agriculture is best equipped with bureaus which can furnish the Congress with proper and adequate information in respect to the prevention by various methods and means of floods upon the watersheds.

There is in the Department of Agriculture the Soil Conservation Service that can go anywhere, to any part of a watershed, and make an examination. Its activities are not confined merely to Federal lands or other reserves. The preliminary studies undoubtedly should be made by the Soil Conservation Service, but if it shall be determined that upon a given watershed reforestation is the proper method to prevent floods, the Forest Service would naturally be called upon to give advice and actually to attend to the planting of trees or other vegetative cover.

In connection with any structures where lake levels are disturbed or where reservoirs are to be built the wildlife in the area must be considered. There is in the Department of Agriculture the Biological Survey which can be consulted with respect to the effect upon wildlife by reason of the changes that are to be made in the watershed. The same thing is true of other bureaus of that great Department in respect to different matters in the drainage area above any dam to be built in any stream.

Every Senator, I am sure, will agree that if it is found impossible to retain the rainfall on the watersheds by reforestation, by the planting of grasses, or by any other method which the Soil Conservation Service or the Forest Service can devise, and that in order to protect life and property lower down it is ultimately necessary to build dams, then the proper authority to build such structures for flood control is the Corps of Engineers in the War Department.

So this bill, if it shall pass in the form in which I think it ought to be enacted, will properly divide those two functions. The Secretary of Agriculture will report to Congress upon what shall be done upon the watersheds of streams to retain the rainfall, and the Secretary of War, using the Board of Army Engineers as the source of his information, will report to Congress as to what should be done with respect to the construction of dams or levees or floodways or whatever is necessary to remove the menace of destructive floods.

I now desire to lay down the premise which I think makes it sound for the pending legislation to require the President finally to pass upon the question of what work shall be done and in what order. Two departments of the Government make their reports. The reports come in separately and may not give to Congress a proper, coordinated view of the problem. The Chief Executive is head of all the departments. He is the Commander in Chief of the Army. He appoints the Secretary of Agriculture, and the Secretary of Agriculture is responsible to him. If a great project is to be undertaken to control the floods in an extensive watershed, is it anything but reasonable to say that these two departments, having studied the problem and having arrived at their independent conclusions, should not both of them submit the entire matter to the President and let him transmit the information to Congress with such further suggestions as he may deem it proper to make?

Title II of the bill provides for the creation of a National Resources Board, which is to be a general staff for the study of all the problems relating to the wisest and best use of our national resources. That board would act as advisers to the President in cases of this kind.

The provisions of title II have been very carefully drawn. The National Resources Board will not actually undertake any work and should not, any more than would the General Staff of the Army, send out one of its officers to take command of a regiment in an action. If the bill shall become law, the President will have advisers to whom he may refer recommendations relating to flood control that come up from the Departments of War and Agriculture to see how they fit into a broad policy of developing and conserving our natural resources.

That being the case, and flood control being no longer something to be cared for by just one department, and in just one way, it seems to me perfectly proper for the bill to provide that the President shall have something to say about the recommendations to Congress as to what shall be done and when it shall be done.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. VANDENBERG. May I call the Senator's attention to the fact that it seems to me his observations are not pertinent to the immediate amendment pending? I cordially agree with him that it has been wise to add this enlarged consideration in connection with the determination of what the technical answer ought to be for the flood challenge when it is once identified. I agree also that if recommendations are to be transmitted to Congress, and that is what the Senator is constantly referring to, necessarily they must head up somewhere before they come to Congress when they are coming from two separate sources. However, I call the Senator's attention to the fact that the amendment relates solely to the question of who is to determine the priority of the emergency. It has not anything to do with the determination of what the answer is to be. It has solely to do with the question of who is to say that $50,000,000 shall be spent this year in actual work upon $300,000,000 or $400,000,000 worth of authorizations. The Senator from Missouri and myself are asserting that that has nothing whatever to do with the argument which the Senator has been presenting, and relates solely to an independent, unprejudiced expert decision as to relative emergency in respect to the flood situation itself.

Mr. HAYDEN. Let us see if there is any greater difference than that between tweedledum and tweedledee.

Mr. VANDENBERG. I think there is a tremendous difference.

Mr. HAYDEN. Very well. This bill carries authorizations, if I remember correctly, for some $315,000,000 worth of work to be done; projects totaling that sum are authorized to be constructed by this bill. Nobody proposes that the entire $315,000,000 shall be appropriated by the Congress at this session or any other one session. So the total must be broken down; and the proposal is to appropriate money for $50,000,000 of the authorizations in 1 year. How in any normal situation does Congress operate where a broad authorization has been provided and we intend to appropriate only a part of it? The President exercises his discretion by sending up Budget estimates for the part of the work he thinks should be done out of the total authorization.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. VANDENBERG. Does the Senator mean to say that under the existing procedure in the designation of river and harbor projects the Board of Rivers and Harbors Engineers do not determine the priority?

Mr. HAYDEN. I say that there will be no money appropriated by Congress under the authorizations contained in this bill except for projects that come to the Congress in the form of a Budget estimate. That is certain.

Mr. VANDENBERG. Well, the Budget estimate is not conclusive as to projects included within it.

Mr. HAYDEN. That may be true.

Mr. VANDENBERG. Who makes the determination? Is it not the Board of Rivers and Harbors Engineers?

Mr. HAYDEN. The Corps of Engineers will submit to the Budget certain estimates as they will submit recommendations to the President, in the event that this bill becomes a law. It is just as broad as it is long, and it does not make a particle of difference which way the Army Engineers go about it.

Mr. VANDENBERG. If the Senator is indifferent, why change the procedure?

Mr. HAYDEN. I say that, after all, the President of the United States, being responsible for his Budget, will transmit to Congress estimates for $50,000,000 out of the authorization of some $315,000,000, and Congress will have to pass upon the Budget estimates which the President submits. If Congress is to establish the principle that hereafter the President shall be consulted about flood-control projects, why object to putting that same principle into effect now? Why take away from the President the power to make any decision whatsoever as to what ought to be done under an act of Congress of this character which he helps to make a law by his final approval?

It seems to me that there is no material difference as to method of approach, whether the Congress shall say that the President shall designate the projects formally in one kind of report or whether he shall make his designations through his Budget estimate. The whole question is, Is it right and proper for the President of the United States, being responsible for his Budget, to have anything to say about a flood-control project?

It is provided in the bill elsewhere that more than one department is to pass upon these projects, and the Senator agrees with me that, in that situation, the recommendation should be headed up by the President. I do not believe that we are putting any burden upon the President of the United States that he does not want, nor do I think that Congress is conferring upon him any authority that he should not have. It is his responsibility, as the guardian of the finances of the United States, to see that proper estimates are submitted to Congress which will accomplish adequate and substantial results. How can the President carry out that responsibility if it is provided by law that somebody may come around by the back door and select projects that the President knows nothing about, and that if he sends up a Budget estimate the Congress shall not pay any attention to it? That would not be a consistent policy. If we are going to adopt in this bill the proposal that the President of the United States shall obtain information from two departments and from any other source he deems desirable with respect to flood control, in order that the problem may be considered in its relation to all of our natural resources, why hesitate now to give that discretion to the President?

Mr. OVERTON. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Arizona yield to the Senator from Louisiana?

Mr. HAYDEN. I yield.

Mr. OVERTON. The Senator from Michigan states that this amendment will convert this bill from a regular flood-control bill into a "pork barrel" bill because the President will have authority to select the order of precedence in which the projects shall be executed. The Senator contends that this order of precedence should be determined by the Board of Rivers and Harbors Engineers.

Let me call the attention of the Senator from Arizona to a provision in the bill. In the first place, there is not a single project that has not already received the sanction of the Army Engineers. How, then, under the theory of the Senator from Michigan, can it be said to be a "pork barrel" bill, or how can it be converted into a "pork barrel" bill when every single project in the bill has already received the sanction of the Army Engineers?

Mr. HAYDEN. Mr. President, if the Senator will yield, I will say that is what I thought was the great strength of the report made by the Senator from New York. As chairman of the Committee on Commerce, the Senator from New York insisted and the Committee on Commerce insisted that no project be included in this bill that had not been thoroughly investigated and approved by the Corps of Engineers.

Mr. OVERTON. I think that was a wise conclusion. Then, the execution of the projects is still left to the Secretary of War and the Army engineers. They are not divorced from this flood-control work in any sense.

Mr. HAYDEN. And should not be.

Mr. OVERTON. They have come before the committee and, in effect, perfected the bill; and when it shall become enacted into law, they are going to execute the projects. The only question to be determined by this amendment is in this period of emergency, when we can devote only a certain portion of the contemplated appropriation to carry out all these projects, is it not wise and proper that someone in authority should be selected—to do what? Not to select the projects that go into the bill, not to execute them, but to determine the order in which they shall be constructed. That is all this amendment means.

Mr. HAYDEN. It seems to me that it is but the part of common sense that what the Senator from Louisiana has suggested should be carried out.

Mr. FLETCHER. Mr. President, may I suggest that the bill includes something more than river and harbor improvements? It involves another question, namely, flood control, which has relation to erosion, conservation, and other matters which the Senator has not mentioned.

Mr. HAYDEN. Those are important factors which the Senate should consider.

This is the first time in the history of any Congress that legislation has been proposed to control floods on nonnavigable streams; this is the first time that there has been a distinct legislative recognition that the Federal Government has an obligation to perform in saving lives and property where commerce is not the essential element. In other words, Congress takes into consideration not only great streams which near their mouths are navigable but also consider their tributaries, because of a sound realization that the watersheds above are actually the source of the floods that do the damage farther down.

Having recognized a new principle, why not start out on that basis and proceed in the right way by getting all the properly considered and coordinated information that can be acquired and have it sent to Congress to be properly evaluated? I think it was wise to designate two executive departments—the Department of Agriculture and the Department of War—because those departments are the best-qualified agencies of the Government to make a fair and comprehensive study of a problem of this kind. But if in the circumstances of any case it is necessary to go outside either one of the two departments and get further information as to what should be done, should the Congress be denied access to all of the facts by not permitting the President to seek further information where he may see fit and to transmit his findings to the Senate and the House of Representatives? There must be unity of command in order to win the great battle against floods which menace the lives and the property of hundreds of thousands of the American people.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. CLARK. Would the Senator desire an amendment adopted to the present permanent Rivers and Harbors Act which would transfer that activity also from the Corps of Army Engineers and put it in the discretion of some board that the President may appoint, with or without authority of law?

Mr. HAYDEN. No.

Mr. CLARK. Certainly, the subject of flood control is much more vital and comes much nearer the daily lives of our citizens than does the matter of river and harbors, important as that is.

Mr. HAYDEN. That is just the reason why it is not necessary to adopt any new system with respect to rivers and harbors, because, after all, that work is a minor matter as compared to the broad problem of flood control.

Mr. CLARK. Of course, the whole proposal of the Senator from Arizona is entirely novel. It was not thought of by my distinguished friend from New York [Mr. COPELAND], the chairman of the committee, or by my distinguished friend from Louisiana [Mr. OVERTON], who has just spoken in favor of it, during the lengthy and extended consideration of this measure before the Senate Committee on Commerce. It was apparently never thought of until last Saturday morning at 11 o'clock, when the Senator from Arizona, my good friend, appeared and pulled out of his pocket a printed amendment which nobody on the committee had ever before seen.

Mr. HAYDEN. I beg the Senator's pardon. The amendment was not printed until after the chairman of the Committee on Commerce had had ample opportunity to examine it.

Mr. CLARK. I have no disposition to criticize the printing of the amendment. The point I desire to emphasize was that the bill had been reported out of the committee some 2 weeks before, and nobody had ever seen this new model scheme until the Senator from Arizona appeared with it last Saturday morning at 11 o'clock, and then and there it was suggested as a new panacea for all ills.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. CLARK. The Senator from Arizona has the floor. The amendment was reported out of the committee that morning on the statement of the Senator from Arizona.

Mr. ROBINSON. Mr. President, will the Senator from Arizona yield?

Mr. HAYDEN. I yield the floor.

Mr. ROBINSON. I will take the floor myself unless the Senator from Missouri wants it.

Mr. CLARK. I have no desire to occupy the floor. I shall be glad to have the Senator from Arkansas take it.

Mr. NORRIS. When other Senators are through with it, I will take it.

Mr. ROBINSON. Mr. President, I should like to reply to something the Senator from Missouri [Mr. CLARK] has just said. He will recall, I am sure, that early in the consideration of the bill I appeared before the committee and discussed certain features of the bill and certain amendments, and also in a general way the substance of the amendment which the Senator from Arizona [Mr. HAYDEN] has submitted.

I think it is fair to say that at my request the Senator from Arizona actively interested himself in the subject matter of an amendment which included not only the pending provision but a number of other amendments having relationship to the conservation of soil and of forests and the development of power. The subject was mentioned in a radiogram I received from the President and to which I made reference during the course of my remarks before the committee. Therefore, it is not a new proposition at all in the sense the Senator from Missouri inferred. It is a subject which has required some little time for collaboration and consideration.

On the point of the amendment immediately under consideration, the President after all is the Chief Executive of the Nation. As the Senator from Arizona [Mr. HAYDEN] and the Senator from Louisiana [Mr. OVERTON] have clearly pointed out, he has a large measure of responsibility. The officers constituting the Board of Engineers and the Chief of Engineers himself are subordinate. It has been our custom, where discretion is imposed in legislation, to vest that discretion in the President, in order that we might have the advantage of the services of all the subordinate departments, bureaus, and agencies which might be concerned in the carrying out of the legislation. We have not vested the Board of Engineers with discretion, as a rule, to determine the priority of projects. They have made surveys of all the projects in the bill and of a large number of projects which are not in the bill. There is no reason, in my judgment, that can be urged for vesting in a subordinate discretion as to priority.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. ROBINSON. I yield.

Mr. CLARK. On the same principle just enunciated by the Senator, there is no justification for entrusting $1,500,000,000 in the hands of the W. P. A. rather than in the hands of the President of the United States, is there? The head of the W. P. A. is a subordinate.

Mr. ROBINSON. What we actually do is to make the appropriation allotable at the discretion of the President. When we passed the $4,800,000,000 bill——

Mr. CLARK. But I am not speaking of that measure. I am speaking of the pending measure.

Mr. ROBINSON. We have not passed the relief measure as yet. As a matter of fact, it has not been reported by the Appropriations Committee.

When we passed the $4,800,000,000 appropriation, we did vest authority in the President. We did not vest it in the head of the Relief Administration or in the head of the Public Works Administration. I respectfully submit that it is sound policy, where discretion on large national matters is involved, to vest it in the Chief Executive rather than in a subordinate.

Mr. CLARK. Will the Senator adhere to that policy when the relief appropriation bill comes before the Senate?

Mr. ROBINSON. The Senator from Arkansas will not preclude himself as to future legislation.

Mr. CLARK. Will the Senator be kind enough to answer my question directly? Will the Senator from Arkansas be willing, assuming the Senate committee should adopt the policy of the House of Representatives as set forth in the measure, to follow that policy and vest the authority in the hands of the President of the United States rather than in the hands of the director of the W. P. A.?

Mr. ROBINSON. I have stated the general principle. I do not preclude myself from taking any action respecting future legislation that I believe to be helpful and just to the country. I see no reason for departing from the rule which we established last year when we passed the very large appropriation bill and gave the President the power to make allotments out of the appropriations thus made.

The Senator from Missouri, I assume, would not wish to bind me to vote in a particular way touching a bill which has not as yet been reported to the Senate, merely in an effort to embarrass me with respect to an argument he is otherwise unable to answer. When the bill comes before the Senate, I shall do what I think is right. My preference is to vest discretion as to the allotment of appropriations in the Chief Executive rather than in a subordinate.

Mr. CLARK. Mr. President, my distinguished and particular friend from Arkansas, the majority leader in this body, is trying today to pursue a policy in which he is very adept, that of holding with the hare and running with the hounds. In other words, he declines to state whether he believes the policy which he just enunciated with regard to flood control should be followed with regard to relief.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. CLARK. I shall be very glad to yield to the Senator. I shall accord him a courtesy which he did not accord to me. I shall not interrupt him while he is answering my question or asking his own.

Mr. ROBINSON. The Senator may interrupt me, of course. Does the Senator think that statement is borne out by the facts? The Senator endeavored to commit me as to how I would vote on a certain proposition when it came before the Senate. I stated as frankly and clearly as I am capable of doing that my purpose is to vest discretion in the Chief Executive rather than in a subordinate. I must ask the Senator not to undertake to have me swear that I am going to vote a particular way when a bill comes before the Senate.

Mr. CLARK. I have no desire on earth to embarrass my friend from Arkansas. He stated with great particularity and great force a general principle. Then, when I asked whether he would apply that general principle to the most important bill which will probably come before the Senate at this session of Congress, he began to quibble and say the bill had not been reported from the committee, intimated that he did not know what was in the House bill, and declined to be committed and said I was trying to embarrass him.

Mr. ROBINSON. Mr. President, will the Senator let me ask another question at that point?

Mr. CLARK. I am glad to yield to the Senator from Arkansas.

Mr. ROBINSON. The Senator from Missouri does recognize then, as to the bill to which he last referred, the relief-appropriation bill, the principle which I announced in connection with the flood-control bill, namely, that the discretion ought to be vested, if vested at all, not in an inferior officer, but in the Chief Executive; so the Senator is blowing hot and cold on the proposition. I announced the general principle and my readiness to adhere to it, and now he announces a general principle as to one bill and seeks to repudiate it as to the bill now pending before the Senate.

Mr. CLARK. I recognize no such things. As a matter of fact——

Mr. ROBINSON. Mr. President, will the Senator yield to a further question?

Mr. CLARK. I shall be glad to answer the Senator's questions one at a time. I should like to answer the question already propounded before he asks another one. However, I yield.

Mr. ROBINSON. The Senator can answer both questions at the same time. Does not the Senator think he has disclosed a considerable talent for "adeptness" touching the proposition pertaining to legislation?

Mr. CLARK. The proposition is very simple. The question of whether Congress in granting lump-sum appropriations of a purely emergency character, ostensibly for relief,

is one proposition. The question of granting appropriations for public works for the purpose of preventing such recurrent scourges as the destructive floods which have taken place in this country is an entirely different one. A lump-sum appropriation this year is a proposition which I very much deplore, because I had hoped that after 3 years of lump-sum emergency appropriations the time might have come when appropriations such as are necessary for relief and other public works might be handled on an ordinary budgetary basis; but if there is to be a lump-sum appropriation made this year, as I am certain there is to be, then I assert that discretion should be in the hands of the President and not of any subordinate temporary official. The officials either by statutory appointment or designation who handle these matters have been temporary officials. On the other hand, I assert that such matters as flood control or the improvement of rivers and harbors, whether of an immediate character or an ultimate character, are of such permanent importance to the United States that they should be handled on a permanently established system and not left to the discretion of the President or anybody else.

Mr. ROBINSON. Mr. President, will the Senator yield?

Mr. CLARK. I shall be glad to yield to the Senator from Arkansas.

Mr. ROBINSON. The Senator, as I understand him, justifies his support of vesting discretion in the President as to relief on the ground that it involves questions of emergency.

Mr. CLARK. As the Senator well knows, the relief situation is an extraordinary one. The appropriation for it is not carried in the ordinary Budget, to which the President is about to confine us in the matter of flood control but is carried outside the ordinary Budget on the old principle of the fellow who said, "Well, we will take another little drink and not count it." [Laughter.]

Mr. ROBINSON. Does not the Senator recognize the fact that this amendment relates exclusively to the subject matter of emergency? The Senator would vest discretion in the Executive because an emergency is involved with respect to relief, and deny it to the Chief Executive because an emergency is involved with respect to certain projects relating to flood control.

Mr. CLARK. Of course, I decline to let the Senator from Arkansas put in my mouth words which I did not use. The test of the situation is whether we are going to sign blank checks, to grant lump-sum appropriations, as is being done in the case of the $1,500,000,000, as was done in the case of the $4,800,000,000, and before that with the $3,300,000,000, or whether Congress is going to specify the objects for which the money shall be spent, and set up definite rules for preference and priority in its expenditure. That is the whole question.

As I say, I very deeply deplore the fact that we are again called on to make a lump-sum appropriation of $1,500,000,000. I had hoped that after 3 years of that sort of expenditure the time might have passed when it would be necessary; that the time might have arrived when the President and his various agencies, especially the Bureau of the Budget, would be able to estimate for what the expenditures should be made. But that is a very different and essentially divergent proposition from that of saying that Congress will authorize the appropriation of three hundred and so many million dollars for vitally needed flood-control projects, that we will pledge ourselves in advance not to appropriate more than $50,000,000, and that we will leave in the hands of the President the determination of the expenditure of the $50,000,000.

Before taking my seat I desire to say further than I am totally opposed to the limitation of $50,000,000 for flood control contained in the subsequent part of this amendment. I say that at a time when the United States Government has spent more than a million dollars for building a village up in Maine for housing the employees of a chimerical power project, when the cost of the residences built at Government expense for the executives of that project averages more than $18,000 per house, I am totally unwilling to limit to $50,000,000 the expenditure in behalf of measures which would save more in 1 year than the total expenditures authorized under the act.

Mr. President, I represent a constituency in which a very large section in my State has floods every year, not only every year but two or three times every year, in which the annual loss is more than the whole expenditure authorized in this bill for its protection. I have great sympathy with the Senator from Pennsylvania [Mr. GUFFEY] in the unprecedented flood that happened in his State this year. I know that there was greater losses in the Ohio Valley, particularly around Pittsburgh, this year of our Lord 1936, than the entire cost of the improvements necessary to prevent such floods in the future would have been. I know that there are many other situations in this country in which the expenditure of a certain amount now would save, not in perpetuity, not in accumulation, but every year, or every year in which there is a flood, the total amount of the expenditure necessary to prevent such floods. I am not willing to vote to put a limitation of $50,000,000 on a needed and meritorious measure in order to have more money to spend on such projects as the Passamaquoddy power development, the Florida canal, or any other such boondoggling project. We could not possibly justify such a proposition to our constituents.

Mr. SHIPSTEAD. Mr. President, I think there is merit in the contention of both sides regarding this amendment. When the question of flood control is coupled up with the question of conservation of soil and the prevention of erosion, we have other factors entering into the problem in addition to the matters which the engineers have heretofore handled, namely, rivers and harbors and navigation.

The question of flood control as it affects the question of soil conservation, I think, is as important as the question of flood control as it affects damage to property. It is a question in my mind whether more damage to property has not been done by lack of control of erosion than has been done by floods. I am convinced that the lack of the kind of flood control that would have protected the soil from erosion has been the cause of as many floods and of as much damage to property as has been recorded in the history of the country.

I think there is something radically wrong with our policy of flood control, because it has been a policy which has attempted, not to prevent floods but to take care of the flood waters after the flood had started. So far as I know, nothing has been done in the policy of this Government to prevent floods.

If this authority is retained in the hands of the Army Engineers, there arises in my mind the question whether or not the Army Engineers should have anything to do with the matter of soil erosion, with the protection or conservation of the soil as it is tied in with flood control as heretofore handled by the Army Engineers. A question of agricultural lands is involved here. A question of forestry is involved. Questions are involved of the control of erosion, with which I cannot see that the Army Engineers have anything to do.

I wish to pay my respects to the Army Engineers as constructors of river and harbor projects. I should not wish to see the control of navigation taken out of their hands under any circumstances. I should not wish to see anyone else have anything to do with that, because the Army Engineers have done it efficiently.

Early in the session I made a remark on the floor of the Senate—at least, the RECORD so shows—which, if I made it, I desire to retract. The RECORD shows that I had expressed disappointment in the accuracy of the estimates of cost by the Army Engineers. If I made that statement, it was made inadvertently. I think the subject came up as I appeared on the floor of the Senate and made a short statement, and there came to my mind the fact that in the past 3 years the cost of public works had so greatly increased over the estimates made in 1928 and 1929. The estimates made under

the high prices of 1928 and 1929 had been very much increased in the past 3 years, and I rose to protest about that; but I do not blame the Army Engineers for that, because they could not control the cost of material, and under the monopolistic price fixing of steel and cement in the basic industries they could not control the price of material.

Mr. CLARK. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. McGILL in the chair). Does the Senator from Minnesota yield to the Senator from Missouri?

Mr. SHIPSTEAD. Yes; I yield.

Mr. CLARK. As a matter of fact, in connection with the consideration of the estimates of the Army Engineers, the Senator, of course, takes into consideration the fact that Congress itself, by its affirmative act in agreeing to certain N. R. A. codes, had unreasonably boosted the price of some of those commodities.

Mr. SHIPSTEAD. I am aware of that.

It seems to me that so far as soil erosion is concerned and the control of flood waters on the tributaries, which is so intimately connected with the work of conservation of the soil, the Department of Agriculture should have something to do with it.

The Senator from Missouri pointed out that the President is at the head of all the departments and is Commander in Chief of the Army. He appoints the Secretary of Agriculture; he appoints all the heads of the various executive departments of the Government; and it seems to me that he should and he can call upon all of them for information.

A policy is now enunciated by the Congress for the first time, and when it comes to determining a policy I am of the opinion that Congress should always enunciate it, promulgate it, and enact laws to carry it out.

Mr. KING. Mr. President, will the Senator yield?

Mr. SHIPSTEAD. I yield.

Mr. KING. Does the Senator think he is quite accurate in that statement? I refer the Senator to the action of Congress in 1917 and 1918, when a bill was drawn and fathered by Senator Newlands, a great statesman, who had devoted perhaps more attention to the consideration of flood control and protection of the country against floods than any other man in public life. He offered a measure, which was passed, as I recall, creating a commission for the purpose of taking control of rivers and harbors and the building of reservoirs, the development of reclamation projects, and so forth, and put the whole matter in the hands of the commission.

We did not function under that—I have forgotten why—but, as I recall, the law was passed. I talked with President Wilson with regard to it, and he was very much in favor of a policy which would make for the conservation of our natural resources, and particularly a policy which would prevent floods.

As I recall, when that bill was being discussed in the House of Representatives, and likewise in the Senate, a great deal of attention was devoted to the discussion of the headwaters of the Missouri and the Mississippi and the other important streams of the United States, and the importance of reforestation in the prevention of soil erosion. So that the whole scheme was developed in that bill, and envisioned in the policy of President Wilson.

Mr. SHIPSTEAD. Mr. President, that policy may have been the correct one, but it was approved by Congress. I wanted to point out to the Senate in as short a statement as possible the importance of the new policy which is now tied up with the question of flood control.

I do not know how many Members of the Senate have seen these charts on the wall. I merely desire to show the enormity of the losses which have been due to erosion, and what is going on now in the destruction of the foundation of every asset we have in the United States.

On the first chart is indicated the soil of the United States as it was found in 1492, when Columbus came to our shores. Each one of the blocks on this chart represents 135,000,000 acres. The soil was created through untold centuries by nature and was protected by the normal growth of grasses and timber, and there was not any erosion. Out of that soil has come all the wealth that has sustained the population and the industries of the United States, with the exception of what was produced in the mines and the sea.

Out of that soil have come the crops which have resulted in our billions of dollars of balance of trade, out of which we have made payments to the banking houses in foreign countries and also in this country, but particularly in foreign countries, in settlement of the debts we owed for the development of the country, the development of railroads and buildings, and all kinds of investments that were made here.

Our only new crop of wealth each year comes out of this soil. When that soil is gone this country will go. When this soil is gone and cannot produce the food to sustain the population of the country and maintain the population working in industry the country will be gone. Out of this soil comes the original wealth each year to pay the gradually increasing indebtedness of this country; and when this soil is gone, this country is going, too, and this soil is going, and a great deal of it has already gone.

This chart is based upon an investigation by the National Resources Board, and it shows the extent in 1935 to which the soil was eroded and destroyed and was passing away, what is threatened, and how much is left. Senators will see that less than half of the soil is left unimpaired.

A hundred million acres have already been destroyed beyond the possibility of rehabilitation, and that hundred million acres would cover a territory as large as Illinois, Ohio, Maryland, and North Carolina together. That is beyond rehabilitation.

Another 125,000,000 acres are going, and another 100,000,000 acres of the best farm lands in the United States are very seriously threatened.

It is estimated that on account of lack of proper flood control, such as that proposed in the pending bill, 400,000,000 tons of soil a year are washed from the various tributaries of the Mississippi and the banks of the Mississippi into the Gulf of Mexico. During one dust storm one day of 1934 those who were here will remember the clouds of dust were so great that we had to light the lights in the daytime, and it was estimated that 300,000,000 tons of soil from the grain fields of the Middle West moved at that time.

This soil has been destroyed in several ways and by several agencies. Some of it is washed out by water, some of it is moved back and forth by wind, and that only happens when the soil is so dry that the wind can carry it away. Whenever there is plenty of moisture, or enough to keep the soil surcharged with moisture, dust storms do not occur.

There is another way in which the soil is destroyed, and I have here a very crude illustration to demonstrate it. We have here a chart showing the state of nature where there are grasses and forests to protect and hold the topsoil. The roots of the grass and the trees help to hold the soil in place, and the debris of leaves and twigs, which finally decay and create the humus that is so important, holds the water so that it gradually seeps down slowly into the runway. When that humus is destroyed there is a condition such as that portrayed here. When there is cultivation the topsoil gradually washes away and fills the channel, and here we have the other picture.

This is not the ultimate, the conclusion, because after that comes another stage, when land is destroyed by other methods than those already described.

If there had been no river, if this chart showed a valley here without a river, the topsoil would have been washed down into the valley. Some people think that valley lands are valuable because the topsoil comes from the hillsides down into the valley and makes the soil heavy.

Let us see what happens when that process continues. Suppose there were all this soil, as shown on this chart, and it had not been carried away by the water, but was in a line about like that shown here. The volume of erosion would

continue and the subsoil of yellow clay or blue clay would continue to wash down and bury the good soil; there would be subsoil on top of everything, and it would be impossible to raise anything, and nothing would rehabilitate that piece of ground. Much of the good soil in this country is buried by the erosion of the soil, and unless an efficient and comprehensive policy is carried out the chances are, if we permit the present conditions to continue and the present program to continue, that this soil will be entirely carried away in time, and then as a nation we will be through. When the topsoil is gone there is only one thing that remains, and that is the subsoil, and then there is a desert.

The Valley of the Euphrates in Mesopotamia was at one time the most fertile valley in the world. Now it is a desert. The same is true, as has been stated by those who have examined into the archeological history, of the Gobi Desert and the Sahara Desert. Instead of those being deserts in bygone days they were very fertile, and if we are to conserve the foundation upon which all the assets of this country are based, it is necessary to carry out the kind of a program proposed.

I now exhibit a chart to illustrate the comparative productivity of the soil as erosion continues. Where no erosion occurs the productivity is shown. Where partial erosion has taken place, productivity decreases to the point shown. Where there is very little topsoil left, productivity is very small.

This illustration is based upon reports from 10 agricultural experimental colleges in various parts of the country.

On the chart each ear of corn represents 5 bushels of corn. Where there is no erosion the production is 35 bushels to the acre, as indicated by the seven ears of corn. Where the soil is half gone the production is 15 bushels to the acre. So Senators can see what great capacity for production of wealth is being gradually washed away by the waters as the result of lack of a program to conserve the greatest asset we have. We can spend untold millions upon fertilizing the soil of this country in order to make three blades of grass grow where only one grew before, but it does not make any difference how much fertilizer is put on soil of the character shown in the second and third sections of the chart, or how much money is spent upon it. When the topsoil is gone, the soil which it has taken centuries to produce, and when the humus is gone, then there are lacking those conditions which will make crops.

I read a scientific article a short time ago. I do not pretend to be an expert and able to discuss the article. The Senator from New York [Mr. COPELAND] is here and may have read the article or heard of it. The article said that many diseases are due to the absence of minerals in food. After investigation by responsible scientists who have examined into the subject the statement was made that the soil has been so deprived, by constant cropping, of the minerals which nature has put into the soil for the food of the people that the soil no longer contains the necessary minerals to sustain the human body and, therefore, we now have many diseases which were not known in pioneer days, when the soil was virgin and produced the elements in the food necessary for the sustenance of human life, those vitamins and minerals which are necessary to human sustenance. Those elements are no longer produced and there is danger to our people in that respect also.

History in every country shows that wherever the topsoil is lost the vegetation is lost, and there are lost the elements necessary for sustenance of human life; that rainfall is lost, and as a result the land becomes desert.

I now desire to show Senators a chart prepared at my request as a result of investigation made by the National Resources Board. The chart shows the comparative progress of loss and of soil destruction by different kinds of cultivation. The first illustration shows the normal condition of grass. Erosion in that case is negligible. The growing of wheat does not cause much erosion. Each cartload on the graph represents 10 tons of soil eroded per acre. This chart is also based upon investigation made by 10 agricultural stations in 10 different parts of the United States. I make that statement so Senators may estimate the accuracy of the chart.

The figures are not mine. Each cartload represents 10 tons of soil eroded per acre. The estimate is made that in the average State where there is cultivation of wheat there will be lost of the topsoil each year 10 tons per acre if nothing is done to prevent the continuation of the process of erosion. The production of corn wastes four times as much soil. When we come to fallow ground which is plowed, and upon which there is no crop at all, Senators will see that the amount of erosion increases.

Mr. COPELAND. The wind carries some soil away.

Mr. SHIPSTEAD. The wind carries some away as well as water.

I have other charts to show Senators, but before I show them I wish to exhibit a chart which was prepared 3 years ago. I requested the National Resources Board to make some investigation as to the cause of prolonged periods of drought in the interior of the country.

In combination with the Weather Bureau and some other departments of the Government—I do not remember how many departments joined in that survey—a study was made to determine if possible what effect soil erosion had upon rainfall and what effect deforestation of the land or the draining of land had upon rainfall.

In northern Minnesota, as in many places, we drained the swamps and the muskegs. We denuded the forests. Those swamps and muskegs were millions of acres in extent. In those swamps the moss would be very thick. The condition was such that one could hardly wallow through them. Snow would lie in the forests of Minnesota until the middle of May or the first of June, but when the forests were cut and the swamps and muskegs were drained the first showers in the spring would melt the snows and the water would run into the ditches instead of going into the muskegs and being absorbed in the moss as it did before we did that ditching and drainage. In those days there would not be the heavy floods we now have in the spring. There was then a natural storage of water which the white man in his greed to get more land to cultivate has destroyed. We have destroyed that natural storage by which to keep the water back and to keep the floods from doing great damage. We had a natural storage there which kept a year's supply of moisture, even though only light rainfalls occurred. The lakes and the creeks would have their supply from the trickling of the water through the swamps and from the snows which melted in the forests, and we always had an adequate supply of water.

Now the water is shot out into the Mississippi River, and as quickly as it can flow to the Gulf of Mexico it is shot out of the country and treated as a public enemy instead of as a great national asset.

As a result, we have had in the last 25 years a gradual reduction in the rainfall in the Mississippi Valley. For that reason I asked the commission in question to make a study to see if possible whether our system of flood control could have caused this lack of rain and lack of water supply. As a result, they made the chart I now show Senators, showing where our water supply comes from, and what becomes of that water supply.

On the chart it is shown here as coming from various sources. It comes from the rivers and the ocean and the lakes, as will be seen. Through evaporation it comes over the interior of the Mississippi Valley and falls in the form of rain. It is interesting to see where the commission has found how much goes to the ground and runs away in the run-off, carrying soil with it into the rivers and the lakes and the ocean, how much again evaporates and does not run away, how much can be restored to the soil, and how much goes into the ground storage which furnishes the supply to the lakes and the creeks, and partly joins in the final run-off. In the first illustration in the chart we have the supply in the clouds. We have it from the lakes, the rivers, and the ocean. That is the first source of supply. Then it goes out in the form of rain. Some of it goes on the grass

and in the trees. Again, instead of falling to the ground, it evaporates. A good deal of it, how much we do not know, evaporates in the process of falling and returns to the clouds. That does not touch the ground at all. Then another part of the rainfall soaks into the ground through the leaves.

If there are leaves and brush and roots of grass and trees, the flow-off will be checked, and the water is permitted to saturate the soil. Some goes back into the trees, and other parts of it goes to the roots of the trees and out through the tops and is again evaporated. That which is not saturated in the soil, which is not picked up and held by the soil in storage, is infiltrated into the subsoil and goes to the ground-water storage and into the discharge to be again run off, most of it, to the surface and in the rivers. It is estimated that if there be a normal storage under conditions of that kind, which preserves a state of nature, of natural storage—that is, the muskegs, the forests, the pot holes, swamps, the lakes, and the rivers—that under normal conditions in that part of the country the rain, coming in from the sea in the first place in the form of clouds, should drop and evaporate and drop again five times before finally it runs out. So if that is correct, it may to some extent be the explanation for the great areas of drought that we have in the interior part of the country.

Before this survey was taken the State of Minnesota decided, at public expense, to fill the ditches that had been dug in northern Minnesota in order to drain its swamps and its muskegs. It decided to fill them up and return the land to the fish, the muskrat, and the beaver. That, of course, will be incidental, but mainly for the purpose of storing the natural flow of water and holding it back until it can fulfill the function that nature intended it should.

Under our system of flood control it seems to me we have carried on a policy that is the same as though a man who found his kitchen floor flooded with water should make culverts and ditches to carry it away instead of going to the sink, shutting off the faucet, and holding it back until he needed it, until he could use it. So, as the result of that policy, we have found that our lakes have gone down, our rivers have dried up. Take, for instance, the Rum River in Minnesota, which used to carry log drives and on which steamboats used to run. Two years ago one could not paddle a birch-bark canoe or any other kind of a boat on the Rum River.

As an illustration of what the natural storage will do, let me say that on the farm on which I live there is a lake about 3 miles long and 2 miles across. It is the headwater of a long chain of lakes which finally supply water for the Chippewa River. With the coming of the drought the water level dropped until many of the lakes disappeared, but as for the lake in front of my house, one would not notice there had been a drought by looking at the water. Becoming curious about that, I had a geologist examine it in the effort to explain why that lake should remain filled when the water in all the other lakes had either half disappeared or was disappearing. He solved it very quickly. He found there was a tamarack swamp on the north shore of the lake that extended back in broken patches for a distance of 50 miles. I walked through a part of it myself; in many places the moss is that thick [indicating], and it does not make any difference how dry the summer is, one always will get his feet wet walking there, because there is no evaporation. There is a certain thickness on top that is dry, but underneath it is soggy with water. That swamp has fed that lake and kept it at practically the same level throughout the whole dry period we have experienced during the last 4 or 5 years. I think that, as an illustration, bears out the general thesis.

Mr. WALSH. Mr. President, will the Senator yield?

Mr. SHIPSTEAD. I yield.

Mr. WALSH. When I traveled through the Senator's State last summer I was very much impressed with the large number of lakes, the level of which had very substantially dropped. I should like to inquire whether that condition is of recent origin, or has the reduction in the level of these lakes gone on for a long period?

Mr. SHIPSTEAD. It has proceeded slowly but progressively faster. It has been going on for some years.

Mr. WALSH. But to a greater extent recently?

Mr. SHIPSTEAD. Yes; it has proceeded more rapidly during the last few years.

Mr. WALSH. Some lakes which were once used as pleasure resorts, and on the shores of which people built cottages and institutions were located, have practically passed out of sight.

Mr. SHIPSTEAD. That is true. That process has been going on for the past, I should say, 30 or 35 years, since drainage, deforestation, and cultivation became so intense.

Mr. WALSH. Has not the Senator's State given that problem a good deal of attention?

Mr. SHIPSTEAD. We have done so for several years. We are filling in the muskeg and the ditches and are trying to reverse the policy of drainage that was first sponsored and very energetically pursued in the effort to get rid of the water, to get the water out of the country so that the farmers could plow up the soil and raise crops. However, when they got rid of the water they found they did not raise such good crops.

Mr. WALSH. Is the Senator of the opinion that the cultivation of the soil is, in large part, responsible for the dropping of the water level in these lakes?

Mr. SHIPSTEAD. I think it is due to drainage, to deforestation, and to destruction of the natural reservoirs which Nature provided in lakes and sloughs and swamps and muskegs and forests. Take, for instance, the fact that the forests were denuded. The lumber companies would leave the slashings, which would become dry and constitute a fire hazard. They would burn, and in turn burn whatever topsoil there was, so that nothing would grow. Then there was nothing left to hold the water, and, as a consequence, erosion took place. The natural water storage has to a large extent been destroyed by the advancement of civilization. Every farmer who had a pot hole, every neighborhood that had what is called a slough, every community which might have a lake, thought that if they could drain that lake and get the water into the Mississippi—get rid of it, send it down to New Orleans—the farms would be improved. There was a period of several years when all a man who wanted to drain the swamps for 30 or 40 or 50 or 60 miles had to do was to go to a district judge and get an order, and the farmers would be helpless. On the farm which my brother occupied, a drainage ditch cost him some $2,000, and he told me many times since he would have been very much better off if he had given them $5,000 to let him alone, let him keep in their natural condition the land and meadows that he had before the ditch was dug. As a matter of fact, it practically ruined the farm. That is the history of drainage throughout Minnesota.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. SHIPSTEAD. I yield.

Mr. CLARK. Just along that line, there is one situation with which I am very familiar which is possibly the most acute flood-control situation in the United States. I refer to the St. Francis River, which parallels the Mississippi about 50 miles away for nearly 300 miles of longitude. Because of the drainage of water from the swamps and catch basins for agricultural purposes, which turned out not to be worth anything for agricultural purposes after being drained——

Mr. SHIPSTEAD. That is the usual case.

Mr. CLARK. The Army Engineers figure, I think, and certainly the other engineers figure, that the floods now go down in twice as great volume and three times as often as they did before the drainage of those catch basins, affecting seriously the agricultural possibilities of the whole region, but creating an intolerable condition for the rich productive agricultural lands of the lower St. Francis Basin.

Mr. SHIPSTEAD. If we can inaugurate a system or policy under the program established by this bill to hold back the waters and prolong the run-off over the summer instead of shooting that water down in the month of April into the Ohio Valley, the Tennessee Valley, the Missouri Valley, and in fact the entire Mississippi Valley, conditions will be vastly

improved. As it is the water is shot down to the lower Mississippi and nature cannot take care of it. I do not care how much money may be spent by the Federal Government for levees, in my opinion not enough money can be spent to take care of the floodwater if the policy we have followed shall be continued.

Mr. FLETCHER. May I inquire of the Senator with reference to the region of which he has been speaking, were the floods experienced there before the drainage took place, before the deforestation and the forest fires? I think fires have had a great deal to do with the situation, but before they occurred did the State suffer from floods?

Mr. SHIPSTEAD. I have lived there for 55 years. I had a meadow that used to be flooded to some extent in the spring, but the flood did no damage. I remember very well, though, that from the hillsides the soil would come down into the valley which left the tops of the hills bare of topsoil and ruined the hillsides.

Mr. President, an inquiry was made a while ago as to how long the water level had continued to fall in the section of the country to which I am referring. I do not know whether it is typical of the entire country, but for that section it is typical. Here [indicating] is a survey made to determine the drop of the water level. That line [indicating on chart], representing the top of the ground storage, is called the "water level." This chart deals with the western half of Minnesota and the eastern half of North Dakota, known as the Red River Valley, which is the most fertile valley in the world, with the possible exception of the Nile Valley. In former times the valley of this river was a lake bed. The land was rich, as it naturally would be, having formerly been a lake bed, and the topsoil was very heavy, but the land was very low, and if there was a heavy rain during the summer, much of the crop would be destroyed. So a very extensive system of drainage was inaugurated about, I should say, 35 or 40 years ago. Everybody wanted to get rid of the water. It was considered an enemy. Get it out of the country! Here [indicating] is shown the division of the flow of the water. From the south there is the Minnesota River running south and the Red River of the North running north.

The National Resources Board, at my request, made a survey to determine if there was any comparison or connection between the drop of the water level and the diminution in rainfall over a period of years. They learned there has been a great reduction in the water level; it has gradually gone down to the point where people have to lower their wells from time to time, going deeper and deeper, in order to get water for the stock and to supply their houses. In some places that normal water level has dropped as much as 30 feet from the former level, showing a gradual drainage, a gradual loss of the normal water storage in the soil, the supply, whatever did not run off, coming from the soil. On account of the drainage and the destruction of normal conditions causing a retardation of the flow, enough water could not come through the soil, but it ran off because of drainage ditches, and it could not come down. There was nothing on the surface to hold it; there were ditches to drain it off, so it did not penetrate or infiltrate the soil and form the natural ground storage of water. So last summer and the summer before, people had in some places to transport water; it was even sold for drinking purposes at so much a glass. The study is still continuing, but I thought their findings were so fair and so satisfactory that they were worth being called to the attention of the Senate and those Senators who have not seen it.

Here is a question of policy to be pursued. As I said, how far should this policy continue?

On the wall I have placed a map of the United States. The red dots show where the W. P. A., the P. W. A., and the E. R. A. conducted certain works for control of water on tributaries with the idea and view of conserving the soil. However, I am informed these projects were undertaken not where they were the most necessary, but where there was the most unemployment, not where they would be most effective, but wherever labor could be furnished at the capital cost figure which had been fixed by Mr. Hopkins. I think we should bear in mind that it was done especially for the purpose of giving employment, and the direct aim was not at all a comprehensive program of soil conservation to prevent erosion and to control floods.

I cannot anticipate that this kind of program will continue. There should be a comprehensive program, with a well-directed force at the head of it, for the entire country. Of course, it might be handled by various organizations and by the various States. Whether it should be under the Department of Agriculture, the Bureau of Forestry, or the Board of Engineers, I find it very difficult for me to decide. So far as flood control in the lower valley and the rivers and harbors, and control of navigation are concerned, I do not think it should by any means be taken out of the hands of the Board of Army Engineers.

Mr. President, I do not know that I have anything further to submit to the Senate at this time, except to say that I think the policy is intended to be a permanent policy, no matter in whose charge we place the responsibility. There is danger in putting it in the hands of the President, and that does not mean any reflection on the man who now occupies that office. Presidents come and go, but if we are to save the topsoil of the country and control the floods, we must have a permanent policy. Certainly it is of enough importance to be worthy of the most careful consideration by Congress when we come to determine who shall carry out the policy inaugurated in the bill.

I hope the bill will pass. I voted against the flood-control bill last year because I considered it was a "pork barrel" measure. I am not enough of an expert to determine whether the works on the lower Mississippi and the various rivers which have been sponsored by the Board of Army Engineers are effective or not, but the soil-erosion policy which is inaugurated here and the control of flood waters on tributaries in the great basins of the rivers of the country, I think, contemplate a policy which should have been adopted a century ago.

Mr. COPELAND. Mr. President, I desire to thank the Senator from Minnesota [Mr. SHIPSTEAD]. I think he has made one of the most illuminating and useful contributions to the knowledge of the Senate that I have listened to since I have been here. I think a notable addition to the valuable resources of the country was made in his presentation of the matter today.

Mr. DAVIS. Mr. President, I have listened with a great deal of interest to the remarks of the distinguished senior Senator from Minnesota [Mr. SHIPSTEAD.] Much that he has stated has been our experience in Pennsylvania.

Mr. President, I believe flood-protection projects should be accepted as a Federal responsibility. Those who assert that half of the burden should be carried by local agencies do not specify how these agencies can meet the responsibility. Take Pittsburgh as an example. While we have a few rich corporations and some handsome business buildings there, a general tax on all of the property owners of the city would work a tremendous hardship on the many without assessing the proportionate share of responsibility on those best able to sustain it.

Plans for local cooperation will further delay this necessary program, which should be started at once. The years may move on again without anything tangible accomplished, and each year may witness additional flood loss. The Federal Government, through its power to tax, can best meet this need and distribute the responsibility with greater equity than could be achieved through dependence on local agencies. The local units of government should play their part in administrative responsibility, but the machinery of tax collection requires the authority of the Central Government.

For these reasons, I shall support the amendment offered by the distinguished junior Senator from Mississippi [Mr. BILBO], although I had intended to offer an amendment of similar import.

Mr. President, the appropriation for flood-control projects in Pennsylvania is much less than our need for aid had led us to expect, and is conditioned in such a way as

to delay work at the present time, when work projects of a substantial nature are so greatly needed. I must confess I am disappointed that a larger sum to be used for a flood-protection program has not been designated in the tri-State valley area where the need is apparently the greatest.

In view of the relief appropriation legislation now pending in Congress, I am convinced that an allocation of the necessary sums for permanent flood-relief projects should be made a part of this appropriation and earmarked so that they would be available for administration by the Army Engineers. If such action is not now taken, I am confident the voters will make this an issue in the coming election, and will be justified in doing so. An administration which continues to seek appropriations for the Passamaquoddy moon-harnessing project and the Florida ship canal, over which there is divided opinion, when flood-control projects which have the unanimous endorsement of voters and taxpayers go begging, will be held strictly accountable on election day. Millions of dollars have been spent upon activities whose value is highly questionable, while the plans of Army Engineers for effective flood-control projects have been steadfastly ignored.

Mr. President, when these things can be said, and can be substantiated by documentary proofs which are matters of Government record, the ghastly fact is revealed that what happened along the raging rivers and their turbulent tributaries throughout the watersheds of Pennsylvania in March 1936 was not an unavoidable accident. It was, in reality, one of the worst instances of governmental neglect in American history, wherein a death toll of more than 200 men, women, and children was taken, and losses sustained, tangible and intangible, which in the aggregate will far exceed $500,000,000—all, or nearly all, of which could have been averted by the expenditures of but a small fraction of the sums which have been boondoggled away.

The Army Engineers in their official findings estimate that for a maximum construction cost of $35,175,700 plus an outside figure of $35,350,100 for land and damages—or an entire outlay of $70,525,800—every important community along the Susquehanna River and its tributaries and along the Allegheny and Monongahela Rivers and their tributaries—the two sections of the State where all the losses of life and property occurred—could have been put under the protection of completely planned flood control. These completed plans of the Army Engineers, dating back to 1932, include 9 reservoirs upon the principal tributaries of the Allegheny and Monongahela, including the Conemaugh, which almost destroyed Johnstown; and a system of levees and retarding dams to protect life and property in 19 cities and towns along the Susquehanna River and its tributaries. More than 80 percent of the total construction costs will go for the employment of labor, and of the balance only 5 percent will be necessary for administration, the remainder going for materials.

Mr. President, the report of the Pennsylvania Protective Union shows that in Pennsylvania there has been expended for relief purposes from September 1932 to April 1, 1936, a total of $742,794,490. This is 10 times the amount required to give Pennsylvania and a large part of the Nation adequate flood control. The Works Progress Administration alone, according to this report, has spent as much as the $70,000,000 requisite for this vital need of our people.

Mr. President, I am not unaware of the fact that before W. P. A. had been operating a month in Pennsylvania more than $5,000,000 had been allotted for this type of work—much of it wholly unnecessary, and a great deal of it indefensible waste. After the floods had wrought their havoc of death and destruction, Administrator Hopkins announced that he could immediately put 250,000 men into the work of repairing the damage. When General Hagood protested the waste of Federal funds in this way, he was made to feel the displeasure of the administration.

So far as Pennsylvania is concerned, the issue now uppermost in the minds of the people is sharply defined. The question arises whether the administration believes that the people of the heavily populated area of the industrial East will be content with gestures of flood relief at a time when permanent flood-control projects are ignored. The people of this area are thoroughly flood-control conscious, and will not be satisfied with flood-relief measures when all evidence points indisputably to the urgent need for flood control.

There is pressing need of getting these flood-relief projects under way as soon as possible. The annual loss through floods in western Pennsylvania and the upper Ohio, due to the fact that there has not been adequate flood control, makes it unwise to delay this matter further. The loss suffered in Pittsburgh alone this spring would exceed many times over the amount which is now being appropriated for flood control for the entire Nation.

The conservation of river water for industrial purposes is equally as important as flood control in western Pennsylvania. Some people have too much water and some not enough, and yet we are rapidly getting together on the question of proper distribution for the welfare of all. The Pymatuning Dam at Greenville, Pa., proved this spring that its broad surfaces could serve the double purpose of holding back the water in floodtime and distributing it according to need in other seasons. This dam almost paid for itself in a single season through the protection it offered this spring. I deeply regret that an auxiliary dam has not been provided above Sharpsville. I trust that next year the recommendations of the Army Engineers will include this worthy project.

Mr. President, I wish to emphasize the benefit which will extend to far-reaching adjacent areas through flood-control reservoirs and levees on the upper Ohio and its tributaries. I believe it is the consensus of opinion that this is a strategic point of great need not only at which to combat local flood conditions but also to interpose flood protection for large areas to the south. Although we have now become flood-conscious as a nation, due to recent catastrophes, we should realize that the average loss year by year is greater than will be met by the appropriation this year for flood-control projects for the Nation as a whole. Moreover, the appropriations now made will not be entirely spent within a year, but will be made to extend over a considerable period of time. We cannot afford to continue to suffer this average annual flood loss.

I am confident that a study of the reports of the Army Engineers, together with studies prepared by the Mississippi Valley Committee of the Public Work Administration and the Water Planning Commission of the National Resources Board and the Flood Commission of Pittsburgh, will show that there is indisputable need for flood-control projects, reservoirs, and levees on the upper Ohio, the Monongahela, the Allegheny, and the Susquehanna Rivers. These are outstanding needs, and there is no longer sufficient reason for delaying protective measures for this densely populated section of the Nation.

Mr. President, I ask that the statement made by me before the Senate Commerce Committee on this subject on March 25 be inserted in the RECORD as a part of my remarks.

The PRESIDING OFFICER (Mr. POPE in the chair). Without objection, it is so ordered.

The statement is as follows:

In addition to these reservoirs I wish to join with my colleague in asking immediate consideration of Senate bill 4331, calling for appropriations for the construction of levees on the Susquehanna River at a number of places, including Harrisburg, York, Williamsport, Lock Haven, Plymouth, Wilkes-Barre, and other cities where levees are greatly needed. Their location and cost are specified in the bill.

The Pittsburgh Flood Commission has estimated that tangible benefits more than exceed dollar for dollar the cost of construction and that, if intangible benefits are included, the social and economic returns are double the cost of this construction. To this should be added the necessity of giving employment to thousands of workers living in this area. If the work is to be accomplished at a maximum of efficiency, standard rates of wages should be paid. This is a point which is very important in the face of our present need to build up purchasing power in the hands of the workers.

It is unthinkable that in the face of these conditions Congress should refuse to take adequate measures for the protection of the life and property of our citizens. Construction of reservoirs and levees have proven to be successful in coping with these problems. The only alternative to flood control as suggested would

be for the Government to buy up the land adjoining the uncontrolled rivers, move the present residents to higher land, and abandon the flood areas to the mercy of the angry waters. If this method is adopted, it will prove far more costly than to follow the dictates of science and common sense and build the needed reservoirs and levees.

I can think of no better use which the Government can make of taxpayers' money than to use it in the construction of permanent flood-control projects, which assure flood protection to the entire Nation and promise to provide work for thousands of the unemployed at standard rates of wages when they are so desperately in need of work.

Mr. RUSSELL. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Connally	Keyes	Pittman
Ashurst	Copeland	King	Pope
Bachman	Couzens	La Follette	Robinson
Bailey	Davis	Lewis	Russell
Barbour	Dieterich	Logan	Schwellenbach
Barkley	Donahey	Lonergan	Sheppard
Benson	Fletcher	Long	Shipstead
Bilbo	Frazier	McAdoo	Smith
Black	George	McGill	Steiwer
Bone	Gerry	McNary	Thomas, Okla.
Borah	Gibson	Maloney	Townsend
Brown	Glass	Metcalf	Truman
Bulkley	Guffey	Moore	Vandenberg
Bulow	Hale	Murphy	Van Nuys
Burke	Harrison	Murray	Wagner
Byrd	Hastings	Neely	Walsh
Capper	Hatch	Norris	Wheeler
Caraway	Hayden	Nye	White
Chavez	Holt	O'Mahoney	
Clark	Johnson	Overton	

The PRESIDING OFFICER. Seventy-eight Senators having answered to their names, a quorum is present.

Mr. COPELAND. Mr. President, it seems to me that if we had needed any argument in favor of this amendment, the speech made by the Senator from Minnesota [Mr. SHIPSTEAD] would be ample reason to leave the priority to the President.

There is not in this body any warmer friend of the Army Engineers than am I; but we have in this bill, if we include soil erosion and the examination of the various affairs related to flood control, a greater problem than flood control alone. It becomes a problem which ought to be dealt with comprehensively and in all its parts. Therefore, I hope the amendment suggested by the Senator from Missouri [Mr. CLARK] will fail.

Mr. CLARK. Mr. President, I do not desire to detain the Senate before a vote; but let me say that the proposal embodied in the comprehensive amendment offered by the Senator from Arizona [Mr. HAYDEN] to the flood-control bill amounts to the same thing as if a man should come along and see a house burning down, and say, "Well, I will retire and get up a comprehensive scheme for preventing fires in the future. Of course your house may have to burn down; but after I have taken the matter under consideration I shall be prepared, in a year or 5 years or 10 years, to bring in a scheme for preventing such fires in the future."

Mr. President, the object of a flood-control bill is to take care of a situation where floods constantly and persistently recur. To divert the authority for determining priority away from the Army Engineers, who have had years of experience with it, to a new and unknown and untried board for the purpose of setting up a coordination with soil erosion and reforestation, objectives with which I am very much in sympathy, is simply to postpone action on an emergency matter, a known flood situation, and relegate it to the limbo of an ultimate report from some unknown committee.

I believe if we are to have any justification for the bill at all that the determination of priority should be in the hands of the body which has always been familiar with that situation rather than with an unknown body. I particularly warn my friends on this floor from sections of the country where there is a permanent flood menace against the adoption of an amendment which, it is my prediction, will mean the expenditure of the $50,000,000 actually authorized in the bill only in the Susquehanna Valley in New York and in Pennsylvania.

Mr. NORRIS. Mr. President, I desire to make an inquiry about the parliamentary situation before I proceed. Has the Senator from Missouri offered an amendment to the amendment offered by the committee?

The PRESIDING OFFICER. The Senator from Missouri has offered an amendment to strike out certain words in lines 8 and 9 of page 1 of the committee amendment.

Mr. NORRIS. I desire to inquire whether that is not an amendment in the third degree. Is not the committee amendment already an amendment to an amendment?

The PRESIDING OFFICER. The Chair is advised by the parliamentarian that under rule XVIII the amendment of the Senator from Missouri is not an amendment in the third degree.

Mr. NORRIS. I would not care to enforce the rule, even if it were an amendment in the third degree, because I am perfectly willing to take it as it stands; but I was of the opinion that technically the amendment of the Senator from Missouri was not in order at this time.

Mr. President, I believe no Senator has a greater respect for the Army Engineers than have I, and the fact that I favor the amendment offered by the committee I do not want under any circumstances to be taken as an indication that I have any idea of casting any reflection upon the Army Engineers or their ability.

I am considerably disappointed in the pending bill. I was under the impression we were to have a bill before us that would be an emergency measure, that we would not try to legislate on the general subject of flood control until there was available more information, which we could not possibly get at this session of Congress, and that we would content ourselves at this session by taking care of only the emergency situation.

Before the bill passes I expect to have something further to say on that subject, but at the present time I mention it only because the Senate is conscious, as I think the country is conscious, of the fact that flood control is not only a national problem but that Congress should consider all of the various navigation and flood-control questions as part of one great problem affecting the entire country. This brings me to the pending amendment.

We have already agreed to an amendment providing that soil erosion and certain other activities shall be considered by the Department of Agriculture and shall be under the domain of the Department of Agriculture. The President now has all sorts of committees at work, which have been at work for a year or two, in a study of erosion, forest control, and all sorts of integrated questions which apply to all the streams of the United States, navigable and unnavigable.

That is a wonderful undertaking, which in its scope goes further than the imagination will carry one. Yet I believe that the country realizes, as we realize, that we must study the flood-control question with all those things in view, having in mind dams built on the small tributaries of the streams of the country, all sorts of methods and means to be used to hold back the water, whether they are immediately in the vicinity of a large stream or not, because eventually all the water gets into the larger streams, the main streams, and so far as flood damage is concerned the damage occurs not altogether but mostly along the larger streams.

But the damage, so far as erosion is concerned, so far as forest control is concerned, occurs away back from the main stream. The proper utilization of the soil in some places, particularly in the semiarid sections of the country, and also where there is too much rain, the proper planting of the right kind of crops, grasses, trees, shrubs—all these things have their integrated place in a study of the great question of flood control, which affects the entire United States. Committees appointed by the President, to which he has allocated certain funds which we appropriated to him, are proceeding now to study these problems all over the country.

The Army Engineers are experts in their line, and we have an efficient corp of Army Engineers. They know how to build a dam. To some extent the other questions have been

placed in their hands, though not all of them have been. The Army Engineers are doing a great work.

All the improvements cannot be made at once, and when the time comes for a decision as to whether a particular improvement should be made this year or this month, the Army Engineers would look at the conditions through their own eyes. If the other students of the question, studying erosion away back in the country, trying to find what kind of grasses or shrubs or trees should be planted, and what kind of miniature dams should be constructed to control a stream which may be a stream only immediately after a heavy rainfall, pass on the question as to where the money should be spent, what dams should be built, they might reach a different conclusion from that of the Army Engineers.

The Department of Agriculture, proceeding under the present law, and under the amendment we have already adopted to the bill, would have a different viewpoint possibly. I have listened with a great deal of interest to the two Senators from Kentucky today seeking the construction of a particular project. They described it. In my mind's eye I could see just what it was. I have personally investigated many such projects.

A flood might occur tomorrow, or this afternoon, which would wipe a city or a town or a beautiful, fertile valley out of existence, a condition which probably could be obviated by the application of some of the funds appropriated by the pending bill to preventive measures that would hold back flood waters and thus save the town or the city or the rural settlement. If the men engaged in the study of that problem had to pass on the question of priority between projects they might reach a different conclusion from that reached by the Department of Agriculture.

Somebody has to pass on the question of priority. It does not have to be an engineer, as I see it, but the one passing on it must have a broad mind. He must have in view the general scope of the United States. He must have knowledge of what we are trying to do—something which it will take a hundred years to complete, knowing that we have to go slowly on account of lack of funds; that we cannot do it all at once or in 1 year or in 10 years. It is not necessary for the one charged with responsibility to have technical knowledge, to know how to construct a dam on the Mississippi River. He may not have such technical knowledge. He must, however, have a broad mind. He must be able to see the picture of the future and the damage which is likely to come tomorrow or the next day.

Someone must decide which course shall be pursued tomorrow in order to use the appropriation that may be available this year. Although I do not question the honesty or the ability of those in the bureaus or investigating committees, I believe it would not be fair to let one of the bureaus or one of the large number of investigating committees decide between two conflicting projects, both of which might be meritorious. It seems to me the decision should rest with some one outside any of the bureaus. It should rest with some head. Therefore it seems to me the amendment which proposes to submit such questions of dispute to the President is the best solution of this problem.

The President is too busy to look over the projects personally. He will not be able to make a personal physical examination of them. He will, however, select men in whom he has confidence to give him the general picture and to give him specific information. Having in his mind the general scope and a picture of what can best be done with the $50,000,000 which is to be divided up among these projects, he will get all possible information concerning them. He will undoubtedly consult the Army Engineers. They probably will be the first men with whom he will discuss the matter.

The President will consult the experts in the Department of Agriculture. He will consult the local agencies which have lived with these conditions for 40 years, right in the places where damage has occurred, where there has been a washing away of soil for many years. I personally know of certain places on some of the rivers in the United States where another flood would wipe out a town which is 40 or 50 years old. A flood may not come soon. It may be another 50 years before another serious flood will come. Of course, it may never come. However, it may come tomorrow. God only knows if and when it will come. The only thing to do is to be ready when it shall come with as many completed projects as possible.

If a dam be constructed on one of the rivers in whose watershed is the best alluvial soil in the world, it will be only a few years, speaking in an historical sense—perhaps a hundred, perhaps 200, perhaps only 50 years—until that reservoir will be filled with silt. Many of our great dams are now filling up. The history of civilization tells us of many such dams, constructed years ago, which were eventually filled up with silt that came down from the fertile plains, that washed into the river, and was held there by the dam. I do not mean to say that the construction of such a dam was a mistake. I do not wish to say that by any means. The construction of the dam was necessary. But in connection with it, to preserve the reservoir, to continue its benefits for the saving of the soil, it was necessary to construct hundreds of other dams, to provide for the planting of trees and shrubs and grasses, and to see that they were protected when they were planted; to build miniature dams, as it were. So it all works out as one perfected whole when the work is completed.

I think the man to decide that problem, the man who is best equipped to obtain the essential information, is the President of the United States. Not often will any controversy arise. Probably not once in 50 times will there be a disagreement. There will not be sufficient interference to be noticed with the work of the Army Engineers or with that of the other experts. When they get together, they can reach their own conclusions. In most cases there will be no dispute to go to the President.

The problem will work itself out. However, in case there is a dispute, someone ought to be at the head to decide the question. There should be at the head some unprejudiced official, some official with a broad view as to just what we are trying to accomplish by flood control in America. It is necessary that it be so.

Mr. President, there are countries in the world which are now desert but which once were fertile. Although in many of those countries large dams were constructed, the construction of little dams was not considered. Attention was not given to erosion. The people continued to cut the trees, and they continued to cultivate soil which never should have been touched with a plow. In many cases they overpastured the grasses that grew according to nature's command, and left them in such shape that erosion occurred and the soil was carried away. All those questions are involved in this matter.

While I do not agree with some Senators as to the importance of the pending amendment as a practical proposition, yet I believe it will add to the general conception of the viewpoint which I think all of us should have when we come to legislate on this question, one of the greatest questions that confronts us now or which ever will confront us.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Missouri [Mr. CLARK] to the amendment of the committee.

Mr. COPELAND. If no other Senator cares to speak on the amendment, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Burke	George	La Follette
Ashurst	Byrd	Gerry	Lewis
Bachman	Capper	Gibson	Logan
Bailey	Caraway	Glass	Lonergan
Barbour	Chavez	Guffey	Long
Barkley	Clark	Hale	McAdoo
Benson	Connally	Harrison	McGill
Bilbo	Copeland	Hastings	McNary
Black	Couzens	Hatch	Maloney
Bone	Davis	Hayden	Metcalf
Borah	Dieterich	Holt	Moore
Brown	Donahey	Johnson	Murphy
Bulkley	Fletcher	Keyes	Murray
Bulow	Frazier	King	Neely

Norris	Robinson	Steiwer	Wagner
Nye	Russell	Thomas, Okla.	Walsh
O'Mahoney	Schwellenbach	Townsend	Wheeler
Overton	Sheppard	Truman	White
Pittman	Shipstead	Vandenberg	
Pope	Smith	Van Nuys	

The PRESIDING OFFICER. Seventy-eight Senators have answered to their names. A quorum is present.

Mr. COPELAND. Mr. President, the question on which the Senate is about to vote is the proposal of the Senator from Missouri [Mr. CLARK] to strike from committee amendment no. 2 the words, on lines 8 and 9, "as may be designated by the President."

The purpose of the committee amendment is to permit the President to determine priority. The purpose of the Senator from Missouri in moving to strike out the words mentioned is to leave decision with the Board of Army Engineers as at present.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Missouri [Mr. CLARK] to the amendment reported by the committee.

Mr. CLARK. On that question I ask for the yeas and nays.

The yeas and nays were ordered, and the roll was called.

Mr. BILBO. I have a pair with the Senator from Iowa [Mr. DICKINSON]. I am not advised as to how he would vote if present. I, therefore, transfer that pair to the Senator from Alabama [Mr. BANKHEAD] and vote "yea."

Mr. BULKLEY. I have a general pair with the senior Senator from Wyoming [Mr. CAREY], who is absent from the city on official business. Not knowing how he would vote, I transfer my pair with him to the junior Senator from Utah [Mr. THOMAS] and vote "yea."

Mr. ROBINSON. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. MCCARRAN] are detained from the Senate on account of illness.

The Senator from North Carolina [Mr. REYNOLDS] is detained on account of a death in his family.

The Senator from Arizona [Mr. ASHURST], the Senator from Nebraska [Mr. BURKE], the Senator from California [Mr. MCADOO], and the Senator from South Carolina [Mr. SMITH] are attending committee meetings.

The Senator from South Carolina [Mr. BYRNES], the Senator from Oklahoma [Mr. GORE], the Senator from Illinois [Mr. LEWIS], the Senator from Tennessee [Mr. MCKELLAR], and the Senators from Maryland [Mr. RADCLIFFE and Mr. TYDINGS] are unavoidably detained.

The Senator from Massachusetts [Mr. COOLIDGE], the Senator from Wisconsin [Mr. DUFFY], the Senator from Indiana [Mr. MINTON], and the Senator from Utah [Mr. THOMAS] are absent on official duty as members of the Board of Visitors to the United States Military Academy at West Point.

Mr. MCNARY. I announce the following general pairs:

The Senator from Delaware [Mr. TOWNSEND] with the Senator from Tennessee [Mr. MCKELLAR];

The Senator from Vermont [Mr. AUSTIN] with the Senator from South Carolina [Mr. BYRNES]; and

The Senator from Maine [Mr. WHITE] with the Senator from Maryland [Mr. RADCLIFFE].

The Senator from Delaware [Mr. TOWNSEND], the Senator from Maine [Mr. WHITE], the Senator from Vermont [Mr. AUSTIN], and the Senator from Wyoming [Mr. CAREY] are detained from the Senate on official business.

The result was announced—yeas 31, nays 40, as follows:

YEAS—31

Bachman	Couzens	Hastings	Nye
Barbour	Davis	Johnson	Shipstead
Bilbo	Donahey	Keyes	Steiwer
Borah	Frazier	King	Truman
Bulkley	Gerry	Lonergan	Vandenberg
Byrd	Gibson	McNary	Van Nuys
Capper	Glass	Metcalf	Walsh
Clark	Hale	Murphy	

NAYS—40

Adams	Bone	Connally	Guffey
Bailey	Brown	Copeland	Harrison
Barkley	Bulow	Dieterich	Hatch
Benson	Caraway	Fletcher	Hayden
Black	Chavez	George	Holt
La Follette	Moore	Overton	Schwellenbach
Logan	Murray	Pittman	Sheppard
Long	Neely	Pope	Thomas, Okla.
McGill	Norris	Robinson	Wagner
Maloney	O'Mahoney	Russell	Wheeler

NOT VOTING—24

Ashurst	Coolidge	McAdoo	Reynolds
Austin	Costigan	McCarran	Smith
Bankhead	Dickinson	McKellar	Thomas, Utah
Burke	Duffy	Minton	Townsend
Byrnes	Gore	Norbeck	Tydings
Carey	Lewis	Radcliffe	White

So Mr. CLARK's amendment to the amendment of the committee was rejected.

Mr. COPELAND obtained the floor.

Mr. BARKLEY. Mr. President, will the Senator from New York yield to me for a moment, as I am obliged to return to the Finance Committee?

Mr. COPELAND. I yield.

Mr. BARKLEY. On page 110, line 10, in the committee amendment the language of the bill is:

Salyersville River, Magoffin County, Ky.

It should read:

Licking River, near Salyersville, Magoffin County, Ky.

I ask that that amendment be adopted.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Kentucky to the amendment reported by the committee.

The amendment to the amendment was agreed to.

Mr. CLARK. Mr. President, will the Senator from New York yield to me, because I have to go back to the Finance Committee?

Mr. COPELAND. I yield.

Mr. CLARK. I do not desire to detain the Senate by asking for another roll call on the principle of the amendment. I think the question has been determined by the last record vote. I do desire, however, to say for the RECORD that I hope that Members of the Senate from the States which are actively, year after year, concerned with the problem of floods, having cast the votes which they have cast on the last roll call and determined by their own act to put the matter absolutely in the hands and the discretion of the President, will not go back to their States and express surprise when their States do not get any money for flood control from the passage of this bill.

I predict again, Mr. President, as I did a while ago, that the great bulk of the $50,000,000, the limitation authorized by this bill, will be expended in New York and Pennsylvania, and that the States and localities that year after year and sometimes two or three times a year face a very vital and desperate flood-control problem, will get little or nothing as a result of the passage of this measure.

Mr. KING. Mr. President, I am compelled to return to the Committee on Finance which is considering the tax bill. I shall have no opportunity, as I had hoped, to discuss this bill. I rise only for the purpose of stating that I am opposed to the bill, and if I were present I should vote against it. I am opposed also to amendment numbered 6, creating a National Resources Board. I have not time to elaborate the reasons for my opposition to that amendment any more than I have time to elaborate my objections to the bill. As it is, I can only say——

Mr. COPELAND. Mr. President, will the Senator yield for a moment?

Mr. KING. Yes.

Mr. COPELAND. If the Senator wishes to speak on title II, I desire to suggest that there are a number of members of the Finance Committee who are interested, as is the Senator, in that title, and we have a good deal to do yet before we reach title II. I think it is safe to say, if it is agreeable to the leaders, that so far as title II is concerned, we might let it go over until tomorrow. Would that please the Senator?

Mr. KING. That will be entirely agreeable to me.

Mr. COPELAND. Mr. President, the Senator from Montana [Mr. WHEELER] is obliged to leave the Chamber. He desires to offer an amendment at this time; and because of

the necessity for him to leave, I am willing that his amendment may be now considered. I should not like to interfere with the orderly process of the passage of the bill, but the Senator has obligations about which he has told me, and I am willing to have his amendment presented at this time.

The VICE PRESIDENT. An amendment to the committee amendment is now pending which has not been disposed of.

Mr. COPELAND. Very well; let us first dispose of that.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from New York to the amendment of the committee on page 57.

The amendment to the amendment was agreed to.

Mr. WHEELER. I offer the amendment which I send to the desk and to which the Senator from New York referred a moment ago.

The VICE PRESIDENT. The amendment will be stated.

The LEGISLATIVE CLERK. It is proposed to insert at the proper place in the bill the following:

Big Horn River, Mont.: For construction of works on the Big Horn River about 36 miles southwest of Hardin, in Big Horn County, Mont., for flood control, $15,000,000.

Mr. WHEELER. Mr. President, this project has been urged for many years in connection with flood control on the Missouri and Mississippi Rivers. The Army Engineers have made a study of its purpose, which is silt control. The Mississippi Valley Association, which is interested in flood control on the Mississippi River, and the Missouri River Valley Association, which is interested in flood control and navigation on the upper Missouri River, have both gone on record definitely for a long period of time in favor of the amendment.

According to the report of the Engineers, the dam would be 550 feet high and would impound 1,500,000 acre-feet of water. No valuable land would be flooded. The land which would be flooded by reason of the construction of the dam is all either Government owned or a part of the Indian lands in the State. The water could be used to irrigate 300,000 acres of land, but I am not asking for that. Of the land in question 138,000 acres would be on the Crow Reservation. There would be no delay in the construction of the dam because the Army Engineers have already investigated the project and know all that is to be known with reference to where the dam should be located and constructed.

Mr. McNARY. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Oregon?

Mr. WHEELER. I yield.

Mr. McNARY. Has the preliminary survey heretofore authorized by Congress been made by the engineers?

Mr. WHEELER. My understanding is that the preliminary survey has been made by the Army Engineers.

Mr. McNARY. Was the report favorable as made by the district and regional engineers, and does the project now have the sanction of the Board of Army Engineers?

Mr. WHEELER. In this particular bill?

Mr. McNARY. Yes.

Mr. WHEELER. No. I am frank to say they have not recommended that it be included in this bill.

Mr. McNARY. The report, then, can be construed as being adverse to the project?

Mr. WHEELER. I do not think it could be construed as being adverse to the project, because the Army Engineers have pointed out its value with reference to the control of silt and likewise its value in flood control on the upper Missouri and Mississippi Rivers.

Mr. McNARY. I do not want the Senator to assume that I am opposing the project. I am asking for information. The first step always is authorization by the Congress of a preliminary survey. That is made by the district engineers. The matter then goes to the regional engineers and from there to the Board of Army Engineers. Those projects which were acceptable to the Board of Army Engineers have been placed in the pending bill. What I should like to know is how far the project has gone with respect to surveys and reports of the engineers?

Mr. WHEELER. In the report which was made is a letter from the Secretary transmitting, pursuant to section 1 of the Rivers and Harbors Act of January 21, 1927, and section 10 of the Flood Control Act, approved May 15, 1928, a letter from the Chief of Engineers of the Army dated February 9, 1934, submitting a report. He speaks of the investigation which has been made with reference to this project and the control of silt and flood control.

Mr. McNARY. The Senator has the record before him. Did the district engineers who made the survey report favorably to the regional engineers?

Mr. WHEELER. I do not think they reported either favorably or unfavorably.

Mr. McNARY. Then, there has not been any report in any of the preliminary phases with respect to any survey that has been made, has there?

Mr. WHEELER. A report was submitted of the investigation which was made, but I find nothing in the report which either suggests that the dam be built or that it be not built. The engineers simply point out from an engineering standpoint exactly what its features would be.

Mr. McNARY. To whose report does the Senator refer?

Mr. WHEELER. I am referring to a report of the Army Engineers contained in House Document No. 256, containing a letter from the Secretary of War.

Mr. McNARY. What do the engineers say about the project?

Mr. WHEELER. I am going to call attention to that in just a moment.

Mr. O'MAHONEY. Mr. President——

The VICE PRESIDENT. Does the Senator from Montana yield to the Senator from Wyoming?

Mr. WHEELER. I yield.

Mr. O'MAHONEY. May I ask whether the project involves any land in the State of Wyoming?

Mr. WHEELER. It involves some land in the State of Wyoming, back of the dam. As I understand from the report which I have read, it involves the flooding of no land except public lands and Indian lands. The late Senator Kendrick, of Wyoming, always endorsed this particular project and favored it in correspondence and other recommendations which have been made.

Mr. O'MAHONEY. A report was recently made to me that if the dam contemplated were constructed, it might result in flooding lands which are now occupied by a town. I have not had an opportunity to look into that matter. I should like to do so before the Senator calls for a vote on his amendment.

Mr. WHEELER. All the information I have is to the contrary. One of the engineers making report on the project states that it would not flood any lands, except public lands and some Indian lands.

Mr. O'MAHONEY. Doubtless the engineers' report would indicate what land would be covered by the lake, so it would be a simple matter to determine. I shall make an investigation immediately. In the meantime I hope the Senator will not ask for a vote until I get that information.

Mr. COPELAND. Mr. President, will the Senator from Montana yield?

Mr. WHEELER. Certainly.

Mr. COPELAND. Perhaps when the Senator from Montana concludes I can give all the information the Senator from Wyoming needs to enable him to vote intelligently.

Mr. O'MAHONEY. I have no doubt the Senator can do so.

Mr. WHEELER. Mr. President, I desire to call attention to a letter which was addressed to the Secretary of the Interior, attention of Colonel Waite, by A. W. Koch, who was the chief engineer for the Big Horn Canyon organization. It is in part as follows:

DEAR SIR: I wish to call your attention to a few facts about the proposed Big Horn Canyon project of Montana.

It seems that two proposals have been studied, one for a dam 410 feet high and one 465 feet high, which were to develop 582,000 and 830,000 acre-feet storage, respectively. These correspond to water levels, reservoir full, of 3,570 and 3,710, and will require dams 440 and 480 feet high, respectively, instead of the heights indicated, to

allow 15-foot freeboard (i. e., the distance the dam will project above water level with reservoir full).

If the study had been continued to include a dam 550 feet high corresponding to water level of 3,680, reservoir full, the storage would be 1,700,000 acre-feet.

Mr. Koch speaks of the location; and I wish to call attention particularly to what he says with respect to silting. He says:

As previously stated, the reservoir created by a dam 550 feet high would hold the silt of the Big Horn River for a period of 40 years without impairing its efficiency in controlling the discharge of the river completely, based on the average for the years 1904 to 1915, inclusive. There is no good reason why this period of 100-percent flood control cannot be extended much longer if desired. It is quite possible to dredge the reservoir or sluice it out through the dam and onto the benchlands below. The cost of dredging would evidently be higher than the costs of dredging on the lower Mississippi; but the quantities to be dredged would likewise be perhaps less than one-third of what the floods of the Big Horn cause to be precipitated into the lower Mississippi if left uncontrolled. Besides, it would be worth while to consider the damage these periodic floods cause along the 3,000 miles of river channels between the canyon of the Big Horn and the lower Mississippi.

It has been recognized for many years that one of the chief causes of the floods, not only in the Yellowstone River below the Big Horn but likewise in the upper Missouri and Mississippi Rivers, was the silt coming down from the Big Horn River and lodging in these particular rivers. Only a few years ago a very serious flood occurred near Forsyth, Mont., and Miles City, Mont., and all through that section along the Yellowstone.

As a matter of fact, the only reason why there is flood-control agitation in the East is because a flood recently occurred here. I presume Congress will not again take cognizance of the situation which exists on this particular river and on the upper Missouri River and the upper Mississippi River until another flood takes place in that particular area; but it seems to me the time to correct the situation is before the flood takes place, and not afterward.

If we really seriously desire to prevent floods along the upper Missouri and along parts of the Mississippi River, the way to do it is to build dams back in the mountain areas to control the floodwaters in that particular section. Every engineer who has ever studied the situation in that section of the country has contended that the best way to control the floods in parts of the Missouri River and parts of the Mississippi River is by building dams in these areas.

I have been perfectly amazed to find that in this bill no attention whatever has been paid to flood control of the tributaries of the Missouri River. As most persons know, the Missouri River, which is the largest branch of the Mississippi River, is made up of the Gallatin and Jefferson and Madison Rivers, which originate in Yellowstone Park and in a section of Montana. Then there comes in the Big Horn River, which flows into the Yellowstone River and finally joints another tributary of the Missouri River, making what is known as the upper Missouri River.

In the spring of the year the melting snows come down from these mountains and cause floods. They not only cause floods in the upper Missouri but they likewise cause floods in the Yellowstone Valley area. There are irrigation projects along the Yellowstone River which have been repeatedly destroyed, and had to be rebuilt, by reason of the flood waters coming down from the Big Horn River. That is the reason why the Mississippi Valley Association and the Missouri Valley Association have repeatedly gone on record in favor of this particular project.

Looking at the question from the silt-control standpoint alone, every year the Mississippi River and the Missouri River have to be dredged, at large expense to the Government of the United States. Some of the engineers who have worked on this project have estimated that the cost of building this dam will be saved simply because it will obviate the necessity of dredging the silt that comes down from the Big Horn River.

In addition to that, while I have made no provision for it in the amendment, there are in the neighborhood of 138,000 acres of land in the Crow Indian Reservation. We are constantly appropriating money to help these Indians become self-supporting. If this dam should be built, the whole Crow Reservation could be irrigated at practically no expense, and then those particular Indians would become self-supporting. I mention that only as an incidental matter.

It has been shown that power can be developed at this particular project; and the statement has been made, which is true, that at the present time there is not any demand for the power. I am not urging the construction of this dam as a power project; however, I am urging it as a flood-control project, and solely as a flood-control project.

The engineer who worked upon this project said:

It will completely control the floodwaters and the silt of the Big Horn River, which furnishes at times 36 percent of the silt entering the Mississippi from the Missouri River.

The engineers estimate that 36 percent of the silt going from the Missouri River into the Mississippi River comes from the Big Horn Canyon. If we wish to pass a flood-control bill that is really going to be of benefit to the Missouri River, if we wish to pass legislation that is going to be of benefit to the Mississippi River, if we desire to refrain from having constantly to dredge out those rivers, if we wish to stop soil erosion along the Missouri River and help navigation along the Missouri River, here is an opportunity to do it at a cost of approximately $15,000,000.

I appreciate the fact that the Army Engineers have not recommended the project. Why they have not recommended it I do not know, because I do know that they found the figures with reference to silt to be substantially as I said. The only adverse statement which has been made by them, so far as I know, is that it is principally a power project, and that a power project should not be put in at this time because there is not a market for the power.

I am not asking for the construction of the dam as a power project. I am not at all interested in it from that standpoint. I am interested in it from the standpoint of saving the Government of the United States money with reference to flood control, and for the purpose of protecting the residents of Forsyth, Mont., and all down the Yellowstone River, from the floods which they now have every few years.

Nothing has been done to prevent floods in that area. As I say, the town of Forsyth was under water just a few years ago. Serious damage has been done to these irrigation projects, but not a single thing has been done by way of prevention. The only reason why we are doing anything with reference to flood control in the eastern part of the United States and elsewhere is because a big flood occurred here. Apparently we are going to wait until we have another great flood along the upper Missouri before we do anything substantial along the line of flood prevention in that area. If there had been a flood out there which had washed away a lot of property within recent times, I presume there would not have been any hesitation at all about including this project in the bill at the present time, but nothing has been done about it.

I read from a memorandum furnished me by a competent engineer:

On page 165 of House Document No. 256, above mentioned, there appears the information that the average silt content of the Big Horn River passing Hardin, Mont., has been found by careful analysis to be 21,200,000 tons per annum, or 19,400 acre-feet. This 21,200,000 tons of silt (19,400 acre-feet) would have sufficient bulk to form a bar 400 feet wide, 1 foot deep, and 400 miles long.

This silt follows the course of the Big Horn River to its junction with the Yellowstone, thence to the Missouri, and on to the Mississippi. En route it may form bars, banks, or drifts, and a portion of it may enter irrigation works or other improvements along the streams; a menace, an aggrevation, and a damage. It is always present once it has entered the stream until it has been disposed of or has passed into the Gulf of Mexico.

Another serious consequence of this silting is the building up of stream channels and particularly that of the (slower velocity) Mississippi River. This constant action materially decreases the available depth of flood channels and tends to minimize the effect of levee construction, materially increasing flood hazards. This action is continuous, and over a period of years the result is tremendous.

Direct removal of silt from the stream bed requires machinery, power, and a place for its disposal. A conservative estimate for this expense is at least 10 cents per ton. To remove the entire

21,200,000 tons would cost annually at least $2,120,000, a sum twice as great as that required to prevent its continuous movement downstream.

Not only is the direct removal of the silt more expensive, but it does not remove the cause of the evil. Each year new silt takes the place of that removed, and the damage, the annoyance, the contribution to flood hazard, and the menace are ever present.

Construction of the dam provides a means of eliminating the silt at or near its source. It removes the cause of the trouble, and at half the expense of mechanical removal.

So, if we take the figures furnished me by this competent engineer, merely from the standpoint of silt control, the Government would save money if it should build this dam at a cost of approximately $15,000,000. I read further from this memorandum:

The regulation of the stream flow—another decided benefit—will mean much to navigation on all streams below the dam. During the period of low water, especially July and August, the extra water may be used to great advantage. River navigation is gaining favor more and more. Its many economies for the moving of large quantities of slow freight are being recognized.

Two hundred thousand acre-feet of water could be used to great advantage during the low-flow months mentioned. Even 2,000 acre-feet per day (1,000 cubic feet per second of time) would provide a stream 200 feet wide, 5 feet deep, and with a velocity of 1 foot per second.

A barge 20 feet wide, 60 feet long, and drawing 4 feet of water could carry at least 250,000 pounds of cargo. That is three large freight-car loads.

The project would provide an immense amount of direct and indirect labor and assist operations of basic industries. Its effects would be far reaching.

As I pointed out a moment ago, this dam would pay for itself, from silt control alone, in less than 10 years, according to figures furnished me by a very competent engineer.

This project was investigated by Mr. Hugh Cooper, who is one of the most noted engineers in the United States. It was likewise investigated by General Goethals, also one of the most illustrious engineers in this country. It was approved by both Mr. Cooper and General Goethals from every standpoint.

I have here a memorandum on the subject. Mr. Koch says:

My original estimate on the project of the Big Horn Canyon Irrigation & Power Co. included railroad, irrigation canals, and transmission line and checked within about 5 percent of the estimate made on the same project and based on the same survey data, by George M. Wells of the firm of the late Gen. George W. Goethals.

He also makes the statement that the project was investigated by Hugh Cooper.

Mr. President, I sincerely hope the amendment may be adopted. I appreciate, of course, when I ask the Senate to adopt the amendment, that it has not the direct approval of the War Department at this time for inclusion in the particular bill now pending. But I submit that there is not another project in the western section of the country which has been investigated from an engineering standpoint as this Big Horn project has been investigated. There is not another project along the Missouri River or along the upper Mississippi River that has received the favorable report from noted engineers the Big Horn project has received. It was under investigation during the war in the administration of President Wilson, with the idea of the erection of a dam there to make possible the manufacture of nitrates. It was investigated at that time with reference to the erection of a dam compared with that at Muscle Shoals, but the officials finally decided to go to Muscle Shoals. So that as a matter of fact every feature of the dam has been investigated. Every engineer who has made a careful report upon it has stated that from the standpoint of the control of silt it would save the Government of the United States millions of dollars every year. Everyone who has investigated it from the standpoint of aiding in the navigability of the Missouri River and the Mississippi River has recommended it, and has said that it would be of tremendous assistance. Everyone who has investigated it from any standpoint has reported favorably upon it.

I appreciate the fact that the Army Engineers perhaps did not go into the matter as thoroughly as have some other investigators, but there has been tremendous agitation for this project and tremendous interest in it as a flood-control project not merely this year but for the past 20 years.

The late Senator Kendrick, of Wyoming, was in favor of the improvement. He spoke to me of it repeatedly and was the first one to get me interested in the matter. He stated it was a project which ought to be built because of the tremendous good it would do. My late colleague, Senator Walsh, also advocated it and worked for it and desired to have it completed because of the flood-control feature. Just a few years ago, as I have said, when there was a flood along the Yellowstone River, irrigation projects were filled up with silt, and various sections in the southeastern part of the State were flooded.

For 2 years, because there has not been a flood in that particular area, there has been no particular agitation for this improvement. But it will be only a short time when there will be a large amount of snow in those mountains, and there will be another flood on the Yellowstone River; there will be damage to irrigation projects which are owned by the Government of the United States; towns along the Yellowstone River will be damaged, and here we have an opportunity to provide flood control in those immediate localities.

I would not be here asking that this amendment be adopted if it affected only one or two towns, but I say without fear of contradiction that there is not another project included in the pending bill which can be of greater benefit, taken as a whole, than the building of this particular project.

Some of the opposition to the project, of course, has always been because the power interests did not want to see it built on account of the fact that they were afraid that if it were built, power would be generated there, and that eventually cheap power would be furnished. But we are not asking for that. They have opposed it, they have been against it because of that fact, but I say that we are not asking for the improvement on the power basis at all. A statement has been made that it would develop 160,000 horsepower at a minimum, 384,000 horsepower at a maximum, under a 60-percent load factor. That is the information which has been furnished to me. But I am not asking for it upon that basis. I say that if it were desired to develop power, if there were a market for it, we could furnish cheap power and pay for the building of the dam from that source. But let us eliminate that, and consider the matter from the standpoint of the benefit to the farmers who are located upon the irrigation projects along the Yellowstone River; look at it from the standpoint of the people who are located in the towns along the Yellowstone River which have been repeatedly flooded; look at it from the standpoint of irrigating the lands of the Indians, who are wards of the Government of the United States. We are taking thousands of dollars out of the Treasury every year for the purpose of feeding those Indians and taking care of them.

The project may be made self-supporting.

Look at it from the standpoint of the silt which comes from the river, the millions of cubic feet of silt going into the Missouri River, and finally into the Mississippi River, which has to be dredged out, and it may be seen that by building the dam in question the Government will be saved considerable money in a period of 10 years' time, according to the report which I have received from the engineers.

Look at the project from the standpoint of erosion caused all along the Missouri River, where the floodwaters come down in the spring and carry away hundreds of acres of the most fertile lands along the Missouri River.

I challenge anyone to point to a project in the bill which, as a whole and from an economic standpoint, will do one-half the good the provision in question will accomplish.

When it is considered that the waters come down to the Missouri River and eat the heart out of hundreds of acres of land along the Missouri River, it will be realized that by the construction of the dam in question the farmers of the section will be spared the loss of that fertile land.

Look at the project from the standpoint of silt. The stream in question is the largest producer of silt of any stream in the

country. It produces about 36 percent of the silt which goes out of the Missouri River into the Mississippi River.

I hesitated to urge that the provision in question be incorporated in the bill because of the fact that the Army Engineers had not specifically recommended it. However, why should we be bound because the Army engineers have not specifically recommended it?

I appreciate the position in which the Senator from New York finds himself. He does not wish to have such a project as this in the bill because he feels that many other projects might be injected into the bill which should not be in it. I submit to the Senate, however, that no one can bring figures showing from an economic standpoint that any other project could accomplish more than could be accomplished by spending the amount of money involved in the pending amendment.

I know what I shall be told: "Let the Army Engineers go out there and make an investigation, and come back and make another report." They are supposed to have made their investigation. They have been out there; and if they have not completed the job, it is the fault of the Army Engineers. They should have made the report a long time ago. Other engineers have made their reports upon projects contained in the bill.

I challenge any Senator upon the floor to dispute the facts and figures which have been furnished by the most prominent engineers in the United States, including Hugh Cooper, who made an investigation of the project, and who is generally recognized as one of the outstanding engineers of this country, and by an engineer of General Goethals' firm, who made an investigation of the project a good many years ago, and by Mr. Koch, who also made an investigation of it, and by the Army Engineers, who made an investigation of it. The reason why they do not recommend the inclusion of this provision in the pending bill is because they say there is no market for power at the present time in that State at that particular place. Let us eliminate power.

Mr. NYE. No, Mr. President.

Mr. WHEELER. I think it should be included, but I say that for the purpose of this particular bill at this time I am perfectly willing to eliminate power. Let it be developed when the time comes when there shall be a market for it, as there will be a market for it. There will be a market for some of the power to pump water upon the lands close by in the State of Wyoming and in the State of Montana, and particularly upon the Indian lands.

When a project is presented on which engineers have brought out the facts, when the Army Engineers themselves have investigated it, when they have agreed with reference to the damage being done by the silt in the upper Mississippi and the Missouri Rivers, when no Senator can stand on the floor of the Senate and deny the fact that there have been floods all along the Yellowstone River, of which the stream in question is a branch, caused in the spring of the year from the floodwaters coming down from the Big Horn Canyon, what excuse can there be for excluding that project, while including in the bill many projects in various other sections of the United States which are not one-tenth so meritorious as is this particular project, except that the Army Engineers have said there is not a market for the power?

Mr. President, we are not proposing to build the project as a power project. We are proposing to build it for flood control. Incidentally, out of that flood control there will come some benefit to a great many Indians who are starving upon dry-land farms. We can provide some benefit to them and irrigate 138,000 acres of land upon which are living Indians who are now poverty-stricken, who are starving to death, except in those instances where they are given doles by the United States. Is there any reason why we should not try to save the farmers in the irrigated districts whose ditches are filled up with the silt from this river simply because the Army Engineers say there is not any market for the power? Is there any reason why we should not go ahead with this project simply because the Army Engineers say there is not any market for the power, when it is undisputed in the testimony that 36 percent of the silt coming into the Mississippi River from the Missouri comes out of the Big Horn Canyon?

I am not offering the amendment for the purpose of home consumption, as some may think. I am intensely interested in the project, because I have given a great deal of thought to it. The late Senator Kendrick first interested me in the matter. He was thoroughly familiar with it, and knew more about it at that time than I did, by reason of the fact that he had holdings in that particular vicinity, and was entirely familiar with that section of the country.

Likewise, my late colleague from the State of Montana, [Senator Walsh], had made a study of the problem. I became interested in the project because of the floods which occurred. I became interested in it from the standpoint of the Indians who are located below this point, and some of whose lands become flooded. I am interested in it also because both the Mississippi Valley Association and the Missouri Valley Association recommended it as a part of their program in their last annual convention, which they held in the city of Washington, if I am not mistaken. They realized the benefits which will come to the upper Missouri and to the Mississippi Valley through the control of the waters, holding them back in flood season, and then letting them out gradually in the low-water time, so as to benefit navigation both upon the upper Missouri and upon the Mississippi Rivers.

Mr. COPELAND. Mr. President, I would not be a judge for a million dollars a year; and I certainly ought not to be a judge in the jurisdiction of the Senator from Montana, because, if I were, I should yield at once to his importunities and say, "On this occasion certainly you are right, and we must be governed accordingly."

As a matter of fact, Mr. President, all the Senator says about the project in its completed form is true. The whole statement is true. If there were a market for the power there could be constructed in this canyon a tremendous dam, 500 or 600 feet high, where electricity could be generated on a large scale. But there is no demand there for electricity. It could not be sold. It would simply mean a waste of money at the present time.

In the matter of the combination of power and flood control, I remind the Senator that we cannot have our cake and eat it, too. A reservoir which is intended to control floods, to catch flood waters, is one thing. It is expected that such a reservoir will be empty before the flood comes. A reservoir which is intended to develop power or irrigation must be a reservoir which is filled most of the time. In writing this bill we have tried to make it possible to develop a project for power purposes in the future if it shall be demonstrated that a given project is worthy of development for power purposes. We have sought to make such development possible by including a pen stock in every dam which is built in order that the water may be drawn from it in the future if the dam shall be raised for power purposes.

The particular project referred to so eloquently by the Senator from Montana, however, is, in the last analysis, valuable as a power project. As a flood-control project, I am sorry to say that the Army Engineers have reported that it has very little value so far as economic merit is concerned.

To prepare this reservoir for flood-control purposes would cost $23,934,000, practically $24,000,000. The total capitalized benefit would only be $1,000,000. In other words, economically there would be $1 of investment to 4 or 5 cents of return.

Mr. WALSH. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. WALSH. I should like to inquire of the Senator about the general construction of the bill rather than as to the proposition presented by the Senator from Montana.

As I understand, this bill has two main features relating to flood control. First, there are proposals for surveys and studies by the Army Engineers of a large number of rivers where there may be a flood-control problem.

Secondly, there is an authorization of an appropriation by the committee in cases where surveys have been made

and the Army Engineers have recommended the expenditure of money to carry out the plan for flood control which they have perfected.

Mr. COPELAND. The Senator is correct.

Mr. WALSH. May I ask if it is customary to accept amendments or to have amendments offered from the floor to provide for surveys by the Army Engineers independent of the recommendation of the committee?

Mr. COPELAND. Yes; we will be glad to receive such amendments.

Mr. WALSH. May I ask if the committee itself reports or recommends or inserts in the bill appropriations for flood-control purposes in instances where the Army Engineers have not made a recommendation?

Mr. COPELAND. No, sir.

Mr. WALSH. And in cases where the Army Engineers have made unfavorable recommendations, what is, then, the situation?

Mr. COPELAND. There is in this bill no project which has not been approved by the Army Engineers.

Mr. WALSH. There are proposals in the bill presented by Members of the House and Senate for surveys and studies?

Mr. COPELAND. That is very true. We also provide in the bill an appropriation of $5,000,000 to carry out such surveys and studies.

Mr. WALSH. The Senator has answered my inquiries and has supported the idea which I already entertained as to the method of constructing a bill of this kind.

Mr. COPELAND. Mr. President, just one word more, not alone because of the high regard we have for the Senator from Montana but because he has made touching reference this afternoon to two former colleagues of ours, the late Senator Kendrick, of Wyoming, and the late Senator Walsh, of Montana. Theirs are names to conjure with in this body, names of men greatly beloved and highly respected. I know of the interest they had in this matter because as a long-time member of the Commerce Committee I myself have heard of this project for many years, for at least a dozen years, and when the time comes that there is demand for power, when the time comes that irrigation as well as flood control may be promoted by this project, the Senate, I feel confident, will not be found wanting.

The Senator has spoken about silt. He must not forget the fact that a dam or reservoir which will retain silt will itself become filled up in time, so that whatever value it might have through the early years of its life by way of preventing the silting of the Missouri River must eventually be lost, because the reservoir itself will fill with silt.

I am sorry, Mr. President, that the committee cannot approve the project of the Senator from Montana.

Mr. VANDENBERG. Mr. President, this is the first amendment to the bill that has come from the floor, and we might as well face now the question which must be continuously faced if the door is to be opened to amendments of this character which do not enjoy the recommendation of the Board of Rivers and Harbors Engineers.

It makes no difference what the inherent merit of the proposal may be, unless we are going to follow a fixed rule in respect to a bill of this nature it is inevitably going to become a monstrosity. I do not mean by that statement that the Senator's project would make it a monstrosity or anything of the sort, but if we once lower the bars to projects from the floor which do not have a conclusive recommendation from the Board of Rivers and Harbors Engineers, by the time this bill shall be finally written, instead of being a $300,000,000 bill, it will be a $3,000,000,000 bill.

On the desk of the chairman of the committee is a volume of projects already surveyed, the cost of which would total $8,000,000,000. In addition to the projects in that book, there are projects involving the expenditure of literally billions upon billions of dollars which have not as yet reached the book. If we are going to open the door in connection with this bill to the entry of projects which do not fall within the definite and specific rule of the committee upon which the bill is written, we will not close the door again until we have put about half of that book into the bill, and beyond that heaven only knows how much more.

Legislation of this character is always under the suspicion of being "pork barrel" legislation in its ultimate complexion. The Commerce Committee, under the able direction and insistence of the senior Senator from New York [Mr. COPELAND], has undertaken to hold this bill, for a change, within definite and specific and absolutely justifiable limitations. The project submitted by the Senator from Montana may not fall appropriately within any stricture whatsoever of the nature I have been indicating, except the single stricture that it violates the rule upon which the bill is written; but if the Senate once starts, in open session, to decide the eligibility of a project for this bill, instead of depending upon the conclusive recommendations of the Board of Rivers and Harbors Engineers, we are "sunk without trace", and so is the taxpayer.

Somewhere, sometime, somehow, somebody has got to remember that these bills must one day be paid. It is simply impossible for the Congress to continue to appropriate and appropriate and appropriate without giving any thought whatsoever to closing the breach between income and outgo. We have already passed one $270,000,000 flood-control bill at this session of the Senate. This bill, as drawn, includes $350,000,000 more.

How much further can we go in these steps in the face of a yawning Treasury, in the face of the fact that we are still paying out $2 for every dollar we take in, in the face of the situation that the public credit even of such an opulent old gentleman as Uncle Sam, cannot indefinitely stand the strain. We seem to have lost all sense of money responsibility. There must be some continence some time in respect to this sort of a proposition. Unless we confine, Mr. President, the flood-control bill to the general rule of conduct faithfully pursued by the Committee on Commerce in presenting the recommendation now at the bar of the Senate, when we are through, this bill, I repeat, will be a legislative monstrosity. I say again that that may not apply to the merits of the proposition submitted by the Senator from Montana at all except to the extent that his proposition falls outside the rule. But that is enough. I submit we dare not consider the proposition submitted by the Senator from Montana upon its intrinsic merit. We dare, in the face of this situation, consider it only as a precedent which may ultimately wreck the entire legislation. I think the amendment must be rejected.

Mr. WHEELER. Mr. President, I have never been afraid to have amendments submitted on the floor of the Senate. If the Senate does not have the courage to stand up and vote for projects which it thinks are good and to vote down projects which it thinks are bad, then the Senate is in a pretty bad way. I have more confidence in the Senate of the United States and in the Members of the Senate than has my esteemed colleague from Michigan [Mr. VANDENBERG].

After all, we do not vote ordinarily on projects of this kind in this way. We have a river and harbor bill every year, and the Senate adopts amendments offered on the floor when in its judgment and wisdom it thinks proper that they should be adopted. But why say to a Senator, "You cannot have a project considered, because it was not put in the bill by some committee", regardless of how meritorious the project may be? Has it come to pass that we may not offer an amendment on the floor of the Senate, or, if offered, it must be rejected, because some committee did not put it in the bill? Is the Senate going to be controlled by a committee? Is it going to be said, "You cannot offer an amendment on the floor of the Senate no matter how meritorious it may be"?

If such a rule were to apply, where would the minority be in the Senate? Where would the minority in the Senate, whether Republican or Democratic, find itself if it could not come to the floor of the Senate and have meritorious amendments considered? Are we going to set up an oligarchy of committees in the Senate? When a bill is reported from the Interstate Commerce Committee, I am always delighted to have a Senator rise and offer an amendment which he may

think is meritorious and have it considered upon its merits on the floor of the Senate. I am surprised that the Senator from Michigan should say that, no matter how meritorious it may be, it should not be acted upon by the Senate, because the rule must not be broken down.

Let Senators examine the bill and see where the money is going to be spent. I assert without much fear of contradiction that there are few, if any, projects contained in the bill which have the merit, from an economic standpoint and from a beneficial standpoint, that has the project which I have proposed. Yet the Senate is asked to turn it down for fear someone else might rise and offer another amendment and the Senate might adopt it. I am to be refused my project because some committee has said, "We will include only these projects and you must take these or you must take nothing."

Mr. President, because a number of Senators have projects in the bill I presume I am to be denied. I presume denial is to be offered to the Mississippi Valley Association, which is in favor of the bill, which has made a study of the particular project and advocated it for years and passed upon it in national convention and pronounced it beneficial, not to Montana alone, but beneficial to the Missouri River because it will help to stop soil erosion. Denial is to be offered the Missouri Valley Association which for years has been giving study to the project and has pronounced it beneficial not only from the standpoint of flood control but because it involves silt control.

Let me call attention again to the statement which has been furnished me. The engineer who first made report upon this project was A. W. F. Koch, a local civil engineer. His work was subsequently checked and approved by Hugh L. Cooper, noted water-power engineer, not by some promoter, not by somebody looking to the sale or the promotion of the sale of some land. There is no land-promotion scheme involved in the matter at all. My information is the flooded area would take only Government lands or Indian lands. This report was checked by Gen. George W. Goethals and by several other engineers.

Does the Senator from Michigan think that any other project has behind it such a distinguished array of engineers and such a distinguished array of organizations asking for its construction, not because it is for the benefit of Montana but because of the general good and general welfare of the Mississippi and Missouri Valleys?

The report further says:

> During the World War the Government considered this project in connection with the domestic manufacture of nitrate, but the Muscle Shoals, Ala., site was eventually chosen.

Mr. President, I have always found the Senator from New York [Mr. COPELAND] interested in and willing to help projects of benefit to Montana and the West. He has been most generous in voting for legislation which was beneficial to the western section of the country, notwithstanding the fact that he comes from New York. I appreciate and compliment him upon his generosity. I appreciate the position he takes in this matter, because he is fearful that if this project should be adopted other Senators might ask to have other projects included. However, when he speaks of irrigation I am sure he is talking about a subject with which he is not very familiar. That is apparent from his statement made a moment ago. When we contemplate an irrigation project we plan to keep the floodwaters back in the spring of the year and then gradually let the waters down on the land in periods of dry season.

I have noticed the Senator from New York has always been interested in the Indians and in their welfare. I think no one on the floor of the Senate, particularly from the eastern part of the United States, has evinced more interest in various Indian problems than has the Senator from New York. There are 138,000 acres of land upon the Crow Indian Reservation that could be irrigated, and this project, if constructed, would tend to help make those Indians self-supporting. That would be only an incident to the project.

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from New York?

Mr. WHEELER. Certainly.

Mr. COPELAND. The Senator is entirely right in stating that what I know about irrigation is very little. However, I have here the report of the Army Engineers about irrigation. I dislike to say it, because it will not make the Senator from Montana very happy; but let me read just one brief paragraph appearing in this report:

> Studies indicate that it is possible to combine irrigation with the development of power at the Big Horn Canyon site. The Big Horn irrigation project would involve the reclamation of 50,100 acres of land through a distribution system drawing its water supply from the proposed Big Horn Reservoir.
>
> The estimated cost of the diversion work, without any charge for the storage and diversion of water, would be about $100 per acre. This cost would indicate annual payments of about $11 per acre under private financing, or about $4 per acre under Government construction. The lowest of these is in excess of the maximum of $3.50 per acre, which it is estimated that the land could probably carry. The studies, therefore, show that the power development would have to carry the cost of storage, and probably a part of the cost of the distribution system; that the irrigation development itself would probably pay nothing toward the cost of the dam. Furthermore, the use of water for irrigation would reduce the value of the total output of the power development, and appears to lack economic justification at the present time.

Mr. WHEELER. Mr. President, the Senator would be entirely right, and the Engineers would be entirely right, if it were proposed to build this dam as an irrigation project; for if we should provide that the entire cost of building the dam should be borne by these fifty or sixty or one hundred thousand acres of Indian land, of course it would not be feasible as an irrigation project. The bill, however, carries a total of how many million dollars?

Mr. COPELAND. Three hundred million dollars.

Mr. WHEELER. How much of that money does the Senator expect the Government to get back?

Mr. COPELAND. Of the $300,000,000? Not any.

Mr. WHEELER. The Senator does not expect to get any of it back?

Mr. COPELAND. No.

Mr. WHEELER. The bill carries $300,000,000, and the chairman of the committee does not expect that one 5-cent piece of it will come back to the Government. What I am saying is that out of the $15,000,000 that it would be necessary to spend for this dam for flood control, it is estimated that there could be irrigated anywhere from 30,000 to as high as 150,000 acres of land. When we provide for the irrigation of from 30,000 to 150,000 acres of land what are we doing? We are adding to the capital assets of our Nation; and not only are we doing that, but we are making it possible for a group of persons who are now dependent upon the Government for their livelihood to become self-supporting.

If it were proposed to build this dam as an irrigation project, of course, I should say that it was not feasible for that purpose alone, but when we are spending $300,000,000 that it is admitted we shall never get back—in fact, we never intend to get a dollar of it back—I say that there is a project from which, if we spend $15,000,000 on it, we shall get back part of the cost from irrigation. We shall be able to build a power project, if we desire to do so, and get back part of our money. In addition to that, we shall be saving the farmers from floods; we shall be saving the Government irrigation ditches all down the valley from being flooded, and not only that, but we shall be adding to flood control and navigation upon the Missouri and the Mississippi Rivers.

I desire to call the attention of the Senator from Louisiana [Mr. OVERTON] to the fact that the Engineers state in the report that 36 percent of the sediment flowing from the Missouri River into the Mississippi River comes from the Big Horn Canyon, and that the expense of buying the necessary machinery and dredging that sediment amounts to millions of dollars every year. Of course, I appreciate that the Senator may not be interested in the amendment, but if he will look at the figures which have been furnished to me, and which I have put in the RECORD, with reference to the

sediment that goes into the Missouri River from this particular river, I am sure he will agree that his people will be interested in the amendment, because the Mississippi Valley Association, which has studied the problem, has gone definitely on record in regard to it, and the Missouri Valley Association has gone definitely on record in favor of the project, not because of irrigation, not because of power, but because of flood control, and because it will help navigation on the Missouri and the Mississippi Rivers.

Mr. OVERTON. Mr. President, will the Senator yield?

Mr. WHEELER. I yield.

Mr. OVERTON. I wish to say that we in the lower Mississippi Valley are interested in the project referred to by the Senator from Montana, and in similar projects. We look upon these reservoirs as additional factors of safety. We feel that they afford additional protection to us; that the more that are built the less danger we encounter in the valley and the less necessity there is for the use of the floodways that have to be constructed in the valley.

It must be apparent to the Senator from Montana, however, that these projects are highly technical in their nature; and in the perfection of the bill the members of the Commerce Committee had to depend very largely, and, in fact, exclusively, upon the recommendations of the Army Engineers. I personally should have liked to have included in the present omnibus bill many projects in Louisiana that are divorced from the flood-control problem of the Mississippi River proper; but so long as I could not obtain the recommendation of the Army Engineers, I concluded not to urge them either before the committee or upon the floor of the Senate.

I will say to the Senator from Montana that in the event his project should be adopted, there is no reason why we should not consider many other projects scattered throughout the Nation from the Atlantic to the Pacific and from the Dominion of Canada to the Gulf of Mexico. It is utterly impracticable for us to do that upon the floor; and I will go further and say that I think it is rather impracticable for the Commerce Committee, which had the bill under consideration, to consider those problems independently of the recommendations of the Army Engineers and against their report.

Mr. WHEELER. I appreciate the position which the Senator from Louisiana has taken; but I repeat what I said a moment ago: There are many other projects in my State which of course I should like to see incorporated in the bill, but no other project has been proposed on the floor of the Senate or before the Commerce Committee which has had the investigation which this project has had. I challenge any Senator to show another project which has had the engineers' reports which this project has had. Mr. Hugh L. Cooper—who, as I said a moment ago, is a well-recognized engineer—reported on the project a long time ago. An engineer of General Goethals' firm reported upon the project. The Army Engineers have made an investigation of it; and the only reason why they say it should not be included in the bill is because they say there is not any market for the power.

I am not asking that the project be constructed as a power project; but let me ask here, Why should the Senate refuse to consider projects simply because the Army Engineers do not recommend them, when we have before us the facts and figures regarding the projects?

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. WHEELER. I yield to the Senator from Georgia.

Mr. RUSSELL. I heartily agree with the Senator from Montana in that suggestion. I see no reason on earth why a worth-while, meritorious project should be proscribed by some rule of the committee because it has not been recommended by the Army Engineers. I am all the more interested to know the source from which the rule emanates. Now, at a time when charges are being made that Congress has abdicated its constitutional responsibility and is delegating its legislative powers, and is, in fact, a mere rubber stamp, we hear it stated that Congress has no right whatever to legislate on a matter unless it is approved by the Board of Army Engineers. Therefore in its last analysis it would delegate to them the sole right to write this bill and the sole power of determining as to what is or what is not a meritorious project.

Mr. WHEELER. Of course, if we are to do that, there is no reason why we should not be branded as mere rubber stamps.

Mr. RUSSELL. Of course not.

Mr. WHEELER. If we are simply to let some Army engineer come here and say, "You can put this in the bill, but if we do not recommend it, you cannot put it in on the floor of the Senate"; if that is to be the rule of some committee, if we have not the courage and the intelligence to stand here on the floor of the Senate and write legislation, if it is meritorious, and adopt it if it is meritorious, regardless of some Army engineer's report, then we ought to be branded as rubber stamps.

Mr. COPELAND. Mr. President——

The PRESIDING OFFICER (Mr. MURPHY in the chair). Does the Senator from Montana yield to the Senator from New York?

Mr. WHEELER. I yield.

Mr. COPELAND. Mr. President, the Army Engineers brought us their findings, and it did not take a Philadelphia lawyer to determine whether or not this project was economically justifiable. Assuming that the Army Engineers have told me the truth as to the facts, and leaving it to my own brain to formulate a conclusion, I can determine for myself that this project which is being so ably presented by the Senator from Montana is not economically feasible. I have no doubt that if the galleries were to vote they would vote the Senator 100-percent right; they would vote with the Senator. But I intend to vote once in a while with the taxpayers.

What right have we to expend $23,934,000 when the benefit which would be derived would be $1,000,000? I do not have to have an Army engineer to tell me that that is a bad investment. I have made enough bad investments myself to recognize one when I see it, and I would say that it would be an unwise investment to spend $24,000,000 in order to get a million dollars return a year. I know that much about bad investments.

Mr. WHEELER. Mr. President, let me say to the Senator that he has just stated that we will be spending $300,000,000 as a result of the pending bill, and do not expect to get a 5-cent piece back.

Mr. COPELAND. Mr. President, will the Senator yield to me further?

Mr. WHEELER. I yield.

Mr. COPELAND. We will spend $300,000,000 under the pending bill. In the "Golden Triangle" of Pittsburgh alone the last flood cost the people $200,000,000. In my State the flood cost the people $40,000,000. We are not going to get this money back, but in the savings to the people, in the saving of lives of our citizens, there is going to be a great annual return. But there is no economic justification in the case eloquently presented by the Senator from Montana. Every one of his constituents must know he has properly represented them, and if there is any doubt about it, when he runs again, I will go out to his State and tell the people how the Senator tried to get these millions of dollars for them. There is, however, no economic justification for the project at this time. We could find many projects—and they are listed in the book I hold in my hand to the amount of $8,000,000,000—which have been surveyed by the Army Engineers, and on about five or six billions dollars' worth of those projects the returns would be about 8 cents for $1 invested. On the project the Senator is advocating the return would be lower than that. So I hope the Senator will not press the matter, since it is utterly beyond the bounds of reason that the Senate should adopt the amendment, because if this amendment were agreed to the junior Senator from Ohio [Mr. DONAHEY] would have a right to present amendments covering several projects in his State, and I

could name a hundred projects, from my memory, which ought to go into the bill if we agreed to this amendment. But we have no right to invest millions of dollars of the taxpayers of the United States where the return would be 3 or 4 cents on the dollar invested.

Mr. WHEELER. Mr. President, I am utterly amazed at the statement that there would be a return of only 3 or 4 cents on the dollar. I thought I had made the matter quite clear to the Senator, and I challenge the Army Engineers who advised him to make that statement in writing to me or to anybody else that there would be only that return. They are talking about irrigation. The Senator is saying that $300,000,000 is to be spent under the bill, and that the Government will not get one cent of return on that investment, but he says there will be a saving of millions of dollars to the people of Pennsylvania, to the people of New York, to the people of Mississippi, to the people of Arkansas, and to the people of other States, and I agree with him. But I say to the Senator that floods have occurred on this river in Montana, and the Mississippi Valley Association, the Missouri Valley Association, and all who have examined into the matter, have said that regardless of the question of power, regardless of irrigation, this improvement ought to be completed as a flood-control proposition. There can be no dispute about that. There is not a question of a doubt about it, and in my judgment, the Army Engineers will not dispute my statement. When they investigated the matter they investigated it from the standpoint of a power project, and they reported upon it from the standpoint of irrigation and power.

Of course, if this were to be built as an irrigation project, and it was expected that the owners of thirty or forty thousand acres of land would pay back to the Government of the United States the $15,000,000, I would not be foolish enough to stand on the floor of the Senate and say that could be economically justified. That is not the idea. But I call attention again to the fact that the Big Horn River is the greatest silt producer in the entire Missouri River Valley. It discharges at Hardin, Mont., 42 miles below the site of the proposed dam, 12,900 acre-feet of sediment annually. By way of comparison, the sediment flow of the upper Missouri River at the site of the Fort Peck Dam, now under construction, is 2,225 acre-feet, about one-sixth as much.

The Yellowstone River furnishes 61 percent of the waters carried by the Missouri River after its junction with the Yellowstone. The Big Horn River discharges approximately as much water as does the Yellowstone in a year, but at the time of the heavy spring discharge most of the silt is carried down. Of the silt discharged by the Yellowstone into the Missouri approximately four-fifths comes from the Big Horn.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. WHEELER. I yield.

Mr. COPELAND. I do not desire to prolong the debate, but I want an effective answer made in order that the historian of the future may know that there was an answer.

This is what we learn about the silting of reservoirs: The Yellowstone River is, as the Senator has argued, a heavy contributor to the burden of silt carried by the Missouri River, and the Big Horn contributes about one-half of the silt load of the Yellowstone. We are in full agreement on that.

Investigations of the silt burden of the Big Horn have indicated that the average annual discharge of silt passing Hardin, Mont., is about 21,200,000 tons. Based on these estimates it was found that the ultimate silting of the Big Horn Reservoir of 830,000 acre-feet capacity would occur in approximately 64 years, and its capacity would be seriously impaired in a shorter time if no desilting works were in operation.

It also appears that the value of retaining this silt in the Big Horn Canyon Reservoir and preventing its deposit in the lower Yellowstone and Missouri Rivers would not be large, and that this benefit would be more than offset by the decrease in value of the reservoir itself due to progressive silting.

The Senator knows I am not an authority on irrigation, nor is the Senator from Montana an authority on silting, but those who are authorities say that the silting argument which the Senator is presenting to us is worth just 4 cents on the dollar, and no more.

Mr. WHEELER. The Senator is speaking now merely of silting.

Mr. COPELAND. I make the same argument about everything else.

Mr. WHEELER. The Senator is saying 4 cents as to silt, and 4 cents as to something else, and 4 cents as to something else. I give due credit to the Army Engineers, but I say to the Senate that in their statement they disagreed with other engineers, according to the information given to me, with reference to the silting.

I now read as follows from a report made by an engineer:

> The Big Horn and Yellowstone Rivers furnish 61 percent of the water carried by the Missouri River after its junction with the Yellowstone. The Big Horn River discharges as much water as the Yellowstone, approximately, in a year, but at the time of the heavy spring discharge is when most of the silt is carried down. Of the silt discharged by the Yellowstone into the Missouri approximately four-fifths comes from the Big Horn. Stoppage of floodwater means stoppage of silt. The proposed dam would check this menace to the people of the Missouri and Mississippi Valleys close to its source. The cost of pumping the sediment chargeable to the uncurbed flow of the Big Horn when it has reached the mouth of the Missouri (estimated at 72,240 acre-feet) amounts, at 4 cents per ton, to $4,677,463.

That is where the Senator from New York gets his figure of 4 cents, I assume.

> If this silt were removed at its source it could be done at an estimated cost of only $1,169,365, or at an annual saving of $3,508,098. This cost could be still further reduced by use of power from the dam at peak periods. This saving alone represents big interest on the investment.

Will the Senator dispute those figures? I am sure the figures which the Senator from New York quoted do not show the amount saved. The engineer who prepared this report agrees with the Army Engineers as to the amount of silt, but he states that the cost of taking out the silt at the mouth of the Missouri would be about 4 cents per ton, which would equal $4,677,000, and if the silt were disposed of at the dam it would cost $1,169,365, or an annual saving of $3,508,098 on an investment of approximately $15,000,000.

I am not going to take up further time of the Senate with reference to the amendment, but I sincerely hope it will be adopted. I say that not a valid argument has been presented against it. No reason has been shown why it should not be adopted in this program for flood control. When it is said that there will be no interest return upon the investment if $15,000,000 shall be invested in the project, and that none of the money expended upon the project will be returned, I say that not only are the lives of people going to be saved, as well as land, and an important step will be taken in flood control of the Mississippi and the Missouri Rivers, but the United States Government will get back money expended upon this project, while it is admitted that there will be no return of much of the $300,000,000 which is to be spent upon other projects.

Mr. O'MAHONEY. Mr. President, I offer a perfecting amendment, which I ask to have stated.

The PRESIDING OFFICER (Mr. MURPHY in the chair). The amendment to the amendment will be stated.

The LEGISLATIVE CLERK. It is proposed to add the following proviso to Mr. WHEELER's amendment:

> *Provided*, That any dam to be constructed out of this appropriation shall be so located as not to include privately owned lands within the boundaries of the reservoir.

Mr. WHEELER. I accept that amendment.

In conclusion, let me say that I hope the Senate will adopt my amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana [Mr. WHEELER], as modified, to the amendment of the committee.

Mr. CLARK. Mr. President, I do not desire to delay the vote on the amendment of the Senator from Montana for longer than a moment. The subject happens to be one in which everyone who lives in the lower Missouri Valley or the lower Mississippi Valley is as much interested as is a citizen of Montana.

In company with the Senator from Nebraska [Mr. NORRIS], the Senator from Montana [Mr. WHEELER], and five or six other Senators, I was one of those who went to the White House a couple of years ago to urge the construction of the Fort Peck Dam in Montana, not because I was particularly interested in a construction in Montana but because, both from the standpoint of navigation and from the standpoint of flood control on the Missouri River, I regarded that as a project which concerned us as much as it did the citizens of Montana.

The Senator from Montana has debated the subject so ably this afternoon that I do not feel it necessary to repeat what he has said, except to bear witness, as a Senator from a State which the Missouri River traverses for its whole width and which forms one-third of its western boundary, that the Big Horn Reservoir which the Senator from Montana has been advocating concerns the States of Iowa, Nebraska, Kansas, Missouri, and all the States which border the lower Mississippi, to the same extent that it concerns Montana.

I believe, in accordance with the views frequently expressed by the President, that one of the great preventives of floods is an intelligently planned and constructed system of reservoirs on the larger tributaries of the major streams. I am certain, from reading the reports of the engineers, that the construction of the dam advocated by the Senator from Montana would not only be of great advantage to his own State but would be of great advantage to every State through which the Missouri and the lower Mississippi flow.

The PRESIDING OFFICER. The question is on agreeing to the modified amendment of the Senator from Montana to the committee amendment.

Mr. COUZENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Copeland	King	Pope
Bachman	Couzens	La Follette	Radcliffe
Bailey	Davis	Logan	Robinson
Barbour	Dieterich	Lonergan	Russell
Barkley	Donahey	Long	Schwellenbach
Benson	Fletcher	McAdoo	Sheppard
Bilbo	Frazier	McGill	Shipstead
Black	George	McNary	Smith
Bone	Gerry	Maloney	Steiwer
Borah	Gibson	Metcalf	Thomas, Okla.
Brown	Glass	Moore	Townsend
Bulkley	Guffey	Murphy	Truman
Bulow	Hale	Murray	Vandenberg
Byrd	Harrison	Neely	Van Nuys
Capper	Hastings	Norris	Wagner
Caraway	Hatch	Nye	Walsh
Chavez	Hayden	O'Mahoney	Wheeler
Clark	Johnson	Overton	White
Connally	Keyes	Pittman	

The VICE PRESIDENT. Seventy-five Senators having answered to their names, a quorum is present. The question is on agreeing to the modified amendment of the Senator from Montana [Mr. WHEELER] to the committee amendment in the nature of a substitute.

Mr. COPELAND. Mr. President, I call the attention of the Senate to the fact that we had a flood-control bill before the Senate at the last session, and we did what is now proposed to be done: We started and let one project go in that had not been approved by the Army Engineers; and when we got through we had $770,000,000 worth of projects in the bill. Of course, after the speech of the Senator from Maryland [Mr. TYDINGS] we were all ashamed; and the bill was recommitted, with the understanding that when it came out again it should come out in proper form.

Mr. President, the committee has stood for weeks and for months against the inclusion in this bill of any project which has not been approved by the Army Engineers. As meritorious as this project is, in the future, when the time comes with the growth of population in Montana that the power can be used, there will be constructed in that canyon a great dam; but at the present moment, according to the report of the Army Engineers, the project is without merit, and is economically indefensible.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. CLARK. I will say to the chairman of the committee of which I am proud to be a member that he is entirely correct in saying that we started out in the preparation of the bill to follow the recommendations of the Army Engineers. Today, however, by a vote of 40 to 31, the Senate pitched the Army Engineers out of the window by the scurff of the neck and the slack of the breeches. Having offered that committee amendment, it seems to me it is rather late in the day for the chairman of the committee to be coming back and talking about the recommendations of the Army Engineers.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. COPELAND. I yield to the Senator from Kentucky.

Mr. BARKLEY. What the Senate did today was simply to allow the President to exercise his discretion with respect to projects which the Army Engineers had approved. We did not kick the Army Engineers out of the window. We simply reinforced them by the discretion we gave to the President.

Mr. COPELAND. Mr. President, if by any mischance the Senate should adopt this amendment, I shall have no excuse, as chairman of the committee, for resisting the inclusion in the bill of any amendment which may be offered, regardless of whether or not the project has been approved by the Army Engineers; and by this time tomorrow we shall have a bill like the one which was sent back to the committee last year after the speech of the Senator from Maryland.

I sincerely trust that the amendment offered by the Senator from Montana will be rejected.

Mr. WHEELER. Mr. President, when the Senator from New York says that the Army Engineers have reported adversely on this project and say that it is economically unsound and unfeasible, I submit that there is no statement to that effect in the record.

When the Army Engineers examined the project they examined it with reference to power as a power project. As such they said that there was not sufficient market for the power. I am not asking for its inclusion in the bill as a power project. Furthermore, as the Senator from Missouri [Mr. CLARK] says, this is not a Montana project. Every Senator and every Representative from States along the Missouri and the Mississippi Rivers ought to be interested in the project, because both the Mississippi Valley Association and the Missouri Valley Association, which have investigated the project and had engineers investigate it, have approved it as a flood-control project for the control of silt and for the control of the flood waters of the upper Mississippi, and the President of the United States, in speeches in my State and at other places, has said that the proper place to control the floods of these rivers is in the upper tributaries.

In view of the fact that the project has been approved by many engineers, including some of the most noted engineers in the country—they have passed upon it and checked it and approved it—I think it is unfortunate that the chairman of the committee should take the position that if the project is included in the bill he will throw down the bars and let in every project throughout the United States. This is not a Montana project. It is a project which affects the whole interior country along the Missouri and the Mississippi Rivers. As the Senator from Missouri said, the matter was called to my attention by the Missouri Valley Association. It was called to my attention by the Mississippi Valley Association. The late Senator Kendrick was interested in it. My late colleague, Senator Walsh, was vitally interested in it for years. It is a flood-control project. That is all we are asking for. Incidentally, a few Indians will obtain

some benefit from it, if we wish to have that done. We do not have to do it, but we can irrigate the Indian land, as I pointed out, and save the Government some money by making the Indians self-supporting, at very little cost.

It has been stated that the project will cost too much. If we should put upon the Indians the full burden of paying back to $15,000,000, of course, we could not construct this dam as an irrigation project; but in this bill we are providing for the expenditure of $300,000,000, of which we are not going to get back a dollar. I am asking that we spend $15,000,000, not for the benefit of my State, but for the benefit of the States bordering upon the Missouri and the Mississippi Rivers. Every one of them, and every association connected with the navigation of the rivers, and every association connected with flood control along the rivers is in favor of the amendment and has recommended it.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. WHEELER. Yes.

Mr. CLARK. Is not the project advocated by the Senator exactly the same as that exemplified in the case of the Connecticut Valley, where the construction of reservoirs in New Hampshire and Vermont will redound to the benefit of the people of Massachusetts and Connecticut; also the project contained in the bill for building reservoirs in the State of New York for the purpose of benefiting the people of Pennsylvania and the lower Susquehanna Valley?

Mr. WHEELER. Of course it is.

Mr. CLARK. In other words, the location of the dam or the reservoir has not necessarily anything to do with the benefits to be derived from it, because they may be derived in some other State, on a much lower stage of the river.

Mr. WHEELER. Of course. As I said awhile ago, the power interests of the country have been opposed to the project, because they have said some cheap power might be developed there; and the Army Engineers investigated the proposal from the standpoint of power. One of the great railroad systems of the country investigated it a few years ago, and planned to build the dam for the purpose of obtaining cheap power for the electrification of their railroad. I desire to say here and now that they would have built the dam if it had not been for the fact that they found some cheap coal in that vicinity which they could shovel out. It is going to be only a question of time, however, before the power will be used; and if we build a dam—I am not asking that it be done now—some of the transcontinental railroads which desire to electrify their lines will buy the power for that purpose from the Government of the United States, and in the long run the dam will not cost the Government one 5-cent piece.

As I pointed out, the construction of this dam will not only help the State of Missouri and the State of Iowa and all the States along the Mississippi and the Missouri Rivers, but a few years ago we had floods along the Yellowstone River that flooded out the town of Forsyth; we had floods there that flooded out the irrigation ditches of the farmers along the Yellowstone River; and, notwithstanding anything that has been stated on the floor of the Senate, I say there is not a flood-control project that could be built that is more meritorious or that would help more people in more States of the Union than the construction of this dam at a cost of approximately $15,000,000. Why? Because it is to be built in a very deep canyon, and, incidentally, one of the most gorgeous canyons in the Northwest outside of the Yellowstone. It is to be built in a very deep canyon, a very long canyon, and the dam will flood only public lands and some Indian lands; so that there will be no cost to the Government of the United States for the lands flooded. I hope the amendment will be adopted.

Mr. MALONEY. Mr. President, I dislike very much at this late hour to take the time of the Senate on this amendment; but the Senator from Missouri [Mr. CLARK] stated that this situation is in some way comparable to the situation in the Connecticut Valley.

I am among those who hope the amendment will be defeated. During the last session of the Congress, while the Connecticut Valley was considered in the omnibus flood-control bill, there was, with malicious forethought—and I joined in the effort—a successful attempt made to defeat the then pending flood-control bill. I quite agree with the statement of the chairman of the committee and with the remark of the Senator from Michigan that the adoption of this amendment will defeat the bill this year. It is not being done with malice aforethought this time. It is being done because of the patriotic spirit of the Senator from Montana; and I do not think there is a question in the mind of any member of the Commerce Committee about the merits of this particular proposal.

Together with the Army Engineers, we considered proposals from every part of the country. No State was overlooked. Members of the House of Representatives came before us in very great numbers on more than one occasion. We felt the need of a restraining influence, because we had continuously in our minds the experience of last year, the criticism of the country, the criticism in the Senate of the proposal made at that time.

I wish to add my humble and feeble plea to what was said by the Senator from New York [Mr. COPELAND] and the Senator from Michigan [Mr. VANDENBERG]. Although the amendment has merit, if it should be agreed to I do not think there would be a chance to turn down any of the other proposals which would follow.

Mr. President, let me take just sufficient time to answer the reference made to the Connecticut Valley. We do not think we have received sufficient consideration. Ours was one of the dramatic flood areas of the recent disastrous inundation. The Army Engineers, after making a survey of the Connecticut Valley, recommended 39 reservoirs. The pending bill provides for only 10.

Despite the loss of millions and millions of dollars as a result of the flood in the Connecticut Valley, and despite the great loss of life, the appropriation to protect us against a future flood amounts to only $13,000,000, and we are very cheerfully, willingly, and anxiously making plans to pay our share of the cost.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. MALONEY. I yield.

Mr. CLARK. The Senator will recall that when the matter was before the Senate Committee on Commerce the Senator from Connecticut himself proposed that there be a different rule established as to local contributions, that areas which had been dramatically damaged during the recent flood should not this year be required to pay any portion of the cost of permanent works but that that should not be taken as a precedent, and that in the future those not dramatically included in this dramatic incident this year should be required to pay their local contributions. Does the Senator still adhere to that view?

Mr. MALONEY. No; I do not adhere to that view; and while the Senator from Missouri is partially correct, I am sure that other members of the committee will remember that, while I did express the thought that it probably would be wise to handle the matter in that way, I qualified my statement and said that I felt that under certain circumstances I should vote differently; and subsequently I did vote differently in the committee.

I quite disagree with the Senator from Missouri, who makes a difference between what is now described as a dramatic flood condition and a chronic flood situation, the latter applicable to the neighborhood in which he lives.

Mr. CLARK. Mr. President, will the Senator yield further?

Mr. MALONEY. I yield.

Mr. CLARK. Let me say that that distinction is not mine. The distinction was introduced in the Commerce Committee, as the Senator will well remember, by representatives from areas which have not hitherto in many years been affected by floods. The distinction between the dramatic, unprecedented, unusual floods of this year and the habitual, usual floods of other years is not my distinction. It was introduced in the committee by other Senators than myself and, as a matter of fact, by the Army Engineers themselves.

Mr. MALONEY. Mr. President, I have no desire to prolong the debate with the Senator. I should like merely to emphasize the fact that, in my opinion, the adoption of the pending amendment would spell ruin to flood-control legislation during the present session of the Congress.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Montana [Mr. WHEELER], as modified, to the amendment of the committee in the nature of a substitute.

The amendment to the amendment, as modified, was rejected.

Mr. COPELAND. Mr. President, I ask the adoption of the next amendment presented on behalf of the committee.

The PRESIDING OFFICER. The clerk will state the amendment to the amendment.

The LEGISLATIVE CLERK. In the committee amendment, on page 107, beginning with line 15, it is proposed to strike out:

SEC. 6. The Secretary of War is hereby authorized and directed to cause preliminary examinations and surveys for flood control at the following-named localities; the cost thereof to be paid from appropriations heretofore or hereafter made for such purposes: *Provided*, That no preliminary examination, survey, project, or estimate for new works other than those designated in this or some prior act or joint resolution shall be made: *Provided further*, That after the regular or formal reports made as required by law on any examination, survey, project, or work under way or proposed are submitted, no supplemental or additional report or estimate shall be made unless authorized by law or by resolution of the Committee on Flood Control of the House of Representatives or the Committee on Commerce of the Senate: *And provided further*, That the Government shall not be deemed to have entered upon any project for the improvement of any waterway mentioned in this act until the project for the proposed work shall have been adopted by law.

And in lieu thereof to insert:

SEC. 6. The Secretary of War is hereby authorized and directed to cause preliminary examinations and surveys for flood control at the following-named localities, and the Secretary of Agriculture is authorized and directed to cause preliminary examinations and surveys for run-off and water-flow retardation and soil-erosion prevention on the watersheds of such localities; the cost thereof to be paid from appropriations heretofore or hereafter made for such purchases: *Provided*, That no preliminary examination, survey, project, or estimate for new works other than those designated in this or some prior act or joint resolution shall be made: *Provided further*, That after the regular or formal reports made as hereby authorized on any examination, survey, project, or work under way or proposed are submitted to Congress, no supplemental or additional report or estimate shall be made unless authorized by law or by resolution of the Committee on Flood Control of the House of Representatives or the Committee on Commerce of the Senate: *And provided further*, That the Government shall not be deemed to have entered upon any project for the improvement of any waterway mentioned in this act until the project for the proposed work shall have been adopted by law.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The clerk will state the next amendment to the amendment.

The LEGISLATIVE CLERK. In the committee amendment on page 115, beginning with line 18, it is proposed to strike out:

SEC. 8. Nothing in this act shall be construed as repealing or amending any provision of the act entitled "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes", approved May 15, 1928, or any provision of any law amendatory thereof.

And in lieu thereof to insert:

SEC. 8. Nothing in this act shall be construed as repealing or amending any provision of the act entitled "An act for the control of floods on the Mississippi River and its tributaries, and for other purposes", approved May 15, 1928, or any provision of any law amendatory thereof. The authority conferred by this act and any funds appropriated pursuant hereto for expenditure are supplemental to all other authority and appropriations relating to the departments or agencies concerned, and nothing in this act shall be construed to limit or retard any department or agency in carrying out similar and related activities heretofore or hereafter authorized, or to limit the exercise of powers conferred on any department or agency by other provisions of law in carrying out similar and related activities.

The amendment to the amendment was agreed to.

The VICE PRESIDENT. The clerk will state the next amendment to the amendment.

The LEGISLATIVE CLERK. In the committee amendment on page 115, beginning with line 23, it is proposed to strike out:

SEC. 9. The sum of $315,000,000 is authorized for carrying out the improvements authorized herein and any examinations and surveys provided for in this act and other acts of Congress.

And in lieu thereof to insert:

SEC. 9. The sum of $310,000,000 is authorized for carrying out the improvements herein and the sum of $10,000,000 is authorized to be expended in equal amounts by the Departments of War and Agriculture for carrying out any examinations and surveys provided for in this act and other acts of Congress: *Provided*, That not more than $50,000,000 of such sum shall be expended during the fiscal year ending June 30, 1937: *Provided further*, That for the relief of unemployment, in addition to the regular appropriation, persons may be employed on such works of improvement and the compensation of said persons when so employed shall be paid from the funds, and available to the Works Progress Administration for the continuance of relief and work relief on useful projects.

The amendment to the amendment was agreed to.

Mr. COPELAND. The next amendment, amendment no. 6, I will be glad to have go over until tomorrow.

There are some amendments with reference to surveys to be added on page 108 and following pages, and, with the exception of those, I have nothing more to add.

Mr. McNARY. Mr. President, I ask that those matters go over until tomorrow.

Mr. COPELAND. I am perfectly willing that that should be done.

Mrs. CARAWAY. Mr. President, I have an amendment which I desire to offer on behalf of myself and my colleague the senior Senator from Arkansas [Mr. ROBINSON]. I send the amendment to the desk and ask to have it read.

The VICE PRESIDENT. The clerk will state the amendment.

The LEGISLATIVE CLERK. On page 72, after line 7, it is proposed to insert:

From North Little Rock, Ark., to Gillette, Ark., on the north bank of the Arkansas River: Levees to protect agricultural lands and communities; House Document No. 308, Seventy-fourth Congress, first session; estimated cost, $2,424,400.

Mr. COPELAND. Mr. President, the amendment contemplates the construction of levees on the north bank to the same grade as existing backwater levees on south bank. Their construction would jeopardize south levees, and extensive and valuable territory protected thereby, without compensatory advantages to less valuable area which would be afforded protection. A levee constructed with grade 3 feet lower than the south bank levee would provide protection against all but extreme floods, and is economically justified.

Therefore, with the cost of construction estimated at $2,424,400, the amendment will be accepted, so far as the committee is concerned.

Mr. McNARY. Mr. President, has the report of the engineers been favorable and has it been filed with the Committee on Commerce?

Mr. COPELAND. It has been.

Mr. McNARY. Why was not the item included in the bill?

Mr. COPELAND. Because, in the first place, it came to us at an estimated cost of $5,302,800. It was sent back to the Army Engineers, and the Army Engineers during the past week or two have made a restudy, and have given approval to the project at an estimated cost of $2,424,400.

Mr. ROBINSON. Mr. President, the amendment as now presented constitutes a modification of the original project. The project as originally presented by my colleague and myself was not approved by the engineers, but the proposal was modified to conform to the amendment presented by my colleague and approved by the engineers.

The VICE PRESIDENT. The question is on agreeing to the amendment presented by the junior Senator from Arkansas [Mrs. CARAWAY] to the amendment of the committee in the nature of a substitute.

The amendment to the amendment was agreed to.

Mr. CLARK. Mr. President, I desire to offer an amendment, and I may say I do not know why it has not been printed.

Mr. McNARY. Mr. President, will the Senator yield?

Mr. CLARK. I yield.

Mr. McNARY. I think there was an understanding that as soon as the Senate disposed of the amendment just offered by the junior Senator from Arkansas a recess would be taken.

Mr. CLARK. I do not wish to interfere with the agreement, but this is an amendment which has been twice adopted by the Committee on Commerce.

Mr. McNARY. Will not the Senator offer it tomorrow at 12 o'clock, when the Senate meets?

Mr. CLARK. If the Senator insists, of course I will have to let it go over.

EXECUTIVE SESSION

Mr. ROBINSON. Mr. President, if the Senator from New York is willing to suspend now, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The VICE PRESIDENT laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

Mr. HARRISON, from the Committee on Finance, reported favorably the nomination of SAMUEL B. HILL, of Washington, to be a member of the Board of Tax Appeals for a term of 12 years from June 2, 1936.

Mr. PITTMAN, from the Committee on Foreign Relations, reported favorably the nominations of several officers for appointment in the Diplomatic and Foreign Service.

He also, from the same committee, reported favorably Executive G, Seventy-fourth Congress, second session, being a supplementary extradition convention between the United States and Denmark, signed at Washington on May 6, 1936, and submitted a report (Exec. Rept. No. 3) thereon.

Mr. HAYDEN (for Mr. McKELLAR), from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

The VICE PRESIDENT. The reports will be placed on the Executive Calendar.

If there be no further reports of committees, the clerk will state the first nomination in order on the calendar.

POSTMASTERS

The legislative clerk proceeded to read sundry nominations of postmasters.

Mr. ROBINSON. I ask that the nominations of postmasters be confirmed en bloc.

The VICE PRESIDENT. Without objection, the nominations are confirmed en bloc.

RECESS

The Senate resumed legislative session.

Mr. ROBINSON. I move that the Senate take a recess until 12 o'clock noon tomorrow.

The motion was agreed to; and (at 5 o'clock and 18 minutes p. m.) the Senate took a recess until tomorrow, Thursday, May 21, 1936, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate May 20 (legislative day of May 12), 1936

APPOINTMENT IN THE REGULAR ARMY

TO BE ASSISTANT TO THE QUARTERMASTER GENERAL, WITH THE RANK OF BRIGADIER GENERAL, FOR A PERIOD OF 4 YEARS FROM DATE OF ACCEPTANCE, WITH RANK FROM AUGUST 1, 1936

Col. Richard Henry Jordan, Quartermaster Corps, vice Brig. Gen. William R. Gibson, assistant to the Quartermaster General, to be retired July 31, 1936.

VERMONT

Thomas H. Barry, Waterbury.

HOUSE OF REPRESENTATIVES

WEDNESDAY, MAY 20, 1936

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

We thank Thee, our Father in Heaven, that we are permitted to bow at the altar of prayer. For at Thy mercy seat burdens are rolled away; at Thy touch we have gone on our way rejoicing. In all our problems we need Him who taught us the spirit of good will and how to make beautiful the thresholds of home, school, and church. We thank Thee for the providential blessings of happy firesides, for social delights, for friendships, and for all those satisfactions and joys of a just and worthy life. We praise Thee for this radiant day. O, happy is he who looks up through the fluttering leaves and sees God's love, who sees the bright depths of the deep blue sky and feels that it is a canopy of blessing; may we look deeper and feel that an infinite God is at the heart of all. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate had passed with amendments, in which the concurrence of the House is requested, a bill of the House of the following title:

H. R. 9185. An act to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes.

The message also announced that the Senate insists upon its amendments to the foregoing bill, requests a conference with the House thereon, and appoints Mr. KING, Mr. BARKLEY, and Mr. CAPPER to be the conferees on the part of the Senate.

PERMISSION TO ADDRESS THE HOUSE

Mr. CROSS of Texas. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. CROSS of Texas. Mr. Speaker, far to the southwest on this side of the Rio Grande is a vast empire called Texas. The Colorado and Brazos, the two main rivers of that region, rise in New Mexico and find their way to the Gulf through the great central agricultural basin of the State. The Brazos in crossing Texas traverses some 900 miles before reaching the Gulf, while the Colorado does approximately the same. The drainage area of the Brazos is 44,600 square miles, while that of the Colorado is 41,500, the two together being an area more than twice as large as the State of Ohio. And within their watersheds is 40 percent of the population of the State, or some 2,400,000 people. The valleys that flank these streams are unsurpassed in fertility. They are dotted with many thousands of farms, and upon which depends the prosperity of hundreds of towns and cities. These streams on an average of every 5 years are subject to devastating floods, submerging between three and five million acres of land and causing the loss of many lives, as well as the destruction of untold millions of dollars in livestock and crops, to say nothing of the enormous damage resulting from erosion and soil depletion.

For many years not only the people, the cities and towns that depend upon the products of these rich valleys for support, but all Texas has looked to the day when these floods would be controlled and the frightful loss of life and property brought to an end. Before applying to governmental agencies for a loan to construct the necessary dams to control these floods so destructive of life and property, the State, in order to show its good faith and to demonstrate beyond any question that these projects would be self-liquidating, in the case of the Brazos project passed an act setting aside the taxes to accrue from 10 counties over a period of 20 years to be added to the money to be obtained from the sale of hydroelectric energy to be generated at these dams, while an act was also passed by the legislature in the interest of the Colorado project. With such showings, both applications were promptly approved.

Texas was thrilled by this good news, for it was not only to result in the employment of thousands whose families were in dire need of food and clothing but it also meant the coming true of a dream long and devoutly wished. But this exaltation was fated to turn into the gall of bitter disappointment through the greed-impelled, selfish activities of a great monopolistic holding company domiciled at 2 Rector Street, New York, in ordering its puppet officials of the power companies in Texas to hie themselves 2,000 miles away to the city of Washington and to file in the Federal court of this district an injunction suit to restrain and prevent the governmental agencies from making these loans on the ground that it would result in hydro-electric energy generated at these flood-control dams coming in competition with their unconscionable monopolistic rates, contrary, as they claim, to the due process of law clause of the Constitution, and prayed that the court issue an injunction and thus permit these floods to continue uncontrolled to destroy the lives and property of the people in order that this monopolistic holding company might continue to enrich itself by collecting exorbitant tribute from the users of electricity.

Mr. Speaker, the lamented Will Rogers, the great philosopher-humorist, who constanly spoke as one inspired, declared: "A holding company is jus like a fence that holds the stolen booty while the actual thieves escape from the law."

Mr. Speaker, in other words, a holding company is a corporate pirate devised by high-financiering buccaneers that neither produces, distributes, nor performs any necessary service, but under our dual system of government furnishes an ideal device for the monopolization of public utilities, enabling a few men with but little investment, by interlocking directors and manipulating through a chain of so-called holding companies to control and milk producing companies, and in so doing collect exorbitant tribute from the people. And this money, though sorely needed to do the money work in the communities where the power plant operates, is daily transported to some distant city where the holding company and its brood of alias subholding companies are domiciled.

Mr. Speaker, the Federal Trade Commission, after several years of delving into the mysteries of these holding and subholding companies, has revealed the fact that almost without exception the master minds that control and manipulate these devices are those great captains of finance, the Morgans and Mellons, the Du Ponts, and Rockefellers.

Since the Texas Power & Light Co. which operates in my district is non-hydraulic and the rates charged by it are comparable to those charged by other power companies controlled by holding companies throughout the Nation, I am going to use this company to illustrate to you what the power companies that operate in your districts are doing to your constituents.

That superholding company, the Electric Bond & Share with its four monster sub-holding companies, the American & Foreign Power & Light, the American Power & Light, the National Power & Light, and the Electric Light & Power Corporation, are all domiciled at 2 Rector Street, New York, and are controlled and manipulated by the house of Morgan. The first named operates in foreign countries, while the three latter confine their activities exclusively to this country, controlling power or producing companies in 36 of the States.

These sub-holding companies are only so many corporate aliases for Electric Bond & Share, by meahs of which it juggles water into controlling stock and fictitious loans into mortgage bonds in order to build up a stupendous, fraudulent rate base.

So in presenting the Texas Power & Light Co. as a typical example of what happens when a holding company controls a power or producing company, and in order to simplify and

avoid confusion wherever the Electric Bond & Share holding company acts through an alias sub-holding company, I shall use the name of the holding company, the Electric Bond & Share.

The thriving and prosperous cities of Temple, Waco, Hillsboro, Waxahachie, Cleburne, Sherman, and Bonham are located in seven of the State's banner agricultural blackland counties. In the latter part of 1911 the Electric Bond & Share Co. purchased the power plants in these cities and in the early part of 1912 organized and secured a charter from the State for the Texas Power & Light Co. The Electric Bond & Share holding company paid for these seven properties as shown by the records furnished to the Federal Trade Commission $2,065,000. The Electric Bond & Share further claimed that including certain moneys it had advanced, together with the cost of the options and the securing of the Texas Power & Light Co.'s charter, it was out an additional $325,000, making these properties cost it all told $2,390,000.

The Electric Bond & Share then conveyed these properties to its creature, the Texas Power & Light Co., and had its Punch and Judy officers and directors to pay for them by issuing not $2,390,000 in stock, but $1,500,000 in debentures or promissory lien notes, drawing 6 percent; 1,000 non-voting shares, $100 par value, totaling $1,000,000; 1,610,000 common or voting shares, $5 a share no par value, totaling $8,050,000, or a grand total of $10,550,000. And so, not $2,390,000, but $10,550,000, was entered upon the books of the Texas Power & Light Co. as the cost of these properties and formed the base upon which to fix the rates that consumers of electricity were to pay, instead of $2,390,000.

The Electric Bond & Share Co. then sold to the people of Texas this $1,000,000 of 7-percent preferred stock and also disposed of the $1,500,000 of 6-percent debentures—making $2,500,000—and so got back the $2,390,000 that it had paid out, and had plus a bonus of $110,000, plus $8,050,000 of common stock carrying complete control of the Texas Power & Light Co. that had cost the Electric Bond & Share Co. $110,000 less than nothing.

The Electric Bond & Share Co. then had its puppet officials of the Texas Power & Light Co. to execute a so-called service contract, whereby the Electric Bond & Share Co. is to employ for the Texas Power & Light Co. all bookkeepers, adjusters, accountants, and engineers. That provides that the Texas Power & Light Co. is to pay to these employees such sums for their services as the Electric Bond & Share sees fit to designate. It further provides that in the case of all sums paid by the Texas Power & Light Co. to bookkeepers, adjusters, and accountants, the Texas Power & Light Co. is to pay 50 percent of that sum, or one-half of that amount, to the Electric Bond & Share Co. And that in the case of all sums paid out for engineering service, 90 percent over and above that must be paid to the Electric Bond & Share. So that if the Texas Power & Light Co. pays $20,000 to bookkeepers, adjusters, and accountants, it must then pay $10,000 to the Electric Bond & Share Co., making this service cost the Texas Power & Light Co. $30,000. If the Texas Power & Light Co. pays out the sum of $20,000 to employees for engineering services, the Texas Power & Light must pay $18,000 to the Electric Bond & Share, making this service cost the Texas Power & Light Co. $38,000. And these sums are entered upon the books of the Texas Power & Light Co. as operating cost and go into the rate base. So that the more the Electric Bond & Share Co. requires the Texas Power & Light Co. to pay these employees, the more the Electric Bond & Share Co. gets from this source out of the Texas Power & Light, and the higher the rate base of the Texas Power & Light Co. is inflated.

This so-called service contract further provides that the Texas Power & Light Co. is to turn over to the Electric Bond & Share Co. 1½ percent of its gross revenues monthly. And this is entered on the books of the Texas Power & Light Co. as operating expense.

And then this holding company, the Electric Bond & Share, organized the Texas Construction Co., domiciled in its offices at 2 Rector Street, New York, the stock of which is exclusively owned by the Electric Bond & Share, and to which all contracts for improvements and extensions by the Texas Power & Light Co. are to be let without competition, and with no other check except the tender conscience of the Electric Bond & Share. And however exorbitant these charges may be, they go on the books of the Texas Power & Light Co. as capital invested and inflate the rate base.

Mr. Speaker, the sole purpose of holding companies in the field of public utilities is to monopolize and by controlling producing companies to enrich themselves by forcing the consumers of electricity to pay exorbitant rates. This is done first by increasing the rate base through inflating the capital structure of the producing companies with watered stock and, second, by giving fictitious values through write-ups to their physical properties.

In this company I am using as a typical example, the Texas Power & Light Co., and in which the first big swindle took place immediately after it was organized by the Electric Bond & Share, when there was a write-up from $2,390,000 to $10,550,000. These write-ups have been continued from time to time, and markedly so whenever the Electric Bond & Share had additional plants under its control transferred to this producing company. So that these original properties, together with the additions, as a result of these write-ups, are valued at more than $80,000,000. And as these producing companies under the control of the Electric Bond & Share holding company were transferred to the Texas Power & Light Co., a sufficient amount of non-voting preferred stock was sold to the people of Texas to reimburse the holding company, the Electric Bond & Share, whatever sums it had been out plus a block of vote-carrying common stock as a bonus. As a result the people in Texas have invested $6,500,000 in 7-percent preferred stock and $6,878,600 of 6-percent preferred stock, making $13,378,600, and which is destined to be wiped out by the foreclosure of the fictitious bonded indebtedness. To anyone who is familiar with the properties of this company and their actual value, it is patent that the people in Texas who put up this $13,378,600, through the purchase of preferred stock, have furnished every dollar that has actually gone into them and that no benefit accrued to the Texas Power & Light Co. as a result of this bonded indebtedness, but that it enriched the coffers of the Electric Bond & Share holding company to the detriment of the preferred stockholders and the consumers of electricity.

Now, in order to make the assets comparable to the liabilities—that is, to the capital stock of $33,443,976, more than $20,000,000 of which was manufactured out of water, carrying 100-percent control in the hands of the holding company, and the bonded indebtedness of $45,405,000 as well as other indebtedness—a number of sky-high write-ups of the physical properties of this company had to be made, until the company's statement in December 1934 shows its physical properties valued at $86,104,472. And this enormous sum resting on fictitious values becomes the rate base on the theory that it represents capital invested and upon which the courts hold the company is entitled to a reasonable return.

The only period for which the Securities and Exchange Commission has data showing the amount of dividends paid on common and preferred stock covers the 6 years from 1929 to 1934, inclusive, which were depression years. And for that 6-year period the holding company received as dividends on its common water bonus stock $8,400,000, while the holders of the preferred stock, who paid for it their good hard-earned money, only received $4,734,349.

Thus the holding company, the Electric Bond & Share, receives practically twice as much in dividends on its water-bonus stock as the preferred-stock holders who put up their hard-earned money. Then add to the holding company's watered stock dividends its exorbitant profits accruing from the Texas Construction Co., plus its so-called service-contract profits, plus interest on many millions of pretended loans, and you have a concrete example of holding-company high financiering. This is one of the smaller of the many, many producing companies controlled by the Electric Bond

& Share holding company and used by it as a tribute collector from the consumers of electricity.

While comparisons may be odious, I am going to give you one which at least furnishes food for thought. The little town of Garland, with some 1,500 population, in Congressman SUMNER's district, has a small municipal plant and ships its fuel several hundred miles, from Oklahoma. This fact, in addition to its being a one-unit plant, makes its overhead extremely high. It is true that this little plant is not assessed for taxes, but it is also true that it furnishes to the city in services several times what the taxes would amount to, for it not only pumps the water that supplies the city free but in addition furnishes all municipal and street lights free, and it is known as the best lighted town of its size in Texas. This little plant clears, as shown by data furnished by the city secretary, between four and five thousand dollars a year. The following is a comparison of the rates charged by this little municipal plant to the citizens in Garland with the rates charged the citizens of Killeen, a town of similar size, by the Texas Power & Light Co.:

ELECTRIC RATE SURVEY—TEXAS

TABLE 1—*Typical net monthly bills, residential service, Jan. 1, 1935*

Line	Community	Population	Name of company or municipal utility serving community: (I) indicates independent operating company; (C) company controlled by a utility holding company or other operating utility; (M) municipally owned and operated utility)	Lighting and small appliances					Lighting, small appliances, and refrigeration		Lighting, refrigeration, cooking, etc., 240 kilowatt-hours	Lighting, refrigeration, cooking, water heating, etc., 500 kilowatt-hours	Average charge per kilowatt-hour				Line
				Minimum bill		15 kilowatt-hours	25 kilowatt-hours	40 kilowatt-hours	100 kilowatt-hours	150 kilowatt-hours			25 kilowatt-hours	100 kilowatt-hours	250 kilowatt-hours	500 kilowatt-hours	
				Amount	Kilowatt-hours included												
													Ct.	*Ct.*	*Ct.*	*Ct.*	
1	Garland	1,584	Garland Light & Power Co. (M)	$1.00	10	$1.15	$1.74	$2.25	$3.61	$4.68	$6.80	$11.26	6.96	3.61	2.72	2.25	1
47	Killeen	1,200	Texas Power & Light Co. (C)	1.50	7	2.00	2.60	3.35	5.95	7.45	8.75	13.75	10.40	5.95	3.50	2.75	47

And this in spite of the fact that the Texas Power & Light Co.'s overhead is reduced to a minimum, distributing from a central generating plant located at its own fuel mine, to say nothing of the advantages in reduced prices of equipment that accrue to it as a result of buying in large quantities.

The money spent by the consumers of electricity in Garland remains in the community to do the money work of the community, while the money spent for electricity by the people of Killeen is exported more than 2,000 miles away to 2 Rector Street, New York.

If the Electric Bond & Share holding company had not gotten control of these properties and they had been controlled and managed by those who put the money in them, not only could their dividends and the wages of their employees been greatly increased, but the rates to the consumers of electricity reduced practically 50 percent, and the millions that are now annually exported to 2 Rector Street, New York, would remain in Texas. As it is the sum now taken out of Texas by the Electric Bond & Share through its three subholding companies, the American Power & Light, the National Power & Light, and the Electric Light & Power Corporation, over a period of 5 years, amounts approximately to what an entire year's cotton crop of the State will sell for.

Last year, during the consideration of the Wheeler-Rayburn or holding-company bill, propaganda reached an all-time high—with the holding companies pouring out millions, providing a heyday of golden prosperity for lobbyists. Washington swarmed with them of every hue and type, the friendship lobbyist, the social lobbyist, the political threatening lobbyist. Night after night men and women, posing as heads of high-sounding, memberless, fake organizations, repeated parrotlike, over a Nation-wide radio hook-up, speeches prepared by the $60,000-a-year publicity agent of the holding companies, appealing to their victims upon whom they had unloaded so-called preferred stock to come to see, to write, or wire their Senators and Congressmen to vote against the bill or be ruined. You remember how we were swamped and flooded with telegrams identical in form, tens of thousands of which were shown by the Senate Committee on Lobbying to be forgeries; the evidence disclosing that some of the officials of the producing companies, the creatures of the holding companies, had instructed their employees to take city directories and to forge all the names in them to telegrams and send them to Senators and Congressmen. It was developed later by the Senate Committee to Investigate Lobbying that instead of being against it, practically all of the people whose names were forged to these telegrams were ardently in favor of the bill. Under the Constitution, which specifically provides that our constituents shall have the right to petition us expressing their views on legislation, in committing these forgeries, the officials of these holding companies, acting through their puppet officials of producing companies, were committing forgeries in the very shadow of treason. While then as now we heard their hypocritical wails that if Congress passed this bill and choked them loose from their victim it would be a violation of the Constitution. And many members of the legal profession, who put pelf above patriotism and "crook the pregnant hinges of the knee where thrift might follow fauning", joined in the wail.

As a result of the investigations of the Federal Trade Commission, of the House and Senate Lobby Investigating Committees, as well as the hearings on the Wheeler-Rayburn bill before the Interstate and Foreign Commerce Committee, which was so ably assisted by their attorney, Dr. Splawn, we now know what methods these holding companies have pursued in so long throttling any laws being enacted that would materially interfere with their carrying on this Nation-wide racket of rackets. We now know it was the result of carefully fostered powerful political influences, for these hearings reveal the fact that they not only managed to get much of the preferred stock into the hands of prominent influential men, including outstanding ministers of the gospel, but also wherever possible they would unload a block of it upon some organization that might be used in putting pressure upon legislative bodies to defeat any bill that would tend to prevent their hijacking manipulations, as was done by the Texas Power & Light Co. when it unloaded such a block on the Texas Federation of Women's Clubs. We know now how the press was to be kept friendly by instructions sent out to the puppet officials of producing companies to run extended ads in all the local papers, and, as stated in the instructions, that it was not for the purpose of selling electricity, but to silence and keep down criticism.

While a fearless independent press is the food upon which liberty feeds and grows, a subsidized press is to it a most deadly poison.

And we know, too, from these lobbying investigations the tactics their speakers were instructed to use in addressing chambers of commerce, luncheon clubs, and other organizations. And then in rounding out their political set-up how zealous they are to place on their dummy boards of directors

men of outstanding political influence, such as the head of some great denominational institution. When such a man will permit himself to be used in this way to serve their purpose, the holding company sees to it that his picture appears on the front page of every newspaper in the section where that company operates, advertising it in box-car letters, to be paid for by the consumers of electricity, that he had been placed upon their board of directors. And though he is as ignorant of the power industry as the holding company is of God's plan of salvation, it tickles the one's vanity while strengthening the political set-up of the other.

But it was reserved for that super-holding company, the Electric Bond & Share, to conceive and promulgate that master plot of treachery that must have made angels weep and demons rejoice. The Lobby Investigation Committee of the Senate performed a glorious service for their country when they exposed this diabolical plan. Yes; it happened here, and is happening here today. Listen to the plan:

First, set up a militant organization of the security owners of America, with a "war chest" of something like $200,000,000 for the purpose of destroying the New Deal. Second, "employ the services of the most astute political publicists and lobbyists to be found in the country." * * * Third, demand "a congressional investigation of the 'brain trust' * * * designed to expose it to public contempt." Fourth, start "a whispering campaign designed to create popular suspicion that the New Dealer in Chief is insane, discrediting him." Fifth, "liquidate the Federal Trade and Interstate Commerce Commissions." Sixth, set up a "program by private industry, acting through the United States Chamber of Commerce." Seventh, "engage outstanding national figures, such as Nicholas Murray Butler, Edwin S. Kemmerer, Newton D. Baker, and others, to act as mouthpieces and release publicity * * * upon the middle-class citizenry." Seventh, "support in 1936 political campaign for President and congressional candidates, regardless of party, who pledge themselves to support the program of the security owners' organization."

And then incorporated in this plan is the declaration that there is nothing which would better serve the interest of the holding companies than the "putting over" of this program; and surely none will question that statement, as it would guarantee to them the economic and political dictatorship of the Nation, with the United States Chamber of Commerce playing the fiddle, while they collect tribute from some hundred and twenty-five millions of subjects.

This infamous program closes with these significant words: "The company as a company dare not be identified with the activity."

There you have their plan of battle and the objectives for which they have begun to fight, running in method and manner true to the plan. They have set up the militant organization, the Liberty League, with its affiliates, the Sentinels of the Republic, the Crusaders, the Farmers Independent Council, the Southern Committee to Uphold the Constitution, the Women Investors of America, and others—smokescreens from behind which their paid hirelings are now howling. From the editorial and syndicated columns in the great metropolitan press it is evident that, as proposed, they have already employed the services of those "most astute publicists and propagandists" and ordered them into action.

And it is equally plain that from the harangues reeking with malicious exaggerations and concocted falsehoods coming nightly over the radio that their "outstanding national figures to be used as mouthpieces to release publicity upon the middle-class citizenry" have also "gotten theirs" and been ordered into action.

A whispering campaign, a contemptible, sneaking campaign of hell-born lies that our President was hopelessly insane in the vain hope that the people would be thrown into such a state of confusion and despair that they might work upon them their will and encompass his defeat. A whispering campaign to destroy the man who had saved them from the guillotine in having saved the country from revolution. "Ingratitude, thou marble-hearted fiend", of all the devils men should hate thee most. But this den of Satan-inspired whispering serpents had hardly begun to hiss when the President's great heart-throbbing brain thrilled through the radio on the air and their foul whisperings abruptly ended.

How, too, in keeping with this whispering campaign as well as all of their undercover hidden manipulations is their closing admonition at the end of the plan: "Our company as a company dare not be identified with the activity."

That is the language of the master mind of racketeers, of an Al Capone, who stays under cover while others carry out his plans. And you, my colleagues, who voted for the conference report on the Wheeler-Rayburn bill are to be put on the spot on election day. Your political death is decreed in the holding company's program in this language: "Support in 1936 political campaign for President and congressional candidates, regardless of party, who pledge themselves to support the program of the security owners' organization." Your local utility officials may be loud in their protestations that they are for you while condemning your opponent, and in turn having him to denounce and excoriate holding companies, and so, by this double-crossing process, enable him to split a vote that would otherwise be yours, while getting theirs a hundred percent. But do not be deceived, my colleagues, for you are marked for slaughter, and if money can defeat you, you will be defeated.

It was indeed an evil day for you, my friends of the minority, when Du Pont and his "gang" set up the Liberty League and its satellites to act as holding companies for your party, for its embrace means death. And so you will find this Liberty League is not only a holding company, with all the knavery that word implies, but that it is also a political undertaker which is even now digging a grave wide and deep for the Republican elephant, a grave of shame and dishonor, over which is to be erected in November a monument with this brief epitaph carved upon it: "Here lies the last remains of the G. O. P., another sad victim of holding companies." And as you, in your political rags, biannually gather about it with heavy hearts and in your anguish cry out, "When, oh, when will his resurrection come?" Perched on that monument a croaking raven, the Liberty Leagues' evil spirit, will respond, "Never, never more."

PRINTING OF RULES AND MANUAL OF HOUSE OF REPRESENTATIVES

Mr. LAMBETH. Mr. Speaker, I offer a privileged resolution, House Resolution 519, and ask for its immediate consideration.

The Clerk read the resolution, as follows:

House Resolution 519

Resolved, That the Rules and Manual of the House of Representatives for the Seventy-fifth Congress be printed as a House document and that 1,600 additional copies shall be printed and bound for the use of the House of Representatives, of which 700 copies shall be bound in leather with thumb index and delivered as may be directed by the Parliamentarian of the House for distribution to officers and Members of Congress.

The SPEAKER. The question is on agreeing to the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

IMPORTATION OF TEXTILES FROM JAPAN

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to proceed for 1 minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include therein a letter from Mr. Russell Fisher, of the National Association of Cotton Manufacturers.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

The letter referred to is as follows:

THE NATIONAL ASSOCIATION OF COTTON MANUFACTURERS,
Boston, Mass., May 19, 1936.

Hon. EDITH NOURSE ROGERS,
House of Representatives, Washington, D. C.

DEAR MRS. ROGERS: The flood of Japanese cotton goods increases month by month, making it very obvious that the "gentlemen's agreement" effected by the State Department is wholly inadequate. March figures, now available, show an increase of nearly one-third over February, and bring the total for the first quarter to 21,530,436 square yards compared to a total of 12,769,579 square yards for the same period in 1935.

If the imports continue to increase, and apparently nothing is being done to stop them, by the end of the year the volume will be more than double the figure for 1935.

For comparison it should be pointed out that imports from Japan for the first quarter of 1936 are more than 20 times the annual average for the years 1930 to 1933. It would seem that official Washington might well give some attention to the unemployment this is creating, particularly now that the cost of relief is mounting to such staggering figures.

Yours very truly,

(Signed) RUSSELL T. FISHER.

Mrs. ROGERS of Massachusetts. Mr. Speaker, this letter shows the tremendous increase of cotton-textile imports from Japan in March as compared with February of this year. It shows 20 times the cotton-textile imports into this country at the present time over what they were in 1930–33.

Mr. Speaker, many of us have been taking up the matter with the Department of State, in view of the very alarming situation. I have been in almost daily communication with the Department about it. Only yesterday I received the following letter from Secretary of State Hull, which shows just how weak our position is:

DEPARTMENT OF STATE,
Washington, May 19, 1936.

MY DEAR MRS. ROGERS: I am returning herewith telegrams addressed to you by the Waterhead Mills, Inc., and Boott Mills, both of Lowell, Mass., with reference to imports of cotton textiles from Japan. These telegrams have been referred to me by the President with the request that I communicate directly with you.

As you know, this Government has been giving careful attention to the problem of imports of Japanese cotton textiles for some months. In accordance with the recommendations made last year by the Cabinet committee on the cotton-textile industry, an effort was made to secure a voluntary undertaking by Japanese exporters to limit shipments of cotton cloth to the United States to reasonable amounts. Such an assurance was transmitted to this Government through the Japanese Ambassador on December 21, 1935. It was the opinion of the Japanese Government, in view of this assurance, that there was little likelihood of such abnormal increase in exports of cotton textiles to the United States as had occurred during the first 6 months of 1935.

When the statistics of imports for the first months of 1936 became available, it appeared that these expectations had not been well-founded, inasmuch as imports showed a considerable increase. This Department promptly brought the facts to the attention of the Japanese Ambassador as soon as the January figures were available.

Conversations have been continued, with the approval of the President, and there is now expectation that a more definite, adequate, and satisfactory undertaking for the voluntary limitation of cotton-textile exports from Japan to the United States may be received. A few minor details remain to be clarified, but I expect that it may be possible to announce the conclusion of these negotiations in the very near future.

I also understand that the Tariff Commission is proceeding with an investigation of cotton velveteens under its general powers as provided in section 322 of the tariff act. When completed, this report should give a complete picture of the situation with regard to this particular product.

Sincerely yours,

CORDELL HULL.

Just another "gentleman's agreement" with Japan! The previous one was nothing but a farce, and to date we have nothing but promises and expectations. Japan looks upon us as spineless jellyfish, and obviously they think that because we do not show resentment they can do as they please.

The time has passed for playing with gentleman's agreements. We must have something binding, something that will protect our workers. We are tired of promises that are never fulfilled. It is the old cry of "mañana, mañana", but tomorrow never comes.

The SPEAKER. The time of the gentlewoman from Massachusetts has expired.

PASSAGE OF THE WAGNER-ELLENBOGEN HOUSING BILL IS NECESSARY TO PROMOTE FURTHER RECOVERY, REDUCE UNEMPLOYMENT, AND SECURE DECENT HOUSING

Mr. DRISCOLL. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include therein an address made by my colleague, Mr. ELLENBOGEN, of Pennsylvania, over the radio last evening.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. DRISCOLL. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following radio address delivered by Congressman HENRY ELLENBOGEN, of Pittsburgh, Pa., over National Broadcasting System (Blue Network) Tuesday, May 19, 1936:

Nearly 6,000,000 people have been reemployed in the United States since March 1933, but about 10,000,000 people are still unemployed. How does this come about and what can we do to reduce substantially the number of jobless?

ALL BRANCHES OF INDUSTRY EXCEPT BUILDING HAVE HAD SUBSTANTIAL RECOVERY

The consumer-goods industries—industries which manufacture goods for immediate consumption—have had extensive recovery. The automobile industry is operating near capacity and turning out almost as many millions of cars as it did during the boom days. Even the heavy- and durable-goods industries have made substantial recovery and seem to be progressing rapidly. Steel, for instance, is now operating at about 70 percent of its theoretical capacity.

THE BUILDING INDUSTRY IS STILL IN THE DEPTH OF THE DEPRESSION

One industry is lagging behind—lagging behind so far that it cannot even be seen in the recovery parade. That industry is the building industry. If you consider the fact that nearly 5,000,000 people are directly and indirectly depending on the building industry, and if you further consider the deplorable low state of operations in that industry, you will find the most important reason why we still have 10,000,000 unemployed.

Taking only 257 cities—not the whole country, but only 257 large cities—we find that from 1923 to 1928, inclusive, total building operations in the United States amounted to between three and one-half and four billion dollars every year. But in 1935 they amounted to only $655,213,410, or about 20 percent of normal operations. If we consider only the building of homes in these 257 cities, we find normal building operations varying between two and two and one-half billion dollars every year from 1923 to 1928, whereas in 1935 they amounted to $211,987,850, or only a little over 10 percent of normal.

EIGHTY PERCENT OF THE BUILDING TRADES WORKERS ARE UNEMPLOYED

A few weeks ago, Mr. William Green, president of the American Federation of Labor, appearing before the Senate Committee on Education and Labor, on behalf of the Wagner-Ellenbogen housing bill testified that in 1929 there were 2,091,000 gainfully employed workers in the construction industry of which about 11 percent were unemployed in that year, but that throughout 1935 out of these 2,000,000 workers 1,732,383 or about 85 percent were unemployed. From 1930 to 1936 unemployment in the building-trade industry fluctuated from 70 to 85 percent. Just think of it! Here is an industry upon which 5,000,000 people depend directly and indirectly for employment—an industry which still has an unemployment record of about 80 percent. These figures tell the story.

HOUSING SHORTAGE—10,000,000 NEW HOMES NEEDED IN THE NEXT 10 YEARS

Recovery cannot advance any further unless we have substantial recovery in the building industry; and there can be no revival of the building industry unless we engage upon a large-scale program of the construction of homes.

There is today an acute shortage of decent housing. Consider the fact that we have annually an increase of 500,000 new families, consider the obsolescence of existing buildings, the normal demand for replacement, the destruction of buildings by fire and other factors. The best estimate available is that we must build during the next 10 years at least 10,000,000 new homes in the United States.

PASSAGE OF THE WAGNER-ELLENBOGEN HOUSING BILL NECESSARY

The bill introduced in the United States Senate by Senator ROBERT F. WAGNER, and in the United States House of Representatives by myself is the answer to the twin problem of unemployment and the shortage of decent, sanitary homes.

Of course, we do not contend that subsidized housing provided for in the bill will construct all the necessary homes. We feel that the construction of homes for families of low income, subsidized in part by the Government, will stimulate the private construction industry as it did in England.

I feel that the Wagner-Ellenbogen bill will remove the tragedy of need amidst plenty, the tragedy which exists when millions of decent homes are needed, while the building-trades workers who would build these homes are available but must live, or rather exist, in enforced idleness.

Carpenters, bricklayers, electricians, mechanics, and other skilled workers look for jobs in vain. Several million people depend directly and indirectly on the building industry for employment. Warehouses and lumber yards are bulging with needed material. Industrial plants, which could supply other needed building materials, are lying idle. At the same time millions of families are forced to live in slums or blighted areas which shut them off from light, sunshine, and hope. But nothing is done. Nothing is done to give employment, to stimulate construction activities, and to provide safe and sanitary homes that are so greatly needed. And I say to you that nothing will be done unless the Congress of the United States passes the Wagner-Ellenbogen housing bill.

The passage of that bill would supply the spark that would launch a gigantic construction program, that would begin a permanent revival of the building industry, and that would start our Nation toward still further recovery on a permanent basis.

THE FIGHT FOR DECENT HOUSING BEGAN IN 1900

The efforts of enlightened citizens to improve the housing conditions of our people goes back to the beginning of the century. In 1900 the first tenement law was passed in the State of New York. Ever since then the fight for good housing, for better housing, for decent, safe, and sanitary homes for families of low income has been carried on.

SLUMS BREED CRIME AND DISEASE

The United States has gradually awakened to the fact that slums and blighted areas are the breeders of crime and disease and that they are a tremendous burden upon the municipalities in the United States.

Mr. Ernest J. Bohn, member of the Cleveland city council and president of the National Association of Housing Officials, testified before the same Senate committee that an investigation by the city of Cleveland of a slum area which covered only 2½ percent of the population of the city showed that in that slum area 21 percent of the murders were committed, 26 percent of the houses of prostitution were located, 6.8 percent of all boy delinquencies arose in this area, 12½ percent of tubercular deaths occurred in it.

SLUMS ARE A BURDEN UPON CITY TREASURIES

The investigation by the city of Cleveland further showed that the total tax assessment against this area amounted to $225,035—most of which was uncollectible—whereas the expenditure of the city for police, fire, health, school, and other municipal services amounted to $1,971,000. Therefore, the city, even if it collected all taxes in that slum area, would have an annual loss of about $1,746,000, a loss which must be borne by the home owners living in the other sections of the city every year. Similar conditions exist in hundreds of other cities in the United States.

In the city of New York the number of deaths from tuberculosis in the lower tenement houses is 220 percent higher than the deaths in the newer tenement houses. At the same time, deaths from spinal meningitis is 247 percent higher in the old tenement houses than in the new ones. Deaths from all causes is 87 percent higher in the old tenement houses than in the new ones. Juvenile delinquency is 100 percent higher in the slum areas than in the nonslum areas.

Why should we hold community and family welfare drives and permit the continuance of slum conditions which make such drives necessary? Why hold drives against the dreaded disease of tuberculosis when we force families of low income to live in homes where sunlight is shut out?

HOUSING EFFORTS OF THE ADMINISTRATION

Realizing the need for the stimulation of employment in the building industry, the need for the abolition of slums and blighted areas, and the demand for new housing, the Federal Government, under Secretary Harold L. Ickes, P. W. A. Administrator, and his housing division, undertook 57 developments, providing about 26,000 dwelling units, with an allotment of $141,000,000. Similarly, the suburban resettlement division was allotted $31,000,000 with which it undertook to construct four low-cost-housing community developments.

PERMANENT POLICY AND PERMANENT AGENCY ARE NECESSARY

We now have the benefit of the tremendous amount of experience gathered and accumulated in the housing division of the P. W. A. and in the suburban resettlement division. We also know that low-cost housing cannot be undertaken under a temporary housing policy and a temporary housing agency. We must have a definite, a permanent housing policy and a permanent housing agency if we want to build low-rent housing in the United States.

THE WAGNER-ELLENBOGEN BILL IS THE RESULT OF LONG STUDY

As a result of the experience accumulated by these Government agencies and as a result of other experimentation, surveys, and thought on the part of all groups and individuals interested in finding some solution for the housing problem, we presented the Wagner-Ellenbogen housing bill to the Congress and to the people of the United States. We have moved slowly, because the problems involved are so serious and complex that no hasty or partial solution will do.

THIS BILL HAS WIDESPREAD SUPPORT

The Wagner-Ellenbogen housing bill has the support and endorsement of the National Public Housing Conference; of the National Association of Housing Officials; of the churches. This bill has the unanimous support and determined backing of the American Federation of Labor. Indeed, it has the unanimous support of all persons and individuals who have interested themselves in the problem of slum abatement and decent homes for families of low incomes.

The Wagner-Ellenbogen bill has been endorsed by large and small communities alike. It has been endorsed by the cities of New York, Chicago, Los Angeles, Cleveland, Boston, Philadelphia, Pittsburgh, and other large cities. It has also been endorsed by hundreds of smaller communities like Kittanning, Pa.; Bethlehem, Pa.; Greenville, N. C.; and El Paso, Tex., and by many hundreds of small cities. There has never been a bill before the Congress of the United States which has received more widespread support among all classes and among all kinds of communities than the Wagner-Ellenbogen housing bill.

BILL PROTECTS PRIVATE INDUSTRY AGAINST GOVERNMENT COMPETITION

This bill protects private industry against competition from the Government, and at the same time provides subsidized housing with Federal aid for families of low incomes. It has received the acclaim not only of liberal and progressive newspapers, like the chain of Scripps-Howard newspapers, but it also has been approved by leading conservative newspapers throughout the country.

THIS BILL IS NONPARTISAN LEGISLATION

In its very essence this bill is nonpartisan legislation. The need for low-cost housing was recognized in Mr. Hoover's administration. The committee on large-scale operations of Mr. Hoover's Conference on Home Building and Home Ownership reported that "the houses of the country constitute our largest mass of obsolete and discredited equipment." They pointed out that "new houses of acceptable standard of living are too expensive for two-thirds of the population", and they showed that "the present break-down in the financing, construction, and distribution of homes is more than a temporary or emergency situation" and therefore requires more than emergency measures for its solution.

The awakened local interest in the housing problem today knows no party line. What other issue can you find in which local governmental officials, both Democratic and Republican, social agencies, labor, consumer organizations, and the capital-goods industries are all united in seeking public action?

HOUSING SHOULD BE CROWNING ACHIEVEMENT OF ROOSEVELT ADMINISTRATION

The adoption of a sound national housing policy would be the crowning point of the first 4 years of the Roosevelt administration. Talk and experiment can now be translated into concrete achievement. The President has said, "We are working toward the ultimate objective of making it possible for American families to live as Americans should." Here is an economical, efficient, and comprehensive method of taking one real step in this direction.

How can we speak of an American standard of living when we find that millions of our people must live in slums and blighted areas, in crowded rooms without proper sanitary facilities, without adequate light and air, and without space for the children to play? How can we speak about a more abundant life if we refuse to provide the prime necessity of life—decent shelter?

EUROPE DID IT

From November 1918 to September 1935 England has built 1,231,992 homes with Government aid. At the same time a far larger and ever-increasing number of homes were built by private enterprise.

Holland rehoused about one-fifth of her population. Vienna did just as much. Germany before the advent of the Nazis erected more than 2,000,000 dwellings with Government aid. If we add up the housing achievements of several European countries with a combined population about equalling that of the United States, we find that they have built nearly 5,000,000 homes with government aid, with high standards of decency and comfort, and at prices and rentals available to low-income families.

Surely, what was done in Europe can be done in the United States.

A CRISIS HAS BEEN REACHED

Ladies and gentlemen, a crisis in the movement to revive the construction industry and to provide decent homes at low rentals has been reached in the Nation's Capital at Washington. Let me remind you that there is only one bill before the Congress which provides for housing, and that bill is the Wagner-Ellenbogen bill—a bill which contains the results of the effort, thought, and study which has been accumulated over a period of 35 years in the United States, a bill which contains the lessons which have been learned by the housing division of the P. W. A. and by the suburban resettlement division, lessons acquired at a cost of $172,000,000.

LOW-COST HOUSING IS ENDED UNLESS THIS BILL PASSES

No further appropriation of funds for low-rent housing, no further construction of homes with Federal cooperation will be undertaken unless the Wagner-Ellenbogen housing bill is passed at this session of Congress. The housing movement in the United States, which seemed so near success, will be dead unless the Wagner-Ellenbogen housing bill becomes a law at this session of Congress. The housing division of the P. W. A. will fold up and the building of homes for families of low income will definitely end unless this bill is passed in substantially the form in which it has been introduced by Senator WAGNER and myself. Unless this bill is passed, the slums and blighted areas will remain with us and

will further increase. Millions of families of low incomes will continue to live miserably and the drain upon the treasuries of our cities will become unbearable.

SENATE EXPECTED TO PASS BILL

Senator WAGNER confidently expects the Senate Committee on Education and Labor to favorably report this bill to the Senate in the next few days, but the Committee on Banking and Currency of the House of Representatives, which has charge of the bill in the House, has so far refused to hold hearings on the bill.

The Members of Congress are your representatives. They are your servants. Ladies and gentlemen, if you want to give health and well-being to the coming generation, do your part for the passage of this bill. If you want to provide the necessary push for further and complete recovery, if you want to aid in the clearance of slums and the elimination of crime and disease, if you want to establish a cleaner and more healthy atmosphere for the mothers of America to watch over their children, you will aid in the passage of the Wagner-Ellenbogen housing bill.

The passage of the Wagner-Ellenbogen housing bill will give to the children of America the opportunity to grow up to a better life and to a more promising maturity, and it will permit the parents in America to live in decency and comfort amidst sanitary and healthy homes full of light and sunshine.

DEPARTMENT OF THE INTERIOR APPROPRIATION BILL, 1937—CONFERENCE REPORT

Mr. TAYLOR of Colorado. Mr. Speaker, I call up the conference report on the bill (H. R. 10630) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1937, and for other purposes, and I ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

CALL OF THE HOUSE

Mr. SHORT. Mr. Speaker, a point of order. Since practically the appropriation on every item in this bill has been increased on the insistence of the managers on the part of the Senate, I think the membership of the House should be present to hear the gentleman from New York [Mr. TABER]. I therefore make the point of order that there is no quorum present.

The SPEAKER. The Chair will count. [After counting.] Evidently there is not a quorum present.

Mr. BANKHEAD. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 104]

Adair	Dempsey	Kee	Petengill
Allen	Dietrich	Keller	Powers
Andrew, Mass.	Dingell	Kelly	Quinn
Andrews, N. Y.	Dirksen	Kennedy, Md.	Rabaut
Beam	Dorsey	Kerr	Reilly
Berlin	Doutrich	Kopplemann	Richardson
Binderup	Duncan	Lee, Okla.	Risk
Brennan	Eagle	Lehlbach	Rogers, N. H.
Brooks	Eaton	Lesinski	Rogers, Okla.
Brown, Mich.	Fenerty	Lewis, Md.	Russell
Buckley, N. Y.	Ferguson	Lord	Ryan
Bulwinkle	Gambrill	Lundeen	Sadowski
Caldwell	Gasque	McGroarty	Sanders, La.
Cartwright	Gifford	McKeough	Sandlin
Cary	Goldsborough	McLean	Schaefer
Casey	Goodwin	Maloney	Sears
Cavicchia	Gray, Pa.	Meeks	Seger
Chandler	Green	Mitchell, Tenn.	Starnes
Chapman	Gwynne	Montet	Steagall
Claiborne	Hancock, N. C.	Moritz	Stewart
Clark, N. C.	Harter	Nelson	Sweeney
Connery	Hartley	Norton	Turpin
Cooley	Hill, Ala.	Oliver	Utterback
Creal	Hoeppel	O'Malley	Wearin
Crosby	Hook	Palmisano	Wilcox
Crowther	Hope	Perkins	Zioncheck
Dear	Kahn	Peterson, Fla.	

The SPEAKER pro tempore (Mr. COLMER). Three hundred and nineteen Members are present, a quorum.

On motion of Mr. BANKHEAD, further proceedings under the call were dispensed with.

INTERIOR DEPARTMENT APPROPRIATION BILL, 1937

The SPEAKER pro tempore. The Clerk will read the statement of the managers on the part of the House.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10630) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1937, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 15, 16, 17, 19, 21, 26, 27, 40, 51, 60, 64, 79, 90, and 91.

That the House recede from its disagreement to the amendments of the Senate numbered 2, 3, 6, 12, 13, 20, 22, 23, 25, 28, 29, 30, 34, 37, 38, 41, 42, 43, 44, 45, 47, 48, 49, 55, 58, 59, 61, 62, 63, 65, 66, 67, 68, 69, 70, 73, 74, 75, 76, 77, 78, 81, 82, 84, 85, 86, 88, and 89, and agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: Restore the matter stricken out by said amendment, amended to read as follows: ": *Provided*, That no part of this appropriation shall be expended for work on any figure, in addition to the four figures authorized by law, upon which work has not commenced as of the date of enactment of this Act", and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$587,700", and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$77,500", and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$160,000", and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$75,000", and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: "$159,200, of which amount $10,000 shall be immediately available", and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$260,000", and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$356,000", and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: "$2,375,000, of which amount $10,000 shall be immediately available", and the Senate agree to the same.

Amendment numbered 57: That the House recede from its disagreement to the amendment of the Senate numbered 57, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$140,000", and the Senate agree to the same.

Amendment numbered 71: That the House recede from its disagreement to the amendment of the Senate numbered 71, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$75,000", and the Senate agree to the same.

Amendment numbered 72: That the House recede from its disagreement to the amendment of the Senate numbered 72, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$2,807,817", and the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment, as follows: In lieu of the sum proposed, insert: "$2,093,200", and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 1, 7, 24, 31, 32, 33, 35, 39, 46, 50, 52, 53, 54, 56, 83, and 87.

EDWARD T. TAYLOR,
B. M. JACOBSEN,
JED JOHNSON,
W. P. LAMBERTSON,
Managers on the part of the House.

CARL HAYDEN,
KENNETH MCKELLAR,
ELMER THOMAS,
FREDERICK STEIWER,
Managers on the part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the

Senate to the bill (H. R. 10630) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1937, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

On no. 2: Provides a salary of $5 per diem and for the payment of necessary travel expenses, exclusive of subsistence, for members of advisory committees of local stockmen, in connection with the administration of the Grazing Control Act, as proposed by the Senate, instead of $5 per diem while actually employed in lieu of subsistence and 5 cents per mile for travel, as proposed by the House.

On nos. 3 and 4, relating to the Mount Rushmore National Memorial Commission: Makes $30,000 immediately available, as proposed by the Senate, instead of $50,000, as proposed by the House, and accepts the House prohibition against the expenditure of funds on any figure on which work has not been commenced with the further provision that no funds shall be expended on any additional figure not authorized by law.

GENERAL LAND OFFICE

On no. 5: Appropriates $587,700 for salaries in the Office of the Commissioner of the General Land Office, instead of $577,700, as proposed by the House, and $600,000, as proposed by the Senate.

On no. 6: Appropriates $700,000, as proposed by the Senate, instead of $600,000, as proposed by the House, for surveying public lands.

On no. 8: Appropriates $77,500 for salaries of registers of district land offices instead of $75,000, as proposed by the House, and $80,000, as proposed by the Senate.

On no. 9: Appropriates $160,000 for contingent expenses of land offices instead of $150,000, as proposed by the House, and $175,000, as proposed by the Senate.

BUREAU OF INDIAN AFFAIRS

On no. 10: Appropriates $75,000 for the suppression of the traffic in intoxicating liquors among Indians instead of $55,880, as proposed by the House, and $100,000, as proposed by the Senate.

On no. 11: Appropriates $159,200 for lease, purchase, and repair of agency buildings instead of $144,200, as proposed by the House, and $164,200, as proposed by the Senate, and provides that $10,000 of such sum shall be immediately available, instead of $20,000, as proposed by the Senate.

On no. 12: Eliminates proviso proposed by the House limiting the amount payable to attorneys serving in connection with claims of the Sioux Indians to 5 percent of the total recovery.

On no. 13: Provides that no part of the funds made available for the purchase of lands under the act of June 18, 1934, shall be available for the acquisition of lands outside the boundaries of existing Indian reservations in the State of New Mexico, as proposed by the Senate.

On no. 14: Appropriates $260,000 for the preservation of timber on Indian reservations instead of $255,000, as proposed by the House, and $280,000, as proposed by the Senate.

On no. 15: Eliminates the provision inserted by the Senate making $12,500 of funds for emergency conservation work on Indian reservations available for defraying the expenses of the Quetico-Superior committee.

On nos. 16, 17, 19, and 21: Eliminates the provisions, inserted by the Senate, providing for the establishment and prosecution of tribal enterprises, including a consequent reduction of $75,000.

On no. 18: Corrects a total.

On no. 20: Appropriates $6,000 for industrial assistance of the Spokane Indians, Washington, as proposed by the Senate.

On no. 22: Makes $65,000 available of the appropriation for personal services in the District of Columbia and in the field, in connection with the administration of the revolving loan fund under the Indian Reorganization Act, as proposed by the Senate, instead of $50,000, as proposed by the House.

On no. 23: Makes $18,000 available for personal services in the District of Columbia in connection with the development of Indian arts and crafts, as proposed by the Senate, instead of $15,000, as proposed by the House.

On no. 25: Appropriates $5,379,820, as proposed by the Senate, instead of $5,304,820, as proposed by the House, for the education of Indian children.

On nos. 26 and 27: Appropriates $345,000 for the lease, purchase, and repair of buildings at Indian schools, as proposed by the House, instead of $420,000, which might also be used for construction purposes, as proposed by the Senate.

On no. 28: Makes $1,000 for the operation and maintenance of the Pierre, S. Dak., nonreservation boarding school available for the purchase of lands adjacent to the school, as proposed by the Senate.

On nos. 29, 30, and 32, relating to the education of natives in Alaska: Appropriates $25,000 for relief of destitution, corrects the total of the appropriation and provides that a report shall be made to Congress covering expenditures for the relief of destitution, all as proposed by the Senate.

On no. 34: Appropriates $20,000 for clinical surveys and general medical research in connection with tuberculosis, trachoma, and venereal and other disease conditions among Indians, as proposed by the Senate, in lieu of $15,000, as proposed by the House.

On no. 36: Appropriates $2,375,000, of which $10,000 shall be immediately available, for general support of Indians, in lieu of an appropriation of $2,360,000, as proposed by the House, and $2,385,000, or which $25,000 would have been made immediately available, as proposed by the Senate.

On no. 37: Appropriates $800 for the Rocky Boy Indians of Montana for general support and administration, as proposed by the Senate.

On no. 38: Appropriates $25,000 for the Cherokee Indians of North Carolina for general support and administration, as proposed by the Senate, instead of $18,000, as proposed by the House.

On no. 40: Eliminates $1,200 for fees and expenses of attorneys for the Yankton Indians of South Dakota, proposed by the Senate.

On nos. 41, 42, 43, 44, and 45, relating to the support of Indians in the State of Washington: Appropriates $20,000, as proposed by the Senate, instead of $12,500, as proposed by the House, for the Taholah Indians; appropriates $26,000 for the Neah Bay Indians, of which $3,500 shall be available for development of a cemetery site, as proposed by the Senate, instead of $22,500, as proposed by the House; appropriates $500 for the Hoh Indians, as proposed by the Senate, and corrects the total of the items in the paragraph.

On nos. 47, 48, and 49, relating to expenses of tribal officers, Five Civilized Tribes, Oklahoma: Eliminates the Creek Indians from the purposes provided in the paragraph with the exception of $600 for the salary of the chief of the Creek Nation, as proposed by the Senate, and provides a salary of $3,000, as proposed by the Senate, for the mining trustee for the Choctaw and Chickasaw Nations, instead of $4,000, as proposed by the House.

On no. 51: Appropriates $50,000 for traveling and other expenses of tribal councils, as proposed by the House, in lieu of $75,000, as proposed by the Senate.

BUREAU OF RECLAMATION

On no. 55: Limits the amount which may be expended for personal services in the District of Columbia, in connection with the Boulder Canyon project, to not to exceed $25,000, as proposed by the Senate.

GEOLOGICAL SURVEY

On no. 57: Appropriates $140,000 for personal services in the office of the Director, instead of $128,060, as proposed by the House, and $150,000, as proposed by the Senate.

On nos. 58, 59, and 60, relating to topographic surveys: Appropriates $650,000, as proposed by the Senate, in lieu of $440,000, as proposed by the House, of which $250,000 may be expended for personal services in the District of Columbia, as proposed by the Senate, instead of $175,000, as proposed by the House, and eliminates the proviso inserted by the Senate requiring the Secretary of the Interior to submit to Congress at the next session a program for expediting topographic mapping and the cost of same.

On nos. 61, 62, and 63, relating to geologic surveys: Appropriates $500,000, as proposed by the Senate, in lieu of $488,000, as proposed by the House, of which $315,000 shall be available for personal services in the District of Columbia, as proposed by the Senate, in lieu of $300,000, as proposed by the House, and provides that such portion of $10,000 as may be necessary shall be available for a survey of the occurrence and uses of granite in the Northeastern States, as proposed by the Senate, instead of requiring that not less than $10,000 be expended for such purpose, as proposed by the House.

On nos. 64 and 65, relating to mineral resources of Alaska: Appropriates $60,000, as proposed by the House, in lieu of $70,000, as proposed by the Senate, and provides that $34,000 of this sum shall be available for personal services in the District of Columbia, as proposed by the Senate, instead of $20,000, as proposed by the House.

On nos. 66 and 67, relating to gaging streams: Appropriates $791,317, as proposed by the Senate, instead of $660,000, as proposed by the House, and provides that $589,317 shall be available only for cooperative work with States or municipalities, as proposed by the Senate, in lieu of $458,000, as proposed by the House.

On no. 68: Makes an addition to a statute reference by inserting the words "as amended", as proposed by the Senate.

On nos. 69, 70, and 71, relating to mineral leasing: Appropriates $315,000, of which $30,000 shall be immediately available, as proposed by the Senate, in lieu of $225,000, as proposed by the House, and makes $75,000 available for personal services in the District of Columbia, instead of $56,000, as proposed by the House, and $120,000, as proposed by the Senate.

On no. 72: Corrects a total.

BUREAU OF MINES

On no. 73: Appropriates $609,365, as proposed by the Senate, in lieu of $583,215, as proposed by the House, for operating mine-rescue cars and stations and investigation of mine accidents.

On no. 74: Appropriates $185,400, as proposed by the Senate, in lieu of $165,400, as proposed by the House, for testing fuel.

On no. 75: Appropriates $265,866, as proposed by the Senate, instead of $250,366, as proposed by the House, for oil and gas investigations.

On nos. 76 and 77, relating to economics of mineral industries: Appropriates $339,990, as proposed by the Senate, instead of $300,490, as proposed by the House, and makes $255,700 available for personal services in the District of Columbia, as proposed by the Senate, instead of $220,000, as proposed by the House.

On no. 78: Eliminates proviso permitting the sale of helium by the Bureau of Mines to the medical profession, as proposed by the Senate.

On no. 79: Eliminates the item appropriating $20,000 for repair of a gas well on the helium property of the Bureau of Mines near Amarillo, Tex., inserted by the Senate.

On no. 80: Corrects a total.

NATIONAL PARK SERVICE

On nos. 81 and 82, relating to the Shenandoah National Park, Va.: Corrects the title and eliminates proviso prohibiting the use of funds made available in the paragraph for administration, protection, and maintenance in advance of title to the minimum acreage required in the basic act establishing the park having been conveyed to and accepted by the Federal Government, as proposed by the Senate.

On no. 84: Provides that appropriations for the Department of the Interior shall be available for the purchase, maintenance, and operation of quarter-ton or half-ton trucks, and that such purchase need not be charged to the limitation in the various appropriation items for the purchase, etc., of passenger-carrying vehicles, as proposed by the Senate.

OFFICE OF EDUCATION

On no. 85: Appropriates $262,980, as proposed by the Senate, instead of $261,180, as proposed by the House, for personal services in the office of the Commissioner of Education.

On no. 86: Appropriates $20,000, as proposed by the Senate, instead of $17,700, as proposed by the House, for general expenses.

PUERTO RICAN HURRICANE RELIEF

On no. 88: Makes available $25,000 from unobligated balances of appropriations for continuation of the work of collecting moneys due the United States, as proposed by the Senate, in lieu of $17,740, as proposed by the House.

ST. ELIZABETHS HOSPITAL

On no. 89: Eliminates reference to the disbursing agent, as proposed by the Senate.

On nos. 90 and 91: Provides $250,000 for the construction and equipment of one continuous-treatment building, as proposed by the House, instead of two such buildings, at a total cost of $500,000, as proposed by the Senate.

AMENDMENTS IN DISAGREEMENT

The committee of conference report in disagreement the following amendments of the Senate:

On no. 1: Relating to payment for the cost of transporting personal effects of employees of the Division of Grazing Control.

On no. 7: Relating to the use of $750,000 of moneys appropriated to carry out the provisions of title II of the National Industrial Recovery Act for the purpose of surveying public lands.

On no. 24: Relating to the construction, repair, and rehabilitation of irrigation systems on Indian reservations.

On no. 31: Providing that funds appropriated for the education of natives in Alaska shall remain available until June 30, 1938.

On no. 32: Requiring that a report shall be made to Congress regarding expenditures in Alaska for relief of destitution.

On no. 33: Reappropriation of an unexpended balance in connection with construction of the Sioux Sanatorium, South Dakota.

On no. 35: Providing that funds appropriated for medical relief in Alaska shall be available until June 30, 1938.

On nos. 39 and 46: Relating to an appropriation for traveling expenses of tribal council of Klamath Indians and to the establishment of a revolving fund to cover burial of said Indians. The total of the item General support, tribal funds, is also involved.

On no. 50: Relating to the acquisition of Tuskahoma Council House, in Pushmataha County, Okla.

On no. 52: Relating to a per-capita payment to enrolled members of the Menominee Tribe, Wisconsin.

On nos. 53 and 54: Relating to the authorization and appropriations for various reclamation projects.

On no. 56: Exempting from the civil-service laws and the Classification Act of 1923 employees engaged in connection with the all-American Canal.

On no. 83: Relating to the Appomattox Courthouse National Historical Monument, Va.

On no. 87: Relating to an appropriation for a survey of school library service by the office of education.

EDWARD T. TAYLOR,
B. M. JACOBSEN,
JED JOHNSON,
W. P. LAMBERTSON,
Managers on the part of the House.

Mr. TAYLOR of Colorado. Mr. Speaker, I hope the report of the committee of conference may be adopted.

Mr. TABER. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR of Colorado. I yield.

Mr. TABER. I understand the gentleman from Kansas [Mr. LAMBERTSON] desires to be heard on the conference report.

Mr. TAYLOR of Colorado. As I understand it, we shall have ample time on these amendments as they come up. I am perfectly willing, of course, to yield the gentleman all the time he wants.

Mr. TABER. I understood the gentleman from Kansas [Mr. LAMBERTSON] desired time on the conference report.

Mr. SNELL. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR of Colorado. I yield.

Mr. SNELL. Mr. Speaker, I think we ought to have some explanation of the conference report, to see how much it has been increased and to get a general idea of it.

Mr. WIGGLESWORTH. Mr. Speaker, if the gentleman will yield, I would like to have a few minutes.

Mr. TAYLOR of Colorado. How much time do you gentlemen suggest?

Mr. LAMBERTSON. I would suggest an hour on the conference report, 2 hours on amendments nos. 53 and 54, and probably an hour on the rest of the amendments in disagreement; in all, a maximum of 4 hours.

Mr. TAYLOR of Colorado. Why not adopt the conference report first and then take up the amendments in disagreement? I am perfectly willing for the gentleman to have all the time he wants.

Mr. LAMBERTSON. I would like to have a little time on the conference report itself.

Mr. BUCHANAN. Mr. Speaker, will the gentleman from Colorado yield?

Mr. TAYLOR of Colorado. I yield.

Mr. BUCHANAN. May I suggest to the gentleman from Kansas that the amendments in disagreement will have to be voted on as they involve very, very complicated questions. When we are approaching the question of fixing the policy of Congress for future years I think we ought to have plenty of time. I would suggest, therefore, that we devote the day to the consideration of the conference report and the Senate amendments.

Mr. TABER. That is all right, Mr. Speaker, if we can do it. I think we ought first to dispose of the conference report. It will not take a great while, so far as I can see. Speaking for myself, I do not want more than 2 or 3 minutes, but I think we ought to have a few minutes on the conference report. Then we can proceed to amendment no. 24 and take it up by itself. Each one of the important amendments should be given consideration as it is reached.

Mr. TAYLOR of Colorado. Mr. Speaker, I may say to the gentleman from New York that I am perfectly willing, if necessary, to take all day, but I do not see the necessity for extended debate on the conference report. I can state the comparative figures for last year and this year, what the Senate did and what the House did, in 3 minutes.

Mr. TABER. I think that should be done. Then I would like 2 or 3 minutes on the conference report, and I think the gentleman from Kansas [Mr. LAMBERTSON] desires a few minutes.

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 3 minutes to the gentleman from New York.

Mr. SNELL. Mr. Speaker, I think the gentleman should first explain the report. Let us know what is in it.

Mr. TAYLOR of Colorado. Mr. Speaker, the first item I think the House will be concerned about is that the regular and supplemental estimates were $147,652,441.75, and the amount that is being recommended by the conferees to the House is $143,503,957.05.

Mr. Speaker, this bill as it appears before us today is $4,148,000 under the Budget, and I may say that I am dealing in round figures only. The reason the bill carries more this year than it did last year is because last year we had no construction whatever in the bill. Last year the bill carried $77,000,000. This year it carries $143,500,000. This increase is represented by construction, which was not in the bill last year.

The 1937 bill, as it passed the Senate, carried $143,978,000. The bill as it passed the House carried $81,221,000. In other words, the net amount that was added to the House bill by the Senate is $62,757,000—as I say, speaking in round numbers.

Mr. MAY. Mr. Speaker, will the gentleman yield?

Mr. TAYLOR of Colorado. I yield.

Mr. MAY. In what way are the additions made by the Senate calculated to commit us to a policy with respect to general improvements, if it does effect any policy, and what

might be the ultimate expenditure on them over the years to come?

Mr. TAYLOR of Colorado. There are about 16 amendments in disagreement, and we will take them up seriatum and discuss them. As we reach them we shall be able to answer all these questions.

I may say that the House recessions in conference amounted to $62,287,267, and the Senate recessions amounted to $469,800.

That is the principal part of the sum total.

Mr. SNELL. Will the gentleman yield for a question?

Mr. TAYLOR of Colorado. I yield to the gentleman from New York.

Mr. SNELL. How much is the increase over the House bill that the conferees have agreed to? What is the amount of the increase?

Mr. TAYLOR of Colorado. I may say that the Senate bill is $3,673,000 under the Budget. The House bill was $1,721,000 under the Budget.

Mr. SNELL. The gentleman misunderstood the question. I intended to ask the gentleman how much is carried in the Senate bill over the House bill that has been agreed to? This does not include the amendments in disagreement.

Mr. BANKHEAD. The amount involved in the conference report?

Mr. SNELL. Yes; the amount involved in the conference report proper.

Mr. TABER. If the gentleman will yield, I think I can answer the question.

Mr. BANKHEAD. I understand it is the contention of the gentleman from New York [Mr. SNELL] and the gentleman from Massachusetts that the increase involved in the conference report is approximately $800,000.

Mr. TABER. I think I can clear this up if the gentleman will yield.

Mr. TAYLOR of Colorado. I yield to the gentleman from New York [Mr. TABER].

Mr. TABER. As I understand it, the bill as passed by the House covered $81,221,330.

Mr. TAYLOR of Colorado. Yes.

Mr. TABER. This included something like $26,350,000, as shown on page 83 of the Budget estimate. The increases with reference to those items, as I understand it, amounted to $1,200,000, as put on by the Senate. The conference report, the vote on which is now pending, increases those items $800,000.

Mr. SNELL. What are the items included in that increase of $800,000?

Mr. TAYLOR of Colorado. I do not have those items right at hand, but they will be brought out and discussed later in debate.

Mr. AYERS. Will the gentleman yield for a question?

Mr. TAYLOR of Colorado. I yield to the gentleman from Montana.

Mr. AYERS. The adoption of the gentleman's motion to agree to the conference report does not in any way affect the consideration by the Members of the House of the matters in disagreement?

Mr. TAYLOR of Colorado. Oh, no.

Mr. AYERS. Which includes amendments 1, 7, 24, and so forth?

Mr. TAYLOR of Colorado. No. We will have to dicusss each one of those amendments in disagreement.

Mr. AYERS. The adoption of the gentleman's motion does not affect the amendments in disagreement?

Mr. TAYLOR of Colorado. No.

Mr. Speaker, I yield the gentleman from Kansas [Mr. LAMBERTSON] 10 minutes.

Mr. LAMBERTSON. Mr. Speaker and Members of the House, this is an important day. The House bill recommended eighty-one million to the Interior Department for the next fiscal year. The Senate amended it by putting in sixty-three million more—over 70 percent increase. Amendments 24, 53, and 54 deal with the big increases in the form of loans for the extension of irrigation projects in the Mountain States.

The crux of this situation is contained in amendment 53, where we are asked to authorize seven gigantic irrigation projects in seven separate States. It has been the policy of this subcommittee, in the 3 years I have been a member of it, to carefully refrain from recommending appropriations for any new irrigation projects. The reason we gave was that the Government was extending itself on a policy of curtailment of surpluses in agricultural products. Now suddenly, out of an almost clear sky, we are asked to authorize these seven great projects and appropriate many millions immediately for their extension. This ought to be a serious day. We are asking those of you who agree with us to lay aside party prejudices and have the courage to vote your honest convictions. It will take from $600,000,000 to $1,500,000,000 to complete the projects asked for in these amendments. Yes; the Budget has O. K.'d six of these seven projects in amendment 53, and to some of you that may seem to dignify and to justify it. This was all done suddenly by the Director of the Budget just this last January. To me it is the most gigantic and indefensible pork barrel which has come upon this Congress in some time; seven States approaching us at the same time on the reversal of a policy. The Washington State project did not need authorization but was put into this fifty-third amendment to help the pork barrel. One of the most asinine features of these big projects is that a great deal of money has been spent by the P. W. A. and the W. P. A. under allotments by the President where we are now and finally asked for authorization. This gets thoroughly under my hide. There ought to be a righteous reaction with everyone here. Here is required legislative authority for the expenditure of money before these projects can be completed, yet money has been spent by the Executive, and now at last the policy of whether these projects should have ever been started are asked, necessarily, from the Congress. Another Florida canal. Is it not a mess? And this is my Government and yours. We of the Mississippi Valley, in particular, who in the old days favored the McNary-Haugen bill, and who in this administration went along with the Chief Executive on the theory that there was an overproduction and that we had to curtail if we are to have American prices for our agricultural products consumed in America. Generally we voted for the A. A. A., and only this winter for its substitute on soil conservation, taking land out of production; and now, amazing as it may seem, still in this second session of the Seventy-fourth Congress, we are asked to help all the Pacific States to make two blades of grass grow where only one grew before, in spite of all the fancied arguments which will be offered here today about this extra production not being in competition with anything else; do not you believe it. Whenever they raise more, it is just that much more. It may not come back in the direct manner, but it comes back; food products may be in cereals or on hoof. The extension of reclamation and curtailment under soil erosion are diametrically opposed.

This is too expensive. The Government could put its money to better use in the extension of road construction than to loan up to $200 and more per acre for agricultural production. If the Government will loan this money, these great projects will be accomplished, people will be attracted to these places, and that is its purpose, to build up these States in population beyond their natural and normal quotas, and naturally at the expense of other agricultural lands in the country.

Furthermore, it is proposed here to loan this money for a term of 40 years without interest. I wonder if William Green will think this is not inflation. A great deal was said here the other day about the inequality in the Frazier-Lemke bill, that it was so unfair to loan money to farmers up to 80 percent of the assessed value of the land at 1½ percent on about an equal number of years. But here you propose to loan it without any interest at all—up to $200 per acre. Certainly, these values are not even as secure as other lands, for the water may run out or it may sink away.

All in all, colleagues, I think we should oppose these three reclamation amendments which the Senate has added to this bill. We should swat this pork barrel, we should accept the

policy of curtailment until it is abandoned at least, and, above all, we should resent the practice of inaugurating, under the disguise of relief, far-reaching projects where first there should have been an authorization by Congress. I do not wish the Western States any bad luck, but this is an unfair advantage to a section in agriculture, and the whole thing is a conglomeration and a mess, and we should defeat these amendments and postpone it until we take time for a sober second thought.

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. WIGGLESWORTH].

Mr. WIGGLESWORTH. Mr. Speaker, I rise in opposition to approval of the conference report. In this connection I want to emphasize the extent to which the total appropriation carried by this bill has increased in recent years.

For the fiscal year 1934 the bill carried $43,000,000 or thereabouts. For the next fiscal year the figure rose to $47,000,000. For the present year, with deficiency items included, it went to $77,000,000. When the bill for the next fiscal year passed the House this year it carried a total of about $81,000,000. The House will recall that a motion to recommit, reducing this figure to last year's figure, offered by the gentleman from New York [Mr. TABER], was defeated in the House.

The bill went to the Senate. It returns to us today carrying a total of over $143,000,000, more than $62,000,000 more than was carried by the bill when it passed the House and over $100,000,000 more than the bill carried 3 years ago. Furthermore, this does not include about $780,000 representing reappropriation of unexpended balances, assuming that the House approves of amendments 7 and 33 when we reach them in the course of this discussion.

Of course, a large amount of the increase is in dispute. Reference has already been made to the $3,700,000 item carried in amendment no. 24 for Indian irrigation projects. Reference has also been made to amendments 53 and 54, providing for a gigantic reclamation program calling for $57,000,000 or thereabouts now and running into the hundreds of millions, if not billions, of dollars ultimately.

There are 16 items in dispute which, of course, must be voted on separately by the House, but over and above this is the conference report itself. The first vote in the House will be taken on the conference report. It is the report which is before the House at this time. The report reflects an increase of $837,127 over and above what was approved by the House a month or two ago. I regret that illness prevented me from attending the conference on this bill. I did not sign the conference report. I cannot support the conference report this morning. Reading the additions which have been made in the light of the evidence offered in the Senate hearings and in the supplemental House hearings, it seems to me that concessions have been made to the Senate conferees all along the line—concessions which are not warranted by the facts.

The total, as I say, amounts to $837,127. Time does not permit going into details. I can only say that in my judgment unjustifiable increases have been made in conference amounting to several hundred thousand dollars. I am therefore compelled, Mr. Speaker, to vote against the conference report.

Mr. MOTT. Will the gentleman yield me 3 minutes?

Mr. TAYLOR of Colorado. I yield to the gentleman from Oregon 3 minutes.

Mr. MOTT. Mr. Speaker, I desire to call the attention of the House to amendment no. 2, on page 2 of the conference report. Under the Taylor grazing bill, provision was made to pay members of the advisory board a per diem of $5 and 5 cents a mile travel when in actual attendance or at work.

The Senate amendment, according to the conference report, proposes to pay those members of that advisory board a straight salary of $5 a day throughout the year.

Mr. GREEVER. Will the gentleman yield?

Mr. MOTT. I yield.

Mr. GREEVER. Does not the Senate amendment provide that they shall only receive $5 a day when actually employed? That is what the conference report reads.

Mr. MOTT. I do not interpret it that way. The amendment provides that they shall receive $5 a day, according to the conference report. The printed bill with the Senate amendments has not yet been made available to Members. Perhaps the report does not correctly state the amendment.

Mrs. GREENWAY. Will the gentleman yield?

Mr. MOTT. I yield to the lady from Arizona.

Mrs. GREENWAY. Does not the gentleman think that it is a good thing that local citizens are now included and allowed a voice in their own affairs with an expense account to make it practical and just?

Mr. MOTT. That provision I think is proper, but that was not the point of my objection. I interpret the statement in the conference report as meaning that the Senate amendment permits payment of a regular salary of $5. If the amendment does not provide that, I have no objection to it.

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 2 minutes to the gentleman from Nevada [Mr. SCRUGHAM].

Mr. SCRUGHAM. Mr. Speaker, the Senate amendment provides a uniform remuneration of $5 per diem while actually employed as a district board. That will probably be only a comparatively few days out of every year.

Mr. TAYLOR of Colorado. It expressly says it is only while they are on duty. There are only 482 in the whole United States to regulate grazing on the public domain of 80,000,000 acres.

[Here the gavel fell.]

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. BUCHANAN].

Mr. BUCHANAN. Mr. Speaker, just for fear some confusion exists in the minds of some of my colleagues relative to this conference report, let me state there can be no possible objection to the adoption of this conference report as agreed to by the conferees and presented to the House. The House conferees yielded about seven or eight hundred thousand dollars of increases of the Senate in the bill as it passed the House. That is close enough. You cannot expect them not to yield anything. So the conference report ought to be adopted. The amendments which follow the adoption of the conference report will be before the House, and the House ought to further insist on some of them, and you will hear the reasons for that when we come to it, but this report should be adopted.

[Here the gavel fell.]

Mr. RICH. Mr. Speaker, will the gentleman yield me 5 minutes?

Mr. TAYLOR of Colorado. Let me repeat what the gentleman from Texas [Mr. BUCHANAN] just said. We reach all these things when we come to them. Why should we thrash it out in advance?

Mr. RICH. I would like to say for about a week I have been trying to find out when this was coming on the floor. The majority leader said we would have plenty of time to discuss it.

Mr. TAYLOR of Colorado. Very well. I yield the gentleman 5 minutes right now.

Mr. RICH. Mr. Speaker, I have no doubt but that the gentleman from Texas and these other conferees have been trying to keep this appropriation down to the limit, but I want to call attention to the fact that in the appropriation bill they have $26,350,000 additional over what it was last year for public works. The amount of the Interior Department appropriation bill last year was over $77,000,000. When it left the House this year it was over $81,000,000, but if we add the things which the Senate wants to put in in these 16 items which are in dispute, they are asking for $64,710,000, and that includes $2,500,000 for administration expenses. When you finally complete all these projects which they want you to approve in item 54 alone, you will have over a billion dollars of expenses that will be saddled onto the taxpayers of the country in the future. You must have somebody to operate these projects and add to our

national burden. It will be an additional expense to the children who are coming on in this country, and I say to you Members of Congress now that you are simply stealing the savings of future generations. This Congress in the past 2 years has been doing things which it never should do. In the first place, you gave the President of the United States $4,880,000,000. You gave up your rights. You have all stood up here in the House this year and condemned that very thing. Then you gave the President $1,500,000,000 more in the deficiency bill to do some more. They are not satisfied with that wrong way of doing things. They come in here and ask for these 16 projects to be approved, and before you get through with them you will have to spend over a billion dollars more.

Look at the statement of the Federal Treasury at the present time—thirty-three billions in debt and going in the red at the rate of six hundred thousand per hour. It is nice for us to come here and say nice things about ourselves and pat each other on the back and say, "Oh, we are a bunch of good fellows." I would like to do it if I could, but I think we are a bunch of boobs when we take everything that the Senate sends over here for us to approve and agree to this legislation, and then mortgage the children of the future for these follies. We do not have any common sense. Where are these projects? They are out in the Northwest. Look at the members on this conference committee from the Senate. They are mostly from the Northwest, and they want these projects for their own States at the expense of our taxpayers. They will bring in over 3,000,000 acres of agricultural ground. What for? To raise more produce, when you are trying to get the farmers of this country to stop producing, when you are buying submarginal lands to put them out of cultivation. We just do not use good judgment. We just do not use common sense in doing these things. Plug up one hole and make another. Here we are asked to bring in 3,000,000 acres of irrigated ground when we should be protecting the farmers, who are now requested to curtail production because they have no markets for their farm products.

Mr. THURSTON. Mr. Speaker, will the gentleman yield?

Mr. RICH. I yield.

Mr. THURSTON. A vote against the conference report will be a vote against these projects which will cost about a billion and a half dollars.

Mr. RICH. The gentleman is correct.

[Here the gavel fell.]

Mr. TAYLOR of Colorado. Mr. Speaker, I move the previous question on the adoption of the conference report.

The previous question was ordered.

The SPEAKER. The question is on agreeing to the conference report.

The question was taken; and on a division (demanded by Mr. TABER) there were ayes 87 and noes 22.

So the conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Amendment No. 1: Page 4, line 22, "payments for the cost of packing, crating, and transportation (including drayage) of personal effects of employees upon permanent change of station, under regulations to be prescribed by the Secretary of the Interior."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 7: Page 14, line 16, after the word "deposit", insert: "*Provided further*, That of the unexpended balance of moneys appropriated to carry out the provisions of title II of the National Industrial Recovery Act of June 16, 1933, such amount, not exceeding $750,000, as the Federal Emergency Administrator of Public Works may deem necessary is hereby made available for surveys and resurveys of public lands during the fiscal years 1936 and 1937, to be expended under the supervision of the Commissioner of the General Land Office in accordance with regulations prescribed by the Federal Emergency Administrator of Public Works."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 24: Page 41, after line 6, insert: "For the construction, repair, and rehabilitation of irrigation systems on Indian reservations; for the purchase or rental of equipment, tools, and appliances; for the acquisition of rights-of-way, and payment of damages in connection with such irrigation systems; for the development of domestic and stock water and water for subsistence gardens; for the purchase of water rights, ditches, and lands needed for such projects; and for drainage and protection of irrigable lands from damage by floods or loss of water rights, as follows:

"Arizona: Colorado River, as authorized by section 2 of the Rivers and Harbors Act, approved August 30, 1935, $1,000,000; Havasupai, $5,000; Hopi, $50,000; Navajo, $70,000; Ak Chin, $3,000; Navajo and Hopi (domestic and stock water), $45,000; Chiu Chui, $5,000; Papago (domestic and stock water), $26,400; San Xavier, $30,000; Salt River, $55,000; San Carlos, $25,000; Fort Apache, $10,000;

"Colorado: Consolidated Ute, $65,000, reimbursable; Pine River, $1,000,000, reimbursable;

"Montana: Crow, $100,000, reimbursable; Fort Belknap, $12,000; Fort Peck, $125,000, reimbursable.

"Nevada: Fort McDermitt, $2,000; Moapa, $5,000; Summit Lake, $5,000; Walker River, $5,000; miscellaneous (garden tracts), $5,000.

"New Mexico: Navajo, $89,500; Pueblo, $240,100; Jicarilla, $13,000; Navajo and Pueblo (domestic and stock water), $60,000.

"North Dakota: Miscellaneous (domestic and stock water and garden tracts), $15,000.

"Oklahoma: Miscellaneous (garden tracts), $16,000.

"Oregon: Warm Springs, $10,000; miscellaneous (garden tracts), $5,000.

"South Dakota: Miscellaneous (domestic and stock water), $10,000.

"Utah: Uncompahgre, $10,000; Ojeto and Montezuma Creeks, $3,500; miscellaneous (garden tracts), $5,000.

"Washington: Lummi, $20,000; Makah (dikes and flood gates), $5,000; Wapato, $100,000, reimbursable; Klickitat, $50,000; miscellaneous (domestic and stock water and garden tracts), $20,000.

"Wisconsin: Miscellaneous (garden tracts), $5,000.

"Wyoming: Wind River, $105,000, reimbursable.

"For miscellaneous small irrigation developments, $200,000.

"For administrative expenses, including personal services in the District of Columbia and elsewhere, $100,000.

"In all, $3,710,500, to be immediately available: *Provided*, That the foregoing amounts may be used interchangeably, in the discretion of the Secretary of the Interior, but not more than 10 percent of any specific amount shall be transferred to any other amount, and no appropriation shall be increased by more than 15 percent: *Provided further*, That when necessary the foregoing amounts may be used for subjugating lands for which irrigation facilities are being developed."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment with the following amendment.

The Clerk read as follows:

Mr. TAYLOR of Colorado moves that the House recede from its disagreement to the amendment of the Senate no. 24, with an amendment, as follows:

"In line 10, the first line of the second paragraph of said amendment, after the word 'by' insert the following: 'and in accordance with.'"

Mr. BUCHANAN. Mr. Speaker, I move that the House further insist on its disagreement to the amendment of the Senate no. 24.

Mr. Speaker, I realize that the motion to recede and concur is a preferential motion. I ask a division of the motion to recede and concur.

The SPEAKER. The gentleman is entitled to a division of the motion. The question is, Will the House recede from its disagreement to the amendment of the Senate?

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 5 minutes to the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Speaker, this is an item involving $3,710,500 for the continuation and the beginning of certain reclamation projects, all of which are supposed to cost $70,000,000. Something like $10,000,000 has been spent on some of them, or allocated to some of them, out of relief funds. As I understand it—I am not sure, but I give you the best information I can get—the acreage increase is 444,000. This would make the cost $160 per acre. Just

think of the enormity and ridiculousness of our appropriating $70,000,000 more money to bring land under cultivation at a time when we are appropriating and spending millions of dollars to take land out of cultivation. Is it not time to stop?

You will be told that this is to be taken out of Indian funds, or supposed to be reimbursable. Have we any less responsibility to use common sense in making our appropriations here in the House because it is perhaps out of Indian funds or supposed to be reimbursable? But what does "reimbursable" mean? I asked the Chief of the Reclamation Service. It seems to mean that you let them have the money without interest, and it is supposed to be repaid in 40 or 50 years. It means an outright gift from the Treasury of the United States of 50 percent of the whole amount.

I hope the Members of the House of Representatives today will stand up and be counted on this first part of a tremendous irrigation program that is going to be presented to you and which will cost the Treasury of the United States in all before we get through with it, if once we start it, $1,500,000,000; and I will give you the total when we reach item no. 53.

Mr. WHITE. Mr. Speaker, will the gentleman yield?

Mr. TABER. I yield.

Mr. WHITE. Is it not a fact that when this money is invested and these communities established, and new places built, that the taxes coming to the Government will more than repay the Government for any interest they might lose on the money?

Mr. TABER. No; that is not the fact. The fact is that the Goverment continues to spend money on these projects; and the further we get into it the longer the depression will last.

Mr. Speaker, I hope the House will vote down the motion to recede in this matter and thus make a start, and make it on this particular item.

Mr. WHITE. Is it not a matter of fact that the gentleman's State depends on the development of new communities and the bringing in of new land?

Mr. TABER. It is a fact that the gentleman's own communities are hurt by every such development at times when there is no market for the agricultural products. It is a fact that the gentleman is hurting himself and cutting his own throat by the development of these irrigation projects.

Mr. WHITE. I do not believe the gentleman realizes the facts, or he would not make such a statement.

Mr. TABER. I am familiar with the facts.

[Here the gavel fell.]

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 10 minutes to the gentleman from Texas [Mr. BUCHANAN].

Mr. BUCHANAN. Mr. Speaker, I want to say a few words for the integrity of our Budget system, for the integrity of our appropriation system, and for the reputation of Congress in conducting the public affairs in a businesslike manner.

The pending amendment carries a number of projects too numerous to count. I think there are about 42; not a single one of them was recommended by the Budget.

Not a single one was ever submitted to the Budget by the Department for consideration. Can we stand for that?

I am not speaking of the merits or demerits of any of these projects. No Member upon this floor can discuss the merits or demerits of the projects intelligently, because the hearings are not complete enough to do that. It is merely the case of one man getting up and stating a few conclusions of his own about the different projects. Remember, not a single one was ever submitted by the Department to the Budget for consideration. None of these projects were included in the bill as it passed the House. The bill went to the Senate, and they summoned the Secretary of the Interior before them and asked him: "Is there not something we can do for these people out there?" Mr. Speaker, I repeat, these were never considered by the Budget, nor even submitted to the Budget by the Secretary of the Interior. An appropriation is included in here of $3,710,500. Does this cover just one project? Is that all we are obligated to give them? If so, for God's sake, let us give it to them and get through with this matter. But that is not all. They take the $3,710,500 and scatter it over about 42 projects, a little here and a little there. The work is commenced in some instances. These projects will involve obligations of from $26,900,000 to $50,000,000 in order to complete them.

Mr. Speaker, is that business? What in the name of common sense have we a Budget for?

Mr. MAY. Will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Kentucky.

Mr. MAY. Can the gentleman tell from the hearings, or has he any information otherwise, as to the probable cost of all of these projects?

Mr. BUCHANAN. I made the statement that these projects will involve future obligations of from $26,900,000 to $50,000,000. This innocent little $3,710,500, which has been included by the Senate committee, has been scattered around over 42 projects and in order to complete them it will take from $26,900,000 to $50,000,000. Even the advocate of this proposition in the Senate admitted it would take $32,000,000 to complete them.

Mr. Speaker, I just wanted to present these facts to the membership. This $3,710,500 covers Indian projects. I want to show the membership just where we are going. Formerly, when we made improvements for the Indians—and this includes irrigation projects—they were required to pay the actual cost of construction. Finally they failed to pay the principal, and then we passed a law which provided that wherever it was evident or could be established or proved that the Indians could not pay—and I may say white people were mixed up with them and got the benefit of these improvements—proof of that fact could be filed with the Congress by the Secretary of the Interior, and if Congress did not reject the recommendation of the Secretary within 60 days the entire amount was canceled and, in effect, donated to the Indians. Under this particular law we have already donated over $12,000,000, a large part of which has gone into the construction of these various irrigation projects.

Mr. Speaker, these things will go on and on. The particular projects involved in this item were not considered by the Budget and were not thought of by the Department until summoned before the Senate committee.

Let us have these things done in an orderly manner. Let us have them submitted to the Budget and then sent over here to the Congress. Let them be investigated by both branches of the Congress and not by just one branch alone.

Mr. RICH. Will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Pennsylvania.

Mr. RICH. Why were not these particular projects brought into the gentleman's committee so that the proposals could be considered?

Mr. BUCHANAN. They were not even submitted to the Budget. They did not come to my committee, and they did not go to the Budget.

Mr. RICH. I want to say that I admire the gentleman in his stand, and I hope the Members of the House will back him up.

Mr. BUCHANAN. I do not know about that, but I feel it is my duty to state the facts to the membership. The interest and integrity of the Congress, as well as the application of business principles in connection with the administration of the Government, demand that we refuse to recede and concur in the Senate amendment.

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 10 minutes to the gentleman from Nevada [Mr. SCRUGHAM].

Mr. SCRUGHAM. Mr. Speaker, there appears to be some confusion as to what question the membership is preparing to vote. This question applies to amendment 24, page 41 of the bill, and relates solely to the construction and repair of irrigation systems on Indian reservations. It has nothing

whatever to do with the main program of reclamation and irrigation as included in amendments 53 and 54.

Mr. Speaker, the question involved here is one of moral responsibility to the Indian race. These Indians have been largely settled in the arid lands of the West. They are a poor people, in many cases a forgotten people. They have to eat, they have to live, and the proposal in this amendment properly provides a place for the Indians of the United States, who are wards of the Government, where they can make a living and feed themselves. It is the only issue involved.

Mr. Speaker, I have spent most of my life in the far West, and I know the desperate poverty and the destitution which exist among many Indians. It is the policy of this Government and the policy of the present administration to make the Indian self-supporting.

First let us take up a typical project, the Colorado River project in Arizona.

The Colorado River project, Arizona, proposed by the Indian Irrigation Service, involves the construction of a diversion dam in the Colorado River and the necessary canal system to irrigate a total of approximately 100,000 acres of Indian land. This is undoubtedly the most economical, undeveloped irrigation project remaining in the United States today. The complete irrigation system, including a diversion dam, can be constructed for approximately $65 per acre, and the annual operation and maintenance charge after the full area is developed will probably not exceed $1.50 per acre. The land is all in Government ownership and, with the exception of about 7,000 acres now being irrigated from a pumping plant, is unallotted and available for the establishment of any Indians residing within the Colorado River watershed. This would include the Navajo, Walapai, Papago, Yuma, and other Indians. The project as designed is ideal from the standpoint of development in that after the diversion dam is constructed, the project can be developed at any speed desired; that is, the development can be prosecuted on the basis of 10,000 acres per year for 10 years, 5,000 acres per year for 20 years, and so forth.

The Indian Office plan is not only to build an irrigation system for supplying water to the land but to actually clear, level, and subjugate the area in order that any Indians assigned land under the project might be able to raise a crop immediately. This scheme will assure the success of the Indians to whom this land is assigned and will materially assist the Indian Bureau in working out the economic independence of a large group of Indians. In addition to the justification for this project from the economic side, it is also very necessary to begin construction immediately in order to put this amount of water from the Colorado River to beneficial use within the United States. The asset of the Colorado River will be very much depreciated within a few years unless steps are immediately taken to use the water beneficially and not permit it to flow into Mexico.

Next let us consider the Pine River Storage Dam in Colorado.

The proposed Pine River Storage Dam is located on Pine River, in the southeastern part of Colorado, about 18 miles above the town of Bayfield. As planned by the Indian Irrigation Service, it will be a combined flood-control and irrigation structure and will cost approximately $3,000,000, $1,000,000 of which is proposed to be expended this year and $1,000,000 each during the fiscal years 1938 and 1939. Preliminary designs were completed several years ago, and the final design is now being prepared under an allotment of $50,000 made available by the Public Works Administration. The final design will be completed within a few months.

The reservoir created by this dam will have a capacity of 100,000 acre-feet and will reduce the flood hazard on this stream, which has caused property damage from $25,000 to $200,000 per year, as well as make available approximately 54,000 acre-feet of stored water per year for use on about 52,000 acres, 35,000 acres of which are white-owned lands and 17,000 acres Indian-owned lands. It is proposed to charge one-half of the cost of this dam to flood control, and one-half will be reimbursed by the lands benefited.

By Federal court decree of October 25, 1930, a priority as of July 25, 1868, was granted to the Indian lands for 213 second-feet diversion from Pine River for use on approximately 17,000 acres. During the summer months, when water is needed most for irrigation purposes, the normal flow of Pine River is sometimes as little as 85 second-feet. This amount is wholly inadequate for the proper irrigation of the Indian lands alone and means simply that without storage the 35,000 acres of white-owned lands along the stream will have to be abandoned. Efforts have been made by both the Indian Office and the Representative from Colorado [Mr. TAYLOR] to secure funds for the construction of this dam for a great number of years. The conditions as to water shortage have been accentuated during the past few years on account of erosion and more rapid run-off, so that the problem of protecting the homes and the property of both the Indians and whites is now very serious.

The mean annual discharge of Pine River is approximately 290,000 acre-feet, and a study of the hydrography indicates that without this proposed storage the Indian lands alone would have an average annual shortage of about 9,400 acre-feet and that the 35,000 acres of white-owned lands would have an average annual shortage of about 45,000 acre-feet. The construction of this dam as proposed will eliminate these shortages and protect the investment of the farmers, as well as prevent further erosion and flood damage downstream. The repayment of 50 percent of the cost of the structure will be made by the lands benefited. The amount chargeable to the white-owned lands will be repaid without interest, and a water users' association has already been formed, with which a repayment contract will be negotiated before construction is started. The costs chargeable to these white-owned lands will not be excessive, being only approximately $30 per acre. Payments will be spread over a period of 40 years, making the annual charge something less than $1 per acre.

Mr. TAYLOR of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. SCRUGHAM. Yes.

Mr. TAYLOR of Tennessee. What explanation has the gentleman for the fact that these projects were not submitted to the Bureau of the Budget?

Mr. SCRUGHAM. I shall refer to that a little later on.

Mr. CULKIN. Mr. Speaker, will the gentleman yield?

Mr. SCRUGHAM. Let me finish my statement and then I shall yield. Probably the gentleman's question will be answered in my statement.

Senator HAYDEN, chairman of the subcommittee of the Senate Committee on Appropriations in charge of this appropriation bill, on February 5 wrote to the Secretary of the Interior as follows:

> I notice that the Interior Department appropriation bill for the next fiscal year, now before the Senate Committee on Appropriations, carries no Indian irrigation items except for maintenance. I should be glad to be advised as to the reason for this omission and also whether there are not some construction items which might be inserted in the bill by the Senate. If so, please let me have your proposals and also any suggestions as to changes in the bill, so that sufficient funds may be provided for necessary Indian irrigation projects without increasing the Budget estimates.

The answer to your question, I think, is found in the reply from the Secretary of the Interior to the chairman of the Subcommittee on Appropriations of the United States Senate which states that the estimate for the Indian Service for the fiscal year 1937 did not include new construction for the reason that they had expected to obtain the money from the P. W. A., and then it was found that these projects could not be undertaken at a figure of $1,145 per man-year of employment and consequently could not qualify under the requirements laid down for the allotment of the $4,800,000,000 appropriation. A full explanation is given in this letter of the Secretary.

Mr. BIERMANN. Mr. Speaker, will the gentleman yield?

Mr. SCRUGHAM. I yield.

Mr. BIERMANN. Why is it that this proposition was not considered by the House Appropriations Committee?

Mr. SCRUGHAM. The conference committee considered it.

Mr. BIERMANN. That does not answer my question. The House Appropriations Committee never considered this item.

Mr. SCRUGHAM. It was not submitted because they expected to get the money from the relief funds, and they found at a comparatively late date that it would cost more than $1,145 per man-year of employment, which is the limit set for the granting of such funds.

Mr. BIERMANN. I understood the gentleman from Texas [Mr. BUCHANAN] to say that if this $3,000,000 involved here were voted, it would ultimately result in a total expenditure of from $26,000,000 to $50,000,000.

Mr. SCRUGHAM. I think the gentleman is confusing that statement with a statement relative to the general program. I think the statement about the $26,000,000 or $50,000,000 possibly refers to that program.

Mr. BUCHANAN. Mr. Speaker, will the gentleman yield?

Mr. SCRUGHAM. I yield.

Mr. BUCHANAN. According to the figures of Senator HAYDEN, which he gave out this morning, if we make the appropriation for these projects, it will involve a total appropriation of $32,000,000 to finish them.

Let me ask my colleague a further question. Why cannot the Works Progress Administration make these expenditures out of the $1,400,000,000 appropriation?

Mr. SCRUGHAM. I cannot answer for the Works Progress Administration, but I understand that they have a limitation of $1,145 per man-year of employment, and my authority is the letter of the Secretary of the Interior to Senator HAYDEN under date of February 10, 1936.

Mr. BUCHANAN. The Secretary of the Interior does not run the Works Progress Administration, and I know that Mr. Hopkins looks favorably on projects where a necessity exists to do useful work.

Mr. SCRUGHAM. Let me complete my statement. The $32,589,000, which the gentleman from Texas states that Senator HAYDEN gave out, does not refer to this item. I have the figures here in detail, and they referred to the construction of the United States reclamation projects, such as Gila, Ariz.; Salt River, Ariz.; Grand Valley; Boise; and so forth. It is a long list and did not refer to this Indian item.

Mr. BUCHANAN. The statement referred to the Indian items, and the figures of my own clerk show it is over $26,000,000, while Senator HAYDEN said it will be $32,000,000, and the probability is it will be $50,000,000 before we finish it.

Mr. SCRUGHAM. That will be a question as to whether future Congresses wish to appropriate the money or not. The $32,000,000 figure prepared and submitted by Senator HAYDEN refers to costs of authorized projects under the regular reclamation program.

Mr. REILLY. If the project is started, will we not have to keep it up?

Mr. SCRUGHAM. The smaller projects are generally completed in a very few years, especially the Indian projects to which I am now referring.

Mr. WIGGLESWORTH. Will the gentleman yield?

Mr. SCRUGHAM. I yield.

Mr. WIGGLESWORTH. The gentleman has referred to the Colorado project and the Arizona project, which call for $2,000,000 at this time, and a total amounting to $13,000,000. The gentleman has referred to the amendment as providing repairs to various projects. It is a fact, is it not, that no work has actually been started on either of the two major projects carried by this amendment?

Mr. SCRUGHAM. I cannot give the exact status. These projects are for and upon Indian lands. If the Congress wishes to take proper care of the Indians, they should pass this legislation. [Applause.]

[Here the gavel fell.]

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 5 minutes to the gentleman from Montana [Mr. AYERS].

Mr. AYERS. Mr. Speaker, it humiliates me to disagree with the distinguished chairman of the Appropriations Committee [Mr. BUCHANAN]. But when he says that this bill is not a business measure I must take issue with him.

First, he contends that this matter was not submitted to the Bureau of the Budget, and, second, that it was not submitted to the Appropriations Committee. Answering these contentions, let me say that both of these objections lie at the door of the Indian Department. That Department never comes to the rescue of its wards in the way of constructive ideas, so I am not surprised that it did not appear in this meritorious case.

The efforts of the Indian Department, Mr. Speaker, is not to rehabilitate the Indians over the United States, but on the contrary, the Indian Department is trying to communize and retard the Indian in this country. From a humanitarian point of view and from a development and constructive point of view I firmly believe that the Indian Bureau is the biggest handicap we are confronted with in our public affairs today. During my 4 years in Congress this Bureau has been the surprise of my life. Its every effort is to take the Indian backward and not forward. The Bureau's only objective is to build up its own organization and its own personnel at the expense of the Indian whom it is supposed to help and advance.

In the last few months it has been trying to force codes upon the tribes throughout the country by having them adopt such codes, whereby they go back to old tribal customs and abandon all civil laws which have been enacted for them.

The Indians do not want to adopt these codes. They are anxious to advance and adopt the ways of modern civilization. But the Indian Bureau, by coercion of every kind, is trying to force its program upon them and retard every advancement which the Indian desires.

Knowing the attitude of the Indian Bureau, I am not surprised that it did not appear before the Bureau of the Budget or the Appropriations Committee to have these Indian irrigation projects rehabilitated. Now, Mr. Speaker, when I say "rehabilitated" I mean just exactly what I say, because that is the purpose of this bill. It is "for the construction, repair, and rehabilitation of irrigation systems on Indian reservations; for the purchase and rental of equipment, tools, and appliances; for the acquisition of rights-of-way and payment of damages in connection with such irrigation systems; for the development of domestic and stock water and water for subsistence gardens, and so forth", for Indian irrigation and reclamation systems now in existence in 12 of the western arid States where Indians have been confined and restricted upon and to reservations.

This appropriation is to rehabilitate and repair now-existing irrigation systems which the Indian Bureau, through its absolute negligence, has permitted to run down and deteriorate. The Bureau has done this purposely because it does not care to have the Indian advance. It would rather have a scheme and a system whereby the Indian would rent his lands for pasture purposes than to have him irrigate them and cultivate and harvest a crop from them which would make him self-sustaining. If the Indian should become self-sustaining—and he can do it by and through this system—then the Bureau would automatically go out of existence; but that is not the Bureau's intent. Its job is to continue in existence and to increase its own authority and its own personnel, 90 percent of which personnel is made up of people who never saw an Indian reservation and who never saw a State in which an Indian reservation is located.

Under the Indian Bureau's plan it would rather have the Indians rent their lands for livestock pasture for a mere pittance than to come before the Bureau of the Budget or before the Appropriations Committee and ask to have these irrigation systems rehabilitated so that the Indian would become self-sustaining.

Mr. Speaker, the Indian Bureau talks to you about Indian rights; but let me, as a persen who is informed, tell you that the only thing the Indian Bureau thinks about is its rights, which are always detrimental to the Indian.

This bill is to rehabilitate the Indian and to reconstruct the Indian irrigation projects which the Bureau has let go to

waste, and we do not find a single solitary man or woman from the Indian Bureau appearing before the committee or appearing before the Bureau of the Budget to help put over this constructive legislation; on the contrary, by their silence and by their absence they give this proposed legislation their disapproval.

The appropriations in this bill for the Indian irrigation projects in my own State, if granted, would soon put the three respective reservations involved on a self-sustaining basis. In two of them the projects are adjacent to sugar-beet factories and the lands under the projects are susceptible to sugar-beet raising, and each of them would be raising sugar beets now if the Indian Bureau had done its duty and kept up these irrigation systems; but, as stated before, the Bureau would rather have the lands rented at a pittance than to have them irrigated and cultivated at a profit. In other words, the Bureau desires to keep the Indian in the fullest state of wardship rather than develop him into a state of self-sustaining citizenship.

The Indian Bureau, in order to perpetuate its existence, would rather keep the Indian on a dole and on an allotment and on a ration program than to permit him to become self-sustaining. And let me remind you that he is against the Bureau on this proposition. He is anxious to become self-sustaining.

Now, Mr. Speaker, I yield to the chairman of the Appropriations Committee [Mr. BUCHANAN].

Mr. BUCHANAN. The gentleman said the reason it was not submitted to the Budget was because they expected to get an allotment of money. The Senate hearings started on this thing on February 15. They had sufficient time to submit it to the Budget after the Senate started these hearings. They could have submitted it to the Budget then on the merits, and we could have had estimates on which to base our appropriation, but they did not do it. The Secretary of the Interior had the allotment of these funds. He ought to have known whether they were going to get the money or not.

Mr. AYERS. Evidently the Secretary did not have the request from the Indian Department. The Indian Department wants to keep these Indians on doles and on rations, instead of making them self-sustaining. I know this from experience. I am speaking as a Member who has six Indian reservations in his district, four of which have this class of irrigation project on them. The same condition exists in the other western States involved.

Mr. Speaker, this is a proper business deal for the Government, and when the Indian Department and the Interior Department failed to do their duty, then the Senate came forward in a business way and put this amendment on the bill. I say to you that this is strictly and unqualifiedly a business deal. I do not care if the Budget or the Appropriations Committee ever saw it or not—it is still good business. It will put these Indians in a place where they can be self-sustaining instead of requiring annual doles, rations, or help.

The distinguished chairman of the Committee on Appropriations knows, because I have appeared before that committee in connection with the subject, that the Commissioner of Indian Affairs waits until the last minute and then comes in and asks for an appropriation to tide the Indians over instead of going about it in the ordinary, honest, decent, businesslike way, in order to make the Indians self-sustaining. The Commissioner's requests are always requests to "tide over", or to communize, and not requests for constructive, progressive, and building policies.

Mr. TAYLOR of Tennessee. Mr. Speaker, will the gentleman yield?

Mr. AYERS. I yield.

Mr. TAYLOR of Tennessee. I know but very little about the Indians, but are there many Indians who know anything about practical farming?

Mr. AYERS. There are a great many; a large number, indeed.

The SPEAKER. The time of the gentleman from Montana [Mr. AYERS] has expired.

Mr. TAYLOR of Colorado. Mr. Speaker, I yield the gentleman 2 additional minutes.

Mr. AYERS. I do know this, in answer to the question of the gentleman from Tennessee, that the younger generation of Indians do know about practical farming, and they do desire to become practical farmers and livestock raisers. The Government is sending them from my State to agricultural colleges in South Dakota, in California, and in Oregon, teaching them practical farming. They come back to the reservations and they want to take up farming and livestock raising. I can give you one instance of an Indian boy who graduated from an agricultural college and he wanted to go out and help repair irrigation ditches and build up ranch and farm lands. He applied for the job, but the Government man in charge told him to put on his blanket and go back to his tepee. In the meantime, a man from the East, who had never seen an irrigation ditch or a ranch, was given the job. Of course, that was not surprising, since more than 80 percent of the key men in the Indian Bureau come from non-Indian States. They just will not give an Indian a break. Yes; let me say to the gentleman from Tennessee the Indian is a practical farmer and stockman if he has a chance. The purpose of this bill is to give him a chance, and I hope the motion of the distinguished chairman of the Subcommittee on Appropriations [Mr. TAYLOR of Colorado] shall prevail. It is for the best interest of the Indians. I concur in everything that the gentleman from Nevada [Mr. SCRUGHAM] has said in that respect. This is an honest-to-God business deal. If the Government ever wanted honest business in the Indian Department, it will get it by adopting this amendment. [Applause.]

The SPEAKER. The time of the gentleman from Montana has again expired.

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. WIGGLESWORTH].

Mr. WIGGLESWORTH. Mr. Speaker, I rise in opposition to the Senate amendment. I simply want to emphasize in this connection what the distinguished and able chairman of the committee, the gentleman from Texas [Mr. BUCHANAN], has already dwelt upon. This amendment is in fact 42 amendments in a single amendment. It is in fact 42 irrigation items which this House is asked to vote up or down as a whole. Furthermore, it is 42 amendments without a single estimate from the Bureau of the Budget in respect to any one of the 42 items. We are asked to vote today for an initial expenditure, in the absence of any such estimate, amounting to over $3,700,000 as part of a program, according to my information, amounting to some $70,000,000, and contemplating an increase in acreage for cultivation amounting to over 440,000 acres.

Mr. Speaker, I am not satisfied with the urgency of all the items embodied in this amendment. I am not satisfied, for instance, in regard to the two major projects that have been referred to—projects which it is proposed to start work on for the first time now. I am not satisfied that there is urgent necessity to embark upon those projects at this time.

I am opposed, as a matter of procedure, to being called upon to vote in respect to 42 amendments embodied in a single amendment. I am opposed, as a matter of procedure, to being called upon to pass on large expenditures of this character without any estimate whatsoever on the part of the Bureau of the Budget. I cannot conscientiously vote to embark on a $70,000,000 irrigation program this afternoon under these conditions.

Mr. CULKIN. Mr. Speaker, will the gentleman yield?

Mr. WIGGLESWORTH. I yield.

Mr. CULKIN. The gentleman from Montana [Mr. AYERS] made a plea for the Indians. Is it not a fact that at the present time we are expending approximately $50,000,000 a year for the benefit of the various Indian tribes, aside from this proposal?

Mr. WIGGLESWORTH. I do not have the exact figure in mind; but it is a very substantial figure, of course.

Mr. CULKIN. So that the United States Government does not neglect the Indian. In fact, the Indian is best beloved in the States where he is, where it is said he is one of the chief sources of income.

Mr. HOLMES. Mr. Speaker, will the gentleman yield?

Mr. WIGGLESWORTH. I yield.

Mr. HOLMES. I would like to make this observation: As a matter of fact, was not the Indian self-sustaining long before he had any contact whatsoever with the white man, and, as a matter of fact, his troubles have been since that time?

Mr. WIGGLESWORTH. I am afraid there is a great deal of truth in that statement.

[Here the gavel fell.]

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 3 minutes to the gentlewoman from Arizona [Mrs. GREENWAY].

Mrs. GREENWAY. Mr. Speaker, it has been my privilege to serve on the Committee on Indian Affairs and I am glad my colleague, the gentleman from New York, brought up the issue of the history of the unstable policy over many years and the extravagance of that Bureau. I think it should be carefully and finally abolished and the Indians should be given the privilege and opportunity of actual citizenship instead of subsidized isolation as a nation within a nation.

Mr. Speaker, I rise to advocate the reclamation projects carried in the Senate amendment pertaining to Indians as a first and absolutely necessary step toward creating the economy that will make possible abolishing of the Indian Bureau. I was going to say that it only cost us from its inception $2,000,000 up to $40,000,000, but I notice the gentleman put it at $50,000,000. Whatever it is, I think it would be cheaper to pension the old people, put the strong men on farms such as this particular project would supply in my State, and to underwrite the vocational education of the youth. I believe we would save money and incidentally we would treat the Indians fairly by making them self-supporting and self-respecting American citizens.

Mr. CULKIN. Mr. Speaker, will the gentlewoman yield?

Mrs. GREENWAY. I am sorry I cannot yield; I have but 3 minutes.

Mr. CULKIN. The gentlewoman referred to me. Will she not answer a very brief question?

Mrs. GREENWAY. Yes.

Mr. CULKIN. Does the gentlewoman from Arizona believe that it is possible to make a successful husbandman out of the noble red man?

Mrs. GREENWAY. I not only believe it, I know it and have proof of it in the Sacaton development among the Pima Indians of Arizona.

Mr. CULKIN. Are those purebloods?

Mrs. GREENWAY. They are so far as I know.

The Colorado River project in Arizona proposes to duplicate the Sacaton development where Indians were earning their living on individually owned 10-acre plots. It involves a development at the lowest cost of any reclamation project in the United States, $65 an acre, with a maintenance and operating charge of $1.50; and it can be developed at the will of Congress over 10 years with 10,000 acres or over 20 years with 5,000 acres. If you do not develop the Colorado River on the American side we shall be held responsible here in Congress for an enormous productive development in Mexico.

[Here the gavel fell.]

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 2 additional minutes to the gentlewoman from Arizona.

Mrs. GREENWAY. In this connection I may say that the projects in my State carried in this bill are self-liquidating. The Salt River Valley has never defaulted in its payments and in 1929 brought the farmers an income of approximately $26,000,000, and in the depression about $9,000,000. Under the Senate amendment to this bill they will receive $2,300,000 toward completing the project for which they received and spent last year $3,500,000 and which will need only $1,044,000 more to complete this particular unit.

The other project is the Gila project, which eventually will also be self-liquidating.

Construction of the Gila project at this time is imperative to preserve within the United States rights to the waters of the Colorado River. The project is feasible in every respect, having been found so by both Bureau of Reclamation and by an impartial board selected by the Secretary of the Interior. Its soil is good. Its production is needed in the West, where no agricultural increases can be made except by irrigation and where populations continue to grow. Its products, because of a warm, dry climate, are specialty crops that do not compete with those of any other section. Production of dates, long-staple cotton, and the like on our reclaimed deserts do not injure farmers in humid sections of this Nation. These things still appear on our list of imports.

The point I really wish to stress is that without this development of the Gila Valley the water of the Colorado River will be allowed to flow into Mexico, where it is available for use—a use which would establish a perpetual right to our water.

We have built Boulder Dam and spent millions in improving the Colorado River and in the conservation of its waters for the benefit of seven of our States that lie in its basin. Now, are we to permit this water, this life-giving water, the greatest resource of our arid West, to flow into Mexico, where it can be used, and where a right to continued use of it can and will be established? If not, we must put it on our land. That is what the Gila project will do. It will use in Arizona, one of the States of the Colorado River Basin, a part of the water for conservation of which we built Boulder Dam.

The Gila project will be constructed in a logical manner by the Bureau of Reclamation. This appropriation of $2,500,000 and the allotment of $2,000,000 made last year from emergency funds are to be used in construction of the first unit of the project. This unit is comprised of 150,000 acres of land, virtually all of which is Government land, and all of which is desert. The main canal to this unit will be constructed of sufficient size to permit the carriage of additional water for the entire project when it ultimately shall be completed. For that reason the cost of construction of the first unit is estimated at $20,500,000. A large portion of this cost will be allocated for repayment to other units when later they are developed. The total acreage of the ultimate project will be about 600,000.

Work is under way on a 17-mile section of the gravity main canal of the Gila project.

Arizona has a vital interest in completion of this project. Without use of the water that is available my State cannot grow or develop. More than two-thirds of the area of Arizona is owned by the Federal Government. The proportionately small amount that is on the State tax rolls must carry the burden of the entire State. Where it can be developed, the public land must be developed so that it, too, may become truly a part of Arizona.

To save our life-giving water, to create new opportunities, to produce noncompetitive crops, and to aid the development of Arizona, of which the Federal Government owns two-thirds, the Gila project must be completed.

These are the reclamation projects that do pay the United States the construction cost and interest charges. Here we sit voting billions of dollars that will never come back to us when we could be putting business projects into being in the United States that would pay; and in addition to that, it would enable us again to produce in the United States those things which will reclaim for the farmer his own domestic markets and stop some of these agricultural imports from all over the world. [Applause.]

[Here the gavel fell.]

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 2 minutes to the gentleman from Iowa [Mr. BIERMANN].

Mr. BIERMANN. Mr. Speaker, I do not believe we ought to adopt this amendment at this time in this way. The RECORD shows that this proposition has never been considered by the Budget Bureau; it has never been considered by our Committee on Appropriations. The chairman of the Appropriations Committee is opposed to it. He has come in here and said that if we vote this three-million-and-odd dollars it is going to call for another expenditure of $26,000,000 and may cost as much as $50,000,000.

Nobody has denied that this is a proposal to bring into use more land for agricultural purposes. We have too much land in production now.

Mr. WHITE. Mr. Speaker, will the gentleman yield?

Mr. BIERMANN. I cannot yield. I have not the time.

We have too much agriculture now for the domestic market. The gentleman from Montana said that in his neighborhood they were going to use this land to raise sugar beets. We already have a quota on the raising of sugar beets in the United States which the sugar-beet men consider too small. We are not going to lose anything by letting this matter go over until we meet next year and then it can be properly considered. Then we can bring in our own bill instead of having the Senate write our appropriation bills.

The gentleman from Massachusetts directed attention to the fact that in this bill, if we vote for it as the Senate wants us to vote, it will involve an expenditure of $100,000,000 more than was appropriated 3 or 4 years ago. I do not want to do this sort of thing; and I hope the Members will defeat the motion to recede and concur in the Senate amendment.

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 5 minutes to the gentleman from Oregon [Mr. PIERCE].

Mr. PIERCE. Mr. Speaker, I am very much in hopes the motion offered by the chairman of the subcommittee, the gentleman from Colorado [Mr. TAYLOR] will be agreed to.

The Indians are highly intelligent and many of them work hard and are making an honest effort to support themselves, just as the white people do. In my district there is one little project that will get about $15,000 out of this appropriation. I recommended this to the Indian Department when I came here, and I was under the impression it would be included in their general recommendations to the Appropriations Committee; however, they did not so recommend it and it had to come in by way of a Senate amendment on motion of Senator STEIWER. This amount should by all means be included.

I may say that the reservation involved is within 120 miles of Portland. Those Indians have a very beautiful tract of land, which includes a forest 40 miles by 30 miles, containing all virgin trees. They want to put in their own sawmill. They want to reservoir some water from the head of the creeks so that they may raise gardens to feed themselves. They want to get some cows. They want to live there. Now, why not give them this opportunity?

Mr. Speaker, this Congress a few days ago appropriated $102,000,000 to build two battleships which some boy may blow out of the ocean in about a minute with a bomb dropped from an airplane. Now, why fuss over a few thousand dollars which will make self-sustaining thousands of these Indians?

Mr. RICH. Will the gentleman yield?

Mr. PIERCE. I yield to the gentleman from Pennsylvania.

Mr. RICH. The gentleman just made the statement that he thought it was foolish to build two battleships and spend $102,000,000 thereon. Does not the gentleman also think we ought to stop spending a few hundred million dollars on some of these other projects?

Mr. PIERCE. But this is an appropriation which if made will be of great value and the money will come back into the Treasury.

Mr. AYERS. Will the gentleman yield?

Mr. PIERCE. I yield to the gentleman from Montana.

Mr. AYERS. Is it not a fact, as referred to by our friend, the gentleman from New York, that we are spending $50,000,000 at the present time in order to maintain the Indians?

Mr. PIERCE. Yes.

Mr. AYERS. If this amendment is passed, our grants to the Indians may be gradually reduced until they will ultimately become self-sustaining.

Mr. PIERCE. The gentleman is correct. I do not agree fully with my colleagues who criticize the Indian Bureau, but there is much truth in what has been so eloquently stated here. It does need some reforming.

Mr. Speaker, there are thousands of Indians in my district, on the four reservations in Oregon. They have their own farms, they have their own stores, they associate with the white people, and they are highly intelligent citizens. I do not know about the projects in Arizona which have been so eloquently described by my colleague from Arizona, but I am going to take her word for it. I think this is money well spent.

Mr. TABER. Will the gentleman yield?

Mr. PIERCE. I yield to the gentleman from New York?

Mr. TABER. Is it not a fact that Mr. Fortier, in charge of Indian reclamations, stated on page 159 of the hearings that these projects would cost $60,000,000?

Mr. PIERCE. Maybe they will cost that much money. I do not know how much they will cost, but I do know that the money will not be lost to the Government. It will not result in bringing new agricultural projects into competition with agricultural products now being raised. The products raised on these irrigation projects will be used to feed the Indians themselves. They want their own cows. They want to raise their own vegetables so that they may be able to live.

Mr. BIERMANN. They are eating material raised on their lands now?

Mr. PIERCE. Some of them are not having enough to eat. Many of them need this help. If the gentleman will just visit some of these reservations he will find how much they need dairy products and gardens.

Mr. BIERMANN. They do not continue the practice of not eating for a very long period of time.

[Here the gavel fell.]

Mr. TAYLOR of Colorado. Mr. Speaker, may I say to the Members of the House that our committee every year goes over these items covering the Indian tribes very carefully. If we are going to prevent the extinction of the Indians from our country, we will have to furnish them some way of making a living. The pending amendment applies to 13 arid Western States and will furnish money for irrigation purposes in order to permit the Indians to make a living. That is really what it amounts to.

So far as Colorado is concerned, the money is reimbursable and will be taken out of the Ute funds, and some of it will be paid by white settlers. It will therefore come back to the Treasury. The same statement applies to Montana and Wyoming.

Mr. Speaker, I feel this is the humanitarian thing to do for these Indians, who are our wards. This only appropriates $3,710,500 now and will result in an ultimate appropriation of something like $26,900,000 at some later time; but even so, if we should not have these Indians in the bread line, and if we are not going to permit them to starve to death, we will have to furnish some means for them to make a living. They can no longer live by hunting and fishing. I feel that the motion I have offered is proper. The Indian Bureau did not get any money from the Public Works Administration last year, and they received none this year. For this reason this item has been included in the pending bill.

Mr. Speaker, I move the previous question on the pending motions.

The previous question was ordered.

The SPEAKER. The question is on the motion that the House recede from its disagreement to the Senate amendment.

The question was taken; and on a division (demanded by Mr. TABER) there were—ayes 45, noes 72.

Mr. WHITE. Mr. Speaker, I object to the vote on the ground there is not a quorum present.

The SPEAKER. The Chair will count.

Mr. WHITE. Mr. Speaker, I withdraw my objection.

So the motion to recede was rejected.

Mr. BUCHANAN. Mr. Speaker, I move that the House further insist on its disagreement to the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next Senate amendment in disagreement.

The Clerk read as follows:

Amendment no. 31: On page 52, line 17, insert: "and to remain available until June 30, 1938."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next Senate amendment in disagreement.

The Clerk read as follows:

Amendment no. 32: On page 52, line 24, after the word "Interior", insert a colon and the following: "*Provided further*, That a report shall be made to Congress covering expenditures from the amount herein provided for relief of destitution."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next Senate amendment in disagreement.

The Clerk read as follows:

Amendment no. 33: On page 66, after line 12, insert: "Sioux Sanatorium and employees' quarters, South Dakota: That in addition to the $337,500 made available by the Second Deficiency Appropriation Act, fiscal year 1935, for the construction of an Indian sanatorium and employees' quarters, in South Dakota, a further sum of $29,875, representing the remainder of the original appropriation of $375,000 contained in the Interior Department Appropriation Act, fiscal year 1932, and not reappropriated by the Second Deficiency Appropriation Act, fiscal year 1935, is hereby reappropriated and made available until June 30, 1937, for the construction of such sanatorium and employees' quarters."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next Senate amendment in disagreement.

The Clerk read as follows:

Amendment no. 35: On page 58, after line 2, insert: "and to remain available until June 30, 1938."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next Senate amendment in disagreement.

The Clerk read as follows:

Amendment no. 39: Page 59, line 11, strike out "$55,000" and insert: "$69,000, of which $4,000 shall be available only for traveling and other expenses of members of the tribal council, or representatives of the tribe engaged on business of the tribe at the seat of government, and $10,000 shall be available in a permanent revolving fund for loans to cover burial expenses of members of the tribe, and payments in liquidation of such loans shall be credited to the revolving fund and shall be available for loans for similar purposes under regulations to be prescribed by the Secretary of the Interior."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next Senate amendment in disagreement.

The Clerk read as follows:

Amendment no. 46: Page 60, line 13, strike out "$399,000" and insert "$433,500."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment with an amendment.

The Clerk read as follows:

Mr. TAYLOR of Colorado moves that the House recede from its disagreement to the Senate amendment no. 46, and agree to the same with an amendment as follows: "In lieu of the sum proposed insert '$432,300.'"

Mr. TAYLOR of Colorado. Mr. Speaker, this is merely to correct the total figure.

The motion was agreed to.

The SPEAKER. The Clerk will report the next Senate amendment in disagreement.

The Clerk read as follows:

Amendment no. 50: Page 62, after line 2, insert:

"For acquisition, rehabilitation, and preservation of the Tuskahoma Council House, in Pushmataha County, Choctaw Nation, Okla., $7,500, or so much thereof as may be necessary, to be immediately available, payable from the fund 'Fulfilling Treaties with Choctaws, Oklahoma', now to the credit of the Choctaw Indians of Oklahoma."

LXXX——482

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment, and I yield 2 minutes to the gentleman from Oklahoma [Mr. CARTWRIGHT].

Mr. CARTWRIGHT. Mr. Speaker, this Council House is located at Tuskahoma, in my congressional district, where the Choctaw Indians are established. This Council House is the old capitol of the Choctaw Nation. The Appropriations Committee has recommended that $7,500 of the tribal funds of the Choctaws be made available for the acquisition and rehabilitation of the Tuskahoma Council House. Indians are all for it and nobody is against it. I hope the item remains in the bill.

I am in receipt of a letter from the Choctaw Council House committee, signed by W. A. Durant, chairman; Victor M. Locke, treasurer, and Muriel H. Wright, secretary, giving something of the history of this, one of southeastern Oklahoma's most historic spots, which in part is as follows:

The last Council House near Tuskahoma was a symbol of the pride, character, and achievement of our forefathers in the Choctaw Nation. In the past the Choctaw people have fostered education of their youth, organized government and the general welfare of their nation. Representative of this spirit, the Council House was erected in 1884 in the central part of the Choctaw country, a region noted for its natural beauty. It is but fitting that the Choctaw people today should cherish this historic building on its original site, as a heritage to the honor of their forefathers and posterity.

Although from time to time, for several years, there have been expressions on the part of the Choctaws for the permanent preservation of the Council House at Tuskahoma, the building with the surrounding 5 acres was finally sold by the United States Government, under provisions of the Atoka and supplemental agreements. This property was purchased by the Southeastern State Teachers' College, at Durant. Some were in favor of tearing down the Council House and moving it 130 miles away to the college campus. The full-blood Choctaws and many others have maintained the building should be preserved on its original location near Tuskahoma as an outstanding historic site in Oklahoma. Up to this time, no definite steps have been taken to preserve the Council House, which is now almost in ruins.

The SPEAKER. The question is on the motion of the gentleman from Colorado to recede and concur in the Senate amendment.

The motion was agreed to.

The SPEAKER. The Clerk will read the next amendment in disagreement.

The Clerk read as follows:

Page 65, after line 12, insert the following: "The Secretary of the Interior is hereby authorized to withdraw from the Treasury of the United States $105,000 of any funds on deposit to the credit of the Menominee Indians in Wisconsin (except the Menominee Log Fund), and to expend said sum, or so much thereof as may be necessary, for an immediate per-capita payment of $50 to each enrolled member of the Menominee Tribe.

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Page 24, after line 21, insert the following:

"The following-named reclamation projects are hereby authorized to be constructed, the cost thereof to be reimbursable under the reclamation law:

"Central Valley project, California: For flood control, improving and in aid of navigation, and to provide for the general welfare in cooperation with the State of California, and for incidental purposes, including irrigation, drainage, and power production.

"Grand Lake-Big Thompson transmountain diversion project, Colorado: To irrigate public lands of the United States and to provide for the general welfare in cooperation with the State of Colorado, and for incidental purposes, including the irrigation of patented land, power production, and flood control: *Provided*, That said project shall include the construction and the permanent maintenance of adequate compensatory or replacement reservoirs, necessary feeder canals, and other incidental works at the most suitable sites within said State; the water impounded by said reservoirs to be used within the Colorado River Basin, and the cost of constructing and maintaining such reservoirs, feeder canals, and incidental works shall be included in the cost of said project and be repaid by the beneficiaries of the water so diverted from said basin: *Provided further*, That said project shall be constructed and operated in such manner as to continuously maintain the normal levels of the waters of said Grand Lake.

"Carlsbad project, New Mexico: To provide for the general welfare in cooperation with the State of New Mexico and for incidental purposes, including irrigation and flood control.

"Deschutes project, Oregon: To provide for the general welfare in cooperation with the State of Oregon and for incidental purposes, including irrigation and flood control.

"Provo River project, Utah: To provide for the general welfare in cooperation with the State of Utah and for incidental purposes, including irrigation and flood control.

"Yakima project, Washington, Roza division: To provide for the general welfare in cooperation with the State of Washington and for incidental purposes, including irrigation and flood control.

"Casper-Alcova project, Wyoming: To irrigate public lands of the United States and to provide for the general welfare in cooperation with the State of Wyoming and for incidental purposes, including the irrigation of patented lands, power production, and flood control."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur with an amendment, as follows.

The Clerk read as follows:

Mr. TAYLOR of Colorado moves to recede and concur in the Senate amendment with an amendment as follows: "Strike out the third paragraph in said amendment, in lines 9 to 26, inclusive, relating to the Grand Lake-Big Thompson transmountain diversion project, Colorado."

Mr. CUMMINGS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CUMMINGS. Will a motion be in order to consider these items separately?

The SPEAKER. No; there is only one Senate amendment.

Mr. BUCHANAN. Mr. Speaker, I think the House ought to vote down the motion to concur. I am going to demand a division of the question.

Mr. TABER. Mr. Speaker, on this question there is quite a little demand for debate. It seems to me that we might consolidate the debate on amendments 53 and 54 together and have 2 hours on the two amendments, and then at the end of the debate vote on them separately.

Mr. TAYLOR of Colorado. I am willing to agree to 2 hours' debate on the two amendments.

Mr. BUCHANAN. Does the gentleman from New York think that is enough?

Mr. TABER. I think we can get through in 2 hours.

Mr. TAYLOR of Colorado. Mr. Speaker, I ask that the debate be limited to 2 hours on the two amendments nos. 53 and 54.

The SPEAKER. The gentleman from Colorado asks unanimous consent that for the purpose of debate amendments 53 and 54 be considered together, and that the time be limited to 2 hours, to be controlled by the gentleman from Colorado.

Mr. MAY. Reserving the right to object, do I understand that at the end of the debate the amendments will be voted upon separately?

The SPEAKER. Undoubtedly the amendments will be voted upon separately. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The SPEAKER. The gentleman from Colorado [Mr. TAYLOR] is recognized for 2 hours.

Mr. TAYLOR of Colorado. Mr. Speaker, I yield 10 minutes to the gentleman from Iowa [Mr. THURSTON].

Mr. THURSTON. Mr. Speaker, it seems to me that the title of this bill should be amended by adding a phrase something like this, "Also for the purpose of further distressing and dislocating agriculture."

I hope, I insist, that some subsequent speaker will have the fairness to tell the Members of this House how many hundreds of millions of dollars are involved in these irrigation and reclamation projects proposed in the Senate amendments. It is true that the current amount that would be made available amounts to some $60,000,000, but surely the sponsors of this proposition ought to have the courage and fairness to come here and tell the membership of this House what the ultimate cost of these projects will be. Surely they cannot presume upon our generosity or indifference to the extent of asking us to blindly make authorizations for expenditures that will entail a billion and a half or, as some have predicted, $2,000,000,000 to complete the proposals. Fairness should require those who are interested in this project to make this information available to the Members.

Already it is estimated that irrigation projects have been authorized and are now under construction which will cost at least one and one-half billion dollars. No one knows just how many acres of productive land are involved in these projects, but it is safe to say that one acre of fertile land which receives a constant supply of water through irrigation will produce three or possibly five times as much as marginal or rough land, which is being retired through the soil-conservation program.

Mr. Speaker, it seems to me it is an astounding situation that we face today. With little or no information in regard to these proposals, it is suggested that we should jack the Treasury for untold millions of dollars. It almost seems incredible that such a brazen, unwarranted expenditure should be seriously proposed. In this Chamber, almost every day since we have been assembled here, one, sometimes several, and oftentimes many Members have told about the plight of agriculture, low farm prices, high taxes, and the inability of those engaged in the farming industry to obtain a fair return to compensate them not only for their endeavors but for the investment they have in their enterprise. Here it is proposed that we should greatly expand the farming area of the country. It is only fair to admit that when there are substantial increases in the population of a country that the completion of some of these projects may then be warranted. We should commend the cleverness and the adroitness of the Members who come from the semiarid section of the country in saying to us, "The additional acreage will not be used to produce more farm products." But the Bureau of Reclamation of the Department of the Interior sends out very beautifully prepared illustrated pamphlets and booklets showing the extent of the farm production that is being produced in the irrigated districts. I would like my good friends to step into the Republican cloakroom and see the large picture frame with several sections furnished by the Bureau of Reclamation which shows fields of wheat and clover and alfalfa sustaining livestock and other farm products. So it will not do for Members to come here and take this inconsistent position on this floor saying that the addition of these lands to be brought into the farming business will not increase farm production and thereby add to the present surplus production.

Then, I confess I cannot understand the logic of the gentlemen from those sections who are promoting these new farm-land projects, because you know, and I know and everyone knows, that there has been a tremendous number of foreclosures of mortgages in those regions. Why? Because the men who were in the farming business could not make a living. Yet it is proposed to double—yes, quadruple—the production of farm prodcts in those various sections. It seems to me that a distinct injury will be brought to the farmers in those sparsely settled districts who are obliged now to ship their products great distances before they can reach the consuming centers of the country. It is our duty to protect the farmers in the arid districts from additional competition.

I hope the Members, not only from the farming districts but from the city districts, will give careful consideration to these proposals. Members who mainly represent consumers might argue, "Well, if we provide for a great quantity of production it will make cheap food products for our city consumers." That may be true, but if we throw out of employment a vast number of farmers, the people in the city districts, through taxation channels, will be obliged to support and assist those same people. After all, it resolves itself down to the simple proposition: Is this a sound proposal for agriculture? If it is not, it will be harmful to the entire country. I cannot conceive of anyone coming from a purely agricultural section who would contend that this would aid agriculture; that it will not be injurious. Even those in the districts affected, it seems to me, would have

more consideration for the constituents who send them here rather than to provide those same constituents with additional competition. If this motion should prevail, and these projects should be authorized, it would be another sad day for agriculture.

Recently a measure was defeated in the House which would have provided a lower rate of interest for refunding or refinancing farm indebtedness. If those who were so strongly opposed to the low rate of interest for the farmer can justify their support of this bill, which would grant funds to land speculators or farmers who may purchase land in irrigated districts, with no interest for 40 years, it would be interesting to have them endeavor to explain their inconsistency.

Within the past few days we have read of the new reciprocal treaties consummated with France and Finland, and the reduction made in duties, particularly upon dairy products. So it seems that these are rather unhappy days for agriculture. Official reports indicate great increases in imports of farm products.

Mr. BIERMANN. Mr. Speaker, will the gentleman yield?

Mr. THURSTON. I yield.

Mr. BIERMANN. Does the gentleman mean to say that the agreement with France provides for a reduction in dairy products?

Mr. THURSTON. A reduction in the duty on cheese; yes. It is true that our people may be able to purchase lace, wine, and perfumery a little cheaper as a result of that trade, but I cannot conceive why it would be an advantage to our people to import more products from cheap-labor countries.

It seems to me that before we vote upon this conference report each Member should attempt to visualize the number of farmers who have land that is heavily encumbered, and whose future existence depends upon an income which will prove sufficient to fertilize the land and repair the buildings and improvements, in addition to an income that will permit the farmer and his family to have not only necessities but some of the luxuries which the average citizen is entitled to enjoy.

Then I want to make reference to this situation: Coming from Iowa, a State which stands first in the major agricultural operations of the country, we know about the competition of cheap lands in Canada, the Argentine, and Australia, the cheap transportation charges for hauling products by water throughout the world. Likewise, the cheap labor levels that exist elsewhere—one-fourth to one-tenth the level of our own country. Of course, we are not only concerned about these reciprocal trades that are being secretly made without notice to those concerned, mainly to trade off the products of the farming sections of the northern portion of the United States for products which we do not need—lace, or wine, or perfume—which we can produce at home.

Recently Chester Davis, the A. A. A. Administrator, gave out a press release that expressed the view that "the United States can never recapture its foreign markets for farm commodities because of the increase of self-sufficiency programs erected by the nations in Europe." He further stated:

> I have talked with responsible leaders of government and agriculture in 11 countries, and not one of these countries has failed to equip itself with effective machinery to exclude or to offset exports from our country, no matter how heavily we might subsidize them.

So he bursted the bubble of foreign-market expansion in farm products. Then why should we expand or increase farm production?

So when these other proposals come along to place additional land in cultivation, with no interest charges for 40 years, no one seems to know the exact cost, but it is estimated at one and one-half to two billion dollars, and possibly moratoria to extend the time of payment, if ever it is reached; surely we have a right to be concerned, and we cannot understand why our Government is fostering what we call a soil-erosion program to withdraw land from cultivation, and then placing additional land into farming operation, with a constant supply of water, nurtured by every Federal agency to make it a success. This is contradictory and unsound, and we hope that the House will register its disapproval of this irrigation program.

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 5 minutes to the gentleman from Utah [Mr. MURDOCK].

Mr. MURDOCK. Mr. Speaker, it seems that in the discussion of reclamation some Members of this House immediately prejudice their minds and get the idea that every dollar that goes into reclamation goes into the pockets of the people in the States where the projects are located. Nothing could be more unfair, nothing more untrue than that conception of reclamation projects.

I refer, Mr. Speaker, to the hearings before the subcommittee on this question. Mr. Page, the head of the Reclamation Bureau at the present time, made a break-down of how the Bureau is spending its money for major materials going into Boulder Dam, and with the permission of the House I shall read it, for it shows that the money spent on reclamation is not spent in the locality where the project is constructed, but is scattered from one end of the United States to the other; and I know the items I have here are of interest to every man and woman in this House and that the money spent on reclamation goes into every section of the United States. In the break-down of the Boulder Dam project what do we find? I quote below a short extract from the Reclamation Era of July 1935:

> A break-down of the Bureau's larger expenditures for materials shows that $620,535 went to Los Angeles; $1,049,395 to Birmingham; $10,908,000 to Barberton, Ohio; $172,100 to Elizabeth, N. J.; $124,684 to Newport News, Va.; $65,186 to Rockford, Ill.; $2,405,367 to East Pittsburgh; $105,989 to Susanville, Calif.; $1,883,217 to Milwaukee; $2,185,416 to Schenectady, N. Y.; $2,086,000 to southern California cities for cement; $148,160 to Denver; $419,191 to Gary, Ind.; $46,090 to Muskegon, Mich.; $107,023 to Niles, Mich.; $108,430 to Chicago; $298,048 to Philadelphia; $547,825 to San Francisco; $62,377 to St. Louis; and smaller amounts to more than a dozen other communities.

Following is another tabulation which shows the origin of many millions of dollars spent by the contractor in the construction of that project:

SPREAD OF PURCHASES

Firms from which Six Cos., Inc., have purchased equipment, materials, or services in excess of $50,000 for Boulder Dam contract work and the approximate amounts of the purchases:

Apache Power Co., Benson, Ariz., explosives, $287,000.

Bucyrus Erie Co., Milwaukee, Wis., excavating equipment and parts, $77,000.

General Motors Corporation, James Cashman, agent, Las Vegas, Nev., motor trucks, automobiles, and parts, $50,000.

Caterpillar Tractor Co., Stockton, Calif., and Peoria, Ill., tractors, $137,000.

Chapman Lumber Co., Portland, Oreg., lumber, $127,000.

Columbia Steel Co., San Francisco, Calif., structural steel, pipe, wire rope, $1,022,000.

Consolidated Steel Corporation, Ltd., Los Angeles, Calif., fabricated structural steel, $504,000.

Crane Co., Los Angeles and Chicago, pipe, fittings, and plumbing fixtures, $211,000.

Crucible Steel Corporation of America, Chicago, Ill., drill steel, $149,000.

California Western Oil Co., Los Angeles, Calif., locomotive fuel oil, $113,000.

Chain Belt Co., Milwaukee, Wis., truck mixers and pump cretes, $86,000.

Dorr Co., Chicago, Denver, and Los Angeles, desilting and sand-grading equipment, $79,000.

Electric Steel Foundry Co., Portland, Oreg., buckets, $58,000.

Elliott Core Drilling Co., Los Angeles, Calif., detachable drill bits, $79,000.

Ford Motor Co., Detroit, Mich., autos and trucks, $96,000.

Foss Heating & Ventilating Co., Pasadena, Calif., air-conditioning equipment, $78,000.

General Electric Supply Co., Schenectady, N. Y., electric supplies and wire, $425,000.

Giant Powder Co., Giant, Calif., explosives, $217,000.

Goodyear Tire & Rubber Co., Akron, Ohio, and Los Angeles, Calif., tires, $80,000.

Hammond Lumber Co., Pacific coast points, lumber and millwork, $56,000.

Hercules Equipment & Rubber Co., San Francisco, Calif., and Akron, Ohio, rubber hose and supplies, $74,000.

Hercules Powder Co., Herpoco, Calif., explosives, $500,000.

Ingersoll Rand Co., of California, Phillipsburg, N. J., Painted Post, N. Y., and Los Angeles, Calif., compressor, air drills, and air hoists, $501,000.

International Harvester Corporation, Fort Wayne, Ind., motor trucks and parts, $352,000.
C. S. Johnson Co., Champaign, Ill., batching equipment, $52,000.
Kelly-Springfield Tire Co., Cumberland, Md., tires, $199,000.
Linde Air Products Co., Los Angeles, Calif., oxygen, acetylene, and rod, $177,000.
Los Angeles & Salt Lake Railroad Co., locomotives, repairs, and car rentals, $223,000.
Lidgerwood Manufacturing Co., Elizabeth, N. J., cableways, $145,000.
Leschen Wire Rope Co., St. Louis, Mo., wire rope, $71,000.
Marion Steam Shovel Co., Marion, Ohio, excavating machinery, $431,000.
Moreland Motor Truck Corporation, Burbank, Calif., trucks and parts, $137,000.
Mack International Motor Corporation, New Brunswick and Plainfield, N. J., trucks and parts, $274,000.
Mountain States Implement Co., Ogden, Utah, electric fittings and globes, $51,000.
National Equipment Corporation, Milwaukee, Wis., concrete mixers, $69,000.
Paraffine Co., Inc., San Francisco, Calif., building supplies, $109,000.
Pioneer Rubber Mills, Pittsburg, Calif., belting and hose, $53,000.
Pacific Wire Rope Co., Los Angeles, Calif., wire rope, $130,000.
Standard Oil Co., Los Angeles, Calif., gasoline, lubricants, and fuel oil, $557,000.
Union Hardware & Metal Co., Los Angeles, Calif., light and heavy hardware, $501,000.
Union Oil Co., Los Angeles, Calif., gasoline lubricants and fuel oil, $562,000.
Union Pacific System, freight, $1,585,000.
United Commercial Co., San Francisco, Calif., rail, cars, and locomotives, $251,000.
United States Rubber Co., Akron, Ohio, hose, insulated wire, $52,000.
Westinghouse Electric & Manufacturing Co., Pittsburgh, Pa., electric motors and transformers, $293,000.
Western Wheeled Scraper Co., Aurora, Ill., dump cars, $65,000.
White Motor Co., Cleveland, Ohio, trucks and parts, $106,000.

Following is a break-down of the Bureau's larger expenditures on the Grand Coulee project:

States and the extent to which they have benefited so far follow: Wisconsin, $123,048.18; Washington, D. C., $2,600; Utah, $2,410.54; Tennessee, $201.71; Pennsylvania, $744,201.22; Ohio, $654,139.33; New York, $1,151,894.45; New Jersey, $535,049.55; Montana, $51,498.24; Missouri, $55,598.50; Minnesota, $129,727.21; Michigan, $53,539.85; Iowa, $76,359.92; Kansas, $10.73; Kentucky, $3,960.70; Maine, $3,166.64; Maryland, $42,771.23; Massachusetts, $99,391.06; Oregon, $170,719.13; Rhode Island, $2,651.06; Texas, $68; Virginia, $792.10; West Virginia, $5,451.36; Washington, $2,659,531.60; Alabama, $1,000; Arkansas, $456.38; California, $632,240.89; Colorado, $40,257.88; Illinois, $1,296,718.94; Connecticut, $60,371.29; Delaware, $33,370.95; Florida, $252.73; Georgia, $2,008.02; Idaho, $3,289.45; and Indiana, $1,861.63.

Another argument made against reclamation projects is that agricultural products raised on reclaimed land enter into competition with surpluses from the Middle West. This is absolutely untrue, unsupported, and unjustified by the hearings before the subcommittee. The Haw-Schmitt committee made this observation with reference to agricultural products on reclamation projects:

> Of the staples affected by curtailment on quota assignments the amounts produced on the reclamation projects are insufficient even for local supply, with the exception of cotton and sugar. Moreover (and this is probably true even of sugar and cotton), the increase in consumptive demand in the West directly chargeable to reclamation development is more than enough to absorb their production.

I also desire to quote from Mr. Page's testimony before the House Committee on Appropriations:

> They also found that the total crop value on reclamation projects was made up largely of those items which are now being imported. Many irrigated areas do not supply sufficient agricultural products to support their own communities. For example, dairy and poultry products, and pork and pork products are now being shipped from States in the Mississippi Valley by trainloads to Los Angeles and other Pacific coast cities; yet all the Federal reclamation projects lie between the source and the destination of these shipments.

It happens that in the present legislation that you are considering my district has no projects at all, and I think that a greater length of the Colorado River runs through my district than probably any other district in these Western States.

Now, we are up against this proposition on the Colorado River, and I hope that this House will take this view of it:

Since the construction of Boulder Dam we have equated the flow of the Colorado River so that now it is possible for people to appropriate that water in Mexico; and, as I am informed, there are millions of dollars of American capital ready to appropriate all available waters of the Colorado River in the country of Mexico.

Now, I think that this House, and also the Senate, should bear this in mind: That once this great natural resource of the United States is appropriated in Mexico it forever precludes its appropriation in the United States; and I think that at this time, rather than take the view that these projects along the Colorado River are not worthy of consideration, it is the duty of this Congress, in order to protect that great natural resource, to have every survey necessary made to determine every feasible project on that river, so that that great natural resource will be conserved for the people of the United States, where the water originates, rather than let it flow into Mexico where, if once appropriated, it is lost to this country forever. I hope that the House will bear that in mind.

Under the doctrine of appropriation, once that water is appropriated in Mexico, regardless of agreements or anything else, we cannot get it back, and we are forever bound to let it flow down there.

Here is one other observation that we might make: After spending the vast amount of money which has been spent on Boulder Dam, then, in order to protect the very life of that project, projects above it, on the Colorado River, should be determined and worked out for the protection of that great national asset. I believe that this House, regardless of where the Members come from, should look at reclamation from the national aspect; and bear this in mind at all times—that in the very States where these reclamation projects are anywhere from 90 percent in the State of Nevada down to 40 percent of the land in other States is owned by the Federal Government; not by the people of those States but by the Federal Government; and every dollar that goes into reclamation ultimately returns to the people of the United States. So this cannot possibly be construed as a "pork barrel" proposition. The very break-down on Boulder Dam shows a very wide distribution of every dollar that is spent for reclamation.

I do not know whether the facts I have brought out mean anything to the Members of the House or not, but I do know that when a committee is appointed to make a survey of the very question involved in the bill under discussion today, and that committee reports back to the House, certainly what they say should mean more than general statements coming from the opposition to reclamation. [Applause.]

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 5 minutes to the gentleman from Colorado [Mr. CUMMINGS].

Mr. CUMMINGS. Mr. Speaker, I do not know from which side I should have asked my time. I asked it, however, from those in favor of irrigation.

Mr. Speaker, I come from the West and own irrigated land, and I think I know what it means. I want to tell you Members who are alarmed over the increase in crops that might come from additional reclaimed land that the total of the crops grown on irrigated land is less than 1 percent. I think I am at liberty to talk on either side of this question for the reason that the chairman of the subcommittee was so kind as to move to strike out the irrigation project in which I was most interested, the Grand Lake project. This project proposes to bring water from the western slope to the eastern slope in a country occupied at the present time by more than 600,000 people. It is a supplemental supply to 800,000 acres of irrigated land on which we produced last year during the sugar season over 80 cars of sugar per day. We fed last year more than 1,000,000 lambs. Ninety percent of all the lambs that are winter-fed in the

United States are fed on alfalfa that is grown on irrigated land. May I be permitted to say, Mr. Speaker, that every irrigation project should be considered by itself and decided on its own merits. If you were to ask me if all the irrigation projects provided for in these amendments should be voted for by this House, I would say "no", because there are bad projects there that would cost this Government $1,000,000,000 and which could not be paid for within a period of 50 or 60 years.

Mr. CULKIN. Mr. Speaker, will the gentleman yield?

Mr. CUMMINGS. I have too little time to yield.

Mr. CULKIN. Will the gentleman indicate——

Mr. CUMMINGS. I will not indicate anything. On the other hand, there are good projects and they should be provided for. My present idea of irrigation and reclamation is to furnish a supplemental supply of water for projects already completed and to complete the real projects that have been started. But we should not go into these matters merely upon the theory that a billion dollars does not mean anything.

Some people make the statement that the projects will never be paid off. I would not go as far as to say they may never be paid off, but I will state that they will not be paid off in 40 or 50 years' time. In the case of some of these projects, where it is a supplemental matter, such as the one I am interested in, the money will be paid, because there are 800,000 acres of irrigated land there now. There are over 600,000 people living there. There are 12 sugar factories located in there and another factory being erected for processing sirup and sugar. That project is just as good as a Government bond. But, as I said a moment ago, if I had to place my stamp of approval on the entire bill and come before the Members of the House and say that all of these projects were good, I would have to say "no", even if mine went with the rest of them.

The chairman of the subcommittee very kindly sought to cut out my project at Grand Lake, which is one of the best of the whole bunch. Mr. Page, who is now head of the Irrigation and Reclamation Bureau, stated it was one of the best irrigation sections in the United States. Anyone who knows anything about irrigated land knows this is true. Of course, I could tell why it was cut out and could give you a lot of the inside story, but it is rather poor policy to wash your dirty linen in public.

Mr. Speaker, I call attention to a few things with reference to the cost of these projects and return of the money. Any good irrigation project, if it is worthy of the support of the Government, in 10 or 12 years will return money in the way of income taxes. I venture to say that the income payments from my district, the Grand Lake district, would more than pay the interest, and I would venture the further statement that the increased products will more than pay the interest. If you have ground that will probably produce 10 tons of beets to the acre under normal conditions, if you will allow extra water the production will run up to 15 tons to the acre.

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 5 minutes to the gentleman from Kansas [Mr. CARLSON].

Mr. CARLSON. Mr. Speaker, as I enter into a discussion of the reclamation projects listed in this conference report, I want to state that I am not personally opposed to all reclamation work. I feel this work has an important place in the development of our country, but on the other hand I feel that with one department of our Government making every effort possible to take land out of production or shift a large portion of our producing acreage to legumes and grasses that we are now facing the anomalous situation of spending Government funds to take lands out of production on the one hand, and on the other we are appropriating and authorizing the expenditure of hundreds of millions of dollars to bring arid lands into production.

In checking this conference report it is not my intention to go into every individual project, but I note this report appropriates and authorizes for such projects as the Gila Valley in Arizona, which has a potential acreage increase of 700,000 acres, the Central Valley Authority in California with 780,000 acres listed, although potentially it is reported to have a possibility of 1,000,000 acres. The Grand Coulee project in the State of Washington has a potential possibility of 1,200,000 acres. There are many further authorizations in this report. We who are representing agricultural States realize how hard it is to reduce the producing acreage in this country to the needs of domestic consumption and the average annual export market. In 1934 through the Agricultural Adjustment Administration program we were able to take out of production or shift the production on 35,000,000 acres of our productive farm lands. For this the farmers of this country received $594,000,000 in rental and benefit payments. In 1935 we took 30,336,838 acres out of production, for which the farmers were paid $579,257,003.97.

During this session of Congress we have passed additional legislation to assist the farmers in adjusting their crop acreage to the domestic requirements, plus whatever exportable market we might be able to secure. For this we have voted an appropriation of $400,000,000. I merely mention this because I want to call the attention of the House to the utter impossibility of spending large sums of money to assist agriculture in adjusting its farm problem, and call to your attention the inconsistency of today authorizing the expenditure of hundreds of millions of dollars for reclamation work. Statements will no doubt be made that our Government is purchasing submarginal lands and taking them out of production, and therefore we will soon need this additional acreage.

Yesterday I contacted the Resettlement Administration in regard to land purchases and find that up to April 30, 1936, the total acreage purchased is 1,419,569 acres at a cost of $6,641,848. The total remaining acreage to be purchased under this present program is 8,305,171 acres, involving an expenditure of $34,500,542. The Resettlement Administration has also purchased under their resettlement program for rehabilitation 5,386 acres at a cost of $390,796. Further plans contemplate the purchase of 767,725 acres, involving a total cost of $26,674,485. The Biological Survey received $12,000,000 from the emergency drought and relief fund to purchase two and a half million acres of submarginal lands of which 1,010,000 acres have been purchased.

Secretary Wallace, in his report issued March 1935, states that his analysis of the agricultural situation indicates that if the acreage needed to supply domestic requirements and exports of agriculture products is not materially increased in the years just ahead, it cannot be expected to exceed 340,000,000 to 350,000,000 average acres of harvested cropland. That is, 30,000,000 to 40,000,000 acres will be required for exports, 285,000,000 to 290,000,000 acres for domestic consumption, and 20,000,000 to 25,000,000 acres for the production of nonfood products.

The actual acreage of cropland harvested averaged 360,000,000 to 365,000,000 acres for the period 1928–32. As a result, this country is faced with an excess acreage equivalent to 10,000,000 to 25,000,000 harvested acres of cropland, at average yields, provided the land is left idle. A shift of 20,000,000 to 40,000,000 acres would be required if intensive crops were replaced by hay and pasture and no land left idle. If the adjustment is affected by retiring submarginal cropland, an acreage equally as large or larger would be required.

Everyone familiar with the farm problem realizes that if we are to have a prosperous agriculture we must maintain our farm producing area at a size that will meet the supply and demands of our markets.

Dr. Alonzo E. Taylor, director of the Food Research Institute of Stanford University stated at the recent annual Dearborn conference on agriculture, industry, and science that in his opinion we must permanently abandon 1,000,000 American farms embracing 250,000,000 acres as a means of putting agriculture on a paying basis. He stated that the basic need after nearly two decades of futile political treatment of farm reliefs is to reduce the present 1,055,000,000 acres

now in farms to the 800,000,000 acres needed for future production and spread the total income of farmers among 2,000,000 fewer farm people. For the past 3 years the agricultural-adjustment program and the severe droughts have materially assisted in securing increased prices for agricultural products, but with returning normal conditions agriculture again faces a serious situation.

It is interesting to note that the wholesale commodity price index compiled by the National Fertilizer Association as of May 16, 1936, shows that the price index dropped to the lowest point since the first week of last year, and makes the further comment that the sharp decline in the index in the latest week was due to lower prices for farm products and foods, as the index representing the prices of all commodities other than these two groups remained unchanged. They state that since the first week of the year the all-commodity index has registered a 4.3-percent decline and the farm-products index has fallen off 9.6 percent. They further state that the third consecutive sharp weekly recession in the farm-products price index reflected lower quotations for most grains and livestock and that the only farm products showing any advance during this period were cotton, rye, and live poultry.

In view of these statements, it seems to me that Congress should hesitate to vote large sums of money for reclamation purposes until we have at least established a coordinated land-use policy. It seems to me it is ridiculous to have one branch of our Government appropriating hundreds of millions of dollars to assist the farmer in reducing his acreage, and, on the other hand, appropriate and authorize the expenditure of hundreds of millions of dollars to bring land into production.

Mr. WHITE. Will the gentleman yield?

Mr. CARLSON. I yield to the gentleman from Idaho.

Mr. WHITE. Does the gentleman approve the plan of Dr. Taylor, as mentioned in the article he just quoted from?

Mr. CARLSON. I approve the plan of purchasing submarginal land and getting our agricultural lands down to where they will take care of domestic production, and then export whatever surplus we have.

Mr. WHITE. Does the gentleman approve of the abandonment of good farms, as advocated by Dr. Taylor?

Mr. CARLSON. No.

Mr. WHITE. What are we going to do with the unemployed in this country, which now number some 12,000,000? Does not the gentleman think they have to be shifted back to where they can make a living?

Mr. CARLSON. I shall have to refuse to yield further, but I will say that we will never take care of the unemployment problem and the agricultural problem of this country by bringing into production large tracts of arid land, when we now have surplus land and are trying to get it out of production.

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 5 minutes to the gentleman from California [Mr. STUBBS].

Mr. STUBBS. Mr. Speaker, all California has its eyes on the House of Representatives today. We are considering the usual annual appropriation bill for the Department of the Interior, which this year includes an appropriation for a general reclamation program of the entire West, and among the items for which we seek funds is the great central valley project of California. I say that all California has its eyes on the House of Representatives today because the entire State's population recognizes that California's future rests with the fate of this appropriation item. Two great inland areas, the San Joaquin and Sacramento Valleys, as big in size as Italy, and from which the metropolitan areas of San Francisco and Los Angeles draw the food supplies necessary to feed their millions of inhabitants, will progress or retrogress with the success or the failure of the appropriation which we seek.

Facts and figures, particularly when they deal with an engineering project, are dull to those who are not directly affected, and I do not intend to discuss them at any great length today, because they are available almost everywhere in Washington. Several Federal agencies have studied this project thoroughly and every one of them has placed its stamp of approval on the project. It remains only for us, the Congress, to concur in their fact finding.

For those of you who have never had the supreme pleasure of visiting or residing in California, let me report that it is a veritable Garden of Eden, one of the finest agricultural areas of the entire world—this, in particular, applies to the Sacramento and the San Joaquin Valleys.

Constant irrigation, over a period of years, has depleted the water supply in the lower San Joaquin Valley, and one of the project's objectives is to move water from the upper part of the Sacramento Valley down into the San Joaquin Valley, a distance of about 500 miles—from New York, say, on the Atlantic coast, down through New Jersey and Maryland, past the District of Columbia, through Virginia and deep into North Carolina. An ambitious plan, I agree, but feasible, according to reputable engineering talent which has studied the project. The project also is designed to correct flood-control problems of the Sacramento Valley, the saline problem of the agricultural lands of the San Francisco delta area, it will improve navigation far up the Sacramento River and provide cheap electrical energy for a metropolitan area which soon will require far more "juice" than private plants can now supply.

There is no opposition, apparently, to the plan of repulsing the sea water which annually encroaches upon the delta area and destroys thousands of acres of specialty crops. There appears to be no opposition to the plan of developing navigation on the Sacramento River. Everyone agrees that the control of flood waters on the Sacramento River is a worthy movement.

The opposition to the production of cheap electrical power comes from a source so common to all of us that it is needless for me to elucidate. Needless to state, cheap power is as important to irrigation areas and metropolitan districts as any factor. In addition, however, this program does not contemplate the destruction of private electrical production plants now in existence. The power which will be produced from this project will simply supplement that which already is being produced. The new power would not be available for almost 5 years and by that time we will have real need of it.

Opposition to the plan of irrigating our arid agricultural lands of the San Joaquin Valley seems to lie in the belief that we intend to place thousands of additional acres in production. Such is not true. We simply are striving to preserve the productive territory which we have been irrigating for many years. We do not plan to place a single additional acre under cultivation unless the national need justifies it.

Our crops are specialty crops, largely, and do not compete with those of the North, South, or East.

This project contemplates the construction of a series of dams, reservoirs, power plants, canals, pumping stations, transmission lines, and a vast and intricate irrigation system. Its cost, $170,000,000, is very liberally estimated, and I am advised by the best of the engineering profession that it will not cost a nickel more. But regardless of its cost we are only seeking $16,000,000 this year, and we have the best security in the world to offer as surety.

As evidence of the fact that the cost of the project is not prohibitive, and is justified, let me advise you that we produce in 1 year out there—in the San Joaquin and Sacramento Valleys—agricultural crops with an aggregate value far in excess of the $170,000,000 which the entire project would cost. Surely it is worth the price of 1 year's production to save two of the greatest and finest agricultural areas of the entire world.

The fate of 20 great countries are directly at stake and the expansion of the San Francisco and Los Angeles metropolitan areas are indirectly affected.

There are more than 1,000,000 people, 300,000 of whom are farm folks, residing in the affected area. The land area in the two valleys constitute 28.3 percent of the State's entire land area. The balance of the land in the State is largely mountainous and the two valleys are the principal agricultural districts.

Unless we can assure ourselves sufficient irrigation water in the future our lands will meet the fate met by those in the dust bowl of the West. Our topsoil today is being plucked from the ground by constant winds and being deposited on the sides of mountains where it is of no value to agriculture.

We need the project. The Nation needs it. The administration has approved it. It is sound from an engineering, legal, financial, and social viewpoint. It would provide work for several thousand skilled workers of the East, who would be placed at work producing the material need for the construction program. It would save great agricultural and industrial areas from economic oblivion. All of the major and minor problems associated with a project of this magnitude have been solved during the 30 years it has been under consideration. This project may be new to you but it is not to those of us from California, for the State has spent more than a million dollars on preliminary surveys and it is estimated that Federal agencies have spent about $5,000,000 more.

My primary interest, naturally, lies with the Central Valley project, but I would be short-sighted, indeed, if I spoke only of it, when I firmly believe in the necessity for an all-embracing and comprehensive reclamation program for the entire West, such as the one contemplated by the Senate amendments to this departmental appropriation. My remarks on the central valley project are, to a large degree, applicable to the general reclamation program under discussion here today.

I agree with the opponents of the program that reclamation and rehabilitation are costly. Everything worth while is costly. I care not, however, what the cost may be, reclamation and rehabilitation of our western agricultural lands is worth the money—particularly when that money will be repaid. The argument of the opposition that this money will not be repaid is based upon a fallacy. It will be repaid. Reclamation has always paid its way. It will pay even bigger dividends in the future. The Federal Government is the nominal guardian of every acre of land in the country, and it is our duty, as the legislators of the Nation, to protect our agricultural areas, no matter whether they are located near or far from our own particular bailiwick.

Reclamation is a policy which visions the needs of tomorrow. Our present economic plight can be laid directly at the door of our failure to look ahead, and if we do not possess a long-range view on reclamation the entire West is doomed to become an arid waste. Gentlemen who would like to see everything west of the Mississippi become known as the great American desert will be working nicely toward their objective if they vote to reject this reclamation program.

If we retard reclamation, we retard the normal expansion of our agricultural industry of the West. The products raised in California, for instance, are not in direct competition with those of northern, southern, and eastern agricultural areas. Our products are specialty crops in general and supplement those of other sectors of the country. Why should there be objection on the part of my colleagues if we continue to grow oranges, lemons, peaches, almonds, grapes, and a hundred and one other agricultural products which help make the West a vast granary for specialty agricultural products? These products add materially to our national wealth. They not only mean more to the housewife of the East, who is anxious to make her meals tastier by employing them, but they mean buying power for the millions who reside in the West, who constitute a great purchasing population for the manufacturers of refrigerators, automobiles, furniture, steel, farm implements, and a thousand and one articles which are manufactured in the East and sold in the West.

Reclamation is a long-time investment program. Those of us in the West, who have watched the advancement of reclamation from its very infancy, are in a position to know of what we speak, and I am confident that anyone who will study the subject will agree with me that reclamation is one of the best forms of security possible to obtain.

If we were asking for an outright grant, or a sum of money beyond the realm of possibility, or if we were not in a position to offer you security for the money which we seek, I would understand the opposition to this program. Why anyone should associate himself with a political movement designed to destroy a program of this nature is beyond my ken, and either denotes a thorough lack of knowledge of the subject or a complete disregard for the welfare of the Nation, which should automatically bar him from participation in this discussion and balloting.

I ask those of you who are not residents of the West to view this reclamation program in a broad-minded manner, and I request your forbearance in solving our problems. We of the West have worked shoulder to shoulder with those of you from the North, the South, and the East in solving the tornado, drought, and flood problems which have afflicted you, and now we bespeak your cooperation in this, our hour of need. [Applause.]

Mr. SCRUGHAM. Mr. Speaker, I yield 10 minutes to the gentleman from New York [Mr. CULKIN].

Mr. CULKIN. Mr. Speaker, may I at the outset commend, with all the vigor I possess, the extremely patriotic and national stand of the distinguished chairman of the Appropriations Committee, the gentleman from Texas [Mr. BUCHANAN]?

Today, the Budget of the United States is unbalanced in the sum of $6,000,000,000. Today, the United States is headed directly for inflation. Today, the United States is headed directly for economic destruction. Its recovery must depend, if we read history aright, upon the balancing of the Budget.

Here we find a singularly contradictory proposition, a proposition which brings this Congress into national disrepute and, to my judgment, threatens its very existence. Under these circumstances, when we are passing through a depression, when we have 12,000,000 unemployed to feed, the Senate of the United States sees fit to tie onto this piece of legislation appropriations which will ultimately amount to $1,500,000,000.

Why, may I ask, has the foresight and the patriotism that characterizes the gentleman from Texas [Mr. BUCHANAN], the chairman of the Appropriations Committee, disappeared from the Senate? Are they thinking of their elections? Are they living only in an atmosphere of locality? They have lost the national outlook, an outlook upon which must depend the existence of this Congress and the staying of the growth of fascism which will soon engulf America if the House and Senate continue to demonstrate their impotence.

These items that have been put in this bill by the other body come definitely within the category of "pork". They are nothing short of "pork." The A. A. A. was spending $1,500,000,000 to retire 35,000,000 acres of land from production, while this mad disbursement goes on to bring more land into production. Then we pass the Soil Erosion Act, and under that act 25,000,000 acres are to be retired from production so that agriculture may obtain parity prices. We will expend $400,000,000 a year to do that. Then in the same breath—and there is nothing like it, nothing more contradictory in the history of civilization or in the history of parliamentary government—while we are retiring 5,000,000 acres from production, the Senate of the United States, aided and abetted by the call of locality in this House, asks that this House vote to disburse, ultimately, $1,500,000,000 for the purpose of bringing 4,000,000 more acres of land into production. I could discuss this matter at length. There are many phases of it. One of the gentlemen here a moment ago referred to the Haws-Smitt report. Haws is a railroad economist, and the railroads bring these people

into these hopeless reclamation propositions and then take them out again, if they have enough left to pay their fare. Mr. Smitt is the editor in chief of the Engineering Age, I think it is called. This magazine carried an article, or a series of articles, in which Mr. Smitt condemned every single project mentioned here. Some of the other projects mentioned here were then unborn.

Mr. Speaker, agriculture, through the medium of the Grange and the Farm Bureau Federation, has served notice upon this House and upon this Nation that this business of giving the farmers added competition must cease. Agriculture is tired of that ancient and hoary and bearded fiction which says that irrigation simply increases crop production 1 percent. This absurd fiction has been blasted repeatedly, and, Mr. Speaker, I shall ask permission to extend in my remarks tables which show an increase in agricultural production in different fields due to irrigation running from 3 percent in cereals, which include wheat, up to 30 percent.

Mr. COLDEN. Mr. Speaker, will the gentleman yield for a question?

Mr. CULKIN. For a brief question.

Mr. COLDEN. Is the gentleman from New York repudiating the reclamation and irrigation policy of President Hoover, Secretary Ray Lyman Wilbur, United States Senator Hiram Johnson, and our former colleague, Mr. Phil Swing, as well as other eminent Republicans?

Mr. CULKIN. I will say to the gentleman that his question is more or less adroit and I would expect that type of question from the able gentleman from California. I may say to him that his question does not bear upon this proposition at all. In none of those administrations, I may say, Mr. Speaker, were such gigantic propositions involved. I call them empire-building propositions, in the background of which is an intent, if you please, to transfer our population out to these new lands when they become irrigated. Not long since I had a gentleman from Wyoming in my office and he was arguing with me about that absurd fiasco, Casper-Alcova, that has been condemned by nearly every agency of the Government, and he said to me, "What the hell do you care, CULKIN? We are not going to take any farmers from your State into Wyoming. We are just going to take them from Iowa, Kansas, and Nebraska, and what do you care about that?" This is the proposition in a nutshell. Some portions of the West, which, by the way, are now receiving 98 percent of their relief out of the Federal Treasury, are in an empire-building spirit when they seek these vast and absurd appropriations which I say threaten not only the existence of popular government but threaten more particularly the continued existence of this House. [Applause.]

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 5 minutes to the gentleman from Idaho [Mr. WHITE].

Mr. WHITE. Mr. Speaker and gentlemen of the House, this is not the first time that progress and development in this country has been opposed on this floor. I am reminded of a great speech made here by that eminent and distinguished gentleman, Proctor Knott, when it was proposed to build a railroad into Duluth. I wish I had memorized that great epic.

I wonder what would have happened if my friend from New York [Mr. CULKIN] had been on the floor at that time and such advice as he is giving us had been followed? Where would that great country of Minnesota be today? Where would the markets be for products of his State if we had never developed that country?

I remember when I was a boy I got hold of my grandmother's old geography and it showed the country west of the Mississippi River at the great American desert into which the adventurous people of that day went to settle and build great communities and develop irrigation and show the people how to put water on the land to raise crops.

I have heard the gentleman from New York oppose irrigation projects which water the land and utilize the power that now goes to waste in the West. It is now proposed as a policy to utilize that power.

I would like to ask the gentleman from Iowa where he expects to market his crops of corn, pork, and lard? Where would his markets have been if we had not developed this great country in the West?

The appropriation we are considering is to carry on the great plan of development that was started by the party of the gentleman from New York. He would stop further development and progress and leave the country in the condition it is now. I am wondering what he would do with the 12,000,000 now unemployed when we propose to give them means of relief by creating irrigated farms where they can settle, build homes, and become self-supporting.

Mr. THURSTON. Let me say to the gentleman that we would take care of our own products. If we can get rid of the reciprocal agreement with Cuba, we can raise all the sugar we need. We can raise all the beet sugar that now comes from foreign countries.

Mr. WHITE. This country falls far short of producing the sugar we consume now.

If industry cannot provide the means for caring for those out of employment, a way must be found to put surplus population on the land where they can become self-supporting.

Is it the contention of the gentleman that we must arrest development at this time and that we have no more interest in the building of communities and the settlement of the country and provide places where people can become self-supporting and take a living from the ground just as our forefathers have done?

Mr. THURSTON. Whenever we have sufficient population to absorb some of these projects, then the proposals of the gentleman might be sound.

Mr. WHITE. The gentleman speaks about sufficient population. What are we going to do with the 12,000,000 excess population we have today, for whom we have to appropriate billions to take care of?

Mr. THURSTON. I reiterate that we should protect the American market for the American producer. [Applause.]

Mr. WHITE. That is a controversial question and enters the realm of politics.

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I ask unanimous consent that all Members who speak on this conference report today may have permission to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Nevada?

There was no objection.

Mr. SCRUGHAM. Mr. Speaker, I yield 4 minutes to the gentleman from Wyoming [Mr. GREEVER].

Mr. GREEVER. Mr. Speaker, in the short time that has been allotted to me I do not propose to speak a great deal about any specific projects except those in my district, and also to say something about the general program of reclamation.

At the outset I want to say that the gentleman from New York [Mr. CULKIN], who just spoke, and who has spoken for a long time against the reclamation program, spoke about some man from Wyoming who wanted some of the people from his State to come to our State. I want to say that I am not trying to get any of his people away from him, nor am I trying to get any from Idaho. The gentleman, of course, was talking about somebody else.

The appropriation bill for the Interior Department, as amended by the Senate, contains items aggregating approximately $58,000,000 for reclamation throughout the Western States. The distinguished gentleman from Colorado, chairman of the subcommittee, has pointed out with remarkable clarity and conciseness the general benefits to be obtained from this program, and I do not wish to deal generally with the benefits of reclamation, for they have been gone into very carefully here and have been discussed thoroughly and are well known, but I should like to discuss a few things with

reference to the projects which appear in this bill and more especially those within my own State.

In the first place, I want to reiterate what has been so ably pointed out with reference to the fact that money expended for reclamation projects is repayable to the United States. I further wish to point out the fact that until the advent of the Public Works Administration, reclamation had not cost the Government of the United States one cent.

A total of approximately $210,000,000 has been paid into the reclamation fund to date from the sale of public lands, timber, and oil royalties in the Western States. Of this amount, $43,000,000, or more than one-fifth, has been contributed from the sale of lands and from oil royalties within the State of Wyoming.

The great Casper-Alcova project which is under discussion here is located within Natrona County, Wyo.; and while I do not have the exact figures before me as to the total amount contributed from lands in Natrona County, yet I think it is safe to say that considerably more than one-half of the $43,000,000 has come from oil royalties within that county. During the past several years, due to oil development in that community, a city of approximately 25,000 people has grown up in Casper. It is one of the finest communities in the West and possesses a citizenship of which any State might well be proud. Due to the fact that there has been very little oil development in the past few years, this community has met financial reverses, with the result that a great number of highly skilled workmen formerly employed in the oil fields and in industries appurtenant to the oil fields have been thrown out of work. Natrona County is entitled to this project. You are giving her nothing for which she has not paid in full.

The wise founders of the reclamation policy were western men, who proceeded upon the theory that funds derived from the depletion of one natural resource in the great West, from whence has come billions of dollars of the Nation's wealth in lumber, oil, livestock, gold, silver, and other minerals; and they believed it was only fair and a sound economic policy that when one or more natural resources were being depleted that it was only fair that a portion of the money derived from the sale of these resources be placed into funds which would replace in some small degree that which had been taken away by replacing with that money another natural resource. This is the theory upon which reclamation is predicated. It is the theory under which it has been carried out, and it is the theory upon which laws were passed placing 52½ percent of the oil royalties which were received by the United States Government from public lands to the credit of the reclamation fund for development of arid lands.

So I say to you that when you are appropriating moneys for this well-balanced policy of reclamation, you are not giving money away but, on the contrary, you are merely lending money which will be repaid fully to the United States by those who are engaged in agricultural pursuits in the West.

The Casper-Alcova project will cost approximately $19,000,000, of which the water users will repay $80 per acre and the balance will be used for the construction of power plants and dams for such power. Much of this electrical energy will be used in the development of resources in which the surrounding country abounds. The Reclamation Service has made a survey of the power needs which can be served from the Seminoe Dam, which is a part of the Casper-Alcova project, and it is found there will be a demand for this power within the next 10 years which will take up the entire capacity of the power plant and which will amply repay the cost of the dam and power plant. A detailed study of the sale of the power from the plant was made by H. F. McPhail, engineer of the Bureau of Reclamation, dated September 21, 1933, wherein it was stated that the cost of the power system, including the Seminoe power plant, transmission lines, and substations, would be repaid with 4-percent interest, similar to the Boulder Canyon project set-up.

Casper is the center of a very large cattle and sheep industry, and thousands upon thousands of cattle and sheep are raised in the territory adjacent to Casper. The chief difficulty with the raising of livestock in this country has been a lack of forage crops and the lack of lands available for the raising of such crops, with the result that it has been necessary to ship out in the fall of the year large numbers of cattle and sheep because of the lack of feeding facilities. This has resulted very often in an upset in the livestock market and has resulted in a lack of stabilization because of inability to ship the cattle and sheep to the market as the market demanded them. The crops which will be raised upon this project will consist largely of forage crops and will be used as an adjunct to the livestock industry. They will not create a surplus in any crop whatsoever where agricultural surpluses have existed in the past. In addition, the city of Casper affords a large market for dairy and other domestic products which up to the present time has not been fully developed, due to lack of proper irrigated lands in the vicinity.

In Western States, as in Eastern States, the question of rural resettlement has become acute. There are great numbers of good farmers who have become discouraged through drought and through the ownership of submarginal lands who are not able to produce a proper living upon so-called dry lands. A goodly number of these people have already moved to irrigation projects and have availed themselves of the opportunity to develop lands which will not only produce a good living but which will repay their cost to the United States Government. It is a significant fact that in the last 4 or 5 years, immediately upon the building of laterals which will carry the water to newly irrigated lands, these lands have been applied for and have been taken up by people under the provisions of the Reclamation Act as soon as they were available, and there is no question but what the same thing will happen upon every foot of the land proposed to be irrigated under the terms of this bill.

The Hart Mountain project, for which an appropriation of $1,000,000 is provided in this bill, is a part of the Shoshone project and was authorized in 1909. Work has already started upon the project and is proceeding satisfactorily. It has provided work for a great number of people. The storage capacity was completed in 1910 and is available. The moneys being appropriated for the Hart Mountain project are being used for the purpose of constructing canals, ditches, and laterals. I personally know of many first-class farmers who are anxious to secure lands under this project. This will result in a most constructive and economic solution of the very bad plight in which some of these farmers now find themselves, due to drought, ownership of submarginal lands, and so forth.

There is included in this bill also $900,000 appropriation for the Riverton project, which is to be used for the construction of what is known as the Bull Lake Reservoir, to provide an additional water supply to the lands under that project. This project has been settled as fast as new units become available, and it is remarkable the progress in building that has taken place upon this project within the last few years.

Whenever a reclamation project is opened it immediately begins to create new wealth. I made an investigation just recently to determine the shipments of goods from the manufacting regions into one of our projects at Powell, Wyo.; and in spite of the fact that most of the shipping into that territory is done by truck from Billings, Mont., and Denver, Colo., I observe that this town had received 27 carloads of automobiles and trucks from Michigan and Wisconsin, 4 carloads of corn from Nebraska, 11 carloads of machinery from the East, 82 carloads of gasoline, 5 carloads of phosphates, 25 carloads of coal, 38 carloads of lumber, 3 carloads of salt, 8 carloads of cement, and 73 carloads of miscellaneous shipments, making a total of 276 carloads. I assume that only one-third of the goods shipped into that community are shipped by rail. I would assume that two-thirds are shipped by truck from Billings, Mont., and Denver,

Colo., which, if true, would make the total shipments in the neighborhood of 800 carloads, which, at the rate of $2,000 per car, would amount to more than one and one-half millions of dollars, all of which is paid for out of newly created wealth. In addition to this, this community has a most favorable reputation for the payment of its taxes and other obligations. There have been created hundreds of fine farm homes, with good schools, churches, and other community activities. This is typical of the entire reclamation area throughout the West. Farmers have settled upon these projects from every State in the Union, and most of them have been successful. I should be very much interested in knowing the exact figures, were such available, as to the amount of newly created wealth by reason of the policy of reclamation, but I should imagine that, in terms of produce and transportation, it has amounted to a good many billions of dollars and, in addition, has resulted in a constructive resettlement program.

To properly cover all of the phases which should be covered in any talk concerning the reclamation program would require much more time than we have available here today, but I want to impress upon the Members of the House these very important facts:

First. That the reclamation program has been entirely carried out, up to within recent times, without the loan of 1 cent from the Federal Government.

Second. That of all moneys becoming due from reclamation projects, more than 98½ percent have been repaid.

Third. That the moneys used for the construction of reclamation projects, up until the Public Works Administration, were all from the sale of lands and from oil royalties.

Fourth. That the crops raised are noncompetitive in character and are used very largely as an adjunct to other agricultural activities.

Fifth. That the communities and settlers upon reclamation projects have provided a vast market for the farm machinery, parts of farm machinery, automobiles and trucks, steel, lumber, coal, furniture, radios, hardware, electrical appliances, and every conceivable kind of goods manufactured within the boundaries of the United States.

Sixth. The reclamation program has provided a comprehensive and well-balanced program of rural resettlement.

I trust that the conference report, with the amendment, will be agreed to. [Applause.]

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 4 minutes to the gentleman from Washington [Mr. KNUTE HILL].

Mr. KNUTE HILL. Mr. Speaker, a long time ago Horace Greeley said, "Go west, young man; go west." But the last great frontier for homesteading has gone forever. There are only three ways in which we can build for homes now. That is by irrigation as we do in the West and in the South, by drainage as they do in the South, and by soil conservation. We are building for homes in the West. We are building for the future. We are going to take care of the millions of the Middle West and the East, as much as you dislike to let them go, who in time will have to look for homes.

You speak of the fact that we are taking land out of cultivation. Yes, we are, but what is it? It is marginal land and submarginal land, and we are planning to invite these people out to the great Northwest, where they can find homes in districts where they can make a fine living on land that is irrigated.

This policy was started years ago. It was opposed then as it is opposed now.

I have here some extracts from such men as General Goethals, Mr. Hoover, Mr. Work, ex-Secretary of the Interior, and Mr. Wilbur, also ex-Secretary of the Interior. I ask unanimous consent, Mr. Speaker, that these may be incorporated in my remarks, to show how those men stood on this question of western irrigation and to prove that this is not a partisan question. The present administration is promoting policies of preceding administrations.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The matter referred to is as follows:

WHAT PROMINENT ENGINEERS, ECONOMISTS, AND STATESMEN HAVE SAID ABOUT THE COLUMBIA BASIN PROJECT

"It (the Big Bend or Columbia Basin project) is believed to be feasible. The Columbia River on the north and west and the Snake River on the south flow through deep and rocky gorges too low to be feasible for irrigation purposes except by pumping." (Report of U. S. Bureau of Reclamation in 1903.)

"The soils of the (Columbia Basin) area are especially high in the mineral elements to which fertility is often ascribed. The area possesses one of the best agricultural climates on the continent." (Reports, U. S. Department of Agriculture, 1911 and 1923.)

"It is feasible from an engineering standpoint to build a dam here (at Grand Coulee) even 350 feet high above low-water level and to pump water 300 feet in height into the Grand Coulee for the rehabilitation of the drought-stricken Columbia Basin farm lands. The power developed would be a great asset in making the project feasible. This project merits the fullest investigation, and certainly core drilling should be done to determine the depth to bedrock." (Statement of A. P. Davis, Director, U. S. Bureau of Reclamation, made at Grand Coulee dam site in 1920.)

"The Columbia Basin project possesses the following favorable features: An abundance of water, no adverse engineering difficulties, a splendid climate, and long growing season, and easily irrigated land, much of which has been tilled. The productivity of this land has been amply proven by results obtained from irrigation on small tracts within the area." (Report of State Columbia Basin Survey Commission in 1920.)

"The Columbia Basin project is as much a national one as were the Panama Canal and the Alaskan Railways and will, if completed, add much more to the national wealth than either of the others mentioned. In our judgment the project is feasible, not alone from the standpoint of construction but from that of economics as well." (Report of Maj. Gen. George W. Goethals, builder of the Panama Canal, made in 1922.)

"The Columbia Basin project should be considered as one of the great future assets of the State and Nation." (Report of Special Columbia Basin Commission, U. S. Bureau of Reclamation, in 1925.)

"Just as sure as time passes the Columbia Basin project will be built. The Columbia Basin project is a natural asset of national appeal. It is an inland empire of land, water, potential power, and sunshine in the Northwest awaiting development." (Statement of Dr. Hubert Work, Secretary of the Interior, after inspecting the project in July 1925.)

"The initiation and construction of the Columbia Basin irrigation project is inevitable. It should be undertaken at the earliest possible date. I have familiarized myself with the engineering problems involved, and the time to begin this great undertaking is now." (Statement of Herbert Hoover, Secretary of Commerce, when he visited the project in August 1926.)

"Much of even this expenditure would be directly recovered from the land and from the leases of byproduct power. At this moment we could not make economic use of the whole of this power or of all of this land or all these inland waterways, but we will need the whole of it within half a generation. And at this moment we have an urgent need for beginning certain major projects which will in themselves require years for completion." (From address by Secretary Hoover in Seattle on Aug. 21, 1926.)

"I am decidedly in favor of the Columbia Basin project. It is not only important to the food supply of the Nation in the early future but it is timely to meet the existing economic situation." (Statement by Secretary Hoover in Washington, D. C., on Mar. 30, 1927.)

"Reclamation of arid lands is not a local question but a national one. Yesterday I stood on a mountain and I could see a sea of arid land that would be fertile if it had water on it. I saw, too, laid off like squares on a checkerboard, areas that had been abandoned by the men farming them. It seems to me that Congress can well afford credit that would enable that land to be flooded with water." (Statement by Nicholas Longworth, former Speaker of the House of Representatives, upon his inspection of the Columbia Basin project in 1927.)

"The Columbia Basin project is not far distant." (Statement by President Calvin Coolidge before the Union League Club of Philadelphia on Nov. 17, 1927.)

"The (Columbia Basin) project fits ideally into President Hoover's plan. What a pity it could not have been ready the first of this year to give work to some 50,000 people. When it is started in a big way and the necessary financing is arranged, there will be a tremendous employment of labor. The Columbia Basin project will pay large and increasing dividends." (Statement by B. C. Forbes, publisher of Forbes Magazine, when he personally inspected the Columbia Basin project on July 19, 1930.)

"As we are spending hundreds of millions to deal with the Mississippi and its branches, so we celebrate here this new control of the Colorado. In turn will come our other river systems, particularly the Columbia. For industry, agriculture, trade, and commerce, our river systems must be mastered for the future safety of our increasing population." (Ray Lyman Wilbur, Secretary of Interior, at Boulder Dam celebration in 1930.)

"Examination of the reports of the Bureau of Reclamation and of the Chief of Engineers of the War Department leads without difficulty to the conclusion not only that the construction of the Columbia Basin project is highly desirable but it is both physically and financially feasible under the plan contemplated by the proposed legislation for the development of power and for the utilization of power profits—after repaying the cost of power development—in amortizing, together with water users' repayments, the cost of the irrigation developments in such units and at such times as economic conditions may justify." (Statement of Ray Lyman Wilbur, Secretary of Interior, in a letter to Robert S. Hall, chairman, Committee on Irrigation and Reclamation, House of Representatives, on May 20, 1932.)

"Proper development of the Columbia River would doubtless create a great asset for that section of the Nation where it is located and, of course, in so doing, it would be a national asset as well as a local asset." (Statement by Patrick J. Hurley, Secretary of War in 1932.)

"Whereas the present plans of the Coulee Dam are for a low dam only and the cost of changing to a high dam later will be $30,000,000 more than if the high dam were built now; and

"Whereas we believe that building the low dam will make it very difficult if not impossible to build the high dam; and

"Whereas we believe the full resources of the Columbia River should be utilized and not be throttled by building a dam that will be inadequate later: Therefore, be it

"*Resolved*, That the Washington State Grange is on record as being in favor of building the high dam now rather than attempting to raise a low dam later." (Resolution passed by the Washington State Grange at its annual convention at Everett, Wash., in June 1935.)

Mr. KNUTE HILL. Mr. Speaker, there have been mistakes made by the Federal Government in this development, but we are doing all we can to take out marginal lands in the West as well as in the Middle West. That is being corrected. Certainly there was speculation. There were all kinds of promotion schemes. The Federal Government is doing away with that. For example, in the Kittitas proposition at Ellensburg they are taking out speculation. They arranged it so that land could be sold only at a certain reasonable price. There is also the matter of water waste that has been going on for years, and that is being taken care of. They are using their water to better advantage. They learn by experience.

May I call attention, especially the attention of the chairman of the Committee on Appropriations, to the fact that the President's Budget provided for these projects named in amendment no. 53. The President is for this. Why? Only for one reason, because he has been out there and has seen with his own eyes what can be done with water. I wish some of these friends of ours who are opposing us today would come out and breathe our exhilarating air, would fish in our sparkling streams, would look at our majestic mountains; but, above all, if they would come there and see the desert sagebrush land, 1 year after it has water on it, blossom like the rose and be changed into beautiful and comfortable homes.

Although this Senate amendment deals with many western projects I desire to speak on the particular project known as the Roza unit of the Yakima project. This is the last unit of a quarter of a century program. The other units have been completed, more than 90 percent of the funds have been repaid to the Federal Government, and these lands have yielded products worth hundreds of thousands of dollars. What was once a barren waste is now a fruitful valley, the home of an intelligent, prosperous, industrious people. Of course we have suffered from the depression. But, may I ask, what section of our country has not suffered. However, the chambers of commerce representing our cities, the granges and farm bureaus representing our farmers, and labor organizations representing our laborers have all wholeheartedly endorsed the High Coulee Dam and the Roza. And why should they not? They are residents of the Yakima Valley and have seen its population increase from 13,462 in 1900 to 77,402 in 1930; its tax valuation increase from $25,004,000 in 1900 to $233,041,000 in 1930; and the value of its products during this period approximate a half a billion dollars on a loan from the Government of about $33,000,000, most of which has been repaid.

The Federal Government finished the Cle Elum Reservoir at a cost of $2,813,000 to impound waters for the Roza. Last year the sum of $4,000,000 was allocated to construct tunnels, and dam work has begun and contracts have been let for this purpose; however, only up to the amount of $2,500,000. For this reason the President in March withdrew $1,500,000 of the original sum to take care of flooded districts of the East and other imminent necessities. Now we are simply requesting that a $2,500,000 allocation be made so we can proceed with the completion of this unit as a component part of the Yakima project. It will furnish labor for the present unemployed, it will provide homes to the thousands of seasonal workers who are needed in the fields and packing houses of the dozen cities of the prosperous irrigated sections adjoining the Roza unit on the south.

It has been stated here that we have an overproduction. Is there too much food with millions of people in want of the bare necessities? Is there too much cotton and wool with other millions without the necessary clothing for comfort and decency? Let us resolutely set our faces toward the dawn of a new day when the problem of just distribution shall be solved, providing labor and homes for all. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from Washington [Mr. KNUTE HILL] has expired.

Mr. SCRUGHAM. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota [Mr. ANDRESEN].

Mr. ANDRESEN. Mr. Speaker, I rise in opposition to the conference report. If I did not do so, I would not be true to myself or to the splendid and intelligent constituency which I have the honor of representing in this Congress. This report seeks to authorize seven gigantic irrigation projects in seven different States with an ultimate cost to the taxpayers of this country of approximately $1,500,000,000. If the appropriation sought here is approved and the projects completed, the New Deal will have added around 5,000,000 acres of new irrigated land, in the arid States of the West, to the already overabundant supply of tillable farm lands now available for productive cultivation.

I do not blame the gentlemen from the seven Western States for sponsoring this appropriation; but when I realize that the 5,000,000 acres of irrigated land which they seek to create will produce the equivalent in farm products of 15,000,000 acres of good nonirrigated land, I must insist that the appropriation be defeated so as not to further dislocate existing agriculture, and for the general welfare of the entire country.

These irrigation projects have not been authorized by Congress. The sponsors of the appropriation state that the President has spent large sums out of relief funds on all of these projects and that he has given his approval and now asks Congress to provide these large appropriations so that the work may be completed and the new land opened to cultivation. It should not be done. I am opposed to any irrigation and reclamation work at this time. The people I represent are opposed to it. When the population of the country has increased to such an extent that it becomes necessary to have more farm lands in order to take care of our needs, then Congress can consider the problem in a regular and orderly manner and make necessary authorizations and appropriations.

Why in the name of common sense does the President and his Democratic leaders put their stamp of approval on the creation of millions of acres of new irrigated land in this country? The President and his advisers—Secretary of Agriculture Henry Wallace, Dr. Rexford Tugwell, and Mordecai Ezekiel—have claimed for the last 3 years that our farmers are producing too much in the agricultural field and that because of large surpluses of farm products the farmers of the United States were induced by them to take 40,000,000 acres of good tillable land out of usual production in order to produce less. Under the same theory of surpluses, our farmers were also induced to prematurely dispose of 6,410,866 pigs and hogs, of which number 5,105,067 were converted into grease and fertilizer. They still claim that we produce surpluses; but now they come and ask Congress to

vote appropriations of more than $1,000,000,000 so as to create millions of acres of highly productive land, I suppose, to produce more surpluses. It just does not make sense to me.

DISLOCATION OF AGRICULTURE

Agriculture is a delicate machine. It is easily dislocated or thrown out of balance. Over long periods of time agricultural diversity in specialized crops became an established fact in this country. Ten States in the South specialized in the production of cotton and tobacco. The people in these sections purchased their dairy, pork, meat, and grain supplies from the farmers in the upper Mississippi Valley; and our people in the North, not being able to raise cotton or tobacco, bought their supplies of these commodities from the farmers of the South. It was a fair exchange, and both groups benefited by it.

The farmers of Minnesota, Wisconsin, and Iowa, and other States became specialists in the dairy, corn, hog, cattle, and poultry branches of agriculture. The efficiency in the production of these products became so great that the farmers in these diversified areas could without difficulty supply the needs of the entire country. Often surpluses of dairy products would appear to glut the market. While the dairy production would many times appear to approach the surplus line, I do not believe that we have ever had a real overproduction. Rather, the surpluses of butter and other dairy products were caused by the use of substitutes which were manufactured from imported vegetable oils and fats into oleomargarine and cooking compounds. During the last 3 years, and particularly in 1935, the domestic dairy structure has been further jeopardized by the enormous imports of butter and other dairy products.

Now let us see what is taking place under the new program. For 50 years or more the Middle West has supplied the South with the diversified products of the North. Owing to climatic conditions our section cannot raise the products of the South, but the farmers of the South can easily grow the farm products of the Middle West. Twenty millions of acres of cotton and tobacco land have been taken out of cultivation in the cotton and tobacco States. The administration did not want this land to remain idle, so the leaders in the Federal Government encouraged and helped finance, out of public funds, the growing of corn, alfalfa, clover, and other feeds for hogs, dairy cattle, and livestock on the land that had heretofore been used in the production of cotton and tobacco. And what are the results? During the last 3 years dairying, livestock, and hog production in the South has increased by leaps and bounds. Creameries have been and are being built in all sections, and it will not be long before dairy production will be on a large commercial scale in direct competition with the old-established dairy sections of the Middle West. Packing plants are also being constructed in the strategic points of the South to handle commercially the increasing supply of cattle and hogs for slaughter.

We could not object if this change in production came about in a normal and gradual manner; but when the Federal Government steps in and with the taxpayers' money finances a large group of farmers to go into direct competition with farmers in other sections, we surely have a right to protest and make every possible attempt to prevent complete dislocation of American agriculture.

It is not my purpose to criticize the policies and expenditures for agriculture during a time of emergency. The A. A. A. no doubt served a useful purpose. Objections were raised against centralized control and regimentation. I know that the millions of checks sent to the farmers helped increase the income of those who received them. In my opinion, the farmers of the country must have their income and purchasing power restored before we can have complete recovery for all branches of our complicated economic structure.

Let me return to the subject under discussion in the House. I have just stated that agriculture in this country is being dislocated. A little thought on the subject will convince anyone of that fact and that something must be constructively done before the whole country gets out of kilter.

IMPORTS OF FARM PRODUCTS

Another reason why I am opposed to the President's irrigation and reclamation demands is the uncontroverted fact that during the last 3 years, when the majority of our farmers were trying to comply with the New Deal philosophy of scarcity by taking nearly 40,000,000 acres of productive farm land out of usual cultivation, the present administration permitted to be imported into this country an excessive quantity of cheaply produced foreign farm products of the same kind as our own farmers took out of cultivation. In other words, when our farmers produced less cattle, corn, hogs, wheat, rye, barley, butter, and other farm crops in order to cut down the surplus, the administration literally invited foreign farmers to increase their cheap foreign production of the same products and to ship them to the United States and sell them in the American market in direct competition with domestic production.

The effect of the policy of giving our American market to foreign farmers is threefold. First: The domestic market is being flooded with cheaply produced foreign farm commodities which have taken a part of the home market from our own farmers. However, the greatest damage done to the American farmer is the effect that these large imports have had upon depressing and reducing the home-market price level on domestically produced farm commodities.

The tables of imports, which I will insert in the RECORD, show that the competitive farm imports for 1935 exceeded a declared foreign value of more than $750,000,000. All of these farm imports were or could have been produced in this country by American farmers and laborers in sufficient quantity to more than take care of domestic requirements. This huge sum was a direct loss to agriculture in the United States. The next loss was the price-depressing factor of such a large quantity of imports. Reliable authorities estimate that because of the large competitive imports for 1935, the farmers in this country were compelled to take more than $2,000,000,000 less by way of lower prices for their products sold in our own home market.

Second. The President and his advisers, who are now advocating increases in agricultural and manufactured imports into this country, state with great acclaim that the quantity of imports is only a fractional part of our domestic production, and that no damage is being done. Well, let us examine the record. Remember that our farmers took about 40,000,000 acres of good farm land out of cultivation so as to produce less. Then look at the farm imports for 1935, and you will find that the consumers in the United States provided a market for foreign farm products cheaply raised on from 25,000,000 to 30,000,000 acres of foreign farm land. This production belonged to our American farms, and any other theory spells for destruction of the entire country.

If our farmers are to cut their acreage and production because they are producing too much, then it must be elementary and sound reasoning that they should be entitled to the home market without foreign competition for that which they raise for sale at home. I favor the expansion of our foreign trade, but I do not believe in the idea advocated by the new dealers that it should all be done at the expense of our American farmers.

Third. At the beginning of 1936, the American Federation of Labor estimated that there were more than 12,500,000 unemployed in this country. This is the largest number of unemployed we have had in the United States. With the Federal spending of more than $24,000,000,000 during the last 3 years, it would appear that by now there should have been a material decrease in the number of unemployed. But this is not the case.

One of the main reasons for the increase in the unemployment and relief rolls is the fact that jobs and work, which rightfully belong to American labor, were given to the cheap labor of other countries. A break-down of agricultural imports for 1935 into persons employed will disclose that from 2,500,000 to 3,000,000 persons could have been employed in the United States in the production and processing of the imported commodities if the same had been produced here. Because of these imports the jobs to produce them, including pay checks, went to foreign labor

instead of our own citizens, and the consumers in this country paid the bill. About 50 percent of these unemployed live in the cotton States. The balance are scattered throughout the country in grain, corn, hog, and dairy sections. These unemployed farm hands were driven to join the relief rolls, which now have a grand total of more than 20,000,000 persons, with no end in sight.

Prominent labor leaders have stated that if it were not for the imports of cheaply produced competitive manufactured products now coming into this country, there could be gainfully employed in private industry nearly 3,000,000 persons who are now out of work and on relief. This makes a total of nearly 6,000,000 Americans who would have work if the New Deal would save the home market for American farmers and laboring men.

RECIPROCAL-TRADE AGREEMENTS

We have all heard a great deal about the trade agreements which have been negotiated by the President and his Secretary of State with foreign countries and particularly with Canada. The tariff duties in these agreements were lowered up to 50 percent of existing rates, and a large percentage of the reductions were made effective on competitive agricultural commodities despite President Roosevelt's promises at Baltimore on October 26, 1932, when he said:

I know of no excessive high duty on farm products. I do not intend that such duties shall be lowered. To do so would be inconsistent with my entire program.

The President did not keep his sacred pledge to the farmers. On January 1 of this year he put into effect the crowning achievement of his administration in the form of a trade agreement with Canada. Dairy, livestock, and poultry farmers were required to bear the major sacrifices of this trade. Protests were lodged by farm organizations and farm leaders against any reduction of agricultural duties, but these were brushed aside in the merry scramble to give away the domestic market to foreign farmers. We love our Canadian neighbors and wish them well, but we believe that in a time of emergency it is the duty of the President of the United States to first take care of his own citizens, according to promises, before showing preference to people of other countries.

It has been impossible to secure figures on farm imports from Canada since the treaty went into effect from any United States department, but in order to show the increased trend of agricultural commodities from that country, I quote from a recent news dispatch from Ottawa, Canada, wherein W. D. Euler, Canadian Minister of Trade and Commerce, said:

Pronounced gains in exports to the United States of leading commodities affected by the Canadian trade agreement were recorded during the first 4 months of 1936. Agricultural products and lumber were the heaviest gainers. The export value of swine increased from $3,000 to $390,000, while the number of cattle increased from 39,000 to 75,000 and the value from $2,262,000 to $3,605,000. Cheese exports increased from $21,000 to $407,000.

There you have the story, and the same thing is taking place with every other country in the world, for the cut in duties to one country is equally available to all other countries, except Germany. These agreements should be canceled.

What will the future bring? The present program is filled with confusion and contradiction. It can be summed up in a line or two. Surpluses; destruction; cut production; change production; irrigation; reclamation; importation; reciprocal-trade agreements; more importation; dislocation of existing agriculture; no permanent program. What is it, and where do we go from here?

A PERMANENT AGRICULTURAL PROGRAM

Emergency measures were, no doubt, necessary during the crisis, but now the time has come to formulate and make effective a sound and permanent program in order to avert another emergency. The adoption of such a permanent program is not a political or partisan matter. It should have the attention of the best minds of the country. Personally, I feel that the problem can be solved by holding fast to American ideals and doing the job in the American way.

I would first protect the home market for agriculture and labor. Second, I would cancel the reciprocal-trade agreements and then build up our foreign trade by the establishment of a two-price system so that our farmers could enjoy a higher domestic price for virtually 90 percent of their production which is sold in the home market, and sell the surpluses in the foreign market at a competitive world price. This suggestion is nothing new, as it was originally proposed in the McNary-Haugen farm bill, and generally understood and favored by the farmers of the country. The losses incurred on the sale of the surpluses could well be borne by an equalization fee generally collected or an export bounty paid out of the Treasury. If we are to continue a program of curtailed production, then it should be fundamental that the home market must be protected for home production. Third, the adoption of soil-conservation and soil-erosion programs of equal benefit to all branches of agriculture will be for the general welfare of the entire country. Fourth, irrigation and reclamation projects should be discontinued. Fifth, the lowest possible rate of interest should be available to farmers and home owners. Sixth, reduce Government costs so as to lower tax burden.

I would begin with the above suggestions as a part of a sound and permanent program for American agriculture. Possibly the simplicity of these suggestions make them appear difficult, but my own conviction is that if we can put them into effect we will be on the way to a real recovery for agriculture as well as prosperity for the entire country.

TABLE 1.—*Imports from foreign countries of farm products and merchandise for consumption in the United States for 1932, 1933, 1934, 1935, and first 3 months of 1936*

[Import figures from U. S. Department of Commerce]

Groups of imports	1932	1933	1934	1935	January, February, March 1936
Total value of imports	$1,322,774,000	$1,433,013,000	$1,636,003,000	$2,038,637,930	$570,264,451
Group 00. Animals and animal products, edible [1]	45,028,000	43,889,000	48,965,000	74,708,519	20,833,327
Group 0. Animals and animal products, inedible [2]	80,112,000	118,427,000	109,610,000	151,127,431	48,497,116
Group 1. Vegetable food products and beverages [3]	361,863,000	392,797,000	468,897,000	566,440,855	168,793,041
Group 2. Vegetable products, inedible, except fibers and wood [4]	125,542,000	162,763,000	222,058,000	282,121,473	77,940,752
Group 3. Textile fibers and manufactures [5]	244,038,000	264,155,000	240,224,000	306,701,119	97,341,692
Group 4. Wood and paper [6]	168,115,000	170,016,000	181,454,000	208,343,001	50,305,679
Group 5. Nonmetallic minerals [7]	90,138,000	65,643,000	86,519,000	103,824,869	25,064,978
Group 6. Metals and manufactures, except machinery and vehicles [8]	74,156,000	116,608,000	129,859,000	177,052,196	48,844,858
Group 7. Machinery and vehicles [9]	8,493,000	8,551,000	11,799,000	14,524,008	4,140,984
Group 8. Chemicals and related products [10]	47,852,000	59,287,000	65,117,000	68,715,572	21,350,046
Group 9. Miscellaneous [11]	71,435,000	60,878,000	71,500,000	85,068,887	17,751,978

[1] Group 00 consists mainly of cattle, meat, hogs, pork, animal oils and fats, dairy products, poultry, eggs, and fish.
[2] Group 0 consists of hides, leather, footwear, furs, animal oils, and greases, and horses, mules, and other animals.
[3] Group 1 consists of all grains, feeds, vegetables, fruits, nuts, coffee, tea, spices, sugar, and beverages.
[4] Group 2 consists of rubber, gums, drugs, oilseeds, coconut oil, seeds, tobacco, nursery stock, and miscellaneous vegetable products.
[5] Group 3 consists of cotton goods, jute, manufactured cotton and linen goods, wool, carpets, silk, and other manufactured merchandise.
[6] Group 4 consists of logs, lumber, manufactured millwork, paper, newsprint, and cork.
[7] Group 5 consists of coal, petroleum, cement, glass, pottery, asbestos, and precious stones.
[8] Group 6 consists of iron ore, steel, other metals, manufactured and crude cutlery, nickel, precious metals and tin.
[9] Group 7 consists of electrical and industrial machinery and apparatus, farm machinery, and other manufactured articles.
[10] Group 8 consists of coal tar, medicinal preparations, industrial chemicals, soap, cosmetics, fertilizers and paints.
[11] Group 9 consists of photographic goods, musical instruments, toys, sporting goods, firearms, books, clocks, artwear, matches, tooth brushes, pencils, pipes, combs, buttons, and beads—all manufactured products.

TABLE 2.—*American farm market given to foreign farmers and laborers—Imports from foreign countries of specific farm products for consumption in the United States for 1932, 1933, 1934, 1935, and first 3 months of 1936*

[Import figures from U. S. Department of Commerce reports]

Imports of specific farm commodities	Quantity			1935			January, February, March 1936
	1932	1933	1934	Quantity	Value	See notes below	Quantity
Cattle.....head	98,000	65,000	59,000	364,623	$8,497,117	[1]	100,419
Beef, fresh and canned.....pounds	24,558,000	42,475,000	47,968,000	86,882,032	6,425,903	[2]	24,492,593
Hogs: Pork, ham, bacon, shoulders.....do	5,802,000	2,923,000	1,654,000	13,908,176	2,473,140	[3]	10,219,389
Butter.....do	1,014,000	899,000	1,253,000	22,674,642	3,576,942	[4]	3,627,855
Corn.....bushels	344,000	160,000	2,959,000	43,242,291	20,291,889	[5]	3,637,682
Barley.....do		23,657	6,580,000	4,839,678	3,747,509	[6]	116,443
Barley malt.....pounds		109,183,000	193,728,000	320,622,537	9,043,234	[6]	48,896,900
Oats.....bushels	59,000	132,000	5,580,000	10,106,903	2,939,349	[7]	10,705
Wheat.....bushels	10,026,000	10,317,619	18,543,000	38,870,398	30,400,000	[8]	10,270,878
Rye.....do		8,006,000	7,622,000	9,642,523	4,755,012	[9]	19,567
Fodder and feed.....value	$2,270,000	$4,192,000	$7,593,000		12,923,153	[10]	$1,477,715
Tallow.....pounds	502,000	239,000	42,813,000	245,850,922	13,104,280	[11]	24,029,895
Cottonseed oil.....do			9,157,000	166,687,367	8,880,256	[12]	43,830,299
Flaxseed.....bushels	5,154,000	13,578,000	15,028,000	17,559,000	15,623,121	[13]	3,795,794
Eggs.....value	$813,000	$590,000	$443,000		1,679,093	[14]	$433,854
Molasses.....gallons	186,781,000	169,936,000	220,461,000	247,805,335	12,456,809	[15]	28,424,718

[1] If the 364,623 head of imported cattle from Canada and Mexico had been raised in this country, they would have consumed feed from approximately 729,246 acres of corn hay, and pasture land; 14,584,920 bushels of corn, 364,623 tons of hay and other feeds. Loss to American farmer and laborer $8,497,177.

[2] The imports of 86,882,032 pounds of fresh and canned beef from Argentina, Canada, Brazil, New Zealand, and Australia represent 217,211 head of cattle weighing 800 pounds each. If this beef had been produced by American farmers it would have taken 434,442 acres of good farm land to provide the necessary pasture and feed, to wit: 8,688,440 bushels of corn and 217,211 tons of hay. Loss to American farmer and laborer $6,425,000.

[3] The imports of 13,908,000 pounds of pork from Czechoslovakia, France, Germany, Italy, Poland, Japan, Canada, and other countries represents 104,521 hogs weighing 200 pounds each. If raised and fed in this country they would have consumed 2,508,504 bushels of corn grown on 62,712 acres of idle corn land and furnished employment to hundreds of idle persons. Loss to American agriculture more than $2,500,000. The imports of pork, bacon, ham, and shoulders for the first 3 months of 1936 is not far from the total imports for the entire year of 1935.

[4] The total imports of all dairy products, including cheese, butter, milk, at foreign value amounted to $15,000,570. An additional $2,500,000 can be added for freight, duties, and other charges. These imports for 1935 came from Bulgaria, Russia, Greece, Italy, Latvia, Poland, Argentina, Japan, Syria, New Zealand, and other countries. Reduced to terms of milk, these imports amounted to 1,118,000,000 pounds. At 4,000 pounds per year for the average milk cow the American farmer lost the production from 279,000 head of milk cows. It would have taken approximately 837,000 acres of corn, hay, and pasture land to produce the necessary feed. In addition to pasture, the cows would have consumed 11,160,000 bushels of corn, 419,000 tons of hay, and other feeds. Dairy farmers in this country lost around $20,000,000 on these imports and thousands of farm hands were thrown out of work as a result of this unwise policy.

[5] 1,000,000 acres of good American corn land could have been used to produce the 43,242,291 bushels of imported corn in 1935 thereby providing work for thousands of unemployed and more than $20,000,000 in additional returns to the corn farmers in this country.

[6] Barley and barley-malt imports equivalent to more than 14,000,000 bushels of barley coming from Austria, Belgium, Czechoslovakia, France, Germany, Poland, and Canada, cost American barley farmers and maltsters more than $12,500,000 and the use of 700,000 acres of good domestic farm land.

[7] Oats imports of 10,106,903 bushels prevented the American farmers from using 200,000 acres of domestic land and a loss of $3,000,000.

[8] Wheat imports of more than 38,870,000 bushels (bond wheat included) cost American farmers and laborers more than $30,000,000 and the use of 3,000,000 acres of wheat land.

[9] Rye imports of 9,642,000 bushels from Poland and other countries cost the American farmers around $5,000,000 and the use of 640,000 acres of domestic farm land.

[10] Imports of fodder and feeds cost the farmers of this country $12,900,000 and the use of 1,000,000 acres of farm land.

[11] Tallow imports which should have been supplied from domestic livestock cost American farmers and laborers $13,000,000.

[12] Cottonseed-oil imports for 1935 amount to 14 percent of our domestic production. 1,000,000 persons in the South were thrown out of employment as a result of these imports. The cotton farmers in this country would have used 3,400,000 acres of idle cotton land to produce 1,100,000 bales of cotton so as to secure 532,000 tons of cottonseed for crushing into 166,687,367 pounds of cottonseed oil. Loss to cotton growers and workers from $50,000,000 to $100,000,000.

[13] Flax farmers of the Northwest and California lost more than $15,000,000 and the use of 1,750,000 acres of domestic land because of flaxseed importations during 1935.

[14] Farm wives and poultry raisers lost more than $1,600,000 on account of importations of eggs from Japan, China, and Hong Kong.

[15] Molasses importations represent a loss to American corn farmers of more than $12,000,000 and the use of 1,000,000 acres of corn land to produce the necessary 41,000,000 bushels of corn required in the manufacture of 247,000,000 gallons of molasses.

NOTE.—The above farm imports are but a small fraction of agricultural products imported into this country. The table is given to illustrate one reason for depressed domestic prices on farm products, and that the American market is being given to foreign farmers. These importations can be curtailed or stopped by the President, as he now has the authority to increase all duties 50 percent above the present rates in order to save the market in this country for the American farmer and laborer, but instead of doing so, he and his Secretary of State are negotiating trade agreements with all foreign countries and reducing duties upon competitive agricultural and manufactured products up to 50 percent of present rates, thereby causing our home market to be flooded with cheaply produced foreign products.

One of the most striking illustrations of the effect of imports upon our domestic price level is found in the trade agreement with Canada. This agreement became operative on January 1, 1936, and the reductions in duties granted by the administration to Canada also granted the same reductions to all other countries in the world except Germany. During the first 4 months of the present year 178,752 head of cattle were imported into this country under a 50-percent cut in duty, as compared with 144,000 head for the same period in 1935, and 59,000 head for the entire year of 1934. About 50 percent of these cattle were shipped in from Canada, and the balance from Mexico and other countries. This flood of imported cattle caused a glut on the livestock markets at South St. Paul and Buffalo, as well as other border markets, and forced the domestic price down from $3 to $5 per hundred pounds. Market figures will show that during the last 4 months any livestock farmer in Minnesota has taken a loss of from $50 to $65 on a good to choice steer weighing around 1,300 pounds. Increase of imports is one of the main reasons for lower prices to farmers on livestock at a time when prices should either be advancing or holding their own. While it is difficult to estimate the losses on the price of cattle, expert accountants have calculated that for the year 1936 the American livestock farmers will lose from $50,000,000 to $100,000,000 on the livestock because of imports and lower prices.

LABOR RECOGNIZES IMPORTANCE OF PROTECTING HOME MARKET

Laborers and farmers will be interested in observing the position taken by all labor organizations in this country with reference to the protection of the home market for labor and agriculture. These organizations formed the America's Wage Earners' Protective Conference, with Mr. Matthew Woll as their president. I will quote from a letter recently received from Mr. Woll and from the table of comparative costs of a few imports prepared by this organization.

Mr. Woll said:

America's workers cannot secure employment, let alone secure higher wages, when products comparable to what they produce, produced in foreign countries, are delivered into American markets at delivered prices which are less than American costs of production of comparable goods.

America's farmers cannot secure higher prices for their products when products of foreign nations are delivered into American markets at prices which are less than our costs of production, which prices of foreign products govern the prices our American farmers must accept for their products.

Quoting further from Mr. Woll's letter:

Recently the United States Tariff Commission, after 2 years' study, issued their findings pertaining to the pottery industry, and the effect imports of Japanese pottery products have on the employment opportunities and wages of American pottery workers.

The Tariff Commission found that some 30 percent of all pottery and chinaware yearly purchased in the United States is produced in Japan, where the workers receive less than $4 per week for 60 hours of labor; that, in the production of pottery, at least 50 percent

of the wholesale selling price represents what is paid to the workers; that American workers receive an average of $18.50 per week of 40 hours, and such wages left an average of less than 7 percent for the owners of the industry over a period of the 5 years studied; that American workers, more than 90 percent organized in the National Brotherhood of Operative Potters, affiliated with the American Federation of Labor, can hardly hope to secure either increased wages or shorter hours as long as the products of Japanese workers control and govern the American market; that while the Japanese manufacturers increased the list price of their products some 50 percent in 1 year, yet they landed their products in the American markets at just below American costs of production of similar goods.

The plight of the American farmers is well typified by the effect which imports of butter far-away New Zealand have in American markets. January 1935, 92-score butter at Chicago was 34.17 cents per pound. Danish butter, in London, the same month was 20.26 cents per pound. New Zealand butter, in London, the same month was 17.77 cents per pound. These quotations, with slight variations, are indicative of the butter situation throughout the entire year of 1935. In New York City 92-score butter, December 1935, was 34 cents per pound. The declared invoice value of foreign butters, the same month, was 18.07 cents per pound. When considering these quotations it must not be forgotten that freight rates from western Europe, New Zealand, or Japan to the New York consuming area, are from one-fifth to one-half the costs of transporting comparable American goods by American railroads to these same coastal cities. The result is that thousands of American railroad workers suffer loss of employment, American industrial workers and American farmers surrender, at least in part, our consuming markets to the more advantageously situated and lower-wage-paying foreign producers.

A study of comparative costs for 1935 of imported foreign products and merchandise with duty and freight paid, as compared with domestic costs of the same articles laid down in the principal consuming markets in this country, from the table prepared by the America's Wage Earners' Protective Conference, discloses the following advantages which have been given by the New Deal to foreign farmers and laborers on the sale of their products in the American market: An advantage of $26 to the Argentine producer on every 100 bushels of imported corn; an advantage of $8.30 to Polish producers on every 100 bushels of imported rye; an advantage of $42.80 to Argentina on every 100 bushels of imported flax, as well as $3.64 on every 100 pounds of imported tallow; an advantage to Czechoslovakia of $148.10 on every 100 pairs of imported women's shoes; an advantage to Japan of $2.03 on every gross of imported pottery and earthenware; and an advantage to Uruguay in 1933 of $1.89 on every 100 pounds of canned meat (figures on meat not available for 1935).

While I have given only a few imports, the disadvantages against American farmers and laborers are found in equal degree as to all imports. Continuation of these conditions eliminates possible employment opportunities for American industrial workers and prevents American farmers from securing fair prices for the products of American farms. These disadvantages can be corrected by increasing duties. The President now has the power to increase or lower duties 50 percent of existing rates. Thus far he has elected to lower duties in the reciprocal-trade agreements to the detriment of farmers and laborers in this country.

EXPORTS OF AGRICULTURAL SURPLUSES

Chester C. Davis, Agricultural Adjustment Administrator, after an extended tour of Europe to find an outlet for American farm products, has just announced:

It is evident we can't hope to dispose of our farm surpluses abroad. The nations I visited are greatly interested in reciprocal-trade agreements. They would like to establish a freer basis of trade, a greater liberalization with this and other countries in the exchange of commodities. Unless farmers unite in this country to solve their common problems through control of production, agriculture will do another tail spin.

If it is true, as Mr. Davis has stated, that we have lost our export market for farm products, then it is more evident than ever before, that the administration should stop the importation of competitive farm products and only permit the entry of those commodities which cannot be produced in this country. Again I state that I am not opposed to the proper kind of control in production; but if we are to have it, then the farmers of America should enjoy the full benefit of the domestic market without foreign interference. It is not strange that foreigners want freer trade. Why? Because the American market is the best market in the world for agricultural and manufactured products, and nothing would please our foreign friends more than to take this market away from the American people. Control or no control of production, we will do a tail spin unless the new dealers change their policy so as to give adequate protection to the citizens of the United States.

INCREASING NATIONAL DEBT, EXPENDITURES, AND UNEMPLOYMENT

It is high time for the American people to take inventory of assets and liabilities. Who will pay $34,000,000,000 national debt which is estimated will be on our hands by the end of the year? Why, the taxpayers, of course; and the taxpayers are not one class of the people. They are all of the people—rich and poor alike. More than 60 percent of the taxes will be in the form of indirect taxes, which are concealed and paid by all consumers in increased costs of goods and merchandise purchased. It is estimated that the average American family pays an annual indirect tax of $300. This tax will increase so long as the administration continues to spend $2 for every dollar of income.

I sincerely believe that public expenditures should be made to take care of those in need and distress during a great national emergency, but I cannot concur in many of the wasteful and political policies practiced by the administration in the present crisis.

With 20,000,000 on relief and more than 12,000,000 unemployed, we have a right to question the administration's relief and work policies. Billions are being spent in thousands of work projects in all parts of the country. In accordance with Presidential order, these projects only provide work for people on the relief rolls. Millions of our citizens who have used up their savings and have lost their homes are being forced to go on relief, believing that they would secure work on some public project, only to find a Presidential order which prohibits their employment unless on relief prior to November 1 of last year.

Is such a policy fair to these unfortunate people? I have repeatedly requested the President and Mr. Hopkins to change this order so that worthy men and women may secure work when work is available. Thus far these officials have refused to recognize the appeal. Instead they have brusquely crushed the hopes of millions who are anxious to get work so as to provide for themselves and their families.

If the Federal Government is to continue the relief program, then wasteful practices and political pressure should be eliminated. The top-heavy and expensive political organization now used in the name of relief, but largely to build up a Nation-wide political machine, should be cast into discard.

The evils of the present Federal relief system could largely be eliminated by having Congress distribute Federal relief funds on a per-capita basis to county and city authorities. Up to 3 years ago these authorities had charge of local relief. They are familiar with local conditions; and if such funds would be turned over to them, they would employ twice as many worthy individuals on necessary local projects as are now employed under the present political system.

THE COST OF THE NEW DEAL

In its first 3 years of office the Roosevelt administration has spent more than the first 23 Presidents of the United States in 122 years of office. The comparison is astonishing. The figures are of such size as to be almost beyond ordinary grasp. On March 16, 1936, the total was $21,252,000,000. The indicated total to June 30, 1937, is $31,413,000,000; and the taxpayers will be called upon to pay the bill. Yes; it is high time for the American people to take inventory, drastically cut costs of Government, and then chart a course along American lines for the return of equal opportunity and prosperity to all of our citizens.

Table of comparative costs—Advantages foreign products have in American markets

[Prepared by America's Wage Earners' Protective Conference from Government reports]

Product	Year	Average wholesale selling value	Volume of imports	Principal country of origin	Foreign invoice value	Duty paid	Ocean freight	Domestic freight	Landed cost at New York	Advantage foreign producer over domestic	Advantage domestic producer over foreign
(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)	(12)
Corn	1933		160,288 bushels; $76,609.	Argentina	$41 per 100 bushels	$25 per 100 bushels.					
	1935	Chicago, No. 3, Whites, $84.50 per 100 bushels; Kansas City, No. 3, Yellows, $83.50 per 100 bushels.	43,237,010 bushels; $20,288,097.	do	$44 per 100 bushels.	do	Argentina to New York, $7.50 per 100 bushels.	Chicago to New York, $18.20 per 100 bushels.	From Argentina, $76.50 per 100 bushels; Chicago, $102.50 per 100 bushels.	Argentina $26 per 100 bushels.	
Rye	1933		8,005,796 bushels; $3,874,062.								
	1935	No. 2 at Chicago, $57.70 per 100 bushels.	9,642,523 bushels; $4,755,012.	Poland	$45.10 per 100 bushels.	$15 per 100 bushels.	Poland to New York, $7.50 per 100 bushels.	Chicago to New York, $18.20 per 100 bushels.	From Poland, $67.60 per 100 bushels; Chicago, $75.90 per 100 bushels.	Poland, $8.30 per 100 bushels.	
Linseed or flaxseed	1933		13,825,163 bushels; $13,486,586.	Argentina	$95.50 per 100 bushels.						
	1935	At Minneapolis, $175.30 per 100 bushels.	17,559,662 bushels; $15,623,121.	do	$87 per 100 bushels.	$65 per 100 bushels.	Argentina to New York, $12.50 per 100 bushels.	Chicago to New York, $32 per 100 bushels.	From Argentina, $164.50 per 100 bushels; Chicago, $207.30 per 100 bushels.	Argentina, $42.80 per 100 bushels.	
Cottonseed oil (refined)	1933	At New York, Summer Yellow Prime, $4.50 per 100 pounds.	Nil								
	1935	At New York, Summer Yellow Prime, $10.40 per 100 pounds.	166,000,000 pounds; $8,800,000.	United Kingdom.	$5.79 per 100 pounds.	$3 per 100 pounds.	United Kingdom to New York $0.27 per 100 pounds.	Galveston to New York, $0.30 per 100 pounds.	From United Kingdom, $9.06 per 100 pounds; Galveston, $10.40 per 100 pounds	United Kingdom, $1.34 per 100 pounds.	
Beef tallow	1933		233,391 pounds; $7,294.	Canada							
	1935	At Chicago, $8.60 per 100 pounds.	240,725,454 pounds; $12,871,109.	Argentina	$5.60 per 100 pounds.	$0.50 per 100 pounds.	Argentina to New York, $0.31 per 100 pounds.	Chicago to New York, $0.45 per 100 pounds.	From Argentina, $6.41 per 100 pounds; Chicago, $9.05 per 100 pounds.	Argentina, $3.64 per 100 pounds.	
Creamery butter	1933		1,021,806 pounds; $160,626.	New Zealand.						(1)	
	1935	New York (firsts) $28.80 per 100 pounds.	22,674,642 pounds; $3,576,942.	do	$17 per 100 pounds.	$14 per 100 pounds.	New Zealand to New York, $1.30 per 100 pounds.	Minneapolis to New York, $1.20 per 100 pounds.	From New Zealand, $32.30 per 100 pounds; Minneapolis, $28.80 per 100 pounds.		
Canned meat	1933	Factory wholesale value, $13.80 per 100 pounds.	43,024,989 pounds; $2,812,806.	Uruguay	$6.20 per 100 pounds.				Uruguay, $12.50 per 100 pounds; Chicago, $14.39 per 100 pounds.	Uruguay, $1.89 per 100 pounds.	
	1935	Not available	76,258,346 pounds; $5,564,536.	do	$7 per 100 pounds	$6 per 100 pounds	Uruguay to New York, $0.30 per 100 pounds.	Chicago to New York, $0.49 per 100 pounds.			
Women's shoes	1933	Black, McKay, sewed, at Boston, $218 per 100 pairs.	1,785,449 pairs; $1,574,181.	Czechoslovakia.	$78 per 100 pairs						
	1935	Black, McKay, sewed, at Boston, $248 per 100 pairs.	1,175,260 pairs; $930,304.	do	$78.70 per 100 pairs.	$23.60 per 100 pairs.	Czechoslovakia to New York, $2.50 per 100 pairs.	Boston to New York, $4.20 per 100 pairs.	From Czechoslovakia, $104.10 per 100 pairs; Boston, $252.20 per 100 pairs.	Czechoslovakia, $148.10 per 100 pairs.	
Pottery, china, earthenware—decorated and undecorated.	1933	$9.396 per gross							Landed cost minus freight.		
	1934	$11.068 per gross	8,215,860 dozen; $3,179,614.	Japan	$4.64 per gross	$4.45 per gross	Japan to New York, $0.35 per 100 pounds.	East Liverpool to New York, $0.50 per 100 pounds.	From Japan, $9.05 per gross; East Liverpool, $11.08 per gross.	Japan, $2.03 per gross.	
Anthracite coal	1933	Chestnut $11.65 per ton	407,368 tons; $2,617,323.	Russia (50 percent).	$6.43 per ton	None	$1.50 per ton			Russia, $3.33 per ton.	
	1935	Chestnut f. o. b. mines $6.75 per ton.	57,166 tons; $1,157,828.		$7.32 per ton [2]	None	$1.50 per ton	Pennsylvania to Boston, $3.65 per ton.	Import, $8.82 per ton; Pennsylvania, $10.40 per ton.	Imports, $1.58 per ton.	
Crude petroleum	1933	Kansas to Oklahoma, $0.567 per barrel	31,924,327 barrels; $17,718,108.	Venezuela	$0.55 per barrel						
	1935	Kansas to Oklahoma, $0.94 per barrel.	25,545,533 barrels; $18,021,858.	do	$0.667 per barrel	$0.21 per barrel	$0.23 per barrel	Oklahoma to New Jersey, $0.60 per barrel.	From Venezuela, $1.10 per barrel; Oklahoma, $1.54 per barrel.	Venezuela, $0.433 per barrel.	

[1] During first 4 months of year domestic prices averaged 33.7 cents per pound, 92-score, in New York. Landed cost of New Zealand butter averaged 31.7 cents per pound, or 2 cents less than domestic butter. During this period imports amounted to 17,000,000 pounds. Domestic prices fell to 27.3 cents in May and to 23.8 cents in July and imports fell to 5,000,000 pounds from May to December.

[2] Values show apparent falsity of foreign invoices.

Mr. SCRUGHAM. Mr. Speaker, I yield 4 minutes to the gentleman from Utah [Mr. ROBINSON].

Mr. ROBINSON of Utah. Mr. Speaker, it is regrettable from a legislative viewpoint that this matter has come up the way it has, for it rather gives some Members the idea that this is "pork barrel" legislation, which is not true. Every one of these projects can be justified and have been justified before various boards. I do not believe all of us are familiar with the facts as they exist in reference to these projects.

The gentleman who preceded me would leave the idea that we are going to bring a vast amount of new land into production that is not already in production. Another gentleman said he thought every project named here should be justified before we appropriate money for it. I am interested in one project, and I want to take the time I have to explain this project, for I think it is typical of other projects; and if you understand it, you will see that the ideas expressed by many of the Members today are not sound.

The project in my district is the Provo River project. Ten million dollars was allocated for this project out of public-works funds. Engineers from the Public Works Administration, engineers from the Bureau of Reclamation, and the best engineers in the United States approved the project as sound. In this project $2,000,000 will be used to construct a dike across Utah Lake which will stop evaporation on that lake approximately 25 percent and thereby conserve that much water. Eight million dollars is to be used to construct a dam and build canals. Not 1 acre of new land is involved in this project. In this particular project the very heart of Utah is involved; Salt Lake City and Salt Lake County, with a population of approximately 200,000, is somewhat dependent for its culinary water supply and for irrigation for farms already under cultivation.

The city of Provo, with a population of 16,000, and four or five other communities with population varying from 1,000 to 4,000, are dependent on this project for continuous water. Not only is there involved the irrigation of farms that have been cultivated for 50 years but the culinary water supply of these various communities is likewise involved. During the past 10 or 12 years the West has become drier and drier. Farms that had water available 10 years ago have no water today. People are moving off of farms they and their fathers have occupied for 50 years because they cannot find water and are wholly unable to make a living on their farms. We come to the Government and put the proposition up to the officials here in Washington. Money was allocated to relieve the situation, but now we find the money taken away from us for the sole purpose of feeding the hungry and clothing the naked in other parts of the country than ours through the relief administration authorized by the President.

Mr. KNUTSON. Mr. Speaker, will the gentleman yield?

Mr. ROBINSON of Utah. No; I refuse to yield.

We now ask you to restore this to us. The President asks you to restore this to us. What are you going to do, turn down your President, turn down us, or are you going to restore it? [Applause.]

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 10 minutes to the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Speaker, I am going to cover these projects and the amendments as fully as I can in the available time.

Mr. RICH. Mr. Speaker, I think we ought to have the full membership of the House present; therefore I make the point of order there is not a quorum present.

The SPEAKER pro tempore. Does the gentleman insist on his point of no quorum?

Mr. RICH. Mr. Speaker, I withdraw the point of no quorum.

Mr. TABER. Mr. Speaker, there are a great many projects involved in this authorization. On all seven of the projects that are authorized there is absolutely no limit to the cost.

Let us take the Central Valley project in California, the first item. That project is said by reclamation people to be subject to a cost of $170,000,000. I have in my hand a document issued by the State engineer of California, and on page 37 it is shown that the project will cost $683,000,000 before being completed.

What kind of a project is it? It is a tremendous dam 420 feet high, located on the Sacramento River. This dam will store up the water and let it down into the junction of the Sacramento River with the San Joaquin River. Then there are provided five dams on the San Joaquin River with pumping projects to pump the water up from one dam to another out of the Sacramento. Then there is a canal with five more dams and pumping projects to carry the water up to a total height of 186 feet. Then there are provided six more pumping projects and another canal to carry the water up to a total height of 250 feet above the junction of the two rivers. Is it not a ridiculous proposition to spend money for such projects?

Mr. BIERMANN. Will the gentleman yield?

Mr. TABER. I yield to the gentleman from Iowa.

Mr. BIERMANN. That is one of the projects which we will be obligated to go through with if we vote for this Senate amendment?

Mr. TABER. Yes; and it will involve $683,000,000.

Mr. BIERMANN. The Budget has not approved of this project?

Mr. TABER. The Budget has approved it. That is the worst part of the matter.

Mr. BIERMANN. Has the House Appropriations Committee approved it?

Mr. TABER. Neither the House nor the Appropriations Committee has ever approved it, and, as a matter of fact, the Members refused to consider it when it was pending before the House committee.

Mr. BIERMANN. May I ask the gentleman another question? Members cannot secure copies of this bill.

Mr. TABER. That is a fact.

Mr. BIERMANN. A good many million dollars are involved in this amendment?

Mr. TABER. In this amendment there is involved anywhere from $1,100,000,000 to $1,500,000,000, and no one on earth can tell anything about it.

Mr. BIERMANN. How much is involved in this particular appropriation?

Mr. TABER. Which one? The Central Valley project involves $683,000,000.

Mr. BIERMANN. The gentleman evidently misunderstood me.

Mr. TABER. There is no limitation here at all. The whole $683,000,000 may go into that project.

Mr. GEARHART. Will the gentleman yield?

Mr. TABER. I cannot yield for any further questions.

Mr. GEARHART. Not even for a complete answer? There is a complete answer to the gentleman's contention in the laws of the State of California.

Mr. TABER. No; there is no answer to it. The gentleman may cover that in his own time. According to the language of this bill, it is an authorization for the whole $683,000,000. That is what we are up against if we agree to this Senate amendment.

Let us go a little further and take up the Grand Lake-Big Thompson project, which project will call for an ultimate appropriation of $35,000,000 to $40,000,000, according to the best available information. This project calls for the construction of a canal 10 or 12 miles long under a mountain 12,000 feet high.

Mr. KRAMER. You cannot go over it.

Mr. TABER. Of course, they cannot go over it. As I stated, this calls for the construction of a canal 10 or 12 miles long to carry water from the western slope of the Rocky Mountains to the eastern slope in order to irrigate 1,000,000 acres of land. They ought to pump the water over the mountain, because that would be in line with some of these other operations that have been indulged in.

Mr. THURSTON. Will they not just move the mountain?

Mr. TABER. Probably.

Then there is the Carlsbad project, which will cost a lot of money, as well as numerous others, including the Casper-Alcova project. The only justification for the latter project is the crowd in Wyoming want this money spent. They recognize it will not be a successful operation. As far as irrigation goes, it will be a failure because the land is poisoned.

Mr. Speaker, the gentleman from Utah stated a little while ago that the public lands had brought into the Treasury $200,000,000, which is now available for irrigation. Here is an item that will involve from $1,100,000,000 to $1,500,000,000, and on top of that there has been allocated out of relief funds practically $200,000,000 more, making a total of anywhere from $1,300,000,000 to $1,700,000,000 for irrigation, which is to be taken out of this $200,000,000 which the gentleman from Utah stated has been collected from this land.

Mr. Speaker, should we not use some sense? Should we not stop the expenditures for these tremendous items? The Grand Lake-Big Thompson project, to which I previously referred, will probably run $35,000,000 to $40,000,000 and has never been properly investigated by even the Bureau of Reclamation. They tell us themselves they would know whether it was a feasible project or a fair project after they have made an investigation and report. Why should we authorize something that the Secretary of the Interior himself says we should not embark on unless he has the discretion to stop it? Is that not ridiculous?

I wish I could go into the detail of all of these things. There is, according to the State engineer of California, ample water to irrigate all the lands in the Upper San Joaquin Valley out of the Friant Reservoir, without going into this tremendous Kennett Reservoir which this matter involves.

Let me say to you that on page 160 of the engineer's report it is said:

> Sufficient water could be obtained from these sources (the Friant Reservoir) to meet the needs of the developed areas with a deficient water supply at a cost less than any other source.

This indicates that this whole Kennett Reservoir proposition which is going to cost a tremendous lot of money is not justified unless we want to put a million and a half or two million more acres of land under cultivation.

The Columbia River Basin means a couple of million acres more under cultivation. All of the items mean tremendous additional acreage, and we should not think of going on with this kind of proposition.

Mr. THURSTON. Mr. Speaker, will the gentleman yield?

Mr. TABER. I yield.

Mr. THURSTON. I am sure the House would like to know from the sponsors of this proposition what the ultimate cost will be. Has anyone here this information available?

Mr. TABER. Why, no. There is not anything here to justify any of these projects or to tell what they will cost, and there is nothing to limit their cost, because the language of the bill is wide open without any limitation whatever being placed on any project. This is a most ridiculous thing. If the Naval Affairs Committee were to bring in a bill authorizing battleships, you would not consider it for a moment unless it provided a limit of cost, and each one of these items is big enough to run wild with the Treasury without any limitation whatever.

Mr. ANDRESEN. Mr. Speaker, will the gentleman yield?

Mr. TABER. I yield.

Mr. ANDRESEN. Has the gentleman any idea how many million acres of newly irrigated land would be put under cultivation if all of these projects were to go through?

Mr. TABER. It could run into 5,000,000 acres of land before they got through with it without any trouble whatever.

Mr. WHITE. Mr. Speaker, will the gentleman yield?

Mr. TABER. I cannot yield now.

It seems to me we should not at this time go ahead any further with this proposition. [Applause.]

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. BUCK].

Mr. BUCK. Mr. Speaker, I am surprised that the able gentleman from New York [Mr. TABER] would allow his antipathy toward reclamation projects in general and the Central Valley water project in particular to cause him to divert from what are actual facts.

If the gentleman from New York and the Members of the House will refer to page 79 of the supplementary hearings before the conferees having in charge the Interior Department appropriation bill, they will see a complete breakdown of the cost of the Central Valley project with an analysis as of May 1, 1934, submitted by Mr. Page, of the Bureau of Reclamation, which shows a total cost of $165,989,309. This is quite different from the $683,000,000 the gentleman referred to.

Mr. Speaker, I ask unanimous consent to insert this table in the RECORD at this point.

The SPEAKER pro tempore (Mr. LARRABEE). Is there objection to the request of the gentleman from California?

There was no objection.

The table referred to follows:

Summary estimate of cost of Central Valley project of California, analysis of May 1, 1934

Unit	Preliminary expense (1)	Cost of land and rights-of-way (2)	Construction (3)	Engineering charges (4)	Legal, administrative, and other overhead charges (5)	Interest during construction (6)	Total cost (7)
Kennett Dam and Reservoir	$225,900	$2,540,400	$49,428,900	$1,807,000	$2,485,400	$3,199,748	[1] $59,685,948
Kennett power plant	52,700		12,114,900	579,400	421,400	1,187,230	14,355,630
Keswick Dam and after-bay	19,200	15,000	1,752,500	61,900	85,100	89,356	2,023,056
Keswick power plant	19,000		4,366,300	208,800	151,900	312,244	5,058,244
Kennett transmission line and terminal substation	51,000	477,200	11,249,600	509,900	458,900	919,463	13,666,063
Sacramento-San Joaquin Delta cross channel	15,100	230,000	3,250,100	166,400	121,000	88,151	3,870,751
Contra Costa conduit	9,400	397,000	1,775,000	94,400	85,000	46,586	2,407,386
Friant Dam and Reservoir	63,900	230,000	11,801,300	418,900	575,900	533,124	13,623,124
Madera Canal	12,600	63,200	2,825,400	125,600	113,000	77,509	3,217,309
Friant-Kern Canal	99,100	1,611,100	21,170,900	990,500	891,500	1,004,602	25,767,702
San Joaquin pumping system	55,400	558,900	12,172,100	553,500	498,200	475,996	14,314,096
Water rights and general expense							8,000,000
Total	623,300	6,122,800	131,905,000	5,516,900	5,887,300	7,934,009	165,989,309

[1] Includes $12,000,000 to be contributed by Federal Government in interest of navigation and flood control.

Mr. BUCK. Mr. Speaker, the gentleman from New York [Mr. TABER] made the statement that the State engineer of California had stated that there is an abundant water supply at hand for the upper San Joaquin Valley. I have in my hand a letter from the State engineer, Mr. Edward M. Hyatt, in which he states, referring to a protest that has been circulated rather widely among Members of the House here, that this statement that abundant water supplies exist near at hand for the upper San Joaquin Valley is absolutely contrary to the facts.

Abundant proof exists as to the serious water shortage which exists in the upper San Joaquin Valley and which has already caused the abandonment of over 20,000 acres of highly valuable farms planted to oranges, nuts, figs, and numerous other specialty crops that by the greatest stretch of the imagination cannot and do not compete with the corn of Iowa or with any eastern agricultural products.

Engineering studies extending over 10 years, which have been carefully checked by Federal authorities, show conclusively that locally available water supplies are deficient to take care of the requirements on an area of over 400,000 acres of highly valuable land in the upper San Joaquin Valley, and there is no possibility of obtaining additional supplies from local or nearby sources.

The investigations further show that unless some outside water can be brought in, and the only source is from the Sacramento Valley watershed, these lands must go back to desert conditions involving a probable loss of $40,000,000 in annual crop production and over $100,000,000 in capital investment.

Mr. TABER. Mr. Speaker, will the gentleman yield?

Mr. BUCK. I am sorry, I cannot yield.

There is no question about the fact that this water must come from the other end of California for it is there that the rainfall occurs in abundance. It is there we can store this water supply.

It is true that by building the Friant Dam, sufficient water can be obtained to supply the water needs of the upper San Joaquin Valley, but in doing so you drain and denude the San Joaquin River itself, and it is necessary to replenish that with the water from the Sacramento. That is the reason for pumping the water from the Sacramento up the San Joaquin. These San Joaquin riparian owners and irrigations are entitled to consideration as well.

My time does not permit me to cover the needs of the delta region in my own district to remove salinity conditions caused by deficient water flow in summer months; nor the industrial water problem along Suisun Bay. Suffice it to say that all these conditions have caused every public body that has investigated this project, including the Board of Army Engineers, to approve it as feasible from an engineering standpoint and as economically practicable. Remember that $12,000,000 of the cost of this project has already been authorized in the river and harbor bill of last session.

Gentlemen, remember, too, that this cost is repayable to the Government and that all that we are asking for is authorization to proceed under the reclamation law on a project designed to save, and not increase, productive acreage.

Mr. SCRUGHAM. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. LEA].

Mr. LEA of California. Mr. Speaker, in 1902 the Federal Government embarked on a policy of reclamation. In spite of all ill experiences in the history of reclamation, today I think there is not a forward-looking, progressive man in the United States who would care to undo, as a whole, what has been done. As a policy, reclamation has been a success.

About 2 years ago the administration appointed Mr. F. E. Schmitt, editor of the Engineering News Record, and John W. Haw, director of agricultural development of the Northern Pacific Railway, as a committee to investigate the reclamation problem. They visited and held public hearings at nearly all of the Federal reclamation projects. After an exhaustive investigation of the subject they reached the conclusion, among other things, that reclamation "has shown by its results to be a sound and desirable national undertaking which represents a constructive policy of social development."

They further found that reclamation "has little relation to the problem of surplus agricultural production." That seems to be the judgment of nearly all who have made a thorough practical study of the agricultural problem.

From the west side of the Mississippi Valley to the Pacific Coast States it has been the irrigated sections that have formed the basis for the development of the economic, social, educational, and political advancement of those great areas. Reclaimed lands have been the bridges conveniently and happily connecting the East and the West.

The reclamation service works with over 30 years of practical experience behind it. It has built over 100 dams, none of which have failed. It is the greatest dam-building organization in the world. Its investigations are thorough; its estimates are reliable.

The projects we seek to approve have been investigated by this service. Each of these projects has been approved by the Bureau of the Budget. Each one of these projects has been allotted funds by the President. Construction work has begun on nearly all of them. Now it is proposed that we repudiate what has been done; that the plans under way, the work that is progressing, shall be disrupted; that the hopes and faith of the communities affected, built upon their just expectations, shall be turned into disappointment if not deception. As to a number of these projects, Congress gave the President power to approve them and allot funds for their construction. Is Congress now in position to repudiate the exercise of the power it granted the President and turn away without responsibility from the communities adversely affected?

Let us not look at reclamation as a charity, but rather judge it from a business standpoint.

Take the Salt River project. They had canals there without any reservoir. The Government spent $11,500,000; reservoirs were built. A short time later an area that had been a desert-blown waste was the home of men who in the war period bought $15,000,000 in Liberty bonds. In 1 year they paid over 10 percent of the cost of the project to the Federal Government as internal-revenue taxes.

In 1 year recently 95,000 carloads of manufactured goods, machinery, automobiles, and other products were delivered to our reclamation projects. They afforded a market to all sections of the country.

For every dollar received by the farmers on these reclamation projects for their products, industry, labor, and transportation in the United States received $2.

Take Boulder Dam, built at a vast expense. It is now estimated that it will produce $162,000,000 surplus within 50 years, the period allowed for repayment of its costs. When that project was debated on this floor we had predictions that Boulder Dam would be a waste of money by the Federal Government. Instead of a waste its present assured income indicates a profit of $162,000,000 at the end of the 50-year period. [Applause.]

The Kennett Dam proposed for the Central Valley project of California is a wonderful site for a reservoir and power plant. It will produce 350,000 horsepower with more water than the dam will store. It would be supplemented by the Keswick Dam a few miles further down the stream with its 65,000 horsepower.

The impounded water will produce power in great quantities; it will provide better transportation in the Sacramento River channel throughout the low-water season; it will afford a water level that will serve as a natural barrier to hold back the salt water from the San Francisco Bay that in recent years has been threatening the destruction of about 400,000 acres of rich farming land in the delta of the Sacramento and San Joaquin Rivers. These lands are largely below sea level at high tide, protected by levees, but dependent on fresh water for irrigation and domestic use.

The stablized controlled flow made possible by these dams will give practical control over floods in the Sacramento Valley. At high flood only about 20 percent of the volume of the Sacramento River flows in its banks and with extreme floods the river is a peril as well as a source of much damage to the people of wide areas in the valley.

These waters as "liquid gold" will be carried on for domestic, industrial, and agricultural purposes. They will supply or release other water for saving large farming areas where a diminishing water supply from other sources have caused the abandonment, and places where abandonment is now threatened.

The Central Valley is a great expensive project; not without its difficult problems, it is true. Nevertheless, I dare say there is no other water project in the United States where the plan will serve so many useful purposes and in such an important way. In a word, it will provide a vast storage of water, a large power production, a material aid to navigation in a river channel for a great distance, flood control of great proportions, a domestic and industrial water supply, and water for irrigation to save lands that otherwise perhaps cannot be saved. It will supply water where 20,000 pumps aided a dry series of years in lowering the water table hopelessly while orchards and crops disappeared.

Under the terms of the adoption of this project as proposed in this bill, the income from the power and water services seem to assure a return on the investment to the Government. When the cost of the project is entirely repaid, the reservoir and power plant will remain the property of the United States, to afford an income to the Government and serve as an integral part of the economic life of the country and to the betterment of our people. It will serve their useful purposes long after the last dollar of cost shall have been returned to the Government.

Mr. ENGLEBRIGHT. Mr. Speaker, the Central Valley project is urgently necessary to the immediate and future welfare of the State of California. It will store, control, and distribute the waters of the two great rivers of California, the Sacramento and San Joaquin, and is designed to meet the present and immediate future water problems of the Sacramento and San Joaquin Valleys and of the upper San Francisco Bay region.

The major objectives of the project are to furnish a necessary supplemental water supply to 1,000,000 acres of highly improved irrigated lands in the southern San Joaquin Valley, fully equipped with modern private pumping plants or surface distribution systems, valued at about $200,000,000 exclusive of cities, towns, and general civilization all dependent on water, of this 40,000 acres have already been abandoned due to lack of water; to prevent the invasion of salt water into the delta of the Sacramento and San Joaquin Rivers and thus remove the menace of rendering sterile 400,000 acres of rich cultivated land, which produces crops annually valued at about $25,000,000, and has a valuation of $100,000,000, and on which there has been expended by local interests $27,000,000 in reclamation and flood-protection works; to furnish a greatly needed and necessary fresh-water supply to heavy industry, municipalities, and irrigated lands in Contra Costa County on Suisun Bay, industries having a capital investment of $43,000,000, an annual pay roll of $13,000,000, and an annual production of $120,000,000; to make the Sacramento River navigable from its mouth 250 miles to Red Bluff; to provide flood protection to 1,000,000 acres of improved land in the Sacramento Valley; to furnish necessary additional water supplies to a large acreage of irrigated lands along the Sacramento River; to furnish electric power at rates substantially lower than those now prevailing in northern California.

The Central Valley project will not bring into production any new lands but will immediately retire from production 240,000 acres of submarginal irrigated lands, from which water rights are to be purchased for use on highly specialized crops in southern San Joaquin Valley now facing abandonment on account of water shortage. The project estimate includes cost of retiring these submarginal lands from irrigation. More than one and one-half million acres of developed land in the Sacramento and San Joaquin Valleys and in Contra Costa County will be served and benefited by the project. Crops raised on these lands are largely specialized and noncompetitive with the rest of the Nation.

The Central Valley of California, composed of the Sacramento and San Joaquin Valleys, lies between the Sierra Nevada Mountains on the east and the Coast Range on the west. The northern portion of the valley, known as the Sacramento Valley, is drained by the Sacramento River, which rises in the Sierra Nevada Mountains near the northern boundary of the State and flows 400 miles in a southerly direction to its mouth, at the eastern end of Suisun Bay, an arm of San Francisco Bay. The southern portion of the Central Valley, and known as the San Joaquin Valley, is drained by the San Joaquin River, which rises in the central portion of California and flows northwesterly 350 miles to Suisun Bay, where it enters just south of the mouth of the Sacramento River. The floor of the Central Valley is a flat, alluvial plane 500 miles long and 30 to 60 miles wide. It contains about one-half of the agricultural land of the State. Three million acres of the valley are under irrigation, being two-thirds of the total irrigated land of California.

The population within the confines of the Central Valley is nearly 1,000,000. Its normal value of farm products is about $310,000,000; manufactured products, $265,000,000; and mineral production, including gas and oil, $73,000,000.

The Central Valley project, directly and indirectly, affects two-thirds of the 6,000,000 people of the State of California. The assessed valuation of the area to be served by the Central Valley project aggregates $1,339,000,000. This was for the year 1935 on an assessment basis of 40 percent of actual value.

The Central Valley of California is semiarid and the amount of water that is available or can be conserved limits, controls, and determines all human activity.

The method of farming in the Central Valley of California is different than in the Middle Western and Eastern States, due to the fact that it does not rain from April to November. Crops cannot live through this 7 months' dry season without water. Irrigation from April to September is absolutely necessary and the whole agricultural structure of the State is built upon the distribution and conservation of water. Water is the valuable thing and not the land.

Practically all of the water for irrigation development in the State has been made available through private initiative and effort. California, as you know, started as a mining State and gradually developed its agriculture. For the first 20 or 30 years water was available from nearby streams and could be diverted for irrigation purposes. Since 1900 dams have been constructed to store water for irrigation of lands many miles away. In addition to the storage of surface water behind dams, a large number of wells were developed in the Central Valley to supply by pumping underground water for irrigation. There are some 20,000 pumping wells in the San Joaquin Valley, which is the southern portion of the Central Valley of California. It was presumed that the underground water was inexhaustible, but that was a most serious mistake. The underground water at a profitable depth is gone. It cannot be replenished only at a very small amount per year, even if all pumping should stop. Most of the streams available to the Central Valley for irrigation developments are in use, and underground sources have failed.

A serious and critical water shortage exists in the Central Valley, supporting a high type of agriculture and development. Lands, homes, and towns have been and are now being abandoned because of lack of water. More than a million acres are affected, and unless remedial action is taken wholesale abandonment will follow, with a property-value loss of over $100,000,000 and 50,000 people will be forced to leave their farms and homes.

The Central Valley project calls for the construction of a great dam 420 feet high at Kennett, on the Sacramento River near Redding; a conduit from the delta region to Martinez to furnish water to industries; a huge dam at Friant near Fresno, with canals leading north to Chowchilla River and south to Bakersfield; and a 200-mile transmission line from Kennett to Antioch.

The project has been determined upon after long years of investigations by the State of California, by the United States Bureau of Reclamation, by the United States War Department, and other Federal departments. The hearing on this project before the subcommittee for the Interior Department appropriation bill for 1937 on March 26, 1936, definitely show, on page 79, that the project will cost $165,989,000.

The State of California has expended over $2,000,000 in helping to outline this project, and along with the Government department investigations, it has been demonstrated that the project as presented is the only economic solution

for the relief of the populations of the Sacramento and San Joaquin Valleys. [Applause.]

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. GEARHART].

Mr. GEARHART. Mr. Speaker, in view of the short time that has been allotted to me, may I have the privilege of revising and extending my remarks in the RECORD at this point?

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

Mr. GEARHART. Mr. Speaker, several of the Members who have risen to speak against the various projects included in the amendments sent to us by the Senate, have based their opposition almost entirely upon the idea that reclamation is something that is wrong, something that should be avoided, something that should be abhorred. The Central Valley water project of California is in part a reclamation project, but it is more than that. It includes many other things. Its construction would greatly improve navigation upon the Sacramento River. It will improve it so much that navigation will be extended up that river more than 100 miles above the point beyond which ships are today able to ply. It will control the salt condition which is encroaching upon the great delta of the Sacramento and San Joaquin Rivers and will save for productive use thousands of acres now threatened with encrustation. Contrary to the fears so frequently expressed today the development of this great enterprise will not bring lands into cultivation that are not in production today. On the contrary, it will save from abandonment some 500,000 acres of land that are today planted and in a high productive condition, every acre of which will go back to the condition of the desert unless water is brought to those parching lands within the next very few years. Also, this great California project will make possible the development a tremendous wattage of electricity, cheap power, power that will become a tremendous boon to the industries that are centered in the San Francisco Bay area. Are not these great benefits sufficiently important to merit even the votes of those who despise the very thought of reclamation? Could Government money be loaned more profitably in the interest of the general welfare of our common country?

In the opinion of those who are familiar with the details of Central Valley no project we have ever considered offers greater return on the dollar's investment, nor promises more in comfort and happiness to the people it is our honor to represent.

As I said before, it has been argued by those who are opposed to the authorization by this Congress of additional reclamation projects that the development of further projects of this character will bring into cultivation and production vast acreage—acreage that will be thrown into competition with lands which are already producing in agricultural products far more than the consuming public can absorb. In other words, it is contended that the preparation of new lands for agricultural exploitation is in direct opposition to the theory of crop reduction which has guided governmental activities since the inauguration of the present administration.

The advancement of this argument loses sight entirely of the fact that years will pass long before any of these projects are finally completed and before the lands adjacent thereto will be supplied with the water so indispensable to their successful utilization. The population of this country will not reach its greatest heights for many years to come. The whole reclamation scheme is one which has set its sights with a view to the providing of homes and the encouragement of increasing production for those that will be the citizens of tomorrow, for our remotest posterity. If this generation should fail to have a regard for the citizen of responsibility of tomorrow, who, in their turn, must assume the burden of carrying on the work of the world, when the citizens of today will be compelled to yield up to younger and more vigorous hands the responsibilities of the hour, it would indeed be recalcitrant to duty. The blessings that have flown from the projects of the character we have under investigation today surpasses measurement, and the benefits that are to accrue from the development of projects similar to those which are included in the bill which we are now considering defy imagination. To eliminate the Senate amendment from the Department of the Interior Appropriation Act would be, insofar as the future is concerned, a tragedy of stupendous proportions.

Despite whatever may be said in reference to the reclamation projects as a group, it cannot be said of the great Central Valley project of California that this is one which will bring into cultivation new acreage within the span of the present emergency, the economic depression, which is now so rapidly fading in the brightening light of returning prosperity.

Insofar as the necessities of the Sacramento-San Joaquin Valleys of California are concerned, the great Central Valley project is a water-conservation measure. Five hundred thousand acres of land now developed to the highest state of productivity, because of failing water conditions, will revert to the conditions of the desert unless new sources of water supply are made available within the next few years. The Central Valley water project promises relief from this condition of creeping paralysis which threatens the lives and the homes of thousands upon thousands of our citizens, who have given a half century of their best effort and unwavering devotion to the development of this territory, farm homes where living conditions have been blessed with nature's generous abundance. The necessity of bringing early relief to this vast territory is so urgent that the approval and the early beginning of construction has long ago taken on the characteristic of an emergency. So it is to save and conserve land already in a high state of production, not to bring new lands into production, that has afforded the initiative urge to the people of the State of California to make this appeal to the people who dwell elsewhere than within the friendly territory of this great western Commonwealth.

In the brief time that has been allotted to me it is quite impossible to go into a technical and detailed description of the variable phases and engineering scheme of this great interior California project. Suffice it to say that in the northern portion of the great interior valley of California there is a tremendous abundance of water, an abundance far beyond the needs of the territory in which the water has its source, and by tragic contrast there is an increasing scarcity of water in the southern end of this great inland territory. The Central Valley water project is an integrated one, a project with many units, all of which make up the perfect whole. The general scheme of things contemplates a vast system for trading water, the diversion of water from northern sources for use in neighborhoods farther south. Through this comprehensive system of water trading the excess waters of the Sacramento Valley, the waters for which they have no use, will be brought with all of their God-given blessings to relieve the parched condition of the lower San Joaquin.

As I pointed out a moment ago, the arrival of the northern waters on the southern lands will save from abandonment not less than a half million acres now under cultivation, already in production, and will make possible for thousands upon thousands of people now residing in this cultivated area to remain in their homes, to conserve and improve the great wealth that they have created and developed during the last two generations. If this water does not reach them within the next few years, this bountiful territory of today will become a desert waste of tomorrow. The trees and vines will die for want of water. These farms, the homes of so many happy people, will because of the unrelenting advance of water scarcity, be abandoned to an encroaching desert.

And as to feasibility. Never in the history of reclamation or of irrigation engineering has a project been more carefully studied than has this plan for the water conservation of central California. No person whose opinions are worthy of consideration has pronounced the scheme of it unworkable. It has been reviewed by the War Department Engineers, the

Department of Agriculture, the Reclamation Bureau, the Federal Power Commission, the Public Works Administration, the Federal land bank, the President's waterflow committee, the Natural Resource Board, by the Senate Committee on Irrigation and Reclamation, and by the House of Representatives Committees on Rivers and Harbors, Flood Control, and Appropriations, and by a joint commission appointed by the President of the United States and the Governor of the State of California. All of these national investigating bodies have endorsed the pressing need of a solution of the water problems of the Central Valley, and each of these agencies, through their responsible heads, have endorsed the project in the highest terms.

Characteristic of the commendatory reports on the feasibility and practicality of the engineering phases of the project permit me to quote from the report made by the incumbent Secretary of the Interior to the President of the United States:

> I find that the project is feasible from engineering, agricultural, and financial standpoints; that it is adaptable for settlement and farm homes; and that the estimated construction cost is adequate and that the anticipated revenues will be sufficient to return the cost to the United States.
>
> The Commissioner of Reclamation has approved and recommended the construction of the project. I therefore recommend the approval of the Central Valley development as a Federal reclamation project.

The approaching end of the time which has been made available to me through the graciousness of the leadership of the House compels me to bring these remarks of mine to a close. The wonders of this great engineering project, the great blessings that will flow from its completion are so numerous that it will be quite impossible to recount them here now. From the translation of this great Central Valley idea into accomplished fact will flow benefits that will surpass human appraisement. The withholding by the Congress of the aid which a despairing people beseech of you will indeed tear at the heartstrings of a nation. By all means let this construction work, already initiated by virtue of the Executive approval of the President of the United States, go on to completion. [Applause.]

The SPEAKER pro tempore. The time of the gentleman from California has expired.

Mr. SCRUGHAM. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon [Mr. PIERCE].

Mr. PIERCE. Mr. Speaker, irrigation water is the very life of the arid West. The United States is billions of dollars wealthier by reason of the fact that this Congress in past years has been liberal enough to allow the West to use a part of the dollars that have been collected by the United States Government from their timber and other resources.

When the Western States came into the Union the Government kept a large part of our territory. Half of Oregon is owned by the United States. Up to within recent years all of the money that went into irrigation came out of this contribution from the resources of the West. Our money it was, simply loaned. It has been returned in millions. It will nearly all be returned.

There are two items in these amendments, one for $400,000 for the Owyhee—that is, to build canals so that they will not have to pay a terrifically high rate for electricity for pumping. That is all. Who would deny the right to use that much money for that purpose?

Then these other projects will not be completed in a day. It will take a half a generation or more to build the central California project. Likewise, the Grand Coulee. The Owyhee project was started 10 years ago. There is a reservoir 60 miles long with a concrete dam 500 feet high. Why should they continue to pay high rates for electricity to pump water from the Snake River when there is ample water reservoired in a Government reservoir that can be obtained by gravity? The Deschutes project, for which this bill provides $450,000, has already been authorized. It is one of the most feasible irrigation projects in the United States. It is now settled by people of the highest type, who went there to raise wheat and will be forced out unless the land can be saved for general farming through irrigation.

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 20 minutes to the gentleman from Texas [Mr. BUCHANAN].

CALL OF THE HOUSE

Mr. RICH. Mr. Speaker, I make the point of order a quorum is not present. There are not 50 Members on the floor to hear these speeches.

The SPEAKER pro tempore (Mr. LARRABEE). The Chair will count. [After counting.] Sixty Members are present, not a quorum.

Mr. BUCHANAN. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 105]

Adair	Crowther	Hoeppel	Oliver
Andrew, Mass.	Dear	Hook	O'Malley

Creal	Hartley	Norton	Zioncheck

The SPEAKER pro tempore. Three hundred and eighteen Members are present, a quorum.

On motion of Mr. SCRUGHAM, further proceedings under the call were dispensed with.

INTERIOR DEPARTMENT APPROPRIATION BILL, 1937

Mr. BUCHANAN. Mr. Speaker, I do not want any Member of this House to conclude that I am not at the present time for reclamation, because I am, always have been, and always expect to be. I believe it is the duty of the people to make our natural resources serve the necessities of our advancing civilization, but I believe in proceeding in reclamation projects in a businesslike manner; I believe in having hearings and analyzing every project of any great moment so that we shall be sure the project is feasible and that failure will not result in money and effort being lost. Furthermore, if we are to start on a general policy of conservation throughout the Union, I believe in equal opportunities and equal grants, if you want to call it that, or equal advantages, for every section in conserving its natural resources, and not have just one section picked out and favored. [Applause.]

This brings up my first suggestion. I am not going to have time to cover it—I wish I did. In 1902 we passed a reclamation act and established a reclamation fund into which was paid part of the money realized from the sale of public lands, part of the receipts from mineral leases, and Federal power licenses, and sums repaid as construction charges. This revolving fund has had receipts of about $245,000,000. It is increasing every year by receipts from these sources at the rate of four or five million dollars. When we first undertook the construction of reclamation projects out of this fund no interest was charged on deferred construction payments, and none is charged now. In the beginning, 10 years was the period in which construction charges were to be repaid. Later that was extended to

20 years, and now it is 40 years without interest. I am perfectly willing that it be so. I am perfectly willing that the proceeds from the sale of land, timber, and minerals in the Western States be used to upbuild that section; but never until this good hour has Congress authorized appropriations from the miscellaneous receipts of the Treasury and the spending of money for reclamation projects without interest.

The action we take on this matter today will determine whether or not we shall lend money out of the Treasury for 40 years without interest to reclamation projects of the West when they have the oil royalties and money from other sources going into that special fund.

What is happening? Bear in mind that this is an appropriation bill and was an appropriation bill as it left the House, wherein your Appropriations Committee had proceeded under the Budget system as established by Congress, responding only to authorizations made by law justifying the Appropriations Committee in recommending appropriations. It went to the Senate. How has it come back to the House? It has come back to the House not an appropriation bill but a legislative authorization bill. If we permit this sort of procedure on the part of the Senate, we might just as well abolish some of our legislative committees because the Senate will continue to put their pet legislative provisions on appropriation bills where they know they will receive favorable action because they know an appropriation bill is going to pass.

Look at the bill. Here is more than a page devoted to project after project starting with the language: "The following projects are hereby authorized", strictly legislation.

Here we have the Gila project; never authorized specifically. They claim it was authorized in the act providing for the Boulder Canyon project. When that act passed Congress no Member had any idea of, or had not even thought of, the Gila project. The Gila project was at first condemned by the Secretary of Agriculture as unsuitable for irrigation. It was sent to a board. The board investigated and reported that if sufficient water was run on the land for 8 or 10 years, if it was heavily manured and planted to legumes and built up it might then be irrigated with some hope of growing crops. Notwithstanding this, they want to spend $20,000,000 on this project. I have not time to go into all the projects.

Let us consider for a moment the Central Valley project in California. For this project $16,000,000 is carried in the bill, and the estimated cost is $170,000,000. This project is not on public land but is on private lands. They are going to develop these lands of private individuals without interest. The legislature passed an act creating a district similar to the Tennessee Valley, but a State district, to have absolute control over this project. Let us continue. I am taking only unauthorized projects.

The Carlsbad project in New Mexico is allotted $900,000 in this bill, but will require $2,500,000 to complete. This is unauthorized by any law.

There is the Deschutes project, Oregon, $450,000, in this bill, and $6,000,000 as the total cost of the project.

There is the Yakima project, $2,500,000 in this bill, and it will cost a total of $14,000,000 to construct it, and it has not been authorized.

There is the Casper-Alcova project and other projects.

All of these projects would involve a total appropriation of $700,000,000 or more to complete them. That is the total estimated cost of these projects.

I have not mentioned a project my distinguished friend the gentleman from Washington [Mr. HILL] will speak on. That is the Columbia River project or the Grand Coulee project. Let me tell you something about that project. That has been clamored for in Congress for years and years, but the Congress never did recommend or approve it. It has now been approved by the Public Works Administration, which has allowed $60,000,000 to complete what we call a low dam, 177 feet high. This dam can be completed for $60,000,000. They received $35,000,000 and the other $35,000,000 was taken away, so that additional money will have to be appropriated in order to complete the dam up to 177 feet.

Since the hearings have been concluded, the plans with reference to that project have been changed and the height of the dam has been increased from 177 feet to over 500 feet and the cost to construct the dam increased to $118,000,000. Congress last session, in section 2 of the Rivers and Harbors Act of last session, ratified the contracts made for this project and authorized the making of further supplemental contracts.

Mr. Speaker, the longer I live and the more experience I get brings me more firmly to the conclusion that we can never have an economical government with two or three appropriating bodies within that government. [Applause.]

Let me pay my further respects to this Columbia River project, on which it will cost $118,000,000 to construct one dam. This project will ultimately cost a total of $389,000,000 to complete. How are they going to get the money back? Why, they are going to lift that water 300 feet up to the mesa of the Columbia River Basin. In my country in west Texas, when we irrigate, we do not attempt to pump water over 40 feet because it will not pay. The cost is too great. It is not economical. Yet they claim by this magnificent cheap power they can lift water 300 feet to irrigate land to plant crops and make a go of it.

Mr. WHITE. Will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Idaho.

Mr. WHITE. Has the gentleman a Columbia River in Texas?

Mr. BUCHANAN. No; we have not a Columbia River in Texas, and I am glad we have not; however, we have the Brazos River and the Colorado River, and they go on a rampage and overflow every 3 or 4 years. I am for controlling the overflow of those rivers and also the overflow of the Columbia River as well.

In connection with the hearing on this matter, the head of the Bureau of Reclamation was asked how much horsepower the low dam would develop out there. He answered, "Four hundred and fifty thousand horsepower." He was asked, "How much will your high dam develop?" He answered, "One and one-half million horsepower." He was asked, "Have you a market for the electric current which will be developed through this low dam of 450,000 horsepower?" He said, "No; we have not got the market now." He was asked, "Who are you going to sell it to?" He said:

> We are going to lift the water 300 feet. We are going to irrigate the Columbia River basin. Then we are going to bring settlers in there and turn the land over to them either by sale, lease, or otherwise. We will settle that basin, and those farmers will create new cities and towns, and these cities and towns will be the market for our power.

Let me state one other fact. It is as inevitable as the rising and setting of the sun. You cannot push progress beyond the demands of the people who are progressing. [Applause.] When the time comes for the development of the Columbia River basin, when the demand comes for the power, and when the farmers and the people come forth and demand this power, then your Columbia River basin will be developed, and I hope it will bloom and blossom into a rose; but we are not ready for that now.

Mr. WHITE. Will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Idaho.

Mr. WHITE. Let me remind the gentleman that we have great industrial districts on the Pacific coast which are potential markets for that power.

Mr. BUCHANAN. The Pacific coast already has irrigation projects for which there is requested in this bill the sum of $107,000,000.

Mr. WHITE. But I am dealing with the Columbia River Basin now.

Mr. BUCHANAN. Mr. Speaker, this bill left the House as an appropriation bill and came back a legislative authorization bill. The bill left the House complying with our Budget

system and came back from the Senate in such shape that the Budget system has been absolutely ignored.

Let me tell you what the Senate did. I do not know why they did all this. Some Members of the Senate, perhaps, had pet projects they wanted to take care of and they wanted to take care of them within the Budget, of course. Then, what did they do? They took the estimates of the Budget and then took $2,000,000 off this estimate, $2,000,000 off another estimate, $1,000,000 off another estimate, and so on, until they got six or eight million dollars. Then they took that money and went out to find new projects that had never been submitted to the Budget and on which no Budget estimate had been made. They divided this money among those projects. A little under $4,000,000 was divided in that way. They then put the obligation on us to take care of these projects ultimately at a cost of from $26,900,000 to $50,000,000.

We might just as well abolish the Budget if we are to approve of procedure like this.

Mr. JOHNSON of Texas. Mr. Speaker, will the gentleman yield?

Mr. BUCHANAN. I yield.

Mr. JOHNSON of Texas. How much did the Senate add to the bill?

Mr. BUCHANAN. In actual appropriations sixty-one million-and-some-odd dollars over and above the House bill.

Mr. HARLAN. Mr. Speaker, will the gentleman yield?

Mr. BUCHANAN. Yes.

Mr. HARLAN. In addition to the $61,000,000, the undertakings that are authorized in this bill would add how much?

Mr. BUCHANAN. According to the estimates they would create obligations of $740,000,000 to complete the projects.

Now, Mr. Speaker, I want the Members of the House to understand that sending this bill back to conference does not mean, and must not mean, a blow to the progress of reclamation. As I have said, I am for it, and I want it to go forward, but I want it to go forward in a sensible, sane, and business-like way.

If California wants the Central Valley project, let them bring the proposition before the regular committee of the House or the Senate and let it be thoroughly investigated and reported to the House and passed as a legislative proposition.

If the Columbia River Basin wants another project, let the Budget estimate come up and let it be examined thoroughly by the Appropriations Committee or the legislative committee and approved or disapproved according to the facts.

Now, let me tell you something further about this. How did the Senate get these estimates? The President sent his public-works estimates to the House. They were transmitted by the Speaker to my committee, and when I got these public-works projects I called Mr. TAYLOR, the chairman of the subcommittee on the Interior Department bill, into my office and said, "Here are these projects; do you want them?" Mr. TAYLOR said he would consider it. The next I heard was that an agreement had been reached between Mr. TAYLOR and Dr. Mead, the Chief of the Reclamation Bureau at that time, that these estimates would go to the deficiency subcommittee of the Committee on Appropriations, where Mr. TAYLOR is the member next in rank to me, and we would go into them thoroughly and we would allow the ones that were worthy and reject the ones that were unworthy; we would allow the ones that would not be too great a burden on the Government during this period and reject the ones that would be too much of a burden at this time. The Senate committee was bound to know all about this, and what did they do? Why, they summoned Secretary Ickes before them and they said, "Mr. Secretary, I see where the House has put a Boulder Canyon appropriation and an all-American canal appropriation in their bill, and since the House has done this, is there any reason why we should not put in all of these other items?" The Secretary said there was no reason, but the Secretary was not told that the Boulder Canyon appropriation and the all-American canal appropriation had been carried year after year in the Interior Department appropriation bill as one of the regular items of appropriation, authorized by law, and did not belong with the estimates for emergency appropriations.

In conclusion, Mr. Speaker, I am going back to the matter of interest. This is the time to decide whether or not we are going to advance to reclamation projects in the West out of the Treasury general fund money on 40 years' time without interest. Mr. Speaker, if this is to be our policy, then, in the name of justice, in the name of equality, in the name of fair dealing between citizens of every section of this country, let us extend it throughout the entire United States. [Applause.]

[Here the gavel fell.]

Mr. SCRUGHAM. Mr. Speaker, I yield 15 minutes to the gentleman from Washington [Mr. SAMUEL B. HILL].

Mr. SAMUEL B. HILL. Mr. Speaker and Members of the House, there has been a great deal of misinformation about these amendments. The subject matter in these two amendments, numbered 53 and 54, should have been in the Interior appropriation bill in the House. That is where it belongs. But we Members of the West had no voice in the matter of its not being in there. My understanding was at the time that they were not considered by the Appropriations Committee on the Department of the Interior bill because Dr. Mead, the Commissioner of Reclamation, was ill and unable to appear before the committee. But it was thought that if the matter were permitted to go over to the time of the consideration of the second deficiency bill that Dr. Mead would be able to be present and testify in justification of these projects. That was the reason given me why it was not considered by the Appropriations Committee of the House when it had the Interior appropriation bill before it.

Mr. TABER. Will the gentleman yield?

Mr. SAMUEL B. HILL. No; I cannot yield. We are not responsible for the position in which we find ourselves with reference to these Senate amendments. These projects have come back here in Senate amendments on the Interior appropriation bill, the bill in which they should have been incorporated by the House committee.

It would have been entirely satisfactory to have had the matter considered by the House committee on the deficiency bill, but again we had no voice in it. We are not responsible for the condition in which it is today. It certainly belongs in the Interior appropriation bill and it is there now and we are meeting it as best we can.

Something was said by the gentleman from Texas [Mr. BUCHANAN] to the effect that there were no hearings on the bill. The gentleman is mistaken. There were hearings. I attended and testified at the hearings and many Members of the House attended those hearings. I saw the gentleman from Texas sitting in with the committee when these amendments were brought back from the Senate incorporated in the bill.

There were extensive hearings on these Senate amendments which have been available to every Member of the House. I have a copy now in my hand. It is this booklet which contains the hearings on the two Senate amendments by the House subcommittee handling the Interior appropriation bill.

Now, in the short time I have, I want to tell you something about the projects in a cursory way because my time is limited.

It is true that under amendment 53 certain projects are to be authorized and under Senate amendment 54 these projects are included with others that have been specifically authorized by Congress.

I want to make it plain, too, that every one of the projects in Senate amendments 53 and 54 had the approval of the Bureau of the Budget, except the Grand Lake project in Colorado.

Here is a brief statement of the record as to the institution of these various projects:

The Gila project, Arizona, was authorized in the Boulder Canyon Project Act of December 21, 1928.

The Salt River project, Arizona, was authorized under the general provisions of the reclamation law in the act of June 17, 1902, and supplemental acts.

The Central Valley project, California, was authorized in section 1 of the Emergency Relief Appropriation Act of April 8, 1935.

Construction was authorized by the President's allocation under section 1 of the Emergency Relief Appropriation Act of April 8, 1935. Investigations also were carried on with reclamation funds.

Owyhee project, Oregon, authorized under general provision of reclamation law, act of June 17, 1902, and supplemental acts.

Grand Coulee Dam project, Washington, under act of August 30, 1935. I will have something further to say on that a little later. This authorization was under section 2 of the act of August 30, 1935.

Columbia Basin project, Washington; economic surveys and investigations; surveys authorized by President's allocation under section 1 of Emergency Relief Appropriation Act of April 8, 1935.

Yakima project, Washington (Roza division), authorized under the general provisions of the reclamation law, act of June 17, 1902.

Provo River project, Utah; construction authorized by allotment made under sections 201 and 202 of National Industrial Recovery Act of June 16, 1933; continued under President's allocation under section 1 of Emergency Relief Appropriation Act of April 8, 1935. Investigated with reclamation funds.

Casper-Alcova project, Wyoming; construction authorized by allotment made under National Industrial Recovery Act of June 16, 1933; continued under President's allocation from Emergency Relief Appropriation Act of April 8, 1935.

Riverton project, Wyoming; under the general provisions of the Reclamation Act.

Shoshone project, Wyoming; under the general provisions of the reclamation law.

Grand Lake-Big Thompson transmountain diversion, Colorado, as I understand, has no authorization; surveys authorized by allotment made under National Industrial Recovery Act of June 16, 1933.

Those are the sources of authority for the beginning of these projects. Work has begun on all of them, with the possible exception of one or two, and they are a part of the President's public-works program.

Now, what is going to be the cost? Here is a statement made up from the record and checked for accuracy, and it shows that instead of costing one and a half billion dollars they will cost less than $800,000,000, at the outside figure, or approximately $800,000,000 below what my friends on the Republican side have been telling you they would cost.

For the benefit of those who may want to scrutinize the matter further, I ask unanimous consent, Mr. Speaker, to put this statement in the RECORD as a part of my remarks.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The matter referred to is as follows:

Interior Department appropriation bill, fiscal year 1937

UNITED STATES RECLAMATION PROJECTS NOT HERETOFORE CONSIDERED BY CONGRESS AND AUTHORIZED TO BE CONSTRUCTED BY SENATE AMENDMENT NO. 53

Project	Estimated total cost	Available from relief appropriation allocation	Appropriation for fiscal year 1937	Balance necessary to complete
Central Valley, Calif.	$170,000,000	$15,000,000	$16,000,000	$139,000,000
Carlsbad, N. Mex.	2,500,000	1,000,000	900,000	600,000
Deschutes, Oreg.	1,065,000	565,000	450,000	50,000
Provo River, Utah	10,000,000	3,260,000	1,750,000	4,990,000
Yakima, Wash. (Roza Division)	14,446,600	6,813,000	2,500,000	5,133,600
Casper-Alcova, Wyo.	20,000,000	15,000,000	4,000,000	1,000,000
Total	218,011,600	41,638,000	25,600,000	
Total future commitments				150,773,600
Grand Lake-Big Thompson	22,000,000			22,000,000
Total				172,773,600

Interior Department appropriation bill, fiscal year 1937—Continued

CONTINUATION OF CONSTRUCTION ON UNITED STATES RECLAMATION PROJECTS AUTHORIZED BY LAW

Project	Estimated total cost	Heretofore appropriated or available from relief appropriation allocations	Appropriation for fiscal year 1937	Balance necessary to complete
Gila, Ariz.	$20,500,000	$2,075,000	$2,500,000	$15,925,000
Salt River, Ariz.	6,844,000	3,500,000	2,300,000	1,044,000
Grand Valley, Colo.	200,000		200,000	
Boise, Idaho	5,800,000	1,900,000	1,800,000	2,100,000
Boise (drainage)	200,000	40,000	160,000	
Owyhee, Oreg.	18,000,000	17,000,000	400,000	600,000
Riverton, Wyo.	8,670,000	4,900,000	900,000	2,870,000
Shoshone, Wyo.	6,500,000	1,500,000	1,000,000	4,000,000
Columbia Basin surveys (Washington) [1]	1,500,000	250,000	250,000	1,000,000
Grand Coulee Dam, Wash.	60,000,000	35,000,000	20,000,000	5,000,000
Total	128,214,000	66,165,000	29,510,000	
Total future commitments				32,539,000
Additional cost of high dam at Grand Coulee	58,575,000			
Grand Coulee power development, not authorized	67,425,000			
Total	126,000,000			

[1] The Columbia Basin project has not been authorized by law but surveys are authorized.

Mr. SAMUEL B. HILL. I also want to put in the RECORD a statement, a part of which I have read from, and I ask unanimous consent that that may be inserted as a part of my remarks.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

The statement referred to is as follows:

DEPARTMENT OF THE INTERIOR—BUREAU OF RECLAMATION

Information regarding projects included in Senate Appropriation Committee's amendment to H. R. 10630

State and project	Expended and obligated	Total estimated cost	Legislative authority
Gila project, Arizona	$6,624	$10,500,000	Boulder Canyon Project Act of Dec. 21, 1928 (45 Stat. 1057).
Salt River project, Arizona.	13,040,233	18,744,000	General provisions of reclamation law. Act of June 17, 1902 (32 Stat. 388), and supplemental acts.
Central Valley project, California.	37,400	170,000,000	Sec. 1 of Emergency Relief Appropriation Act of Apr. 8, 1935.
Grand Valley project, Colorado.	$5,017,500	$5,217,500	General provisions of reclamation law. Act of June 17, 1902 (32 Stat. 388), and supplemental acts.
Boise project, Idaho: Payette division	16,326,327	22,580,000	Do.
Drainage			Do.
Carlsbad project, New Mexico.	2,237,985	3,904,650	Do.
Deschutes project, Oregon.[1]	55,385	1,065,000	Surveys authorized by allotment under secs. 201, 202 of National Industrial Recovery Act of June 16, 1933. Construction by President's allocation under sec. 1 of the Emergency Relief Appropriation Act of Apr. 8, 1935. Investigations also carried on with Reclamation funds.
Owyhee project, Oregon.	15,334,948	18,000,000	General provision of reclamation law. Act of June 17, 1902 (32 Stat. 388), and supplemental acts.
Grand Coulee Dam project, Washington.	39,370,550	63,000,000	Sec. 2 of act of Aug. 30, 1935 (49 Stat. 102).
Columbia Basin project, Washington, economic surveys and investigations.	43,200		Surveys authorized by President's allocation under sec. 1 of Emergency Relief Appropriation Act of Apr. 8, 1935.
Yakima project, Washington (Roza division).	3,828,200	14,446,600	General provisions of reclamation law. Act of June 17, 1902 (32 Stat. 388), and supplemental acts.
Provo River project, Utah.	87,723	10,000,000	Construction authorized by allotment made under secs. 201 and 202 of National Industrial Recovery Act of June 16, 1933; continued under President's allocation under sec. 1 of Emergency Relief Appropriation Act of Apr. 8, 1935. Investigated with Reclamation funds.

[1] Estimated cost stated is for construction of storage for supplemental water for lands now under irrigation. Bill has been proposed by Senator Steiwer for irrigation of lands in the north unit, which will require approximately $6,000,000.

DEPARTMENT OF THE INTERIOR—BUREAU OF RECLAMATION—continued

Information regarding projects included in Senate Appropriation Committee's amendment to H. R. 10630—Continued

State and project	Expended and obligated	Total estimated cost	Legislative authority
Casper-Alcova project, Wyoming.	$7,620,217	$20,000,000	Construction authorized by allotment made under National Industrial Recovery Act of June 16, 1933; continued under President's allocation from Emergency Relief Appropriation Act of Apr. 8, 1935.
Riverton project, Wyoming.	4,819,216	8,670,000	General provisions of reclamation law. Act of June 17, 1902 (32 Stat. 388), and supplemental acts.
Shoshone project, Wyoming.	635,580	6,500,000	General provisions of reclamation law. Act of June 17, 1902 (32 Stat. 388), and supplemental acts.
Grand Lake, Big Thompson transmountain diversion, Colorado.	66,500	25,000,000	Surveys authorized by allotment made under National Industrial Recovery Act of June 16, 1933.

Mr. SAMUEL B. HILL. In this statement it is shown what the estimated cost is, what the moneys already allocated are, what the proposed appropriations for the fiscal year 1937 are, and the balance necessary to complete the projects. As I say, it will cost less than $800,000,000, and that over a period, in the instance of the larger projects, of 40 years. We are not going to build these projects tomorrow. This money is to be spread out over a term of years, anywhere from 6 to 40 years. There is nothing frightening about that.

Now, I want to refer to a few statements made by the distinguished gentleman from Texas, chairman of the Committee on Appropriations [Mr. BUCHANAN]. He says he is a friend of reclamation. That was his opening statement. But he is in favor of reclamation, provided you do not reclaim anything. He is in favor of reclamation, provided you do not spend any money to reclaim land, according to his qualifying statement. He seemed to make the Grand Coulee project his pet aversion. He says it has not been authorized. In this he is also in error. I desire to call attention to section 2 of the river and harbor act enacted August 30, 1935. This is the language:

> That for the purpose of controlling floods, improving navigation, regulating the flow of the streams of the United States, providing for storage and for the delivery of the stored waters thereof, for the reclamation of public lands and Indian reservations, and other beneficial uses, and for the generation of electric energy as a means of financially aiding and assisting such undertakings, the projects known as Parker Dam on the Colorado River and Grand Coulee Dam on the Columbia River, are hereby authorized and adopted, and all contracts and agreements which have been executed in connection therewith are hereby validated and ratified. * * *

Can language be more emphatic or more comprehensive in conferring authority for the Grand Coulee project? At the time that ratification and authorization were made, to wit, August 30, 1935, the contract for the construction of the Grand Coulee Dam had been changed, under authority by the Secretary of the Interior from a low-dam structure to a high-dam structure, and that project is now being built on a high-dam basis, a basis of 500 feet, which would be absolutely necessary for a high dam, and would not be in conformity with the plans and specifications of a low dam.

It was that contract as modified by the Secretary of the Interior that was ratified in this act of 1935, the river and harbor bill. This is just one of the errors of the gentleman from Texas. I know he did not intend to make it. I have the utmost regard for him, and I know he did not mean to make this mistake, but I have told you what the situation is.

Who is going to pay back this money? Every economist who has been employed on this project, every report of the engineers who have investigated the project, both of the War Department and the Interior Department, say that this is a feasible project, not only from the standpoint of engineering but from a financial standpoint. They say this dam will generate 2,500,000 horsepower of electricity, which can be sold for 2½ mills per kilowatt-hour for the firm power at the bus board. In addition, it will generate secondary power which can be sold at one-half of 1 mill per kilowatt-hour. You ask where we are going to get a market for this power. Mr. Page testified, and the record so shows, that within 10 years all this power would be absorbed; and the testimony of every economist and expert who has testified on the subject is that within 15 years not only would all the power of the Grand Coulee Dam be absorbed, but it was their most conservative estimate that at the end of 15 years the demand for additional power in the Pacific Northwest area would be at least twice that provided by the Grand Coulee Dam. There can be no question about a market for the power.

Let me remind you, furthermore, that when the Government builds the Grand Coulee Dam and the power plants, the Government will own the property. This property not only will pay back its cost, but after the cost is paid it will pay into the Treasury $15,000,000 a year in net revenue. It will pay for itself in 30 years; and in 40 years' time there will be a surplus of $168,000,000. It will not only pay for itself but it will continue to return to the Treasury for all time to come at least $15,000,000 a year. In addition to that, the reclamation connected with the project in the course of 40 years will not only repay its share of the cost but will create wealth that will put into the Treasury of the United States $10,000,000 a year in additional income taxes, money the Government is not now getting. The part I want to emphasize is that this dam and power plant will belong to the United States Government and will pay for itself over and over again.

The Grand Coulee Dam has been under construction for about 2 years. It is actually being built.

There has been allocated to this work—that is, for dam construction at the Grand Coulee project—$35,000,000. The first $15,000,000 was under the Public Works Act, and the additional $20,000,000 was under the Emergency Relief Act appropriation, and that was an additional amount for carrying on the work that had been begun.

Contracts have been let. The main contract for the construction of the dam has been let for $29,340,000 without materials. The Bureau of Reclamation, as the agent of the Government, is buying all the materials that go into the dam, and a total of $60,000,000 has been either expended or obligated. That is the condition we have as to the contractual obligations of the Government in connection with this work.

The work is under way. A company, that we refer to for brevity as the M. W. A. K. Co., a combination of four construction companies that joined together for the purpose of bidding on this contract, is now engaged in the construction of the dam at Grand Coulee. They have projected their work to the point where they have cofferdams on both the east and west sides of the main stream of the river—that is, the shore ends of the dam—and they have excavated down to bedrock on both shore ends of the dam.

On the west side of the river they have carried the excavation to the point where they are actually pouring concrete and have been doing so for several months. So the dam is being built, the concrete is being put into the foundation of the dam.

At the east of the dam, on the east side of the river, there is a cofferdam work which is in progress, and the excavation is very far along on that end of the dam. It will be necessary to put in one additional cofferdam when the shore ends of the dam are built up to the point where they can, through openings, let the water of the river run out through the ends of the projected dam, and it will be necessary to put a cofferdam across the stream of the river and excavate that for the purpose of building that section of the dam.

The work has progressed to the point where they are several months ahead of the time estimated for the progress of the work.

Now, of course, it has been necessary, in getting ready for this work and get the materials in there, that the Bureau of Reclamation expend large sums of money. They have built a railroad of about 30 miles in length, leading from the Northern Pacific line up to the dam site. They

have built a bridge across the river, and many other expenditures have been made.

It will take probably 6 or 8 years to complete the entire structure. This is the first unit of the dam.

The contract now being executed is for the first unit of the dam structure.

When this dam is completed to its ultimate height it will increase the depth of the flow in the river which is immediately below the dam 6.9 feet, or approximately 7 feet, thus deepening the channel for navigation. About 100 miles below the dam it will increase the depth of the flow 5½ feet, and on down farther on the river at The Dalles, it will increase the depth of the flow 4.4 feet. It will increase the depth of the flow below the Bonneville Dam 3 feet.

I give you those figures so you may understand what it means for the navigation of the river. Ocean-going vessels at this time come up the Columbia River from the mouth as far as Portland, and above Portland, but they have to keep dredging the river in order to keep the channel open for the ocean-going vessels. This will aid, to the extent of 3 feet, the navigability of the river below the Bonneville Dam, and will improve navigation above Bonneville as indicated above.

The Grand Coulee Dam is the key structure for the development of the Columbia River. This dam will create a reservoir 150 miles long, extending clear back to the Canadian line and will so stabilize the flow of the water below that dam and that reservoir as to increase the potential firm electrical power at every proposed dam below it 100 percent, as far down as the Snake River, over what can otherwise be generated.

Below the mouth of the Snake River it will increase the firm power of electric energy to be generated at all dam sites below, including the Bonneville, 50 percent; and from the standpoint of power development and from the standpoint of navigation this improvement is justified. The Grand Coulee Dam will create a storage of more than 5,000,000 acre-feet.

And it follows, of course, that the holding back of these waters in the great reservoir behind the Grand Coulee Dam, extending back to the Canadian line, will control flood conditions in the river.

The engineers of the Reclamation Service have made a number of surveys at different times over a period of 15 or 20 years, and even further back than that, and they have studied closely the reports of the War Department Engineers and every engineering report that has been made upon this proposition in reference to the Columbia River Basin project pronounces the project feasible, not only from an engineering standpoint, but from a financial and an economic standpoint. There is no question about the feasibility of it from all of those standpoints, and all engineers have agreed upon that proposition.

There is no question about the feasibility of this project, and there is no question but that the money will be paid back. It is not going to put land under reclamation next year, or within 5 or 6 years. It will be at least 12 years before they will have any lands under reclamation, and then only a small portion. It will be 40 or 50 years before all of it will be under reclamation.

I could give you further details to show the desirability of this project, but have not time to do it. The fact is that we are not bringing an area of raw lands into cultivation. These lands have all been homesteaded. All of the tillable lands have been farmed, but on account of insufficient moisture for dry-farming operations these lands cannot be profitably farmed without irrigation. We must have this irrigation in order to take that land out of the marginal class and put it into the productive class so as to insure a living to those who farm it. [Applause.]

[Here the gavel fell.]

The SPEAKER. Time for debate on these amendments has expired. The question is on the motion to recede.

Mr. BUCHANAN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BUCHANAN. Mr. Speaker, would it be in order to request the Chair to state the motion plainly and the effect of a vote one way or the other?

The SPEAKER. The Chair cannot state the effect of the vote, but the Chair will be glad to state the proposition that is before the House.

Mr. BUCHANAN. A further parliamentary inquiry, if the Chair will permit.

The SPEAKER. The gentleman will state it.

Mr. BUCHANAN. The gentleman from Colorado [Mr. TAYLOR] moved to recede and concur with an amendment. On that motion I demanded a division. On the question to recede a vote "no" is equivalent to the House insisting upon its position.

The SPEAKER. The gentleman is correct.

The question is on the motion of the gentleman from Colorado that the House recede from its disagreement to the amendment of the Senate no. 53.

The question was taken; and on a division (demanded by Mr. TAYLOR of Colorado) there were—ayes 70, noes 113.

So the motion to recede was rejected.

Mr. BUCHANAN. Mr. Speaker, I move that the House further insist on its disagreement to the amendment of the Senate no. 53.

The SPEAKER. The question is on the motion of the gentleman from Texas that the House further insist on its disagreement to the amendment of the Senate no. 53.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment no. 54. Page 76, immediately following amendment no. 53, insert:

"For continuation of the following projects in not to exceed the following amounts, respectively, to be expended in the same manner and for the same objects of expenditure as specified for projects included in the Interior Department Appropriation Act for the fiscal year 1937 under the caption 'Bureau of Reclamation', and to be reimbursable under the reclamation law.

"Gila project, Arizona, $2,500,000;
"Salt River project, Arizona, $2,300,000;
"Central Valley project, California, $16,000,000;
"Grand Valley project, Colorado, $200,000;
"Boise project, Idaho, Payette division, $1,800,000;
"Boise project, Idaho, drainage, $160,000;
"Carlsbad project, New Mexico, $900,000;
"Deschutes project, Oregon, $450,000;
"Owyhee project, Oregon, $400,000;
"Grand Coulee Dam project, Washington, $20,000,000;
"Columbia Basin project, Washington, economic surveys and investigations, $250,000;
"Yakima project, Washington, Roza division, $2,500,000;
"Provo River project, Utah, $1,750,000;
"Casper-Alcova project, Wyoming, $4,000,000;
"Riverton project, Wyoming, $900,000;
"Shoshone project, Wyoming, Heart Mountain division, $1,000,000;

"For administrative expenses on account of the above projects, including personal services and other expenses in the District of Columbia and in the field, $2,500,000; in all, $57,610,000, to be immediately available: *Provided*, That this appropriation shall be available for the employment of personal services without regard to the civil-service laws and the Classification Act of 1923, as amended: *Provided further*, That of this amount not to exceed $160,000 may be expended for personal services in the District of Columbia."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House further insist upon its disagreement to the amendment of the Senate no. 54.

The SPEAKER. The question is on the motion of the gentleman from Colorado.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment no. 56: Page 79, line 14, insert "which amount shall be available for personal services in the District of Columbia (not to exceed $15,000) and in the field without regard to the civil-service laws and the Classification Act of 1923, as amended."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

Mr. SNELL. Mr. Speaker, I think the gentleman from Colorado should tell us the effect of the provision with regard to civil service carried in this amendment. None of us

have copies of the amendments. I think the gentleman should tell us what it means, so that we may know what we are doing.

Mr. TAYLOR of Colorado. The object of this amendment of the Senate is to permit the Reclamation Service to carry on the work of building the All-American Canal by exempting the employees engaged in constructing the canal from the Classification Act and the civil-service laws. Otherwise it would cost a great deal more. They tell us it is not feasible to put these employees under civil service because they are largely day laborers, and it would not be economical or feasible to attempt to set up a civil-service register and give these employees a civil-service status.

Mr. SNELL. What explanation was given before the committee, or what evidence was given to show that it was not practical to take these men from the civil-service lists?

Mr. TAYLOR of Colorado. It is mostly day labor and manual work, not covered in the classified service. It is not civil-service work. It is a matter of relief, very largely.

Mr. SNELL. Is it relief for the general public or just relief for Democratic job hunters?

Mr. TAYLOR of Colorado. It is relief for thousands of day laborers who will be employed.

Mr. SNELL. Does this provision apply only to day laborers?

Mr. TAYLOR of Colorado. It applies, as I understand it, to practically all who may work on the canal.

Mr. SNELL. As I understand, it applies to everybody, including clerical help, and if there is any reason why clerical help should not come under the civil service I should like to have someone get up here and state it.

Mr. TAYLOR of Colorado. About 90 percent of this work is day labor.

Mr. SNELL. These laborers may be exempted, but the rest should be put under the civil service, as the President said they should be.

Mr. TAYLOR of Colorado. It was felt that it was not practical to do that, and we followed the wish of the Senate in that regard.

Mr. SNELL. Let us have a vote and find out about it.

The SPEAKER. The question is on the motion of the gentleman from Colorado [Mr. TAYLOR] to recede and concur in the Senate amendment.

The question was taken; and on a division (demanded by Mr. SNELL) there were—ayes 99, noes 60.

So the motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment no. 83: Page 104, after line 7, insert:

"Appomattox Court House National Historical Monument, Va.: For development and improvement in accordance with the provisions of the act approved August 13, 1935 (49 Stat. 613), to remain available until expended, $100,000: *Provided*, That no part of this appropriation shall be available for expenditure until title to the land is acquired by the United States."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment.

Mr. TABER. Mr. Speaker, will the gentleman yield for a question?

Mr. TAYLOR of Colorado. I yield to the gentleman from New York.

Mr. TABER. Mr. Speaker, this calls for the expenditure of $100,000 for a monument at Appomattox Court House. I do not think we ought to have any more monuments built right now, in view of the condition of the Treasury.

Mr. TAYLOR of Colorado. Mr. Speaker, I may say this has been authorized by a special act of Congress and is simply carrying out a law that the House of Representatives and Senate have previously passed. It is in commemoration of a great historical event, and I feel it would be wrong to refuse to carry out the law.

Mr. KNUTSON. Will the gentleman yield?

Mr. TAYLOR of Colorado. I yield to the gentleman from Minnesota.

Mr. KNUTSON. The gentleman from New York [Mr. TABER] states that we should not have any more monuments built. I think we should have a monument erected to designate the place where the Treasury used to be. [Laughter.]

The SPEAKER. The question is on the motion of the gentleman from Colorado [Mr. TAYLOR] to recede and concur in the Senate amendment.

The question was taken; and on a division (demanded by Mr. TABER) there were—ayes 84, noes 48.

So the motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment no. 87: Page 111, after line 18, insert:

"For making surveys, studies, investigations, and reports regarding public, school, college, university, and other libraries; fostering coordination of public and school library service; coordinating library service on the national level with other forms of adult education; developing library participation in Federal projects; fostering Nation-wide coordination of research materials among the more scholarly libraries, inter-State library cooperation, and the development of public, school, and other library service throughout the country, and for the administrative expenses incident to performing these duties, including salaries of such assistants, experts, clerks, and other employees in the District of Columbia and elsewhere, as the Commissioner of Education may deem necessary, necessary traveling expenses, including attendance at meetings of educational associations, societies, and other organizations, purchase of miscellaneous supplies, equipment, stationery, typewriters, and exchange thereof, postage on foreign mail, purchase of books of reference, law books, and periodicals, printing and binding, and all other necessary expenses, $40,000."

Mr. TAYLOR of Colorado. Mr. Speaker, I move that the House recede and concur in the Senate amendment with an amendment.

The Clerk read as follows:

That the House recede from its disagreement to the amendment of the Senate no. 87 and agree to the same with an amendment as follows: "In lieu of the sum named in said amendment insert $25,000."

The motion was agreed to.

A motion to reconsider the votes by which the various motions offered in the consideration of the conference report were agreed to was laid on the table.

COLLECTION OF REVENUE ON INTOXICATING LIQUOR

Mr. COOPER of Tennessee. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked for by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection; and the Chair appointed the following conferees: Mr. SAMUEL B. HILL, Mr. CULLEN, Mr. BUCK, Mr. TREADWAY, and Mr. CROWTHER.

DEPARTMENT OF THE INTERIOR APPROPRIATION BILL—HELP THE FARMER—DEFEAT PROJECTS THAT WILL INCREASE PRODUCTION

Mr. COCHRAN. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COCHRAN. Mr. Speaker, Congress is not going to adjourn, if it listens to the President, until a tax bill is passed which will enable the administration to balance the normal Budget. Our trouble has always been that as soon as provisions are made to balance the Budget, Congress finds a way to unbalance it. A striking example is this appropriation bill. If the amendments of the Senate prevail the Budget is not going to be balanced unless at least $60,000,000 is added to the amount already requested by the President? Why? Because two Senate amendments which we are to vote on today call for appropriations for the next fiscal year of $60,870,500, which is above the recommendations of the Bureau of the Budget.

What was the purpose of enacting the Budget law? It was to keep our expenditures in normal times within the

receipts of the Government. We are not considering or talking about relief appropriations now but we are talking about the regular, or normal, expenditures of the Government.

The bill went to the Senate in excellent condition. The report of the House Committee on Appropriations—subcommittee on the Interior Department bill—shows it carried an amount $1,721,111.70 below the amount the Director of the Budget said would be available during the next fiscal year to carry on the activities of the Department of the Interior. What happened in the Senate? There were 91 amendments, the great majority carrying increases in the appropriation. The conferees have agreed on all of the amendments but a few, and in reaching an agreement, if it was not for three items, amendments 24, 53, and 54, we would still be within the Budget estimates but above the amount the bill carried when passed by the House.

The first large item is $3,710,500 for construction, repair, and rehabilitation of irrigation systems on Indian reservations. To one who reads of this item and does not fully understand its meaning there would be no cause for great alarm, but when the taxpayers know that the ultimate cost of completing the 13 projects provided for in 13 different States is $26,900,000, then they will realize just what the Senate has done. This appropriation of less than $4,000,000, in other words, is the starter, and the finish will come in future years when the balance of the $26,900,000 is appropriated.

This, however, is but a drop in the bucket as compared with amendments 53 and 54. Those amendments provide for an immediate appropriation for the next fiscal year of $57,160,000, as well as an authorization for construction of seven reclamation projects; the total cost to complete is admitted by the subcommittee to be $703,000,000. This means that in years to follow you will be compelled to appropriate millions of dollars until the full amount of $703,000,000 has been taken from the Treasury or the seven projects will not be completed.

You all know that in projects of this kind whenever they are started they are completed. Just start them with legislation of this character and next year the item will not be subject to a point of order, and if the committee is hostile any Member can offer an amendment from the floor. The two big projects are the Central Valley California project, for which the item provides $16,000,000, and the Grand Coulee Dam project, in the State of Washington, for which $20,000,000 is set aside for 1 year only.

Mr. Speaker, the purpose of these improvements is to make land suitable for agricultural purposes. If one will read the organic act creating the Department of Agriculture he will find this Department was created for the purpose of promoting agriculture in its broadest sense. By the elimination of pests preying upon agricultural products, by extension work and research, the Department is expected to show the farmer how to raise better crops, cattle, and so forth, as well as increase the yield. This year the agriculture bill carried about $50,000,000.

Here we have a great scientific department that has been of immense value to the farmers of the country. It is impossible to estimate its value in dollars and cents, but the Department has showed the farmer not only how to raise better crops but has greatly increased production—in fact, production increased to such an extent that it directly affected the price of what the farmer produced, there being a great surplus, the supply being far in excess of the demand, with the result that the price of agricultural projects declined. To meet this situation we passed the A. A. A., and when the Supreme Court declared that act unconstitutional we passed the soil-conservation and domestic-allotment plan, the purpose of which was to conserve land against depletion by planting soil-building crops. By diverting the land to soil-building crops we would automatically reduce production, which meant a reduction of the surplus and a better price for that which the farmers produced. The appropriation for that purpose was $450,000,000. The farmers who agreed to follow this plan would be reimbursed so much per acre for planting soybeans, grass, and so forth, instead of corn, wheat, and so forth.

Here we have appropriations of $500,000,000, about $50,000,000 to show the farmers how to raise better and more crops, and $450,000,000 to help the farmer reduce his yield. It just does not sound right. But what happens if we pass these amendments? The completion of the projects inserted by the Senate, and which we will vote on today, means that millions and millions of new land will be open for agricultural purposes. If we are going to reduce the surplus by paying farmers to take land out of cultivation, how can we justify the expenditure of nearly a billion dollars to provide more land to raise additional crops? Why, in the end there is but one answer; we are but further increasing the surplus, and we will destroy the farmers of the country, who are now so hard pressed, and who for years, or until the passage of the laws I referred to, were unable to secure even the cost of production for their crops and cattle, and so forth.

I want to help the farmer, and it seems to me that every friend of the farmer in this House should vote down the Senate amendments. By so doing we will be protecting the men whom we all have been so anxious to assist. If production was below the demand, then I would say, yes, let us find new land to raise more crops, but that situation does not exist. It is just the reverse. I feel every farmer in this country who is deep in debt will be grateful to those who will vote down the Senate amendments.

COINAGE OF 50-CENT PIECES IN COMMEMORATION OF SIR WALTER RALEIGH'S COLONY

Mr. WARREN. Mr. Speaker, I ask unanimous consent for the present consideration of the bill (H. R. 12799) to authorize the coinage of 50-cent pieces in commemoration of the three hundred and fiftieth anniversary of Sir Walter Raleigh's Colony on Roanoke Island, N. C., known in history as the "Lost Colony", and the birth of Virginia Dare, the first child of English parentage to be born on the American Continent, and her baptism.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mr. SNELL. Mr. Speaker, reserving the right to object, if we have a few more of these bills I am going to make a speech in favor of every one of them. I have been overruled so many times that I will not object to this one.

Mr. RICH. Mr. Speaker, reserving the right to object, I may say to the gentleman from North Carolina that this is the thirty-fifth bill that has been presented to Congress requesting the coinage of silver money for some kind of a show. I think we have begun the Democratic administration's inflation measure through this channel. I believe the Democrats ought to be careful now that they do not do something they will be sorry for.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That in commemoration of the three hundred and fiftieth anniversary of Sir Walter Raleigh's colony on Roanoke Island, N. C., known in history as the Lost Colony, and the birth of Virginia Dare, the first child of English parentage to be born on the American Continent, and her baptism, there shall be coined at a mint of the United States to be designated by the Director of the Mint not less than 25,000 silver 50-cent pieces of standard size, weight, and composition and of a specially prepared design to be fixed by the Director of the Mint, with the approval of the Secretary of the Treasury, but the United States shall not be subject to the expense of making the necessary dies and other preparations for this coinage.

SEC. 2. The coins herein authorized shall bear date 1937, irrespective of the year in which they are minted or issued, shall be legal tender in any payment to the amount of their face value, and shall be issued only upon the request of the Roanoke Colony Memorial Association of Manteo, N. C., upon payment by it of the par value of such coins, but not less than 25,000 such coins shall be issued to it at any one time, and no such coins shall be issued after July 1, 1937. Such coins may be disposed of at par or at a premium by the Roanoke Colony Memorial Association of Manteo, N. C., and the net proceeds shall be used by it in defraying the expenses incidental and appropriate to the commemoration of such event.

SEC. 3. All laws now in force relating to the subsidiary silver coins of the United States and the coining or striking of the same, regulating and guarding the process of coinage, providing for the

purchase of material, and for the transportation, distribution, and redemption of coins, for the prevention of debasement or counterfeiting, for the security of the coins, or for any other purposes, whether such laws are penal or otherwise, shall, so far as applicable, apply to the coinage herein authorized.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

EXTENSION OF REMARKS

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to include in the remarks previously made by me this afternoon a letter from the Secretary of State about Japanese competition.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

CONFERENCE REPORT—INTERIOR DEPARTMENT APPROPRIATION BILL

Mr. WIGGLESWORTH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include therein a table prepared by the Department of Agriculture applicable to the discussion today.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. WIGGLESWORTH. Mr. Speaker, support of amendments nos. 53 and 54 is impossible. Taken together, the two amendments contemplate the expenditure of further and enormous sums of money for a reclamation program in the Far West without precedent. They contemplate this expenditure running into hundreds of millions, if not billions, of dollars despite the fact that the Treasury is confronted by unparalleled deficits. They contemplate a great increase in available acreage for crops running into hundreds of thousands, if not millions, of acres despite the fact that we are spending vast sums to bring about a material reduction in acreage available for crops. Furthermore, no opportunity is afforded for proper consideration of either amendment.

Amendment no. 53 is in reality seven amendments in one. It contemplates the authorization of seven great reclamation projects not heretofore authorized. We are compelled to approve or disapprove of these seven amendments as a unit.

Amendment no. 54 is in reality 16 amendments in one. It contemplates the appropriation of almost $60,000,000 for 16 separate reclamation projects. We are compelled to vote for or against all 16 appropriations as a unit.

We are asked to authorize seven great projects, no one of which has received consideration by any legislative committee of either House, no one of which can be subjected at this time to individual consideration on its merits.

We are asked to appropriate $57,610,000 for 16 great projects, in respect to the ultimate cost of which there appears to be no accurate information. The lowest estimate submitted amounts to some $700,000,000. It seems more probable that the figure will prove to be at least a billion and a half dollars.

Under our reclamation policy, some 4,000,000 acres of land have been made available for cultivation. Some $2,000,000,000 worth of crops have been harvested on this land. In no State directly affected by the proposed projects is there anything like a 100-percent utilization of land available for crops. The following table, furnished by the Acting Secretary, Department of Agriculture, indicates the figures employed by the Department in respect to land utilization for each of the States in question in 1934:

	Arizona	California	Colorado	Idaho	New Mexico	Oregon	Utah	Washington	Wyoming
1934									
Crops harvested—acres	488,685	6,578,724	3,852,348	2,668,685	743,840	2,831,742	814,854	3,635,796	1,220,354

Percentage the land under cultivation was of the land available for crops	63.5	60.5	62.2	69.7	37.0	63.2	68.8	55.4	51.5

The utilization in one instance—New Mexico—is less than 38 percent.

Nevertheless, the program contemplated would make available for cultivation or increased cultivation hundreds of thousands, if not millions, of acres of land. The Bureau of Reclamation uses the figure 1,200,000 acres. The additional acreage would frequently be made available at an excessive cost per acre and despite the fact that we have been spending about a half billion dollars a year under the Agricultural Adjustment Act and the so-called Soil Erosion Act to take from thirty to thirty-five millions of acres out of cultivation.

Testifying recently before the independent offices appropriation subcommittee of the House, Mr. Chester A. Davis, former Administrator of the Agricultural Adjustment Administration, suggested that for every additional acre brought into cultivation an acre should be taken out of cultivation.

The enormous expenditure involved in the program can only be appreciated by study of the individual items.

The Grand Coulee project, in Washington, for example, in respect to which an additional appropriation of $20,000,000 is requested, involves an ultimate expenditure, now estimated by the Reclamation Bureau as amounting to $389,000,000. I am advised that the Board of Engineers has estimated the cost in the past at some $711,000,000. The project had strong opposition for years. It appears to be indefensible as an irrigation project. Justification is urged in the light of anticipated power development which admittedly cannot be fully utilized for some 19 years to come.

The Central Valley project, in California, for which $16,000,000 is requested, involves an ultimate expenditure which has been estimated all the way from $170,000,000 to over $600,000,000, according to figures of the California State engineer. The original proposal contemplated State financing with Federal contribution to the extent of $12,000,000 for flood control and navigation. The present proposal contemplates financing in full by the Federal Government.

The Gila project, in Arizona, for which $2,500,000 is requested involves an ultimate expenditure estimated at $125,000,000. In the past the project has been strongly opposed by the Department of Agriculture due to conditions of soil and climate.

The Grand Lake-Big Thompson project in Colorado, for which authorization is requested involves an ultimate expenditure estimated at from twenty-five to fifty million dollars. This project involves a tunnel 12½ miles long under the Continental Divide, to carry some 361,000 acre-feet per year from the west to the east side of the Divide. Authorization is requested despite the fact that surveys have not yet been completed. Strong opposition has been presented by informed individuals and associations all over the country because of the cost involved, because of the damage to Rocky Mountain National Park and because of the departure from established National Park policy excluding commercial undertaking from all parks.

The Casper-Alcova project in Wyoming, in respect to which $4,000,000 is requested, contemplates an ultimate expenditure of $20,000,000. The project appears to be inde-

fensible as an irrigation project requiring some $600 per acre for additional land made available for cultivation. Justification is urged on the basis of charging a portion of the expenditure only to irrigation, the balance to power.

These are but examples. The cost is enormous. Detailed justification for major projects is lacking.

I am not opposed to reclamation—I realize fully from personal observation throughout the West the vital part that reclamation has played in the life of the Nation. But I am opposed to reclamation in the absence of demonstrated need and demonstrated feasibility. I am opposed to a procedure which denies consideration of individual reclamation projects—which compels consideration of 7 or 16 great projects as a unit. And I am opposed to a policy which proposes with one hand to make available hundreds of thousands, if not millions, of additional acres of land for cultivation while with the other hand it takes millions of acres of land out of cultivation.

To vote for amendments nos. 53 and 54 is to vote to commit the Federal Government to a gigantic reclamation program without proper consideration and without adequate justification at a time when we are still pursuing a policy of crop restriction, at a time when the Nation is confronted by an amazing deficit amounting to upwards of $6,000,000,000.

WHY A LIFELONG DEMOCRAT, A FORMER MEMBER OF THE UNITED STATES SENATE, CANNOT SUPPORT THE ADMINISTRATION

Mr. WIGGLESWORTH. Mr. Speaker, I also ask unanimous consent to extend my remarks in the RECORD and to include a short statement by former Senator Bruce, of Maryland.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. WIGGLESWORTH. Mr. Speaker, under leave granted to extend my remarks in the RECORD, and at the suggestion of the author, I include the following statement made in a letter addressed to the New York Sun by Hon. William Cabell Bruce, a lifelong Democrat and from 1923 to 1929 a distinguished Member of the United States Senate from the State of Maryland:

In his address last Thursday night at the State convention of the Young Democratic Clubs, Senator TYDINGS truly said, with reference to the next Presidential election: "There are only three courses open. We can support the Democratic ticket, we can support the Republican ticket, or we can take a walk."

Speaking for myself, as an individual Democrat, I wish to say that when Mr. Roosevelt comes up for reelection I shall certainly not "take a walk"; never, since I became old enough to vote, having failed to exercise the privilege of voting at a Presidential election or of frankly announcing, before I did so, for what Presidential candidate I intended to vote, I shall certainly, too, not cast my ballot for Mr. Roosevelt.

AGREES WITH FAMOUS DOCTOR

In my conception of him I have come around to the view held of him by one of the most famous physicians in the history of Baltimore, who before the last Presidential election said to me: "I have always been a Democrat, as you know, but I cannot vote for Roosevelt. I was frequently brought into contact with him at Harvard, and I just do not think that he has the practical sense to be President of the United States."

In my humble judgment Mr. Roosevelt as President has proved himself to be a shallow, impressionable, volatile man, inspired by good intentions and possessed of a very pleasing presence, but conspicuously deficient in all the higher qualifications for the office of President.

Therefore, pursuing Senator TYDINGS' alternatives, there is nothing for me to do except to vote at the next Presidential election for Mr. Roosevelt's Republican opponent; and this I expect confidently to do, for, be the latter's shortcomings what they may, it is inconceivable within the range of reasonable probability, as I see it, that they could produce such lamentable results as have marked the Presidential career of Mr. Roosevelt; that is to say, disregard of all the ordinary principles of prudential calculation and foresight in the field of Federal revenue and expenditure; inane and visionary industrial and social planning which, in several flagrant instances, has been held by the Supreme Court of the United States to have violated time-honored American principles of local self-government and individual freedom; loss of morale on the part of thousands of human beings, bred by extravagant and ill-conceived programs of governmental relief; the crackbrained vagaries of radical agitators, resolved to go Mr. Roosevelt one better; insurrectionary class prejudice and violence, such as only a day or so ago incited a labor leader in New York to threaten "to tear down" that city if the demands of his following were not conceded; the resuscitation on a vast scale of the detestable system of spoils politics in the province of the Federal Government which the Federal merit system of appointment, under the fostering care of Grover Cleveland and every subsequent President of the United States, Democratic or Republican, with the exception of Mr. Roosevelt, has done so much to rebuke and keep within bounds; and invasions of the legislative authority of Congress by Executive authority which lead directly in the end to the dictatorship of a Hitler, a Mussolini, or a Stalin.

BRINGS IN CLASSIC FABLE

When I think of the vast horde of subordinate officeholders, imposed by Mr. Roosevelt, with Mr. Farley at his elbow, on the Federal civil service, without the slightest heed to the salutary principle of nonpartisan, competitive examination, which governs appointments, covered by the Federal merit system of appointments, I cannot but recall the celebrated declaration of Lord Melbourne that he was partial to the English Order of the Garter because there was "no damned nonsense of merit" about it.

The classic fable tells us that no sooner had Phaeton received from his father the reins, with which the chariot of the Sun was controlled, than he betrayed his ignorance and incapacity to guide the chariot. The result was a menace to heaven and earth, which did not come to an end until Jupiter struck Phaeton with one of his thunderbolts and hurled him headlong from heaven into the River Po. Only short of the thunderbolt of popular wrath at a Presidential election does the monstrous system of artificial administration, built up by Mr. Roosevelt, seem now to have arrived.

THOUSANDS ADDED TO PAY ROLL

Our country is, unquestionably, recovering, to a noticeable extent, from the worst effects of our last great economic crisis. It has always recovered from such crises; but, undeniably, the principal thing from which it has to recover is Mr. Roosevelt himself. He seems as powerless to control his chariot as Phaeton was to control his.

Only recently thousands of more officeholders have been added to the pay roll of the Federal Government; the relief load of our country, in January 1936, was about what it was in January 1935, and it is claimed by the American Federation of Labor that the rise in unemployment in December-January last was the highest, in that period, in the last 5 years.

NATIONAL DEBT INCREASING

Our national debt is still steadily increasing, and new tax thumbscrews are being devised to rack still further the tortured limbs of the hapless American taxpayer. In the face of such conditions as these, we cannot hope that the economic recovery, which is now under way, can do more than progress haltingly until another thunderbolt is hurled, and another rash chariot driver, like Phaeton, is cast, not into the Po, but into the Potomac.

By pen, tongue, and, to the extent of my ability, by purse, I did all in my power to bring about the defeat of William J. Bryan, whose election as President would, in my opinion, have been of much less pernicious moment to the happiness and welfare of the people of the United States than would be the reelection of Mr. Roosevelt. If I am living in November 1936 I shall assuredly follow, in relation to Mr. Roosevelt, the example which I set myself in relation to Bryan—the only candidate of the Democratic Party for the Presidency against whom I have ever voted.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. ADAIR (at the request of Mr. THOMPSON), indefinitely, on account of illness.

BAYOU ST. JOHN, NEW ORLEANS, LA.

Mr. FERNANDEZ. Mr. Speaker, I ask unanimous consent for the immediate consideration of a bill which is an emergency matter (H. R. 11792) declaring Bayou St. John, in the city of New Orleans, La., a nonnavigable stream.

Mr. RICH. Mr. Speaker, reserving the right to object, what is this bill?

Mr. FERNANDEZ. It is a bill to declare a bayou that runs within the city of New Orleans a nonnavigable stream in order that some worth-while W. P. A. projects, such as the building of bridges across it, may be commenced. There is no opposition to the measure.

Mr. RICH. I may say to my colleagues that they are hunting everything under the sun to spend W. P. A. money on, and, goodness knows, if we are going to have to continue this, we might as well do so in New Orleans as anywhere else.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That Bayou St. John, in the city of New Orleans, La., be, and the same is hereby, declared to be not a navigable water of the United States within the meaning of the laws enacted by Congress for the preservation and protection of such waters.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. FERNANDEZ. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD at this point.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

There was no objection.

Mr. FERNANDEZ. Mr. Speaker, Bayou St. John extends southward 3.9 miles into the city of New Orleans from Lake Pontchartrain. It is generally from 100 to 170 feet in width and has a depth of from 6 to 11 feet, except near the entrance, which is obstructed by a wide bar. The bayou and an artificial extension 8,000 feet long, named the Carondelet Canal, was operated as a toll waterway for over a century prior to 1908. The Carondelet Canal was closed to navigation in 1908 and has since been acquired and partly filled by the State. The bayou is not under improvement by the United States. Commerce on the bayou has declined since the closure of the Carondelet Canal, and in 1934 was limited to the movement of 1,900 tons of lumber. With the exception of a few small lots, the entire area near the bayou has been zoned by the city for residential purposes and the most of the left bank is controlled by the city and reserved for park development. The only industry of any consequence along the waterway are two small boat repair shops near its upper end and a lumberyard below Esplanade Avenue. Esplanade Avenue crosses the bayou nine-tenths of a mile below its head. Because of the immaterial value of Bayou St. John above Esplanade Avenue as a highway of commerce for trade and travel by water, the War Department has no objection, as far as the general interests of navigation are concerned, to this bill, H. R. 11792.

Under municipal ordinance by the Commission Council of New Orleans adopted in 1934, Bayou St. John above Esplanade Avenue is to be used as an aquatic park. With the passage of this bill, the bridging of the bayou at or near Demourelle Island will be done without having to take into account the requirements of navigation, and also permit the elimination of the lift span from the Esplanade Avenue Bridge. It is the intention of the commission council to erect a new concrete arched pedestrian and vehicular bridge across Bayou St. John at Esplanade Avenue, sufficiently wide for four lanes of traffic and pedestrian walks on both sides. A check revealed that more than 10,000 vehicles passed over the present lift bridge a day and more than 2,000 pedestrians and cyclists used it daily during a 3-day period.

The Commission Council of the City of New Orleans, March 19, 1936, unanimously adopted a motion going on record in favor of the action taken to approve the bill as introduced by me and instructed the city engineer to prepare report to show what extreme cost and inconvenience it would be to the people of New Orleans if the bill is not adopted, and that it is for the public welfare of the people of that city that the bill be enacted into law.

The city park board, through the W. P. A., has dedicated 10 acres near the lake end of the park to a public yacht basin, tying in with Bayou St. John, which will remove all necessity for pleasure boats to moor in Bayou St. John. The basin will be provided with all modern sanitary facilities and work will commence promptly.

ANNOUNCEMENT

Mr. BANKHEAD. Mr. Speaker, I desire to make the announcement, if it is permissible under the rules, that the Members who are on the Bell investigating committee were absent yesterday on four roll calls. They desire to have it explained and noted in the RECORD that they were absent because of attendance upon their official duties in connection with that committee.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 560. An act for the relief of the Western Electric Co., Inc.;

S. 760. An act for the relief of Harry P. Hollidge;

S. 952. An act for the relief of Zelma Halverson;

S. 1186. An act for the relief of Frank P. Ross;

S. 1328. An act for the relief of the Snare & Triest Co., now Frederick Snare Corporation;

S. 1431. An act for the relief of the Collier Manufacturing Co., of Barnesville, Ga.;

S. 1490. An act for the relief of Earl A. Ross;

S. 2520. An act for the relief of T. D. Randall & Co.;

S. 2734. An act to confer jurisdiction upon the United States Court of Claims to hear and determine the claims of Henry W. Bibus, Annie Ulrick, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, estate of Harry B. C. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania;

S. 4317. An act to authorize the Secretary of War to grant to the city of Buffalo, N. Y., the right and privilege to occupy and use for sewage-disposal facilities part of the lands forming the pier and dikes of the Black Rock Harbor improvement at Buffalo, N. Y.; and

S. 4594. An act to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. and others.

BILLS PRESENTED TO THE PRESIDENT

Mr. PARSONS, from the Committee on Enrolled Bills, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H. R. 2982. An act for the relief of Sarah Shelton;

H. R. 7110. An act to authorize the President to bestow the Navy Cross upon Brig. Gen. Robert H. Dunlap, United States Marine Corps, deceased;

H. R. 8262. An act for the relief of Tom Rogers, and the heirs of W. A. Bell, Israel Walker, Henry Shaw, Thomas Bailey, and Joseph Watson;

H. R. 8287. An act to establish an assessed valuation real property tax in the Virgin Islands of the United States;

H. R. 8372. An act to authorize the acquisition of lands in the vicinity of Miami, Fla., as a site for a naval air station and to authorize the construction and installation of a naval air station thereon;

H. R. 8431. An act to provide for the establishment of the Fort Frederica National Monument, at St. Simon Island, Ga., and for other purposes;

H. R. 8784. An act to authorize withholding compensation due Government personnel;

H. R. 9995. An act to grant a renewal of patent no. 59560, relating to the emblem of the Disabled American Veterans of the World War;

H. R. 10194. An act granting a renewal of patent no. 40029, relating to the badge of the Holy Name Society;

H. R. 10267. An act to provide for adjusting the compensation of division superintendents, assistant division superintendents, assistant superintendents at large, assistant superintendent in charge of car construction, chief clerks, assistant chief clerk, and clerks in charge of sections in offices of division superintendents in the Railway Mail Service, to correspond to the rates established by the Classification Act of 1923, as amended; and

H. R. 10934. An act to authorize the transfer of the customhouse at Salem, Mass., from the jurisdiction of the Treasury Department to the Department of the Interior.

ADJOURNMENT

Mr. BANKHEAD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 30 minutes p. m.) the House adjourned until tomorrow, Thursday, May 21, 1936, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

839. A communication from the President of the United States, transmitting, pursuant to House Resolution 296, dated August 7, 1935, information concerning the number and distribution of Federal institutions and establishments of every kind and character which are depositing or causing to be deposited raw, untreated sewage into navigable or nonnavigable waters of the United States, and such recommendations with respect thereto as is deemed advisable and in the public interest (H. Doc. No. 495); to the Committee on Rivers and Harbors and ordered to be printed.

840. A letter from the Archivist of the United States, transmitting lists of papers among the archives and records of the Veterans' Administration which the Administration has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

841. A letter from the Archivist of the United States, transmitting lists of papers among the archives and records of the Federal Trade Commission which the Commission has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

842. A letter from the Archivist of the United States, transmitting a list of papers among the archives and records of the Federal Reserve Board which the Board has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

843. A letter from the Archivist of the United States, transmitting a list of papers among the archives and records of the United States Employees' Compensation Commission which the Commission has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

844. A letter from the Archivist of the United States, transmitting lists of papers among the archives and records of the Civil Service Commission which the Commission has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

845. A letter from the Archivist of the United States, transmitting lists of papers among the archives and records of the Department of Commerce which the Department has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

846. A letter from the Archivist of the United States, transmitting lists of papers among the archives and records of the Department of Agriculture which the Department has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

847. A letter from the Archivist of the United States, transmitting lists of papers among the archives and records of the Post Office Department which the Department has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

848. A letter from the Archivist of the United States, transmitting a list of papers among the archives and records of the Department of War which the Department has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

849. A letter from the Archivist of the United States, transmitting lists of papers among the archives and records of the Department of the Treasury which the Department has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

850. A letter from the Archivist of the United States, transmitting a list of papers among the archives and records of the Department of State which the Department has recommended should be destroyed or otherwise disposed of; to the Committee on Disposition of Executive Papers.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. GILLETTE: Committee on Foreign Affairs. S. 4584. An act to amend the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755), to extend and adapt its provisions to the convention between the United States and the United Mexican States for the protection of migratory birds and game mammals concluded at the City of Mexico, February 7, 1936, and for other purposes; without amendment (Rept. No. 2692). Referred to the Committee of the Whole House on the state of the Union.

Mr. CASTELLOW: Committee on Foreign Affairs. H. R. 12257. A bill to extend the jurisdiction of the United States Court for China to offenses committed on the high seas; without amendment (Rept. No. 2693). Referred to the Committee of the Whole House on the state of the Union.

Mrs. NORTON: Committee on the District of Columbia. House Joint Resolution 563. Joint resolution to declare December 26, 1936, a legal holiday in the District of Columbia; without amendment (Rept. No. 2694). Referred to the Committee of the Whole House on the state of the Union.

Mr. ROGERS of New Hampshire: Committee on Military Affairs. S. 1976. An act to amend the act entitled "An act making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1927, and for other purposes", approved April 15, 1926, so as to equalize the allowances for quarters and subsistence of enlisted men of the Army, Navy, and Marine Corps; without amendment (Rept. No. 2696). Referred to the Committee of the Whole House on the state of the Union.

Mr. ROGERS of Oklahoma: Committee on Indian Affairs. H. R. 10669. A bill authorizing an appropriation for payment to the Sac and Fox Tribe of Indians in the State of Oklahoma; without amendment (Rept. No. 2697). Referred to the Committee of the Whole House on the state of the Union.

Mr. FULMER: Committee on Agriculture. S. 81. An act to provide for the collection and publication of statistics of peanuts by the Department of Agriculture; without amendment (Rept. No. 2698). Referred to the Committee of the Whole House on the state of the Union.

Mr. JONES: Committee on Agriculture. H. R. 11929. A bill granting to the State of Iowa for State park purposes certain land of the United States in Clayton County, Iowa; without amendment (Rept. No. 2699). Referred to the Committee of the Whole House on the state of the Union.

Mr. HAINES: Committee on the Post Office and Post Roads. H. R. 6868. A bill to provide time credits for substitutes in the motor-vehicle service; with amendment (Rept. No. 2724). Referred to the Committee of the Whole House on the state of the Union.

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. H. R. 12646. A bill to amend section 318 of the Communications Act of 1934; without amendment (Rept. No. 2725). Referred to the Committee of the Whole House on the state of the Union.

Mrs. NORTON: Committee on the District of Columbia. H. R. 11325. A bill to permit construction, maintenance, and use of certain pipe lines for petroleum and petroleum products in the District of Columbia; with amendment (Rept. No. 2727). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. ROGERS of New Hampshire: Committee on Military Affairs. S. 3992. An act for the relief of Capt. Laurence V. Houston, retired; without amendment (Rept. No. 2695). Referred to the Committee of the Whole House.

Mr. RYAN: Committee on Claims. H. R. 1367. A bill for the relief of William A. McMahan; with amendment (Rept. No. 2700). Referred to the Committee of the Whole House.

Mr. PITTENGER: Committee on Claims. H. R. 2323. A bill for the relief of Dean Scott; with amendment (Rept. No. 2701). Referred to the Committee of the Whole House.

Mr. DALY: Committee on Claims. H. R. 2932. A bill for the relief of the International-Great Northern Railroad Co.; with amendment (Rept. No. 2702). Referred to the Committee of the Whole House.

Mr. HOUSTON: Committee on Claims. H. R. 7822. A bill for the relief of Lucretia Norris; with amendment (Rept. No. 2703). Referred to the Committee of the Whole House.

Mr. RYAN: Committee on Claims. H. R. 7947. A bill for the relief of Rev. Harry J. Hill; with amendment (Rept. No. 2704). Referred to the Committee of the Whole House.

Mr. RYAN: Committee on Claims. H. R. 7970. A bill for the relief of V. P. Johnson; with amendment (Rept. No. 2705). Referred to the Committee of the Whole House.

Mr. DALY: Committee on Claims. H. R. 8643. A bill for the relief of Mr. and Mrs. Frank Daley; with amendment (Rept. No. 2706). Referred to the Committee of the Whole House.

Mr. SOUTH: Committee on Claims. H. R. 8841. A bill for the relief of Estelle Mary MacDonald and Marilyn MacDonald; with amendment (Rept. No. 2707). Referred to the Committee of the Whole House.

Mr. McGEHEE: Committee on Claims. H. R. 8898. A bill for the relief of Barbara Jean Matthews, a minor; with amendment (Rept. No. 2708). Referred to the Committee of the Whole House.

Mr. PITTENGER: Committee on Claims. H. R. 9237. A bill for the relief of Annie E. Hyland; with amendment (Rept. No. 2709). Referred to the Committee of the Whole House.

Mr. PITTENGER: Committee on Claims. H. R. 9418. A bill for the relief of Edward L. Gockeler; with amendment (Rept. No. 2710). Referred to the Committee of the Whole House.

Mr. GWYNNE: Committee on Claims. H. R. 9896. A bill for the relief of Andrew Dowd; with amendment (Rept. No. 2711). Referred to the Committee of the Whole House.

Mr. SOUTH: Committee on Claims. H. R. 10169. A bill for the relief of L. M. Crawford; with amendment (Rept. No. 2712). Referred to the Committee of the Whole House.

Mr. SMITH of Washington: Committee on Claims. H. R. 10222. A bill for the relief of Sarah E. Palmer; with amendment (Rept. No. 2713). Referred to the Committee of the Whole House.

Mr. PITTENGER: Committee on Claims. H. R. 10527. A bill for the relief of Harris Bros. Plumbing Co.; with amendment (Rept. No. 2714). Referred to the Committee of the Whole House.

Mr. HOUSTON: Committee on Claims. H. R. 10677. A bill for the relief of Cora Fulghum and Ben Peterson; with amendment (Rept. No. 2715). Referred to the Committee of the Whole House.

Mr. EKWALL: Committee on Claims. H. R. 10697. A bill for the relief of George Houston; with amendment (Rept. No. 2716). Referred to the Committee of the Whole House.

Mr. SMITH of Washington: Committee on Claims. H. R. 11203. A bill for the relief of Andrew Smith; with amendment (Rept. No. 2717). Referred to the Committee of the Whole House.

Mr. DALY: Committee on Claims. H. R. 11461. A bill for the relief of the estates of N. G. Harper and Amos Phillips; with amendment (Rept. No. 2718). Referred to the Committee of the Whole House.

Mr. SMITH of Washington: Committee on Claims. H. R. 11868. A bill for the relief of Brook House, Ltd., of Sydney, Australia; without amendment (Rept. No. 2719). Referred to the Committee of the Whole House.

Mr. DALY: Committee on Claims. House Joint Resolution 522. Joint resolution for the relief of William W. Brunswick; with amendment (Rept. No. 2720). Referred to the Committee of the Whole House.

Mr. PITTENGER: Committee on Claims. S. 3861. An act for the relief of the Alaska Commercial Co., of San Francisco, Calif.; without amendment (Rept. No. 2721). Referred to the Committee of the Whole House.

Mr. KENNEDY of Maryland: Committee on Claims. S. 4358. An act for the relief of Harry L. Parker; without amendment (Rept. No. 2722). Referred to the Committee of the Whole House.

Mr. KENNEDY of Maryland: Committee on Claims. S. 4359. An act for the relief of W. D. Reed; without amendment (Rept. No. 2723). Referred to the Committee of the Whole House.

Mr. KENNEDY of Maryland: Committee on Claims. H. R. 12788. A bill for the relief of sundry claimants, and for other purposes; with amendment (Rept. No. 2726). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DEROUEN: A bill (H. R. 12789) to authorize the exchange of certain lands within the Great Smoky Mountains National Park for lands within the Cherokee Indian Reservation, N. C., and for other purposes; to the Committee on the Public Lands.

By Mr. EKWALL: A bill (H. R. 12790) to authorize completion, maintenance, and operation of certain facilities for navigation on the Columbia River, and for other purposes; to the Committee on Rivers and Harbors.

By Mr. McREYNOLDS: A bill (H. R. 12791) to fulfill certain treaty obligations with respect to water levels of the Lake of the Woods; to the Committee on Foreign Affairs.

Also, a bill (H. R. 12792) to prohibit the commercial use of the coat of arms of the Swiss Confederation pursuant to the obligation of the Government of the United States under article 28 of the Red Cross Convention signed at Geneva July 27, 1929; to the Committee on Foreign Affairs.

By Mr. DOUGHTON: A bill (H. R. 12793) to amend certain administrative provisions of the internal-revenue laws, and for other purposes; to the Committee on Ways and Means.

By Mrs. O'DAY: A bill (H. R. 12794) to extend the definition of an alien veteran, for naturalization purposes only, so as to include certain alien enemies and nationals of Turkey and Bulgaria who rendered active service in United States armed forces with personal record of loyalty to the United States, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. COFFEE: A bill (H. R. 12795) to provide that certain taxes with respect to coconut oil be covered into the general funds of the Treasury, and for other purposes; to the Committee on Ways and Means.

By Mr. COOLEY: A bill (H. R. 12796) to amend the act entitled "An act to provide for the times and places for holding court for the eastern district of North Carolina", approved May 10, 1928, as amended (U. S. C., 1934 ed., title 28, sec. 179; U. S. C., Supp. I, title 28, sec. 179); to the Committee on the Judiciary.

By Mr. FERNANDEZ: A bill (H. R. 12797) to include native-born Filipinos for eligibility under the naturalization laws, as amended, who served during the World War, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. HILDEBRANDT: A bill (H. R. 12798) to amend section 673, chapter 17, title 28, Judicial Code of the United States Statutes, edition of December 6, 1926; to the Committee on the Judiciary.

By Mr. WARREN: A bill (H. R. 12799) to authorize the coinage of 50-cent pieces in commemoration of the three hundred and fiftieth anniversary of Sir Walter Raleigh's colony on Roanoke Island, N. C., known in history as the Lost Colony, and the birth of Virginia Dare, the first child of English parentage to be born on the American Continent, and her baptism; to the Committee of the Whole House on the State of the Union.

By Mr. VINSON of Kentucky: A bill (H. R. 12800) to regulate interstate commerce in bituminous coal, and for other purposes; to the Committee on Ways and Means.

By Mr. BLANTON: Joint resolution (H. J. Res. 592) making appropriations for support of the government of the District of Columbia for the fiscal year ending June 30, 1937, and for other purposes; to the Committee on Appropriations.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. KENNEDY of Maryland: A bill (H. R. 12788) for the relief of sundry claimants, and for other purposes; to the Committee on Claims.

By Mr. AYERS: A bill (H. R. 12801) to confer jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claim of the Waterton Oil, Land & Power Co., of Butte, Mont., against the United States; to the Committee on the Public Lands.

By Mr. CARMICHAEL: A bill (H. R. 12802) for the relief of Edna Lee Fuqua and Vernedia Eggleston Fuqua; to the Committee on Claims.

Also, a bill (H. R. 12803) for the relief of Howard Fuqua; to the Committee on Claims.

Also, a bill (H. R. 12804) for the relief of the estates of Cleoney Fuqua and Miles Moore; to the Committee on Claims.

By Mr. CELLER: A bill (H. R. 12805) for the relief of the Nafra Co., Inc., and to confer jurisdiction upon the Court of Claims of the United States to hear, consider, and render judgment on certain claims of the Nafra Co., Inc., against the United States; to the Committee on Claims.

By Mr. GINGERY: A bill (H. R. 12806) for the relief of James P. McDonnell; to the Committee on Naval Affairs.

Also, a bill (H. R. 12807) for the relief of Walter Francis Meinhart; to the Committee on Naval Affairs.

By Mr. LEE of Oklahoma: A bill (H. R. 12808) for the relief of William E. Burch; to the Committee on Military Affairs.

By Mr. MOTT: A bill (H. R. 12809) granting a pension to Willie D. Nelson; to the Committee on Invalid Pensions.

By Mr. SCHULTE: A bill (H. R. 12810) granting a pension to Simon R. Ditzler; to the Committee on Pensions.

By Mr. SMITH of West Virginia: A bill (H. R. 12811) for the relief of the Kanawha Valley Coal Co.; to the Committee on Claims.

By Mr. SNELL: A bill (H. R. 12812) granting an increase of pension to Mary Catherine Green; to the Committee on Invalid Pensions.

By Mr. TONRY: A bill (H. R. 12813) for the relief of Georg Ferdinand Erich Emmrich, also known as Richard Shultz; to the Committee on Immigration and Naturalization.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

10919. By Mr. DE ROUEN: Petition of Bayou Plaquemine Gravity Drainage District No. 12, of St. Landry Parish, La., urging the favorable consideration by the House of Senate bill 630; to the Committee on Agriculture.

10920. By Mr. DARROW: Petition of the Philadelphia Board of Trade, protesting against the enactment of the Healey bill (H. R. 11554); to the Committee on the Judiciary.

10921. Also, petition of the Philadelphia Board of Trade, protesting against the enactment of House bill 12395, the revenue bill; to the Committee on Ways and Means.

10922. By Mr. JOHNSON of Texas: Petition of Mamie Cerf; Joe Jolesch; Charles S. Cook; F. B. Vrla; J. W. Tolleson, president, the Citizens National Bank, of Ennis; E. C. Hawkins, vice president of Ennis State Bank; W. F. Templeton; and Ernest L. Raphael, all of Ennis, Tex., favoring Senate Joint Resolution 205, by Mr. SMITH; to the Committee on Agriculture.

10923. Also, petition of Mrs. G. L. Austin, Mrs. Roy Brown, Mrs. S. N. Brown, Mrs. J. M. Thompson, W. C. Norris, J. B. Adkins, and a large number of other citizens, all of Navarro County, Tex., favoring House bill 7122; to the Committee on Pensions.

10924. By Mr. PETERSON of Georgia: Petition of H. H. Warner, 1505 Washington Street; J. F. Inglesby, 404 East Park Avenue; and other railroad employees, of Savannah, Ga., protesting against taxes authorized by House bill 8651, known as Railroad Retirement Act of 1935, and House bill 8652, known as "An act to levy excise tax upon carriers and income tax upon their employees"; to the Committee on Ways and Means.

10925. By Mr. SCOTT: Petition of the Democratic Educational Group (a club of 800 members), requesting the Committee on Post Offices and Post Roads in the United States Senate to strongly urge the next Congress to enact a law providing for a 30-hour week for all postal and other Federal employees; to the Committee on the Post Office and Post Roads.

10926. Also, petition of the Federation of Citizens' Associations, Central Labor Union (representing organized labor in the District of Columbia), and the Southwest Citizens' Association, endorsing the Scott resolution, No. 486, and petitioning the Speaker to appoint a committee of five select Members to investigate fatalities and injuries in the District of Columbia, to inquire into elevator accidents, set standard qualifications for elevator inspection, investigate office of building inspector, examine plan to establish self-supporting elevator-inspection department, to determine whether or not investigation of accidents conducted by building inspectors have a tendency to excuse improper performance of duty, to report to the House the results of its investigations, that congressional committees of investigation be requested to make special study of antiquated elevators in District Building; to the Committee on the District of Columbia.

10927. By Mr. SMITH of West Virginia: Petition of citizens of Raleigh County, W. Va., urging the enactment of pending antilynch legislation; to the Committee on the Judiciary.

10928. By Mr. SUTPHIN: Petition of the Board of Commissioners of the City of New Brunswick, N. J., that the United States Senate enact the United States Housing Act of 1936, being Senate bill No. 4424, introduced by Senator ROBERT F. WAGNER, and that the House of Representatives enact the identical measure introduced in the House by Congressman HENRY ELLENBOGEN and being House bill 12164; to the Committee on Appropriations.

10929. By Mr. WIGGLESWORTH: Petition of the General Court of Massachusetts, favoring the permanency of the Civilian Conservation Corps; to the Committee on Appropriations.

10930. Also, petition of the General Court of Massachusetts, relative to affording the privilege of entry into this country to those persons who are being persecuted and discriminated against in Germany; to the Committee on Foreign Affairs.

10931. By the SPEAKER: Petition of the Boonville Press Club, Boonville, Ind.; to the Committee on the Library.

10932. Also, petition of the city of New Brunswick, N. J.; to the Committee on Banking and Currency.

SENATE

THURSDAY, MAY 21, 1936

(Legislative day of Tuesday, May 12, 1936)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

THE JOURNAL

On request of Mr. ROBINSON, and by unanimous consent, the reading of the Journal of the proceedings of the calendar day Wednesday, May 20, 1936, was dispensed with, and the Journal was approved.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its reading clerks, announced that the House had disagreed to the amendments of the Senate to the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes, agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. SAMUEL B. HILL, Mr. CULLEN, Mr. BUCK, Mr. TREADWAY, and Mr. CROWTHER were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10630) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1937, and for other purposes; that the House had receded from its disagreement to the amendments of the Senate numbered 1, 7, 31, 32, 33, 35, 39, 50, 52, 56, and 83 to the bill, and concurred therein; that the House had receded from its disagreement to amendments of the Senate numbered 46 and 87 and concurred therein, each with an amendment, in which it requested the concurrence of the Senate, and that the House insisted upon its disagreement to the amendments of the Senate numbered 24, 53, and 54 to the bill.

The message further announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H. R. 11792. An act declaring Bayou St. John, in the city of New Orleans, La., a nonnavigable stream; and

H. R. 12799. An act to authorize the coinage of 50-cent pieces in commemoration of the three hundred and fiftieth anniversary of Sir Walter Raleigh's colony on Roanoke Island, N. C., known in history as the Lost Colony, and the birth of Virginia Dare, the first child of English parentage to be borne on the American Continent, and her baptism.

ENROLLED BILLS SIGNED

The message also announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 560. An act for the relief of the Western Electric Co., Inc.;

S. 760. An act for the relief of Harry P. Hollidge;

S. 952. An act for the relief of Zelma Halverson;

S. 1186. An act for the relief of Frank P. Ross;

S. 1328. An act for the relief of the Snare & Triest Co., now Frederick Snare Corporation;

S. 1431. An act for the relief of the Collier Manufacturing Co., of Barnesville, Ga.;

S. 1490. An act for the relief of Earl A. Ross;

S. 2520. An act for the relief of T. D. Randall & Co.;

S. 2734. An act to confer jurisdiction upon the United States Court of Claims to hear and determine the claims of Henry W. Bibus, Annie Ulrich, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, estate of Harry B. C. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania;

S. 4317. An act to authorize the Secretary of War to grant to the city of Buffalo, N. Y., the right and privilege to occupy and use for sewage-disposal facilities part of the lands forming the pier and dikes of the Black Rock Harbor improvement at Buffalo, N. Y.; and

S. 4594. An act to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. and others.

CALL OF THE ROLL

Mr. ROBINSON. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Chavez	Hayden	O'Mahoney
Ashurst	Clark	Holt	Overton
Austin	Connally	Johnson	Pittman
Bachman	Coolidge	Keyes	Pope
Bailey	Copeland	King	Robinson
Barbour	Couzens	La Follette	Russell
Barkley	Davis	Logan	Schwellenbach
Benson	Dieterich	Lonergan	Sheppard
Bilbo	Donahey	Long	Shipstead
Black	Duffy	McAdoo	Smith
Bone	Fletcher	McGill	Steiwer
Borah	Frazier	McNary	Thomas, Okla.
Brown	George	Maloney	Truman
Bulkley	Gerry	Metcalf	Vandenberg
Bulow	Gibson	Minton	Van Nuys
Burke	Glass	Moore	Wagner
Byrd	Guffey	Murphy	Walsh
Byrnes	Hale	Murray	Wheeler
Capper	Harrison	Neely	White
Caraway	Hastings	Norris	
Carey	Hatch	Nye	

Mr. ROBINSON. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], the Senator from Nevada [Mr. MCCARRAN] are absent because of illness; that the Senator from Oklahoma [Mr. GORE], the Senator from Tennessee [Mr. MCKELLAR], the junior Senator from Maryland [Mr. RADCLIFFE], the senior Senator from Maryland [Mr. TYDINGS], the Senator from Illinois [Mr. LEWIS], and the Senator from Utah [Mr. THOMAS] are necessarily detained, and that the Senator from North Carolina [Mr. REYNOLDS] is absent because of a death in his family.

Mr. AUSTIN. I announce that the Senator from Iowa [Mr. DICKINSON] and the Senator from Delaware [Mr. TOWNSEND] are necessarily absent.

The VICE PRESIDENT. Eighty-two Senators have answered to their names. A quorum is present.

SUPPLEMENTAL ESTIMATE, RURAL ELECTRIFICATION ADMINISTRATION (S. DOC. NO. 241)

The VICE PRESIDENT laid before the Senate a communication from the President of the United States, transmitting, pursuant to law, a supplemental estimate of appropriation for the Rural Electrification Administration for the fiscal year 1937, amounting to $1,450,000, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate resolutions adopted by the Boonville (Ind.) Press Club, favoring fitting recognition of the work of William Fortune by the placing of a tablet inscribed with his name and accomplishment in furtherance of the cause of the erection of a memorial at Vincennes, Ind., to George Rogers Clark, conqueror of the Northwest, which were referred to the Committee on the Library.

Mr. COPELAND presented resolutions adopted by students of the school of business of the College of the City of New York, N. Y., favoring the enactment of the so-called national youth bill, which was referred to the Committee on Education and Labor.

He also presented the petition of Local Union No. 181, International Brotherhood of Electrical Workers, of Utica, N. Y., praying for the enactment of the so-called Wagner-Ellenbogen low-cost housing bill, which was referred to the Committee on Education and Labor.

He also presented the petition of sundry citizens, being members of the Employees Association of the United States Immigration and Naturalization Service, of Niagara Falls, N. Y., praying for the enactment of the bill (H. R. 12244) to amend section 24 of the Immigration Act of 1917, relating to the compensation of certain Immigration and Naturalization Service employees, and for other purposes, which was referred to the Committee on Immigration.

He also presented a resolution adopted by the Saratoga County, N. Y., local of the Socialist Party of the United States, favoring the holding of public hearings and the re-

porting to the Senate of the so-called Benson resolution, being the joint resolution (S. J. Res. 249) proposing an amendment to the Constitution of the United States designating farmers' and workers' rights, which was referred to the Committee on the Judiciary.

ENDORSEMENT OF PRESIDENT ROOSEVELT

Mr. BYRNES. Mr. President, I ask unanimous consent to have printed in the RECORD and to lie on the table a resolution adopted yesterday by the South Carolina convention of the Democratic Party, endorsing President Roosevelt for renomination and reelection. This resolution, presented by Delegate C. C. Wyche, of Greenville, S. C., was adopted unanimously by a standing vote.

There being no objection, the resolution was ordered to lie on the table and to be printed in the RECORD, as follows:

Whereas on March 3, 1933, when President Franklin D. Roosevelt was inaugurated as President of the United States, he found the Republican Party had so administered the affairs of government that fear gripped the hearts of the American people and despair was written upon their faces; business, big and little, was in economic chaos; banking institutions were insolvent and men were frantic in their efforts to convert currency into gold; millions of honest men had been thrown out of employment and were walking the streets inadequately clothed and hungry; farms of the American farmer and homes of American workingmen were being sold under foreclosures; cotton was being sold at 5 cents per pound and other farm products below the cost of production; old age faced want and poverty with no ray of hope; and Government was being operated and controlled for the benefit of the privileged few and without thought of consideration for the hopes, longings, and aspirations of the American people as a whole; and

Whereas under the wise and capable leadership of President Franklin D. Roosevelt since his inauguration, fear has been driven from the hearts of men and faith and hope restored; business has again begun to prosper; the banks are overflowing with money and men make their deposits with confidence and no longer question the currency of the United States; the farms of the American farmer and the homes of the American workingman have been saved from foreclosure and sale; the price of cotton has been increased from 5 cents per pound to 11 and 12 cents per pound, and other agricultural products are being sold at a more reasonable figure; the naked have been clothed, the hungry fed, and old age once again faces the future with more hope than dread; the doors of opportunity are being once again opened to youth, ambition, and energy to all those who are willing to work; the whole American people look forward to the future with confidence, optimism, and cheerfulness, and with the knowledge that the Government of the United States shall, under the continued leadership of the Democratic Party, be administered so that the American citizen shall be forever freed from economic slavery and shall enjoy the freedom guaranteed to him under the Constitution of the United States: Now, therefore, be it

Resolved by the Democratic State convention of South Carolina, That President Franklin D. Roosevelt be, and he is hereby, endorsed for renomination as the nominee of the Democratic Party and for reelection as President of the United States; be it further

Resolved, That the delegates elected by this convention to the Democratic National Convention be, and they are hereby, instructed and directed to support the nomination of Franklin D. Roosevelt as the nominee of the Democratic Party for President of the United States.

REPORTS OF COMMITTEES

Mr. BURKE, from the Committee on the Judiciary, to which was referred the bill (S. 2550) to incorporate the American National Institute (Prix de Paris) at Paris, France, reported it without amendment and submitted a report (No. 2062) thereon.

Mr. VAN NUYS, from the Committee on the Judiciary, to which was referred the joint resolution (S. J. Res. 187) authorizing the President of the United States of America to proclaim October 11 of each year General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski, reported it with amendments and submitted a report (No. 2065) thereon.

Mr. STEIWER, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 9483) to extend the provisions of the Forest Exchange Act, as amended, to certain lands so that they may become part of the Umatilla and Whitman National Forests, reported it without amendment and submitted a report (No. 2063) thereon.

Mr. MURRAY, from the Committee on Public Lands and Surveys, to which was referred the bill (S. 3869) to authorize payment to the Indians of the Fort Peck Reservation of the amounts due on certain delinquent homestead entries, reported it with amendments and submitted a report (No. 2064) thereon.

Mr. O'MAHONEY, from the Committee on Public Lands and Surveys, to which was referred the bill (H. R. 9183) to provide for the extension of the boundaries of the Hot Springs National Park in the State of Arkansas, and for other purposes, reported it with an amendment and submitted a report (No. 2075) thereon.

Mr. ADAMS, from the Committee on Banking and Currency, to which were referred the following bills, reported them each with amendments and submitted reports thereon:

S. 4394. A bill to authorize the coinage of 50-cent pieces in commemoration of the seventy-fifth anniversary of the Battle of Antietam (Rept. No. 2066); and

H. R. 11688. A bill providing for a change in the design of the 50-cent pieces authorized to be coined in commemoration of the one hundredth anniversary of the admission of the State of Arkansas into the Union (Rept. No. 2067).

Mr. ADAMS also, from the Committee on Banking and Currency, to which were referred the following bills, reported them severally with an amendment and submitted reports thereon:

S. 4464. A bill to authorize the coinage of 50-cent pieces in celebration of the opening of the San Francisco-Oakland Bay Bridge (Rept. No. 2068);

S. 4608. A bill to authorize the coinage of 50-cent pieces in commemoration of the three hundredth anniversary of the founding of York County, Maine (Rept. No. 2069);

H. R. 7690. A bill to authorize the coinage of 50-cent pieces in commemoration of the two hundred and fiftieth anniversary of the founding of the city of Albany, N. Y. (Rept. No. 2070);

H. R. 8234. A bill to authorize the coinage of 50-cent pieces in commemoration of the one hundredth anniversary of the founding of the city of Elgin, Ill., and the erection of a heroic pioneer memorial (Rept. No. 2071); and

H. R. 11533. A bill to authorize the coinage of 50-cent pieces in commemoration of the seventy-fifth anniversary of the Battle of Gettysburg (Rept. No. 2072).

Mr. OVERTON, from the Committee on Commerce, to which was referred the bill (S. 4538) providing for an examination and survey for a deep-water channel from New Iberia, parish of Iberia, La., to the Gulf of Mexico, reported it with an amendment and submitted a report (No. 2073) thereon.

Mr. SHEPPARD, from the Committee on Commerce, to which was referred the joint resolution (S. J. Res. 262) granting the consent of Congress to the States of New York and Vermont to enter into an agreement amending the agreement between such States consented to by Congress in Public Resolution No. 9, Seventieth Congress, relating to the creation of the Lake Champlain Bridge Commission, reported it without amendment and submitted a report (No. 2074) thereon.

He also, from the same committee, to which was referred the bill (S. 4037) to amend the act relating to the Omaha-Council Bluffs Missouri River Bridge Board of Trustees, approved June 10, 1930, and for other purposes, reported it with amendments and submitted a report (No. 2076) thereon.

ARRANGEMENT FOR INAUGURATION OF PRESIDENT AND VICE PRESIDENT

Mr. NEELY. Mr. President, from the Committee on Rules I report favorably, without amendment, Senate Concurrent Resolution No. 38, and ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. The clerk will read the concurrent resolution.

The legislative clerk read the concurrent resolution (S. Con. Res. 38), as follows:

Resolved by the Senate (the House of Representatives concurring), That a joint committee consisting of three Senators and three Representatives, to be appointed by the President of the

Senate and the Speaker of the House of Representatives, respectively, is authorized to make the necessary arrangements for the inauguration of the President-elect of the United States on the 20th day of January next.

Mr. McNARY. Mr. President, I desire to ask a question of the Senator. Has it been the practice to propose a concurrent resolution of this kind so far in advance of the inauguration?

Mr. NEELY. Mr. President, the resolution has been offered earlier than usual because of the fact that under existing law the inauguration will be held about 6 weeks before the 4th of March, the date on which the inaugural ceremony was previously performed.

Mr. McNARY. Mr. President, is the concurrent resolution in the form which has been followed in years past?

Mr. NEELY. It is.

Mr. McNARY. Has the resolution been unanimously reported by the committee?

Mr. NEELY. The Committee on Rules has unanimously approved the resolution.

The VICE PRESIDENT. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution was considered and agreed to.

PRINTING REVISED EDITION OF SENATE RULES AND MANUAL

Mr. NEELY, from the Committee on Rules, reported a resolution (S. Res. 303), which was referred to the Committee on Printing, as follows:

Resolved, That the Committee on Rules be, and is hereby, directed to prepare a revised edition of the Senate Rules and Manual for the use of the Seventy-fifth Congress, and that 1,700 additional copies shall be printed and bound, of which 1,200 copies shall be for the Senate, 200 copies for the use of the Committee on Rules, and the remaining 300 copies shall be bound in full morocco and tagged as to contents and delivered as may be directed by the committee.

ENROLLED BILLS PRESENTED

Mrs. CARAWAY, from the Committee on Enrolled Bills, reported that that committee presented to the President of the United States the following enrolled bills:

On May 19, 1936:

S. 3483. An act to provide for rural electrification, and for other purposes.

On May 21, 1936:

S. 560. An act for the relief of the Western Electric Co., Inc.;

S. 760. An act for the relief of Harry P. Hollidge;

S. 952. An act for the relief of Zelma Halverson;

S. 1186. An act for the relief of Frank P. Ross;

S. 1323. An act for the relief of the Snare & Triest Co., now Frederick Snare Corporation;

S. 1431. An act for the relief of the Collier Manufacturing Co., of Barnesville, Ga.;

S. 1490. An act for the relief of Earl A. Ross;

S. 2520. An act for the relief of T. D. Randall & Co.;

S. 2734. An act to confer jurisdiction upon the United States Court of Claims to hear and determine the claims of Henry W. Bibus, Annie Ulrich, Samuel Henry, Charles W. Hensor, Headley Woolston, John Henry, estate of Harry B. C. Margerum, and George H. Custer, of Falls Township and borough of Tullytown, Bucks County, Commonwealth of Pennsylvania;

S. 4317. An act to authorize the Secretary of War to grant to the city of Buffalo, N. Y., the right and privilege to occupy and use for sewage-disposal facilities part of the lands forming the pier and dikes of the Black Rock Harbor improvement at Buffalo, N. Y.; and

S. 4594. An act to supplement the act of June 25, 1929 (ch. 41, 46 Stat. L. 41), which authorized and directed the Attorney General to institute suit against the Northern Pacific Railway Co. and others.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. WALSH:

A bill (S. 4671) to amend the act approved February 1, 1928, concerning actions on account of death or personal injury within places under exclusive jurisdiction of the United States; to the Committee on Education and Labor.

By Mr. CAPPER:

A bill (S. 4672) granting a pension to Hattie Amelia Hunt (with accompanying papers); to the Committee on Pensions.

By Mr. VAN NUYS:

A bill (S. 4674) for the relief of Peter S. Kaminski; to the Committee on Military Affairs.

Mrs. LONG. Mr. President, I ask consent to introduce two bills, one to authorize production credit associations to make loans to fur trappers, the other declaring Bayou St. John, in the city of New Orleans, a nonnavigable stream. I request that the bills be referred to the appropriate committees.

The VICE PRESIDENT. Without objection, the bills will be received and appropriately referred.

By Mrs. LONG:

A bill (S. 4675) to authorize production credit associations to make loans to fur trappers; to the Committee on Banking and Currency.

A bill (S. 4676) declaring Bayou St. John, in the city of New Orleans, La., a nonnavigable stream; to the Committee on Commerce.

INSTRUCTION AND INFORMATION RELATIVE TO CRIME CONTROL

Mr. ASHURST. At the request of the Attorney General, I ask consent to introduce for appropriate reference a bill on the subject of crime control. I also request that the bill be printed in the RECORD.

The VICE PRESIDENT. Without objection, the bill will be received, printed in the RECORD, and referred to the Judiciary Committee.

The bill (S. 4673) to authorize the Attorney General to provide instruction and information on the subject of crime control was read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That authority is hereby given to the Attorney General of the United States to provide instruction and information in methods of cooperation between the Department of Justice of the United States and the law enforcement agencies of the several States, the subdivisions and municipalities thereof and to provide for the collection and dissemination of information on the subject of crime prevention and control.

SEC. 2. There is hereby authorized to be appropriated from the Treasury of the United States such amount as may be necessary to carry out the provisions hereinabove set forth.

HOUSE BILLS REFERRED

The following bills were each read twice by their titles and referred as indicated below:

H. R. 11792. An act declaring Bayou St. John, in the city of New Orleans, La., a nonnavigable stream; to the Committee on Commerce.

H. R. 12799. An act to authorize the coinage of 50-cent pieces in commemoration of the three hundred and fiftieth anniversary of Sir Walter Raleigh's colony on Roanoke Island, N. C., known in history as the Lost Colony, and the birth of Virginia Dare, the first child of English parentage to be born on the American Continent, and her baptism; to the Committee on Banking and Currency.

ADMISSIBILITY IN EVIDENCE OF CERTAIN WRITINGS AND RECORDS—AMENDMENT

Mr. BURKE submitted an amendment intended to be proposed by him, for the Committee on the Judiciary, to the bill (H. R. 11690) relating to the admissibility in evidence of certain writings and records made in the regular course of business, which was ordered to lie on the table and to be printed.

AMENDMENT TO FIRST DEFICIENCY APPROPRIATION BILL

Mr. HAYDEN (for Mr. McCARRAN) submitted an amendment intended to be proposed by Mr. McCARRAN to House bill 12624, the first deficiency appropriation bill, 1936, which was referred to the Committee on Appropriations and ordered to be printed, as follows:

On page 61, after line 5, to insert:

"Naval ammunition depot, Hawthorne, Nev.: For the construction of smokeless-powder magazines and accessories, $760,000; for the construction of high-explosive magazines and accessories, $196,000; for the construction of projectile magazines and accessories, $370,000; for the expansion of officers' quarters, $40,000; in all, $1,366,000."

BITUMINOUS-COAL INDUSTRY

Mr. DAVIS. Mr. President, I understand that a contract of cooperation between the bituminous-coal miners and operators has been signed for another year, and I trust that this will serve as a basis of security in this industry. The highly competitive nature of the bituminous-coal industry requires stabilization. If legislation is to be used to overcome cutthroat competition, it must be based on the best thought of coal miners and operators. Past experience has taught us that price cutting leads to wage cutting. I have seen wages sink from $7.50 a day to less than $2.50, and, even so, the employment was irregular. Voluntary agreements between coal miners and operators as to wage scales through collective bargaining should point the way to an effective solution of this problem. Voluntary agreements seem to work satisfactorily in the anthracite industry. A similar program is needed for the bituminous-coal industry which fierce competition had reduced to chaos. Strikes and stoppage of work should be avoided and every effort be made to build up purchasing power in the hands of the mine workers.

Mr. President, so many requests have come to me for copies of the Supreme Court decision on the Bituminous Coal Conservation Act that I ask that a thousand additional copies be printed for distribution as a Senate document. The cost will be small, owing to the fact that the material is already set up.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Pennsylvania?

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. DAVIS. I yield.

Mr. NORRIS. Does the request of the Senator include the printing of the dissenting opinion as well as the majority opinion?

Mr. DAVIS. Yes. A request for printing the opinions has already heretofore been granted, and I am now merely asking that a thousand additional copies be printed.

Mr. NORRIS. Including both the majority and the minority opinions?

Mr. DAVIS. Yes; the full decision of the Court.

Mr. NORRIS. Very well, I have no objection.

The PRESIDENT pro tempore. Without objection, the request of the Senator from Pennsylvania is granted.

C. O. MEYER

The PRESIDENT pro tempore laid before the Senate the amendment of the House to the bill (S. 537) for the relief of C. O. Meyer, which was, on page 1, line 6, after "$297.86", to insert "in full settlement of all claims against the Government of the United States."

Mr. BYRNES. I move that the Senate concur in the amendment of the House.

The motion was agreed to.

ALLOWANCES TO EMPLOYEES AFFECTED BY RAILROAD CONSOLIDATIONS

Mr. WHEELER. I ask unanimous consent to have printed in the RECORD a statement authorized to be issued by George M. Harrison, chairman of the Railway Labor Executive Association, and H. A. Enochs, chief of personnel, Pennsylvania Railroad, and chairman of the committee representing railroad managements. The statement has reference to an agreement reached between the railroads and the railroad brotherhoods concerning the dismissal of employees in the event of consolidations. It is one of the most forward-looking and epoch-making agreements negotiated in a long period of time between capital, on the one hand, and labor on the other.

Mr. COUZENS. May I ask if the signing of that agreement disposes of the bill which we have pending before the Committee on Interstate Commerce?

Mr. WHEELER. The signing of the agreement disposes of the bill we have pending before the Committee on Interstate Commerce and upon which we have had hearings, which were postponed in order that the railroads and brotherhoods might get together in order to effect an agreement.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

MAY 21, 1936.

The following statement is authorized by George M. Harrison, chairman of the Railway Labor Executives Association, and H. A. Enochs, chief of personnel, Pennsylvania R. R., and chairman of the committee representing railroad managements:

After months of negotiations an agreement was concluded and signed today by representatives of the railway labor unions and the railroad managements concerning allowances to employees affected by the joint action of two or more carriers with respect to unification, consolidation, merger, or pool, in part or in whole, through separate railroad facilities or any of the operations or services previously performed by them through such separate facilities.

The agreement, however, specifically provides that it does not apply to "rises and falls and changes in volume or character of employment brought about solely by other causes."

The agreement is for a period of 5 years beginning on June 18, 1936, and does away with the necessity for the enactment of the Wheeler-Crosser bill which would restrict reductions in railroad employment and which is now pending before congressional committees in the Senate and House of Representatives.

Each carrier contemplating a coordination, the agreement provides, shall give at least 90 days' written notice to the employees affected, such notice must contain a full and adequate statement of the proposed changes to be effected by such coordination, including an estimate of the number of employees of each class affected by the intended changes. Within 10 days of receipt of such notice, arrangements must be made for a conference between representatives of the employees and the railroads interested in such changes, and the conference must begin within 30 days from the date of such notice. The agreement sets up machinery for adjusting any disputes which may arise between the employees and the carriers on matters pertaining to coordination resulting in the displacement of employees.

Three provisions for financial allowances to employees affected by coordinations are provided under the agreement as follows:

1. When an employee affected by a particular coordination is placed in a position paying less monthly salary than previously received by him, then the difference must be paid by the carrier for not to exceed 5 years or until, through promotions or otherwise, the employee received a salary equal to or greater than that received prior to the coordination.

2. Any employee of the carriers deprived of employment as the result of a coordination is to receive a "coordination allowance" based on length of service which, except in the case of an employee with less than 1 year's service, shall be a monthly allowance equivalent in each instance to 60 percent of the average monthly compensation of that employee for the 12 months prior to the coordination as follows:

Period of payment

Length of service:	*Months*
1 year and less than 2 years	6
2 years and less than 3 years	12
3 years and less than 5 years	18
5 years and less than 10 years	36
10 years and less than 15 years	48
15 years and over	60

An employee with less than 1 year of service will receive a coordination allowance in a lump-sum payment equivalent to 60 days' pay.

3. Any employee eligible to the benefits and protections of this agreement may, at his option at the time of coordination, resign and in lieu of all other benefits and protections provided in the agreement accept in a lump sum a "separation allowance" determined in accordance with the following schedule:

Separation allowance

Length of service:	*Months' pay*
1 year and less than 2 years	3
2 years and less than 3 years	6
3 years and less than 5 years	9
5 years and less than 10 years	12
10 years and less than 15 years	12
15 years and over	12

Employees with less than 1 year's service would receive 5 days' pay at the rate of the position last occupied for each month in which they worked.

The agreement also provides for the reimbursement for expenses and certain losses suffered by employees who, because of coordinations, are required to change their place of residence. Under this provision such employee would be reimbursed for all expenses of moving his household and other personal effects and for the traveling expenses of himself and members of his family, including living expenses during the time necessary for such transfer and for a reasonable time thereafter not to exceed 2 working days, used in securing a place of residence in his new location. Any employee furloughed within 3 years after having been transferred, would also be reimbursed for expenses, if he elects to move his place of residence back to his original place of employment.

The agreement further provides that an employee who is compelled to change his point of employment is to be reimbursed, at his option, for any loss suffered in the sale of his home for less

than its fair value. The carrier also must protect an employee against loss to the extent of a fair value of any equity he may have because of a contract to purchase a home or for any loss resulting from an unexpired lease of a dwelling occupied by him as a home. The agreement provides that no claim for loss shall be paid which is not presented within 3 years after the effective date of a coordination. The agreement also sets up machinery for determining what shall be determined as a fair loss due to the above causes.

In respect to proposed coordination between railroads which are parties to this agreement and those which have not participated in it, the agreement provides:

"The provisions of this agreement shall be effective and shall be applied whenever two or more carriers parties hereto undertake a coordination; and it is understood that if a carrier or carries parties hereto undertake a coordination with a carrier or carriers not parties hereto, such a coordination will be made only upon the basis of an agreement approved by all of the carriers parties thereto and all of the organizations of employees involved (parties hereto) of all of the carriers concerned. No coordination involving classes of employees not represented by any of the organizations parties hereto shall be undertaken by the carriers parties hereto except in accord with the provisions of this agreement or agreements arising thereunder."

COOPERATION INSTEAD OF DESTRUCTIVE CRITICISM—ADDRESS BY SENATOR MURRAY

Mr. ASHURST. Mr. President, last Monday evening I heard over the radio an address delivered by the junior Senator from Montana [Mr. MURRAY], wherein he discussed vital subjects in so well considered a manner that I asked him for a copy of the speech. I request that it be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

The purpose of government is not merely to protect the life and property of citizens, nor is its main object merely to aid and encourage the development of vast industrial and business enterprises, increasing the wealth and power of a nation. To be an enlightened, progressive government, it must also give consideration to the moral, social, and human problems that directly affect the lives, the happiness, and the security of its people.

In consonance with this philosophy our Government for the past 3 years has been engaged in an effort to correct the evils which have developed in our country due to our failure to give heed to correct principles of economics and social justice. Many wrongs have been redressed, and the widespread distress among our citizens has been largely relieved, yet much remains to be accomplished in order to correct the unbalanced economic conditions under which our country has been laboring.

As my time is limited, it will not be possible to review in detail the results which have been accomplished. In general, the administration has secured the enactment of legislation for the social and economic betterment and security of all the people, farmers, workers, businessmen, women, and youth of the country. It has sought by every means to raise the standards and living conditions of workers and place them on an equal footing in bargaining power with organized industry, and is seeking in every way possible to protect the people from exploitation, restore prosperity, and provide a more widespread and fairer distribution of the earnings of industry. It is sought in every way to give the common man a square deal and drive out of our economic life the wrongs and evils which contributed to bringing on the depression.

This is a partial statement of the social and economic progress which we have been making and by which the administration is raising millions of our citizens out of the depths of confusion and despair and restoring them to productive activities. The Nation can feel proud that we have had a President at the head of our Government who has honestly sought and is still seeking in every way to place the common welfare of the ordinary citizen above the interests of individuals or groups. The philosophy that sound government must concern itself with human rights above property rights has never been more ably and effectively applied than during this first term of President Franklin D. Roosevelt.

But now, as signs of prosperity multiply on every hand and the elections are approaching, a bitter antagonism against the Roosevelt administration has developed. It seems to raise its hydra-headed form like some nemesis intent on evil to our country, seeking to confuse and befuddle the Nation, block the road to recovery, and thrust us back into the chaotic conditions from whence we have been so eagerly seeking to extricate ourselves. Instead of cooperation we are getting destructive criticism. Make no mistake, my fellow citizens, there can be no genuine recovery, nor return of real prosperity and happy conditions for the people of this country, unless there is developed a spirit of cooperation among the various groups that constitute the forces back of our economic life. No one objects to honest, constructive criticism, but extravagant abuse and bitter invective can serve no purpose.

Following the election of Roosevelt and the crisis in the early part of 1933, when the country was floundering in confusion, businessmen throughout the country recognized the dangerous conditions confronting the Nation. Everyone realized that cooperation was essential to allay fear and again start the wheels of progress revolving. There was no criticism then. There was cooperation in thought, in word, and in action.

Under the splendid leadership of President Roosevelt we have made rapid progress during the intervening years. During the current year almost daily the press carries encouraging news of improvement in business conditions. Yet now comes this paradox. Just as we are achieving success in every direction, we are now beginning to hear volumes in the way of destructive criticism and bickering. In view of the progress which the administration has made in restoring the moral, social, and economic well-being of the country, it would seem that it would be entitled to the highest degree of good faith, good sense, and gratitude from every spokesman of business and industry.

Nevertheless, while the people in general are industriously cooperating in an effort to maintain and extend the prosperous conditions already achieved, these self-appointed spokesmen for industry are satisfied with nothing. They seem to be willing to court complete annihilation of the capitalistic system rather than lose any of the perquisites or prerogatives of big business. Fortunately, the great majority of businessmen are supporting the President and are candidly acknowledging the splendid improvement which has taken place in our business and industrial life, and the benefits the country is receiving from his successful efforts to correct economic evils and reestablish the purchasing power of the people. Perhaps this strange paradox may be explained on the basis that this is an election year and that it is politics we are hearing, not economics.

In line with this spirit of antagonism which I have mentioned, one of our great metropolitan newspapers, the New York Sun, recently published an article designed to arouse the animosity of the eastern industrial sections against the West by this outstanding organ of the Republican Party. I quote from this article:

"The sovereign State of Montana paid into the Federal Treasury in all internal revenue for the year ending June 30, 1935, the sum of $6,165,173. Montana in 1935 received, on order of the executive department, the sum of $9,084,000 in direct relief funds. Thus in direct relief funds alone, Montana took from the Federal Treasury $2,900,000 more than it contributed to the support of the Federal Government."

Now, every informed citizen knows that Federal relief money was allocated solely on the basis of need. Need was calculated on the basis of deficiencies in local relief budgets. Naturally, the rich industrial States, that for many years have profited under the economic and tariff policies of past administrations, at the expense of the agricultural States, had much larger local resources than these poorer Western States. The story entirely ignored this variation in the comparative situation of the States affected by the depression. This criticism is the old "Grundy" argument which we have heard before. You will recall Senator Grundy was the representative of business interests, who declared the Western States should talk "darned small" in national matters and inferred that the industrial States paid the taxes and had a right to dominate the situation. Of course, there is not the slightest justification for this attack. It is one of the major functions of National Government to equalize in certain spheres of national interest variations in the economic capacities of its political subdivisions.

Moreover, it is obvious that internal-revenue receipts collected in a particular State do not constitute the sole amount paid toward Government expense by the people of that State. Modern business is not confined to State lines. Whenever a package of cigarettes is manufactured in North Carolina and consumed in Montana, the Federal tax of 6 cents is collected on the cigarettes in the State where it is manufactured. Any reasonable and intelligent person can, nevertheless, see the tax was not paid by the State where it may have been manufactured, but that it is actually paid by the consumer in Montana, where the cigarettes are purchased. This is a striking example. Yet the New York Sun would credit this entire sum to the people of North Carolina.

It was also contended that New York pays all the customs duties on imported goods which happen to enter the country through the port of New York for distribution and consumption throughout the Nation. These attacks are baseless and unjustified. Eastern corporations derive the bulk of their earnings from other States.

The industrial East, as I have suggested, profited enormously from the tariff policies of the Nation. These policies eventually impoverished the agricultural States, destroyed the foreign markets for agricultural commodities, and started western farmers on the toboggan slide to bankruptcy. During this same period the industrial sections were amassing fabulous surplus earnings and paying the most astounding dividends and salaries in all history—salaries and bonuses, mind you, paid to executives and directors, not wages to workers. Surely the East should be more just to the agrarian States. Without the restoration of the purchasing power of the farmers of this country there can be no recovery. Failing in this achievement business and industry will, by the force of circumstances, be relegated to again wallow in the mire of depression. The rehabilitation of agriculture is, therefore, an absolute condition precedent to any industrial recovery of the country. It is not a problem for Montana or the western farm States. It is a problem of the whole country.

Included in the legislation for relief of farmers is the soil-conservation measure designed to rebuild soil fertility and restore parity incomes to the farmer so as to enable him to operate his farm, pay his debts, and live in decency and comfort. The

farmers, also, are seeking relief from burdensome debts which during the past generation have been huddled on their backs as a result of our economic system and tariff policies which destroyed their markets, ruined their prices, and made it impossible for them to carry the load. Farmers also ask protection from the unfair methods of manipulating commodity prices on the commodity exchanges of the country. Farm prices are determined to his disadvantage by gamblers and speculators on commodity exchanges. Just like security prices were manipulated on the New York Stock Exchange prior to its regulation by the Securities Exchange Commission. Under these manipulations of prices the farmers are being annually fleeced out of just returns on the products of their farms. This is a problem the whole country should be interested in. It involves simply the protection of the farmer in the fruits of his labor. It is simple justice.

I would like to refer briefly to the Resettlement Administration Service in bringing about resettlement of the farmers in the distressed and drought-stricken sections of the country. Recently a loud newspaper and partisan barrage has been leveled against the Resettlement Administration, which has already done and is now doing an indispensable work in getting these broken-down farmers back to a basis where they are self-sustaining.

These are all problems not of particular sections but of the whole Nation. They are constructive proposals and are essential in any program for the restoration of purchasing power. The solution of these problems will work to the benefit and advantage of business and industry as well as agriculture.

Mass unemployment results from Nation-wide conditions and abuses. The closing down of mines in the West or the textile mills in the East is the result of national conditions. Thus the ultimate solution must be a Federal one with the full cooperation of American industry. No section or group in the country can shirk responsibility. In this age of abundance with its paradox of poverty amidst plenty a way must be found by which the masses can purchase the things they have learned to want. There is only one way to all-round prosperity, and that is by increasing the mass purchasing power to balance mass production. The farmers and the workers are all consumers of the products of industry and agriculture. They must be enabled to purchase their share of that produce.

No section of this country is independent of the other. Anybody who has ever looked upon those great chimneys of the industrial centers and seen the smoke of manufacture rising to the heavens—incense which industry burns before the throne of God—must realize the close interdependence between all human beings in the world today. Everything that enters into manufacture, the very stones of the structure in which industry operates, the very beams of the building in which it is sheltered, the raw materials of manufacture, the clothing and food of the workers, all come from the outside. The dweller in the cities depends completely for his sustenance upon the labor of the entire country.

If complete cooperation can now be had, the scourge of this depression which has been laid on the backs of our people will soon be converted into the greatest blessing which Providence has ever extended to us. It is the unbroken lesson of history that sacrifices imposed upon one generation are the necessary price of every great advance, material and moral, accomplished by other generations. After our Civil War, notwithstanding its enormous waste, the substitution of free labor for slave labor opened a fountain of prosperity which more than repaired in 5 years the terrible destruction of battle.

Now, in this age, if we can, by correcting the economic mistakes we have made, restore the purchasing power of the farmer and worker, spread employment so as to absorb the labor of all our people in useful production, and stimulate full industrial activity, the ravages and distress which we have suffered will be soon repaired and the people of this country will realize a higher plane of prosperity than has ever been achieved before.

ADDRESS BY ATTORNEY GENERAL AT CONNECTICUT DEMOCRATIC CONVENTION

Mr. BARKLEY. Mr. President, I ask unanimous consent to have printed in the RECORD the address delivered by Hon. Homer S. Cummings, Attorney General of the United States, at the State Democratic convention of the State of Connecticut, New Haven, Conn., May 15, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Ladies and gentlemen of the convention, it is an agreeable experience to return to my home State and to have an opportunity to salute old-time friends and party associates upon the eve of another great Democratic victory. Here I find the consoling presence of my colleagues of other days, and here, too, I see the ardent and shining faces of the younger men and women who have come into the party to renew its vitality and to carry on its great traditions. I felicitate the leaders of our organization upon the happy manner in which these groups have been brought together and molded into a coherent and united force.

To our able Senators and Congressmen, to our efficient State chairman and his associates upon the State central committee, and to all the faithful members of our party who are gathered here tonight I extend my affectionate greeting.

I pause to pay especial tribute to the nestor of Connecticut Democracy—Gov. Wilbur L. Cross—whose scholarly attainments, broad statesmanship, and, may I say, salty personality have added luster to the great office he administers with such marked distinction. He has won an enduring place in the affections of the people of Connecticut.

Members of the convention, we have come a long way together, and there are many things yet to be done. The last 3 years have been fruitful years. Our people have successfully passed through a great crisis. When the present administration came into power our country was in the throes of a depression far more devastating than war. Our standards of civilization were being progressively impaired. Our people were being forced to accept a less and less adequate scale of living. Our financial structure was in ruins. Our industries had practically ceased to function, and we trembled upon the verge of an economic abyss which threatened to engulf the Nation. The great captains of industry and finance, who had been so potent in the old days, and who had assumed that they possessed a patent upon prosperity, were in a state of bewilderment bordering upon abject terror.

They saw nothing ahead but universal bankruptcy and the liquidation of assets under conditions so desperate that they could not and would not have been endured by any free people.

Do not for a moment imagine that I exaggerate. During the Hoover administration, 6,067 banks were forced to close their doors. The managers of the financial institutions that still survived were, in their desperation, calling in loans, selling the securities that were pledged to meet them, foreclosing mortgages, and restricting credit, thereby accelerating the speed with which we were approaching complete chaos.

The startling withdrawals of gold for hoarding or for export to foreign countries, which took place in February and the first few days of March 1933, made further gold redemptions impossible. Those who could lay hands upon gold bullion, gold coin, or gold certificates were carrying them stealthily to storage in safe-deposit boxes. During this 30-day period, $476,100,000 in gold had been withdrawn from the Federal Reserve banks and the United States Treasury, of which $311,000,000 was for export, or to be earmarked for foreign account. Simultaneously there was a great demand for money of all kinds, for domestic hoarding. No man knew what the next day might bring forth. Foreign trade had been brought to a standstill, price levels were falling everywhere, and the burden of debt was beating our people to their knees. Failures and bankruptcies had reached unparalleled proportions. Our agricultural population was in dire distress, and farm evictions were taking place at the rate of more than 200,000 a year. Uncounted millions were out of work.

Nor is this all. The funds of charitable organizations and the resources of the generous, who had been contributing to the help of those less fortunate than themselves, were being depleted to the vanishing point. The morale of our people had been profoundly shaken; and there were repeated outbursts of violence in large sections of our country previously known as among the most orderly and dependeable in our Nation. Upon every hand there were portents of evil which no responsible statesman dared disregard.

I do not pause to assess the responsibility for these conditions or attempt to trace their source. The essential fact is that they actually existed and were bequeathed by the outgoing administration to Franklin Delano Roosevelt. Did he lack vision? Did he lack resourcefulness? Did he lack courage? Did he lack devotion to the public service? Did he lack the gift of leadership, or the capacity to guide in a great national emergency? The united voice of America testifies to the contrary.

His immediate problem had to do with the financial and banking crisis. On Monday, March 6, 1933, he issued his first proclamation which suspended the operation of all of our banking institutions throughout the country, prevented their destruction, and afforded an opportunity for rehabilitation. That dramatic and drastic exercise of Presidential power was a superb act of courageous statesmanship—and it saved the Nation.

From that date to the 31st day of January 1934 the President, acting in close cooperation with a patriotic Congress, approved of a series of acts and promulgated supporting Executive orders that effected a fundamental change in the financial and monetary structure of our country. Gold and gold bullion were swept into the Treasury of the United States; gold certificates were placed where they were readily within the control of the Government; foreign exchange was regulated; banks were progressively reopened; gold hoarding was brought under control; parity was rigidly maintained; and a complete transition was effected from the discredited gold-coin standard to a gold-bullion standard, with the content of the dollar fixed at an endurable amount.

These measures tell the inspiring story of a troubled nation finding its way successfully out of financial chaos. Nor was the President content to rest with these achievements. He realized, even if his critics did not, the extent of the task involved in the effort to restore the broken life of America. The need was imperative, and he acted with swiftness and decision.

The President would be the last to assert that all of the agencies he set in motion have achieved their full purpose, or that they have been free from defects of administration. These things are inherent in any great national program. But no matter what the captious may say about the alleged mistakes of the Government at Washington, it cannot truthfully be asserted that it is in the hands of selfish interests, or that any ulterior purpose dictates its policies. We have placed the Government of the United States at the service of the people. We have shifted the money center of America from Wall Street to Washington, and, if I mistake not the temper of our people, they approve of the change.

Who is it then that is dissatisfied with the work of the administration? Not those who have been aided by the Agricultural Adjustment Act. Not those whose farms have been saved by the Farm Credit Administration. Not those who have been able to refinance their mortgages at a lessened rate of interest through the activities of the Federal Housing Administration. Not those whose homes have been saved by the Home Owners' Loan Corporation. Not the stockholders or creditors of banks, insurance companies, and railroads that have been rescued by the Reconstruction Finance Corporation. Not those who have received aid or found work through the Public Works Administration or the Works Progress Administration. Not the 1,250,000 boys who were taken from idleness and the streets and given opportunity and training in the Civilian Conservation Corps. Not the 52,000,000 American citizens whose deposits in the banks of the country have been made secure by the act creating Federal deposit insurance. Not the laboring groups in whose interest the National Recovery Administration established collective bargaining, improved working conditions, outlawed the sweatshop, abolished child labor, and gave to industry an opportunity for constructive leadership.

Not those whose humanitarian instincts approve of the Social Security Act and its provisions for old-age insurance and grants to States for widows' pensions, child welfare, and public-health service. Not those who recognized the need of abolishing holding companies formerly connected with the banks of our country which made it possible for reckless or corrupt financiers to speculate with the savings of depositors or waste the funds entrusted to their care. Not those who favor stock-market regulations to protect the public in connection with securities offered for general sale. Not those whose utility rates have been reduced through the activities and influence of the Tennessee Valley Authority. Not those who wanted to see the price level lifted and the debt burden of the country made bearable. Not those who have followed international developments and have noted the fruitful efforts to expand our markets and to revive foreign trade. Not those who are gratified by the doctrine of the good neighbor, which has restored a feeling of friendliness amongst the nations on this side of the Atlantic. Not those who realize that the American dollar is the soundest money unit on earth, and that there is a larger metallic reserve behind every Government issue than at any previous time in our history. Not those who are proud of the fact that the credit of our country stands higher than that of any other nation on earth. Not the great masses of the people who see evidences of increasing prosperity upon every hand.

Who, then, I repeat, are dissatisfied? No doubt thwarted political ambitions, unrelenting partisanship, and ultraconservatism account for the major portion of the forces arrayed against us. These things we understand and accept. There are, however, other and far more sinister groups we must take into account. They think primarily in terms of dollars, or the power that dollars represent, and feel little concern for social measures that sound in terms of humanity. I am puzzled by the thought processes of some of these influential and disgruntled citizens who, for so many years, have been riding high, wide, and, let me say, not so very handsome. Why should they be enraged because prosperity is returning? Why are they not content to accept it gracefully? Can it be that they are not willing to have the country prosper except upon their own terms? Why do they not turn in and work with the rest of us to meet our common problems? Are we not all Americans? Is this not one country? Are the people in distress not our friends and brothers?

I sometimes think that these incredible people who report greatly increased profits and simultaneously denounce the President must be harboring an inferiority complex. Somewhere deep down in their subconscious minds there resides a sense of frustration that releases itself in the unbridled outbursts with which, unfortunately, we are all so familiar. They are in the inglorious position of sitting on their money bags, watching the world go by, uttering cries of protest and terror, while they accumulate, at the same time, constantly increasing bank balances.

The New Deal is not on trial. I do not come to defend the New Deal or the policies of the administration. I proclaim them as the source of our salvation and our security. Those who resist social advance, those who oppose change, those who accept the past as good enough for the present, those are the groups that are on trial before the conscience of their fellow men.

To assume, as some of the less-informed critics of the administration are inclined to do, that all that is needed to achieve even a higher degree of prosperity is to terminate Federal effort and let nature take its course is to display an almost childish misapprehension of the problems of modern life.

If, as some of our Republican friends assert, recovery began with Roosevelt but not because of Roosevelt, then at least we are permitted to observe that it was a peculiar and happy coincidence.

There are those who complain that the Budget has not been balanced. If the President had balanced the Budget at the time his critics insisted that he should do so, how many of our citizens would have been forced to go without food? Which was the more important thing to do, balance the Government's Budget or balance the people's budget? Manifestly it was impossible to do both at the same time. If this be treason to the doctrines of sound finance, let the critics of the administration make the most of it.

Of course, recovery has cost a great deal of money, but far less than unfriendly critics assume. During the world conflict we spent nearly $26,000,000,000 for the destructive purposes of war. We have appropriated only a little more than half that amount for the constructive purposes of peace. Only a part of this sum has thus far been spent, a large portion of which is recoverable.

Nor do our critics allow any credit for the public buildings that have been erected, the great bridges that are being flung across our rivers, the thousands of leagues of good roads that are being laid, the dams that are being built, and innumerable other projects that add to the wealth and well-being of our people.

This outpouring of public credit had for its primary object the rescue of millions of Americans from the impossible position in which the economic collapse had placed them. The purpose was to preserve to them their private ownership of property, their right to conduct their enterprises as independent and useful factors in American life, and to avoid the processes of enforced liquidation, by which the great bulk of our fellow citizens were rapidly being regimented into the growing army of unemployed who were becoming, year by year, increasingly dependent on the centralized control of wealth in fewer and fewer hands. In short, it was by means of these expenditures that we salvaged not only the material but the moral and irreplaceable assets of a free people.

Manifestly there are many grave problems yet to be worked out, which must be approached not only with all the intelligence the Nation can summon, but with a devotion amounting to consecration.

Do you suppose for a moment that the Republican Party as now constituted, or as it is likely to be constituted, would be able to grasp the social consequences involved in these great economic dislocations or be willing to adopt the measures of relief that existing conditions demand? It would be a vain and futile hope, indeed.

When the history of this era is written, in the cool and contemplative days of a later period far removed from the animosities and misunderstandings of the present time, President Roosevelt will be more and more clearly revealed not only as a friend of human justice and social progress, but as the protector and defender of our accredited form of government, which, by his genius, he has vindicated.

The dawning future is aglow with promise. The gross income of our farming groups has increased approximately $3,000,000,000 a year since 1932, and more than 30,000,000 of our people in the agricultural areas, instead of living under the constant fear of eviction and penury have developed a power to buy that has stimulated activity in every nook and corner of our country.

Statistics recently compiled by the Federal Reserve Bank of New York disclose that 909 corporations, consisting of 700 industrials, 149 railroads, and 60 utilities, made a net profit of $142,000,000 in 1932. These same companies in 1935 made a net profit of $1,568,000,000, being more than a tenfold increase. One great automobile company in 1932 made a profit of $165,000; in 1935 it increased its profit one thousandfold to a total amount of $167,000,000. A summary by the National City Bank of the profits of 2,010 companies showed earnings for the year 1935 of $2,541,000,000, an increase of 42 percent over those for 1934, which in turn had been far better than 1933 and 1932. This year the statistics are still more encouraging. Everywhere, on every hand, in every line of activity, there is a constantly improving situation.

Those who were tongue-tied in the great crisis and found their voices only when the danger passed are in no position to criticize either the policies, the purposes, or the achievements of the administration; and those who have no better program to offer should learn the grace of silence. President Roosevelt has done more than restore material prosperity. He has restored the faith of our people. We stand upon his great record.

Every President who has guided this Nation through a troubled hour has been denounced as a destroyer of the Constitution, as a usurper, as a dictator, and as an enemy of honest wealth. Turn back the pages of your history for a moment and read this characteristic attack upon our first President:

"The American Nation has been debauched by Washington. * * * The President has violated the Constitution."

So virulent were the assaults made upon him that, in a moment of exasperation, Washington said he would rather be in his grave than in the Presidency.

In 1862 a leading northern newspaper published the following statement about Lincoln:

"We saw the Executive power grasp in one hand the sword and the purse of the Nation and in the other the legislative and the judicial authority, and hold them in relentless grip to the complete annihilation of our constitutional rights. * * * We saw trade disordered, Government finances ruined, and enormous debt piled incalculably high, intolerable taxes * * *. We saw the superb Constitution, under which our country has grown great and respected, torn in shreds."

Such were the assaults made upon President Lincoln when he was striving to preserve the Government itself in the dreadful hours of the Civil War. And now, in many influential quarters, similar attacks are being made upon President Roosevelt who has carried the Government, the Constitution, and the people safely through the peril and misery of an unparalleled depression to a new and happier day.

For all practical purposes the election is over now. The vast majority of our people devoutly believe that the President is striving to the utmost of his ability to make this a better country in which to live. Never before has the average citizen felt more confident that those in charge of the administration have a deep concern for his welfare and that the Government is his friend.

I say to you that the people do well to love the President. By an unerring instinct they recognize his faith in them, his passion

for justice, his espousal of the cause of the exploited, and his devotion to our institutions. They understand full well the attacks that have been made upon him. They are not disconcerted because he is unpopular with the beneficiaries of the abuses to which he has put an end, and they love him for the enemies he has made. No nominee of reaction, no candidate content to deal in platitudes, no sterile traditionalism, no program of abuse can seduce them from their faith in their great leader.

ADDRESS BY CHAIRMAN FARLEY AT VERMONT DEMOCRATIC STATE CONVENTION

Mr. BROWN. Mr. President, I ask unanimous consent that the address delivered by Hon. James A. Farley, Postmaster General and chairman of the Democratic National Committee, before the Vermont Democratic State convention at Barre, Vt., on May 14, 1936, be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

The presence of this representative gathering today is convincing evidence that the Democratic Party is entering the campaign of 1936 in the healthiest condition of its history. The party is strong because facts tell the story and the people of this country know what the administration has done to bring order out of chaos and to restore the economic lifeblood of the country.

I remember that 4 years ago a chorus of hearty chuckles greeted the announcement by our candidate for the Presidency, Mr. Roosevelt, that he intended to deliver a campaign speech in the rock-ribbed Republican State of Vermont. It was an unprecedented action for a Democratic candidate and the press described it as merely a friendly gesture by Governor Roosevelt toward a neighboring State.

But after the election returns were counted in the fall of that year most people found it necessary to change a great many of their previous political beliefs. True enough, the Democratic Party did not carry Vermont, but it made substantial gains in this State and swept the rest of the Nation. The Democratic tide was strong in 1932, and it is running even stronger right at this minute. The great outstanding fact about the campaign of 1936 is that there is no longer any such thing as rock-ribbed Republican territory, and our adversaries know it. I make this statement at the opening of my remarks to forestall the usual comment that my coming here is another idle gesture. It is no such thing.

The great trouble experienced by the Roosevelt administration is in keeping up with our critics, who keep up a continual chant of complaint but who never seem to agree on what they believe is wrong with the administration. Just as soon as we answer one set of complaints they have an entirely new one.

Several months ago it was fashionable to charge that the policies of the administration were retarding the natural forces of recovery. They got away with that false argument until the business reports for 1935 and the first quarter of 1936 were made available. Then they found themselves confronting the undeniable fact that business in every section of the country was improving, that farm prices were up, and that most industrial units were making more money than they ever made before.

I find that Vermont is no exception to the rule. I find that the State has 4,000 more pleasure cars than it had last year. I find that the profits made by one Vermont cooperative creamery in 1 year were more than the par value of its stock. I find that shipments of Vermont maple sugar were 70 percent greater in 1935 than they were the previous year. The lumber business is better, agricultural prices are better, the banks are in fine condition, and most Vermont business concerns are making profits for the first time in years.

That is the true situation and I want to make it as emphatic as I can right here and now that this business recovery is the direct result of the wise policies inaugurated by the Roosevelt administration. I go further than that and say it would have been dangerous for this country if the deflation curve had been allowed to continue downward and if the do-nothing policies of the Hoover administration had been allowed to continue in force. As a distinguished newspaper editorial writer recently expressed it, the policies adopted by Mr. Roosevelt were insurance against civil disorders and possible revolution and the price has been more than worth while.

Just at this moment it is especially fashionable to criticize and condemn one of the finest of the many excellent measures put in operation by the Roosevelt administration to tide this country over the great emergency of the past few years.

I refer to the work-relief program which provided the necessities of life for millions of men, women, and children who otherwise might have starved, and which at the same time has provided a construction program of lasting benefit to the Nation. The most significant thing about the work-relief program is the fact that it provided work in the big cities of this country where the unemployed existed in unprecedented numbers. It was far better and far safer to have these men employed than it would have been to have them congregating in gangs on the street corners and complaining about their unfortunate condition. Idleness is the mother of civil disorder and every student of history is well acquainted with that fact.

I want you to bear in mind that these critics of work relief were silent and unheard of when that policy was adopted. If these self-appointed experts and so-called leaders had anything to say in the time of the great crisis, no one remembers it because no one paid any attention to what they said. But now that the country is on its feet again, they rush out of hiding and spend their days finding fault with President Roosevelt, who did more to bring this country back than the whole of them put together.

There is no use in asking these people to stick to the facts on work relief although those facts are readily available. They continue day after day to publish and broadcast ridiculous and distorted statements about what they call boondoggling and when the facts were disclosed every one of these charges were exploded. In reply to these untruthful statements about work relief, I am going to call your attention today to the judgment rendered on that policy by 100 men in this country who should know more about work relief than any other group. The United States Conference of Mayors is an organization of those men entrusted with running the government of the largest cities of this country. They know by first-hand knowledge the dangers that might arise from mishandling the unemployed problem. The conference of mayors made a survey. Recently, the conference published a report on the conclusions reached by the 100 mayors of the largest cities in this country. This report said in part:

"The integrity and permanent usefulness of the city projects which have been approved by the Federal Government need no apology from anyone. Nor do the cities ask the Government or the President to defend the W. P. A. work which is being assisted by Federal funds.

"These projects are the cities' own projects. All the Government has done is to approve or disapprove what the cities have submitted.

"We are of the opinion that any honest and impartial analysis of the work being prosecuted in the important cities of the country will reveal that practically every project represents a useful and, in most cases, a permanent public improvement."

I want you to bear in mind that the testimony I have just quoted came from 100 mayors of the largest cities in the country, Republican, Democratic, and Independent. I want you to bear in mind that they were unanimous in praising the work-relief program of the Federal Government. These men, more than any other group, know what might have happened if a weaker government had been in control in Washington. Can you ask better or more convincing testimony for the work-relief program? Do you realize now why the Republican National Committee, the Du Pont Liberty League, and the hostile press, always keep silent regarding this report of the mayors? They know the facts are against them, so they ignore the real situation and continue their misrepresentations. So much for work relief.

I am going to review very briefly now what the Roosevelt administration did to restore and revive the banking structure of this country without which the recovery we now enjoy would have been absolutely impossible. I want you to recall that these wise policies were opposed at every step by the same people who are now finding fault with the administration. They did everything in their power to destroy the confidence of the country in the Roosevelt administration. Remember that they predicted chaos and confusion for the banking world if the Roosevelt policies were placed in operation. What has happened? On the contrary the banking structure is stronger today than it ever has been in the history of the country. More than that, the people have confidence because their deposits in most cases are insured; they know that the fearful orgy of bank closings, a frequent occurrence under Republican rule, cannot happen again.

Most of us recall the lightning speed of action which President Roosevelt employed in clearing up the banking and financial mess left on the doorstep of his administration by the Hoover regime. We know how he revitalized the banking structure. We recall that later the Glass-Steagall bill was enacted to correct bad banking practices; we remember the insurance of deposits, and the strict regulations put into effect to prevent the issuance in the future of worthless securities. But few people know of the wonderful good done to the banks of this country by the Home Owners' Loan Corporation and by the Farm Credit Administration. Those two Government organizations did more than save 1,000,000 home owners and 500,000 farmers from eviction. They took over frozen bank paper and gave them liquid paper at a time when such action was sorely and vitally needed by the banks of this country. It was a wise and far-seeing use of the credit of the Federal Government. A real-estate authority, writing in a Boston newspaper not very friendly to the administration, said this:

"The Home Owners' Loan Corporation saved the country, protected the banking structure, and, if it lost every penny it loaned, it would still be the finest thing in the United States, but it will probably not lose $1, so well managed and manned is this sound Corporation, set up to relieve distressed home owners."

In considering that testimony, please remember that the Home Owners' Loan Corporation has loaned more than $2,000,000,000 and yet this writer says if every penny were lost, it would still be a good investment. But he adds that the chances are Uncle Sam won't lose a nickel because the Corporation has been so well managed. And yet a few years ago we were behold solemnly warned that the entrance of the Federal Government into that business was a grave error, and that the final loss would be terrific.

These Roosevelt critics were nowhere to be found when the President and Congress were deciding on the great and worthy policies which I have just described. They remind me of guerillas who run and hide when the battle is raging fiercely and then

rush out after the battle has been won, to start sniping at the brave leaders who won the day.

One of these loud-voiced critics of President Roosevelt worked himself up into a terrible state the other night because he said he never heard of the men whom President Roosevelt has around him running the Government in Washington. That's just like criticizing General Pershing because he helped win the World War with a lot of doughboys whom no one ever heard of before.

The great fact is that President Roosevelt won the war against the depression, and he did it with men who stood loyally by his side in the great emergency. This critic I have just mentioned roared his disapproval of every policy advocated by the Chief Executive and every one of them has worked out well. Would anyone want him in Washington?

As I said before, facts tell the story. Banking deposits now are more than $24,000,000,000, or above even the total amount reached in the boom peak of 1929. That is a marvelous record, and it is due solely to the wise policies of the Roosevelt administration. That money belongs to the frugal, thrifty people of the United States, and they know they are not going to lose it.

I know figures and statistics are boresome, and I am going to avoid them as much as I can. But in 1934 and 1935 only 91 banks failed in this country with total deposits of $47,000,000, almost every penny of which was saved to the depositors by insurance.

In the 4-year period of 1930 to 1933, inclusive, and, of course, including the great banking crisis, more than 7,843 banks in this country were compelled to suspend operations, and few of those reopened. The deposits in those banks reached the stupendous total of more than $6,000,000,000. All of that huge amount was not lost but certainly a large part of it was. The total loss was probably over $2,000,000,000.

We hear a great deal these days from our Republican foes about high taxes. I wonder if you can think of a higher tax than the loss to a poor man of his life savings. Just think of the terrible losses suffered by the people of this country because Republican administrations flatly refused to correct the evils of the banking structure. No wonder that bank deposits shrunk more than $7,000,000,000 during the great depression.

The people of Vermont can think for themselves, and they know that the funds sent here by the Federal Government during the depression turned the economic tide. It has been conservatively estimated that more than $62,000,000 has been allotted, loaned, expended, or disbursed in the Green Mountain section since March 1933. The people of Vermont are honest, hard-working people who pay their bills, and they will pay back their borrowings to Uncle Sam just as quickly as they would any other creditor. That fact is amply proved by the records of the Reconstruction Finance Corporation, the Home Owners' Loan Corporation, and the Farm Credit Administration.

But I want you to pause and consider the effective work done by that $62,000,000 in protecting your homes, your savings, and your business during the last few years. You know better than I how many banks were saved, how many people were kept employed, and how many merchants were kept from going out of business. You know that relief money was cash money and that without it the retailers of Vermont would have been hard pressed indeed.

The next time you hear one of these self-styled economists telling about the natural forces of recovery ask him why those forces didn't stop the 8,000 bank failures under Mr. Hoover. And if that fails to convince him, remind him of the thousands of business failures during the same period.

It might be well at this moment to consider briefly those forces which are now so vigorously opposing the Roosevelt administration and hoping wistfully that something will turn up between now and November to bring about its defeat. Washington is overrun with the highly paid publicity experts of the Republican National Committee who are swamping the press with daily outpourings against the administration. It was this highly paid publicity staff which was responsible for the speech by the Republican Senator who said the Roosevelt administration had driven the people to eating dog food. The Senator is an outstanding candidate for the Presidency, and I must confess he has boiled down the Republican issues better than anyone else to date.

Of course, the newspapers pointed out you can buy good wholesome milk and bread and other human foods—produced in large quantities in Vermont—much cheaper than you can buy dog food, but a mere fact like that means nothing to the Republican publicity staff. Like the Republican "brain trust", it was so ridiculous that the people of the country laughed it out the window. In their frenzied zeal to halt the onward rush of the Roosevelt administration the Republicans fail to realize that until they get a program and a candidate who means something to the people of the United States they might as well shut up shop. This business of condemning everything the administration does has simply disgusted the country. After all, you can't fool all the people all the time.

Then, of course, there is the Du Pont-owned Liberty League, which has become strangely silent during the past few months or ever since it was disclosed that the sponsors of the league will pour out money to anyone who promises to say something nasty about Mr. Roosevelt.

The Liberty League, as you probably know, is a sport model of the Republican National Committee. The same people own both cars, and for the sake of convenience sometimes they use one and sometimes the other. I know a lot of people who would be ashamed to be found riding in the Republican model who don't mind taking a seat in the sport model. But both cars are headed down the same blind alley and both will arrive at the same disappointing end.

The Senate committee has made some interesting revelations about the Du Ponts, who happen to be making more money as the result of the Roosevelt policies than they ever made in their lives before. It was disclosed that the Du Ponts were putting up the cash for the so-called Farmers' Independence Council, which, rightly enough, had offices on Wall Street, N. Y. I think any farm organization run by the Du Ponts should have Wall Street offices. But I wonder what the real dirt farmers of Vermont think of tactics like that? I wonder if they want the Du Ponts to represent them in advocating the kind of agricultural policies this country should have? Of course, they don't; and the farmers of Vermont, like those everywhere, resent this piece of deceit on the part of the Du Ponts and their wealthy friends.

The American Liberty League itself is now so discredited that it is no longer worth bothering about or answering. But it is well to remember that the rich men who run the Liberty League are also financing almost every other organization which is engaged today in opposing the Roosevelt administration. The men who contribute to the Liberty League are also contributing large sums to the Republican National Committee. Do you think they are doing that to help the farmers and the business interests of Vermont? Not on your life! They are pouring that money into the Republican organization because they intend to control it for their own interest.

The press of the country is pointing out that the Republican leadership is suffering from a "defeatist" complex because the leaders know very well that the party is going down to a crushing defeat in the fall of this year. The G. O. P. is going to take the worst defeat of its career because it has allowed itself to come once again under the domination of the wealthy Liberty League sponsors, who never seek anything but their own unselfish ends. In primary after primary the people of this country have shown that they resent this old, bankrupt, Republican leadership. In large States like California, Illinois, Wisconsin, and Pennsylvania President Roosevelt, although unopposed, has polled a larger primary vote than his Republican opponents combined. After all, the attitude of the voters is what tells the true picture of conditions in this country today.

I wish to close my remarks by urging you to bring the facts before the people of Vermont. Let the people know what honest, impartial observers feel about the policies of the Roosevelt administration and the result is a foregone conclusion.

The proof will come early next month when the Republicans gather in Cleveland to write a platform, which will endorse farm relief, relief to the unemployed, social insurance, and many of the other fine policies placed in operation by the Roosevelt administration. Imitation is always a sincere form of flattery, but in this case it will be more than that—it will be a confession of defeat on the part of our Republican opponents.

Vermont, like the rest of the country, may congratulate itself on the fact that our President for the next 4 years will be that great leader and outstanding statesman, Franklin D. Roosevelt.

PEACEFUL CHANGE WITHIN THE SOCIETY OF NATIONS—ADDRESS BY JOHN FOSTER DULLES

Mr. POPE. Mr. President, I ask unanimous consent to have inserted in the RECORD an address on the subject Peaceful Change Within the Society of Nations, delivered at Princeton University on March 19, 1936, by Mr. John Foster Dulles. This address is so scholarly and informing that I think it deserves a place in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

I have chosen as my topic the subject of "Peaceful Change Within the Society of Nations." Before approaching this in terms of the concrete, I ask you to permit me some abstract consideration of the problem of change. We can perhaps thus find certain general principles which will be relevant to our subsequent discussion.

THE NATURE OF THE PROBLEM OF CHANGE

We are becoming increasingly aware of the dynamic character of the world in which we live. Formerly a large part of what surrounds us was classed as "solid" and "static." Step by step, as our knowledge has progressed, we have had to discard such views. We now know that everything is in motion and that, if there is any one principle of general applicability, it is that of movement and of change. We still speak, to be sure, of the "static" and the "maintenance of the status quo", just as we still speak of the "rising" and the "setting" of the sun. But such phrases are no longer looked upon as expressing scientific truth. Actually nothing is static; change is omnipresent and the status quo is never maintained.

In addition to accepting the inevitability and universality of change we note that change greatly varies in its manifestations. Some changes are gentle and benign; others are violent and destructive. If we seek an explanation of these variations, we find that violent and destructive change is usually consequent upon dynamic forces being restrained or repressed by some rigid envelope. The forces then tend to pile up and concentrate in intensity until finally they burst forth with violence. On the other hand, dynamic forces which are readily diffused do not manifest

themselves in any such abrupt and destructive manner. Change in that event is gradual and peaceful.

What is the role of intelligence in a world thus dedicated to movement and change? One certain thing is that intelligence must accept the inevitability of change and that such acceptance must be given irrespective of our ability to rationalize change or comprehend the nature of all the forces that compel it. We cannot, of course, avoid speculating on such matters and, perhaps, regretting the apparent futility of much change. However, the greatest futility of all would be to assume that the law of change can be suspended either by our ignorance or by our disapproval. We may indeed set ourselves up in opposition to change. But if we thereby delay the forces which we oppose, we merely assure their more violent ultimate manifestation, with the result that it is we who are swept aside. Change is the ultimate fact to which we must accommodate ourselves.

If, however, intelligence cannot set itself the task of suppressing the dynamic forces that surround it, it is equally clear that intelligence should not content itself with the role of simple observer. This would be an abdication which, in essence, is a negation of intelligence itself. It is the great, indeed, the unique, quality of intelligence that, while it cannot stop the forces which make change inevitable, it can to some extent modulate and direct these forces so as to affect the character of change.

It is, for example, often possible to increase the intensity of the dynamic forces by concentrating and temporarily restraining them. Or we can decrease the intensity by adjustments which permit of ready diffusion. We can similarly affect the direction in which the dynamic forces discharge themselves. If we desire to produce a violent fall of water, we dam up the stream. If we desire to avoid impetuous floods, we canalize the stream and diffuse the water at an early stage. Through such methods, it is possible for intelligence to deflect violence from that which we wish to see prolonged. By careful planning we can impart to change an element of selectivity. Thus we attain what we are pleased to call "progress" as distinct from pure "change."

It may be thought that the foregoing reflections are particularly applicable to inanimate forces. It is much the same, however, in regard to those dynamic forces which manifest themselves through human beings. Our consciousness of "will power" does, indeed, give the impression that within this sphere we have a far greater power to control, and even to suppress. Actually such impression is largely illusion. Even in our private lives, the most intelligent of us act primarily in response to appetites, habits, instincts, emotions, and other nonrational stimuli. This is even more true of our group life. I refer not merely to extreme cases commonly referred to as "mob psychology", but to all that we do as part of a social unit. Such group action is predominantly swayed by nonrational factors. We have our fashions and our fads; our "bull" markets and our "bear" markets; our business cycles; our swings from conservatism to liberalism and vice versa—all indicative of the subjection of human action to forces other than pure reason.

If we have to deal with the mass movement of human beings, and desire to attain practical results, we must not treat such movements as subject to control or suppression purely through an exercise of will power under the direction of intelligence. Such movements are, indeed, subject to control, but primarily in the same way that inanimate movements are subject to control. They can rarely be stopped by argument, but they can generally be influenced by careful planning. Assume, for example, that we find mass movements periodically manifesting themselves in violence. We will not often stop the violence by arguing its irrationality. The practical approach is to discover the restraining envelope which creates the pressure and to provide outlets such that the dynamic forces become peacefully diffused.

THE ROLE OF WAR IN HISTORICAL EVOLUTION

Let us now turn to the society of nations. It is first to be observed that within this field we find no exception to the universal rule of change. The nations are in constant flux as between each other. It is illuminating to turn the pages of a historical atlas. Scarcely a decade and certainly not a generation goes by without changes of a major order.

In addition to the historic fact of change, which is indisputable, we cannot but be struck by another significant fact which is the regular recurrence of force as an instrument of change. It is interesting, in this connection, to recall the history of our own Nation. Our "manifest destiny" has been achieved through a series of steps in each of which war, actual or potential, was the decisive factor. Even where change in our national domain has, superficially, been peaceful, it became possible only by threat of war or the existence of war in other quarters. If we examine the history of other nations, we find the same story. It is, I think, indisputable that, within the society of nations, changes in relative status have been of regular occurrence; that these changes have customarily been attended by war and that they have largely been reflected in changed national boundaries.

Now the fact, that, within the society of nations, changes have been recurrent, is nothing to cause us surprise. There is, however, cause for reflection in the fact that the changes have habitually been the result of violence and that they have tended to assume a particular pattern, namely, the shifting of national boundaries. This constant coupling of change with violence suggests the presence of dynamic forces which are repressed by barriers which prevent their early and peaceful diffusion with the consequence that such forces are massed and intensified until they forcibly break through. Furthermore, the fact that the envelope which is rent is that of national boundaries, suggests that these may be the barriers which serve to compress the dynamic forces.

It is easy to find confirmation of what is thus suggested. The society of nations is founded upon the concept of "sovereignty." What is "sovereignty"? By very definition it is the right to be free from change by outside forces. It is the essence of sovereignty that the sovereign can do as he pleases within his jurisdiction, no other nation having the right to interfere in any respect. What is his jurisdiction? That defined by national boundaries. Boundaries thus in fact become barriers and, from the Roman days, have been treated as such by writers on international topics. The society of nations is, in theory, a group of sovereigns, each endowed with barriers through which outside influences may not penetrate, except with consent. In the practical exercise of sovereignty, such consent is generally withheld.

The idea that we can have any units perpetually free from change except by consent is, of course, inherently unsound. It ignores all that we learned, or should have learned, from our knowledge of the dynamic character of our world. Sovereignty thus constitutes that obstruction to change which the constant recurrence of violence led us to expect must exist.

The world has indeed, up to the present time, been practical enough to recognize that the concept of sovereignty involved, as a necessary corollary, the use of violence to effect change. Until recently war has always been regarded as an entirely lawful procedure. This has not been because war has at any time been regarded as desirable or because the killing of human beings has been looked upon as a beneficent pursuit. War has at all times been recognized as a curse and peace as golden. However, there has been no other escape from the consequences of sovereignty. Its rigid barriers to movement have had to be broken down in the only way left available, namely, by force, and consequently force has been recognized as a legitimate measure as between nations. Even such conferences as the Hague Peace Conferences of 1899 and 1907 did not seek to abolish war. Rather they sought to evolve "rules" of war, so that the institution of war could be kept within reasonable bounds.

It is only since the World War that a serious effort has been made to do away with war and to assimilate it to murder as between individuals. This is due primarily to the fact that the World War brought us to a realization that wars could not be conducted in accordance with set rules, and that with the development of science and industry, war had ceased to be merely undesirable—it had become intolerable. The instruments of war had become so destructive and so far reaching as to threaten civilization itself. There thus developed a world-wide sentiment that the World War must be the "war to end war." Thereafter we must have a world system from which war would be excluded.

WILSON'S PROGRAM FOR A DURABLE PEACE

At this juncture the world looked primarily to Woodrow Wilson to devise the new world system which it thus ardently and rightfully demanded. He, of all the political leaders, had shown the most statesmanlike vision. He had led America into the war reluctantly, and only to assure that from its colossal destruction there would emerge a world structure designed to make peace durable. He had a duty and it was a duty to which he responded—more adequately than has, perhaps, been appreciated.

His task was to propose a world system from which force could be eliminated as a legitimate instrumentality of change. How had it ever become such a legitimate instrumentality? Because sovereignty turned national boundaries into barriers which obstructed and dammed up dynamic forces until they irresistibly burst through. The solution was then to mitigate the obstructive character of national boundaries and to provide areas within which the dynamic forces could peacefully diffuse themselves. Having created such an elastic world, it would then be practical to suppress resort to force and to unite the nations to this end. This, in essence, was the Wilsonian solution.

The extent of elasticity that could be created varied, of course, with practical conditions. Thus, he dealt separately with the seas; the colonial areas and the highly developed countries where the national system was already entrenched.

As to the seas, he proposed the freedom of the seas "alike in peace as in war."

As to the land (German colonies, Turkey, etc.) where it seemed practical to make a fresh start, he proposed the "mandate" system. Mandated territory would be held in trust and excluded from incorporation into any single national domain. The "open door" would prevail, providing equal opportunity to all nations to use and develop the economic resources.

As to the territory where the sovereignty system was already riveted, he proposed a large measure of both economic and political fluidity. To insure a greater economic freedom, there would be a "removal, so far as possible, of all economic barriers and an equality of trade conditions." To insure greater political elasticity, national boundaries would be subject to change by international action whenever their rigidity threatened the peace.

In a world where boundaries would thus cease to be barriers, war would have no further legitimate place. Accordingly he proposed the League of Nations and the guaranty of its members to unite to repress aggression.

It is significant that, of the 14 points, the proposal for a League of Nations is the last—not the first. The elimination of war was appropriate only as channels were otherwise provided for the peaceful diffusion of dynamic forces.

Wilson's program, of course, completely failed of realization. The peace treaty was barren of any reference whatever to the freedom of the seas. The mandate system was, in form, applied to ex-German and Turkish colonies. Actually the Wilson concept was so perverted that its intent was wholly defeated. The mandatory powers are, to all intents and purposes, absolute sovereigns; and the mandate system, instead of developing colonial areas in the general interest, merely confirms and extends the old concept of national domain. The treaty contains no provisions designed to eliminate trade barriers or to assure a measure of economic movement over national boundaries. The idea of treaty revision was accepted in form but, as in the case of mandates, nullified in fact. The Wilson draft of the Covenant of the League combined the boundary revision and the territorial guaranties into a single article, so that the League guaranty was not the guaranty of a rigid structure. In the final treaty the nonaggression covenant appears as an unqualified undertaking (art. X) supported by the sanctions of article XVI. The treaty-revision article is postponed to article XIX, where it appears as an isolated and diluted provision, for the application or enforcement of which no machinery is provided. It there becomes no more than a pious hope and is, in practical effect, a dead letter.

The only feature of this peace program which found place in the treaty was that for banding the nations together to prevent the use of force. This proposal, when isolated from its context, was, of course, highly acceptable to the victorious European powers. Their prime objective was to retain their war gains. If the treaty made no provision for peaceful change, and created an alliance to perpetuate the status quo, it would, they vainly thought, admirably serve their purpose.

Thus the treaty emerged as a triumph of the old principles of sovereignty. The world would be maintained as an area cut into numerous subdivisions by boundary lines serving as barriers to the interplay of dynamic forces. The pledge of mutual assistance against war merely meant that the barriers might, with apparent impunity, be made the more impenetrable.

This invitation to extreme nationalism has in fact been accepted. The consequences is that our post-war world not only perpetuates, but indeed accentuates, the conditions which have always been provocative of war. Peace efforts, instead of effecting some fundamental change in world system, have been left to develop along purely superficial lines.

ALTERNATIVE PEACE EFFORTS

Broadly speaking, the post-war peace efforts can be classified under three heads, which, for convenience, I term the "realist", the "intellectual", and the "sentimental."

The realists take no stock in anything but force. The war to stop change by force is, they say, to build up superior force committed to the maintenance of the status quo. France is the principal exponent of this theory. Her program for peace was to disarm those nations who might be suspected of desiring to alter the status quo and to create, out of the satisfied nations, an international army charged to maintain the peace. Failing at Paris to secure the international army, she accepted the League of Nations after it had been perverted into what was in effect an alliance to maintain the status quo. She developed the most formidable military establishments the world had yet known in peacetimes and buttressed her position with a series of military alliances designed to encircle Germany. On the other hand, she imposed very drastic disarmament upon Germany.

The inequality of force thus brought about was so striking that it seemed for a time to insure France's peaceful perpetuation of her status quo. Already, however, France is disillusioned. Change comes irresistibly. Germany bursts, one by one, the bands with which she was bound and military alliances become too costly to maintain or become unreliable in the face of changing conditions. In place of Poland, formerly a keystone of the arch, is now substituted Russia in a desperate effort to maintain a preponderance of force against the forces working for change. The disparity has, however, already shrunk to a point such that it no longer is relied upon by anyone to assure peace. France already sees a new European war as imminent and the outcome as doubtful.

Again it has been demonstrated, as so often before, that change cannot be suppressed by the piling up of resistant bodies. Military establishments and alliances may temporarily preserve peace. But if by peace is meant the perpetuation of a rigid, inelastic world structure, then such temporary peace is purchased at a high price. The vast military establishments merely mean that the war, when it comes, will be the more devastating; the military alliances, that it will be the more widespread.

Let us turn to the peace program of the intellectuals. They proceed on the assumption that, since war is the act of human beings, it can be stopped by will power, directed by reason. The intellectuals would doubtless be right if we could accept their premise that the mass action of human beings is subject to self-control in accordance with the dictates of pure reason. For there can be little doubt that the attempts to justify war do not stand the test of intellectual analysis. Such arguments as those premised on overpopulation or the need of raw materials can, one by one, be examined and found fallacious. I am quite prepared to concede that, as an intellectual achievement, war can be argued out of existence. There is nothing novel in proving war to be "the great illusion." Unfortunately it is equally possible to prove that illusions are the common incentive to human action. In a theoretical world of pure intellects the intellectual might have some chance of preserving peace. In the world as it is the most ineffective aid to peace is he who ignores the forces for change unless they can be rationalized to his satisfaction. While he stops to argue, he is engulfed by the forces to which he would deny existence.

The sentimentalist deals with more potent stuff. He looks not to reason but to emotion to stop war. If, he argues, enough people can be brought to feel that war is cruel or illegal or un-Christian, then people will not fight. The United States is the leading exponent of this school of thought. We were horrified when, after the World War, we awakened to the fact that war was "legal." In a sense we were relieved, for we felt this presents an opportunity to change the status of war. If we can change the label and make war illegal, it will no longer be respectable and people will not indulge in it. So a great popular movement formed to "outlaw" war. Under its impulse we negotiated the pact of Paris (Kellogg-Briand Pact), whereby all the nations solemnly agreed that force should be renounced and war thereafter become illegal.

Throughout the world, but more particularly in the United States, there has been a wide dissemination of literature, moving pictures, plays, etc., designed to portray the hideous cruelty of war. The church has sought with zeal to reemphasize the un-Christian character of war.

It is, however, quite certain that war will not be prevented by any of these methods. By appealing to sentiment we do, indeed, invoke a mainspring of human action, but it is one that is totally unreliable. If sentiment can be aroused against war, it can equally be aroused for war and by war. There is nothing that excites interest as much as a fight, and once a fight is in progress, it is human nature to become partisan. Our own people have in the past, by Washington and Jefferson and Wilson, been enjoined to be impartial in act and thought as between belligerents. In each case the injunction has fallen on deaf ears. Such neutrality is a psychological impossibility.

The love of excitement or of change of environment draws people into wars. Risks and perils, while they may be a deterrent, may equally be an attraction. Many whom peace condemns to stodgy monotony welcome the opportunity to become heroes in the eyes of their family and friends. Each war seems to have the facility of presenting itself in dramatic guises that appeal to our sentiment. We fought Spain as crusaders on behalf of oppressed Cubans. We fought Germany to make the world free for democracy. Most of the pacifists in England were quite prepared to fight Italy to sustain what they believe to be a sacred principle. A considerable element in France, genuinely devoted to the cause of peace, is ready to fight a "preventive" war against Germany, thereby sacrificing themselves in order that their children may not have to pay a greater sacrifice. What is nobler than that a man should give his life for a cause?

War can cast itself into any one of myriad molds designed to appeal to human sentiment, and if there are times when pacifist sentiment seems to be dominant, we can be sure that such sentiment cannot be relied upon as a durable preventive of war.

I have not made this review of post-war peace tendencies with any desire to disparage. The problem is sufficiently grave and difficult of solution so that all aids must be invoked. Any peace program must have the support of the realists, the intellectuals, and the sentimentalists and must incorporate features of their programs. It is, however, necessary to realize that nowhere do we find any current program for peace which stands the test of analysis. The protagonists of the different schools are themselves aware of their own inadequacy and their efforts are daily becoming feebler. Despite a vast sentiment for peace, there no longer persists any serious hope of ending the war system. The policies of every government are premised on force continuing as the accepted medium for effecting international changes. Peoples everywhere are stoically resigning themselves to the inevitability of another great war. Failure is admitted.

But what is it that has failed? Not the program which Wilson gave the world as the basis for a durable peace. That program has not failed—it has never been tried. Therein alone consists the failure. How can we fatalistically accept the unspeakable tragedy of another war without even trying intelligently to avert it? It is not as though the program were impracticable or one that involved great sacrifice. Let us reconstruct it in terms of its practical application to present conditions.

WILSON'S PROGRAM IN PRESENT-DAY TERMS

We would, in the first place, retain the principle of "collective security" as embodied in the League. The realists are right insofar as they contend that force can be wholly eliminated and tranquillity secured only through the establishment of some superior public force. Their error lies in thinking that any central force can be adequate to maintain the status quo of a rigid world. If, however, we create a reasonably flexible world, in which the normal dynamic forces can peacefully diffuse themselves, then the violence with which we have to cope is only such sporadic violence as is incident to occasional abnormalities.

We can usefully profit from our experience with the maintenance of peace within the individual state. It has there been demonstrated that, if order is to be maintained and violence avoided, it can be only as part of a social system which affords adequate opportunity for peaceful change. We cannot, consistently with peace, perpetuate the same laws, the same rulers, the same ruling

classes. We cannot deprive people of the opportunity to change their material, social, and political status according to their deserts. The attempt to do this, and arbitrarily to perpetuate wealth, power, and position in certain individuals, always leads to revolution. No central force can be maintained sufficient to preserve such a rigid social order. If it is temporarily perpetuated, through force, the inevitable change, when it does come, is only the more violent and bloody and destructive. To this the French and Russian revolutions bear witness. On the other hand, if an elastic form of society is provided, then the dynamic forces peacefully diffuse themselves. Such violence as occurs is sporadic and due to abnormalities. The central police force required to suppress such occasional outbreaks need not be large or onerous to support, and the violence with which it has to deal is of insignificant proportions.

So it can and should be with the society of nations. Collective action should be available to keep the world at peace, but only provided we have a world which is elastic and fluid in its organization. That is, of course, the objective of the balance of the program.

Of first importance in this connection is the reestablishment of stable and readily interchangeable currencies. Without this, national boundaries become exaggerated as barriers to every type of international movement, whether it is of capital, goods, or people. Because each nation has exercised its sovereign right to do what it pleased with its own money, each nation has largely become a closed unit. If we are to achieve an elastic world, where national boundaries cease to be barriers to a reasonable freedom of movement, then this must be changed. The nations must recognize that stable international exchanges are the lubricant, without which international movement is impossible.

Unstable exchanges constitute only one, if the most important, of the economic barriers. Direct obstacles have been interposed, and these have been greatly increased since the time when Wilson spoke. Tariffs have been raised, quotas established, and other impediments prescribed. These obstacles must be greatly reduced if we are to have a reasonably elastic world. This, indeed, appears to be the present policy of our Department of State, where Secretary Hull has negotiated a series of reciprocal-trade agreements designed to open up the avenues of trade. If there were international agreement as to the objective to be attained, this program could be accelerated to assure progressively greater freedom for the international movement of goods.

As regards the international movement of people, there could well be some relaxation of the present extreme restrictions on emigration and immigration. Selectivity would, of course, be required, but the rigid prohibitions which have recently been enacted in many parts of the world should not become a permanent part of a world system which we are trying to render elastic within reasonable limits. In many parts of the world there used to exist temporary or seasonal emigration. These movements were mutually advantageous and could well be permitted to resume.

The foregoing program would be designed to organize the society of nations so that national boundaries would not be barriers to the reasonable movement of capital, goods, and people.

The attainment of political, as distinct from economic, elasticity, presents more serious problems as regards the highly developed nations. It is doubtless impracticable today, as it proved in 1919, to establish any international tribunal with power to alter existing national domains. It is thus not easy to find a method of implementing article XIX of the League Covenant (Revision of Treaties). Perhaps the most practical measure would be to provide that no treaty should be perpetual, but that all should require renegotiation on their merits at the expiry of reasonably limited periods of time. Such periods might vary according to the category of the treaty. Boundary treaties might, for example, have a longer normal tenure of life than commercial treaties.

It would, of course, be necessary to establish a fair compromise between the disturbing effect of political uncertainty and the avoidance of undue political rigidity. Certain types of treaties manifestly should not be reopened at frequent intervals, but it is difficult to see why any treaty should not be subject to renegotiation at least once each generation. If, for example, the semipermanent treaties were subject to denunciation by any party after 35 years, and would then expire after a further 5 years, this would seem to avoid excessive uncertainty and also give opportunity for adjustment to any changes which might be negotiated.

In such ways a considerable measure of political elasticity is obtainable. A further step might be achieved by the substitution of "unwritten law" for many treaties. It is through such a regime that there has been possible the political evolution of the British Empire into a commonwealth of nations. This has occurred peacefully throughout the last 150 years and in the way in which change should best occur, so gradually that it has been almost imperceptible except in retrospect. If at any time it had been sought to fix, by constitution or treaty, the relations to England of what were originally colonies, it is almost certain that we would have had repetition of our own war of independence. A status of political elasticity has made this avoidable.

Despite such devices as I suggest, a large measure of political rigidity must persist as regards home boundaries. If, however, we establish reasonable freedom for the movement of goods, capital, and people, boundary lines lose much of their significance. This is well illustrated by the relations of our own sovereign States. The essential basis for peace between them is found in their renunciation of the right to interfere with interstate commerce. Subject to this, each State has retained a large measure of sovereignty—how large, we sometimes forget until reminded by the Supreme Court. Each State independently legislates as to all social, educational, and religious matters, has its own system of taxes and local government, its own courts, its own militia, etc. Legal, social, and material conditions do, in fact, vary greatly as between the States. Nevertheless, we all consider it a matter of quite secondary importance where State boundaries run. It is sufficient for the resident of New Jersey that he can invest his money in New York, or call on New York capital to finance his own investment that he can sell goods to, or buy from New York, and that he can, if he wishes, travel freely to or through New York.

Under these conditions, he cannot become aroused to fight to secure an annexation of territory from New York. These boundaries have remained substantially rigid and fixed for 150 years, and no ill consequences have flowed therefrom. They do not serve as barriers to the dynamic forces within the two States. We cannot, of course, expect for international commerce the same freedom which our States accord to interstate commerce. We can, however, obtain a sufficient approximation so that the boundaries of established States will assume far less importance than is the case today?

The economic and political measures which we have been considering are primarily applicable to the highly developed nations. If we turn to the colonial areas, a more ambitious program is practical. There the objective would be to install the mandate system in the spirit proposed by Wilson. Instead of the mandatory power in effect incorporating the mandated territory into his own political domain, he would be under a duty to administer it in trust, first for the advancement and well-being of the local population, and then for the benefit and equal opportunity of the whole world.

Mandated territory should be prevented altogether from falling into the sovereignty system where boundaries are barriers behind which some obtain advantages which are denied to those without.

It would have seemed, a few years ago, quite impracticable to propose any such general application of the mandate system. The Italian-Ethiopian conflict has, however, awakened the world to the obstacles to peace inherent in the present colonial system. In England an influential body of public opinion advocates complete revision of the present system of treating colonies as part of the national domain. If England, the greatest possessor of colonies, is in this mood, it would seem quite practical, as part of a general peace program, to carry into realization the vision of Wilson as to the "trusteeing" of colonial areas.

If we turn from the land to the sea, we would apply the Wilson concept of the freedom of the seas. This requires no important modification of the present status in time of peace. The seas have, happily, been kept free from subjection to any single sovereignty, although this has not always been without a struggle. In time of war the problem becomes more difficult. Belligerents have always sought to appropriate the seas to their own operation and neutrals have sought to preserve their own rights. Our new neutrality legislation permits to belligerents interferences with shipping which formerly were regarded as unwarranted. Such partial renunciation of the freedom of the seas is, perhaps, justifiable, assuming we accept the war system. We may then be warranted in voluntarily enlarging the arena dedicated to the combatants, in the hope that, as spectators, we will be less apt to become embroiled. If, however, the nations unite in adopting a comprehensive program for peace, then a wholly different attitude would be required. No rights on the seas should be accorded a nation which, under such conditions, breaks the peace. The freedom of the seas would thus prevail in war as in peace, except insofar as regarded the offender.

It will be seen that the foregoing constitutes a faithful application of the Wilson program. As to the seas, there would be complete freedom, in peace as in war, from the encroachments of individual sovereignty. As to the colonial areas, the mandate or trustee principle would be substituted for that of national domain. As to other land which is already highly nationalized, there would be a large measure of economic fluidity through the reduction of trade barriers and some degree of political elasticity through the periodic review of all treaties. We would thus have changed the society of nations so that peaceful movement and change would be facilitated and so that national boundaries would no longer be rigid and forbidding barriers. Having created such an elastic world, collective action is then appropriate to protect against violence. Its occurrence will then be due only to sporadic abnormalities which will diminish as we do away with national "inbreeding."

CONCLUSION

Does such a program carry conviction? Obviously it does not arouse enthusiasm as would a frontal attack on war. An international army, a league to enforce peace, an international covenant to outlaw war, a pledge of the masses to boycott war—such efforts can arouse the righteous fervor which comes only from hand-to-hand conflict with the forces of evil. When, however, we seek to alter the underlying conditions out of which war springs, then we must rely upon reason to hold us steady to our purpose. There are only rare occasions when this is possible.

That, in essence, is why Wilson's peace program was never tried. It was put forward at a time when emotion ruled. The revulsion

against war was intense and seemed in itself an adequate preservative of peace. If any further measures were required, surely the most direct and simple would suffice. Thus the League of Nations alone caught the popular imagination. It seemed to afford a direct and simple solution. The balance of the program, to which the League was, in fact, subsidiary, was ignored.

Today we are in a different mood. We have seen sentiment evaporate as an effective deterrent to war. We have seen the failure of the League to enforce peace, the failure of the pact to outlaw war. We are sobered by the very rapidity with which we have moved back into the war system. We are frightened by the strength of the forces that seem to have us in their grip. We may, indeed, be in one of those rare moods when we are prepared to seek salvation through following the guidance of our reason.

ADMINISTRATION OF THE SOCIAL SECURITY ACT

Mr. GLASS. Mr. President, I ask unanimous consent to have inserted in the RECORD an address recently delivered by Hon. Vincent M. Miles, member of the Social Security Board, before the chamber of commerce, Lynchburg, Va., April 9, 1936, explaining in some detail the administration of the Social Security Act.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

One of the finest of our early American traditions is that of the responsibility of society for all its members. As early as the Mayflower Compact, the sense of this responsibility was expressed. Throughout the history of this country provisions have been made for those who could not provide entirely for themselves. These provisions have not always been adequate. Our thinking about the causes, remedies, and means of handling the problems of economic insecurity has not always changed with the times. Indeed, until 1930 we were handling the dependency resulting from economic insecurity much as it had been handled under the old English law of 1602.

Today we as a Nation are getting under way a new, more nearly adequate, more orderly, and more economically sound and desirable method of handling economic insecurity. The problem is as old as civilization; the cost has always existed and always will. The methods proposed under the Social Security Act form merely a new approach to the problem, better adapted, we think, to modern industrial conditions and designed to give more adequate social security to our people as individuals and to our form of society.

The Social Security Act has been praised by its too-enthusiastic friends as a panacea to meet all our economic ills, and it has been denounced by its enemies as marking the destruction of our liberties if not of our form of government.

Of course, neither of these descriptions is accurate. The Social Security Act is simply a piece of legislation setting up the framework within which the Nation can work out a more orderly and efficient system of providing against the insecurities of life under present-day industrial conditions than we have had before.

It is not necessary to emphasize the extent of economic insecurity which exists at the present time. The millions on relief rolls constitute conclusive evidence that no one can deny. Nor need it be emphasized that the economic insecurity of the individual is a persistent problem that is with us during good times as well as bad. Even in the prosperity period of the twenties estimates indicate that an average of one-twelfth of the industrial workers were unemployed. It is estimated that even before the depression one-third of all persons over 65 years of age were dependent upon others for their support. There have always been hundreds of thousands of widows with dependent children, who were in financial need.

We realize that this insecurity of the individual and his family, which is so characteristic of modern industrial life, will steadily become intensified unless proper social measures are taken. We cannot count upon the passage of time or automatic economic adjustments to solve the problem for us, since the relative decline of self-sufficient agriculture, the steady growth of the division of labor, the interdependence of markets, and the increasing rapidity of change in all phases of our economic system make for ever-greater personal insecurity.

Before discussing in detail the provisions of the Social Security Act, it is necessary to mention that the provisions of the act are administered by several executive departments of the Federal Government, and that of those administered by the Social Security Board, a number call for action by the States and a continuing cooperative Federal-State administrative relationship.

The provisions of the Social Security Act are administered in part by the Social Security Board, the Treasury Department, the Children's Bureau of the Department of Labor, the Surgeon General of the Public Health Service, and the Office of Education of the Department of the Interior.

The portions of the act administered by the Social Security Board fall into three general categories—public assistance, unemployment compensation, and Federal old-age benefits.

Under the public-assistance category are the provisions for grants by the Federal Government to the States for aid to the needy aged, aid to dependent children, and aid to the blind. In relation to all three of these public-assistance provisions, action by the States is necessary, and a cooperative Federal-State relationship for administrative purposes is required.

The second major category of the three administered by the Social Security Board is that of unemployment compensation. In this respect, also, the Social Security Act is essentially an enabling statute, designed to aid the States in the administration of unemployment compensation legislation. The administration of the State unemployment-compensation law is a State responsibility performed in cooperation with the Federal Government in respect to certain fundamental requirements set up in the Social Security Act.

The third major category, of those administered by the Social Security Board, is that of the Federal old-age benefit system. This is an entirely federally administered program and is the only aspect of the act administered by the Social Security Board in which the States do not participate in administrative responsibility.

This new program is now a fact. It is under way. There need be no argument as to whether we ought to do something for the aged or for the unemployed. The system is law now. It is operating. Very great progress has been made in putting it into effect. Despite the fact that the Social Security Board had no congressional appropriation until February 11 of this year, the Board up until April 1 had approved plans for unemployment compensation or public assistance submitted by 32 States and the District of Columbia. For 8 of these States and for the District of Columbia unemployment compensation plans have been approved, and for 29 States and the District of Columbia public-assistance plans have been approved. These provide aid for the needy aged, needy blind, dependent children, or for all three.

Unemployment-compensation laws have been approved by the Board for the District of Columbia, Alabama, California, Massachusetts, New York, New Hampshire, Oregon, Wisconsin, and Washington. In addition to these States, Indiana, Mississippi, and Utah have unemployment-compensation laws which have not yet been approved by the Board. Thus we have a total of 12 States with unemployment-compensation laws. They cover approximately 40 percent of the total number of compensable workers who would be covered if every State came under the Federal-State unemployment-compensation program provided for in the Social Security Act.

Among the States with approved unemployment-compensation laws, seven have already received United States Treasury checks totaling $337,253 to pay the cost of administering these State acts.

Employers in the eight States and the District of Columbia, in which approved unemployment-compensation laws are in effect, will be able to credit the amount of their contributions to their State unemployment compensation funds, for employment as defined for the purposes of the Federal tax, against the 1-percent Federal excise tax set up by the Social Security Act, up to 90 percent thereof. As you know, a uniform excise tax is levied on all employers of eight or more, with certain types of employment, such as agricultural labor and domestic service in private homes excepted. The tax will be collected by the Bureau of Internal Revenue on or before January 31, 1937, for the calendar year 1936. The rate for this year is 1 percent of pay roll; it will be 2 percent in 1937 and 3 percent thereafter. The proceeds will go into the General Treasury.

An employer can credit against nine-tenths of this tax the amount he has contributed to a State unemployment compensation fund for employment covered by the Federal tax. This State fund will be used to pay regular benefits—usually about 50 percent of wages, for 3 or 4 months, to workers who lose their jobs and cannot find new work.

For an employer to get this credit, a State unemployment-compensation law must be approved by the Social Security Board. The law must be a genuine unemployment compensation measure. Contributions when collected are to be deposited in the unemployment trust fund, of which the Secretary of the Treasury is trustee, for the account of the particular State and can be withdrawn only for the purpose of paying benefits.

The employer in a State having an approved unemployment-compensation law, after crediting against his Federal tax, up to 90 percent thereof, the amount allowed as credit for his payments under the State law, pays the remainder to the Federal Treasury. The Federal Government in turn makes grants to the States for the cost of administering the State laws. As I have said, seven States have already received such grants.

Among the 29 States and the District of Columbia with approved public-assistance plans, 27 have had old-age assistance plans approved; 18 have had plans approved for the needy blind, and 17 have had plans approved for dependent children. The District of Columbia and the following States have had plans approved for all three forms of public assistance: Maine, New Hampshire, New Mexico, Utah, Wisconsin, Wyoming, Arkansas, Idaho, Mississippi, Nebraska, Vermont, and Washington.

The number of persons benefited by the public-assistance plans now approved for States which have so far submitted estimates is approximately one-half million, divided roughly as follows: aged, 380,000; dependent children, 86,000; and blind persons, 17,000.

In States for which public-assistance plans have been approved by the Social Security Board, the Federal Government will match dollar for dollar, up to a combined Federal-State total of $30 per month per person, the expenditures of a State for aid to the needy aged and the needy blind, and in the case of aid to dependent children $1 for each $2 disbursed by the States up to $18 per month for the first child and $12 per month for each additional child in any one family. An additional 5 percent of the Federal grants to States for old-age assistance and aid to the blind will be paid to the States to be used for paying administrative expenses, for assistance,

or for both purposes. The Federal grants-in-aid for dependent children include both assistance and administration.

Under the Social Security Act all personnel employed by the Board is recruited from the civil service, with the exception of attorneys and experts. The Board has followed the policy of having experts and attorneys qualified as such by the Civil Service Commission. The Board recognizes the necessity of developing a strong and competent administrative organization on a merit basis.

To this end the Social Security Board is devoting unsparing effort. In our selection of personnel for key positions we have been fortunate. After long and careful selection we have secured authorities in the field of administration for the positions of executive director and coordinator, and we have secured genuine experts for the key positions of director and associate director of the several line and staff bureaus and offices. Mr. Frank Bane, formerly executive director of the American Public Welfare Association, and well known in Virginia, is our executive director, and Mr. Henry P. Seidemann, an outstanding expert in governmental organization and administration, is the coordinator.

These men and the heads of the several bureaus and offices are proceeding slowly and carefully with the job of building up the administrative personnel of the Board, and every appointment, incidentally, is passed on in its final stages by the Board itself, after bureau directors, our personnel division, and the Civil Service Commission have approved the applicant as being carefully selected and fitted on the basis of merit for the particular job to be done.

The Board at the present time has some 350 employees. It is our goal to have no unnecessary employees and at all times to have every employee do an honest day's work for an honest day's wage.

There has been some critical discussion of the Social Security Act because combined in the same enactment are provisions for public assistance, unemployment compensation, and Federal old-age benefits. Why shouldn't all three be in one enactment? Is there any valid reason whatever? I think reasonable men will see none. Certainly none has been advanced as yet, even by those who launch the criticisms. I should like to take a few moments to consider in turn both sides of the argument, as they are applied, first, to the public-assistance provisions of the act; second, to the unemployment compensation provisions; and, third, to the Federal old-age benefits system.

I. PUBLIC ASSISTANCE

The provisions of the act relating to public assistance provide, as already explained, for Federal funds to be made available to the States on a matching basis for aid to the needy aged, to the blind, and to dependent children. One critic cannot understand why these provisions came to be included in the same act as those setting up unemployment-compensation and old-age benefits. He feels that these provisions were included because of what he calls the fear of Congressmen that they would be accused of lack of sympathy for the welfare of the aged, and of children, and of the blind.

The fact is, of course, that even in our highest prosperity the problem of old-age dependency was increasing, that during the depression it has become a more pressing problem with ever-greater rapidity, that only about half of the States had any legislation on the subject at all, that in some of the States lack of funds prevented the administering of such benefits as their laws provided, that in others the provisions were inadequate from a social point of view, that the demand and need for a more adequate system of old-age assistance were both very real, and that the only feasible way to provide a more adequate system promptly was through the use of the grants-in-aid principle, by which Federal funds could be made available to the States to make possible anything approaching an adequate program throughout the country.

Again, the provisions for public assistance are stated in terms implying that the needy aged—and here I quote from a recent critic—"become at one stroke wards of the Federal Government unless the States refuse to be coerced into subordinating their rights of self-government to the Central Government."

The same factual situation to which this fiery statement refers can be described with greater accuracy in quite another way. In the first place, the needy aged do not become wards of the Federal Government, although perhaps those that have gone hungry and friendless might not object if someone—even the Federal Government—sought to befriend them. The fact is that the States do not have to "subordinate their rights", and there is absolutely no element of coercion involved—except perhaps the inevitable force of the hungry and shelterless crying for assistance. Certainly the Federal Government does not coerce the States in this matter. Any State may ignore the public-assistance provisions of the Social Security Act forever, if it wishes. It may choose to meet the problem of the needy aged, of the blind, and of dependent children in its own way, entirely out of its own tax revenues. On the other hand, it may, if it wishes, receive Federal assistance in meeting these problems. It is entirely up to the State.

From still another quarter the comment is made that the old-age assistance provisions of the act are too lavish—too open-handedly generous. Anyone who has tried living on less than $1 a day, making this cover not merely food, but also clothes, lodging, and every other expense, without exception, will hardly feel that provision by a State, in cooperation with the Federal Government, of $30 a month to a needy aged person represents an expansion of the assistance program "beyond legitimate requirements." Whether or not States with inadequate assistance programs in the past could or would in the future provide more adequate programs is something about which it is idle to speculate. The fact is that the trend was toward less adequate State programs of assistance rather than toward excessively generous ones.

Finally, it should be emphasized that the administration of the State public-assistance plans is the responsibility of the States. The Federal Government's function, aside from making grants of funds, is to supervise only to the extent of seeing that these funds are expended in accordance with the conditions under which they are granted—and anyone interested in good governmental administration will agree that this is the indispensable minimum. So much for the public-assistance provisions of the act.

II. UNEMPLOYMENT COMPENSATION

The Social Security Act is based in part upon the proposition that action by the Federal Government is necessary in order to facilitate adequate provisions against insecurity. In relation to unemployment compensation, for example, for a number of years consideration of this subject by the States met the objection that no one State could act alone, because to do so might subject its employers to unfavorable competition in relation to those in States not enacting unemployment compensation legislation. The Social Security Act, in relation to unemployment compensation, is an enabling act, facilitating passage of unemployment compensation legislation by the States.

The effect of the excise tax set up in the act is to remove or decrease the possibility of an economic handicap to a State enacting unemployment compensation. The tax is thus the factor which makes State unemployment compensation laws possible without subjecting the individual State to the possibility of an economic handicap in relation to States having no such legislation.

The criticism is made that the States—and here I quote a recent critical statement—must "rigidly conform to standards dictated by the Federal statute." This is distinctly an overstatement, to say the least. As a matter of fact, the States are left the widest latitude in terms of their State unemployment-compensation acts. They may be of the pooled-fund type or of the individual-reserve type, or they may be a combination of both. They may provide for merit ratings, or they may not, in accordance with the desires of the individual State legislatures. They may apply to employers of one or more persons or eight or more persons, or, indeed, to employers of any number of persons, as a State legislature sees fit. They may provide for waiting periods before benefits are paid or they may not. The benefits may be large or small in accordance with the desire of the individual legislature. Employees may be made to contribute or they may not. The only requirements which the State unemployment-compensation legislation must meet are a few basic provisions which, as a matter of fact, are necessary to unemployment compensation legislation as such. In connection with grants of Federal funds for the cost of administration, the State act must meet certain provisions guaranteeing the efficient administration of the funds for the purpose granted.

The statement that the unemployment compensation provisions of the Social Security Act "deprive the States of full opportunity for developing systems adapted to their diverse employment conditions"—a criticism recently made—is simply not true. As indicated before, the States may devise unemployment compensation plans specifically adapted to their diverse unemployment conditions. In fact, the recognition of the diverse conditions in the various sections of the country was taken into consideration in the framing of the Social Security Act.

The criticism is sometimes made that the Social Security Act requires the States to turn over their unemployment compensation funds to the United States Treasury. It does nothing of the sort. It does require them to deposit the funds in an "unemployment trust fund" of which the Secretary of the Treasury is the trustee. This is an entirely different proposition. The characteristics of a trust fund are sufficiently well known so that it is hardly necessary to point out that these moneys when deposited in this fund are still the property of the States, to be withdrawn at any time.

Of course, if States should withdraw these funds for other than the payment of unemployment-compensation benefits, the Social Security Board would have to suspend its approval of the State unemployment compensation legislation in the particular case. The thought that the State's money will have to be transferred to Washington is not correct. The State merely deposits its unemployment-compensation funds with the nearest Federal Reserve bank. The point is that the funds remain the property of the State, even when deposited under the trust fund. This is a safeguard for the worker without taking the money from the States.

The unemployment-compensation provisions of the Social Security Act define the conditions under which the States can give recognition to favorable employment experience of individual enterprises. The States may, if they wish, legislate merit-rating provisions into their acts. A period of 2 years is provided during which contributions will be paid before any benefits are permissible. During that time experience on the employment stability of individual enterprises will be gained, and if a State legislature should so elect, merit-rating provisions may go into effect.

III. FEDERAL OLD-AGE BENEFITS

The system of Federal old-age benefits provided by the act is designed to give definite retirement benefits, payable monthly, beginning at age 65, to workers who qualify for them and who are not regularly employed. This is the biggest job which the Social Security Board has to administer. It is the only part of the social-security

program which is entirely federally administered. In this connection the Board, through its proper bureau, will maintain individual records showing the earnings of approximately 26,000,000 persons covered by this provision of the Social Security Act. It will examine and approve payments to individuals who have attained the age of 65, and payments to the estates of deceased persons as provided for in the act. Under the old-age benefits system, payments will be made to qualified beneficiaries based on wages and not need.

The act provides for an income tax on employees and an excise tax on employers. Taxes will be paid only on the first $3,000 of wages paid to any individual in any one year by any one employer. Benefits are payable in relation to the total wages received by an employee on the basis of a formula which roughly proportions the benefits to the wages earned. The findings of the Brookings Institution in its study entitled "America's Capacity to Consume" show that by far the greatest percentage of workers' families in the United States even at the height of our prosperity in 1928 and 1929 had incomes which made it very difficult for them to save anything. Something like 71 percent of the gainfully employed earned less than $2,500 a year, and more than 42 percent earned less than $1,500 a year. More than 21 percent had incomes of less than $1,000. The attempt to support a normal-sized American family of four persons on $1,500 a year, when all the energies of business were concentrated on persuading the individual to spend his whole income, and then to fall back on installment buying, could not allow for any great degree of saving.

The Federal old-age benefit plan presupposes the desirability of setting up a governmentally administered old-age benefit system in view of the fact that after many years of development under the leadership of individual business management, it is estimated that the privately administered pension plans in effect at the time the Social Security Act was enacted would ultimately pay benefits to approximately 4 percent of the persons engaged in the employments covered by the Federal old-age benefit system. In other words, if private pension plans were depended upon to do the job, anything like benefits on an adequate scale would be a development of the distant future. In view of the social and economic necessities of the time, to wait for this indefinite future development would be socially and economically undesirable, if not actually dangerous.

The trend among leading concerns for private benefit plans is to modify them and to superimpose them, so to speak, upon the Government plan, rather than to abandon them. A recent study by the National Industrial Conference Board shows that the establishment of a Federal old-age benefit plan has met with hearty approval from a large number of companies now having private benefit plans and is welcomed by the most able and efficient employers.

Criticism has been made of the provisions for reserves on an actuarial basis in connection with the Federal old-age benefit system. The fact is that the reserves provided for would not become large enough to be a problem for 10 or a dozen years, during which time the entire subject—whether reserves are or are not desirable—can and will be studied. If in the years available for this study before the reserve becomes large enough to be a real problem it becomes evident that the actuarial basis should not be applied in a governmental benefit system, it would seem that there would be plenty of time to change it. Certainly before 1980, the date at which the theoretical reserve will be so large as to be very dangerous, according to its critics, the country should have enough experience to know whether the maintenance of a reserve system is desirable or not.

Because of the taxes on pay rolls, the statement has been made that the effect of the act will be to stimulate increased use of labor-saving machinery and hence to depress employment. To this two comments should be made. First, mechanization is going on as fast as possible in all well-managed industries anyhow, and all the time. Indeed, mechanization has advanced so rapidly during the depression as to complicate gravely the unemployment problem, and perhaps to change very greatly the nature of the problem as we knew it in 1929. In highly mechanized industries the cost of labor is relatively small. Hence the 1-percent tax on wages paid in 1936 will not be a large factor in the cost of production. Quite likely it will not be a large-enough factor to justify more mechanization. For it must be remembered that mechanization has its costs which must be amortized over a period of years. Unless mechanization "pays" it will not come any the faster because of the pay-roll tax. If it "pays" it will come anyway.

In those cases in which mechanization is increased it will act as a factor of economy, and should—under sound business management—be reflected in lower prices, which, in turn, will increase real wages to workers and provide an ever-expanding market for greater and greater production. In short, an increase in employment rather than a decrease is perfectly possible.

The stabilizing of purchasing power as a result of the unemployment compensation systems should not be overlooked as one of the desirable economic effects to be expected from the social-security program.

Finally, some of those who do not approve of the Social Security Act sometimes speak of the costs which it adds to business. Just consider for a moment a very simple statement of economic fact—not theory. I refer to the fact that business activity—such as industry, commerce, and agriculture—has to carry the burden of maintaining the entire population in any case. Business carries this cost now, and always has done so. The costs of providing against economic insecurity are not new, suddenly invented by the sponsors of this legislation. The only thing which is new is the attempt we are making to carry out a more orderly social accounting of the cost. Unemployment and old-age dependency are by-products of our industrial age. They did not exist, comparatively speaking, in the older agricultural economics. They become more intense as burdens as our industrialization progresses.

Industry, either directly or indirectly, bears the brunt of the cost. Under the Social Security Act there is a recognition of the fact, and by way of the pay-roll tax the cost becomes quite legitimately a part of the cost of production. There is no way in which our industrial society can escape the cost of caring for those whom it cannot or will not employ.

The Social Security Act proposes to introduce a more orderly and efficient social method into the handling of these problems than we have had before.

In the statement of the purposes of the act I have attempted not to assume a partisan attitude. Under the British system of government each important department has a minister, who is an advocate for legislation affecting his ministry. No such thing exists in this country.

I still believe that the combined judgment of the electorate is a fair test of the soundness of any governmental policy. Anthropologists tell us that the difference between a man and a monkey is a man's forebrain. He uses it to have an understanding, and when he has an understanding he can make a decision.

I, therefore, feel that it is the duty of every patriotic citizen to inform himself with reference to the matters about which I have just spoken. If this program is a good program and soundly thought out, it will last; if it is entirely bad, it will be repealed; but if it is neither, and there are any mistakes in it, they will be corrected. The Social Security Board invites constructive criticism. We are tackling this job in a spirit of humility; we are not "high hat."

It is the citizen's duty to advise himself of the situation in his State and to discuss the character of State acts with members of his general assembly and with his Governor. There is one thing you can accomplish by informing yourself on this whole subject, and that is to relieve yourself from the influence of uninformed criticism. When you do meet such, you will recognize it.

The provisions of the Social Security Act have been called labyrinthine caves, and the act itself has been referred to by one critic as the new Mammoth Cave.

If such references are based upon correct information, we can have no quarrel with them; if not, they are not worthy of consideration. To illustrate this point, I, upon one or two occasions, have stated publicly that when the good American citizen reads the Social Security Act he is like the Arkansas Delta Negro who was drafted in the World War. He was placed in the labor battalion, trained for a short period, loaded on the train, and shipped to the coast for transportation overseas. He was kept back from the ocean until time to load the boat; then he was marched down to the sea at night and placed in the hold. About 10 o'clock next morning, when the boat was well out on the ocean, he was permitted to come up on deck. He stuck his head above the rail, threw up his hands, and yelled, "Good God, de levee done broke."

I call upon you to determine whether the flood is a damaging and destructive flood, on the one hand, or is the type of flood that is turned out of irrigation ditches in the Rio Grande Valley and California to make good things grow. It is my judgment that it is such a flood as those which occur in the valley of the Nile, in that it places fertility upon barren places and causes things that are both beautiful and life-sustaining to grow where they never grew before.

OLD-AGE PENSIONS

Mr. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an address on the subject of old-age pensions delivered by Judge R. L. Williams before the Oklahoma Federation of Women's Clubs at Muskogee, Okla., on April 2, 1936.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Madam Chairman and members of the Oklahoma Federation of Women's Clubs, with hesitancy I accepted your invitation to talk to you on the subject of old-age pensions. On account of the judicial position I hold I will not express an opinion relative to such matter but call your attention to some excerpts from decisions of courts on the subject. An initiative act which passed in this State in December last appropriating two and one-half million dollars to be applied for the relief of the needy aged, infirm and crippled, and destitute, creates a State welfare board composed of the Governor, State treasurer, and adjutant general, and further provides that the county commissioners of the several counties shall constitute a welfare board for each county. On yesterday the National Security Board held that this set-up entitled the State to receive aid under the Federal Security Act to the amount of 50 percent under the terms of said act for the benefit of the needy over a certain age and for crippled children and other purposes. It is settled by the decisions of the Supreme Court of the United States that the Federal Government may appropriate and allot to the States moneys in aid of projects which the States are authorized to carry on under their State constitutions and statutes not in conflict with the Federal Constitution.

In *State* v. *Osawakee* (14 Kans. 419), Mr. Justice Brewer, afterward a Justice of the Supreme Court of the United States, said:

"The relief of the poor—the care of those who are unable to care for themselves—is among the unquestioned objects of public duty. In obedience to the impulses of common humanity, it is everywhere so recognized. * * * It must be borne in mind, however, that the term 'poor' is used in two senses. We use it in one sense simply as opposed to the term 'rich.' Thus, we speak of the ordinary laborers, mechanics, and artisans as poor people, without a thought of describing persons who are other than self-supporting. Indeed, the large majority of our people are poor people, and yet they would feel insulted to be told that they were objects of public charity. We use the term also to describe that class who are entirely destitute and helpless, and therefore dependent upon public charity. The dictionaries recognize this twofold sense. Thus, Webster gives these definitions: '1. Destitute of property; wanting in material riches or goods; needy; indigent. It is often synonymous with "indigent" and with "necessitous", denoting extreme want. It is also applied to persons who are not entirely destitute of property, but who are not rich; as a poor man or woman; poor people. 2. (Law.) So completely destitute of property as to be entitled to maintenance from the public.' Now, when we speak of the relief of the poor as a public duty, and one which may justify taxation, we use the term only in the latter sense. We have no thought of asserting that because a man is not rich, or even because he has nothing but the proceeds of his daily labor, therefore, taxation may be upheld in his behalf. Such taxation would be simply an attempt on the part of the State to equalize the property of its citizens. Something more than 'poverty', in that sense of the term, is essential to charge the State with the duty of support. It is, strictly speaking, the pauper, and not the poor man, who has claims on public charity. It is not one who is in want merely, but one who, being in want, is unable to prevent or remove such want. There is the idea of helplessness as well as of destitution. We speak of those whom society must aid as the dependent classes, not simply because they do depend on society, but because they cannot do otherwise than thus depend. Cold and harsh as the statement may seem, it is nevertheless true that the obligation of the State to help is limited to those who are unable to help themselves. It matters not through what the inability arises—whether from age, physical infirmity, or other misfortune—it is enough that it exists. It is doubtless true that in the actual administration of the poor laws many who are not properly entitled thereto receive public support; but failures in the administration of laws do not change the principles upon which they must rest."

In *Jones* v. *City of Portland* (245 U. S. 217) it is stated:

"It is well settled that moneys for other than public purposes cannot be raised by taxation, and that exertion of the taxing power for merely private purposes is beyond the authority of the State."

In *Green* v. *Frazier* (253 U. S. 238) it is said:

"This legislation was adopted under the broad power of the State to enact laws raising by taxation such sums as are deemed necessary to promote purposes essential to the general welfare of its people. Before the adoption of the fourteenth amendment this power of the State was unrestrained by any Federal authority. That amendment introduced a new limitation upon State power into the Federal Constitution. The States were forbidden to deprive persons of life, liberty, and property without due process of law. What is meant by due process of law this court has had frequent occasion to consider. * * * The due process of law clause contains no specific limitation upon the right of taxation in the States, but it has come to be settled that the authority of the States to tax does not include the right to impose taxes for merely private purposes. * * * It is claimed, however, that the citizen is deprived of his property without due process of law, if it be taken by or under State authority for any other than a public use, either under the guise of taxation or by the assumption of the right of eminent domain. In that way the question whether private property has been taken for any other than a public use becomes material in this court, even where the taking is under the authority of the State instead of the Federal Government."

To levy taxes to raise money to be expended by the Government, or under its direction and supervision, in the support of those who are actually destitute, helpless, and dependent upon the Government or private charity for shelter, food, and clothing is a proper function of the Government and not inhibited by the fourteenth amendment. But to levy taxes to be collected and paid over to citizens or residents of the State solely because they have reached a certain age and do not have an income, which in the opinion of some is not sufficient, or if they have adequate income if it comes in the way of pension from other source and without regard to how much property they may have, and without regard as to whether they have infirmities which render them helpless and therefore destitute, and without regard as to whether they are able but decline to obtain employment, which money so handed over to them becomes their own to be expended free from the control or supervision of the State and which may be spent either for themselves or for others, is a question for serious consideration, in view of the agitation for the adoption of various so-called old-age-pension provisions.

I have not noticed any public discussion as to any limitation of the power to provide for old-age pensions by taxation. For that reason I have called your attention to these decisions.

In *State* v. *Edmondson* (88 Ohio St. 625, 89 Ohio St. 351, 106 N. E. 41) it was held that a statute levying taxes for the support of certain classes which made no provision "to insure the application of the money to the support of the individual or to prevent him from becoming a public charge, or in any manner to control its use by him", was evidence on its face that the taxes were not levied for a public purpose, but that it was a "gratuitous annuity, a gift pure and simple, and, being so, the legislature is without authority to make it from the public funds."

"Taxation originates from and is imposed by and for the State" (*Allen* v. *Jay*, 60 Me. 128; *Hanson* v. *Vernon*, 27 Iowa, 27, 47; *Matter of Washington Avenue*, 69 Pa. St. 352, 363; *Sharpless* v. *Mayo, etc.*, 21 Pa. St. 147).

In *Busser* v. *Snyder* (128 Atl. 80 (Pa.)) was under consideration an act which had provided for paying pensions to persons above the age of 70 years who were and had been citizens of the State for 15 years, excepting, however, persons in prison, insane asylums, or reform institutions, and persons who had deserted wife, husband, or child, professional tramps and persons who had children or other relatives financially able to support them, and persons whose property, or whose property in conjunction with the property of his or her spouse, exceeded in value $3,000; and further provided, that where assistance was given to one having property, on the death of that person, the State should be repaid the amount given as assistance from the recipient's estate with interest at 3 percent per annum. The amount to be paid under the act was $1 per day. The court in its decision distinguishing that act from acts granting pensions for military service said:

"Pensions or gratuities for military service are in the nature of compensation for a special and highly honored service to the State, implying the idea of a moral obligation on the part of the Government; charity and benevolence are not founded on this consideration."

The court held it was within the constitutional power of the State to appropriate money with which to support the destitute and helpless who were without ability or means to sustain themselves and said:

"They become direct charges on the body politic for its own preservation and protection. As such, in the light of an expense, they stand exactly in the same position as the preservation of law and order. To provide institutions, or to compensate such institutions, for the care and maintenance of this class of persons, has for a long time been recognized as a governmental duty. * * * The expenditure of money for such purposes is and long has been recognized as a function of government."

The Supreme Court of New Hampshire, *In re Opinion of the Justices* (154 Atl. 217), said that a law making age the only test of relief would violate the constitutional prohibition against taxation for private purposes and also violate the constitutional principle of equality of rights, and further that statutory classification, to be valid, must reasonably promote some proper object of public welfare or interest, and may not be sustained where the selection and grouping is so arbitrary as to serve no useful purpose of a public nature. And cited a long list of authorities to show that when the pension is granted it must be to those who are unable to support themselves either in whole or in part and who have no relatives able and willing to support them and responsible for such support under the law.

On January 4, 1917, whilst Governor of the State of Oklahoma, I transmitted a message to the legislature, from which I quote, as follows:

"It is equally as high a duty for the State to look after its unfortunate—the infirm, the sick, afflicted—as much so as it is essential to educate the mind. The question of the care of the poor all through Anglo-Saxon government and development has been a matter of local or municipal concern, but in modern development and efficiency in some States it is also being done through State agencies. * * *

"I recommend that you consider the advisability of establishing a State home for the aged and infirm and of converting some State institution that is already existing into such a home. The State can have its farm and its hospital and all the agencies to make such a home a success without so much expense per capita as is occasioned by counties."

During the session of the Fifth Oklahoma Legislature, whilst I was Governor of the State (see Session Laws, 1915, ch. 246, art. 1), what is known as the workmen's compensation law was passed and approved March 22, 1915. The placing of said act into effect disclosed that some former employees who had passed the age of 50 years, on account of the passage of said act, were not as desirable employees, in that younger employees were more readily accepted.

It was contended that this was on account of the fact that the manufacturer would be more liable for compensation on account of accidents or sickness where the employee had reached the age of 50 years or more, that the younger employee was more desirable and less hazardous. We then began to investigate as to the power of the State, as well as the advisability, to provide State compensation in that particular contingency for former employees who were thus thrown out of employment on the theory that the passage of the act precipitated such condition causing the former employee who had reached 50 or more years of age to be at a disadvantage in procuring initial employment after the passage of said act, yet who in fact were efficient, the liability for compensation being more likely in his case than that of a younger person, and also contemplating the passage of an act prohibiting the discharge of any employee who continued or was taken into employment on account of age after the passage of the act and the placing in operation the Compensation Act. However, our Nation was swept into the World War before we were able to complete this investigation as to the limitations of the fourteenth

amendment resting upon the State in such matter, and then for a year and a half the resources of our State were directly solely toward the support of the Federal Government in that great conflict. After the war there was such an apparent era of prosperity that it was thought then we would have the poor with us no longer. These problems now confronting us have to be met with common sense and fidelity and we must discharge our duty to the poor and the helpless and the indigent in the light of what is right, at the same time measuring the fundamental limitations of our Government. These problems should be worked out carefully, justly, honestly, and efficiently. I am not attempting to decide these fundamental questions, but I call same to your attention for they must be considered, for if these provisions become a law undoubtedly their constitutionality will be tested.

The act of Congress of the United States approved August 14, 1935, which is known as the Federal Social Security Act, sections 1 to 6 of which provide for old-age assistance; sections 1001 to 1006 aid to the blind; sections 401 to 406 aid to dependent children; sections 501 to 505, aid for maternal and child health; sections 511 to 515 aid for crippled children; section 521 aid for child welfare; sections 601 to 603 aid for public health, contemplates a State plan providing for each type of assistance, aid, or service which must be submitted by the State to the designated Federal administrative agency for approval, and meet its approval before Federal assistance is granted.

There are eight kinds of new grants-in-aid provided in the Social Security Act as well as an additional appropriation for vocational rehabilitation. In five instances grants are conditioned upon stipulated matching expenditure by the States under plans which meet stated requirements and have been formally approved by a designated Federal agency. These five include grants-in-aid of State expenditures for the promotion of maternal and child health (title V) and of State assistance to four types of needy individuals, to-wit: aged persons (title II), blind persons (title X), dependent children (title IV), and physically handicapped children (title V). In two cases, that of grants-in-aid of public health services (title VI) and in aid of child welfare services in rural areas (title V), no conditions are attached to the Federal grants except that the funds be expended by the States for the general purposes for which the grants are made. The eighth grant is designated to finance the entire cost of administration of unemployment compensation in States which have approved plans (title III).

Disregarding the last-mentioned grant, which is for purely administrative ends, much the largest expenditures are contemplated in the field of old-age assistance, and the amount appropriated for this grant is more than the total of the appropriations for all the other grants-in-aid. States that meet specified conditions will be given half of their total disbursements for their needy aged (other than those maintained in public institutions), with the limitation that in computing the Federal share anything paid by the State to any one person in excess of $30 in 1 month will not be counted.

The actual amount of assistance to be paid by the various States is left to their own discretion. The chief conditions which must be met for Federal approval of a State old-age-assistance plan are:

1. Financial participation by the State.
2. Establishment of a State supervisory administrative authority.
3. Right of appeal of applicants for assistance to this State authority.
4. An administrative plan which is deemed satisfactory by the Federal administrator.
5. The granting of assistance at least to all persons of qualifying age (70 years until 1940, 65 years thereafter) who are citizens that have resided in the State for 5 years or more within the 9 years immediately preceding application and are without reasonable subsistence income.

The failure to include in these conditions a specific monetary amount for the minimum State old-age assistance allowable is an acknowledgment of the great regional variations in cost and standard of living in the United States.

Approximately the same conditions as those required for the old-age-assistance grant must be met by the States in qualifying for the Federal grants-in-aid for assistance to the blind and to dependent children. The grant for the dependent blind is like that awarded for the dependent aged, i. e., 50 percent of the State expenditures, but in the case of assistance to dependent children the Federal offer is only one-third (instead of one-half) of the amount spent by the State. The grants for aid to crippled children and to maternal and child-health services are stated in terms of definite money amounts to be divided among the States with the requirement that the States make specified appropriations from their own treasuries.

The program of Federal aid to the States conditioned upon State expenditures involves no Federal guaranty of aid to needy or handicapped individuals unless the State participates. Some States may make no provision, and, unless the individual State is willing to bear its part of the burden, no Federal contribution will be payable. Experience indicates, however, that the Federal offer to match State expenditures does stimulate State action, and it may be anticipated that increased provision will be made for these dependent groups as a result of the Federal offer to share the cost with the States.

The grants for the promotion of general public health services and child-welfare agencies in rural areas (stated in terms of specific monetary amounts), as remarked previously, are not conditioned upon any State appropriations for the specified services.

In the case of the grants-in-aid of assistance to the aged and the blind and to dependent children, and of the grant for administration of unemployment compensation schemes, the Federal agency from which approval of State plans must be elicited, is the Social Security Board. The Children's Bureau in the Department of Labor is given administrative control of the grants for maternal and child health, for crippled children, and for child welfare. The Public Health Service is directed to administer the grant-in-aid of general public-health services (title VI).

The following States, in addition to Oklahoma, have submitted plans which have been approved and allotments made as follows:

Old-age assistance:	
Alabama	$105,000.00
Delaware	33,075.00
Iowa	548,100.00
District of Columbia	47,250.00
Maryland	168,000.00
Michigan	346,500.00
Mississippi	183,750.00
Missouri	315,000.00
Nebraska	347,130.00
New Hampshire	58,800.00
Rhode Island	30,000.00
Vermont	43,544.34
Washington	420,000.00
Wisconsin	393,750.00
Wyoming	55,944.00
Idaho	157,500.00
Aid to the blind:	
Arizona	4,725.00
Connecticut	5,520.00
District of Columbia	9,450.00
Idaho	6,300.00
Maine	26,250.00
Mississippi	8,820.00
Nebraska	15,540.00
New Hampshire	5,040.00
North Carolina	3,324.99
Wisconsin	52,149.99
Wyoming	4,161.40
Aid to dependent children:	
Arizona	32,120.00
Alabama	48,000.00
District of Columbia	45,810.56
Idaho	10,133.33
Maine	39,555.33
Maryland	92,400.00
Mississippi	32,355.33
Nebraska	75,878.00
New Hampshire	8,720.00
Washington	95,505.00
Wisconsin	200,000.00
Wyoming	8,696.53
Unemployment compensation:	
New Hampshire	44,188.32
New York	181,949.41
California	39,943.74
Wisconsin	17,669.91
District of Columbia	12,239.25

New York State, with a population of 12,588,066, as against that of Oklahoma of 2,396,040, or 5.25 times as great, in the fiscal year, July 1, 1933, to June 30, 1934, paid a total in old-age pensions of $12,441,921 without Federal Government aid. There was an average number of pensioners on the rolls during that year of 51,272, and drew an average of $20.22 per month each.

In December 1935 New York State had only 57,878 pensioners on the rolls, and was paying them an average, without Federal aid, of $21.31 per month each.

The New York law has been in effect since September 1, 1930.

Using the maximum number on their rolls in December 1935, namely, 57,878, and which after more than 5 years of operations, and figuring on the basis of ratio of population, then Oklahoma should only have a maximum of 11,024 on her rolls at the end of a 5-year period. Figuring the maximum allowance from the State of $15 per month as the average, then old-age pensions or aid in Oklahoma should not cost above $1,948,320 per year, not including a like amount as aid from the Federal Government under the Social Security Act.

New York State has a much more rigorous climate, largely urban population, and population much more dense, and with living costs, want, and distress much greater, and therefore proportionately should have a much larger percent of her population on the pension rolls.

The State of Michigan, with two and two one-hundredths times our population, with a colder climate and higher living conditions, at the present time has only about 20,000 old-age pensioners on their rolls.

Figuring on the basis of ratio of population and paying the maximum of $15 per month on the part of the State, then Oklahoma should have 9,901 pensioners on the rolls and at a cost to the State of only $1,782,180 per year.

The State of Massachusetts, with one and seventy-seven one-hundredths times our population, much more unfavorable climate, larger percent of urban population, and almost wholly industrial, on February 1, 1936, only had 26,168 old-age pensioners on their rolls. Figuring on the basis of ratio of population

Oklahoma should only have on her rolls 14,784 pensioners, and paying the maximum of $15 per month, it should only cost Oklahoma $2,661,120 per year.

The State of Iowa, with 1.03 times our population, on June 30, 1935, had only 10,120 old-age pensioners on their rolls; and, figuring on a basis of ratio of population, Oklahoma should only have on her rolls 9,825 pensioners; and, paying them the maximum of $15 per month, the total cost of old-age pensions or aid to Oklahoma should be $1,768,500 per year.

As the initiative act passed last December creates the State welfare as well as the county welfare boards to handle such matters, being a State-wide comprehensive act, our State has a setup now which can act without constitutional amendment and has the power to make appropriations for the maintenance of the aged and infirm where it does not violate the fourteenth amendment. By special provision in the Oklahoma State Constitution the several counties of the State (sec. 3, art. 17) are empowered as the legislature may prescribe to provide for those inhabitants who, by reason of age, infirmity, or misfortune, may have claims upon the sympathy and aid of the county. The fact that the county is thus specially authorized to render such aid does not operate to take that authority away from the State through act of the legislature. Section 36, article 5, of the constitution provides:

"The authority of the legislature shall extend to all rightful subjects of legislation, and any specific grant of authority in this constitution, upon any subject whatsoever, shall not work a restriction, limitation, or exclusion of such authority upon the same or any other subject or subjects whatsoever."

The legislature of the State may provide for those inhabitants who by reason of age, infirmity, or misfortune may have claims upon the sympathy and aid of the State, and may resort to all proper subjects of taxation to raise this fund without additional amendment of the Constitution. The expeditious action upon the part of the legislature, which has unlimited power by means of direct inheritance, excise, income, and every subject of taxation except on an ad-valorem basis, to raise the revenue sufficient to cooperate with the Federal Government in the operation of the Federal Social Security Act in carrying aid to the needy, aged, and infirm so that the maximum amount of aid in such cases will amount to $30 per month and also extend the aid to crippled children and to promote health and carry out all other such aid provided for in the Federal Social Security Act.

As you had made the earnest request that I make this address, I have brought these matters to your attention to aid you in the consideration of your proper action in the premises.

In the invitation extended to me to make this address I was requested to cover the old-age-pension matter and have accordingly directed my attention to the matters as herein outlined. The Federal Government having provided aid as to this matter and it being essential to the State to enact and provide a plan to meet these conditions, I thought it advisable to call attention to the limitations imposed by the fourteenth amendment on the State, and the decisions from State supreme courts relative thereto. That being so it seems to me that the State should speedily act, but be reasonably sure that the plans are within these limitations, and get this aid to the needy with the greatest speed. Then if the parties that are agitating further extension, we can consider that later, for if we go that far now it will lead to litigation and delay. In other words we should travel along a safe line so as to speedily obtain this assistance for the needy aged and the needy infirm and to aid unemployment and aid dependent children and aid maternal and child welfare and aid public health. Endeavor to get this relief, but in doing so we should exercise reasonable care not to adopt State constitutional provisions or State laws that may not meet the test of the fourteenth amendment, and to exercise such care to stay within safe limits and speedily get this assistance. Then if there are those that want to go further, then they may try that feature out later, but for the present we should try it out on safe lines.

[From the Tulsa (Okla.) World of Apr. 5, 1936]

LAW VALIDATES OLD-AGE FUNDS—CONSTITUTIONAL AMENDMENT UNNECESSARY, SAYS UNITED STATES JURIST

MUSKOGEE, April 4.—Widespread favorable reaction was heard here today following the address which Federal Judge R. L. Williams made before clubwomen this week, declaring that Oklahoma does not need a constitutional amendment in order to participate in the national administration's social-security program.

Of interest was the fact that Judge Williams' statement as well as a decision of the National Social Security Board at Washington, D. C., is in direct contradiction to the contention of Governor Marland, who declared that the State must vote a constitutional amendment before it can share in such a relief program.

Judge Williams' talk to the convention was prepared before the National Board had made its decision favorable to Oklahoma but unfavorable to Kansas, a State, which it said, would be required to vote the constitutional amendment in order to take part in the relief program.

The national administration's old-age assistance program is limited to needy aged people.

In the opinion of Judge Williams "a tax could be levied without limitation in Oklahoma to support the poor and aged and indigent, provided it was not an ad valorem tax This State does not need to change its constitution in order to take part in such a program."

He was of the opinion that the National Board correctly interpreted the law when it ruled in favor of Oklahoma.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries, who also announced that the President had approved and signed the following acts:

On May 19, 1936:

S. 427. An act authorizing the reimbursement of Edward B. Wheeler and the State Investment Co. for the loss of certain lands in the Mora grant, New Mexico; and

S. 1975. An act to authorize certain officers of the United States Navy, officers and enlisted men of the Marine Corps, and officers and enlisted men of the United States Army to accept such medals, orders, diplomas, decorations, and photographs as have been tendered them by foreign governments in appreciation of services rendered.

On May 20, 1936:

S. 3483. An act to provide for rural electrification, and for other purposes.

NATIONAL FLOOD CONTROL

The Senate resumed consideration of the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes.

Mr. COPELAND. Mr. President, we turn now to page 107, section 6, providing for authorizations for preliminary examinations and surveys. It is desired to add a number of amendments to this section. At this time it would be proper for the Senator from California [Mr. JOHNSON] to present his amendments.

Mr. JOHNSON. Mr. President, I send to the desk an amendment, for which I ask consideration.

The PRESIDENT pro tempore. The amendment will be stated.

The LEGISLATIVE CLERK. In the committee amendment, on page 112, after line 24, it is proposed to insert "Ventura River, Calif."; and on page 113, between lines 12 and 13, to insert "Mad River, Calif."

Mr. COPELAND. There is no objection to the inclusion of the surveys. They are acceptable to the committee.

The PRESIDENT pro tempore. Without objection, the amendment to the amendment is agreed to.

Mr. NORRIS. Mr. President, on page 111 of the bill, where quite a number of surveys are authorized, I think there is a typographical error. In line 24, reference is made to the "Republican River, Kans." Most of the Republican River is in the State of Nebraska. I suggest an amendment so the clause will read "Republican River, Nebr. and Kans."

Mr. COPELAND. Mr. President, that was an inadvertence on the part of the committee. We did not realize there were so many Republicans in Nebraska. It was intended that it should cover the Republican River in Nebraska and Kansas.

Mr. NORRIS. The Republicans of Nebraska ought to be taken care of just as are the Republicans of Kansas.

Mr. COPELAND. It will be acceptable to the Democrats on the committee.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 111, line 24, after the word "River", insert the words "Nebr. and", so as to read "Republican River, Nebr. and Kans."

The amendment to the amendment was agreed to.

Mr. McNARY. Mr. President, is the Senator from New York accepting amendments to the survey section?

Mr. COPELAND. That is correct.

Mr. McNARY. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The LEGISLATIVE CLERK. In the committee amendment, on page 113, between lines 13 and 14, it is proposed to insert the words:

Coos River and tributaries, Oregon.

The amendment to the amendment was agreed to.

Mr. SHEPPARD. Mr. President, I send to the desk three amendments to the survey section, for which I ask consideration.

The PRESIDENT pro tempore. The clerk will report the first amendment offered by the Senator from Texas.

The LEGISLATIVE CLERK. In the committee amendment, on page 111, between lines 3 and 4, it is proposed to insert the following:

Colorado River, Tex., above the county line between Coke and Runnels Counties.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The next amendment of the Senator from Texas will be stated.

The LEGISLATIVE CLERK. In the committee amendment, on page 111, line 6, after the word "Texas", it is proposed to insert a comma and the words "and tributaries", so as to read:

Nueces River, Tex., and tributaries.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The third amendment of the Senator from Texas will be stated.

The LEGISLATIVE CLERK. In the committee amendment, on page 111, between lines 9 and 10, it is proposed to insert the following:

Leon River, Tex.
Sulphur River, Tex.
Pease River, Tex.

Mr. COPELAND. There is no objection.

The amendment to the amendment was agreed to.

Mr. BYRNES. Mr. President, I offer two amendments to the survey section of the bill.

The PRESIDENT pro tempore. The first amendment of the Senator from South Carolina will be stated.

The CHIEF CLERK. In the committee amendment, on page 114, after line 22, it is proposed to insert:

Congaree, Wateree, Santee, and Cooper Rivers, S. C.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The next amendment of the Senator from South Carolina will be stated.

The CHIEF CLERK. In the committee amendment it is proposed to add at the end of section 6, the following:

Edisto River and tributaries.
Great Pee Dee, Lynches, Little Pee Dee, and Waccamaw Rivers, S. C.

Mr. COPELAND. There is no objection to the amendment.

The amendment to the amendment was agreed to.

Mr. MURRAY. Mr. President, I send to the desk an amendment to be inserted in the section relating to surveys.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 115, after line 13, it is proposed to insert:

Hungry Horse Dam, Mont.

Mr. MURRAY. Mr. President, this project was included in previous bills and already surveys have been made. We merely wish to have them completed.

Mr. COPELAND. There is no objection to the amendment.

The amendment to the amendment was agreed to.

Mr. DUFFY. Mr. President, I desire to propound an inquiry to the Senator from New York. On page 112, line 8, appear the words "Fox River and tributaries, Wisconsin." I understand the War Department understand and believe that that includes the Wolfe River?

Mr. COPELAND. That is correct. That is the understanding.

Mr. CLARK. Mr. President, on page 53, lines 13 to 18, in the bill, as passed by the House and stricken out as reported to the Senate, appears an item relating to the St. Francis River in Missouri and Arkansas. As an amendment to the committee amendment I move to insert at the proper place the language appearing in the House provision.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 70, between lines 2 and 3, it is proposed to insert the following:

St. Francis River in Missouri and Arkansas: For flood control by levees and/or levees and reservoirs to protect 1,225,200 acres of land; House Document No. 159, Seventy-first Congress, second session, and Committee Document No. 1, Seventy-fourth Congress, first session; estimated cost, $16,000,000.

Mr. COPELAND. Mr. President, this was considered by the Army Engineers.

Mr. ROBINSON. It was in the original House bill?

Mr. COPELAND. That is correct.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Missouri to the committee amendment.

The amendment to the amendment was agreed to.

Mr. OVERTON. Mr. President, I offer an amendment to the survey section of the bill. I send the amendment to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 111, after line 2, it is proposed to insert "Mermentau River, La."

Mr. COPELAND. There is no objection.

The amendment to the amendment was agreed to.

Mr. BACHMAN. Mr. President, I send to the desk an amendment, which I offer.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. At the proper place in the committee amendment it is proposed to insert the following:

MISSISSIPPI RIVER

Tiptonville to Obion River, Tenn.: Construction of the levee designated as plan 1 for the protection of the towns of Tiptonville, Ridgely, and various smaller communities; and agricultural lands in Lake, Obion, and Dyer Counties, Tenn.; in accordance with House Document No. 188, Seventy-second Congress, first session; estimated construction cost, $730,000.

Mr. BACHMAN. Mr. President, this has received the approval of the Army Engineers and is a continuation of a project which is now in operation.

Mr. COPELAND. This item was given consideration by the committee. It has been approved by the Army Engineers, and is acceptable.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Tennessee to the committee amendment.

The amendment to the amendment was agreed to.

Mr. THOMAS of Oklahoma. Mr. President, when the bill passed the House there were included some 20 projects in my State. I am not a member of the committee, and, therefore, did not appear in favor of any of the projects. In conconsidering the 20 projects, the Senate committee found 8 of them had been examined by the proper authorities and approved. Therefore, the committee included in the bill the projects which met the requirements. Those which did not meet the requirements were omitted.

The projects which did not meet the requirements have been surveyed and examined, but the reports are not complete. The surveys are in various stages of completion. I move to amend the bill by inserting at the end of section 6 the projects to which I have referred, so the surveys may be completed and the final report made hereafter. I shall add one additional project to those which were contained in the House bill, and that is the first one relating to Kenton Reservoir. That is in what is known as the dust zone in the corner of five States, New Mexico, Colorado, Texas, Oklahoma, and Kansas. It is on the Cimarron River, and, if it should be finally approved, it would afford a very large amount of labor for the people in distress in the center of the dust zone.

Mr. COPELAND. The Senator desires that the Kenton project be inserted in the survey section?

Mr. THOMAS of Oklahoma. Yes. The others were contained in the House bill.

Mr. COPELAND. The Senator desires they should be added to the survey section?

Mr. THOMAS of Oklahoma. That is correct.

Mr. COPELAND. There is no objection.

The PRESIDENT pro tempore. The amendment of the Senator from Oklahoma will be stated.

The CHIEF CLERK. In the committee amendment it is proposed to add at the end of section 6 the following:

Kenton Reservoir, Cimarron River, Okla.
Eufaula Reservoir, Okla.
Pensacola Reservoir, Okla.
Markham Ferry Reservoir, Okla.
Fort Gibson Reservoir, Okla.
Wister Reservoir, Okla.
Oolagah Reservoir, Okla.
Braman Reservoir, Okla.
Mannford Reservoir, Okla.
South of Antwine, levees on Chikaskia River, Okla.
Tulsa and West Tulsa levees on Chikaskia River, Okla.
Tenkiller Ferry Reservoir on Illinois River, Okla.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Oklahoma to the committee amendment.

The amendment to the amendment was agreed to.

Mr. NYE. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 112, in the committee amendment, after line 2, it is proposed to insert "Souris River, N. Dak."

The amendment to the amendment was agreed to.

Mr. RUSSELL. Mr. President——

The PRESIDENT pro tempore. Does the Senator from New York yield to the Senator from Georgia?

Mr. COPELAND. I do.

Mr. RUSSELL. I desire to take the floor in my own right to offer an amendment.

Mr. COPELAND. Is it an amendment outside of section 6?

Mr. RUSSELL. It does not pertain to section 6.

Mr. COPELAND. Would the Senator be willing to wait a moment until we perfect section 6, unless he is in a hurry?

Mr. RUSSELL. I am in no particular hurry.

Mr. COPELAND. Is this a survey or a project?

Mr. RUSSELL. It is a project.

Mr. COPELAND. Then I should be glad if the Senator would be good enough to wait a moment.

Mr. RUSSELL. Mr. President, I prefer to offer the amendment now; and, if it shall be voted down in the form in which I offer it, I shall ask to modify it so as to make it a survey project.

I send the amendment to the desk and ask to have it stated.

The PRESIDENT pro tempore. The Senator from Georgia offers an amendment, which will be stated.

The CHIEF CLERK. At the proper place in the bill it is proposed to insert the following:

The Townsend area and Butlers Island on lower Altamaha River in Georgia: To protect people and 84,000 acres of land, including reconstruction of levees destroyed by floods of April 1936; referred to in House Document No. 68, Seventy-fourth Congress, first session; estimated construction cost, $225,000.

Mr. RUSSELL. Mr. President, this amendment does not comply with the rule which has been arbitrarily adopted by the committee in considering flood-control projects. However, I am sure this proposal is much more meritorious than many that are contained in the bill. It involves only a small sum of money; but the expenditure of this sum of money will be very far reaching and will confer great benefits on a section which has suffered from floods periodically for many years, causing great damage to property and rendering practically useless 84,000 acres of tillable land in the lower Altahama Basin.

It is true that those who live in this section and those who suffer great damages from the periodic floods do not have the benefit of the larger newspapers which carry throughout the country the report of those floods and therefore insure the sufferers receiving consideration in what is known as a dramatic flood area. However, one of them did possess a camera, and I have on my desk photographs which disclose the great damage that has been done there to farm lands, to farm residences, and to very valuable properties.

Mr. President, when it is considered that for the cost of $225,000, 84,000 acres of land may be protected from the floods which have come from time to time throughout the past several years, rendering this section practically uninhabitable, I believe this proposal will appeal to the sense of fairness and justice of the Senate even though it did escape the attention of the Army Engineers.

Those facts are disclosed by the Report of the Board of Army Engineers, contained in House Document 68, Seventy-fourth Congress, first session. I may say that at the time this survey was made it was instituted by the Board of Engineers to determine the navigability of the river rather than the practicability of a flood-control project, and perhaps for that reason the project was not included in the bill among those which are regarded as of paramount importance.

The report shows that in the 1925 flood about 83,000 acres of the Townsend area and 300,000 acres of the remainder of the floodway were inundated. Total damages were estimated at about $2,500,000 in this one flood. The district engineer estimates the average annual damage as about $108,000. I hope the members of the committee will bear in mind that statement. The average annual damage is $108,000, of which he assigns $18,000 to the Townsend area and $90,000, or 30 cents per acre, to the river valleys proper. The report says:

Butler and Champney Islands, in the delta of the river, have also been protected by levees to the extent considered justifiable.

Since that report was made, within the past 6 weeks, a flood in this valley has attained such proportions that it has broken the levees that were considered justifiable. Levees erected, if you please, at the cost of individuals, without any air or assistance whatever from the Federal Government, were washed away, and great damage was done there to a model dairy farm, which perhaps some Members of the Senate have seen if they have ever traveled what is known as the coastal highway from the northeast into Florida.

Mr. President, I cannot see why this amendment, involving as it does a small sum of money which will render great benefits to this large body of 84,000 acres of land at a cost of only $225,000, should be meted out the dire punishment that is threatened to any of those that have not been heretofore recommended by the Board of Army Engineers. The report of the Board of Engineers shows the great damage; it shows the small amount that is necessary to correct it; but because the survey was made from the standpoint of determining the navigability of the river it was not recommended, because it was not economically feasible to make the river navigable.

I feel that this amendment should be the one exception to the rule—that the Senate itself should legislate, and adopt the amendment, and afford relief to the people of the delta area of the Altamaha River.

Mr. COPELAND. Mr. President, the Senator from Georgia is now a friend of mine, but he is numbered among those who will not be friends of mine when I get through with this bill, because, meritorious as this project is from the human standpoint, it does not conform to the principle we have already established in the Senate in our declaration of policy.

This project has been surveyed by the Army Engineers. The Board has taken into consideration the recent dramatic occurrences; and, with sorrow in my heart, I must say that a project which costs, as the Senator now says, $225,000, and which was originally presented at $300,000, would not be justified when the capitalized value of the losses is less than $133,000.

Mr. RUSSELL. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. RUSSELL. The figure given by the Senator from New York is that found by the Board of Army Engineers in the original survey on which the report was made, prior to the recent flood, is it not?

Mr. COPELAND. The Board of Army Engineers have given consideration to the matter since the flood. They have not been able to make a complete survey since the flood; but they advise me now that on the basis of the information they have had since the last flood, together with the survey actually made, the project would not be justifiable, would not be considered meritorious; and I am sorry that the committee must resist the amendment.

Mr. RUSSELL. Mr. President, I am frank to say that I cannot understand any report concluding an expenditure of $225,000 to protect 84,000 acres of land is not justifiable. The Senate is supposed to have some power of reasoning and some common sense; and I dare say that not a single Member of the Senate would say that if 84,000 acres of land located anywhere could be protected from periodic floods for this small sum, the expenditure would not be justified.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Georgia [Mr. RUSSELL] to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. RUSSELL. Mr. President, I move to amend the committee amendment in section 6 by adding the "Altamaha River and its tributaries in Georgia" among the projects to be surveyed for flood-control purposes.

Mr. COPELAND. I have no objection to that.

The amendment to the amendment was agreed to.

Mr. RUSSELL. Mr. President, I am so firmly and profoundly convinced of the merit and justice of the proposal that I shall be glad to have the Board of Army Engineers investigate the project, so that at the next session the Senate may consider their report.

Mr. COPELAND. I wish to set myself right so far as I may with the Senator, and say that I will help him all I can to get a survey.

Mr. MINTON. Mr. President, I have had printed and placed upon the desk an amendment which I now offer.

The PRESIDENT pro tempore. The amendment offered by the Senator from Indiana to the amendment of the committee will be stated.

The CHIEF CLERK. In the committee amendment, on page 92, it is proposed to strike out lines 2 to 6, inclusive, in the following words:

Momence, Ill.: Lower rock ledge and dredge upstream for flood control and drainage improvement to agricultural communities in Illinois and Indiana; House Document No. 784, Seventy-first Congress, third session, estimated construction cost, $2,540,000.

Mr. MINTON. Mr. President, this amendment probably will not meet with much resistance. It is unique in its character, in that it does not seek to put anything more in the bill, but seeks to take out $2,540,000 now included in the bill for the drainage of the Kankakee River Basin.

In support of this amendment I send to the desk, to be incorporated in the RECORD at this point, two letters, one from the head of the conservation department of the State of Indiana and the other from the chairman of the planning board of the State of Indiana.

The PRESIDENT pro tempore. Without objection, the letters will be printed in the RECORD.

The letters are as follows:

DEPARTMENT OF PUBLIC WORKS,
Indianapolis, April 21, 1936.

Hon. SHERMAN MINTON,
Senator, Washington, D. C.

DEAR SHAY: For more than a year this department and the more than 100,000 sportsmen and conservationists in Indiana have been fighting a threat of further drainage in the Kankakee area.

On June 19, 1935, a meeting was held at Momence, Ill., presided over by Mr. H. W. Fox, of St. Louis, Mo., who claimed to be the secretary of the Mississippi Valley Association. We think this association was formed to accomplish certain drainage projects for interested engineering companies throughout the United States.

The proposed work can accomplish absolutely no good for Indiana and the only purpose it could serve would be to drain a large area of land unsuitable for agricultural purposes.

A few days ago I found that H. R. 8455, passed by the House of Representatives and printed on July 29, 1935, carried a number of flood-control items, among which was a $2,540,000 appropriation for drainage work in Indiana and Illinois on the Kankakee River. Since the bill has already passed the House, our only course is to have an amendment made in the Senate which would eliminate the appropriation that, in our opinion, should not be made.

Mr. John Wheeler is familiar with this entire situation and has made a trip to Illinois to study the drainage that has been proposed. He also has a complete understanding with Mr. Robert Kingery, who is head of the department of public works for Illinois. In addition to Mr. Wheeler's knowledge, Mr. James Vandebark has been in touch with the entire Kankakee question insofar as the conservation department is interested and is therefore in a position to furnish you with reliable information.

You will receive a letter within a few days from both Jim and John, and my purpose in writing this letter is to assure you that we are in earnest and will greatly appreciate your cooperation in preventing this money being included in the bill as it passed the House of Representatives.

With kindest personal regards, I am,
Sincerely yours,

V. M. SIMMONS, *Commissioner.*

STATE PLANNING BOARD OF INDIANA,
Indianapolis, Ind., April 21, 1936.

Hon. SHERMAN MINTON,
Senate Office Building, Washington, D. C.

DEAR SENATOR: We note that there is a bill in Congress (H. R. 8455) which would make it possible for the Federal Government to take out a rock ledge in the Kankakee River near Momence, Ill. The expense of this would be very great, running over $2,000,000, and those best acquainted with the Kankakee marsh will agree that it will be of no particular benefit. If the water level in the Kankakee marsh is lowered, the thin top soil will blow away, and in my opinion, the land adjacent to the Kankakee River is not as fertile as it was before the previous drainage projects were completed.

Another objection that we have in Indiana to lowering the water table in the Kankakee Valley is the hope that some day the Conservation Department can restore the old Kankakee marsh, partially at least, to the great game country that it originally was. It was without doubt the best duck marsh in the United States, before it was drained, and would be worth much more to the owners if it had not been drained, as it is poor farm ground. I am confident that Indiana would be best served by not lowering this water level.

Yours very truly,

STATE PLANNING BOARD OF INDIANA,
JOHN W. WHEELER, *Chairman.*

Mr. COPELAND. Mr. President, not only has the committee no objection to this amendment, but it desires also at the proper time to have a gold medal struck off, in order that we may decorate the Senator from Indiana for proposing a reduction in the amount of the bill by $2,540,000. It ought to insure his election forever and ever from the State of Indiana.

The PRESIDENT pro tempore. Without objection, the amendment to the amendment is agreed to.

Mr. GIBSON. Mr. President, in connection with the portion of the bill authorizing preliminary examinations and surveys, I offer the amendment which I send to the desk to be inserted at the proper place in the bill.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 114, line 23, it is proposed to insert the following:

Passumpsic River, Vt.
Winooski River, Vt.
Dog River, Vt.

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, I now desire to present some other authorizations of surveys. I think the Senator from South Carolina has already presented amendments dealing with the Congaree, Wateree, Santee, and Cooper Rivers of South Carolina, and the Edisto River and tributaries, Great Pee Dee, Lynches, Little Pee Dee, and Waccamaw Rivers, in South Carolina.

I have several amendments here which I ask to have stated.

The PRESIDING OFFICER. The clerk will state the first amendment presented by the Senator from New York.

The CHIEF CLERK. In the committee amendment, it is proposed to insert at the proper place the following:

Big Blue River, an affluent of the Kansas River.

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, the Senator from Kansas is also desirous of having a preliminary examination and

survey for flood control of the Cow Creek drainage area. The committee has no objection to the survey, but if the project is so changed in scope as to substitute a reservoir plan it should only be after a report is submitted to and acted on by Congress. Therefore, so far as the committee is concerned, it is agreeable to the survey.

The PRESIDENT pro tempore. The clerk will state the amendment.

The CHIEF CLERK. In the committee amendment, on page 73, line 7, after the numerals "$1,050,000", it is proposed to insert:

Provided, That $10,000 of this amount be made available for a preliminary examination and survey for flood control of the Cow Creek drainage area and that the Chief of Engineers be, and he is hereby, authorized, in his discretion.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the committee amendment.

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, the Senator from California [Mr. JOHNSON] presented an amendment to have the Mad River surveyed. That amendment has been agreed to, has it not?

Mr. JOHNSON. It was agreed to this morning.

Mr. COPELAND. The Senator from Kentucky [Mr. LOGAN] is interested in several amendments, and perhaps he would like to offer them now.

Mr. LOGAN. I should like to have them considered.

Mr. COPELAND. The committee has no objection to the inclusion of the rivers covered in the amendments offered by the Senator from Kentucky.

The PRESIDENT pro tempore. The clerk will state the amendment.

The CHIEF CLERK. In the committee amendment, on page 114, after line 22, it is proposed to insert:

The Big Sandy and its tributaries, Kentucky.
The Licking River and its tributaries, Kentucky.
Mud River and Wolfe Creek, Kentucky.
Rough River and its tributaries, Kentucky.
Nolin River and its tributaries, Kentucky.

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, I think the next amendment relates to Louisiana, and perhaps that has been acted on.

The PRESIDENT pro tempore. The clerk will state the amendment.

The CHIEF CLERK. In the committee amendment, on page 111, after line 2, it is proposed to insert:

Mermentau River, La.

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, let me ask the Senator from Texas [Mr. SHEPPARD] whether he presented an amendment relating to the Leon River, the Sulphur River, and the Pease River.

Mr. SHEPPARD. Yes; the amendment has been presented and agreed to.

Mr. COPELAND. The Senator from Minnesota [Mr. SHIPSTEAD] desires surveys of certain rivers, and I ask that the amendment be considered.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. In the committee amendment, on page 112, between lines 3 and 4, it is proposed to insert:

Cannon River, Minn.
Crow River, Minn.
Rum River, Minn.
Roseau River, Minn.
St. Louis River, Minn.
St. Croix River, Minn. and Wis.

The amendment to the amendment was agreed to.

Mr. WALSH. Mr. President, I offer an amendment, merely to perfect a description of two rivers in Massachusetts.

The PRESIDENT pro tempore. The clerk will state the amendment.

The CHIEF CLERK. In the committee amendment on page 108, line 15, after the words "Rhode Island", it is proposed to insert the words "and Massachusetts."

The amendment to the amendment was agreed to.

Mr. WALSH. I offer another amendment similar in nature.

The PRESIDENT pro tempore. The clerk will state the amendment.

The CHIEF CLERK. In the committee amendment on page 108, line 13, after the word "Massachusetts", it is proposed to insert the words "New Hampshire, Vermont, and Connecticut."

Mr. COPELAND. I have no objection.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment of the committee.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The clerk will state the next amendment presented by the Senator from New York.

The CHIEF CLERK. In the committee amendment on page 110, after line 11, it is proposed to insert "Patuxent River, Md."

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The clerk will state the next amendment presented by the Senator from New York to the committee amendment.

The CHIEF CLERK. On page 98, line 17, after the word "Harbors", it is proposed to insert "and as amended by further surveys and studies now in progress."

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The clerk will state the next amendment to the committee amendment, suggested by the Senator from New York.

The CHIEF CLERK. It is proposed, on page 99, line 9, after the word "session", to insert "and as amended by further surveys and studies now in progress."

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, I present another amendment on behalf of the Senator from Kansas [Mr. CAPPER].

The PRESIDENT pro tempore. The clerk will state the amendment to the committee amendment.

The CHIEF CLERK. On page 99, line 9, after the word "session", it is proposed to insert a comma and the words "and as amended by further surveys and studies now in progress."

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, I present a further amendment.

The PRESIDENT pro tempore. The clerk will state the amendment to the committee amendment.

The CHIEF CLERK. At the proper place it is proposed to insert:

Sulphur River, Ark.

The amendment to the amendment was agreed to.

Mr. COPELAND. I present another amendment.

The PRESIDENT pro tempore. The clerk will state the amendment to the committee amendment.

The CHIEF CLERK. At the proper place it is proposed to insert:

Poteau River, Ark.

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, I present another amendment.

The PRESIDENT pro tempore. The clerk will state the amendment to the committee amendment.

The CHIEF CLERK. At the proper place it is proposed to insert:

Sandusky River, Ohio.

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, if I may have the attention of the Senator from California [Mr. JOHNSON], there is an amendment providing for surveys of the Salinas River, the Black River, the Pajaro River, the Eel River, and the Mad River in Humbolt County, the American, Feather, Yuba, and Bear Rivers, Calif.

Mr. JOHNSON. Mr. President, two of those have already been provided for, the Eel and the Black. As to the others, I hope surveys will be ordered.

The PRESIDENT pro tempore. The clerk will state the amendment referred to by the Senator from New York.

The CHIEF CLERK. In the committee amendment it is proposed to insert on page 112, after line 25, the following:

Mad River, Calif.
Salinas River, Calif.
Pajaro River, Calif.
Eel River, Calif.
American, Feather, Yuba, and Bear Rivers, Calif.

The amendment to the amendment was agreed to.

Mr. COPELAND. A survey is asked by the Senator from Florida [Mr. FLETCHER], and I ask for action on the amendment.

The PRESIDENT pro tempore. The clerk will state the amendment to the committee amendment.

The CHIEF CLERK. It is proposed to insert on page 110, after line 19, the following:

Intracoastal waterway, Broward County, Fla.

Mr. KING. Mr. President, if I may make an inquiry of the Senator from New York, my recollection is that 10 or 15 years ago provision was made for an intercoastal survey not only in Florida but in other States. Is this a duplication?

Mr. COPELAND. No; this is to bring it up to date.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

Mr. COPELAND. Mr. President, I have given the clerk a copy of the bill with certain surveys indicated, and, perhaps, during the day they may be checked up to see whether there have been any omissions.

Mr. LONERGAN. Mr. President, I offer an amendment, on page 108, line 13, after the word "Massachusetts", to insert the words "and Connecticut."

Mr. WALSH. Mr. President, I may say to the Senator that the amendment has already been offered and agreed to.

Mr. LOGAN. Mr. President, I desire to offer an amendment.

The PRESIDENT pro tempore. The clerk will state the amendment to the committee amendment.

The CHIEF CLERK. At the proper place it is proposed to insert:

Big Sandy River, Ky.: Bank protection at Catlettsburg, Ky.; report to Congress not yet made; special report in Office of the Chief of Engineers; estimated construction cost, $145,000.

Mr. LOGAN. Mr. President, I have a very brief statement to make in connection with the proposed amendment. The city of Catlettsburg is doomed to go into the river at the next flood. There is an extreme emergency. I understand that the Senator from New York, who is my good friend, is opposing all amendments unless a report of the Board of Engineers of the War Department on the project affected has been received by the Senate.

I desire to say at this time that I do want the responsibility for the calamity, when it comes, to be placed on the Senator from New York or the Senate. I myself do not want to share it.

I may say that the War Department previously made a survey of this project and reported that there was no immediate danger, but the last flood caused them to make another examination, and their office in Huntington, W. Va., has recommended this project at a cost of $145,000. The report reached Washington, I think, only yesterday morning. The Board of Engineers here has not had an opportunity to investigate it.

The only thing I seek to do is to call the attention of the Senator from New York to the situation, so that when the calamity comes—and it will come with the next flood—I will know that I have done all that I could possibly do, and the responsibility will be with the Senator from New York and the Senate for the loss of life and property that will follow the next flood on the Big Sandy River.

Mr. BARKLEY. Mr. President, I wish simply to emphasize what my colleague has said. The item is one about which some discussion arose in the Senate yesterday. It seems a pity that the lack of a report from the Board of Engineers here in Washington—which Board received the report from the district engineer just yesterday or the day before and has not had an opportunity to submit it to Congress—should stand in the way of this most worthy project.

There is no doubt what Congress will do about the matter ultimately, when the report shall come in. Congress will not meet again until next January. It is possible that there will be another flood between now and January or before the work could be done, if action by the Senate should be put off until January, and there might result loss of life and destruction of a vast amount of property at Catlettsburg, Ky., because of the confluence of the Big Sandy and the Ohio Rivers at that point.

In view of those special circumstances, I hope the Senator from New York will not object to putting this amendment in the bill and letting it go to conference. If in the meantime the Board of Engineers can make its report to Congress, the appropriation will be justified. If they should happen to turn it down before the conference agreement is entered into, the conferees can take that fact into consideration in determining whether or not to leave the amendment in the bill. Under those circumstances I hope the Senator from New York will not object to the amendment.

Mr. COPELAND. Mr. President, I had myself all square with the Senator from Kentucky this morning. I fixed up everything with him during the morning, but now our understanding is all upset. However, having been a doctor for a good many years, I have had to carry the responsibility of a death in a family and take all the responsibility of the treatment that might be applied, and I suppose I shall have to do it here. When the flood comes, and disaster comes with it, the lives of many of these people will be on my head. I am sorry that I have to carry that responsibility.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. BARKLEY. There is a vast difference between being responsible for the death of a single patient and being responsible for the wholesale deaths of many people in a community.

Mr. COPELAND. Also, I have been in charge of handling epidemics; so I know something about that matter, too.

Mr. President, the district engineer from the Corps of Army Engineers has made a survey of the project in question as an emergency project to see if it needs emergency treatment. I have no doubt that if it shall be found that there is emergency and necessity for immediate action, funds will be provided from the emergency fund. However, as the chairman of the committee, I could not consent to the present proposal, because if we were to make an exception in this case, there would be no excuse for the battle I had yesterday with the Senator from Montana [Mr. WHEELER] nor for the battle I had with the Senators from Kentucky yesterday. If we were to make such an exception, we should violate the spirit of the bill; and, Mr. President, I think it would be unfortunate were we now to open the gate. So I feel that I must resist the amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Kentucky [Mr. LOGAN] to the committee amendment.

The amendment to the amendment was rejected.

Mr. ROBINSON. Mr. President, there were embraced in the House bill which is now under consideration, and for which the Senate committee has adopted provisions in the nature of a substitute, 13 reservoirs in the basin of the Arkansas River, and about an equal number of reservoirs in the basin of the White River in the State of Arkansas. The House sought to authorize the construction of these projects in the aggregate amount of a very large sum. The Senate committee omitted these projects from the bill, on the ground that as flood-control projects they had not received the endorsement of the engineers, and on the additional ground that they involved considerations relating to the development of power, and, I believe, soil-erosion and forestation. In any event, the provisions were sought to

be reincorporated in the Senate bill, and the Senate committee rejected the amendments so provided.

It is my understanding that a restudy of these projects will be made under the terms of the bill, or at least a portion of them. I ask the Senator from New York whether the statement I have made is correct.

Mr. COPELAND. Yes, Mr. President; the Senator's statement is correct. A very careful study was made by the committee of the various reservoirs mentioned by the Senator from Arkansas. There can be no doubt that ultimately they will be constructed. However, these projects include not only flood control, but many of them contain power possibilities, and it was thought wise by the committee to limit the bill wholly to flood-control projects. Some of them have been included. The Senator and his colleague last night presented one which was accepted because it was fully justified as a flood-control project. The other projects, however, are largely power projects.

Mr. ROBINSON. Mr. President, the projects to which I am now referring are not levee projects. They are reservoir projects which are important in any system of complete flood control of the two great branches of the Mississippi; namely, the Arkansas and the White Rivers. The provisions relating to these reservoirs will be in conference, having been incorporated in the House bill. In view of the action of the committee on the subject and the opposition to the projects being included at this time, my colleague and I do not again offer the amendments in the Senate.

There was another amendment which relates to a levee which it has seemed to us is a consistent and necessary part of the levee system that is being provided for the Arkansas River; namely, relating to Faulkner County Levee District No. 1. The item carried an authorization of $109,000. It was incorporated in the House bill, but eliminated by the Senate Committee on Commerce. My information is—and it is derived from the engineers as well as from members of the committee, and from the Senator from New York, who made a statement about the matter yesterday—that that provision was rejected by the committee on the ground that it was not sound economically. In view of the policy that has been adopted by the committee, I do not at this juncture again offer that amendment; but I wish to state that, in my judgment, the levee referred to is an essential and necessary part of the flood system for the Arkansas River.

Mr. COPELAND. Of course that also will be in conference.

Mr. ROBINSON. That provision will be in conference.

Mr. COPELAND. The attitude of our committee was that because of the report of the Army Engineers the project was not regarded as economically justified. The annual cost is estimated at $6,500, as compared with an estimated annual benefit of about $1,000, or a ratio of $1 to 15 cents; and the proposal was rejected on that account. However, it will be in conference, and I thank the Senator from Arkansas for his kindly consideration.

The Senator from Ohio [Mr. DONAHEY] wishes a survey of the Mad River, Ohio; and we have no objection to the inclusion of Mad River, Ohio. The survey of the Mad River, Ohio, is approved by the committee. We ask the inclusion of "Mad River, Ohio", on page 112, after line 11.

The PRESIDENT pro tempore. Without objection, the amendment to the committee amendment offered by the chairman of the committee on behalf of the Senator from Ohio [Mr. DONAHEY] is agreed to.

Mr. COPELAND. Mr. President, on page 112, in line 20, the first word should be "Sabino"; and on the same page, line 21, the county is "Pinal." I ask that those two corrections be made.

The PRESIDENT pro tempore. Without objection, the two corrections requested will be made.

Mr. COPELAND. I should say that on page 112, after line 11, at which point "Mad River, Ohio", was included, the language should be made to read "Mad River at Springfield, Ohio."

The PRESIDENT pro tempore. Without objection, that correction also will be made.

Mr. COPELAND. Mr. President, if there are no other surveys, we will now take up the first violently contested section of the bill, which is section 3. I think some amendments are proposed to be offered to that section. I believe the Senator from Mississippi [Mr. BILBO] desires to speak on the subject.

Mr. BILBO. Mr. President, as a member of the Commerce Committee and being permitted to participate in the work of perfecting the bill, I agreed to all the provisions of the bill except section no. 3, reserving the right to oppose the incorporation of that section in the final passage of the bill. This is a very important feature of this piece of proposed legislation, and it will become more important as the years go by. I wish to invite the attention of the Senate especially to the provisions of section 3, and at this juncture I ask that the Secretary read the section.

The PRESIDENT pro tempore. Without objection, the clerk will read as requested.

The CHIEF CLERK. On page 55, after line 3, section 3 reads as follows:

SEC. 3. That hereafter no money appropriated under authority of this act shall be expended on the construction of any project until States, political subdivisions thereof, or other responsible local agencies have given assurances satisfactory to the Secretary of War that they will (a) provide without cost to the United States all lands, easements, and rights-of-way necessary for the construction of the project, except as otherwise provided herein; (b) hold and save the United States free from damages due to the construction works; (c) maintain and operate all the works after completion in accordance with regulations prescribed by the Secretary of War: *Provided*, That whenever expenditures for lands, easements, and rights-of-way by States, political subdivisions thereof, or responsible local agencies for any individual project or useful part thereof shall have exceeded the present estimated construction cost therefor, the local agency concerned may be reimbursed one-half of its excess expenditures over said estimated construction cost: *And provided further*, That when benefits of any project or useful part thereof accrue to lands and property outside of the State in which said project or part thereof is located, the Secretary of War may acquire the necessary lands, easements, and rights-of-way for said project or part thereof after he has received from the States, political subdivisions thereof, or responsible local agencies benefited the present estimated cost of said lands, easements, and rights-of-way, less one-half the amount by which the estimated cost of these lands, easements, and rights-of-way exceeds the estimated construction cost corresponding thereto: *And provided further*, That the Secretary of War shall determine the proportion of the present estimated cost of said lands, easements, and rights-of-way that each State, political subdivision thereof, or responsible local agency should contribute in consideration for the benefits to be received by such agencies: *And provided further*, That whenever not less than 75 percent of the benefits as estimated by the Secretary of War of any project or useful part thereof accrue to lands and property outside of the State in which said project or part thereof is located, provision (c) of this section shall not apply thereto; nothing herein shall impair or abridge the powers now existing in the Department of War with respect to navigable streams.

Mr. COPELAND. Mr. President, will the Senator yield to me for just a moment?

Mr. BILBO. Yes.

Mr. COPELAND. The issue here, Mr. President, is whether the Federal Government should assume all the cost of these projects, including the cost of lands, damages, and the relocation of railroads and highways, or whether the Federal Government should provide for the building of the projects and leave the localities, as has been the practice in the past, to pay for lands and damages.

As I understand, the Senator from Mississippi will plead that the Federal Government should assume the entire burden of cost.

Mr. BILBO. Mr. President, I am offering as a substitute for section 3 the following declaration of policy:

SEC. 3. It is hereby recognized that the Federal Government should assume the full burden and responsibility for the improvement of navigable waters or their tributaries for flood-control purposes, and that neither the whole nor any part of the expenditures necessary for the construction of any project within the provisions of this act shall be required of any State or the States, political subdivisions thereof, or other responsible local agencies.

Mr. President, I shall endeavor to show that the scheme provided for in section 3 is impracticable, is impossible of

being carried out, and will result in the failure of the program that is to be undertaken by the enactment of this proposed piece of legislation.

One can readily see by comparison and analysis that the substitute I am offering in effect eliminates all the provisions of section 3 of the original bill, which section provides for a contribution from the States or subdivisions thereof in projecting a Nation-wide flood-control project or program. In the substitute I am offering I desire to make the positive statement or have enacted the positive policy of total responsibility of the Federal Government in whatever is done in carrying out a Nation-wide program of flood control.

The Congress has considered many important and far-reaching problems of government, but by the enactment of this bill we are initiating or inaugurating or beginning not only the most important, the most helpful, and far-reaching program of Federal activities commenced in half a century, but we are launching a program that will require the expenditure of more public funds than has been made necessary by any undertaking of this Government in the past or will be made necessary in the future, unless it be the incurring of governmental obligations incident to a declaration of war.

I have been amazed at the observations of some Senators as to the amount of money involved in this appropriation. If they will keep an eye on the activities of Congress for the next 25 years, they will realize just what we are beginning today. The amount of money in this appropriation is a mere suggestion of what it will be in the very near future, because, with only a partial survey of the work necessary to be done to save the people of the United States from the destructive floods by the construction of reservoirs, levees, dams, and channels, and not including the cost of the restoration of our forests and the conservation of our soil, the Army Engineers estimate an expenditure of over $8,000,000,000; but let me remind you, Mr. President, that before this work is finished and the industrial, commercial, agricultural, and economic life of the Nation has been made secure, we will have expended more than $12,000,000,000. Therefore, it is important that whatever policy is announced in the beginning shall be safe and sound, fair, just, and equitable to all the taxpayers of our common country. We must legislate today with a vision of all those things that must be accomplished before this work is done and this problem is properly solved. In our haste and hurry in the pressing emergency that confronts us and the menace that has overtaken us, we must pause long enough to be positively sure that we are right before we go ahead. I appreciate the fact that some of our friends who represent the Eastern States have suddenly become flood conscious and that they are anxious to have some legislation along this line; but I warn them that we had better go slowly and make sure our policy is right, because we are now embarking on a program involving an ultimate expenditure of $12,000,000,000.

Mr. President, no subject has engaged the attention of the thoughtful people of the United States for the past 50 years more than the question of flood control. Conditions contributory to flood disasters have so increased during the onflowing years that the country's susceptibility to frequent devastations caused from the flood menace has become so pronounced that today it represents the most serious problem confronting the welfare of the Nation.

In the early history of our country, before the destruction of our forests and before an extensive cultivation of our lands, and at a time when our population was not so widely distributed, the dangers from excessive floods were by no means serious. The subject in the early days was never thought of except as purely a local problem. The citizens of the various sections of the country who had immigrated to and located in districts subject to overflows were for a considerable period of time able to make themselves reasonably secure from flood disasters.

As the years passed on and the country became more thickly settled, and as the conditions that retarded the flowage of waters were gradually removed as civilization progressed, the task, once so easily accomplished, gradually became one that exceeded their powers to perform. So stupendous became this burden upon those living within the path of the rushing floods that it became necessary within the past decade for the Federal Government to assume an appreciable measure of the accumulative burden.

The day has now arrived when the entire Nation has become conscious of the imperative necessity for an effective flood-control system that will protect the lives, liberties, and properties of all the people who are affected directly or indirectly by this Nation-wide menace. It is now generally accepted that the prevention of destructive floods is a problem that affects every section of our country.

In a volume revised up to January 1936, entitled "Projects for the Development of Rivers and Harbors", summarized from reports of the Corps of Engineers to the Congress, may be found a map showing the number of projects and the estimated construction costs requisite to flood control in the United States. A mere glance at this map will not fail to impress one with the idea that the problem is one of national character and involves the national welfare. The reservoirs and canals contemplated in this report are dotted and lined over the entire country, with the exception of the States of Nevada, Utah, Arizona, and New Mexico, and this omission very probably obtains for the reason that the Engineers have not yet made a survey of that particular area.

This survey was made under the provisions of the Rivers and Harbors Act of January 21, 1927, wherein the Secretary of War and the Chief of Engineers were assigned the duty of making surveys in accordance with House Document No. 308, Sixty-ninth Congress, first session, with a view to the formulation of general plans for the most effective improvement of navigable streams of the United States and their tributaries for the purpose of navigation, the development of water power, the control of floods, and the needs of irrigation.

The tabulations made by the Corps of Engineers show recommended projects with an aggregate construction cost of $8,325,000,000 and indicates as many as 2,000 projects covering practically every section of the country in the undertaking.

This survey contemplated mainly the construction of reservoirs, levees, and rendering navigable river channels. The subject of reforestation, soil erosion, cover grasses, and canals for diverting flood waters to other channels was not embodied in their report.

I invite the attention of Senators who represent the States through which the Ohio and Mississippi Rivers flow, because they will get a conception, if they will follow my address, of the cumulative cost upon the States which will be assessed under the scheme proposed in section 3.

It is well to note at this time that several plans for flood control have been proposed by outstanding engineers during the last decade. One school of thought advocates the building of leeves, the straightening of rivers, and the building of canals, diverting the flowage into other channels capable of handling an additional volume of water. Another school advocates the construction of reservoirs so that the water may be impounded for release when no damage would ensue. Still another school strongly recommends reforestation, planting of grasses, and effective methods for preventing soil erosion.

All of these proposals have their merits, but today it is universally conceded that no one of them is sufficient in itself to provide the necessary relief. It is only by a proper correlation and coordination of all these methods that the ideal system of flood control can be attained.

We were entertained yesterday by the Senator from Minnesota [Mr. SHIPSTEAD], who attempted to show that even the sandstorms and the drought which have been cursing the great Northwest came because of a lack of proper flood control. He made the assertion, it will be remembered, that in a very few years that great agricultural section will become a desert, unless something can be done to prevent it.

Since this is true, it at once becomes evident that the means and methods of control involve activities incurring

tremendous costs in areas far removed from those sections directly in the path of floods. These combined proposals affecting a spread of activities covering the entire Nation, from which every section will receive benefits, force the inescapable conclusion that the question of flood control is the sole and undivided responsibility of the United States Government.

The purpose of this discussion, as the Members of this body may have already perceived, is not to treat in detail any one of these several plans or to endorse any particular method. I accept the universal verdict that an effective flood control can be accomplished only by the employment of all of the plans I have just enumerated. The ineluctable conclusion presents itself that an enterprise of so great magnitude, one that involves a system of preventive measures that extends its ramifications into every vale and hamlet, every prairie and hillside, and every teeming city and fertile valley on the continent, must be undertaken and completed by the strong arm of the National Government.

The declaration of policy as announced in House bill 8455, the matter which is now under consideration, as indicated in section 1, reads as follows:

> It is hereby recognized that destructive floods upon the rivers of the United States, upsetting orderly processes and causing loss of life and property, including the erosion of lands and impairing and obstructing navigation, highways, railroads, and other channels of commerce between the States, constitute a menace to national welfare.

In another part of this section, it is stated:

> That investigations and improvements of rivers and other waterways for flood-control purposes are in the interest of the general welfare. That the Federal Government should improve or participate in the improvement of navigable waters or their tributaries for flood-control purposes if the benefits to whomsoever they may accrue are in excess of the estimated costs, and if the lives and social security of people are otherwise adversely affected.

I am unable to find in all my research upon the subject of flood control a more convincing argument in favor of the Federal Government assuming full and complete responsibility for the improvement of rivers and waterways for flood-control purposes.

In a pamphlet issued by the Tri-State Authority, with headquarters at Pittsburgh, Pa., entitled "Let Us Have Protection From Floods", there is to be noted from a report of the Mississippi Valley Committee to Public Works Administration, October 1, 1934, the following:

> Federal interest in these projects (having reference to the 13 reservoirs to be constructed on the upper reaches of the Ohio River and its tributaries) is such that shows Federal participation might go to the sum of $26,400,000, while necessary non-Federal participation is estimated at $43,700,000. The latter amount should be assessed against the States and the communities benefited whether on the tributary or on the main stem of the Ohio in proportion to the estimated benefit to be received.

Then the editor, Senator W. B. Rodgers, of Pittsburgh, Pa., adds this comment:

> While a recommendation for local participation in the costs of constructing the 13 reservoirs is incorporated at some length in the report, it is the contention of the Tri-State Authority that this project is national in character and in benefits to be derived and should be paid for entirely out of Federal funds, as is being done in the construction of the Tygart Reservoir, one of the units of this system.

The advocates of section 3 will think they are meeting themselves coming back when they are reminded that of these 14 reservoir projects, the Government is already building the Tygart Reservoir wholly upon its own responsibility.

Permit me in this connection, Mr. President, to quote from a resolution adopted at a special session of the National Rivers and Harbors Congress at New Orleans, La., December 14, 1935, which reads as follows:

> The protection of lives and property of the people of the United States from recurring disastrous floods in the valleys of the major streams is recognized by this organization and also by the Congress of the United States as a problem affecting the economic welfare of the Nation, the study, solution, and constructive remedial treatment of which should be carried out by appropriate Federal authorities at national expense. The same principle and obligation should apply in the development by the Federal Government of new inland waterways for purposes of navigation or the enlargement of existing navigable waterways and the costs to adjust existing public highways or adjusting existing railroads and other privately owned property and facilities that meet the requirement of such new or enlarged projects should be borne by the United States Government.

I wish further to quote from an address delivered by Maj. Gen. Lytle Brown, Chief of Engineers, before the National Rivers and Harbors Congress in Washington, D. C., December 10, 1929:

> During the past 2 years nothing in the way of river problems has received as much attention as the flood control of the Mississippi River. It would seem that nothing more could possibly be said on the subject, but maybe the matter can be somewhat clarified as time goes on. In the consideration of the subject by Congress shortly after the flood control of 1927, it was conclusively shown that the subject can be handled effectively only by the National Government, and the Flood Control Act was modeled after that conclusion. Where more than one State is affected in a matter, the subject cannot escape the intervention by the central Government. The people of the States have the right to expect as much, since no settlement of these questions can be made by any other authority. If the national authority has seen fit to take up the matter of flood control on the Mississippi River, it cannot allow any lesser authority to intervene to stop or hinder its plans. If in the carrying out of these plans injury is done any interest without corresponding benefits to offset that injury, just compensation must be paid.

Any plan for the control of water incorporates a movement for most of the basic functions of the life of a nation. In controlling water we also must take into consideration the relevant problems of land. There can be no planning for both land and water unless we plan for the whole people.

The Northeastern States have their problem of flood control. The Ohio Valley and its upper reaches have also a flood problem. The Mississippi Valley, which carries the water from 33 of the 48 States of the Union, drains more than 40 percent of the territory of the United States, produces 80 percent of the minerals, agricultural products, and manufactured articles of the country, and sends to Congress 63 percent of its Members, has its problem of flood control.

The 785,000,000 acres of the most productive land in the world that lie in the Mississippi Basin within themselves would justify calling upon the National Government to assume the entire burden of flood control. The vast area of land which now constitutes the section of the country subject to the frequent visitations of sand storms is also involved in this great problem of flood control.

It is impossible at this time, were one to close his eyes, to place his finger upon the map of the United States without covering some spot more or less affected by the unbridled waters of the Nation.

How anyone can conceive that this problem is other than a national problem, an obligation and responsibility to be discharged wholly, and not in part, by the National Government, is entirely incomprehensible.

There is no difference of opinion among us as to the necessity for flood control. There are no divided views on the question as to the time when this great undertaking should begin. Far less should there be any justification for a difference of opinion as to what authority should assume this burden.

The Mississippi River, from Cairo, Ill., to its mouth, represents in its tortuous course over this area 1,700 miles of flowing length. It is bordered by the States of Kentucky, Tennessee, Arkansas, Mississippi, and partially borders and passes through the State of Louisiana. The lower section of the Mississippi River is the bottle-neck through which flow the waters of the vast expanse located between the great prairies that gradually approach the uplift of the Rockies on the west and the far-flung Alleghenies on the east, even penetrating into the industrial region of Pittsburgh, Pa.

Because of the magnitude of the flood situation in this wide expanse of country, a section comprising more than three-fourths of a billion acres of the most valuable and productive land in the world, and concerning which a noted authority has said—

> It is by a specially bountiful provision of nature that in and from this heart lead the most wonderful arteries for a national life which are furnished for any people.

As before stated, because of its magnitude, and the magnitude of its susceptibility to the havoc, ravages, and devastations of uncontrollable floods, this particular Mississippi Basin may be taken as a fitting example to which to apply the principle of local participation in flood control as provided in section 3 of House bill 8455.

Within this wide expanse of territory the lives, liberties, and properties of the people are not endangered solely from the onrushing sweep of maddened floods, leaping levees, destroying forests, gullying lands, and submerging thousands of erstwhile prosperous citizens in watery graves, but they are subject over a large area to the terrible effects of water erosion, which scourges the East as well as the West, and impoverishes hundreds of thousands of people if allowed to go unchecked. Very probably the most widespread damage does not lie directly in the wake of these uncontrolled waters but may be found in certain sections in the insidious sheet erosion that takes away the irreplaceable top soil of cultivated areas. Here, lack of reforestation and lack of restoration of range grass on areas now laid bare by the plowshare, subject the lands and people to the rage not only of floods but likewise of wind and storm; also to the great droughts of recent years, and the terrifying spectacle of clouds of dust borne upon the wings of the wind across one-half of the continent, so thick that the rays of the all-beholding sun are unable to penetrate. The agencies necessary for the preservation and reclamation of these arid sections are the self-same agencies that contribute to the control of devastating floods. Consequently, there must be a unification of all these systems both for the preservation of our land from the scourge of drought and for the protection of our people from the havoc of floods.

If it be contended that local participation should be required, in proportion to the benefits derived, with respect to the costs of building levees and reservoirs for the direct control of floods, then it naturally follows that the exponents of that idea will also, and with reason and consistency, maintain that the same rule should apply with respect to reforestation, restoration of range grass, and all other methods employed to reduce the drought menace, and reclaim and transform a land of aridity into one of productivity.

It may readily be seen that when one attempts to apply the principle of local participation to any plan having for its purpose the reforestation of our lands, soil conservation, and the restoration of native grasses to our arid prairies, one is brought face to face with an impossible and impracticable problem.

However sanguine one may be as to being able to find some rule of procedure by which proper allocations of costs may be made to States benefited by the construction of reservoirs without their confines, that enthusiasm is wholly dissipated in any effort to apply the same rule to the allotment of the costs to benefited areas as pertains to reforestation and soil erosion. The supplying of cover grasses to arid wastes, and of native tree plants to forest sections, is as necessary an adjunct to the control of floods as the construction of reservoirs.

It would be wholly unfair and unjust to insist upon local participation as applied to one method of flood control, and wholly disregard it because of its impracticability with respect to another form. There is only one conclusion to be reached, and that is to eliminate entirely local participation, and require the Government to assume the full responsibility.

I desire to address this remark to the Senator from New York [Mr. COPELAND]. When the Senator undertakes to show that communities should participate in the control of floods in this Nation by assisting to build dams and reservoirs, I desire him also to tell how they are going to participate in the two other great things which are necessary before we shall ever solve the flood problem of the Nation—reforestation and the conservation of our soil. We cannot get by with one unless we get by with the other, too.

The fact that local participation, as applied to reforestation and soil erosion, reduces the principle to an absurdity, is conclusive proof that its application to other forms of flood control, which are no more important to the system proposed, is wholly without foundation in justice and fairness.

It will be contended, and readily admitted, that any reservoir constructed on the upper reaches of the Ohio River and its tributaries will in some degree bestow benefits upon the States adjoining the Mississippi River between Cairo, Ill., and the Gulf of Mexico. Likewise will it be contended and admitted that reservoirs constructed in far-away Montana, Wyoming, Nebraska, Kansas, Colorado, and the Dakotas, along the winding course of the Missouri River and its tributaries, will in some measure benefit the States on the bottle neck of the Mississippi, namely, from Cairo to New Orleans. Also, reservoirs constructed in the States of Illinois and Wisconsin on the Illinois River and its tributaries, and in the States of Minnesota, Iowa, Wisconsin, and Missouri on the upper reaches of the Mississippi River, also in the States of Oklahoma, Texas, and Kansas on the Arkansas and Red Rivers that flow into the bottle neck of the Mississippi, will result in some indeterminate degree of benefits to the States from Memphis, Tenn., to the mouth of the Mississippi.

This system will comprise more than 1,600 reservoirs in order that exact justice through complete protection may be meted out to each of the several States benefited by each one of these 1,600 pools of impounded waters. It would necessitate just so many—namely, 1,600—allocations of costs for each of the numerous States benefited.

In other words—and I address my remarks to the Senator from Louisiana [Mr. OVERTON]—if we permit the policy of contributions, as assessed by the Board of Army Engineers, to go in this bill, and thus are tied from now on in all the projects that must be eventually constructed before the flood question will be solved, the Senator from Louisiana will be fixing upon his State and I shall be fixing upon my State a proportionate part of the expense of constructing these thousands of dams scattered throughout the Nation. To be more exact, the Army Engineers in this flood-control map, where they estimate the cost at $8,000,000,000, say there are 2,000 projects, and it is safe to estimate that 1,600 of these projects will be found in the Mississippi Valley. In other words, the State of Louisiana, the State of Mississippi, the State of Arkansas, the States of Tennessee, Ohio, and these other States, will be, as the program is carried out, assessed in the consummation and prosecution of construction of these 1,600 or 1,800 projects, scattered from the Alleghenies on the one side of the country to the Rockies on the other side.

Mr. OVERTON. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. BACHMAN in the chair). Does the Senator from Mississippi yield to the Senator from Louisiana?

Mr. BILBO. I yield.

Mr. OVERTON. Does the bill now under consideration provide for assessments, or does it contemplate voluntary contributions on the part of the States and local subdivisions?

Mr. BILBO. In section 3 the bill provides for assessments to be made by the Board of Army Engineers, allocating to each State costs in proportion to the benefits to accrue from the project. The payment of the assessment is not mandatory. The States cannot be made to pay them; but section 3 says that this assessment and contribution from the States shall be made before anything is done in the consummation of the project. So the States are either going to pay it or they are not going to have any flood control; there will not be anything done. The fact of the matter is that the bill makes it absolutely obligatory on the part of the Army Engineers to make the assessment and collect every dollar, and the money must be on the barrel head before anything is done in the consummation of any of the projects upon which there will be allocated assessments to the various States.

Before resuming my remarks, I may say that I contended before the committee that, with a few exceptions, if this amendment shall remain in the bill, it will mean that there will not be any flood-control program, and I will show Senators why I make that statement.

We are going to build a reservoir to control the floodwaters of the Ohio and the Mississippi Rivers, and we are going to build it amid the hills of Pennsylvania, on the Monongahela

or the Susquehanna. This whole work will start by the building of a reservoir in the rock-ribbed hills of Pennsylvania to affect the welfare of the people of Louisiana, Mississippi, and Tennessee. The Engineers will have to do it, not that they may do it, but they must do it if they are able to, the benefits to accrue to the States of Louisiana, Arkansas, and Mississippi, all the States down the line making assessments and then collecting the money. Then they can begin to break ground to build a reservoir in Pennsylvania. If one State—if my State of Mississippi, for instance—is not able to contribute, or if my State refuses to contribute, then Tennessee, Louisiana, Arkansas, and the Ohio towns and the plantations down the river may be flooded because Mississippi refuses to contribute, and the Engineers cannot proceed.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. BILBO. I yield.

Mr. CLARK. I recall to the Senator's mind that when the so-called Jadwin bill was before us, in 1928, I believe it was, the principle was seriously advocated by General Jadwin and some others, on the theory of local contribution, that in such a case as of a floodway built on the Missouri side of the Mississippi River to protect Cairo, Ill., the Legislature of Missouri should be required to make an appropriation to pay for that floodway. Obviously, of course, that could not happen; and according to this theory of local contribution, Cairo would have had no protection at all, because Missouri, across the river, which suffered and did not profit by the floodway, was not willing to pay for the construction of the floodway.

Mr. BILBO. Exactly. I thank the Senator for his contribution at this juncture in regard to this one item.

The State of Mississippi, in an attempt to save the property and the lives of her people from the ravages of floods, has, out of tax money, contributed over $50,000,000 in the years gone by. This money was wrung from the taxpayers of Mississippi without any Federal aid, and I am reliably informed that through the Mississippi Valley the taxpayers have contributed in the neighborhood of $265,000,000 in an attempt to save themselves.

Mr. OVERTON. Mr. President, will the Senator yield?

Mr. BILBO. I yield.

Mr. OVERTON. In order that the RECORD may accurately show the contributions of the lower Mississippi Valley, I may say to the Senator from Mississippi that prior to the adoption of the Jadwin plan, under the act of May 15, 1928, there had been a total local contribution on the part of the affected States, from Cairo, Ill., to the Head of Passes at the Gulf, in the sum total of $293,000,000, and since the enactment of the 1928 law there has been contributed by these States toward the completion of the plan adopted in the Flood Control Act of 1928 a total in excess of $41,000,000.

Furthermore, in the modified plan contemplated in the bill which passed the Senate, of which I had the honor to be the author, and which is today being considered by the House committee, there will be required a total contribution of not less than $8,000,000. In addition to that, the States will have to provide the cost of relocation of highways, and preserve the drainage along the main stem of the Mississippi River.

Mr. CLARK. Mr. President, will the Senator from Mississippi yield to me to ask a question of the Senator from Louisiana?

Mr. BILBO. Certainly.

Mr. CLARK. Under the Overton bill, which recently passed the Senate, the cost of the construction of a causeway across each of these floodways is to be borne by the Federal Government, is it not?

Mr. OVERTON. Does the Senator mean the elevated railroad and highway structures?

Mr. CLARK. Yes.

Mr. OVERTON. Yes; with the limitation, I may say to the Senator from Missouri, that the Government is not to elevate every highway but is to construct one highway over the Eudora floodway, one over the West Atchafalaya, and two over the Morganza.

Mr. CLARK. I understand that; but the point I make is that the Government is to bear the expense. I was in favor of that, and I am still in favor of it, but I am completely at a loss to understand the theory on which the Government is to finance that construction in Louisiana under the Overton bill and at the same time to assess these local damages against other equally meritorious flood-control projects in other sections of the country.

Mr. BILBO. Mr. President, I am indebted to the Senator from Louisiana for the correct statement of the various contributions. I was merely giving the estimate furnished by a member of the House Flood Control Committee as to the lower part of the Mississippi River.

Of course, these contributions, which amount to over $300,000,000, as suggested by the Senator from Louisiana, are a mere bagatelle compared with the tremendous losses of property resulting from the floods which have overtaken the people of this great section of the United States. Those losses amount to billions, instead of millions.

If the principle of local participation should apply in this vast expenditure of money to protect the lives and properties of the people, with respect to the construction of reservoirs, canals, and levees, it should with equal propriety apply with respect to any plan for the reclamation and preservation of the arid sections which come within the area that is drained by the Mississippi River and its tributaries.

A program of reforestation and restoration of range grass will not only benefit the section of the West where such a program is absolutely essential, but would benefit in some unknown and indeterminate measure those States along the Mississippi River through which the uncontrolled flood torrents of the West now pour, bearing terrifying disasters in their wake. Whatever agency is employed in these arid sections for the reclamation of lands that increases the retardation of onflowing waters is to a certain extent beneficial to States far beyond where these agencies are employed.

I address this query to the Senator from New York: What modern Pythagoras, what Einstein of our own age, can determine with unquestioned accuracy the proportionate share of the benefits to be derived from the construction of reservoirs in distant lands and the reclamation by reforestation and otherwise of arid areas in remote places? What finite mind is able to make so infinitely complicated a calculation? It is utterly inconceivable that the genius of man, even in this enlightened age of science and mathematics, can approach any satisfactory determination of the proportionate share of this cost which it is alleged should be borne by all the States to be benefited. The whole theory of section 1 is nonsense gone to seed.

Mr. COPELAND. Mr. President, I suggest that the Senator refer that question to the taxpayers. Do not ask me the question of me. The taxpayers also have some rights.

Mr. BILBO. I assumed that the Senator was representing the taxpayers.

Mr. COPELAND. I am representing the taxpayers of my State, and in the position which I am taking here I think I am representing the taxpayers of every State.

Mr. BILBO. The Senator may be representing taxpayers who may be able to meet the partial burden of the program which they are assuming under the bill, but he is losing sight of the taxpayers who are not able to bear the burden which is placed on them by the bill.

Mr. COPELAND. Of course, Mr. President, the problem must be dealt with in its general aspects. If I could differentiate between the poor, between those who can ill afford to pay taxes and those who are abundantly able to do so, I would join the Senator. In the Golden Triangle of Pittsburgh there was a loss of $200,000,000 in the last flood. Why should the Golden Triangle, with all its wealth, be absolved from the burden of paying $30,000,000 toward the construction of a work which will give it safety in the future? I can find no answer to that question.

The Senator from Mississippi may be willing to have the taxpayers in his State taxed to take care of wealthy Pennsylvania or, to make it more personal, my own State of New York, because we would be spared the payment of $8,000,000 or $10,000,000 if the Senator's proposal should be adopted;

but why should we not pay our $8,000,000 or $10,000,00 for the cost of land and damages? Why should we ask the taxpayers of Mississippi to bear a share of the cost of installing works in the State of New York? I contend it is not fair to the taxpayers of Missisippi to relieve the taxpayers of New York from the burden which they ought to carry.

Mr. BILBO. Did the Senator from Pennsylvania desire to answer concerning the "Golden Triangle"?

Mr. DAVIS. I wish to ask the Senator whether the substitute he is offering will be in place of section 3 of the bill.

Mr. BILBO. Yes, Mr. President; it is a substitute for section 3.

The Senator from New York speaks of the "Golden Triangle" of Pittsburgh and mentions its great wealth. The fact the Golden Triangle contains great wealth affords no reason why a principle should be violated in order to make it contribute to the program in question. My contention is that the program is a national one. Whether a section is wealthy or whether it is poor does not enter into the question as a matter of equity, as a matter of fairness. It may be that New York State is more able to pay her share of the amount assessed against her than the State of Mississippi. I might go into details and explain why New York has more money than Mississippi. We have had some part in bringing about that condition.

Mr. DAVIS. The income from all the buildings in the Golden Triangle would not pay 1-percent dividend on all the property in the Golden Triangle.

Mr. BILBO. Mr. President, there is proposed in section 3 a scheme that is not feasible, a scheme that will not work, a scheme that is impracticable.

Mr. DAVIS. In other words, if a community does not have enough money to pay practically 50 percent of the cost of flood control, it must drown in the next flood that occurs, as has happened in all the other floods.

Mr. BILBO. That is exactly the point I was leading up to. New York may be able to pay her part and so get a healthy contribution from the Treasury of the United States, thereby protecting the lives and property of citizens of that State; but a condition that cannot be met is being imposed on other States and other people. Therefore they will be denied their share of the Federal contributions and suffer the ravages of flood.

In making determinations of the proportionate assessments for the several States, there are so many diversified elements to be taken into consideration that the authorities charged with this responsibility will of necessity ere long appreciate the utter hopelessness of arriving at a satisfactory conclusion.

Mr. FLETCHER. Mr. President, will the Senator yield?

Mr. BILBO. I yield.

Mr. FLETCHER. In the hearings before the Commerce Committee, the Senator may recall that I raised the question whether it was possible for the Engineers to apportion the benefits accurately among the several States. For instance, if a dam is built in Pennsylvania, what benefit will there be to Mississippi, and how will the Engineers arrive at what the benefit will be? The reply was made that they could do that, that it was practicable, and that they had proceeded in that direction successfully heretofore. I am not yet clear about that matter. I think that is the main difficulty.

Mr. BILBO. Mr. President, I appreciate the question of the Senator from Florida. I take the position that it is an absolute impossibility equitably, fairly, and justly to make those assessments. As I said, even Einstein would not be able to figure it out; and if it is attempted to be done, it will be an arbitrary exercise of judgment on the part of the Army Engineers in making the assessment, and not predicated upon any rule of justness, fairness, or equity.

Mr. WALSH. Mr. President, will the Senator yield?

Mr. BILBO. I yield.

Mr. WALSH. Of course if these projects of flood-control are delayed until the working out of the apportionment that each State should pay, they will never be erected. Is not that correct?

Mr. BILBO. The Senator is correct. The present provision in the bill means that there will be a break-down and failure to carry out the program.

Mr. WALSH. Is there anything in the bill to indicate that the Federal Government will proceed with the flood-control projects and leave the matter of assessment undetermined until later?

Mr. BILBO. There is a positive prohibition in section 3, stating that they cannot proceed until the money is assessed and in hand and on the barrel head.

Mr. WALSH. Some manufacturers from my State, who were here recently, threatened to abandon their industries along the riverbanks where floods occur, on the theory of what the Senator from Mississippi said would happen, that there would be delay and delay and delay in getting action. I hope the Senator from New York, in charge of the bill, will see to it that provision is made that where there is really need for flood-control projects, the Engineers shall proceed to take care of them and leave the matter of assessment until afterward.

Mr. BILBO. Mr. President, under the provisions of the bill it may be that in New York or in some other more favored State the necessary assessments can be provided at once, and the projects proceeded with immediately, but in other States there are projects that will be forever barred by reason of section 3.

Mr. WALSH. The Senator from Mississippi, as well as the Senator from New York and other Senators, desires action. We have learned as never before the menace and suffering and loss and disasters resulting from floods; and the country desires action, and speedy action. We do not wish to have any red tape. I hope the Senator from New York will see to it that provision for action will at least be provided in the bill.

Mr. BILBO. The Senator from Massachusetts has suggested one of the reasons why I am making a fight against section 3. I know that if the Engineers should decide to build a dam on a river between Vermont and New Hampshire, and Connecticut and Massachusetts could not get together on the payment of their contribution to the building of the dam between the other States, a long time would elapse before relief could be obtained.

Mr. WALSH. That is just what some of our manufacturers fear, and vigorously protest against. As the Senator from Mississippi said, in such a case the State would be a long time in getting relief. Can the Senator from New York clear up that matter, and assure us that such a thing will not happen?

Mr. BILBO. The delay will happen, because the provision of the bill is that the State or community shall not get anything until it has put its share of the money on the barrel head.

Mr. WALSH. Assessments must be made upon the State as to the money to be paid before the Federal Government will undertake the work?

Mr. BILBO. The work cannot even be begun until the money is put up. The Engineers would not be permitted to visit the territory until the local money was provided.

Mr. WALSH. Does the Senator from New York agree to that statement?

Mr. COPELAND. Mr. President, where is the provision in the bill?

Mr. BILBO. It is in section 3.

Mr. COPELAND. Whereabouts?

Mr. BILBO. Cannot the Senator find it?—

That hereafter no money appropriated under authority of this act shall be expended on the construction of any project until States, political subdivisions thereof, or other responsible local agencies have given assurances satisfactory to the Secretary of War that they will—

And so forth.

Mr. COPELAND. I thank the Senator. Now, let me answer the Senator from Massachusetts.

I think the Senator from Mississippi said that the project could not be proceeded with until the money to be furnished by the State was put on the barrel head.

Mr. BILBO. I take it action can be had if we have the right kind of a Secretary of War. I presume, if he is a businessman, action can be had.

Mr. COPELAND. As a matter of fact, the bill provides that the projects are to go forward when the Secretary of War has been given assurance satisfactory to him that the costs will be provided. In the meeting which was attended by the Senator from Massachusetts the other day, I explained that if projects are organized, as provided in section 4, or where compacts are entered into between States, or where the State itself has made some arrangement, as my State has made, which is sufficient, it is not necessary to put the money on the barrel head. It is simply necessary that assurance be given to the Secretary of War that there is sufficient arrangement for contribution to be made in due time. I think that "due time" would be a very questionable time. Perhaps it would mean several years before it is all paid. But there cannot be any delay under the terms of the bill; and I ask the Senator, in all kindness, as one who helped to write it, to support the bill as it is.

Mr. WALSH. Mr. President, would the Senator from New York be willing to have an amendment adopted making it clear that the Federal Government shall proceed even if the money has not been paid?

Mr. COPELAND. Yes, sir. If the Senator will prepare an amendment to make clearer what we have put in the bill, so far as I am concerned, as one member of the committee, I will say yes; because it is perfectly clear to me that that is the intent of the bill.

Mr. WALSH. The Senator from New York recalls the evidence presented at the hearing the other day—and I should like to have the Senator from Connecticut confirm it—that the people have left their homes in Hartford and in Springfield and will not move back into their homes, because the recent flood so frightened them that they do not want to live in the valley of the river.

Mr. LONERGAN. In many instances, the Senator's statement is correct.

Mr. WALSH. I thank the Senator from Mississippi for yielding for this important discussion.

Mr. COPELAND. There is much more I should like to say on the subject, but I do not desire to impose on the Senator from Mississippi.

Mr. BILBO. Mr. President, the Senator from New York, in response to the suggestion which has been made, advances the theory that all that is necessary is to satisfy the Secretary of War that the money will be forthcoming. I should like to have the Senator explain to the Senate just what he means, and what will be necessary to show to the Secretary of War and to present to the Secretary of War to satisfy the Secretary of War that the money was forthcoming.

I take it that we are proceeding to legislate upon a safe basis, upon a business basis. There has been no suggestion in this bill, so far as I have seen, that any line of credit is going to be extended to any particular community or State or locality. It is a business proposition.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. BILBO. Yes, sir.

Mr. COPELAND. It stands to reason that the localities must provide the lands. When they have provided the lands the Army Engineers will proceed. There is nothing new about that; that has been the practice in every measure of this sort in the Senator's own section of the country. The Senator from Louisiana has just testified that they have paid for levee locations—how many hundred million dollars?

Mr. OVERTON. The total contribution was $292,000,000, plus $41,000,000, and plus many million dollars of additional contributions.

Mr. COPELAND. So, nearly $400,000,000 has been contributed in the lower Mississippi. Yet the Senator from Mississippi comes forward to say, "In spite of the fact that my State has spent millions in the past for this sort of thing, Pennsylvania and New York now must be relieved of the burden of paying their share of the cost of lands and damages."

Mr. BILBO. Mr. President, in response to that observation of the Senator, let me say that we are not asking for a return of any of the money that has been expended. I am only insisting, as we begin a real flood-control program for the Nation, a Nation-wide program, which means the expenditure of $12,000,000,000 or $15,000,000,000 before we have finished the job, that we establish a policy that is equitable and fair, a policy that is right. That policy should be, since the whole Nation, every section of the United States, is interested in flood control, since the flood-control problem will never be solved until we have soil conservation and reforestation as component parts of the elements necessary to make it a success, and since every section of the United States will be benefited, the entire Nation, through the Federal Government, every section of the United States should contribute in doing those things necessary to execute this program.

Mr. DAVIS. Mr. President, will the Senator yield?

Mr. BILBO. I yield.

Mr. DAVIS. As I understand, the Congress have appropriated already and there has been spent by the Government some two hundred and fifty or three hundred million dollars for flood control and the Congress have also appropriated nearly a billion dollars for river and harbor improvements.

Mr. BILBO. That is correct, and there has not been any local contribution in connection with river and harbor appropriations, and there never has been any question raised about it.

Mr. President, resuming the thread of my argument, take for example the proportionate share of Mississippi's contribution to the construction of 13 reservoirs in the upper reaches of the Ohio River and its tributaries. It must be admitted that these projects, if taken in connection with similar projects built along the courses of all other rivers flowing into the Mississippi would be more beneficial to the State of Mississippi than if only a limited number of these reservoirs were built. The 13 reservoirs in the Ohio Valley alone would not suffice to protect the State of Mississippi from flood disasters. Reservoirs built upon one or two other rivers in addition to those built in Ohio still might not give adequate protection. The degree of benefits, therefore, to be derived by the State of Mississippi will be determined by the degree of accomplishment in the perfection of the entire system.

Shall Mississippi pay its full proportion of the costs of the completed system 20 years before that system is finished? Certainly not. Then, how are the authorities charged with the duty of making these allocations to determine accurately just what Mississippi's proportionate share would be at this time in the construction of the 13 projects of the Ohio Valley? Again, the States along the Ohio River would receive benefits from the aforementioned 13 projects on many occasions when none whatever would accrue to the State of Mississippi. This is true because the Ohio River sometimes overflows and occasions great destruction of property and human lives, and yet when those self-same waters are poured into the mighty Mississippi they may add only a few inches to the water level of that river.

The State of Mississippi suffers from the ravages of floods only when there is a conflux of excessive waters from all the rivers constituting the Mississippi River and its tributaries. No one of these tributaries can cause any appreciable rise in the Mississippi. It requires an increasing tide and volume pouring in from all sections of the country drained by the Father of Waters. With what degree of accuracy can the science of mathematics determine Mississippi's pro-rata share in the cost of any particular group of reservoirs or the reforestation of any particular section of the country when her flood fate is determined by fortuitous chance?

I could go on at great length discussing the various elements that should be given consideration in making these

determinations with respect to pro-rata assessments against the States, any one or all of which would add greater emphasis to the well-known fact that the whole proposal is manifestly impracticable.

Furthermore, making these allotments of the proportionate cost burden to be borne by the several benefited States from any one project, or a closely allied group of projects, and submitting them for ratification before actual work begins, as is provided in section 3 of this bill, will entail an interminable number of joint and collective acceptances, and these myriad transactions with the benefited States, their subsidiaries, or responsible local agencies, will recur as the work progresses at frequent intervals over a period of 20 years or more.

Behold an infinitely long chain of separate negotiations of this character stretching out through the decades yet to dawn and following the winding courses of all the rivers and rivulets of the continent, and then contemplate for a moment the inescapable eventuality of some one or more links in this tortuous chain being broken, thereby destroying the binding force and effect of a unified system of flood protection, and, if not overwhelming the whole scheme of things in disaster, most surely defeating the noble purpose of guaranteeing flood protection to all the people of the Nation. To make it more emphatic, under section 3 of this bill the Army Engineers and the Secretary of War are strictly prohibited from launching any project until every dollar from every State assessed shall have been paid.

Oh, yes; the States of Massachusetts and Connecticut may get together and agree upon the proportionate share of the cost to build a dam on the Connecticut River between Vermont and New Hampshire, but what about the States of Mississippi, Louisiana, Arkansas, Tennessee, and Kentucky agreeing upon their proportionate share of the cost of building a dam in Montana on the Missouri, or on the Arkansas, or on the Red River, or on the Ohio?

Mr. President, the economic side of this question should not be overlooked. According to the best authorities who have investigated the subject of soil erosion, we are told that the rate of wastage, if continued for the next half a century, will render unproductive more than two-thirds of the Nation. The Senator from Arkansas [Mr. ROBINSON], in a statement before this body on April 2, said:

> That the soil of one-half of the lands now in cultivation in the entire United States has been so damaged that those lands are scarcely fit longer for cultivation.

It may be said without fear of contradiction by any responsible authority that has made a study of this question that it will be only a comparatively short time before the dust storms that originate in the West will become so violent and so laden with earthen matter as to obscure the face of the heavens for a period of 3 months in each year. I am not an alarmist, nor am I a pessimist, and yet I can make that statement.

With respect to the loss of life and property under present conditions, it is claimed that the Mississippi Valley lost approximately $1,000,000,000 during the flood of 1927. Then why complain about a few hundred million dollars in this bill or any other bill along this line?

The loss in the Mississippi Valley is a total loss. Proportionate devastation costs obtain in every section of the United States. The special committee of river improvements and flood control, reporting on conditions in New York subsequent to a recent flood, but having no reference to the flood which happened 2 weeks ago, said:

> After a 200-mile inspection tour of flood damage it was noted that crops and property had been ruined by raging waters that had leaped from their channels to sweep over the country sides. In the city of Hornell 16,000 people are drinking water from milk cans hauled in trucks. Fifteen hundred of the city's residents have been thrown out of work because of the city's industrial loss, estimated at $738,000. Mayor Leon Wheatley estimates the home loss at $900,000, retail-store loss at $280,000, loss to the railroads at $370,000, making a total of $2,288,000.
>
> Damages to State highways and bridges are estimated by district engineers to be approximately three and a half million dollars. Counties, villages, and cities suffered losses to roads and bridges estimated at six and a half million dollars. On July 8 and 10 43 lives were lost and damage estimated at $25,000,000 was caused.

I give these citations merely to show the extent of devastation for only two separate floods that raged in two widely separate districts of the Nation. If one had available the costs that the States have incurred without Federal aid in building their levees and canals, also the loss they have sustained in spite of these efforts, throughout the last century, it would amount to many billions of dollars.

After suffering all these losses and privations and sorrows through the long and trying years that have passed, ill does it become this Congress now to urge that the States should bear a proportionate share of this great and necessary burden that rightfully should be the responsibility of the National Government. We have suffered enough. We have paid enough. We have carried a sufficient load. Part of the losses cannot be restored, no matter what degree of prosperity we may enjoy, because they involve hundreds of lives which the floods along the Mississippi River have cost in recent years.

It may be of some interest to learn that some of the greatest earthquakes of all time have occurred from an excessive overloading of the valleys by a distribution of sediments brought down by the streams from the uplands and mountains which are drained by the rivers and course through these valleys.

I trust no one will think I am somewhat excitable in my argument for the prosecution of flood control when I find one of the effects of the neglect of duty on the part of the Congress in controlling the flood situation has been the earthquakes we have had and earthquakes which are yet to come. If I am wrong in my contention, then blame the scientists, who know more about it than do the Members of Congress.

Among the great earthquakes that have visited all sections of the earth but few, I am told, have compared with the great earthquake in the Mississippi Valley of 1811. To give some idea of the extent of the territory affected by this earthquake, I quote from a statement of the United States Geological Survey Bulletin 494:

> A total of over 1,000,000 square miles, or over half of the entire United States, was so disturbed that the vibrations could be felt without the aid of instruments.

The most violent section of this earthquake was in the vicinity lying between Memphis, Tenn., and St. Louis, Mo. There were few people living in that section in 1811. Consequently the loss of life was not great. Today, millions reside in this district, and a similar disturbance at this time would exact a toll of life and property damage that would be appalling.

The volume of earth under present conditions now being deposited in the Gulf of Mexico amounts to about 400,000,000 cubic yards each year. These vast deposits through bygone centuries have formed what we now call the Mississippi Valley. Even today at the mouth of the Mississippi River the Delta is being extended into the Gulf of Mexico by sediment deposit at the rate of 1 mile for each 20 years. The depth of this deposit throughout the Mississippi Valley is undetermined. The constant accumulation of sediments brought down by the flowing waters causes an overbalance of the earth structure affecting the lower strata with the result that an earthquake follows.

From the Popular Science Monthly, in which an article appears by Myron L. Fuller, of the United States Geological Survey, I quote these words:

> In the New Madrid country, southeast Missouri, the quaking has continued for several hundred years. Both at Charleston and New Madrid earthquakes occur in regions where the earth's crust is being overloaded in the one instance by sediments brought down by streams from the Appalachian Mountains and in the other by the floods of the Mississipipi, and the fracturing is believed to have resulted from the readjustment of the harder rocks to the increased load.

Mr. F. W. Sohon, of the Georgetown University Seismological Observatory, in a letter written May 23, 1930, had the following to say:

> With regard to the probability of another earthquake similar to that of 1811, seismologists regard it as an axiom that where there has been an earthquake there will surely be another. It is true that an earthquake relieves a strained condition that has been a

long time in forming, but the area of the Madrid earthquake of 1811 was visited by an earthquake of similar intensity a hundred years earlier so that another hundred years having elapsed another visitation may be in order.

The relation of eroded material to earthquakes is probably one of direct casualty in the long run, for the denuded areas become lighter and must be pushed up, while the areas receiving the additional load by becoming heavier must be expected to sink.

I do not want to undertake the role of prophet. I am merely giving the result of scientific investigation. The more civilized we become and the more we know in and of this world, the more respect we have for men who have a scientific turn of mind.

The earthquake of 1811, concerning which few people have any knowledge, created Reel Foot Lake, located in Tennessee. It is said that the course of the Mississippi River ran north for 24 hours. A full account of this horrible seismic disturbance may be found in Bulletin 494, issued by the Department of Interior and entitled "The New Madrid Earthquake." Since it is now well known, as a result of the observation of scientists, that this, the greatest of all earthquakes, occurred from causes due to soil erosion and the maddened flow of onrushing waters, it is by no means unwise to give consideration to an appreciable extent to the destructive effects of uncontrolled floods as reflected by the great catastrophe that took place at Madrid, Mo., beginning December 16, 1811, and continuing with more or less severe shocks for more than a year.

The earthquakes of history have been the cause of greater loss of life and property than any other known agency. Any system of water control that can by any possible means control and direct the agencies that cause seismic disturbances so appalling in results should be supported and maintained by the National Government.

At the outset of this discussion I stated that before the removal of our forests for commercial purposes and before the extensive cultivation of our western prairie lands for growing wheat and corn, thus depleting the cover grasses that since the beginning of time had kept the water line close to the surface, there was a time when the dangers from excessive waters were by no means serious. By the help of these natural agencies, such as cover grasses and the timber growth, individual localities were able to combat successfully the injurious tendencies of swollen streams.

For a considerable period of time, and by no means not until these cooperative natural agencies were removed and no vestige thereof was remaining, in order to meet the demands of trade and commerce and the mounting requirements of civilization, the people living directly in the flood paths were able to make themselves reasonably secure from any flood disasters.

I have in mind a particular instance illustrating this point. In a bend of the Mississippi River, about 25 miles south of Vicksburg, Jefferson Davis, the President of the Southern Confederacy, and his brother, Joe Davis, owned adjoining plantations, and on these tracts of land built magnificent homes. The residence of Mr. Jefferson Davis still stands and is in a perfect state of repair. Not so very long ago a friend of mine visited this magnificent site because of its historic interest, and while seated in the dining room of the old Davis home during the evening meal observed to his amazement a water line uneffaced upon the plastered walls, indicating clearly the height, about 8 feet, to which at some previous time the floodwaters of the Mississippi River had risen. Whereupon this friend inquired of the caretaker why it was that a man of Mr. Davis' knowledge of the Mississippi River and its overflow possibilities, a man of his ability to make wise decisions as to his financial investments, as had been evidenced by past performances, would build a beautiful home to live in and rear a family at a spot where the waters of the valley would rise 8 feet in the dining room. The answer given by the caretaker was that when Mr. Jefferson Davis and his brother Joe bought these properties and built homes and tenant houses upon them the waters from the Mississippi River had never been known within the memory of man to cover any part of these two large plantations.

At the time these properties were improved, and hundreds of years prior thereto, the Indians lived in many sections of the Mississippi Delta, as may be seen from the numerous mounds that today dot large areas from Natchez on the south to Memphis on the north. These mounds are in no sense to be considered as constructed for places of refuge from the floods, because mounds of the same size and character are to be found in the hill sections of the State, where the Choctaws and the Chickasaws lived.

As time passed on, from the day Jefferson Davis settled at what is now called Palmyra, overflows on the Mississippi River have at more and more frequent intervals been recurring, each time with accumulative force and violence. This gradual increase in frequency of flood stages and in volume of waters that annually flowed through the Mississippi channel may be measured with fine exactness by the progress made in denuding the lands of the upper reaches of the tributaries of the Mississippi of the forest timbers, and in the extent of turning under the grass coverage of our western plains and other areas by the plowman.

This tendency, increasing at a geometrical ratio toward a more terrifying flood menace, has now become manifest, not only in the Mississippi Valley but in almost every other section of our country, in areas where just a short time ago no signs of a flood problem were to be seen upon the horizon of coming events.

Today it may be stated as an irrefutable fact that the ratio of the progress made in depriving our lands of the forests and cover grasses corresponds to the ratio of increased flowage of waters through our navigable channels and their tributaries. Upon the basis of this theory, which determines and definitely fixes the primal cause of accumulative flood devastation and disasters appertaining to the Nation as a whole, I am prepared to propound this interrogatory:

Since our priceless forests have gone into the grinding, greedy craw of trade and commerce to improve the general welfare of all the people to increase the growing wealth of the Nation; since this bountiful gift of nature, this invaluable heritage belonging to all the people, has gone into homes for their comfort and ease, has been fashioned into ships to carry their commerce on the seven seas, has been employed for fuel to propel their engines and warm their firesides, and for material to construct the coffins in which to bury their dead; since the perrenial carpet of evergreen grass which lay unmolested upon our expansive prairies for untold centuries like a benediction from a beneficent heaven whereon have trod the hoofs of buffalo and bison from a far-away past to which the memory of man runneth not has been upturned by ruin's cruel plowshare in order that the Nation's wealth might be augmented, that the teeming millions of our country might be given an abundance of bread, that our soldiers might be fed on a foreign soil and all those who fought with them to make the world safe for democracy; since all these things have transpired for the improvement and betterment of the general welfare, for the enrichment of the Nation's wealth, and the glorifying of a more exalted civilization, may I not now, in the year 1936, in the presence of this Congress, elected by the people, call with the utmost propriety, supported by every rule of reason and justice, upon this Nation through its constituted authority, the Congress of the United States, to restore to the people of America that which has been taken at a pitiful price lest it be our lot to have brought upon us the fate of those dwellers on the banks of the Nile, the Tigris, and Euphrates, and of the starving millions living on the sandy wastes of desolate China?

I call upon the Members of this body to return to the lands of our country those natural agencies which have been, and if restored may yet be, our best means of preservation. Give back to the people without price that measure of the wealth taken from the land for the enrichment of the general welfare that is requisite to the restoration of a condition that will also promote the general welfare and at the same time make every part of our Nation a fit place in which to live.

If the Nation exhausts the natural resources of the country or permits it to be done to the extent that the lives and

property of a vast majority of the people are seriously endangered by a menace occasioned by the consumption of these resources, it is nothing but right and altogether proper that the Government at its own expense should take the necessary steps to avert the impending peril thus created. A common danger made possible by the removal from their natural placements of instrumentalities that have gone into the promotion of the public good and contributed to the progress of civilization should be eliminated by a restoration in proper degree of those self-same instrumentalities by the Government at the expense of the whole people who, together with the Government, have been the beneficiaries.

In conclusion, I wish to state that we are starting on the highway to spend $12,000,000,000 in the proper solution of the flood problem, which menaces the lives and property of the people of the Nation. As we start, let us start right. Let us fix the responsibility upon the persons who are to be the beneficiaries; and from every reasonable standpoint and from every logical argument and from every fact that may be deduced, the benefits will accrue to every man and woman of this Republic.

If that be true, then the burden should be borne by the people of the entire Nation and not saddled upon this section or that section. One may be able to pay it; another one is not able to pay it. Let us put it on all. Let the blessings that will follow cover the people of the Nation like the dew that covers the face of the earth, and let the burden be distributed in the same way.

Mr. President, I offer and move the adoption of the amendment which I have read as a substitute for section 3 of the committee amendment.

The PRESIDING OFFICER (Mr. MURPHY in the chair). The amendment to the amendment will be stated.

The CHIEF CLERK. In lieu of section 3 as printed in the committee amendment, it is proposed to insert the following:

SEC. 3. It is hereby recognized that the Federal Government should assume the full burden and responsibility for the improvement of navigable waters or their tributaries for flood-control purposes and that neither the whole nor any part of the expenditures necessary for the construction of any project within the provisions of this act shall be required of any State or the States, political subdivisions thereof, or other responsible local agenies.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Mississippi [Mr. BILBO] to the amendment of the committee.

Mr. DAVIS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Chavez	Hayden	O'Mahoney
Ashurst	Clark	Holt	Overton
Austin	Connally	Johnson	Pittman
Bachman	Coolidge	Keyes	Pope
Bailey	Copeland	King	Robinson
Barbour	Couzens	La Follette	Russell
Barkley	Davis	Logan	Schwellenbach
Benson	Dieterich	Lonergan	Sheppard
Bilbo	Donahey	Long	Shipstead
Black	Duffy	McAdoo	Smith
Bone	Fletcher	McGill	Steiwer
Borah	Frazier	McNary	Thomas, Okla.
Brown	George	Maloney	Truman
Bulkley	Gerry	Metcalf	Vandenberg
Bulow	Gibson	Minton	Van Nuys
Burke	Glass	Moore	Wagner
Byrd	Guffey	Murphy	Walsh
Byrnes	Hale	Murray	Wheeler
Capper	Harrison	Neely	White
Caraway	Hastings	Norris	
Carey	Hatch	Nye	

The PRESIDING OFFICER (Mr. POPE in the chair). Eighty-two Senators having answered to their names, a quorum is present.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3789) authorizing the Secretary of Commerce to convey the Charleston Army Base Terminal to the city of Charleston, S. C.

The message also announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 8599) to provide for a change in the designation of the Bureau of Navigation and Steamboat Inspection, to create a marine casualty investigation board and increase efficiency in administration of the steamboat-inspection laws, and for other purposes.

The message further announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 7736) to provide for the establishment of the Whitman National Monument, asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. DEROUEN, Mr. KNUTE HILL, and Mr. ENGLEBRIGHT were appointed managers on the part of the House at the conference.

The message also announced that the House had agreed to the amendments of the Senate to the bill (H. R. 8766) to authorize municipal corporations in the Territory of Alaska to incur bonded indebtedness, and for other purposes.

The message informed the Senate that Mr. JENKINS had been appointed a manager on the part of the House vice Mr. TREADWAY, resigned, at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9185) to insure the collection of the revenue on intoxicating liquor, to provide for the more efficient and economical administration and enforcement of the laws relating to the taxation of intoxicating liquor, and for other purposes.

INTERIOR DEPARTMENT APPROPRIATIONS

The PRESIDING OFFICER laid before the Senate the action of the House of Representatives on certain amendments of the Senate to House bill 10630, the Interior Department appropriation bill, which was read, as follows:

IN THE HOUSE OF REPRESENTATIVES, UNITED STATES,
May 20, 1936.

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 1, 7, 31, 32, 33, 35, 39, 50, 52, 56, and 83 to the bill (H. R. 10630) making appropriations for the Department of the Interior for the fiscal year ending June 30, 1937, and for other purposes, and concur therein;

That the House recede from its disagreement to the amendment of the Senate numbered 46 to said bill and concur therein with the following amendment:

In lieu of the sum proposed to be inserted by said amendment insert "$432,300";

That the House recede from its disagreement to the amendment of the Senate numbered 87 to said bill and concur therein with the following amendment:

Page 19, line 11, of the Senate engrossed amendments, strike out "$40,000" and insert "$25,000"; and

That the House insist upon its disagreement to the amendments of the Senate numbered 24, 53, and 54 to said bill.

Mr. HAYDEN. I move that the Senate agree to the amendments of the House of Senate amendments numbered 46 and 87.

The motion was agreed to.

Mr. HAYDEN. I also move that the Senate further insist on its amendments numbered 24, 53, and 54, and request a further conference with the House of the disagreeing votes of the two Houses thereon.

The motion was agreed to; and the Presiding Officer appointed Mr. HAYDEN, Mr. MCKELLAR, Mr. THOMAS of Oklahoma, Mr. NYE, and Mr. STEIWER conferees on the part of the Senate at the further conference.

NATIONAL FLOOD CONTROL

The Senate resumed consideration of the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Mississippi [Mr. BILBO] to the amendment of the committee.

Mr. COPELAND. Mr. President, I should like to ask the Senator from Pennsylvania whether he desires to speak on the amendment now pending?

Mr. DAVIS. Mr. President, yesterday, I called attention to the fact that I believed that flood control should be considered a Federal responsibility. Those who assert that half

of the burden should be carried by local agencies do not specify how those agencies can meet the responsibility.

Take the case of Pittsburgh, as an example. While there are in Pittsburgh a few rich corporations, and some handsome business buildings, a general tax of all the property owners of the city to finance a flood-prevention program would work a tremendous hardship on the many without assessing a proportionate share of the responsibility on those best able to sustain the burden.

I believe that the responsibility should rest upon the country as a whole, because those best able to sustain the burden should pay their full part of the cost of flood control.

Unless the National Government assumes the full financial responsibility, there will be further delay, and each year may witness additional flood loss.

The Federal Government, through its power to tax, can best meet this need, and distribute the responsibility with greater equity than can be achieved through dependence on local communities.

As I said yesterday, local units of government should play their part in administrative responsibility, but the machinery of tax collection requires the authority of the Federal Government.

Mr. President, I am in favor of the amendment offered by the Senator from Mississippi, and I hope it will be agreed to.

Mr. CLARK. Mr. President, I do not desire to detain the Senate by a repetition of the arguments which have been so ably presented by the Senator from Mississippi [Mr. BILBO]. I do wish to emphasize that the enactment of a flood-control bill at all is a recognition of the fact that the matter of flood control, the matter of the prevention of this most disastrous scourge to our American life, is essentially a national problem, and that is true from its very nature.

Nature does not regard arbitrary State lines in dumping water from one State into another in the creation of these great disasters. As a matter of fact, in most of the cases which have been testified to by the Army Engineers and other authorities before the Committee on Commerce, which are included in the bill, there is an essentially interstate character to the problem itself. For instance, it is testified that the best method of protecting the lower Connecticut Valley is by reservoirs and dams located in Vermont and New Hampshire. Certainly the Fort Peck Reservoir, located in Montana, will be of very great advantage to the lower Missouri and lower Mississippi channels in the matter of prevention of floods. To my mind—and I believe this is borne out by the engineering report—the best way of protecting the lower White River Valley would be by a dam located in Missouri, some 7 or 8 miles from the Arkansas line.

The works necessary to protect the city of Pittsburgh from such a disastrous flood as took place this winter would in large part be located outside the State of Pennsylvania; and in such cases as that, Mr. President, it is perfectly preposterous to talk about assessing the local benefit or requiring local contribution from the localities at which the dams have to be located, because, in a great number of instances, the localities in which the dams have to be located will enjoy no advantage whatever by reason of the location there of the dams. Some other State or some other locality farther down on the main stem of the stream will enjoy the benefit from a dam located at another place. To empower some official of the Federal Government to enforce local contribution or State contribution as a condition precedent to the construction of the works is simply to say in so many words, in enacting the bill, that we do not intend to have the work done.

The Senate itself has very recently passed on the policy of that matter in the enactment of the Overton flood-control bill. That act provides for the building, at Federal Government expense, of a causeway, an elevated highway, to be used for both highway and railroad purposes, over the Eudora floodway and over other floodways. It is a remarkable proposition to say, simply because the provisions of the Overton bill are in one act and the provisions for the rest of the country are in another act, that one rule of Federal contribution shall be applied to the State of Louisiana and to the State of Arkansas and another rule shall be applied to all the rest of the United States.

To say that a Government agency or a Government official shall be empowered to pass on the contributions to be made by the local agencies and the States is, I repeat, to my mind simply to defeat the whole purpose of the bill.

While the Senator from Mississippi occupied the floor, I mentioned a while ago an evidence of what bureaucrats may believe to be fair and equitable when it comes to the application of such a principle, and that was the opinion of the late Chief of Engineers, General Jadwin, a very able engineer, who seriously proposed, both before the House Committee on Flood Control and the Senate Committee on Commerce, that the State of Missouri should be assessed for the construction of a floodway to be built on the Missouri side of the Mississippi River for the protection of Cairo, on the Illinois side of the Mississippi River, and in response to a question before the Commerce Committee by my predecessor, Senator Hawes, General Jadwin said it seemed absolutely inconceivable to him that the Legislature of Missouri would not be willing and glad to appropriate a couple of million dollars for building a floodway on the Missouri side of the river, to her own damage, for the purpose of protecting the city of Cairo, on the Illinois side of the river.

Mr. President, the theory of local contribution and of State contribution is a beautiful theory, and a just policy in theory, but when applied to the intricate problems which nature has supplied the country in the intimate interstate relationship of water passing from one State to another, regulated not by boundaries established by law but by courses established by nature, the theory completely fails. As a matter of fact, the only justification on earth for the passage of any flood-control bill is that the problem of flood control is essentially a national, interstate problem, and if it is a national, interstate problem, it ought to be handled from the standpoint of the Federal Government. If it is not a national, interstate problem, then the Federal Government has no right to be spending public moneys on handling the problem at all.

Mr. GUFFEY. Mr. President, I favor the enactment of the Bilbo amendment, because, in my opinion, a flood-control bill without the Bilbo amendment is not practical, is not feasible, and is not enforceable; and I predict that not a single flood reservoir will ever be built under the bill if it does not contain the Bilbo amendment.

I think the bill as it is now constituted is unjust and discriminatory, and I hope the Bilbo amendment will prevail.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Mississippi to the amendment of the committee.

Mr. VANDENBERG. Mr. President, does the Senator from New York intend to address himself to the pending amendment?

Mr. COPELAND. I do wish to make a few remarks.

Mr. President, I desire to say in the most solemn words that, in my opinion, the bill will not become a law if the amendment of the Senator from Mississippi shall be adopted. I hesitate to say that, because I have had my feelings ruffled a good many times when a similar statement has been made about some other bill; but it has not been the practice of our country to go forward with projects which in the last analysis are local in their nature so far as benefits are concerned, and have the charge for them made upon the Federal Treasury.

This matter was debated in the Constitutional Convention of 1787. The question arose as to establishing post offices, and giving to the Congress power to establish post offices. It was then decided that jurisdiction over post roads should also be given to Congress. I can quite understand why the convention included post roads in that remote day, because the morasses and marshes and jungles of our country were such that without roads the mails could not be carried, and horseback travel was interfered with.

So it was provided that post roads might be established, and power was given to the Congress to appropriate money for that purpose. That provision of the Constitution is the constitutional reason why it has been possible for us to have the great system of highways which we have built throughout our country.

When the matter was up in the Constitutional Convention Dr. Benjamin Franklin proposed that the Congress should have the power also to build canals. He proposed that Congress should establish post offices and build canals. In those days canals were short affairs conferring local benefits. When he made that proposal, however, the delegates smote him hip and thigh. They said, "No; the building of a canal confers a local benefit, not a Federal benefit." So it has been the policy and the practice from the first that the localities should at least provide the land and pay the cost of damages for building these Federal highways.

May I have the attention of the Senator from Massachusetts [Mr. WALSH] for a moment? There is a misunderstanding as to the purpose and intent of the bill as regards section 3. My distinguished friend from Mississippi did much to promote that misunderstanding in his very able speech. He will forgive me for saying so. There is not anything in the bill which provides that the State or locality must put the money on the drumhead or the barrel head, or whatever phrase he used—an unfamiliar one to me.

Mr. BILBO. Mr. President, will the Senator yield for a question?

Mr. COPELAND. I yield.

Mr. BILBO. Just what would have to be put up to get results—money or a promise to pay? What is the difference between the two?

Mr. COPELAND. I shall reply to that question in a moment. In order to make more clear what is intended, so far as I am authorized to do so, I am willing to accept an amendment which is now in the hands of the Senator from Massachusetts.

Mr. WALSH. May I offer it at this time?

Mr. COPELAND. I wish the Senator would. Will the Senator from Mississippi permit us, a little bit out of order, to present a perfecting amendment?

Mr. BILBO. Yes; Mr. President.

Mr. WALSH. I offer an amendment to the committee amendment which I ask to have stated.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 55, line 14, following the word *"Provided"*, at the end of the line, it is proposed to insert the following:

That the construction of any dam authorized herein may be undertaken without delay when the dam site has been acquired and the assurances prescribed herein have been furnished, without awaiting the acquisition of the easements and rights-of-way required for the reservoir area: *And provided further.*

Mr. WALSH. I understand the amendment is acceptable to the Senator from New York, and I am sure the Senator from Mississippi will agree to it, because it is moving in the direction he desires to move.

Mr. BILBO. I ask that the Clerk again read the amendment.

Mr. COPELAND. Mr. President, I should like to say, so that it may appear in the RECORD, that the amendment comes in on page 55, following the word *"Provided"*, at the end of line 14. The conditions now are being recited in order that we may know exactly what the Army Engineers will do. Therefore, the Senator from Massachusetts has offered the amendment.

The PRESIDING OFFICER. The clerk will again state the amendment.

The CHIEF CLERK. In the committee amendment, after the word *"Provided"*, in line 14, page 55, it is proposed to insert:

That the construction of any dam authorized herein may be undertaken without delay when the dam site has been acquired and the assurances prescribed herein have been furnished, without awaiting the acquisition of the easements and rights-of-way required for the reservoir area: *And provided further.*

Mr. COPELAND. Mr. President, it will readily be seen what this means. Perhaps the language in the bill is awkward, and I think the Senator from Mississippi has rendered a service in pointing out the ambiguities of the language. It is expected that the land upon which a dam may be built shall be purchased. There is never any difficulty about that, because the Army Engineers have great latitude. It is not specified that a dam shall be built at a particular and certain location, but is to be built upon the river within reasonable distance from the place specified, which might be 10 or 15 miles away. So the Federal Government is not going to be robbed in the purchase of the land upon which to build the dam, because there will be rivalry of bidding; and can be no monopoly or a holding up of the Government for the purchase of a specific site. The dam site having been provided, the Government can proceed with its work without waiting for the acquisition of the reservoir area back of the dam which is to be the place in which the floodwaters are to be controlled.

Mr. BILBO. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Mississippi?

Mr. COPELAND. I yield.

Mr. BILBO. Is it the Senator's understanding under the amendment offered by the Senator from Massachusetts to the committee amendment that the Government will buy the right-of-way upon which to build the dam?

Mr. COPELAND. Oh, no; no more than in the Senator's State, the Federal Government bought the land upon which the levees were built. The people of the State bought the land; they paid for the land; they paid nearly a half a billion dollars in the great lower Mississippi Valley for sites upon which to build levees. It is expected that in my section of the country, the State of New York, the State of Pennsylvania and other Northern States, including the State of Massachusetts and the State of Connecticut, which heretofore have not received Federal money for projects of this character, shall do exactly what our friends of the South have done in the past.

Mr. WALSH. Mr. President, the amendment proposed by me does not in any way deal with the subject matter of the amendment proposed by the Senator from Mississippi. My amendment merely provides for speed of action pending a determination of other questions involving the States.

Mr. COPELAND. It answers the just criticism of the Senator from Mississippi that there might be delay in proceeding with these matters; that it would take a long time to condemn the land or to acquire the land for the reservoirs, and consequently that there would be delay.

Mr. WALSH. I suggest that the amendment be adopted, and then the Senate can proceed with the consideration of the amendment of the Senator from Mississippi. I am sure he will be agreeable to that course.

Mr. COPELAND. Will the Senator from Mississippi withdraw his amendment for a moment in order that the amendment offered by the Senator from Massachusetts may be acted upon?

The PRESIDING OFFICER. The Chair will state that the amendment of the Senator from Massachusetts [Mr. WALSH], being in the nature of a perfecting amendment, takes precedence over the amendment of the Senator from Mississippi [Mr. BILBO] to strike out. The question is on agreeing to the amendment offered by the Senator from Massachusetts to the amendment reported by the committee.

The amendment to the amendment was agreed to.

Mr. COPELAND. Now, Mr. President, that certainly clears the atmosphere. I desire to make clear how liberal the bill is in providing means of going forward with this work.

Section 4 is a blanket provision giving notice in advance that the States may enter into compacts. The States of Connecticut and Massachusetts and New Hampshire and Vermont I think are already proceeding in that direction. They have had informal meetings; they have made arrangements seeking to obtain appropriate action by their respective legislatures. In my State the legislature has already set up

conservancy districts, civil improvement districts, and has made provision for supplying the money for the necessary works in New York State. In short, this bill makes every provision for speedy action.

I confess I should not want to be on the Board of Army Engineers. It would be enough to give any man a headache to have to decide about these allocations, but they say they can do it. The Senator from Mississippi referred to Einstein and Pythagoras and other great mathematicians of the past, but the Army Engineers are willing to assume this responsibility. For myself, I wish to say that there seems to be no end of what they can do and they command my greatest respect.

Mr. President, I beg of the Senate, regardless of what it may do with the Guffey amendment which will come in later, not to adopt the amendment offered by the Senator from Mississippi. If the Senate wants a bill, that amendment must be killed.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Mississippi [Mr. BILBO] to the amendment reported by the committee.

Mr. BILBO. Mr. President, this is an unusual method to resort to in order to defeat a proposed amendment. Instead of resorting to facts and arguments, the proposition is made to the Senate to defeat the amendment because of a veiled threat that the bill will not become a law if it shall be perfected in the interest of the taxpayers and in the interest of the prosecution of this worth-while Nation-wide program.

Of course, the statement by the Senator from New York could mean only one thing, that he anticipates or rather has information in advance, that if the bill shall be amended according to the substitute I have offered for section 3, it will meet with an Executive veto. It could not mean anything else.

I wish to place myself in the right attitude. I hail from Mississippi, which has the reputation of being the strongest and most thorough-going Democratic State in the American Union. That was proved in the campaign of 1928, when out of 82 counties even Al Smith carried 80 of them, with all the charges at his door in that campaign and with all the prejudice resorted to in connection with the issues of that campaign. And, so far as the present occupant of the White House and the present administration are concerned, I repeat that Mississippi is more strongly behind President Roosevelt and his administration, than is any other State in the American Union.

In fact, recent surveys conducted by the institute of public opinion of America and all the tests taken show that Mississippi is almost a hundred percent behind President Roosevelt and his administration and the New Deal. In reality he is so strong and his administration is so universally approved that a man would be a fool to undertake to make a campaign in Mississippi with Roosevelt and the New Deal as an issue. It would be like a man going out and running for office and saying, "I am in favor of pure air." He would be a laughingstock. Everybody in Mississippi is for Roosevelt and the New Deal, and for a man to make a race for office in that State upon the ground that he favors the New Deal and President Roosevelt would be an absurdity; it would be foolish on his part. I repeat, he had just as well go out and say, "I am running for office in Mississippi because I believe in pure air to breathe and good water to drink." In those sentiments toward the President and the present administration I fully concur and share, notwithstanding the fact that some of the syndicate writers for some of the newspapers in Washington have attempted to represent me as an antinew dealer and as anti-Roosevelt. I would hardly dignify such statements by saying that they are lies, because the leader on the floor here knows that since I have been a Member of the Senate my support of the administration has been almost 100 percent, and certainly my convictions as expressed in Mississippi have never shown that I was anything except a follower and an admirer of President Roosevelt and a sympathizer with the New Deal.

I merely make this statement to lay the predicate for what I am going to say about the veiled threat offered by the Senator from New York [Mr. COPELAND] that if we want a flood-control bill we had better kill the substitute which the Senator from Mississippi has offered to section 3.

I have no information from the White House that the President would veto the flood-control bill, which affects the entire Nation, if the Congress should decide that it is a national responsibility and that the expense of doing these things for all the people of the Nation should be borne by all the people of the Nation. But even if I had heard through rumor that the President would not look with favor upon this amendment, that would not deter me from performing my duty and my responsibility to my people and to the people of the Nation in casting my vote as my judgment and conscience dictate. Then, after the bill had been perfected and presented to the White House, if the President, in the exercise of his judgment and his power, should veto it, we would have time to reconsider it.

As I look into the future, and as I visualize what we are now doing in establishing this policy of local participation in carrying out a program which will eventually cost from $12,000,000,000 to $15,000,000,000, I do not know but that I would be willing to say, let us defeat the bill rather than pass it with this provision in it.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Massachusetts?

Mr. BILBO. I yield.

Mr. WALSH. The Senator has given a great deal of study to this subject. I should like to inquire if, after looking into the question, he has determined what local contributions, if any, have been made in the past when we enacted legislation toward the construction of projects for flood control.

Mr. BILBO. I think I am prepared to say that the little flood legislation we have enacted has contained no requirement that local communities should contribute.

Mr. WALSH. We had a dispute about that on the floor of the Senate a few days ago, and I believe the Senator from Louisiana [Mr. OVERTON] made claim to the contrary.

Mr. BILBO. There may have been some small contribution.

Mr. WALSH. The Senator from Arkansas [Mr. ROBINSON] would know what has been the practice in the past.

Mr. ROBINSON. Mr. President, will the Senator from Mississippi yield?

Mr. BILBO. I yield.

Mr. ROBINSON. As to all the flood-control works which have been constructed on the Mississippi River with which I am familiar, local contribution has been required. At first the entire cost of levees was imposed on the localities.

Mr. BILBO. To what extent?

Mr. ROBINSON. Later the rule was one-third of the cost to be paid by the local interests. Subsequently the system seemed to be changed to that which is carried in the bill as it passed the House, in section 2, where it was required, as in the bill reported by the Senate committee, that the local interests should pay the cost of the rights-of-way, the cost of the lands necessary for the location of the works, and also the damages.

As to the works contemplated by the Overton Act, there was a recognition of the fact that there had been contributed a very large amount, many millions of dollars—more than $250,000,000—by the local interests as a justification for not requiring further contributions. In some of the territory, as I believe the Senator from Mississippi will recall, the costs of levee construction on the main stem of the Mississippi had been so great as to be almost confiscatory of the lands within the levee district. The aggregate contributions have been in a very large amount.

Mr. OVERTON. Mr. President, will the Senator from Mississippi yield?

Mr. BILBO. Certainly.

Mr. OVERTON. I may add to what the Senator from Arkansas has said that the only flood-control legislation enacted by Congress has provided for local contribution. As the Senator from Arkansas pointed out, originally the States

and local subdivisions contributed one-third of the entire cost.

Mr. WALSH. That is, the cost of the land and for construction of the dam?

Mr. OVERTON. That is for the entire cost. There is still a requirement in respect to the tributaries on the lower Mississippi River, on projects outside the so-called Jadwin plan, that there shall be a local contribution of one-third of the entire cost. The Flood Control Act of May 15, 1928, which adopted the Jadwin plan and which relates to the lower Mississippi Valley, required the States and local subdivisions, at their own cost, to contribute all rights-of-way for the construction of levees on the main stem of the Mississippi River, and after the levees have been constructed it required the States and local subdivisions to bear the cost of the maintenance thereof.

Mr. WALSH. That is the present law, is it not?

Mr. OVERTON. Yes; that is the present law. The Overton flood-control bill which was passed by the Senate and which is now being considered by the House contains the local-contribution provisions embraced in the 1928 act. We still have to provide rights-of-way for the levees along the main stem of the Mississippi River and we still have to maintain the levees after construction.

Going a little further into detail, it was declared by Congress in the act of 1928 that the principle of local contribution was sound. That was the last expression of congressional will and purpose upon the subject. Then it was said by the Congress of the United States that, in view of the fact that the States in the lower Mississippi Valley and their subdivisions had contributed $292,000,000 toward the construction of levees, no further local contribution would be required from them; but the act did require, in spite of that declaration, that the local interests should furnish the rights-of-way, as I have stated, and should maintain the levees.

Mr. WALSH. What does the $292,000,000 represent?

Mr. OVERTON. That represents the total sum which has been expended by the States of the lower Mississippi Valley and their local subdivisions for flood control and flood protection.

Mr. ROBINSON. That would include rights-of-way, easements, and construction work?

Mr. OVERTON. Yes.

Mr. WALSH. What period of years did that cover?

Mr. OVERTON. From the inception of man's battle against floods in the lower Mississippi Valley. Since the enactment of the act of 1928, which declared that no further local contribution should be required in the lower Mississippi Valley by reason of future requirements for local contributions, the States of Mississippi, Arkansas, and Louisiana, according to the records furnished by the Missouri Valley Commission, have contributed $41,000,000 plus toward flood control in the lower Mississippi Valley.

Mr. BILBO. Mr. President, I am not concerned about the views of anyone else; neither am I concerned about the fate of this bill in its immediate passage when I am conscious of my own duties and responsibilities, and when I visualize what we are starting when the bill becomes a law.

As I have said heretofore, the final solution of the flood problem of the Mississippi River, which affects my State vitally, perhaps as much as any State in the lower Mississippi Valley, will require the construction of 1,600 to 1,800 reservoirs in the vast territory extending from the Appalachian system on the east to the Rocky Mountains on the west. The enactment of the section which I am opposing I know means 1,600 to 1,800 assessments against my people this year, next year, and throughout the entire period of the prosecution of this program. I care not what record others may make; I shall make my own record. I have a strong suspicion that when the chairman of our committee stands here and holds the big stick over the head of the Senate and says, "If you want a bill, you had better kill this amendment", I have a very slim chance of securing its adoption. In other words, the fear of Executive wrath is such that there will be no trouble in killing my amendment.

Mr. COPELAND. Mr. President, will the Senator yield?

Mr. BILBO. Yes; I yield.

Mr. COPELAND. I do not think I have ever been charged with the fear of Executive wrath. This is one time when, with all good conscience, I can say that if a veto should come I should be for it 100 percent, because the measure would be un-American and contrary to all the traditions and policies of the past.

Mr. BILBO. I appreciate the boldness of the Senator from New York in always asserting his convictions, regardless of what others may think or do; but it just so happens in this case that the anticipated Executive opposition synchronizes with the views of the Senator from New York.

Mr. COPELAND. That is true.

Mr. BILBO. Of course, it is no trouble for the Senator to be brave on this occasion.

Mr. COPELAND. Mr. President, if the Senator will yield, such occasions are so rare that I am sure the Senator does not feel badly that there is one occasion when I can be brave in that particular direction.

Mr. BILBO. I rejoice with the Senator from New York that he has at last found one occasion on which he can harmonize with the Executive. The point is that I am not willing, for a present, immediate relief on this or that subject, to write into the bill in haste, and, in order to be agreeable, consent to a policy which I know will mean so much in the years to come to my people and to the people of the Nation. I have performed my duty, my responsibility to my people, as best I know how.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. BILBO. Yes.

Mr. CLARK. Has anyone any assurance about this bill being signed, even when it is loaded down with the section which the Senator from Mississippi is seeking to strike out, and with the provision allowing the President to look through the bill and pick out particular projects which he may particularly favor, and even when it is additionally loaded down with the creation of a new commission, which I understand will be the fortieth since March 4, 1933?

Mr. BILBO. As Senators know, there is an old saying that "only fools and dead people do not change their minds"; but I have a suspicion that with the amendments which have been put on the bill, the rumor referred to by my friend, the chairman of the committee, is erroneous, and that the good judgment and patriotism of the Executive will prevail, and that even if the amendment I am advocating shall be put in the bill, it will become a law if it shall make its way through the House.

Mr. CLARK. The Senator means to say, then, that so-called "pork" may take on a better odor when salted down with a new commission? [Laughter.]

Mr. VANDENBERG. Mr. President, of course I have no knowledge as to whether or not the President would veto this bill if it should be loaded down with the Bilbo amendment; but I have a very profound conviction that if the amendment were added to the bill, and the President should veto it, he would be doing exactly what he ought to do.

Mr. President, this is another of those situations such as we confronted yesterday afternoon, when the Senate, with complete good sense, decided not to set a dangerous precedent in respect to the limitless nature of the new flood-control responsibility which the Federal Government has now accepted. This question cannot be settled safely on the basis of what will happen to the State of Mississippi in respect to some one particular flood situation. This question must be settled in respect to what will happen to the United States of America and all its taxpayers, not only under the pending flood bill but under all the subsequent flood bills which are going to flood Congress itself when once this policy is established.

Let it not be overlooked that this is the first time in 150 years of American history when it has been proposed to assert that floods upon practically all the rivers of the United States constitute a menace to national welfare and are a Federal responsibility. The moment we have accepted

that responsibility, we have accepted it not only for the flood waters concerning which the Senator from Mississippi speaks, but we have accepted it for every navigable stream and every tributary of every navigable stream in 48 States of the Union; and the human imagination can hardly encompass the total extent of the burden and responsibility which is thus laid at the door of the Treasury of the United States by the adoption of this policy.

I am not quarreling with the adoption of the policy. I am prepared to vote for the bill on a basis of reasonable prudence; but I assert that this almost boundless responsibility must have some small element of an automatic check upon it, and the only automatic check in the world that can be applied is the check provided by a small degree of local responsibility and local cooperation, through the medium of local contribution. If we eliminate all local cooperation from this contemplation, we open a Nation-wide racket. There is not any doubt about it. That will be the net result. There are hundreds and hundreds of perfectly legitimate flood-control projects, just as there are hundreds and hundreds of legitimate river and harbor projects; and then there are thousands of illegitimate river and harbor projects, and there will be thousands of illegitimate flood-control projects. Except as we tie down this new responsibility to some sort of local contribution, we may talk about floods, but we have turned loose upon the taxpayers of this Nation a deluge which they simply cannot swim out from under.

The Senator from Mississippi says, "Why, this bill will involve 1,800 assessments on my State of Mississippi, and I do not propose to stand for it." Well, Mr. President, it will involve the same 1,800 assessments on my State of Michigan without its being in the line of the flood waters at all. The Senator from Mississippi complains against a local contribution in respect to an improvement which has a national aspect. I am perfectly willing to accept my share of the national burden which is asserted under this section; but if, in addition to that, the Senator from Mississippi, coming from an area which has an immediate and intimate advantage to be gained from the bill, is to assert that he cannot confront 1,800 assessments in respect to it on account of direct local advantage, then I do not see how he can expect 47 other States in the Union to accept their share of the other portion of this assessment, when they are not in the line of danger at all.

Mr. BILBO. Mr. President, will the Senator yield?

Mr. VANDENBERG. I yield to the Senator from Mississippi.

Mr. BILBO. The Senator said the State of Michigan would get no benefit from the proposed legislation.

Mr. VANDENBERG. I did not say that. I said we were not in the direct line of danger. There is a benefit to every section of the Nation when the flood problem is met, I freely concede, and conceding it, although I am from a State which is blessed, apparently, by suffering from none of these major flood disasters, I am perfectly willing to have my State pay its full share of the heavy Federal contribution which the pending bill would require. But I am not willing to assume, in addition, the expense of local contribution which legitimately belongs with those directly benefited.

Mr. BILBO. I was just about to suggest to the Senator that we will continue to buy furniture, automobiles, and other things from his State, so his State will be able to pay its share of the expense of putting this flood control over.

Mr. VANDENBERG. Certainly; we are a national unit so far as the ultimate problems of the Nation are concerned, but in respect to the fundamental need to put some sort of a check upon legislation of this character, it seems to me that it is perfectly obvious, if we leave it 100 percent a burden upon the Federal Government, that we will open the door to the same old racket which was the bane of our existence in respect to river and harbor legislation until we established the new order of procedure.

Mr. BILBO. Mr. President, will the Senator yield?

Mr. VANDENBERG. I yield.

Mr. BILBO. Let me ask the Senator this question. Is it the fixed policy of the Congress and of the Government, and has it been for a long time, to approve no project unless it receives the O. K. of the Board of Army Engineers?

Mr. VANDENBERG. Yes.

Mr. BILBO. Does not the Senator consider the Board of Army Engineers, composed of men of such type and such training, most of them being graduates of West Point, trained for the Army, in a patriotic service, would be an ample safeguard and protection on behalf of the taxpayers against all this bugaboo of "pork barrel" legislation, about which the Senator is speaking?

Mr. VANDENBERG. I do not.

Mr. BILBO. If no project can be undertaken unless the Board of Army Engineers approves it, then the Senator would intimate that the Board of Army Engineers would become a party to the "pork barrel" legislation.

Mr. VANDENBERG. Mr. President, the Board of Army Engineers is at the mercy of the situation they confront when once there is established a new policy which accepts for the Federal Government the responsibility for flood conditions upon all these rivers. I am asserting that the Engineers can find flood situations which need to be met, yet which are essentially local in their complete jurisdiction, which, so far as the Engineers are concerned, they are perfectly powerless to exclude if we have accepted this Nation-wide responsibility.

It is not the Board of Engineers upon whom we can rely to foreshorten this responsibility. The only reliance I know of is that same automatic rule which has worked heretofore in respect to flood control, which is working in respect to river and harbor development—the rule of local contribution, the rule which still asserts that there is a home responsibility under this Government, and that the Federal Treasury is not the ultimate catch-all for all the aspirations and all the appetites of all the people of the land.

I submit that as an elementary protection of the public credit, at a time when the public credit magically needs protection, under this new declaration of policy we had better not open completely, without restraint, the flood-control prospectus accepted by the Federal Government to the whole $15,000,000,000 of projects which will come tumbling in upon us if we do not provide self-restraint of the character reported and recommended by the committee. The pending amendment should be defeated as a matter of elementary fiscal prudence in this hour of terrific fiscal hazard.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Mississippi [Mr. BILBO] to the amendment of the committee.

Mr. BILBO. I should like to have the yeas and nays.

The yeas and nays were ordered, and the legislative clerk proceeded to call the roll.

Mr. McNARY (when his name was called). I have a general pair with the senior Senator from Mississippi [Mr. HARRISON], who is necessarily absent. I transfer that pair to the junior Senator from New York [Mr. WAGNER] and vote "nay." I am advised that if present the Senator from Mississippi [Mr. HARRISON] would vote "yea", and the Senator from New York [Mr. WAGNER] would vote "nay."

The roll call was concluded.

Mr. AUSTIN. I desire to announce that the Senator from Delaware [Mr. TOWNSEND] has a general pair with the Senator from Tennessee [Mr. McKELLAR], and that the Senator from North Dakota [Mr. NYE] has a general pair with the Senator from Maryland [Mr. RADCLIFFE].

Mr. ROBINSON. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. McCARRAN] are detained from the Senate on account of illness.

The Senator from North Carolina [Mr. REYNOLDS] is detained on account of a death in his family.

The Senator from Washington [Mr. BONE], the Senator from Massachusetts [Mr. COOLIDGE], the Senator from Nevada [Mr. PITTMAN], the Senator from Virginia [Mr. GLASS],

the Senator from Mississippi [Mr. HARRISON], and the Senator from Montana [Mr. WHEELER] are detained in important committee meetings.

The Senator from Oklahoma [Mr. GORE], the Senator from Illinois [Mr. LEWIS], the Senator from Tennessee [Mr. MCKELLAR], the Senator from New Jersey [Mr. MOORE], the Senators from Maryland [Mr. TYDINGS and Mr. RADCLIFFE], the Senator from Utah [Mr. THOMAS], and the Senator from New York [Mr. WAGNER] are unavoidably detained.

Mr. BILBO. I have a general pair with the Senator from Iowa [Mr. DICKINSON]. I transfer that pair to the Senator from Utah [Mr. THOMAS] and vote yea. I am not advised how the Senator from Iowa or the Senator from Utah would vote if present.

The result was announced—yeas 15, nays 55, as follows:

YEAS—15

Bachman	Caraway	Guffey	McGill
Barkley	Clark	Holt	Neely
Bilbo	Davis	Logan	Truman
Black	Frazier	McAdoo	

NAYS—55

Adams	Carey	Hatch	Pope
Ashurst	Chavez	Hayden	Robinson
Austin	Connally	Johnson	Russell
Bailey	Copeland	Keyes	Schwellenbach
Barbour	Couzens	King	Sheppard
Benson	Dieterich	La Follette	Shipstead
Borah	Donahey	Lonergan	Smith
Brown	Duffy	Long	Stelwer
Bulkley	Fletcher	McNary	Thomas, Okla.
Bulow	George	Maloney	Vandenberg
Burke	Gerry	Metcalf	Van Nuys
Byrd	Gibson	Minton	Walsh
Byrnes	Hale	O'Mahoney	White
Capper	Hastings	Overton	

NOT VOTING—25

Bankhead	Harrison	Norbeck	Townsend
Bone	Lewis	Norris	Tydings
Coolidge	McCarran	Nye	Wagner
Costigan	McKellar	Pittman	Wheeler
Dickinson	Moore	Radcliffe	
Glass	Murphy	Reynolds	
Gore	Murray	Thomas, Utah	

So Mr. BILBO's amendment to the amendment of the committee was rejected.

WILLIAM W. DANENHOWER

The PRESIDING OFFICER (Mr. POPE in the chair) laid before the Senate the amendments of the House of Representatives to the bill (S. 925) to carry into effect the findings of the Court of Claims in the case of William W. Danenhower, which were, on page 1, line 4, after the word "to", to insert "Sallie M. Danenhower, executrix of the estate of"; on the same page, line 6, after the figures "$34,260", to insert "in full settlement of all claims against the United States"; and on the same page, line 7, to strike out "his" and insert "said William W. Danenhower's."

Mr. CAPPER. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

TERESA DE PREVOST

The PRESIDING OFFICER laid before the Senate the amendments of the House of Representatives to the bill (S. 1360) for the relief of Teresa de Prevost, which were, on page 1, line 5, after the word "to", to insert "the estate of"; and to amend the title so as to read: "An act for the relief of the estate of Teresa de Prevost."

Mr. SHIPSTEAD. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

NATIONAL FLOOD CONTROL

The Senate resumed consideration of the bill (H. R. 8455) authorizing the construction of certain public works on rivers and harbors for flood control, and for other purposes.

Mr. DUFFY. Mr. President, I send to the desk an amendment to the survey section, and ask that it be stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 112, after line 7, it is proposed to insert "Fond du Lac River and tributaries, Wisconsin."

Mr. DUFFY. In that connection, and as a part of my remarks, I ask unanimous consent to have printed in the RECORD at this point a paragraph from the Oshkosh Northwestern, issue of May 16, 1936, showing the amount of loss due to floods which have been caused in the river.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Oshkosh (Wis.) Northwestern of May 16, 1936]

That a flood-control plan is needed at the lower end of the lake as well as in the Wolf River Valley is clearly shown by figures on damages done at Fond du Lac by floods in only 4 years, it was said. Figures given stated that in 1905 floods did $200,000 worth of damage in Fond du Lac; in 1912 the amount was $100,000; in 1915 it was $150,000; and in 1924 it was $250,000 a total of $700,000 in 4 years.

Mr. COPELAND. Mr. President, we have no objection to the amendment proposed by the Senator from Wisconsin.

The PRESIDING OFFICER. Without objection, the amendment to the amendment is agreed to.

Mr. COPELAND. Mr. President, I am chairman of the committee in charge of the bill, and I also desire to continue as a Senator from my State; so I send to the desk an amendment, which I ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment on page 108, after line 25, it is proposed to insert:

Black and Moose Rivers, N. Y.

Mr. COPELAND. Mr. President, we have no objection to that amendment. [Laughter.]

The PRESIDING OFFICER. Without objection, the amendment to the amendment is agreed to.

Mr. AUSTIN. Mr. President, I send to the desk an amendment which I ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment on page 59, line 16, after the word "session" and before the semicolon, it is proposed to insert "as the same may be revised upon further investigation of the 1936 flood."

Mr. AUSTIN. The Senator from New York was good enough to submit the proposed amendment to the Army Engineers, and there is no objection to it.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Vermont to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. AUSTIN. Mr. President, I ask unanimous consent to have inserted in the RECORD at this point an extract from the testimony of Walter S. Fenton, representing the State of Vermont, before the House Judiciary Committee, appearing on page 6724 of the CONGRESSIONAL RECORD.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

The studies that have been made so far on this subject, as I view it, are wholly inadequate upon which to base any efficient, effective plan of flood control. I have heard it stated this morning by some distinguished Members of Congress that we should at once build these 10 storage reservoirs that have been recommended in the Army report so that we can prevent a repetition of the same flood condition next year. While I do not know just how much investigation the gentlemen have made into the construction work of the magnitude, I would hardly expect, even if the lands were to be controlled and owned in such a way that construction work could begin tomorrow, that they could be in a condition to retain any flood waters by next spring floods.

The difficulty with that proposition, as I understand it, is that the program which proposes the construction of the 10 reservoirs in question is based primarily upon studies of the 1927 flood to which I referred. The flood of 1936 which caused this great damage in Massachusetts and Connecticut was a flood of an entirely different character. To illustrate what I mean by that, this program for the construction of these reservoirs contemplates the construction of three reservoirs on the White River in Vermont. The flow of water in the White River in 1936 was only approximately one-third of the flow of water in 1927. The result was that the stream flow in the Connecticut River at White River Junction, below the discharge of the White River, was 11 second-feet per square mile less, and the drainage area above that point is approximately 4,000 square miles, which makes a stream of 44,000 second-feet lower in the Connecticut River below White River Junction in 1936 than it was in 1927.

What that means is that the water which caused the damage in the States lower down the river did not come in such substantial quantities from Vermont. On the other hand, the discharge in the New Hampshire rivers, below the so-called Ammonoosuc River was very much greater than it was in 1927. I have just been interested in looking at a graph which presents by means of engineering methods the density of the rainfall. I think they term it an isohyetal diagram, which shows that the entire rainfall in Vermont for the month of March was approximately equal to that of 1 day at Pinghams Notch in the White Mountains over in New Hampshire, where they had something like 23 inches of rainfall in the month of March, and something over 10 inches of rainfall in 2 days.

As I say, there was a greater discharge into the Connecticut River, and particularly into the Merrimack, from that source.

Why? Because that is where they have the greatest rainfall, which, coupled with the melting snow, produced this extraordinary volume of water. Having in mind the stream flow in the Connecticut River at White River Junction was 44,000 second-feet less in March of this year, at the time of the peak of the flood at Vernon Dam, which is a little north of the Massachusetts-Vermont State line, the crest of the flood was 5 feet higher than it was in 1927.

Above Vernon Dam comes in the West River, coming in from Vermont, which is quite a substantial stream. Yet the stream flow in that river was 28 second-feet per square mile less in 1936 than it was in 1927.

Above that we have the Saxtons River just below Bellows Falls, which is not a very large stream. I cannot give you the figures on it, nor on the Williams River just above it.

Above that we have the Black River. The point I want to make with you is this: That you cannot plan upon a program resulting from a study of the Engineers of the 1927 flood to take care of the type of flood that we had in 1936. And it is a matter of a good deal of doubt in my mind from various information that has been given to me whether the construction of these reservoirs would have had any material effect upon the disastrous results down in Massachusetts and Connecticut. I think the sponsor of this bill made substantially the same statement this morning. In that I agree with him fully.

Mr. AUSTIN. I also ask unanimous consent to have inserted in the RECORD at this point the telegram which I send to the desk.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

NEW YORK, N. Y., *May 21, 1936.*

Hon. WARREN AUSTIN,
United States Senate:

All members of Governors' flood-control committee strongly in favor of amendment to bill to permit reexamination of Connecticut River project in the light of this year's flood. All but one oppose bill if amendment is not included. Hope you will make every effort to amend.

R. E. FLANDERS.

Mr. GUFFEY. Mr. President, I send to the desk an amendment which I ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment on page 55, line 10, after the word "project", it is proposed to insert:

Exclusive of construction costs of railroad and highway relocations, and.

Mr. COPELAND. Mr. President, will the Senator yield to me for a moment?

Mr. GUFFEY. I yield.

Mr. COPELAND. Would the Senator be willing to have his amendment read "exclusive of construction costs of railroads and relocations of improved highways?"

Mr. GUFFEY. I will accept the modification of the amendment.

Mr. KING. Mr. President, I should like to have an explanation of the amendment. If I understand the amendment, it imposes upon the Federal Government the obligation to take care of the railroads and highways in the event of floods or damages to them, and the States and the railroads are exempt from making any contribution.

Mr. GUFFEY. I am asking only what has been the custom and the practice heretofore. In the Overton bill which was enacted last week such a provision was included. The Senator was present, and voted for that bill; did he not?

Mr. KING. I was here, and I voted against it.

Mr. GUFFEY. The bill was passed.

Mr. KING. Yes; the bill was passed.

Mr. GUFFEY. The Overton bill contained an item covering $31,500,000 for building new railroads wherever necessary.

Mr. ROBINSON. Mr. President, as I understand the amendment, it does not propose to pay damages for injuries to property in case of flood.

Mr. GUFFEY. That is correct.

Mr. ROBINSON. What is proposed is that if it shall become necessary, in constructing works under this bill, to relocate improved highways or relocate railroads, the expense of the relocation incident to the construction of the flood-control work shall be borne by the Federal Government rather than by the localities.

Mr. GUFFEY. That is correct.

Mr. COPELAND. Mr. President, I ask that the clerk read the amendment as modified.

The CHIEF CLERK. As modified, the amendment to the committee amendment reads as follows:

Exclusive of construction costs of railroads and relocations of improved highways.

Mr. BARKLEY. Mr. President, I wish to make it clear that the provision merely relieves the local community of the obligation of contributing to the relocating of highways or railroads, but does not relieve either railroads or the communities from any obligations imposed upon them under the bill as a whole.

Mr. COPELAND. That is correct.

Mr. McNARY. Mr. President, will the Senator yield?

Mr. COPELAND. I yield.

Mr. McNARY. I wish to ask the Senator from Pennsylvania, who proposed the amendment, if the word "highways" might be considered to include bridges.

Mr. GUFFEY. That is a matter for interpretation by the Army Engineers. So far as I am concerned, I should include bridges. I have no objection to including bridges.

Mr. McNARY. I think the language should not be uncertain. If a railway is to be relocated at Federal expense, why should not the same treatment be afforded to a bridge which spans a river?

Mr. GUFFEY. I agree with the Senator from Oregon that it should.

Mr. McNARY. A highway bridge is a link in the highway; but, to make sure, I suggest that the Senator include in his amendment, after the word "highways", the words "and bridges."

The PRESIDING OFFICER. Does the Senator from Pennsylvania desire to modify his amendment?

Mr. GUFFEY. I agreed to the modification of the amendment as proposed by the chairman of the committee.

Mr. BARKLEY. The amendment would not be construed to include a privately owned toll bridge operated by a private concern, would it?

Mr. COPELAND. Mr. President, we have no advice as to how far the amendment would go and what it would mean if we were to include "and bridges."

Mr. CONNALLY. Mr. President, will the Senator yield at that point?

Mr. COPELAND. I yield.

Mr. CONNALLY. The Congress is providing the legislation. We should not be obliged to ask anyone else what it means. Congress is doing this. What Congress is doing ought to be made so clear that the Engineers may know what we are talking about.

Mr. COPELAND. I wish to say a word, if I may. Has the Senator from Oregon finished?

Mr. McNARY. I shall be very glad to yield.

Mr. COPELAND. I desire the Senate to be advised as to the significance of this amendment. The Senator from Mississippi [Mr. BILBO] at great length and eloquently and ably argued in opposition to the provision requiring costs to be assessed against localities. The whole amount involved as to localities is a little over $100,000,000. The Senator from Mississippi was trying to relieve localities of $100,000,000. I do not wish to have the Senate misled as to the significance of the amendment offered by the Senator from Pennsylvania. I cannot say that at the moment I am in violent opposition to it, but the Senate must be advised what it means. The provision will occasion a cost of $50,000,000. The relocation

of the railroads and the highways will place an additional burden upon the Federal Government of the entire amount that we are appropriating this year—$50,000,000. It will be $14,000,000 for highway relocation and $36,000,000 for railroad relocation.

Mr. WHEELER. Mr. President, does the Senator mean that the Government of the United States is going to spend $36,000,000 for the purpose of relocating some railroads?

Mr. JOHNSON. Mr. President, will the Senator speak louder?

Mr. WHEELER. I was asking the Senator if the amount which we are going to spend, $36,000,000 of the Government's money, is for the purpose of relocating some railroads.

Mr. JOHNSON. Let me suggest, if we are going to pay Government money for relocating railroads, why not pay the Government money to relocate all the homes that may be washed away, injured, or damaged, and the like?

Mr. WHEELER. Of course, we should; and there is much more reason why we should pay Government money to relocate some poor devil who has a little home washed away than to relocate a railroad. To me it is inconceivable that the Government of the United States should pay out money for the purpose of relocating a railroad to save it from flood or any other purpose.

Mr. JOHNSON. That is why I asked the question.

Mr. WALSH. Mr. President, permit me to explain the purpose of the amendment.

When a basin or structure is built to prevent floods, and that work involves relocating a railroad which runs through the basin, the Government should pay for relocating the railroad. A basin through which a railroad runs cannot be constructed without paying damages. The railroad is not being relocated for the pleasure of moving it somewhere else. When the Government takes my home for any purpose, such as to build a basin for flood control or a reservoir, the Government must pay for that.

I am sure neither the Senator from California nor the Senator from Montana had in mind that under such circumstances the cost of relocating the railroad should not be borne by the Government. The Government must pay for relocating a railroad when it is necessary to do so in order to construct a reservoir.

Mr. VANDENBERG. And in order to save the railroad.

Mr. COPELAND. I assume that the railroad, if it had just cause to complain, would have recourse to the courts. The Senator from Massachusetts is an able lawyer and knows more about that subject than I do.

Mr. WALSH. I know that we cannot take a railroad or a man's home or any other property and confiscate it without paying damages. Instead of paying damages, it is proposed to relocate the road outside of the reservoir area.

Mr. CONNALLY. Mr. President, there is a little clause in the Constitution about taking private property for public use without compensation.

Mr. VANDENBERG. Nobody has contended for that.

Mr. WALSH. I do not understand the purpose of this amendment, and I should like to ask the Senator from Pennsylvania if its purpose is to provide that payment shall be made for the relocation of a highway when the highway is in the way of the basin of a flood-control project, and to provide that payment shall be made for the relocation of a railroad when the railroad is in the way of the construction of a flood-control project.

Mr. GUFFEY. That is a correct interpretation. Of the two railroads involved in Pennsylvania, one was built in 1855 and the other was built in 1874. Those railroads, having maintained their rights-of-way during all that time in their present location, if the Government builds a dam which will necessitate a change in the location of the railroad, I can see no reason why the Federal Government, and not the community, should not bear the cost.

Mr. WALSH. Under the amendment, the Government would have to pay for destroying the railroad or for any property taken.

Mr. BARKLEY. Mr. President, the amendment does not involve the question of paying for property. It simply relieves the local community of the provision of the bill which makes it necessary for the local community to bear the expense of the removal or relocation of highways or railroads. It does not, in any way, invalidate the provisions of the Constitution or any law making it obligatory to pay for property taken.

Mr. WALSH. I understand that to be the position, but objection has been made that neither the Federal Government nor any other government should pay such costs.

Mr. BARKLEY. This amendment as between the Federal Government and the local government would make it necessary for the Federal Government instead of the local government to do it.

Mr. WALSH. In other words, unless this amendment shall be adopted it might be necessary for the local governments to pay. Somebody has got to pay.

Mr. BARKLEY. That is correct.

Mr. WALSH. And the Senator from Pennsylvania is seeking to have the Federal Government pay the costs.

Mr. BARKLEY. That is correct.

The PRESIDING OFFICER. The Senator from New York has the floor.

Mr. MALONEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Connecticut?

Mr. COPELAND. I yield.

Mr. MALONEY. I should like to ask the Senator from Pennsylvania if the two railroads in his State to which he just made reference are located in the recent flood area?

Mr. GUFFEY. They are.

Mr. MALONEY. Then I assume that they paid for the flood damage, which involved a replacement of their roadbeds and tracks.

Mr. GUFFEY. One road was not damaged at all, and the other road was damaged very slightly.

Mr. MALONEY. But the railroad itself paid the cost?

Mr. GUFFEY. Yes; for what little damage there was; but the damage was very slight.

Mr. MALONEY. I cannot see why the Government should be any more responsible for replacements or relocations in connection with projects under the pending bill than in the case of damages to the railroads caused by the recent floods.

Mr. WHEELER. Mr. President, will the Senator from New York yield?

The PRESIDING OFFICER. Does the Senator from New York yield to the Senator from Montana?

Mr. COPELAND. I yield the floor for the moment.

Mr. WHEELER. Mr. President, let me call attention to the language of the bill, and that will probably straighten the matter out. Section 3, on page 55, reads, in part, as follows:

SEC. 3. That hereafter no money appropriated under authority of this act shall be expended on the construction of any project until States, political subdivisions thereof, or other responsible local agencies have given assurances satisfactory to the Secretary of War that they will (a) provide without cost to the United States all lands, easements, and rights-of-way necessary for the construction of the project.

And then this amendment is proposed to be inserted:

Exclusive of construction costs of railroads and relocations of improved highways.

Why should we make exception in the case of the railroads? If we are going to make the local and State governments bear the burden of paying for land, easements, and rights-of-way, why should we make the Government pay for the relocation of the railroads? After all, the railroad itself is going to receive a great benefit, in most instances, by reason of the fact that the Government is spending this money, as its expenditure will protect the roadbed and tracks from being flooded.

In addition to that, by reason of the fact that the Government is spending this money, the railroads are going to get a great benefit because they are going to receive greater tonnage, due to the shipment of commodities paid for by the Government. If the local governments and State governments are going to be required to pay for the easements and

other things, I do not know of any reason why the railroads should not contribute their share to the local and State governments.

Mr. GUFFEY. Mr. President, will the Senator yield?

Mr. WHEELER. I yield.

Mr. GUFFEY. I should like to state that the Government has expended $652,000,000 for building locks and dams and the canalization of our rivers; in every instance where a railroad was involved the Government paid for moving and rebuilding the line, and there has not been $5,000,000 contributed from any other source than the Government.

In the pending bill as now drawn $55,000,000 are appropriated ostensibly for the flood areas on the upper Ohio River. For the 9 or 10 dams in western Pennsylvania, of the amount under the bill as drawn, the people of the State will be compelled to pay $34,000,000. The people of Pennsylvania have no objection to making a fair contribution, but they do object to paying more than 60 percent. This amendment is only offered to reduce the contribution as provided in the bill.

The bill implies also that the other States that benefit by the dams shall contribute. Eleven States will benefit by the construction of these dams. They will lower the water at Pittsburgh at flood level 7 feet, at Wheeling, W. Va., 5 feet, at Cincinnati 4 feet, and so on down the river. Does the Senator think that Kentucky or West Virginia or Ohio will contribute anything to the local cost in Pennsylvania? Unless we can work out a proper and equitable plan not a single reservoir or flood-control dam will be built. The people of Pennsylvania are willing to pay from 25 to 30 percent, but we think it is unjust to contribute 60 percent. There is going to be expended $31,000,000 for building a railroad along the floodway down the Mississippi Valley.

Mr. WHEELER. It seems to me that that does not answer the question at all, because, after all, the railroads are going to receive the benefit of the money that is to be expended by the Government of the United States, which will result in safeguarding the property of the railroads. If it be true that they are going to receive a benefit as the result of the building of the dams which will prevent the railroad properties from being flooded, why should not the railroads themselves, in conjunction with the local governments, contribute to their building?

Mr. GUFFEY. Take the dam to be constructed on the Conemaugh River, for which $9,000,000 is to be expended, five and a half million dollars of which will be necessary to change the grade and to relocate the railroad. The change will give the Pennsylvania Railroad a much worse grade and a stiffer grade than it now has and will increase the cost of the road.

Mr. BARKLEY. Mr. President, the proposal does not involve merely relocating a railroad for the protection of the railroad; it involves the possibility of having to relocate railroads for the protection of the community.

Mr. GUFFEY. That is correct.

Mr. WHEELER. I understand that it not only involves the local community, but it involves the railroads.

Mr. BARKLEY. It might, incidentally; but the main thing is to protect the community.

Mr. WHEELER. It not only protects the community, but anyone who has gone through the flood areas knows likewise that the building of dams is going to protect the railroads to a great extent, because the railroads suffer from the floods; they have to rebuild their roadbeds, and so forth, all along the line. That is true of the B. & O. and the Pennsylvania. If we are going to build dams for the purpose of protecting the railroads from being flooded, then the railroads ought to be willing to contribute for the relocation of their rights-of-way to that extent, it seems to me.

Now, it is proposed to make an exception in the case of the railroads; if the Government is going to pay all costs, let the Government do it; but if not, do not let the railroads be exempted.

Mr. GUFFEY. What advantage will it be to a railroad whose tracks extend the full length of the reservoir back of the dam which is proposed in northern Pennsylvania and which will cross into the State of New York, spreading over a distance of 50 miles, when the entire railroad will be covered with water to a depth of 200 feet? In what way is it to their advantage to have their present location covered by 200 feet of water for a distance of 50 miles? Where do they get any benefit?

Mr. WHEELER. I do not know about that particular instance, but I do know that there are many instances where the Pennsylvania Railroad is going to be benefited if the Government builds dams which will keep their roadbed from being flooded and washed away. Is there any question about that at all? The Pennsylvania Railroad suffered during the last flood tremendously, and so did the B. & O. all through Pennsylvania and Maryland and other States. If it should be necessary for the purposes contemplated to relocate their tracks, they ought to contribute to the cost and not let the Government of the United States do it all.

Mr. MINTON. Mr. President, if the bill shall remain as it is or is amended as proposed, and the railroads are going to be paid if their property shall be taken, it seems to me the effect of this amendment would be simply to shift the cost to the Federal Government from the State governments. I think that would be the only effect of the amendment.

Mr. WHEELER. No; that is not entirely correct. This is not simply shifting the payment from the local government to the Federal Government. The provision of the bill is:

> That hereafter no money appropriated under authority of this act shall be expended on the construction of any project until States, political subdivisions thereof, or other responsible local agencies have given assurances satisfactory to the Secretary of War that they will (a) provide without cost to the United States all lands, easements, and rights-of-way necessary for the construction of the project.

If the local government or the State government is in favor of building a particular project, and the railroads are sufficiently interested in building up the community to save it from flood, they are going to contribute their portion to the local government or to the State government. If we incorporate any provision to the effect that the United States Government will pay for it, we know from experience that in every instance where a dam is built the railroads are going to insist that the Government pay for the relocation of their tracks.

Mr. BARKLEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Kentucky?

Mr. WHEELER. I yield.

Mr. BARKLEY. I do not know, of course, what the situation is with respect to the Pennsylvania Railroad or any other railroad in any particular community, but, under the language as written in the bill originally, if any cost is involved in obtaining the right-of-way, although it be the right-of-way of a railroad or property owned by a railroad, at each point where the Government might desire to erect a flood-control project the local community would have to bear the entire cost of obtaining the land or the right-of-way if it happened to be land upon which there was a railroad track.

The amendment offered by the Senator from Pennsylvania does not change the situation with respect to compensating the railroad for any benefit it may receive, but simply provides that in a case of that sort, where it is necessary to buy a railroad track in order to build a project to control floods, the Federal Government rather than the local community shall bear the cost. It simply shifts the burden from the town or locality to the Federal Government.

Mr. BONE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Washington?

Mr. WHEELER. I yield.

Mr. BONE. Is it not obvious to all of us that if, in the construction of a flood-control project, it should become necessary to acquire a railroad right-of-way occupied by railroad tracks or other railroad properties, even the local government would have to pay for the land?

Mr. WHEELER. They would either have to pay for it or come to an agreement with the railroad. They would have to get it by condemnation proceedings or otherwise.

Mr. BONE. It is true that under every State constitution private property cannot be acquired without just compensation. The State would have to pay for it. The effect of the amendment is to shift the cost from the local government to the Federal Government in cases where it requires railroad property or takes over an improved highway.

Mr. COPELAND. Mr. President, I think it would be helpful at this point to have the clerk read a letter from the War Department relating to this particular amendment. I send the letter to the desk and ask that it may be read.

The PRESIDING OFFICER. Without objection, the clerk will read as requested.

The legislative clerk read as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, May 18, 1936.

Hon. ROYAL S. COPELAND,
Chairman, Committee on Commerce,
United States Senate, Washington, D. C.

DEAR SENATOR COPELAND: I am in receipt of your request for information with respect to the effect of the amendment to the flood-control bill, H. R. 8455, proposed by Senator GUFFEY, which would insert on page 55, in line 10, following the word "project", the following:

"Exclusive of construction costs of railroad and highway relocations, and."

The authorization of $310,000,000 as contained in the general flood-control legislation reported to the United States Senate by the Committee on Commerce, would require an estimated expenditure of $80,000,000 by local interests for furnishing the necessary lands, rights-of-way, and easements to include railroad and highway relocations. Approximately $36,000,000 of this amount would be required for railway relocations and $14,000,000 for highway relocations. The information immediately available does not permit a separation between construction costs and new right-of-way for the relocations involved. However, of the total $50,000,000 required for railway and highway relocations, approximately $40,000,000 would be for construction costs.

In general, in the flood-control projects that have been undertaken by the Federal Government on a cooperative basis, all costs in connection with highway relocations have been borne by the benefited interests. In railway relocations construction costs have been borne by the Federal Government in the case of the Muskingum project, and are to be borne by the Government in the proposed floodways under the Mississippi River legislation. However, in the latter case while easements in the floodway will be acquired by the Federal Government, only one common structure will be provided to carry the railroads in the areas concerned during periods when the floodway is flooded.

The adoption of the amendment would, of course, still preserve the principle of local contribution, although it would result in a substantial reduction in the amount of such contribution. I do not think it appropriate for me to comment on the advisability of adopting the amendment, other than to point out its effect on increasing the Federal cost involved in the authorization, since the provisions with respect to local cooperation would appear to be a matter of policy outside of the jurisdiction of this office.

Sincerely yours,

G. B. PILLSBURY,
Brigadier General, Acting Chief of Engineers.

Mr. COPELAND. With the addition of the St. Francis and the Yazoo projects, the amount involved would be $100,000,000 instead of the $80,000,000 stated in the letter.

The letter mentions two projects in connection with which the Federal Government bore the cost of railroad relocation. The first one was the Muskingum, in Ohio; but that was a P. W. A. project. All of the money was paid out of the P. W. A. fund. The second project mentioned is in the Overton bill, and provides for one structure, as the letter states, over a 10-mile-wide floodway. With those two exceptions, the Federal Government has never taken such action.

Mr. WHEELER. Mr. President, let me again call attention to the fact that, while in a sense it is only shifting the burden from the local government to the Federal Government, yet, as a practical matter, we all know it means quite a different proposition. We all know that if a State or municipal government is interested in building a project for flood control, they can go to the railroads and make a deal with the railroads for doing the work at a great saving to the people of the local community. But if we leave it open, the railroads are going to see that the local government is only going to contribute the easements and the Federal Government is going to pay for the relocation of the railroads, and all who have any practical knowledge of the situation know that the Federal Government is going to have to pay through the nose in order to get those easements, because they will not have any other way out.

Mr. VANDENBERG. Mr. President, will the Senator from Montana yield at that point?

The PRESIDING OFFICER (Mr. DUFFY in the chair). Does the Senator from Montana yield to the Senator from Michigan?

Mr. WHEELER. I yield.

Mr. VANDENBERG. What the Senator is now saying is literally justified by a letter from the War Department with respect to the Overton bill. At the time we were considering that in the Commerce Committee this precise relative question arose. It resulted in a letter from the Secretary of War who said that if the Federal Government was thrown into a complete general responsibility of the nature the Senator now describes, it would represent, and I quote his language "an immeasurable responsibility." The War Department furnished us with exhibit after exhibit to show what happens to the Federal Government when it falls into the auspices the Senator is now describing.

Mr. WHEELER. Mr. President, when the Government has undertaken the building of projects in my home State, which we will take for illustration, the local government could have bought certain lands for a very low price; but the minute the Federal Government stepped in and was authorized to buy those lands, everybody in the community started to hold up the Federal Government. The owners raised three or four times the price they had formerly asked for their lands. The cases were taken into court, and of course the juries just "soaked" the Federal Government, because Uncle Sam was paying the bill. Now we are leaving the way open for the railroads and the State governments to give Uncle Sam a good trimming on every single project where it is necessary to touch the railroads in order to move their tracks; and it should not be done.

I have not any interest in the subject except to try to save the Federal Government a few dollars in a matter of this kind, where we are contributing to the welfare of the local people of the community.

Mr. SHIPSTEAD. Mr. President, will the Senator yield?

Mr. WHEELER. I yield.

Mr. SHIPSTEAD. I should like to ask the Senator from Pennsylvania [Mr. GUFFEY] a question. In the case of the Muskingum River, where the Federal Government paid for the relocation of railroads, were any of the roadbeds located in the stream below high-water mark?

Mr. GUFFEY. The Senator will have to ask somebody from Ohio. They must have been below low-water mark in order to be moved. I am not famfliar with conditions there.

Mr. SHIPSTEAD. They must have been below high-water mark? That raises a very interesting question, because I should like to ask the Senator from Montana [Mr. WHEELER] or some other constitutional lawyer whether or not the power which the Federal Government enjoys over navigable waters for the purpose of controlling navigation extends to the problem of flood control. I believe it does.

We have had some very interesting information here. The Federal Government can pay for property taken for public use for navigation only where a railroad or any other user has a clear title to the property taken. I see by the letter of the War Department, and I hear that there are easements here, there are railroads to be moved, and we are told that some of the railroads which are to be moved and paid for by the Federal Government are occupying the river bed below high-water mark. I never could understand where the Federal Government gets authority to pay for the removal of a railroad occupying a river bed below high-water mark.

The custody and control of the navigable waters was donated to the Federal Government at the time of the forma-

tion of the Federal Union, to be held in trust for the purposes of navigation. It is true that in every part of the country wherever it has been found convenient, railroads have been built in the river beds, and their structures are in the river beds; but that could be done only under permits that are revocable, and the courts have held that wherever a waterway is needed for the purpose of navigation or for the development of navigation, these structures must be removed at the expense of the railroads which built them.

The Federal Government itself, the Congress itself, cannot alienate the river beds that are owned by the several States, but are under the custody and control of the Federal Government. A permit to a railroad company to build its track in a river bed, and to use the bed of the river and the sand of the river to make its grade cannot endow the railroad company with a vested right. It is there under a license, under sufferance, and it must move whenever the Federal Government finds it necessary to use the river bed for purposes of navigation.

I am aware that the War Department has not taken that point of view. We are now condemning, on the Mississippi River, railroad tracks in the bed of the Mississippi, the removal of which is made necessary for the purpose of building dams to further navigation. Instead of revoking the permits, the War Department put these structures into the petition for condemnation, admitting liability, asking the Federal Government to condemn these structures and pay the damages necessary to get back the right to use property that the Federal Government itself could not alienate.

If this amendment is adopted as it is now worded, we are going to pay for the removal of railroad tracks from river beds where the railroads have no vested rights. For instance, in the Federal court, when the question of the right to grant these permits was raised and protested as a matter of law, the Federal judge held to the effect that he did not care what the law was; he was guided solely by the request of the Secretary of War to condemn. The War Department took the point of view that the Federal Government must pay for the removal of a structure which the War Department itself gave a permit to install, though the permit on its face states that whenever it is found necessary to move the structure because of the necessity to develop navigation, it must be done at the expense of the railroad.

In the first place, the railroad never paid anything for the permit. The permit enabling the railroad to build this structure on its face contained notice that the railroad acquired no vested right, and was there at the sufferance of the Government.

If a railroad is to be moved from a location where it has clear title to the property, and damage is suffered, of course it ought to be paid, and personally I do not care from what source it is paid; but this amendment proposes to pay for property which has been occupied by private corporations and private individuals, property which the Congress itself cannot deed to any corporation or individual. I think the possibilities of the amendment are so overwhelming that we may not be able, for years to come, to figure out the possibilities of expense which are involved.

Unless it is made clear that the Federal Government shall pay only to obtain private property, and not property the Government already owns, the amendment ought to be defeated.

Mr. GUFFEY. Mr. President, the distinguished Senator from Montana [Mr. WHEELER] evidently is not entirely familiar with the intent and purpose of the amendment as drafted. Under this bill, the local governments must purchase and furnish all the easements and rights-of-way. All I am trying to do by this amendment is to relieve the local governments of the necessity of removing the railroads and the modern highways which have been there for many years. With us in western Pennsylvania that involves the sum of $55,000,000, of which $34,000,000 is to be borne by the local communities; $14,000,000 of it will be required to remove and replace the railroads and the highways, and the other $7,000,000 will have to be contributed to buy the easements and rights-of-way.

In the disbursement of the $652,000,000 which has been expended on rivers and harbors, every foot of railroad that it has been necessary to remove has been paid for by the Federal Government; every highway necessary to be removed was paid for by the Federal Government; and in the Mississippi Valley bill recently passed here, known as the Overton bill, $31,000,000 was provided to build a new railroad.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. GUFFEY. I yield.

Mr. BYRD. How much additional cost would the Senator's amendment impose on the Federal Government?

Mr. GUFFEY. I think about thirty or thirty-five million dollars, as nearly as I can figure it.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, of the Senator from Pennsylvania to the committee amendment.

Mr. WHEELER. Mr. President, I desire to say just a word in connection with the amendment.

The Senator from Pennsylvania says that I am not familiar with the bill. I do not think one needs to be familiar with the other provisions of the bill; all one has to do is to read section 3, and he will have the intent of the bill.

As a practical proposition, as I pointed out, if the Senate desires to say to the railroads, in any case where we move a railroad, "You can come in, and the Government is going to pay you"——

Mr. DAVIS. The Government, or the taxpayers in the community where the railroad is located.

Mr. WHEELER. Wait until I finish the sentence. As the bill is drawn at the present time, it provides that the local communities or the State governments shall pay or arrange for the rebuilding or the replacing of the railroads. As I said a moment ago, anyone who has had any practical experience knows that when it is necessary to arrange some matter with a railroad, the States or local communities can make a much better arrangement with the railroad and get much better cooperation from it than can the Federal Government, because the railroads are dependent upon the local communities for their business, their traffic, and their good will.

Mr. MURPHY. Mr. President, will the Senator yield?

Mr. WHEELER. I yield.

Mr. MURPHY. The Senator stated that the Federal Government would pay. Does the Senator state that the Federal Government will pay, under this amendment, notwithstanding the fact that the railroads may have rights-of-way located below the high-water line in river beds where they have no vested rights?

Mr. WHEELER. Of course, they would have to under this amendment, because, as the Senator from Minnesota pointed out, that is exactly what was done alcng the Mississippi, where they had no vested rights; yet the War Department paid. All they had to do was to revoke their permits, according to the Senator from Minnesota. I am not familiar with that situation.

Mr. MURPHY. The Senator from Minnesota stated facts within my knowledge. I know that he stated the facts correctly, but I was wondering whether the language of the amendment as drawn would nullify the practice now being followed in the Mississippi Valley of making demand upon the War Department for revocation of the permits for rights-of-way occupied by the railroads, where those rights-of-way are below the high-water mark.

Mr. WHEELER. I do not think there is anything in the amendment which would change that one way or the other.

Mr. SHIPSTEAD. Mr. President, under the amendment there will be done what the War Department started to do before the Department of Justice interfered. The amendment would make it impossible for the Department of Justice to interfere, because it would by law compel the Government to do what the War Department did without warrant of law, and to which the Department of Justice has very strenuously objected.

Mr. WHEELER. Mr. President, I would not wish to pass judgment on that matter without giving it further consideration.

As I was saying before, for every foot of land taken as a result of this measure, the Government would have to pay through the nose, because there would be condemnation proceedings. If the War Department did not agree on the price asked, they would have to resort to condemnation proceedings, and anyone who knows anything about the trial of condemnation cases knows that when the Government is involved in a condemnation proceeding, the local communities and the people upon the local juries all over the country soak the Government of the United States, and that is what it would mean in this instance. These are just the plain, unadulterated facts with reference to the situation, and I have stated what would happen if this amendment were agreed to. If the Congress wants to do it, it is all right with me.

Mr. WALSH. Mr. President, if I understand the position of the Senator, he says that because railroads have land along the courses of rivers, and are in flood areas themselves, removing them from those areas through the building of reservoirs would be of benefit to them, and they themselves ought to pay.

Mr. WHEELER. Yes.

Mr. WALSH. He is not asking that the local communities as is now contemplated by the bill, or the Federal Government, shall pay, but he thinks the railroads themselves ought to pay.

Mr. WHEELER. Exactly; I think they ought to contribute to the extent of their benefit.

Mr. WALSH. On the theory that they are benefited by having their property safeguarded from floods.

Mr. WHEELER. Exactly.

Mr. WALSH. Of course, there is no such proposition to be voted on. The proposition before us is whether the Federal Government or the local government will pay; but the Senator might well offer an amendment along the line he has suggested.

Mr. WHEELER. As the bill is drafted, there is a provision that the States or political subdivisions shall "provide without cost to the United States all lands, easements, and rights-of-way necessary for the construction of the project." The local government will have to do it, but I say that the local government will go to the railroad and say, "We want this project completed, we cannot afford to buy your railroad, and we want you to contribute to it"; and they will contribute to it. They will not dare do anything else, because they will not dare hold up the project. But if this exception is inserted, then the local government will say, "We are not going to furnish you with the easements required under the law." Under those circumstances the Government of the United States will be forced to condemn or to buy the railroad property, and the railroad is not going to contribute when it knows that the Government of the United States is to pay for it.

Mr. WALSH. The fact the Senator is now stressing, which I confess I did not grasp earlier, is that flood-control projects are for the benefit of the railroads.

Mr. WHEELER. Exactly.

Mr. WALSH. That they will prevent them suffering damages because of floods, and that therefore the railroads themselves ought to bear the expense, rather than the local communities or the Federal Government.

Mr. WHEELER. We get a pretty good idea of the situation if we consider the railroads between here and Pittsburgh, and we will see where they are working and building up their roadbeds which suffered as a result of the floods on the nearby rivers. The railroads are going to be benefited by this flood-control legislation as much as practically anybody else in the country will be benefited.

Mr. WALSH. The Senator can conceive, as I can, the possibility of it being necessary to relocate a railroad, a change which would be of benefit to the railroad.

Mr. WHEELER. That is true, and in such case the local government could make a better deal with the railroad than could the Federal Government, because the Federal Government, regardless of whether the railroad is benefited or not, is bound to pay for the relocation.

Mr. WALSH. In other words, the additional value by reason of the relocation of the railroad is an offset against the damages?

Mr. WHEELER. Exactly. Assuming, for the sake of the argument, a railroad that is to be greatly benefited by reason of a flood-control dam, they may have to relocate the railroad anyway, but the Government comes along and builds a dam, and then they say to the Government of the United States, "You have to pay us for relocating our railroad which is being washed out by floods."

Mr. MINTON. Mr. President, will the Senator yield?

Mr. WHEELER. I yield.

Mr. MINTON. It would not be possible to set off in a condemnation suit any betterment or advantage which a railroad might receive?

Mr. WHEELER. No.

Mr. MINTON. They are entitled to market value, or reproduction cost?

Mr. WHEELER. Exactly.

Mr. MINTON. The betterment, if any, could not be set off?

Mr. WHEELER. It could not be.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Pennsylvania [Mr. GUFFEY], as modified, to the amendment of the committee.

Mr. SHIPSTEAD. Mr. President, how was the amendment modified?

The PRESIDING OFFICER. The clerk will read the amendment to the amendment as modified.

The CHIEF CLERK. In the committee amendment, on page 55, line 10, after the word "project", it is proposed to insert "exclusive of construction costs of railroads and relocations of improved highways."

The PRESIDING OFFICER. The question is on agreeing to the modified amendment of the Senator from Pennsylvania to the committee amendment.

Mr. SHIPSTEAD. On that question I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk called the roll.

Mr. VANDENBERG. I announce that the senior Senator from Oregon [Mr. MCNARY] is necessarily absent from the Senate. He has a pair with the senior Senator from Mississippi [Mr. HARRISON]. If present, the Senator from Oregon would vote "nay" on this question.

Mr. BILBO. I have a general pair with the Senator from Iowa [Mr. DICKINSON]. I transfer that pair to the Senator from Utah [Mr. THOMAS], and will vote. I vote "yea."

I am not advised how either the Senator from Iowa or the Senator from Utah would vote on this question if present.

Mr. AUSTIN. I announce the general pairs of the Senator from Delaware [Mr. TOWNSEND] with the Senator from Tennessee [Mr. MCKELLAR], and the Senator from North Dakota [Mr. NYE] with the Senator from Maryland [Mr. RADCLIFFE].

Mr. ROBINSON. I announce that the Senator from Alabama [Mr. BANKHEAD], the Senator from Colorado [Mr. COSTIGAN], and the Senator from Nevada [Mr. MCCARRAN] are detained from the Senate on account of illness.

The Senator from North Carolina [Mr. REYNOLDS] is detained on account of a death in his family.

The Senator from Arizona [Mr. ASHURST], the Senator from South Dakota [Mr. BULOW], the Senator from Nebraska [Mr. BURKE], the Senator from South Carolina [Mr. BYRNES], the Senator from Massachusetts [Mr. COOLIDGE], the Senator from Illinois [Mr. DIETERICH], the Senator from Georgia [Mr. GEORGE], the Senator from Virginia [Mr. GLASS], the Senator from Oklahoma [Mr. GORE], the Senator from Mississippi [Mr. HARRISON], the Senator from Utah

[Mr. KING], the Senator from Illinois [Mr. LEWIS], the Senator from California [Mr. MCADOO], the Senator from Tennessee [Mr. MCKELLAR], the Senator from New Jersey [Mr. MOORE], the Senators from Maryland [Mr. TYDINGS and Mr. RADCLIFFE], the Senator from Georgia [Mr. RUSSELL], the Senator from Utah [Mr. THOMAS], the Senator from Indiana [Mr. VAN NUYS], the Senator from New York [Mr. WAGNER], and the Senator from Massachusetts [Mr. WALSH] are unavoidably detained.

The result was announced—yeas 11, nays 52, as follows:

YEAS—11

Bachman	Black	Davis	Neely
Barkley	Bone	Guffey	Schwellenbach
Bilbo	Chavez	Logan	

NAYS—52

Adams	Connally	Holt	Overton
Austin	Copeland	Johnson	Pittman
Bailey	Couzens	Keyes	Pope
Barbour	Donahey	La Follette	Robinson
Benson	Duffy	Lonergan	Sheppard
Borah	Fletcher	Long	Shipstead
Brown	Frazier	McGill	Smith
Bulkley	Gerry	Maloney	Steiwer
Byrd	Gibson	Metcalf	Thomas, Okla.
Capper	Hale	Minton	Truman
Caraway	Hastings	Murphy	Vandenberg
Carey	Hatch	Murray	Wheeler
Clark	Hayden	O'Mahoney	White

NOT VOTING—32

Ashurst	Dieterich	McCarran	Reynolds
Bankhead	George	McKellar	Russell
Bulow	Glass	McNary	Thomas, Utah
Burke	Gore	Moore	Townsend
Byrnes	Harrison	Norbeck	Tydings
Coolidge	King	Norris	Van Nuys
Costigan	Lewis	Nye	Wagner
Dickinson	McAdoo	Radcliffe	Walsh

So Mr. GUFFEY's modified amendment to the committee amendment was rejected.

Mr. SHEPPARD. Mr. President, I send to the desk an amendment to the survey section, which I ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment on page 111, after line 7, it is proposed to insert "Lower Colorado River, Tex."

Mr. COPELAND. The committee has no objection to that amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Texas to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. GIBSON. Mr. President, I offer an amendment, which I ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment on page 55, line 24, after the word "war", it is proposed to insert:

With the consent of the State wherein the same are located.

Mr. COPELAND. We have no objection to that amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Vermont to the committee amendment.

The amendment to the amendment was agreed to.

Mr. CAREY. Mr. President, I send to the desk an amendment, which I ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment on page 114, line 18, it is proposed to insert the following:

Snake River and tributaries, North Platte River, Big Horn River, Green River, Belle Fourche River and tributaries, Powder River and tributaries in Wyoming.

Mr. COPELAND. The committee has no objection to that amendment.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Wyoming to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. CAPPER. Mr. President, I offer an amendment, which I ask to have stated.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 75, after line 21, it is proposed to insert the following:

Morris County on Grand (Neosho) River in Kansas: Channel straightening and dikes from present dike at Council Grove to Lyon County line, and permanent repairs to dikes and dredging to protect city of Council Grove; surveys to be completed and data in Office of the Chief of Engineers; cost, $150,000.

Mr. COPELAND. Mr. President, the committee could not agree to that amendment. I am sorry, but the Army Engineers have made an adverse report. It is not economically justified. I suggest to the Senator that he include the river in the survey section so we may have an early report in the hope that at the beginning of the next session something definite may be done about it.

Mr. CAPPER. Very well. I withdraw the amendment as offered and offer the modified amendment to the survey section.

Mr. COPELAND. The Senator does not propose to include the amount of money as stated in the amendment as originally offered, but just to have provision made for survey?

Mr. CAPPER. Yes.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. In the committee amendment, on page 111, after line 22, it is proposed to insert:

Morris County on Grand (Neosho) River in Kansas.

The amendment to the amendment was agreed to.

Mr. CAPPER. I offer another amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment to the committee amendment will be stated.

The CHIEF CLERK. On page 99 it is proposed to strike out lines 7 to 11, inclusive, and in lieu thereof to insert:

Lawrence, North Lawrence, and immediately contiguous area, on Kansas River, Kans.: Levees and interior drainage to protect people, city property, and highly productive rural area; plan of Douglas County Kaw Drainage District as recommended by Chief of Engineers to Works Progress Administration; cost $334,000.

Mr. COPELAND. Mr. President, I am sorry, but this item has not received a favorable report from the Board of Army Engineers. I make the same suggestion, that the river be made the subject of a survey and included in the survey section. The committee could not accept the amendment as offered.

Mr. CAPPER. Very well; I withdraw the amendment as offered, and send a modified amendment to the desk.

The PRESIDING OFFICER. The amendment as modified will be stated.

The CHIEF CLERK. In the committee amendment on page 111, after line 22, it is proposed to insert:

Lawrence, North Lawrence, and immediately contiguous areas, on Kansas River, Kans.

The amendment to the amendment was agreed to.

Mr. CAPPER. Mr. President, I send to the desk another amendment.

The PRESIDING OFFICER. The amendment to the committee amendment will be stated.

The CHIEF CLERK. On page 99, after line 11, it is proposed to insert:

Manhattan, Kans.: Levees and channel improvement of the Kansas River to protect town; House Document No. 195, Seventy-third Congress, second session; estimated cost, $155,300.

Mr. COPELAND. Mr. President, I am sorry, but the situation is the same as with reference to the other amendments. The Senator from Kansas offered a number of projects which were carefully considered by the committee. Among those on which we could not obtain a favorable report was this particular one. I suggest that the amendment be modified and inserted in the survey section.

Mr. CAPPER. The suggestion is agreeable to me. I offer the amendment in modified form.

The PRESIDING OFFICER. The amendment as modified will be stated.

The CHIEF CLERK. In the committee amendment, on page 111, after line 22, it is proposed to insert:

Manhattan, Kans.

The amendment to the amendment was agreed to.

Mr. CAPPER. I send to the desk another amendment which I offer.

The PRESIDING OFFICER. The amendment to the committee amendment will be stated.

The CHIEF CLERK. On page 98, it is proposed to strike out lines 13 to 19, inclusive, and in lieu thereof insert the following:

Kansas Citys on Missouri and Kansas Rivers in Missouri and Kansas: Levees, flood walls, retention dams, reservoirs, and other works of every character, at and above the Kansas Citys, to protect people and city property; in accordance with plans approved by the Chief of Engineers, on recommendation of the Board of Engineers for Rivers and Harbors and as amended by further surveys and studies now in progress; estimated construction cost not to exceed $10,000,000; estimated cost of lands and damages, $8,000,000.

Mr. COPELAND. Mr. President, the project has been disapproved, and I make the same suggestion as to this item that was made with reference to the preceding amendment.

Mr. KING. Mr. President, if the project has been disapproved, why should it be inserted in the bill at all?

Mr. COPELAND. The project is rejected; but the request of the Senator from Kansas is that the river may at some future time be resurveyed.

Mr. CAPPER. I adopt the suggestion of the Senator from New York and modify the amendment. I send the modified amendment to the desk.

The PRESIDING OFFICER. The amendment as modified will be stated.

The CHIEF CLERK. In the committee amendment, on page 111, after line 22, it is proposed to insert the following:

Kansas Citys, on Missouri and Kansas Rivers, in Missouri and Kansas.

The amendment to the amendment was agreed to.

Mr. CAPPER. I offer another amendment.

The PRESIDING OFFICER. The amendment to the committee amendment will be stated.

The CHIEF CLERK. On page 98, after line 19, it is proposed to insert the following:

Fort Scott, on the Marmaton, tributary of the Osage (Marias des Cygnes) River, Kans.: Levees and track raising to protect area where greatest property value concentrated, along Black Run Creek; House Document No. 91, Seventy-third Congress, first session; cost, $149,300.

Mr. COPELAND. Mr. President, I am sorry. I love the Senator from Kansas so much that I hate to stand here and play the part of "Old Man Gloom", but this project has been disapproved. I suggest that the river be resurveyed.

Mr. CAPPER. The project has been investigated by the office of the Chief of Engineers of the Army and has been found to be justified.

Mr. COPELAND. Mr. President, the Fort Scott on the Marmaton project was reported by the Army Engineers to lack economic justification. The annual cost is estimated at $17,700 as compared with the annual estimated benefit of $12,000. It is plainly not justified economically. Therefore, the committee reported against it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas to the committee amendment.

The amendment to the amendment was rejected.

Mr. CAPPER. Mr. President, I offer the amendment, which I send to the desk.

The PRESIDING OFFICER. The amendment to the committee amendment will be stated.

The CHIEF CLERK. On page 76, after line 2, it is proposed to insert the following:

Lyon and Morris Counties, south of Dunlap, on Grand (Neosho) River in Kansas; levees (unit no. 52) to protect 1,350 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $56,160.

Lyon County, south of Americus, on Grand (Neosho) River in Kansas; levees (unit no. 51) to protect 3,060 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $132,500.

Lyon County, southwest of Emporia, on Grand (Neosho) River in Kansas; levees (unit no. 42) to protect 2,520 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $114,000.

Lyon County, south of Emporia, on Grand (Neosho) River in Kansas; levees (unit no. 41) to protect 4,000 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $117,100.

Coffey and Woodson Counties, north of Neosho Falls, on Grand (Neosho) River in Kansas; levees (unit no. 29) to protect 5,220 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $227,700.

Construction of the following flood-control works along the Grand (Neosho) River in Neosho County, Kans.; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers:

Just north of Labette County line on west side of the river (unit no. 10); levees to protect 790 acres of land; cost, $150,390.

Southeast of St. Paul on east side of the river (unit no. 11); additional levee raising made necessary by other levees proposed in Neosho County if constructed to complete the protection of 10,450 acres of land; cost, $327,300.

Around St. Paul on east side of river (unit no. 12); levees to protect 2,790 acres of land; cost, $346,010.

West of St. Paul on west side of river (unit no. 13); levees to protect 2,450 acres of land; cost, $247,580.

West and south of Erie on east side of river (unit no. 14); levees to protect 4,320 acres of land; cost, $329,660.

South of Shaw on west side of river (unit no. 15); levees to protect 750 acres of land; cost, $122,630.

North of Shaw on east side of river (unit no. 16); levees to protect 750 acres of land; cost, $112,570.

West of Rollin on east side of river (unit no. 17); levees to protect 1,500 acres of land; cost, $160,630.

West of Rollin on west side of river (unit no. 18); levees to protect 830 acres of land; cost, $61,070.

North and east of Chanute on west side of river (unit no. 19); levees to protect 1,980 acres of land; cost, $239,870.

North of Chanute on west side of river (unit no. 20); levees to protect 1,300 acres of land; cost, $191,450.

Neosho County, southeast of St. Paul, on Grand (Neosho) River in Kansas; levees (unit no. 11) to protect 10,450 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $389,200.

Labette County, east of Parsons, on Grand (Neosho) River in Kansas; levees (unit no. 8) to protect 2,980 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $102,600.

Cherokee and Labette Counties, north of Oswego, on Grand (Neosho) River in Kansas; levees (unit no. 7) to protect 4,280 acres of land; report to Congress in course of being published, survey completed and data in Office of Chief of Engineers; cost, $150,000.

Cherokee County, southeast of Oswego, on Grand (Neosho) River in Kansas; levees (unit no. 5) to protect 3,920 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $161,100.

Ottawa and Cherokee Counties, Okla. and Kans., on Grand (Neosho) River; levees (unit no. 3) to protect 6,100 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $175,100.

Ottawa County, west of Miami, on Grand (Neosho) River in Oklahoma; levees (unit no. 1) to protect 2,520 acres of land; report to Congress in course of being published; survey completed and data in Office of Chief of Engineers; cost, $89,860.

Mr. COPELAND. Mr. President, this blanket proposal received very serious study on the part of the committee. I am sorry to say that, without exception, there was found to be no economic justification for it. For example, take the case of Lyon County: The investment of a dollar there would bring a return of only 9 cents. So these various projects all fall below the standard of a dollar of return for every dollar invested. Much as I hesitate to say so, they are matters which were before the committee and studied by the committee and referred to the Army Engineers, and we must advise against their adoption.

Mr. CAPPER. Mr. President, the Neosho River is one of the most important streams in southeastern Kansas. It flows through a number of the leading agricultural counties of the State, and its valley contains much valuable farm land. It follows a winding course, and its banks are comparatively shallow. On that account it is subject to frequent floods and is considered one of the most destructive streams in the State. Not infrequently the stream is at flood stage two or three times each year.

To protect themselves against its floodwaters, farmers and other citizens living in the valley of the Neosho organized a number of drainage or levee districts and constructed flood-control dikes or levees. However, recurring floods have so damaged the levees as to make them all but useless; and the constant losses suffered by residents of the valley have been such as to render them financially unable to maintain the flood-protection system.

Commenting on the flood situation along the Neosho in a letter to me under date of December 9, 1935, the Acting Chief of Engineers of the Army said:

> This Department has completed a survey of the Neosho River under the provisions of House Document No. 308, Sixty-ninth Congress, first session. This survey developed that since the first levees were built in Neosho County in 1892 their construction has spread throughout the valley without any coordinated plan of construction. Many levees have so encroached on the flood plain as to create a menace by constricting the floodway; and few of the levees, if any, are adequate in size. A complete levee program for the valley would, by eliminating valley storage, result in practically doubling the natural flood flow at the Kansas-Oklahoma line and would so raise the flood line as to seriously interfere with the bridges, railroad, and highway crossings. The better-situated lands can be economically protected by levee systems.

The property loss resulting from these floods has been very great. It is to protect the citizens living in the Neosho Valley that the projects covered by my amendment are requested. These projects have been examined by the Office of the Chief of Engineers and have been declared to be meritorious. I feel that they are justified from every standpoint, and I hope favorable action may be taken on the amendment authorizing them.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Kansas to the amendment of the committee.

The amendment to the amendment was rejected.

Mr. GIBSON. Mr. President, I offer an amendment to the survey section.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 114 it is proposed to insert:

> West River, Vt., between Weston and Brattleboro.

The PRESIDING OFFICER. The Chair will state that this is an amendment to the survey section. Is there any objection to it on the part of the committee?

Mr. COPELAND. No objection.

Mr. KING. Mr. President, I desire to ask the Senator from New York three questions.

The first is, How many surveys are authorized under the bill?

The second question is, If all these authorizations were carried out, how much money would it take?

The third question is, How many engineers will have to be employed, in addition to all the Army Engineers, in order to make these surveys?

Mr. COPELAND. No more engineers will be employed than are now employed. The amount of money we have authorized in the bill for surveys is $5,000,000. Some of the surveys proposed today will be made at some time within the next 20 years.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Vermont to the survey section of the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. ROBINSON. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 72, after line 17, it is proposed to insert the following:

> Faulkner County on Arkansas River, levee district no. 1: To protect agricultural lands; cost, $100,000.

Mr. COPELAND. Mr. President, this project is still a matter in debate among the Army Engineers. It stands on a different plane from any other project which has been presented. For myself, I should be willing to take this particular item to conference, because of the fact that it is still under discussion among the Army Engineers.

Mr. ROBINSON. Very well. In addition to what the Senator from New York has said, I will state that this item represents a gap in a system which I feel it is imperative to have completed if it can be done.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Arkansas to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. CHAVEZ. Mr. President, I offer an amendment to the survey section.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. At the proper place in the bill, it is proposed to insert:

> Dry Cimarron River, Union County, N. Mex.

Mr. COPELAND. I have no objection to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from New Mexico to the amendment of the committee.

The amendment to the amendment was agreed to.

Mr. MCGILL. Mr. President, I offer an amendment to the survey section.

The PRESIDING OFFICER. The amendment to the amendment will be stated.

The CHIEF CLERK. After line 1, page 112, it is proposed to add the following:

> Big Blue River, Kans.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Kansas to the amendment of the committee.

The amendment to the amendment was agreed to.

The PRESIDING OFFICER. The bill is still before the Senate and open to further amendment.

Mr. COPELAND. Mr. President, we have now completed everything relating to the first part of the bill, the printed part of the bill. The amendments have all been agreed to; the surveys are all in, and I now ask that this title, as amended, be adopted. There is another amendment which is the second title.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York?

Mr. BYRD. Mr. President, I should like to have the Senator indicate the pages to which he refers.

Mr. COPELAND. My request has nothing to do with title II, in which the Senator from Virginia is interested. It is the printed part of the bill as the Senator has it before him.

Mr. BYRD. The entire bill?

Mr. COPELAND. The entire bill as amended. We have now gone through every section of it, everything except title II, which is not printed, but is an amendment I am about to offer.

The PRESIDING OFFICER. Is there objection to the request of the Senator from New York to vote upon title I of the bill?

Mr. KING. Mr. President, I have no objection to the manner in which approval or disapproval of the bill in its present form may be brought about. I merely wish to state that I am opposed to the bill in its present form, and I am opposed to it in any form it will assume, judging from any information we have thus far derived. If there is not to be a yea-and-nay vote upon the motion just made by the Senator from New York, I desire to have the RECORD show that the senior Senator from Utah voted "nay."

Mr. BYRD. Mr. President, I should like the RECORD to show that had there been a yea-and-nay vote I should have voted in the negative; and my colleague [Mr. GLASS], who is unavoidably absent, also would have voted in the negative.

The PRESIDING OFFICER. The question is on agreeing to title I of the amendment in the nature of a substitute, as amended. [Putting the question.] The "ayes" have it, and title I, as amended, is agreed to.

Mr. COPELAND. Mr. President, I now offer the amendment to be known as title II, and ask to have it read.

The PRESIDING OFFICER. The amendment offered by the Senator from New York will be stated.

The CHIEF CLERK. On page 116, after line 2, it is proposed to insert:

TITLE II

SEC. 1. There is hereby established a National Resources Board (hereinafter referred to as the Board) to be composed of five members, not more than three of whom shall belong to the same political party, to be appointed by the President by and with the advice and consent of the Senate. Each member shall receive a salary at the rate of $10,000 per year.

SEC. 2. The Board shall determine the rules of its own proceedings and a majority of its members shall constitute a quorum for the transaction of business.

SEC. 3. The Board is authorized, without regard to the provisions of other laws applicable to the employment and compensation of officers and employees of the United States, to appoint for such period or periods of full- or part-time service, a director and such officers, consultants, attorneys, experts, and research assistants, and to fix the compensation of each on such annual, per-diem, or other basis, as may be necessary in carrying out the functions of the Board under this act, and the Board may, subject to the civil-service laws, appoint such other employees as are necessary in the execution of its functions and fix their salaries in accordance with the Classification Act of 1923, as amended. The Board may make such expenditures (including expenditures for personal services and travel and for office rent and equipment at the seat of government and elsewhere, and for law books, books of reference, and periodicals) as may be necessary for the administration of this act, and as may be provided for by the Congress from time to time. There is hereby authorized to be appropriated annually such sums as may be necessary for the expenses of the Board.

SEC. 4. The Board is authorized (a) to investigate, examine, study, analyze, assemble, and coordinate, and periodically to review and revise basic information and materials appropriate to plans for the conservation and development of the natural resources of the Nation, and on the basis thereof to initiate and propose in an advisory capacity such plans and planning policies; (b) in furtherance of these ends to consult with any existing or future agencies of the Federal Government and of any State or local government, as well as with any public or private planning or research agencies and institutions; (c) to prepare and submit studies, reports, and recommendations upon matters within its jurisdiction under this act whenever the President or the Congress may request a study, report, or recommendation from the Board upon any such matter; and (d) to set up a special advisory council and to constitute such other agencies as the Board may deem necessary or appropriate to assist in the carrying out of its works.

SEC. 5. The Board shall prepare and present each year to the President and to Congress a report setting forth and summarizing its work during the preceding year, and shall include therein such information, data, and recommendation for further legislation as the Board may deem advisable with regard to matters within its jurisdiction under this act.

SEC. 6. The National Resources Committee created by Executive Order No. 7065, dated June 7, 1935 (hereinafter referred to as the old board), shall cease to exist at such time as the President shall determine; and thereafter all records, papers, property, and funds of the old board shall be transferred to the Board; and such employees of the old board as shall be designated by the Board and shall pass noncompetitive tests of fitness prescribed by the Civil Service Commission shall acquire classified civil-service status and shall become employees of the Board at the grades and salaries specified in their respective examinations: *Provided*, That this section shall not be construed to impair any obligation incurred by the old board.

SEC. 7. This title may be cited as the National Resources Board Act of 1936.

The PRESIDING OFFICER. The question is on the adoption of the amendment designated as title II.

Mr. O'MAHONEY. Mr. President, on behalf of the chairman of the Committee on Public Lands and Surveys, the junior Senator from New York [Mr. WAGNER], who is unavoidably absent, I move that the amendment offered by the senior Senator from New York [Mr. COPELAND] be referred to the Committee on Public Lands and Surveys.

The amendment was considered this morning by the Committee on Public Lands and Surveys, and the chairman was authorized by the committee to make the motion which I have now presented to the Senate.

It may be proper to point out that within the month the Senate passed a measure, which had been approved by the Committee on Public Lands and Surveys, changing the name of the Department of the Interior to the Department of Conservation. This Department includes among its bureaus the United States Geological Survey, the Bureau of Mines, the Bureau of Reclamation, and the General Land Office, all of which deal with national resources. Among its employees are any number of experts who are fully qualified to pass upon all the questions which will be considered by the board proposed to be created by this amendment.

The Committee on Public Lands and Surveys, of course, has no purpose of expressing any view at the present time as to whether or not such legislation as this should be enacted, indeed, speaking for myself, let me say I recognize the value of the principle, but it desires to call the attention of the Senate to the fact that a similar bill was introduced in the House of Representatives by Representative MAVERICK, House bill 10303, on January 16 of this year, and was referred to the Committee on Public Lands of the House. It was recognized as the proper committee to deal with the subject matter. A similar bill was introduced in the Senate during the last session by the senior Senator from New York [Mr. COPELAND], and referred to the Committee on Commerce, from which it was reported in June of last year, without hearings, as I am informed. That measure has been upon the calendar of the Senate since that time. In other words, it has been on the calendar of this body throughout this session, and whenever the calendar has been called it has always been objected to, because Members of the Senate have not had the opportunity of giving the attention to the measure which it quite obviously deserves.

It seems to be a little inappropriate to pass, as a rider to a flood-control bill, a measure which would undertake to establish an altogether new agency of Government. During the year 1933, after the passage of the National Industrial Recovery Act, when the President was authorized to make certain emergency expenditures, the National Resources Committee was established by Executive order. The members of that committee are, among others, the Secretary of the Interior, as chairman, the Secretary of War, the Secretary of Commerce, the Secretary of Labor, and other individuals. Each of these Secretaries serves without compensation in addition to that which he receives as head of his department.

The pending amendment would create a new commission of five members, each of whom would receive an annual salary of $10,000.

Mr. CLARK. The salary was $12,000 until the committee cut it down to $10,000.

Mr. O'MAHONEY. The Senator is correct; it was $12,000 in the bill reported by the Committee on Commerce at the last session.

It seems, therefore, that there is no particular reason for hurrying through, as a rider, a measure which might have the effect of taking over the functions of the Department of the Interior.

Moreover, this has to do with the resources of the United States. Most of those resources which are not contained in private lands in the Eastern States are to be found in the public domain, in the Western States, and it seems to the Committee on Public Lands and Surveys that a measure which deals so intimately with the vital concerns of the public-land States should not be lightly considered, without the action of the appropriate committee, and the appropriate committee in this instance is the Committee on Public Lands and Surveys.

I do not know that it is necessary for me at this time to make any further comment upon the reasons for the motion to refer the amendment to the Committee on Public Lands for proper consideration by that committee.

Mr. PITTMAN. Mr. President, I intend to support the motion made by the Senator from Wyoming [Mr. O'MAHONEY]. I was present at the meeting of the Committee on Public Lands and Surveys this morning when this proposed amendment was called to the attention of the committee. The committee was unanimous in its view on the matter, as that view has been expressed so clearly by the Senator from Wyoming.

I should say, in the first place, that the pending bill is not a measure to which should be attached such an amendment as this. It certainly comes as a surprise. I doubt very

seriously, from what I have heard, whether it had careful consideration in the Committee on Commerce, as it was a matter entirely foreign to the main legislation.

There is already an interdepartmental committee set up to study and report on this very subject, and it consists of the heads of the departments which deal with our natural resources; for instance, the Department of Agriculture, which deals with our forest reserves, with reforestation, soil erosion, and various other subjects. Then there is the Department of the Interior, which deals generally with all the public lands, with minerals, through the Bureau of Mines, with public surveys, and with power projects. Again, there is the War Department, which deals, to a certain extent, with navigable rivers. In other words, conservation is handled by several departments of the Government, and the departments are dealing through a board which attempts to coordinate the various activities.

Now, we have before us an amendment which provides for the appointment of a board of five members, who are to draw $10,000 a year, who are to be allowed to appoint experts, attorneys, geologists, and engineers, without limitation as to the expenses they may incur. There is absolutely no limitation fixed in the amendment.

The amendment has not been considered, and it should be considered. I think it would be very unfortunate at this time to attempt to establish a great bureau of this kind, without limit on the expense it may incur, without designation of authority, when it is not needed, and the question has not been studied.

Mr. O'MAHONEY. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield.

Mr. O'MAHONEY. I desire to call the attention of the Senator to the fact that section 2 of the amendment, as I read it, authorizes the board to determine the rules of its own procedure, and the regulations under which it shall carry on. Certainly that provision ought to be considered seriously by a committee of the Senate.

Mr. PITTMAN. The board would be absolutely unlimited as to functions or as to appropriations.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. PITTMAN. I yield.

Mr. CLARK. I call the attention of the Senator to the fact that as the amendment is at present drawn, there is absolutely no limit whatever to the terms of the commissioners to be appointed. In other words, by the amendment as it now stands they are apparently to be appointed for as long as they live.

Mr. PITTMAN. There is not a limitation in the whole amendment.

Mr. HAYDEN. Mr. President, if I believed that the term "national resources" should be confined to lands or property of the United States, I would agree that there was force to the suggestion made by the Senator from Wyoming that this amendment be referred to the Committee on Public Lands and Surveys, because that committee has jurisdiction over the public domain. But it is not the purpose of title II, as it is presented, to confine the national resources board to a mere consideration of what should be done with property of the United States, and it is so stated in the amendment itself:

> The board is authorized (a) to investigate, examine, study, analyze, assemble, and coordinate, and periodically to review and revise, basic information and materials appropriate to plans for the conservation and development of the natural resources of the Nation.

The natural resources of the Nation to a vast extent are in private ownership. Because the coal in a mine or a stand of timber belongs to some individual or to a corporation does not mean that they are not natural resources of the Nation. So, this proposal is not one which deals solely with public lands or public property.

As I view the amendment, its purpose is quite parallel with what was done when the General Staff of the Army was created. The President ought to have a general staff on problems of natural resources, and that is what title II would accomplish in establishing a permanent national resources board.

Elihu Root was not only Secretary of War but a great Secretary of War. In the years after he left that office he often said that the chief accomplishment of his service was the establishment of a General Staff for the Army. A statement that he made in his annual report of 1902 may be paraphrased as an argument for a general staff for our national resources. Its application to flood control is obvious. Secretary Root said:

> Such a body of men doing General Staff duty is just as necessary to prepare an army properly for war in time of peace as it is in time of war. It is not an executive body; it is not an administrative body; it acts only through the authority of others. It makes intelligent command possible by procuring and arranging information and working out plans in detail, and it makes intelligent and effective execution of commands possible by keeping all the separate agents advised of the parts they are to play in the general scheme.

Mr. O'MAHONEY. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. O'MAHONEY. Is it not a fact that the general staff to which the Senator refers was a general staff within the War Department under the Secretary of War? Under the pending amendment we create a general staff which is altogether independent of the Secretary of the Interior. The propriety of having the national resources surveyed by the Department of which the Secretary of the Interior is the head was recognized in the Executive order which first created the board, because that order made the Secretary of the Interior chairman of the board. What this amendment does is to break down the coordination between the two, and to set up an altogether independent establishment, which can result in nothing else but friction, and cause cross purposes to exist between the bodies.

Mr. HAYDEN. Again I say that if all the natural resources of the country were now under the jurisdiction of the Department of the Interior it would not be necessary to establish such a board as is proposed by the committee amendment. But the Senator from Wyoming knows as well as I do that other great Departments, such as the Department of Agriculture, the War Department, and other agencies of the Government have much to do with natural resources. Congress cannot, therefore, consign this problem to one department or to the supervision of any one department. The functions of a natural resources board must cover the scope of many branches of the Federal Government both in an informational and educational way and in a coordinating and advisory capacity. I quote from the hearings on S. 2825 to make it clear that the board is to exercise no executive power.

> 2. That the functions of the board should be advisory and not executive and should include: (a) Coordination of planning policies within the Federal Government; (b) coordination of planning policies between Federal, State, and local jurisdictions; (c) stimulation and assistance to the planning agencies within the Federal Government and in regions, States, and localities; (d) fundamental research directed toward the development of basic national policies and programs.

If Senators will realize the clear distinction between a board created purely to acquire information and to advise, which is staff work, and the executive functions of the various departments, they can appreciate the great advantage which will accrue, in the establishment of wise policies, in dealing with our national resources by reason of the establishment of such a staff. If the duty of fixing broad policies be given to the head of any one of the 10 departments, then friction will result, because no head of one department can do so without treading on the toes of another executive. Therefore the national resources board should be a separate and distinct organization with no executive powers of any kind.

Mr. PITTMAN. May I ask the Senator a question? Is there any particular reason why the Commerce Committee should have more to do with natural resources than the Department of Agriculture or the Department of the Interior?

Mr. HAYDEN. It was entirely appropriate, I may say to the Senator, in its consideration of this great flood-control bill, Nation-wide in its scope, for the Commerce Committee, although the committee has nothing to do with legislation relating to the Department of Agriculture, to amend the bill by providing that that Department shall make investigations and reports upon watersheds with respect to flood control.

Mr. PITTMAN. Do not the Army and the Navy generally accomplish more for the protection of our natural resources than is accomplished by the Board of Army Engineers in their particular field?

Mr. HAYDEN. By way of keeping foreign enemies from invading our country, the Army and Navy do protect its resources. The point I am making, however, is that the Committee on Commerce did recognize that there was another department outside of the War Department which could render real service in flood control.

Mr. PITTMAN. Did the Commerce Committee have anything to do with it?

Mr. HAYDEN. Yes; it reported out the pending amendment to this bill.

Mr. PITTMAN. Did the committee call any of those on the conservation board at present?

Mr. HAYDEN. I am not a member of that committee, and I cannot answer the Senator's question.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. CLARK. The amendment was never considered by the Committee on Commerce at all until after the bill had been reported in the Senate, except that an elaborate hearing was held on the bill itself. After the bill was reported in the Senate the Senator from Arizona introduced an amendment comprising six separate committee amendments, and the Committee on Commerce considered them from 11:30 one day to 12:20 the same day. No one appeared at that time before the committee except the Senator from Arizona.

Mr. PITTMAN. Was the report of the committee a unanimous one?

Mr. CLARK. No.

Mr. PITTMAN. I do not care to debate the question any more. If we are to take up the amendment we must frame the amendment properly on the floor of the Senate, which will take several hours.

Mr. VANDENBERG. Mr. President, will the Senator yield to me for the purpose of addressing a question to the Senator from New York?

Mr. HAYDEN. I yield.

Mr. VANDENBERG. There was a substantial division in the Commerce Committee over this amendment. It is a rider to the main purpose of the bill. The Senator from New York has made a perfectly splendid record in protecting this bill against riders, and I want to appeal to him in the name of consistency, with the thoroughly splendid record he has made on the bill, to permit this amendment to go to the committee as requested by the Senator from Wyoming.

Mr. HAYDEN. The Senator from New York may answer the question in his own time but I should like to conclude my remarks.

The Army has found the General Staff an indispensable agency for the development of coordinating plans. Their experience does not show that the General Staff is in any way an interference with the full prerogatives and duties of the separate branches of our national defense. The national resources board as provided in the pending amendment would not interfere with the duties of any department of the Government, but would make possible an over-all view of the relations between the activities of all of the agencies concerned in the development or conservation of the resources of the Nation.

The planning work which the national resources board will do has nothing to do with the talk about regimentation and control which we hear so much of in the press these days. Regimentation and control go with the execution of plans. What the amendment provides for is the initiation, devising, or formulation of alternative lines of policy. Choice of the final action is left to the Congress and the President.

The work of the national resources board during these last 2 years demonstrates the possibility of decentralized planning work through the assistance given to State planning agencies and regional planning agencies. The opinions and desires of citizens throughout the country are made vocal and effective. The board which produced these fine results has done some wonderful work bringing together Federal agencies and State agencies in a cooperative attack on the waste and exploitation of our natural resources.

Congress cannot expect the President to bring together all of these varying interests concerned with flood control and decide all the issues personally. He must have a "general staff" to assist him. We know by experience of the last 2 years how useful such a staff may be, and it is obvious that this work can be carried on economically and effectively through the adoption of this amendment.

I desire to conclude my remarks by reading an extract from a recent editorial in the Wall Street Journal which indicates the line of demarcation between advisory authority or staff duty and executive authority. I quote:

> Economic planning has become a catch phrase signifying an effort to control production, prices, wages, credit, and a host of other things in accordance with the dictates of Federal bureaucrats. The type of planning advocated by the National Resources Committee in its latest report is of an entirely different nature. In essence, it would seek to provide continuing expert knowledge for the guidance of all types of governmental units, but such knoweldge would be offered in an advisory capacity only.
